

Title 50—Wildlife and Fisheries

(This book contains part 600 to end)

	<i>Part</i>
CHAPTER VI—Fishery Conservation and Management, National Oceanic and Atmospheric Administration, Department of Commerce	600

CHAPTER VI—FISHERY CONSERVATION AND MANAGEMENT, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

EDITORIAL NOTE: Nomenclature changes to Chapter VI appear at 69 FR 53361, 53362, Sept. 1, 2004.

<i>Part</i>		<i>Page</i>
600	Magnuson-Stevens Act provisions	5
622	Fisheries of the Caribbean, Gulf, and South Atlantic	153
635	Atlantic highly migratory species	244
640	Spiny lobster fishery of the Gulf of Mexico and South Atlantic	299
644	[Reserved]	
648	Fisheries of the Northeastern United States	310
654	Stone crab fishery of the Gulf of Mexico	555
660	Fisheries off West coast states and in the Western Pacific	568
679	Fisheries of the Exclusive Economic Zone off Alaska	816
680	Shellfish fisheries of the Exclusive Economic Zone off Alaska	1122
697	Atlantic coastal fisheries cooperative management	1212

PART 600—MAGNUSON-STEVENS ACT PROVISIONS

Subpart A—General

Sec.

- 600.5 Purpose and scope.
- 600.10 Definitions.
- 600.15 Other acronyms.

Subpart B—Regional Fishery Management Councils

- 600.105 Intercouncil boundaries.
- 600.110 Intercouncil fisheries.
- 600.115 Statement of organization, practices, and procedures (SOPP).
- 600.120 Employment practices.
- 600.125 Budgeting, funding, and accounting.
- 600.130 Protection of confidentiality of statistics.
- 600.135 Meeting procedures.
- 600.150 Disposition of records.
- 600.155 Freedom of Information Act (FOIA) requests.

Subpart C—Council Membership

- 600.205 Principal state officials and their designees.
- 600.210 Terms of Council members.
- 600.215 Council nomination and appointment procedures.
- 600.220 Oath of office.
- 600.225 Rules of conduct.
- 600.230 Removal.
- 600.235 Financial disclosure.
- 600.240 Security assurances.
- 600.245 Council member compensation.

Subpart D—National Standards

- 600.305 General.
- 600.310 National Standard 1—Optimum Yield.
- 600.315 National Standard 2—Scientific Information.
- 600.320 National Standard 3—Management Units.
- 600.325 National Standard 4—Allocations.
- 600.330 National Standard 5—Efficiency.
- 600.335 National Standard 6—Variations and Contingencies.
- 600.340 National Standard 7—Costs and Benefits.
- 600.345 National Standard 8—Communities.
- 600.350 National Standard 9—Bycatch.
- 600.355 National Standard 10—Safety of Life at Sea.

Subpart E—Confidentiality of Statistics

- 600.405 Types of statistics covered.
- 600.410 Collection and maintenance of statistics.
- 600.415 Access to statistics.
- 600.420 Control system.

- 600.425 Release of statistics.

Subpart F—Foreign Fishing

- 600.501 Vessel permits.
- 600.502 Vessel reports.
- 600.503 Vessel and gear identification.
- 600.504 Facilitation of enforcement.
- 600.505 Prohibitions.
- 600.506 Observers.
- 600.507 Recordkeeping.
- 600.508 Fishing operations.
- 600.509 Prohibited species.
- 600.510 Gear avoidance and disposal.
- 600.511 Fishery closure procedures.
- 600.512 Scientific research.
- 600.513 Recreational fishing.
- 600.514 Relation to other laws.
- 600.515 Interpretation of 16 U.S.C. 1857(4).
- 600.516 Total allowable level of foreign fishing (TALFF).
- 600.517 Allocations.
- 600.518 Fee schedule for foreign fishing.
- 600.520 Northwest Atlantic Ocean fishery.
- 600.525 Applicability of Subpart F to Canadian Albacore Fishing Vessels off the West Coast.
- 600.530 Pacific albacore fishery.

Subpart G—Preemption of State Authority Under Section 306(b)

- 600.605 General policy.
- 600.610 Factual findings for Federal preemption.
- 600.615 Commencement of proceedings.
- 600.620 Rules pertaining to the hearing.
- 600.625 Secretary's decision.
- 600.630 Application for reinstatement of state authority.

Subpart H—General Provisions for Domestic Fisheries

- 600.705 Relation to other laws.
- 600.710 Permits.
- 600.715 Recordkeeping and reporting.
- 600.720 Vessel and gear identification.
- 600.725 General prohibitions.
- 600.730 Facilitation of enforcement.
- 600.735 Penalties.
- 600.740 Enforcement policy.
- 600.745 Scientific research activity, exempted fishing, and exempted educational activity.
- 600.746 Observers.
- 600.747 Guidelines and procedures for determining new fisheries and gear.

Subpart I—Fishery Negotiation Panels

- 600.750 Definitions.
- 600.751 Determination of need for a fishery negotiation panel.
- 600.752 Use of conveners and facilitators.
- 600.753 Notice of intent to establish a fishery negotiation panel.

§ 600.5

- 600.754 Decision to establish a fishery negotiation panel.
- 600.755 Establishment of a fishery negotiation panel.
- 600.756 Conduct and operation of a fishery negotiation panel.
- 600.757 Operational protocols.
- 600.758 Preparation of report.
- 600.759 Use of report.
- 600.760 Fishery Negotiation Panel lifetime.

Subpart J—Essential Fish Habitat (EFH)

- 600.805 Purpose and scope.
- 600.810 Definitions and word usage.
- 600.815 Contents of Fishery Management Plans.

Subpart K—EFH Coordination, Consultation, and Recommendations

- 600.905 Purpose, scope, and NMFS/Council cooperation.
- 600.910 Definitions and word usage.
- 600.915 Coordination for the conservation and enhancement of EFH.
- 600.920 Federal agency consultation with the Secretary.
- 600.925 NMFS EFH Conservation Recommendations to Federal and state agencies.
- 600.930 Council comments and recommendations to Federal and state agencies.

Subpart L—Fishing Capacity Reduction Framework

- 600.1000 Definitions.
- 600.1001 Requests.
- 600.1002 General requirements.
- 600.1003 Content of a request for a financed program.
- 600.1004 Accepting a request for, and determinations about initiating, a financed program.
- 600.1005 Content of a request for a subsidized program.
- 600.1006 Accepting a request for, and determinations about conducting, a subsidized program.
- 600.1007 Reduction amendments.
- 600.1008 Implementation plan and implementation regulations.
- 600.1009 Bids.
- 600.1010 Referenda.
- 600.1011 Reduction methods and other conditions.
- 600.1012 Reduction loan.
- 600.1013 Fee payment and collection.
- 600.1014 Fee collection deposits, disbursements, records, and reports.
- 600.1015 Late charges.
- 600.1016 Enforcement.
- 600.1017 Prohibitions and penalties.

50 CFR Ch. VI (10–1–05 Edition)

Subpart M—Specific Fishery or Program Fishing Capacity Reduction Regulations

- 600.1100 General. [Reserved]
- 600.1101 Inshore fee system for repayment of the loan to harvesters of Pollock from the directed fishing allowance allocated to the inshore component under section 206(b)(1) of the AFA.
- 600.1102 Pacific Coast groundfish fee.
- 600.1103 Bering Sea and Aleutian Islands (BSAI) Crab species program.
- 600.1104 Bering Sea and Aleutian Islands (BSAI) Crab species fee payment and collection system.

Subpart N—Shark Finning

- 600.1200 Purpose and scope.
- 600.1201 Relation to other laws.
- 600.1202 Definitions.
- 600.1203 Prohibitions.
- 600.1204 Shark finning; possession at sea and landing of shark fins.

AUTHORITY: 5 U.S.C. 561 and 16 U.S.C. 1801 *et seq.*

SOURCE: 61 FR 32540, June 24, 1996, unless otherwise noted.

Subpart A—General

§ 600.5 Purpose and scope.

(a) This part contains general provisions governing the operation of the eight Regional Fishery Management Councils established by the Magnuson-Stevens Act and describes the Secretary's role and responsibilities under the Act. The Councils are institutions created by Federal law and must conform to the uniform standards established by the Secretary in this part.

(b) This part also governs all foreign fishing under the Magnuson-Stevens Act, prescribes procedures for the conduct of preemption hearings under section 306(b) of the Magnuson-Stevens Act, and collects the general provisions common to all domestic fisheries governed by this chapter.

(c) This part also governs fishing capacity reduction programs under the Magnuson-Stevens Act.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998; 65 FR 31443, May 18, 2000]

§ 600.10 Definitions.

Unless defined otherwise in other parts of Chapter VI, the terms in this chapter have the following meanings:

Fishery Conservation and Management

§ 600.10

Administrator means the Administrator of NOAA (Under Secretary of Commerce for Oceans and Atmosphere) or a designee.

Advisory group means a Scientific and Statistical Committee (SSC), Fishing Industry Advisory Committee (FIAC), or Advisory Panel (AP) established by a Council under the Magnuson-Stevens Act.

Agent, for the purpose of foreign fishing (subpart F), means a person appointed and maintained within the United States who is authorized to receive and respond to any legal process issued in the United States to an owner and/or operator of a vessel operating under a permit and of any other vessel of that Nation fishing subject to the jurisdiction of the United States. Any diplomatic official accepting such an appointment as designated agent waives diplomatic or other immunity in connection with such process.

Aggregate or summary form means confidential data structured in such a way that the identity of the submitter cannot be determined either from the present release of the data or in combination with other releases.

Albacore means the species *Thunnus alalunga*, or a part thereof.

Allocated species means any species or species group allocated to a foreign nation under § 600.517 for catching by vessels of that Nation.

Allocation means direct and deliberate distribution of the opportunity to participate in a fishery among identifiable, discrete user groups or individuals.

Allowable chemical means a substance, generally used to immobilize marine life so it can be captured alive, that, when introduced into the water, does not take Gulf and South Atlantic prohibited coral (as defined at 50 CFR 622.2) and is allowed by Florida or Hawaii or the U.S. Pacific Insular Area for the harvest of tropical fish.

Anadromous species means species of fish that spawn in fresh or estuarine waters of the United States and that migrate to ocean waters.

Angling means fishing for, attempting to fish for, catching or attempting to catch fish by any person (angler) with a hook attached to a line that is

hand-held or by rod and reel made for this purpose.

Area of custody means any vessel, building, vehicle, live car, pound, pier or dock facility where fish might be found.

Assistant Administrator means the Assistant Administrator for Fisheries, NOAA, or a designee.

Atlantic tunas means bluefin, albacore, bigeye, skipjack, and yellowfin tunas found in the Atlantic Ocean.

Atlantic Tunas Convention Act means the Atlantic Tunas Convention Act of 1975, 16 U.S.C. 971-971h.

Authorized officer means:

(1) Any commissioned, warrant, or petty officer of the USCG;

(2) Any special agent or fishery enforcement officer of NMFS;

(3) Any officer designated by the head of any Federal or state agency that has entered into an agreement with the Secretary and the Commandant of the USCG to enforce the provisions of the Magnuson-Stevens Act or any other statute administered by NOAA; or

(4) Any USCG personnel accompanying and acting under the direction of any person described in paragraph (1) of this definition.

Authorized species means any species or species group that a foreign vessel is authorized to retain in a joint venture by a permit issued under Activity Code 4 as described by § 600.501(c).

Automatic reel means a reel that remains attached to a vessel when in use from which a line and attached hook(s) are deployed. The line is payed out from and retrieved on the reel electrically or hydraulically.

Bandit gear means vertical hook and line gear with rods that are attached to the vessel when in use. Lines are retrieved by manual, electric, or hydraulic reels.

Barrier net means a small-mesh net used to capture coral reef or coastal pelagic fishes.

Bigeye tuna means the species *Thunnus obesus*, or a part thereof.

Billfish means blue marlin, longbill spearfish, sailfish, or white marlin.

Bluefin tuna means the species *Thunnus thynnus*, or a part thereof.

Blue marlin means the species *Makaira nigricans*, or a part thereof.

Bully net means a circular frame attached at right angles to a pole and supporting a conical bag of webbing.

Buoy gear means fishing gear consisting of a float and one or more lines suspended therefrom. A hook or hooks are on the lines at or near the end. The float and line(s) drift freely and are retrieved periodically to remove catch and rebait hooks.

Carcass means a fish in whole condition or that portion of a fish that has been gilled and/or gutted and the head and some or all fins have been removed, but that is otherwise in whole condition.

Cast net means a circular net with weights attached to the perimeter.

Catch limit means the total allowable harvest or take from a single fishing trip or day, as defined in this section.

Catch, take, or harvest includes, but is not limited to, any activity that results in killing any fish or bringing any live fish on board a vessel.

Center means one of the five NMFS Fisheries Science Centers.

Charter boat means a vessel less than 100 gross tons (90.8 mt) that meets the requirements of the U.S. Coast Guard to carry six or fewer passengers for hire.

Coast Guard Commander means one of the commanding officers of the Coast Guard units specified in Table 1 of § 600.502, or a designee.

Codend means the terminal, closed end of a trawl net.

Confidential statistics are those submitted as a requirement of an FMP and that reveal the business or identity of the submitter.

Continental shelf fishery resources means the species listed under section 3(7) of the Magnuson-Stevens Act.

Council means one of the eight Regional Fishery Management Councils established by the Magnuson-Stevens Act.

Data, statistics, and information are used interchangeably.

Dealer means the person who first receives fish by way of purchase, barter, or trade.

Designated representative means the person appointed by a foreign nation and maintained within the United States who is responsible for transmitting information to and submitting re-

ports from vessels of that Nation and establishing observer transfer arrangements for vessels in both directed and joint venture activities.

Dip net means a small mesh bag, sometimes attached to a handle, shaped and framed in various ways. It is operated by hand or partially by mechanical power to capture the fish.

Directed fishing, for the purpose of foreign fishing (subpart F), means any fishing by the vessels of a foreign nation for allocations of fish granted that Nation under § 600.517.

Director means the Director of the Office of Sustainable Fisheries, 1315 East-West Highway, Silver Spring, MD 20910.

Discard means to release or return fish to the sea, whether or not such fish are brought fully on board a fishing vessel.

Dredge means a gear consisting of a mouth frame attached to a holding bag constructed of metal rings or mesh.

Drop net means a small, usually circular net with weight around the perimeter and a float in the center.

Essential fish habitat (EFH) means those waters and substrate necessary to fish for spawning, breeding, feeding, or growth to maturity. For the purpose of interpreting the definition of essential fish habitat: "Waters" include aquatic areas and their associated physical, chemical, and biological properties that are used by fish and may include aquatic areas historically used by fish where appropriate; "substrate" includes sediment, hard bottom, structures underlying the waters, and associated biological communities; "necessary" means the habitat required to support a sustainable fishery and the managed species' contribution to a healthy ecosystem; and "spawning, breeding, feeding, or growth to maturity" covers a species' full life cycle.

Exclusive economic zone (EEZ) means the zone established by Presidential Proclamation 5030, 3 CFR part 22, dated March 10, 1983, and is that area adjacent to the United States which, except where modified to accommodate international boundaries, encompasses all waters from the seaward boundary of each of the coastal states to a line on which each point is 200 nautical miles (370.40 km) from the baseline from

Fishery Conservation and Management

§ 600.10

which the territorial sea of the United States is measured.

Exempted educational activity means an activity, conducted by an educational institution accredited by a recognized national or international accreditation body, of limited scope and duration, that is otherwise prohibited by part 635 or chapter VI of this title, but that is authorized by the appropriate Director or Regional Administrator for educational purposes.

Exempted or experimental fishing means fishing from a vessel of the United States that involves activities otherwise prohibited by part 635 or chapter VI of this title, but that are authorized under an exempted fishing permit (EFP). These regulations refer exclusively to exempted fishing. References in part 635 of this title and elsewhere in this chapter to experimental fishing mean exempted fishing under this part.

Fillet means to remove slices of fish flesh from the carcass by cuts made parallel to the backbone.

Fish means:

(1) When used as a noun, means any finfish, mollusk, crustacean, or parts thereof, and all other forms of marine animal and plant life other than marine mammals and birds.

(2) When used as a verb, means to engage in "fishing," as defined below.

Fishery means:

(1) One or more stocks of fish that can be treated as a unit for purposes of conservation and management and that are identified on the basis of geographic, scientific, technical, recreational, or economic characteristics, or method of catch; or

(2) Any fishing for such stocks.

Fishery management unit (FMU) means a fishery or that portion of a fishery identified in an FMP relevant to the FMP's management objectives. The choice of an FMU depends on the focus of the FMP's objectives, and may be organized around biological, geographic, economic, technical, social, or ecological perspectives.

Fishery resource means any fish, any stock of fish, any species of fish, and any habitat of fish.

Fishing, or to fish means any activity, other than scientific research con-

ducted by a scientific research vessel, that involves:

(1) The catching, taking, or harvesting of fish;

(2) The attempted catching, taking, or harvesting of fish;

(3) Any other activity that can reasonably be expected to result in the catching, taking, or harvesting of fish; or

(4) Any operations at sea in support of, or in preparation for, any activity described in paragraphs (1), (2), or (3) of this definition.

Fishing vessel means any vessel, boat, ship, or other craft that is used for, equipped to be used for, or of a type that is normally used for:

(1) Fishing; or

(2) Aiding or assisting one or more vessels at sea in the performance of any activity relating to fishing, including, but not limited to, preparation, supply, storage, refrigeration, transportation, or processing.

Fish weir means a large catching arrangement with a collecting chamber that is made of non-textile material (wood, wicker) instead of netting as in a pound net.

Foreign fishing means fishing by a foreign fishing vessel.

Foreign fishing vessel (FFV) means any fishing vessel other than a vessel of the United States, except those foreign vessels engaged in recreational fishing, as defined in this section.

Gear conflict means any incident at sea involving one or more fishing vessels:

(1) In which one fishing vessel or its gear comes into contact with another vessel or the gear of another vessel; and

(2) That results in the loss of, or damage to, a fishing vessel, fishing gear, or catch.

Gillnet means a panel of netting, suspended vertically in the water by floats along the top and weights along the bottom, to entangle fish that attempt to pass through it.

Governing International Fishery Agreement (GIFA) means an agreement between the United States and a foreign nation or Nations under section 201(c) of the Magnuson-Stevens Act.

Grants Officer means the NOAA official authorized to sign, on behalf of the

Government, the cooperative agreement providing funds to support the Council's operations and functions.

Greenwich mean time (GMT) means the local mean time at Greenwich, England. All times in this part are GMT unless otherwise specified.

Handgear means handline, harpoon, or rod and reel.

Hand harvest means harvesting by hand.

Handline means fishing gear that is set and pulled by hand and consists of one vertical line to which may be attached leader lines with hooks.

Harass means to unreasonably interfere with an individual's work performance, or to engage in conduct that creates an intimidating, hostile, or offensive environment.

Harpoon or *harpoon gear* means fishing gear consisting of a pointed dart or iron attached to the end of a line several hundred feet in length, the other end of which is attached to a floatation device. Harpoon gear is attached to a pole or stick that is propelled only by hand, and not by mechanical means.

Headboat means a vessel that holds a valid Certificate of Inspection issued by the U.S. Coast Guard to carry passengers for hire.

Hook and line means one or more hooks attached to one or more lines (can include a troll).

Hoop net means a cone-shaped or flat net which may or may not have throats and flues stretched over a series of rings or hoops for support.

Industry means both recreational and commercial fishing, and includes the harvesting, processing, and marketing sectors.

International radio call sign (IRCS) means the unique radio identifier assigned a vessel by the appropriate authority of the flag state.

Joint venture means any operation by a foreign vessel assisting fishing by U.S. fishing vessels, including catching, scouting, processing and/or support. (A joint venture generally entails a foreign vessel processing fish received from U.S. fishing vessels and conducting associated support activities.)

Lampara net means a surround net with the sections of netting made and joined to create bagging. It is hauled

with purse rings and is generally much smaller in size than a purse seine net.

Land means to begin offloading fish, to offload fish, or to arrive in port or at a dock, berth, beach, seawall, or ramp.

Longbill spearfish means the species *Tetrapturus pfluegeri*, or a part thereof.

Longline means a line that is deployed horizontally and to which gangions and hooks or pots are attached. Longlines can be stationary, anchored, or buoyed lines that may be hauled manually, electrically, or hydraulically.

Magnuson-Stevens Act means the Magnuson-Stevens Fishery Conservation and Management Act, as amended (16 U.S.C. 1801 *et seq.*), formerly known as the Magnuson Act.

Metric ton (mt) means 1,000 kg (2,204.6 lb).

nm means nautical mile (6,076 ft (1,852 m)).

Official number means the documentation number issued by the USCG or the certificate number issued by a state or by the USCG for an undocumented vessel.

Operator, with respect to any vessel, means the master or other individual aboard and in charge of that vessel.

Optimum yield (OY) means the amount of fish that:

(1) Will provide the greatest overall benefit to the Nation, particularly with respect to food production and recreational opportunities, and taking into account the protection of marine ecosystems;

(2) Is prescribed as such on the basis of the maximum sustainable yield from the fishery, as reduced by any relevant economic, social, or ecological factor; and

(3) In the case of an overfished fishery, provides for rebuilding to a level consistent with producing the maximum sustainable yield in such fishery.

Owner, with respect to any vessel, means:

(1) Any person who owns that vessel in whole or in part;

(2) Any charterer of the vessel, whether bareboat, time, or voyage;

(3) Any person who acts in the capacity of a charterer, including, but not limited to, parties to a management agreement, operating agreement, or any similar agreement that bestows

Fishery Conservation and Management

§ 600.10

control over the destination, function, or operation of the vessel; or

(4) Any agent designated as such by a person described in paragraph (1), (2), or (3) of this definition.

Pelagic longline means a longline that is suspended by floats in the water column and that is not fixed to or in contact with the ocean bottom.

Plan Team means a Council working group selected from agencies, institutions, and organizations having a role in the research and/or management of fisheries, whose primary purpose is to assist the Council in the preparation and/or review of FMPs, amendments, and supporting documents for the Council, and/or SSC and AP.

Postmark means independently verifiable evidence of the date of mailing, such as a U.S. Postal Service postmark, or other private carrier postmark, certified mail receipt, overnight mail receipt, or a receipt issued upon hand delivery to a representative of NMFS authorized to collect fishery statistics.

Pot means trap.

Powerhead means any device with an explosive charge, usually attached to a spear gun, spear, pole, or stick, that may or may not fire a projectile upon contact.

Predominately means, with respect to fishing in a fishery, that more fishing on a stock or stocks of fish covered by the FMP occurs, or would occur in the absence of regulations, within or beyond the EEZ than occurs in the aggregate within the boundaries of all states off the coasts of which the fishery is conducted.

Processing, for the purpose of foreign fishing (subpart F), means any operation by an FFV to receive fish from foreign or U.S. fishing vessels and/or the preparation of fish, including, but not limited to, cleaning, cooking, canning, smoking, salting, drying, or freezing, either on the FFV's behalf or to assist other foreign or U.S. fishing vessels.

Product recovery rate (PRR) means a ratio expressed as a percentage of the weight of processed product divided by the round weight of fish used to produce that amount of product.

Prohibited species, with respect to a foreign vessel, means any species of

fish that that vessel is not specifically allocated or authorized to retain, including fish caught or received in excess of any allocation or authorization.

Purchase means the act or activity of buying, trading, or bartering, or attempting to buy, trade, or barter.

Purse seine means a floated and weighted encircling net that is closed by means of a drawstring threaded through rings attached to the bottom of the net.

Recreational fishing, with respect to a foreign vessel, means any fishing from a foreign vessel not operated for profit and not operated for the purpose of scientific research. It may not involve the sale, barter, or trade of part or all of the catch (see § 600.513).

Retain on board means to fail to return fish to the sea after a reasonable opportunity to sort the catch.

Region mean one of five NMFS Regional Offices responsible for administering the management and development of marine resources in the United States in their respective geographical regions.

Regional Administrator means the Administrator of one of the five NMFS Regions described in Table 1 of § 600.502, or a designee. Formerly known as Regional Director.

Regional Program Officer means the NMFS official designated in the terms and conditions of the grant award responsible for monitoring, recommending, and reviewing any technical aspects of the application for Federal assistance and the award.

Rod and reel means a hand-held (including rod holder) fishing rod with a manually or electrically operated reel attached.

Round means a whole fish—one that has not been gilled, gutted, beheaded, or definned.

Round weight means the weight of the whole fish before processing or removal of any part.

Sailfish means the species *Istiophorus platypterus*, or a part thereof.

Sale or sell means the act or activity of transferring property for money or credit, trading, or bartering, or attempting to so transfer, trade, or barter.

Science and Research Director means the Director of one of the five NMFS

Fisheries Science Centers described in Table 1 of § 600.502 of this part, or a designee, also known as Center Director.

Scientific cruise means the period of time during which a scientific research vessel is operated in furtherance of a scientific research project, beginning when the vessel leaves port to undertake the project and ending when the vessel completes the project as provided for in the applicable scientific research plan.

Scientific research activity is, for the purposes of this part, an activity in furtherance of a scientific fishery investigation or study that would meet the definition of fishing under the Magnuson-Stevens Act, but for the exemption applicable to scientific research activity conducted from a scientific research vessel. Scientific research activity includes, but is not limited to, sampling, collecting, observing, or surveying the fish or fishery resources within the EEZ, at sea, on board scientific research vessels, to increase scientific knowledge of the fishery resources or their environment, or to test a hypothesis as part of a planned, directed investigation or study conducted according to methodologies generally accepted as appropriate for scientific research. At-sea scientific fishery investigations address one or more issues involving taxonomy, biology, physiology, behavior, disease, aging, growth, mortality, migration, recruitment, distribution, abundance, ecology, stock structure, bycatch, and catch estimation of finfish and shellfish (invertebrate) species considered to be a component of the fishery resources within the EEZ. Scientific research activity does not include the collection and retention of fish outside the scope of the applicable research plan, or the testing of fishing gear. Data collection designed to capture and land quantities of fish or invertebrates for product development, market research, and/or public display are not scientific research activities and must be permitted under exempted fishing procedures. For foreign vessels, such data collection activities are considered scientific research if they are carried out in full cooperation with the United States.

Scientific research plan means a detailed, written formulation, prepared in advance of the research, for the accomplishment of a scientific research project. At a minimum, a sound scientific research plan should include:

- (1) A description of the nature and objectives of the project, including the hypothesis or hypotheses to be tested.
- (2) The experimental design of the project, including a description of the methods to be used, the type and class of any vessel(s) to be used, and a description of sampling equipment.
- (3) The geographical area(s) in which the project is to be conducted.
- (4) The expected date of first appearance and final departure of the research vessel(s) to be employed, and deployment and removal of equipment, as appropriate.
- (5) The expected quantity and species of fish to be taken and their intended disposition, and, if significant amounts of a managed species or species otherwise restricted by size or sex are needed, an explanation of such need.
- (6) The name, address, and telephone/telex/fax number of the sponsoring organization and its director.
- (7) The name, address, and telephone/telex/fax number, and curriculum vitae of the person in charge of the project and, where different, the person in charge of the research project on board the vessel.
- (8) The identity of any vessel(s) to be used including, but not limited to, the vessel's name, official documentation number and IRCS, home port, and name, address, and telephone number of the owner and master.

Scientific research vessel means a vessel owned or chartered by, and controlled by, a foreign government agency, U.S. Government agency (including NOAA or institutions designated as federally funded research and development centers), U.S. state or territorial agency, university (or other educational institution accredited by a recognized national or international accreditation body), international treaty organization, or scientific institution. In order for a vessel that is owned or chartered and controlled by a foreign government to meet this definition, the vessel must have scientific research as its exclusive mission during

Fishery Conservation and Management

§ 600.10

the scientific cruise in question and the vessel operations must be conducted in accordance with a scientific research plan.

Scouting means any operation by a vessel exploring (on the behalf of an FFV or U.S. fishing vessel) for the presence of fish by visual, acoustic, or other means that do not involve the catching of fish.

Secretary means the Secretary of Commerce or a designee.

Seine means a net with long narrow wings, that is rigged with floats and weights.

Skipjack tuna means the species *Katsuwonus pelamis*, or a part thereof.

Slurp gun means a tube-shaped suction device that operates somewhat like a syringe by sucking up the fish.

Snare means a device consisting of a pole to which is attached a line forming at its end a loop with a running knot that tightens around the fish when the line is pulled.

Spear means a sharp, pointed, or barbed instrument on a shaft. Spears can be operated manually or shot from a gun or sling.

State means each of the several states, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, the Northern Mariana Islands, and any other Commonwealth, territory, or possession of the United States.

State employee means any employee of the state agency responsible for developing and monitoring the state's program for marine and/or anadromous fisheries.

Statement of Organization, Practices, and Procedures (SOPP) means a statement by each Council describing its organization, practices, and procedures as required under section 302(f)(6) of the Magnuson-Stevens Act.

Stock assessment means the process of collecting and analyzing biological and statistical information to determine the changes in the abundance of fishery stocks in response to fishing, and, to the extent possible, to predict future trends of stock abundance. Stock assessments are based on resource surveys; knowledge of the habitat requirements, life history, and behavior of the species; the use of environmental indices to determine impacts on stocks;

and catch statistics. Stock assessments are used as a basis to "assess and specify the present and probable future condition of a fishery" (as is required by the Magnuson-Stevens Act), and are summarized in the Stock Assessment and Fishery Evaluation or similar document.

Stock Assessment and Fishery Evaluation (SAFE) means a document or set of documents that provides Councils with a summary of the most recent biological condition of species in an FMU, and the social and economic condition of the recreational and commercial fishing industries and the fish processing industries. It summarizes, on a periodic basis, the best available scientific information concerning the past, present, and possible future condition of the stocks and fisheries being managed under Federal regulation.

Submersible means a manned or unmanned device that functions or operates primarily underwater and is used to harvest fish, i.e., precious corals, with mechanical arms.

Substantially (affects) means, for the purpose of subpart G, with respect to whether a state's action or omission will substantially affect the carrying out of an FMP for a fishery, that those effects are important or material, or considerable in degree. The effects of a state's action or omission for purposes of this definition include effects upon:

(1) The achievement of the FMP's goals or objectives for the fishery;

(2) The achievement of OY from the fishery on a continuing basis;

(3) The attainment of the national standards for fishery conservation and management (as set forth in section 301(a) of the Magnuson-Stevens Act) and compliance with other applicable law; or

(4) The enforcement of regulations implementing the FMP.

Support means any operation by a vessel assisting fishing by foreign or U.S. vessels, including supplying water, fuel, provisions, fish processing equipment, or other supplies to a fishing vessel.

Swordfish means the species *Xiphias gladius*, or a part thereof.

§ 600.15

Tangle net dredge means dredge gear consisting of weights and flimsy netting that hangs loosely in order to immediately entangle fish.

Total length (TL) means the straight-line distance from the tip of the snout to the tip of the tail (caudal fin) while the fish is lying on its side, normally extended.

Trammel net means a net consisting of two or more panels of netting, suspended vertically in the water column by a common float line and a common weight line. One panel of netting has a larger mesh size than the other(s) in order to entrap fish in a pocket.

Transship means offloading and onloading or otherwise transferring fish or fish products and/or transporting fish or products made from fish.

Trap means a portable, enclosed device with one or more gates or entrances and one or more lines attached to surface floats. Also called a pot.

Trawl means a cone or funnel-shaped net that is towed through the water, and can include a pair trawl that is towed simultaneously by two boats.

Trip means the time period that begins when a fishing vessel departs from a dock, berth, beach, seawall, ramp, or port to carry out fishing operations and that terminates with a return to a dock, berth, beach, seawall, ramp, or port.

U.S. observer or *observer* means any person serving in the capacity of an observer employed by NMFS, either directly or under contract, or certified as a supplementary observer by NMFS.

Vessel of the United States or *U.S. vessel* means:

- (1) Any vessel documented under chapter 121 of title 46, United States Code;
- (2) Any vessel numbered under chapter 123 of title 46, United States Code, and measuring less than 5 net tons;
- (3) Any vessel numbered under chapter 123 of title 46, United States Code, and used exclusively for pleasure; or
- (4) Any vessel not equipped with propulsion machinery of any kind and used exclusively for pleasure.

White marlin means the species *Tetrapturus albidus*, or a part thereof.

50 CFR Ch. VI (10–1–05 Edition)

Yellowfin tuna means the species *Thunnus albacares*, or a part thereof.

Subpart B—Regional Fishery Management Councils

§ 600.105 Intercouncil boundaries.

(a) *New England and Mid-Atlantic Councils.* The boundary begins at the intersection point of Connecticut, Rhode Island, and New York at 41°18'16.249" N. lat. and 71°54'28.477" W. long. and proceeds south 37°22'32.75" East to the point of intersection with the outward boundary of the EEZ as specified in the Magnuson-Stevens Act.

(b) *Mid-Atlantic and South Atlantic Councils.* The boundary begins at the seaward boundary between the States of Virginia and North Carolina (36°31'00.8" N. lat.), and proceeds due east to the point of intersection with the outward boundary of the EEZ as specified in the Magnuson-Stevens Act.

(c) *South Atlantic and Gulf of Mexico Councils.* The boundary coincides with the line of demarcation between the Atlantic Ocean and the Gulf of Mexico, which begins at the intersection of the outer boundary of the EEZ, as specified in the Magnuson-Stevens Act, and 83°00' W. long., proceeds northward along that meridian to 24°35' N. lat., (near the Dry Tortugas Islands), thence eastward along that parallel, through Rebecca Shoal and the Quicksand Shoal, to the Marquesas Keys, and then through the Florida Keys to the main-

land at the eastern end of Florida Bay, the line so running that the narrow waters within the Dry Tortugas Islands, the Marquesas Keys and the Florida Keys, and between the Florida Keys and the mainland, are within the Gulf of Mexico.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

§ 600.110 Intercouncil fisheries.

If any fishery extends beyond the geographical area of authority of any one Council, the Secretary may—

(a) Designate a single Council to prepare the FMP for such fishery and any amendments to such FMP, in consultation with the other Councils concerned; or

(b) Require that the FMP and any amendments be prepared jointly by all the Councils concerned.

(1) A jointly prepared FMP or amendment must be adopted by a majority of the voting members, present and voting, of each participating Council. Different conservation and management measures may be developed for specific geographic areas, but the FMP should address the entire geographic range of the stock(s).

(2) In the case of joint FMP or amendment preparation, one Council will be designated as the "administrative lead." The "administrative lead" Council is responsible for the preparation of the FMP or any amendments and other required documents for submission to the Secretary.

(3) None of the Councils involved in joint preparation may withdraw without Secretarial approval. If Councils cannot agree on approach or management measures within a reasonable period of time, the Secretary may designate a single Council to prepare the FMP or may issue the FMP under Secretarial authority.

§ 600.115 Statement of organization, practices, and procedures (SOPP).

(a) Councils are required to publish and make available to the public a SOPP in accordance with such uniform standards as are prescribed by the Secretary (section 302(f)(6)) of the Magnuson-Stevens Act. The purpose of the SOPP is to inform the public how the

§ 600.120

Council operates within the framework of the Secretary's uniform standards.

(b) Amendments to current SOPPs must be consistent with the guidelines in this section and the terms and conditions of the cooperative agreement, the statutory requirements of the Magnuson-Stevens Act and other applicable law. Upon approval of a Council's SOPP amendment by the Secretary, a Notice of Availability will be published in the FEDERAL REGISTER, including an address where the public may write to request copies.

(c) Councils may deviate, where lawful, from the guidelines with appropriate supporting rationale, and Secretarial approval of each amendment to a SOPP would constitute approval of any such deviations for that particular Council.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

§ 600.120 Employment practices.

(a) Council staff positions must be filled solely on the basis of merit, fitness for duty, competence, and qualifications. Employment actions must be free from discrimination based on race, religion, color, national origin, sex, age, disability, reprisal, sexual orientation, status as a parent, or on any additional bases protected by applicable Federal, state, or local law.

(b) The annual pay rates for Council staff positions shall be consistent with the pay rates established for General Schedule Federal employees as set forth in 5 U.S.C. 5332, and the Alternative Personnel Management System for the U.S. Department of Commerce (62 FR 67434). The Councils have the discretion to adjust pay rates and pay increases based on cost of living (COLA) differentials in their geographic locations. COLA adjustments in pay rates and pay increases may be provided for staff members whose post of duty is located in Alaska, Hawaii, Guam, the U.S. Virgin Islands, the Northern Mariana Islands, and Puerto Rico.

(1) No pay adjustment based on geographic location shall exceed the COLA and locality pay adjustments available to Federal employees in the same geographic area.

(2) [Reserved]

50 CFR Ch. VI (10–1–05 Edition)

(c) Salary increases funded in lieu of life and medical/dental policies are not permitted.

(d) Unused sick leave may be accumulated without limit, or up to a maximum number of days and contribution per day, as specified by the Council in its SOPP. Distributions of accumulated funds for unused sick leave may be made to the employee upon his or her retirement, or to his or her estate upon his or her death, as established by the Council in its SOPP.

(e) Each Council may pay for unused annual leave upon separation, retirement, or death of an employee.

(f) One or more accounts shall be maintained to pay for unused sick or annual leave as authorized under paragraphs (d) and (e) of this section, and will be funded from the Council's annual operating allowances. Councils have the option to deposit funds into these account(s) at the end of the budget period if unobligated balances remain. Interest earned on these account(s) will be maintained in the account(s), along with the principal, for the purpose of payment of unused annual and sick leave only. These account(s), including interest, may be carried over from year to year. Budgeting for accrued leave will be identified in the "Other" object class categories section of the SF-424A.

(g) A Council must notify the NOAA Office of General Counsel before seeking outside legal advice, which may be for technical assistance not available from NOAA. If the Council is seeking legal services in connection with an employment practices question, the Council must first notify the Department of Commerce's Office of the Assistant General Counsel for Administration, Employment and Labor Law Division. A Council may not contract for the provision of legal services on a continuing basis.

[66 FR 57886, Nov. 19, 2001]

§ 600.125 Budgeting, funding, and accounting.

(a) Each Council's grant activities are governed by OMB Circular A-110 (Uniform Administrative Requirements for Grants and Agreements with Institutions of Higher Education, Hospitals, and other Non-Profit Organizations),

OMB Circular A-122 (Cost Principles for Non-Profit Organizations), 15 CFR Part 29b (Audit Requirements for Institutions of Higher Education and other Nonprofit Organizations), and the terms and conditions of the cooperative agreement. (See 5 CFR 1310.3 for availability of OMB Circulars.)

(b) Councils may not independently enter into agreements, including grants, contracts, or cooperative agreements, whereby they will receive funds for services rendered. All such agreements must be approved and entered into by NOAA on behalf of the Councils.

(c) Councils are not authorized to accept gifts or contributions directly. All such donations must be directed to the NMFS Regional Administrator in accordance with applicable Department of Commerce regulations.

[66 FR 57887, Nov. 19, 2001]

§ 600.130 Protection of confidentiality of statistics.

Each Council must establish appropriate procedures for ensuring the confidentiality of the statistics that may be submitted to it by Federal or state authorities and may be voluntarily submitted to it by private persons, including, but not limited to (also see § 600.405):

(a) Procedures for the restriction of Council member, employee, or advisory group access and the prevention of conflicts of interest, except that such procedures must be consistent with procedures of the Secretary.

(b) In the case of statistics submitted to the Council by a state, the confidentiality laws and regulations of that state.

§ 600.135 Meeting procedures.

(a) Public notice of regular meetings of the Council, scientific statistical committee or advisory panels, including the agenda, must be published in the FEDERAL REGISTER on a timely basis, and appropriate news media notice must be given. The published agenda of any regular meeting may not be modified to include additional matters for Council action without public notice, or such notice must be given at least 14 days prior to the meeting date, unless such modification is to address

an emergency under section 305 (c) of the Magnuson-Stevens Act, in which case public notice shall be given immediately. Drafts of all regular public meeting notices must be transmitted to the NMFS Headquarters Office at least 23 calendar days before the first day of the regular meeting. Councils must ensure that all public meetings are accessible to persons with disabilities, and that the public can make timely requests for language interpreters or other auxiliary aids at public meetings.

(b) Drafts of emergency public notices must be transmitted to the NMFS Washington Office; recommended at least 5 working days prior to the first day of the emergency meeting. Although notices of, and agendas for, emergency meetings are not required to be published in the Federal Register, notices of emergency meetings must be promptly announced through the appropriate news media.

(c) After notifying local newspapers in the major fishing ports within its region, having included in the notification the time and place of the meeting and the reason for closing any meeting or portion thereof:

(1) A Council, SSC, AP, or FIAC shall close any meeting, or portion thereof, that concerns information bearing on a national security classification.

(2) A Council, SSC, AP, or FIAC may close any meeting, or portion thereof, that concerns matters or information pertaining to national security, employment matters, or briefings on litigation in which the Council is interested.

(3) A Council, SSC, AP, or FIAC may close any meeting, or portion thereof, that concerns internal administrative matters other than employment. Examples of other internal administrative matters include candidates for appointment to AP, SSC, and other subsidiary bodies and public decorum or medical conditions of members of a Council or its subsidiary bodies. In deciding whether to close a portion of a meeting to discuss internal administrative matters, a Council or subsidiary body should consider not only the privacy interests of individuals whose

§ 600.150

conduct or qualifications may be discussed, but also the interest of the public in being informed of Council operations and actions.

(d) Without the notice required by paragraph (c) of this section, a Council, SSC, AP, or FIAC may briefly close a portion of a meeting to discuss employment or other internal administrative matters. The closed portion of a meeting that is closed without notice may not exceed 2 hours.

(e) Before closing a meeting or portion thereof, a Council or subsidiary body should consult with the NOAA General Counsel Office to ensure that the matters to be discussed fall within the exceptions to the requirement to hold public meetings described in paragraph (c) of this section.

(f) Actions that affect the public, although based on discussions in closed meetings, must be taken in public. For example, appointments to an AP must be made in the public part of the meeting; however, a decision to take disciplinary action against a Council employee need not be announced to the public.

(g) A majority of the voting members of any Council constitute a quorum for Council meetings, but one or more such members designated by the Council may hold hearings.

(h) Decisions of any Council are by majority vote of the voting members present and voting (except for a vote to propose removal of a Council member, see 50 CFR 600.230). Voting by proxy is permitted only pursuant to 50 CFR 600.205 (b). An abstention does not affect the unanimity of a vote.

(i) Voting members of the Council who disagree with the majority on any issue to be submitted to the Secretary, including principal state officials raising federalism issues, may submit a written statement of their reasons for dissent. If any Council member elects to file such a statement, it should be submitted to the Secretary at the same time the majority report is submitted.

[66 FR 57887, Nov. 19, 2001]

§ 600.150 Disposition of records.

(a) Council records must be handled in accordance with NOAA records management office procedures. All records and documents created or received by

50 CFR Ch. VI (10–1–05 Edition)

Council employees while in active duty status belong to the Federal Government. When employees leave the Council, they may not take the original or file copies of records with them.

(b) [Reserved]

[66 FR 57887, Nov. 19, 2001]

§ 600.155 Freedom of Information Act (FOIA) requests.

(a) FOIA requests received by a Council should be coordinated promptly with the appropriate NMFS Regional Office. The Region will forward the request to the NMFS FOIA Official to secure a FOIA number and log into the FOIA system. The Region will also obtain clearance from the NOAA General Counsel's Office concerning initial determination for denial of requested information.

(b) FOIA requests will be controlled and documented in the Region. The requests should be forwarded to the NMFS FOIA Officer who will prepare the Form CD-244, "FOIA Request and Action Record", with the official FOIA number and due date. In the event the Region determines that the requested information is exempt from disclosure, in full or in part, under the FOIA, the denial letter prepared for the Assistant Administrator's signature, along with the "Foreseeable Harm" Memo and list of documents to be withheld, must be cleared through the NMFS FOIA Officer. Upon completion, a copy of the signed CD-244 and cover letter transmitting the information should be provided to the NMFS FOIA Officer and the NOAA FOIA Officer.

[66 FR 57887, Nov. 19, 2001]

Subpart C—Council Membership

§ 600.205 Principal state officials and their designees.

(a) Only a full-time state employee of the state agency responsible for marine and/or anadromous fisheries shall be appointed by a constituent state Governor as the principal state official for purposes of section 302(b) of the Magnuson-Stevens Act.

(b) A principal state official may name his/her designee(s) to act on his/

Fishery Conservation and Management

§ 600.215

her behalf at Council meetings. Individuals designated to serve as designees of a principal state official on a Council, pursuant to section 302(b)(1)(A) of the Magnuson-Stevens Act, must be a resident of the state and be knowledgeable and experienced, by reason of his or her occupational or other experience, scientific expertise, or training, in the fishery resources of the geographic area of concern to the Council.

(c) New or revised appointments by state Governors of principal state officials and new or revised designations by principal state officials of their designees(s) must be delivered in writing to the appropriate NMFS Regional Administrator and the Council chair at least 48 hours before the individual may vote on any issue before the Council. A designee may not name another designee. Written appointment of the principal state official must indicate his or her employment status, how the official is employed by the state fisheries agency, and whether the official's full salary is paid by the state. Written designation(s) by the principal state official must indicate how the designee is knowledgeable and experienced in fishery resources of the geographic area of concern to the Council, the County in which the designee resides, and whether the designee's salary is paid by the state.

[66 FR 57888, Nov. 19, 2001]

§ 600.210 Terms of Council members.

(a) Voting members (other than principal state officials, the Regional Administrators, or their designees) are appointed for a term of 3 years and, except as discussed in paragraphs (b) and (c) of this section, may be reappointed. A voting member's Council service of 18 months or more during a term of office will be counted as service for the entire 3-year term.

(b) The anniversary date for measuring terms of membership is August 11. The Secretary may designate a term of appointment shorter than 3 years, if necessary, to provide for balanced expiration of terms of office. Members may not serve more than three consecutive terms.

(c) A member appointed after January 1, 1986, who has completed three

consecutive terms will be eligible for appointment to another term one full year after completion of the third consecutive term.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7073, Feb. 12, 1998]

§ 600.215 Council nomination and appointment procedures.

(a) *General.* (1) Each year, the 3-year terms for approximately one-third of the appointed members of the Councils expire. The Secretary of Commerce (Secretary) will appoint or new members or will reappoint seated members to another term to fill the seats being vacated.

(2) There are two categories of seats to which voting members are appointed: "Obligatory" and "At-large."

(i) Obligatory seats are state specific. Each constituent state is entitled to one seat on the Council on which it is a member, except that the State of Alaska is entitled to five seats and the State of Washington is entitled to two seats on the North Pacific Fishery Management Council. When the term of a state's obligatory member is expiring or when that seat becomes vacant before the expiration of its term, the governor of that state must submit the names of at least three qualified individuals to fill that Council seat.

(ii) The Magnuson-Stevens Act also provides for appointment, by the Secretary, of one treaty Indian tribal representative to the Pacific Fishery Management Council (Pacific Council). To fill that seat, the Secretary solicits written nominations from the heads of governments of those Indian Tribes with federally recognized fishing rights from the States of California, Oregon, Washington, or Idaho. The list of nominees must contain a total of at least three individuals who are knowledgeable and experienced regarding the fishery resources under the authority of the Pacific Council. The Secretary will appoint one tribal Indian representative from this list to the Pacific Council for a term of 3 years and rotate the appointment among the tribes.

(iii) At-large seats are regional. When the term of an at-large member is expiring or when that seat becomes vacant before the expiration of a term, the governors of all constituent states

of that Council must each submit the names of at least three qualified individuals to fill the seat.

(b) *Responsibilities of State Governors.*

(1) Council members are selected by the Secretary from lists of nominees submitted by Governors of the constituent states, pursuant to section 302(b)(2)(C) of the Magnuson-Stevens Act. For each applicable vacancy, a Governor must submit the names of at least three nominees who meet the qualification requirements of the Magnuson-Stevens Act. A Governor must provide a statement explaining how each of his/her nominees meet the qualification requirements, and must also provide appropriate documentation to the Secretary that each nomination was made in consultation with commercial and recreational fishing interests of that state and that each nominee is knowledgeable and experienced by reason of his or her occupational or other experience, scientific expertise, or training in one or more of the following ways related to the fishery resources of the geographical area of concern to the Council:

(i) Commercial fishing or the processing or marketing of fish, fish products, or fishing equipment;

(ii) Fishing for pleasure, relaxation, or consumption, or experience in any business supporting fishing;

(iii) Leadership in a state, regional, or national organization whose members participate in a fishery in the Council's area of authority;

(iv) The management and conservation of natural resources, including related interactions with industry, government bodies, academic institutions, and public agencies. This includes experience serving as a member of a Council, Advisory Panel, Scientific and Statistical Committee, or Fishing Industry Advisory Committee;

(v) Representing consumers of fish or fish products through participation in local, state, or national organizations, or performing other activities specifically related to the education or protection of consumers of marine resources; or

(vi) Teaching, journalism, writing, consulting, practicing law, or researching matters related to fisheries, fishery

management, and marine resource conservation.

(2) To assist in identifying qualifications, each nominee must furnish to the appropriate governor's office a current resume, or equivalent, describing career history—with particular attention to experience related to the criteria in paragraph (b)(1) of this section. Nominees may provide such information in any format they wish.

(3) A constituent State Governor must determine the state of residency of each of his/her nominees. A Governor may not nominate a non-resident of that state for appointment to a Council seat obligated to that state. A Governor may nominate residents of another constituent state of a Council for appointment to an at large seat on that Council.

(4) If, at any time during a term, a member changes residency to another state that is not a constituent state of that Council, or a member appointed to an obligatory seat changes residency to any other state, the member may no longer vote and must resign from the Council. For purposes of this paragraph, a state resident is an individual who maintains his/her principal residence within that constituent state and who, if applicable, pays income taxes to that state and/or to another appropriate jurisdiction within that state.

(5) When the terms of both an obligatory member and an at-large member expire concurrently, the Governor of the state holding the expiring obligatory seat may indicate that the nominees who were not selected for appointment to the obligatory seat may be considered for appointment to an at-large seat, provided that the resulting total number of nominees submitted by that governor for the expiring at-large seat is no fewer than three different nominees. When obligatory and at-large seats do not expire concurrently, the Secretary may select from any of the nominees for such obligatory seat and from the nominees for any at-large seat submitted by the Governor of that state, provided that the resulting total number of nominees submitted by that Governor for the expiring seats is no fewer than six. If a total of fewer than

Fishery Conservation and Management

§ 600.215

six nominees is submitted by the Governor, each of the six will be considered for the expiring obligatory seat, but not for the expiring at-large seat.

(c) *Responsibilities of eligible tribal Indian governments.* The tribal Indian representative on the Pacific Council will be selected by the Secretary from a list of no fewer than three individuals submitted by the tribal Indian governments with federally recognized fishing rights from California, Oregon, Washington, and Idaho, pursuant to section 302(b)(5) of the Magnuson-Stevens Act. To assist in assessing the qualifications of each nominee, each head of an appropriate tribal Indian government must furnish to the Assistant Administrator a current resume, or equivalent, describing the nominee's qualifications, with emphasis on knowledge and experience related to the fishery resources affected by recommendations of the Pacific Council. Prior service on the Pacific Council in a different capacity will not disqualify nominees proposed by tribal Indian governments.

(d) *Nomination deadlines.* Nomination letters and completed kits must be forwarded by express mail under a single mailing to the address specified by the Assistant Administrator by March 15. For appointments outside the normal cycle, a different deadline for receipt of nominations will be announced.

(1) *Obligatory seats.* (i) The governor of the state for which the term of an obligatory seat is expiring must submit the names of at least three qualified individuals to fill that seat by the March 15 deadline. The Secretary will appoint to the Pacific Council a representative of an Indian tribe from a list of no fewer than three individuals submitted by the tribal Indian governments.

(ii) If the nominator fails to provide a nomination letter and at least three complete nomination kits by March 15, the obligatory seat will remain vacant until all required information has been received and processed and the Secretary has made the appointment.

(2) *At-large seats.* (i) If a Governor chooses to submit nominations for an at-large seat, he/she must submit lists that contain at least three different qualified nominees for each vacant seat. A nomination letter and at least three complete nomination kits must

be forwarded by express mail under a single mailing to the address specified by the Assistant Administrator by March 15.

(ii) Nomination packages that are incomplete after March 15 will be returned to the nominating Governor and will be processed no further. At-large members will be appointed from among the nominations submitted by the governors who complied with the nomination requirements and the March 15 deadline.

(e) *Responsibilities of the Secretary.* (1) The Secretary must, to the extent practicable, ensure a fair and balanced apportionment, on a rotating or other basis, of the active participants (or their representatives) in the commercial and recreational fisheries in the Council's area of authority. Further, the Secretary must take action to ensure, to the extent practicable, that those persons dependent for their livelihood upon the fisheries in the Council's area of authority are fairly represented as voting members on the Councils.

(2) The Secretary will review each list submitted by a governor or the tribal Indian governments to ascertain whether the individuals on the list are qualified for the vacancy. If the Secretary determines that a nominee is not qualified, the Secretary will notify the appropriate Governor or tribal Indian government of that determination. The Governor or tribal Indian government shall then submit a revised list of nominees or resubmit the original list with an additional explanation of the qualifications of the nominee in question. The Secretary reserves the right to determine whether nominees are qualified.

(3) The Secretary will select the appointees from lists of qualified nominees provided by the Governors of the constituent Council states or of the tribal Indian governments that are eligible to nominate candidates for that vacancy.

(i) For Governor-nominated seats, the Secretary will select an appointee for an obligatory seat from the list of qualified nominees submitted by the governor of the state. In filling expiring at-large seats, the Secretary will select an appointee(s) for an at-large

seat(s) from the list of all qualified candidates submitted. The Secretary will consider only complete slates of nominees submitted by the governors of the Council's constituent states. When an appointed member vacates his/her seat prior to the expiration of his/her term, the Secretary will fill the vacancy for the remainder of the term by selecting from complete nomination letters and kits that are timely and contain the required number of candidates.

(ii) For the tribal Indian seat, the Secretary will solicit nominations of individuals for the list referred to in paragraph (c) of this section only from those Indian tribes with federally recognized fishing rights from California, Oregon, Washington, or Idaho. The Secretary will consult with the Bureau of Indian Affairs, Department of the Interior, to determine which Indian tribes may submit nominations. Any vacancy occurring prior to the expiration of any term shall be filled in the same manner as described in paragraphs (d)(1) and (2) of this section, except that the Secretary may use the list referred to in paragraph (b)(1) of this section from which the vacating member was chosen. The Secretary shall rotate the appointment among the tribes, taking into consideration:

(A) The qualifications of the individuals on the list referred to in paragraph (c) of this section.

(B) The various rights of the Indian tribes involved, and judicial cases that set out the manner in which these rights are to be exercised.

(C) The geographic area in which the tribe of the representative is located.

(D) The limitation that no tribal Indian representative shall serve more than three consecutive terms in the Indian tribal seat.

[64 FR 4600, Jan. 29, 1999]

§ 600.220 Oath of office.

Each member appointed to a Council must take an oath of office.

§ 600.225 Rules of conduct.

(a) Council members, as Federal office holders, and Council employees are subject to most Federal criminal statutes covering bribery, conflict-of-interest, disclosure of confidential informa-

tion, and lobbying with appropriated funds.

(b) The Councils are responsible for maintaining high standards of ethical conduct among themselves, their staffs, and their advisory groups. In addition to abiding by the applicable Federal conflict of interest statutes, both members and employees of the Councils must comply with the following standards of conduct:

(1) No employee of a Council may use his or her official authority or influence derived from his or her position with the Council for the purpose of interfering with or affecting the result of an election to or a nomination for any national, state, county, or municipal elective office.

(2) No employee of a Council may be deprived of employment, position, work, compensation, or benefit provided for or made possible by the Magnuson-Stevens Act on account of any political activity or lack of such activity in support of or in opposition to any candidate or any political party in any national, state, county, or municipal election, or on account of his or her political affiliation.

(3) No Council member or employee may pay, offer, promise, solicit, or receive from any person, firm, or corporation a contribution of money or anything of value in consideration of either support or the use of influence or the promise of support or influence in obtaining for any person any appointive office, place, or employment under the Council.

(4) No employee of a Council may have a direct or indirect financial interest that conflicts with the fair and impartial conduct of his or her Council duties.

(5) No Council member, employee of a Council, or member of a Council advisory group may use or allow the use, for other than official purposes, of information obtained through or in connection with his or her Council employment that has not been made available to the general public.

(6) No Council member or employee of the Council may engage in criminal, infamous, dishonest, notoriously immoral, or disgraceful conduct.

Fishery Conservation and Management

§ 600.235

(7) No Council member or employee of the Council may use Council property on other than official business. Such property must be protected and preserved from improper or deleterious operation or use.

(8)(i) Except as provided in § 600.235(h) or in 18 U.S.C. 208, no Council member may participate personally and substantially as a member through decision, approval, disapproval, recommendation, the rendering of advice, investigation, or otherwise, in a particular matter in which the member, the member's spouse, minor child, general partner, organization in which the member is serving as officer, director, trustee, general partner, or employee, or any person or organization with whom the member is negotiating or has any arrangement concerning prospective employment, has a financial interest. (Note that this financial interest is broader than the one defined in § 600.235(a).)

(ii) No Council member may participate personally and substantially as a member through decision, approval, disapproval, recommendation, the rendering of advice, investigation, or otherwise, in a particular matter primarily of individual concern, such as a contract, in which he or she has a financial interest, even if the interest has been disclosed in accordance with § 600.235.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998; 63 FR 64185, Nov. 19, 1998]

§ 600.230 Removal.

The Secretary may remove for cause any Secretarially appointed member of a Council in accordance with section 302(b)(6) of the Magnuson-Stevens Act, wherein the Council concerned first recommends removal of that member by not less than two-thirds of the voting members. A recommendation of a Council to remove a member must be made in writing to the Secretary and accompanied by a statement of the reasons upon which the recommendation is based.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7073, Feb. 12, 1998]

§ 600.235 Financial disclosure.

(a) *Definitions.* For purposes of § 600.235:

Affected individual means an individual who is—

(1) Nominated by the Governor of a state or appointed by the Secretary of Commerce to serve as a voting member of a Council in accordance with section 302(b)(2) of the Magnuson-Stevens Act; or

(2) A representative of an Indian tribe appointed to the Pacific Council by the Secretary of Commerce under section 302(b)(5) of the Magnuson-Stevens Act who is not subject to disclosure and recusal requirements under the laws of an Indian tribal government.

Council decision means approval of a fishery management plan (FMP) or FMP amendment (including any proposed regulations); request for amendment to regulations implementing an FMP; finding that an emergency exists involving any fishery (including recommendations for responding to the emergency); and comments to the Secretary on FMPs or amendments developed by the Secretary. It does not include a vote by a committee of a Council.

Designated official means an attorney designated by the NOAA General Counsel.

Financial interest in harvesting, processing, or marketing (1) includes:

(i) Stock, equity, or other ownership interests in, or employment with, any company, business, fishing vessel, or other entity engaging in any harvesting, processing, or marketing activity in any fishery under the jurisdiction of the Council concerned;

(ii) Stock, equity, or other ownership interests in, or employment with, any company or other entity that provides equipment or other services essential to harvesting, processing, or marketing activities in any fishery under the jurisdiction of the Council concerned, such as a Chandler or a dock operation.

(iii) Employment with, or service as an officer, director, or trustee of, an association whose members include companies, vessels, or other entities engaged in harvesting, processing, or marketing activities, or companies or

other entities providing services essential to harvesting, processing, or marketing activities in any fishery under the jurisdiction of the Council concerned; and

(iv) Employment with an entity providing consulting, legal, or representational services to any entity engaging in, or providing equipment or services essential to, harvesting, processing, or marketing activities in any fishery under the jurisdiction of the Council concerned, or to any association whose members include entities engaged in the activities described in paragraphs (1) (i) and (ii) of this definition;

(2) Does not include stock, equity, or other ownership interests in, or employment with, an entity engaging in advocacy on environmental issues or in scientific fisheries research in any fishery under the jurisdiction of the Council concerned, unless it is covered under paragraph (1) of this definition. A financial interest in such entities is covered by 18 U.S.C. 208, the Federal conflict-of-interest statute.

(b) *Reporting.* (1) The Magnuson-Stevens Act requires the disclosure by each affected individual of any financial interest in harvesting, processing, or marketing activity, and of any such financial interest of the affected individual's spouse, minor child, partner, or any organization (other than the Council) in which that individual is serving as an officer, director, trustee, partner, or employee. The information required to be reported must be disclosed on NOAA Form 88-195, "Statement of Financial Interests for Use by Voting Members and Nominees of Regional Fishery Management Councils" (Financial Interest Form), or such other form as the Secretary may prescribe.

(2) The Financial Interest Form must be filed by each nominee for Secretarial appointment with the Assistant Administrator by April 15 or, if nominated after March 15, 1 month after nomination by the Governor. A seated voting member appointed by the Secretary must file a Financial Interest Form with the Executive Director of the appropriate Council within 45 days of taking office; must file an update of his or her statement with the Executive Director of the appropriate Council

within 30 days of the time any such financial interest is acquired or substantially changed by the affected individual or the affected individual's spouse, minor child, partner, or any organization (other than the Council) in which that individual is serving as an officer, director, trustee, partner, or employee; and must update his or her form annually and file that update with the Executive Director of the appropriate Council by February 1 of each year.

(3) The Executive Director must, in a timely manner, provide copies of the financial disclosure forms and all updates to the NMFS Regional Administrator for the geographic area concerned, the Regional Attorney who advises the Council, the Department of Commerce Assistant General Counsel for Administration, and the NMFS Office of Sustainable Fisheries. The completed financial interest forms will be kept on file in the office of the NMFS Regional Administrator for the geographic area concerned and at the Council offices, and will be made available for public inspection at such offices during normal office hours. In addition, the forms will be made available at each Council meeting or hearing.

(4) Councils must retain the disclosure form for each affected individual for at least 5 years after the expiration of that individual's last term.

(c) *Restrictions on voting.* (1) No affected individual may vote on any Council decision that would have a significant and predictable effect on a financial interest disclosed in his/her report filed under paragraph (b) of this section.

(2) As used in this section, a Council decision will be considered to have a "significant and predictable effect on a financial interest" if there is a close causal link between the decision and an expected and substantially disproportionate benefit to the financial interest in harvesting, processing, or marketing of any affected individual or the affected individual's spouse, minor child, partner, or any organization (other than the Council) in which that individual is serving as an officer, director, trustee, partner, or employee, relative to the financial interests of

other participants in the same gear type or sector of the fishery. The relative financial interests of the affected individual and other participants will be determined with reference to the most recent fishing year for which information is available. However, for fisheries in which IFQs are assigned, the percentage of IFQs assigned to the affected individual will be dispositive.

(3) “Expected and substantially disproportionate benefit” means a quantifiable positive or negative impact with regard to a matter likely to affect a fishery or sector of the fishery in which the affected individual has a significant interest, as indicated by:

(i) A greater than 10-percent interest in the total harvest of the fishery or sector of the fishery in question;

(ii) A greater than 10-percent interest in the marketing or processing of the total harvest of the fishery or sector of the fishery in question; or

(iii) Full or partial ownership of more than 10 percent of the vessels using the same gear type within the fishery or sector of the fishery in question.

(d) *Voluntary recusal.* An affected individual who believes that a Council decision would have a significant and predictable effect on that individual’s financial interest disclosed under paragraph (b) of this section may, at any time before a vote is taken, announce to the Council an intent not to vote on the decision.

(e) *Participation in deliberations.* Notwithstanding paragraph (c) of this section, an affected individual who is recused from voting under this section may participate in Council and committee deliberations relating to the decision, after notifying the Council of the voting recusal and identifying the financial interest that would be affected.

(f) *Requests for determination.* (1) At the request of an affected individual, the designated official shall determine for the record whether a Council decision would have a significant and predictable effect on that individual’s financial interest. The determination will be based upon a review of the information contained in the individual’s financial disclosure form and any other reliable and probative information pro-

vided in writing. All information considered will be made part of the public record for the decision. The affected individual may request a determination by notifying the designated official—

(i) Within a reasonable time before the Council meeting at which the Council decision will be made; or

(ii) During a Council meeting before a Council vote on the decision.

(2) The designated official may initiate a determination on the basis of—

(i) His or her knowledge of the fishery and the financial interests disclosed by an affected individual; or

(ii) Written and signed information received within a reasonable time before a Council meeting or, if the issue could not have been anticipated before the meeting, during a Council meeting before a Council vote on the decision.

(3) At the beginning of each Council meeting, or during a Council meeting at any time reliable and probative information is received, the designated official shall announce the receipt of information relevant to a determination concerning recusal, the nature of that information, and the identity of the submitter of such information.

(4) If the designated official determines that the affected individual may not vote, the individual may state for the record how he or she would have voted. A Council Chair may not allow such an individual to cast a vote.

(5) A reversal of a determination under paragraph (g) of this section may not be treated as cause for invalidation or reconsideration by the Secretary of a Council’s decision.

(g) *Review of determinations.* (1) Any Council member may file a written request to the NOAA General Counsel for review of the designated official’s determination. A request for review must be received within 10 days of the determination.

(2) A request must include a full statement in support of the review, including a concise statement as to why the Council’s decision did or did not have a significantly disproportionate benefit to the financial interest of the affected individual relative to the financial interests of other participants in the same gear type or sector of the

§ 600.240

fishery, and why the designated official's determination should be reversed.

(3) If the request for review is from a Council member other than the affected individual whose vote is at issue, the requester must provide a copy of the request to the affected individual at the same time it is submitted to the NOAA General Counsel. The affected individual may submit a response to the NOAA General Counsel within 10 days from the date of his/her receipt of the request for review.

(4) The NOAA General Counsel must complete the review and issue a decision within 30 days from the date of receipt of the request for review. The NOAA General Counsel will limit the review to the record before the designated official at the time of the determination, the request, and any response.

(h) *Exemption from other statutes.* The provisions of 18 U.S.C. 208 regarding conflicts of interest do not apply to an affected individual who is in compliance with the requirements of this section for filing a financial disclosure report.

(i) *Violations and penalties.* It is unlawful for an affected individual to knowingly and willfully fail to disclose, or to falsely disclose, any financial interest as required by this section, or to knowingly vote on a Council decision in violation of this section. In addition to the penalties applicable under § 600.735, a violation of this provision may result in removal of the affected individual from Council membership.

[63 FR 64185, Nov. 19, 1998]

§ 600.240 Security assurances.

(a) DOC/OS will issue security assurances to Council nominees and members following completion of background checks. Security assurances will be valid for 5 years from the date of issuance. A security assurance will not entitle the member to access classified data. In instances in which Council members may need to discuss, at closed meetings, materials classified for national security purposes, the agency or individual (e.g., DOS, USCG) providing such classified information will be responsible for ensuring that

50 CFR Ch. VI (10-1-05 Edition)

Council members and other attendees have the appropriate security clearances.

(b) Each nominee to a Council is required to complete a Certification of Status form ("form"). All nominees must certify, pursuant to the Foreign Agents Registration Act of 1938, whether they serve as an agent of a foreign principal. Each nominee must certify, date, sign, and return the form with his or her completed nomination kit. Nominees will not be considered for appointment to a Council if they have not filed this form. Any nominee who currently is an agent of a foreign principal will not be eligible for appointment to a Council, and therefore should not be nominated by a Governor for appointment.

§ 600.245 Council member compensation.

(a) All voting Council members whose eligibility for compensation has been established in accordance with NOAA guidelines will be paid through the cooperative agreement as a direct line item on a contractual basis without deductions being made for Social Security or Federal and state income taxes. A report of compensation will be furnished each year by the member's Council to the proper Regional Program Officer, as required by the Internal Revenue Service. Such compensation may be paid on a full day's basis, whether in excess of 8 hours a day or less than 8 hours a day. The time is compensable where the individual member is required to expend a significant private effort that substantially disrupts the daily routine to the extent that a work day is lost to the member. "Homework" time in preparation for formal Council meetings is not compensable.

(b) Non-government Council members receive compensation for:

(1) Days spent in actual attendance at a meeting of the Council or jointly with another Council.

(2) Travel on the day preceding or following a scheduled meeting that precluded the member from conducting his normal business on the day in question.

(3) Meetings of standing committees of the Council if approved in advance by the Chair.

(4) Individual member meeting with scientific and technical advisors, when approved in advance by the Chair and a substantial portion of any day is spent at the meeting.

(5) Conducting or attending hearings, when authorized in advance by the Chair.

(6) Other meetings involving Council business when approved in advance by the Chair.

(c) The Executive Director of each Council must submit to the appropriate Regional Office annually a report, approved by the Council Chair, of Council member compensation authorized. This report shall identify, for each member, amount paid, dates, and location and purpose of meetings attended.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998; 66 FR 57888, Nov. 19, 2001]

Subpart D—National Standards

§ 600.305 General.

(a) *Purpose.* (1) This subpart establishes guidelines, based on the national standards, to assist in the development and review of FMPs, amendments, and regulations prepared by the Councils and the Secretary.

(2) In developing FMPs, the Councils have the initial authority to ascertain factual circumstances, to establish management objectives, and to propose management measures that will achieve the objectives. The Secretary will determine whether the proposed management objectives and measures are consistent with the national standards, other provisions of the Magnuson-Stevens Act, and other applicable law. The Secretary has an obligation under section 301(b) of the Magnuson-Stevens Act to inform the Councils of the Secretary's interpretation of the national standards so that they will have an understanding of the basis on which FMPs will be reviewed.

(3) The national standards are statutory principles that must be followed in any FMP. The guidelines summarize Secretarial interpretations that have been, and will be, applied under these

principles. The guidelines are intended as aids to decisionmaking; FMPs formulated according to the guidelines will have a better chance for expeditious Secretarial review, approval, and implementation. FMPs that are in substantial compliance with the guidelines, the Magnuson-Stevens Act, and other applicable law must be approved.

(b) *Fishery management objectives.* (1) Each FMP, whether prepared by a Council or by the Secretary, should identify what the FMP is designed to accomplish (i.e., the management objectives to be attained in regulating the fishery under consideration). In establishing objectives, Councils balance biological constraints with human needs, reconcile present and future costs and benefits, and integrate the diversity of public and private interests. If objectives are in conflict, priorities should be established among them.

(2) How objectives are defined is important to the management process. Objectives should address the problems of a particular fishery. The objectives should be clearly stated, practicably attainable, framed in terms of definable events and measurable benefits, and based upon a comprehensive rather than a fragmentary approach to the problems addressed. An FMP should make a clear distinction between objectives and the management measures chosen to achieve them. The objectives of each FMP provide the context within which the Secretary will judge the consistency of an FMP's conservation and management measures with the national standards.

(c) *Word usage.* The word usage refers to all regulations in this subpart.

(1) *Must* is used, instead of "shall", to denote an obligation to act; it is used primarily when referring to requirements of the Magnuson-Stevens Act, the logical extension thereof, or of other applicable law.

(2) *Shall* is used only when quoting statutory language directly, to avoid confusion with the future tense.

(3) *Should* is used to indicate that an action or consideration is strongly recommended to fulfill the Secretary's interpretation of the Magnuson-Stevens Act, and is a factor reviewers will look for in evaluating a SOPP or FMP.

§ 600.310

50 CFR Ch. VI (10–1–05 Edition)

(4) *May* is used in a permissive sense.
(5) *May not* is proscriptive; it has the same force as “must not.”

(6) *Will* is used descriptively, as distinguished from denoting an obligation to act or the future tense.

(7) *Could* is used when giving examples, in a hypothetical, permissive sense.

(8) *Can* is used to mean “is able to,” as distinguished from “may.”

(9) *Examples* are given by way of illustration and further explanation. They are not inclusive lists; they do not limit options.

(10) *Analysis*, as a paragraph heading, signals more detailed guidance as to the type of discussion and examination an FMP should contain to demonstrate compliance with the standard in question.

(11) *Council* includes the Secretary, as applicable, when preparing FMPs or amendments under section 304(c) and (g) of the Magnuson-Stevens Act.

(12) *Stock or stock complex* is used as a synonym for “fishery” in the sense of the Magnuson-Stevens Act’s first definition of the term; that is, as “one or more stocks of fish that can be treated as a unit for purposes of conservation and management and that are identified on the basis of geographic, scientific, technical, recreational, or economic characteristics,” as distinguished from the Magnuson-Stevens Act’s second definition of fishery as “any fishing for such stocks.”

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998; 63 FR 24229, May 1, 1998]

§ 600.310 National Standard 1—Optimum Yield.

(a) *Standard 1.* Conservation and management measures shall prevent overfishing while achieving, on a continuing basis, the OY from each fishery for the U.S. fishing industry.

(b) *General.* The determination of OY is a decisional mechanism for resolving the Magnuson-Stevens Act’s multiple purposes and policies, implementing an FMP’s objectives, and balancing the various interests that comprise the national welfare. OY is based on MSY, or on MSY as it may be reduced under paragraph (f)(3) of this section. The most important limitation on the spec-

ification of OY is that the choice of OY and the conservation and management measures proposed to achieve it must prevent overfishing.

(c) *MSY.* Each FMP should include an estimate of MSY as explained in this section.

(1) *Definitions.* (i) “MSY” is the largest long-term average catch or yield that can be taken from a stock or stock complex under prevailing ecological and environmental conditions.

(ii) “MSY control rule” means a harvest strategy which, if implemented, would be expected to result in a long-term average catch approximating MSY.

(iii) “MSY stock size” means the long-term average size of the stock or stock complex, measured in terms of spawning biomass or other appropriate units, that would be achieved under an MSY control rule in which the fishing mortality rate is constant.

(2) *Options in specifying MSY.* (i) Because MSY is a theoretical concept, its estimation in practice is conditional on the choice of an MSY control rule. In choosing an MSY control rule, Councils should be guided by the characteristics of the fishery, the FMP’s objectives, and the best scientific information available. The simplest MSY control rule is to remove a constant catch in each year that the estimated stock size exceeds an appropriate lower bound, where this catch is chosen so as to maximize the resulting long-term average yield. Other examples include the following: Remove a constant fraction of the biomass in each year, where this fraction is chosen so as to maximize the resulting long-term average yield; allow a constant level of escapement in each year, where this level is chosen so as to maximize the resulting long-term average yield; vary the fishing mortality rate as a continuous function of stock size, where the parameters of this function are constant and chosen so as to maximize the resulting long-term average yield. In any MSY control rule, a given stock size is associated with a given level of fishing mortality and a given level of potential harvest, where the long-term average of these potential harvests provides an estimate of MSY.

(ii) Any MSY values used in determining OY will necessarily be estimates, and these will typically be associated with some level of uncertainty. Such estimates must be based on the best scientific information available (see § 600.315) and must incorporate appropriate consideration of risk (see § 600.335). Beyond these requirements, however, Councils have a reasonable degree of latitude in determining which estimates to use and how these estimates are to be expressed. For example, a point estimate of MSY may be expressed by itself or together with a confidence interval around that estimate.

(iii) In the case of a mixed-stock fishery, MSY should be specified on a stock-by-stock basis. However, where MSY cannot be specified for each stock, then MSY may be specified on the basis of one or more species as an indicator for the mixed stock as a whole or for the fishery as a whole.

(iv) Because MSY is a long-term average, it need not be estimated annually, but it must be based on the best scientific information available, and should be re-estimated as required by changes in environmental or ecological conditions or new scientific information.

(3) *Alternatives to specifying MSY.* When data are insufficient to estimate MSY directly, Councils should adopt other measures of productive capacity that can serve as reasonable proxies for MSY, to the extent possible. Examples include various reference points defined in terms of relative spawning per recruit. For instance, the fishing mortality rate that reduces the long-term average level of spawning per recruit to 30–40 percent of the long-term average that would be expected in the absence of fishing may be a reasonable proxy for the MSY fishing mortality rate. The long-term average stock size obtained by fishing year after year at this rate under average recruitment may be a reasonable proxy for the MSY stock size, and the long-term average catch so obtained may be a reasonable proxy for MSY. The natural mortality rate may also be a reasonable proxy for the MSY fishing mortality rate. If a reliable estimate of pristine stock size (i.e., the long-term average stock size

that would be expected in the absence of fishing) is available, a stock size approximately 40 percent of this value may be a reasonable proxy for the MSY stock size, and the product of this stock size and the natural mortality rate may be a reasonable proxy for MSY.

(d) *Overfishing*—(1) *Definitions.* (i) “To overfish” means to fish at a rate or level that jeopardizes the capacity of a stock or stock complex to produce MSY on a continuing basis.

(ii) “Overfishing” occurs whenever a stock or stock complex is subjected to a rate or level of fishing mortality that jeopardizes the capacity of a stock or stock complex to produce MSY on a continuing basis.

(iii) In the Magnuson-Stevens Act, the term “overfished” is used in two senses: First, to describe any stock or stock complex that is subjected to a rate or level of fishing mortality meeting the criterion in paragraph (d)(1)(i) of this section, and second, to describe any stock or stock complex whose size is sufficiently small that a change in management practices is required in order to achieve an appropriate level and rate of rebuilding. To avoid confusion, this section uses “overfished” in the second sense only.

(2) *Specification of status determination criteria.* Each FMP must specify, to the extent possible, objective and measurable status determination criteria for each stock or stock complex covered by that FMP and provide an analysis of how the status determination criteria were chosen and how they relate to reproductive potential. Status determination criteria must be expressed in a way that enables the Council and the Secretary to monitor the stock or stock complex and determine annually whether overfishing is occurring and whether the stock or stock complex is overfished. In all cases, status determination criteria must specify both of the following:

(i) *A maximum fishing mortality threshold or reasonable proxy thereof.* The fishing mortality threshold may be expressed either as a single number or as a function of spawning biomass or other measure of productive capacity. The fishing mortality threshold must not exceed the fishing mortality rate

or level associated with the relevant MSY control rule. Exceeding the fishing mortality threshold for a period of 1 year or more constitutes overfishing.

(ii) *A minimum stock size threshold or reasonable proxy thereof.* The stock size threshold should be expressed in terms of spawning biomass or other measure of productive capacity. To the extent possible, the stock size threshold should equal whichever of the following is greater: One-half the MSY stock size, or the minimum stock size at which rebuilding to the MSY level would be expected to occur within 10 years if the stock or stock complex were exploited at the maximum fishing mortality threshold specified under paragraph (d)(2)(i) of this section. Should the actual size of the stock or stock complex in a given year fall below this threshold, the stock or stock complex is considered overfished.

(3) *Relationship of status determination criteria to other national standards*—(i) *National standard 2.* Status determination criteria must be based on the best scientific information available (see § 600.315). When data are insufficient to estimate MSY, Councils should base status determination criteria on reasonable proxies thereof to the extent possible (also see paragraph (c)(3) of this section). In cases where scientific data are severely limited, effort should also be directed to identifying and gathering the needed data.

(ii) *National standard 3.* The requirement to manage interrelated stocks of fish as a unit or in close coordination notwithstanding (see § 600.320), status determination criteria should generally be specified in terms of the level of stock aggregation for which the best scientific information is available (also see paragraph (c)(2)(iii) of this section).

(iii) *National standard 6.* Councils must build into the status determination criteria appropriate consideration of risk, taking into account uncertainties in estimating harvest, stock conditions, life history parameters, or the effects of environmental factors (see § 600.335).

(4) *Relationship of status determination criteria to environmental change.* Some short-term environmental changes can alter the current size of a stock or stock complex without affecting the

long-term productive capacity of the stock or stock complex. Other environmental changes affect both the current size of the stock or stock complex and the long-term productive capacity of the stock or stock complex.

(i) If environmental changes cause a stock or stock complex to fall below the minimum stock size threshold without affecting the long-term productive capacity of the stock or stock complex, fishing mortality must be constrained sufficiently to allow rebuilding within an acceptable time frame (also see paragraph (e)(4)(ii) of this section). Status determination criteria need not be respecified.

(ii) If environmental changes affect the long-term productive capacity of the stock or stock complex, one or more components of the status determination criteria must be respecified. Once status determination criteria have been respecified, fishing mortality may or may not have to be reduced, depending on the status of the stock or stock complex with respect to the new criteria.

(iii) If manmade environmental changes are partially responsible for a stock or stock complex being in an overfished condition, in addition to controlling effort, Councils should recommend restoration of habitat and other ameliorative programs, to the extent possible (see also the guidelines issued pursuant to section 305(b) of the Magnuson-Stevens Act for Council actions concerning essential fish habitat).

(5) *Secretarial approval of status determination criteria.* Secretarial approval or disapproval of proposed status determination criteria will be based on consideration of whether the proposal:

- (i) Has sufficient scientific merit.
- (ii) Contains the elements described in paragraph (d)(2) of this section.
- (iii) Provides a basis for objective measurement of the status of the stock or stock complex against the criteria.
- (iv) Is operationally feasible.

(6) *Exceptions.* There are certain limited exceptions to the requirement to prevent overfishing. Harvesting one species of a mixed-stock complex at its optimum level may result in the overfishing of another stock component in the complex. A Council may decide to

permit this type of overfishing only if all of the following conditions are satisfied:

(i) It is demonstrated by analysis (paragraph (f)(6) of this section) that such action will result in long-term net benefits to the Nation.

(ii) It is demonstrated by analysis that mitigating measures have been considered and that a similar level of long-term net benefits cannot be achieved by modifying fleet behavior, gear selection/configuration, or other technical characteristic in a manner such that no overfishing would occur.

(iii) The resulting rate or level of fishing mortality will not cause any species or evolutionarily significant unit thereof to require protection under the ESA.

(e) *Ending overfishing and rebuilding overfished stocks*—(1) *Definition*. A threshold, either maximum fishing mortality or minimum stock size, is being “approached” whenever it is projected that the threshold will be breached within 2 years, based on trends in fishing effort, fishery resource size, and other appropriate factors.

(2) *Notification*. The Secretary will immediately notify a Council and request that remedial action be taken whenever the Secretary determines that:

(i) Overfishing is occurring;

(ii) A stock or stock complex is overfished;

(iii) The rate or level of fishing mortality for a stock or stock complex is approaching the maximum fishing mortality threshold;

(iv) A stock or stock complex is approaching its minimum stock size threshold; or

(v) Existing remedial action taken for the purpose of ending previously identified overfishing or rebuilding a previously identified overfished stock or stock complex has not resulted in adequate progress.

(3) *Council action*. Within 1 year of such time as the Secretary may identify that overfishing is occurring, that a stock or stock complex is overfished, or that a threshold is being approached, or such time as a Council may be notified of the same under paragraph (e)(2) of this section, the

Council must take remedial action by preparing an FMP, FMP amendment, or proposed regulations. This remedial action must be designed to accomplish all of the following purposes that apply:

(i) If overfishing is occurring, the purpose of the action is to end overfishing.

(ii) If the stock or stock complex is overfished, the purpose of the action is to rebuild the stock or stock complex to the MSY level within an appropriate time frame.

(iii) If the rate or level of fishing mortality is approaching the maximum fishing mortality threshold (from below), the purpose of the action is to prevent this threshold from being reached.

(iv) If the stock or stock complex is approaching the minimum stock size threshold (from above), the purpose of the action is to prevent this threshold from being reached.

(4) *Constraints on Council action*. (i) In cases where overfishing is occurring, Council action must be sufficient to end overfishing.

(ii) In cases where a stock or stock complex is overfished, Council action must specify a time period for rebuilding the stock or stock complex that satisfies the requirements of section 304(e)(4)(A) of the Magnuson-Stevens Act.

(A) A number of factors enter into the specification of the time period for rebuilding:

(1) The status and biology of the stock or stock complex;

(2) Interactions between the stock or stock complex and other components of the marine ecosystem (also referred to as “other environmental conditions”);

(3) The needs of fishing communities;

(4) Recommendations by international organizations in which the United States participates; and

(5) Management measures under an international agreement in which the United States participates.

(B) These factors enter into the specification of the time period for rebuilding as follows:

(1) The lower limit of the specified time period for rebuilding is determined by the status and biology of the

stock or stock complex and its interactions with other components of the marine ecosystem, and is defined as the amount of time that would be required for rebuilding if fishing mortality were eliminated entirely.

(2) If the lower limit is less than 10 years, then the specified time period for rebuilding may be adjusted upward to the extent warranted by the needs of fishing communities and recommendations by international organizations in which the United States participates, except that no such upward adjustment can result in the specified time period exceeding 10 years, unless management measures under an international agreement in which the United States participates dictate otherwise.

(3) If the lower limit is 10 years or greater, then the specified time period for rebuilding may be adjusted upward to the extent warranted by the needs of fishing communities and recommendations by international organizations in which the United States participates, except that no such upward adjustment can exceed the rebuilding period calculated in the absence of fishing mortality, plus one mean generation time or equivalent period based on the species' life-history characteristics. For example, suppose a stock could be rebuilt within 12 years in the absence of any fishing mortality, and has a mean generation time of 8 years. The rebuilding period, in this case, could be as long as 20 years.

(C) A rebuilding program undertaken after May 1, 1998 commences as soon as the first measures to rebuild the stock or stock complex are implemented.

(D) In the case of rebuilding plans that were already in place as of May 1, 1998, such rebuilding plans must be reviewed to determine whether they are in compliance with all requirements of the Magnuson-Stevens Act, as amended by the Sustainable Fisheries Act.

(iii) For fisheries managed under an international agreement, Council action must reflect traditional participation in the fishery, relative to other nations, by fishermen of the United States.

(5) *Interim measures.* The Secretary, on his/her own initiative or in response to a Council request, may implement interim measures to reduce overfishing

under section 305(c) of the Magnuson-Stevens Act, until such measures can be replaced by an FMP, FMP amendment, or regulations taking remedial action.

(i) These measures may remain in effect for no more than 180 days, but may be extended for an additional 180 days if the public has had an opportunity to comment on the measures and, in the case of Council-recommended measures, the Council is actively preparing an FMP, FMP amendment, or proposed regulations to address overfishing on a permanent basis. Such measures, if otherwise in compliance with the provisions of the Magnuson-Stevens Act, may be implemented even though they are not sufficient by themselves to stop overfishing of a fishery.

(ii) If interim measures are made effective without prior notice and opportunity for comment, they should be reserved for exceptional situations, because they affect fishermen without providing the usual procedural safeguards. A Council recommendation for interim measures without notice-and-comment rulemaking will be considered favorably if the short-term benefits of the measures in reducing overfishing outweigh the value of advance notice, public comment, and deliberative consideration of the impacts on participants in the fishery.

(f) *OY—(1) Definitions.* (i) The term “optimum,” with respect to the yield from a fishery, means the amount of fish that will provide the greatest overall benefit to the Nation, particularly with respect to food production and recreational opportunities and taking into account the protection of marine ecosystems; that is prescribed on the basis of the MSY from the fishery, as reduced by any relevant economic, social, or ecological factor; and, in the case of an overfished fishery, that provides for rebuilding to a level consistent with producing the MSY in such fishery.

(ii) In national standard 1, use of the phrase “achieving, on a continuing basis, the OY from each fishery” means producing, from each fishery, a long-term series of catches such that the average catch is equal to the average OY and such that status determination criteria are met.

(2) *Values in determination.* In determining the greatest benefit to the Nation, these values that should be weighed are food production, recreational opportunities, and protection afforded to marine ecosystems. They should receive serious attention when considering the economic, social, or ecological factors used in reducing MSY to obtain OY.

(i) The benefits of food production are derived from providing seafood to consumers, maintaining an economically viable fishery together with its attendant contributions to the national, regional, and local economies, and utilizing the capacity of the Nation's fishery resources to meet nutritional needs.

(ii) The benefits of recreational opportunities reflect the quality of both the recreational fishing experience and non-consumptive fishery uses such as ecotourism, fish watching, and recreational diving, and the contribution of recreational fishing to the national, regional, and local economies and food supplies.

(iii) The benefits of protection afforded to marine ecosystems are those resulting from maintaining viable populations (including those of unexploited species), maintaining evolutionary and ecological processes (e.g., disturbance regimes, hydrological processes, nutrient cycles), maintaining the evolutionary potential of species and ecosystems, and accommodating human use.

(3) *Factors relevant to OY.* Because fisheries have finite capacities, any attempt to maximize the measures of benefit described in paragraph (f)(2) of this section will inevitably encounter practical constraints. One of these is MSY. Moreover, various factors can constrain the optimum level of catch to a value less than MSY. The Magnuson-Stevens Act's definition of OY identifies three categories of such factors: Social, economic, and ecological. Not every factor will be relevant in every fishery. For some fisheries, insufficient information may be available with respect to some factors to provide a basis for corresponding reductions in MSY.

(i) *Social factors.* Examples are enjoyment gained from recreational fishing,

avoidance of gear conflicts and resulting disputes, preservation of a way of life for fishermen and their families, and dependence of local communities on a fishery. Other factors that may be considered include the cultural place of subsistence fishing, obligations under Indian treaties, and worldwide nutritional needs.

(ii) *Economic factors.* Examples are prudent consideration of the risk of overharvesting when a stock's size or productive capacity is uncertain, satisfaction of consumer and recreational needs, and encouragement of domestic and export markets for U.S.-harvested fish. Other factors that may be considered include the value of fisheries, the level of capitalization, the decrease in cost per unit of catch afforded by an increase in stock size, and the attendant increase in catch per unit of effort, alternate employment opportunities, and economies of coastal areas.

(iii) *Ecological factors.* Examples are stock size and age composition, the vulnerability of incidental or unregulated stocks in a mixed-stock fishery, predator-prey or competitive interactions, and dependence of marine mammals and birds or endangered species on a stock of fish. Also important are ecological or environmental conditions that stress marine organisms, such as natural and manmade changes in wetlands or nursery grounds, and effects of pollutants on habitat and stocks.

(4) *Specification.* (i) The amount of fish that constitutes the OY should be expressed in terms of numbers or weight of fish. However, OY may be expressed as a formula that converts periodic stock assessments into target harvest levels; in terms of an annual harvest of fish or shellfish having a minimum weight, length, or other measurement; or as an amount of fish taken only in certain areas, in certain seasons, with particular gear, or by a specified amount of fishing effort.

(ii) Either a range or a single value may be specified for OY. Specification of a numerical, fixed-value OY does not preclude use of annual target harvest levels that vary with stock size. Such target harvest levels may be prescribed on the basis of an OY control rule similar to the MSY control rule described

in paragraph (c)(1)(ii) of this section, but designed to achieve OY on average, rather than MSY. The annual harvest level obtained under an OY control rule must always be less than or equal to the harvest level that would be obtained under the MSY control rule.

(iii) All fishing mortality must be counted against OY, including that resulting from bycatch, scientific research, and any other fishing activities.

(iv) The OY specification should be translatable into an annual numerical estimate for the purposes of establishing any TALFF and analyzing impacts of the management regime. There should be a mechanism in the FMP for periodic reassessment of the OY specification, so that it is responsive to changing circumstances in the fishery.

(v) The determination of OY requires a specification of MSY, which may not always be possible or meaningful. However, even where sufficient scientific data as to the biological characteristics of the stock do not exist, or where the period of exploitation or investigation has not been long enough for adequate understanding of stock dynamics, or where frequent large-scale fluctuations in stock size diminish the meaningfulness of the MSY concept, the OY must still be based on the best scientific information available. When data are insufficient to estimate MSY directly, Councils should adopt other measures of productive capacity that can serve as reasonable proxies for MSY to the extent possible (also see paragraph (c)(3) of this section).

(vi) In a mixed-stock fishery, specification of a fishery-wide OY may be accompanied by management measures establishing separate annual target harvest levels for the individual stocks. In such cases, the sum of the individual target levels should not exceed OY.

(5) *OY and the precautionary approach.* In general, Councils should adopt a precautionary approach to specification of OY. A precautionary approach is characterized by three features:

(i) Target reference points, such as OY, should be set safely below limit reference points, such as the catch level associated with the fishing mortality rate or level defined by the sta-

tus determination criteria. Because it is a target reference point, OY does not constitute an absolute ceiling, but rather a desired result. An FMP must contain conservation and management measures to achieve OY, and provisions for information collection that are designed to determine the degree to which OY is achieved on a continuing basis—that is, to result in a long-term average catch equal to the long-term average OY, while meeting the status determination criteria. These measures should allow for practical and effective implementation and enforcement of the management regime, so that the harvest is allowed to reach OY, but not to exceed OY by a substantial amount. The Secretary has an obligation to implement and enforce the FMP so that OY is achieved. If management measures prove unenforceable—or too restrictive, or not rigorous enough to realize OY—they should be modified; an alternative is to reexamine the adequacy of the OY specification. Exceeding OY does not necessarily constitute overfishing. However, even if no overfishing resulted from exceeding OY, continual harvest at a level above OY would violate national standard 1, because OY was not achieved on a continuing basis.

(ii) A stock or stock complex that is below the size that would produce MSY should be harvested at a lower rate or level of fishing mortality than if the stock or stock complex were above the size that would produce MSY.

(iii) Criteria used to set target catch levels should be explicitly risk averse, so that greater uncertainty regarding the status or productive capacity of a stock or stock complex corresponds to greater caution in setting target catch levels. Part of the OY may be held as a reserve to allow for factors such as uncertainties in estimates of stock size and DAH. If an OY reserve is established, an adequate mechanism should be included in the FMP to permit timely release of the reserve to domestic or foreign fishermen, if necessary.

(6) *Analysis.* An FMP must contain an assessment of how its OY specification was determined (section 303(a)(3) of the Magnuson-Stevens Act). It should relate the explanation of overfishing in

Fishery Conservation and Management

§ 600.315

paragraph (d) of this section to conditions in the particular fishery and explain how its choice of OY and conservation and management measures will prevent overfishing in that fishery. A Council must identify those economic, social, and ecological factors relevant to management of a particular fishery, then evaluate them to determine the amount, if any, by which MSY exceeds OY. The choice of a particular OY must be carefully defined and documented to show that the OY selected will produce the greatest benefit to the Nation. If overfishing is permitted under paragraph (d)(6) of this section, the assessment must contain a justification in terms of overall benefits, including a comparison of benefits under alternative management measures, and an analysis of the risk of any species or ecologically significant unit thereof reaching a threatened or endangered status, as well as the risk of any stock or stock complex falling below its minimum stock size threshold.

(7) *OY and foreign fishing.* Section 201(d) of the Magnuson-Stevens Act provides that fishing by foreign nations is limited to that portion of the OY that will not be harvested by vessels of the United States.

(i) *DAH.* Councils must consider the capacity of, and the extent to which, U.S. vessels will harvest the OY on an annual basis. Estimating the amount that U.S. fishing vessels will actually harvest is required to determine the surplus.

(ii) *DAP.* Each FMP must assess the capacity of U.S. processors. It must also assess the amount of DAP, which is the sum of two estimates: The estimated amount of U.S. harvest that domestic processors will process, which may be based on historical performance or on surveys of the expressed intention of manufacturers to process, supported by evidence of contracts, plant expansion, or other relevant information; and the estimated amount of fish that will be harvested by domestic vessels, but not processed (e.g., marketed as fresh whole fish, used for private consumption, or used for bait).

(iii) *JVP.* When DAH exceeds DAP, the surplus is available for JVP. JVP is derived from DAH.

[63 FR 24229, May 1, 1998]

§ 600.315 National Standard 2—Scientific Information.

(a) *Standard 2.* Conservation and management measures shall be based upon the best scientific information available.

(b) *FMP development.* The fact that scientific information concerning a fishery is incomplete does not prevent the preparation and implementation of an FMP (see related §§ 600.320(d)(2) and 600.340(b)).

(1) Scientific information includes, but is not limited to, information of a biological, ecological, economic, or social nature. Successful fishery management depends, in part, on the timely availability, quality, and quantity of scientific information, as well as on the thorough analysis of this information, and the extent to which the information is applied. If there are conflicting facts or opinions relevant to a particular point, a Council may choose among them, but should justify the choice.

(2) FMPs must take into account the best scientific information available at the time of preparation. Between the initial drafting of an FMP and its submission for final review, new information often becomes available. This new information should be incorporated into the final FMP where practicable; but it is unnecessary to start the FMP process over again, unless the information indicates that drastic changes have occurred in the fishery that might require revision of the management objectives or measures.

(c) *FMP implementation.* (1) An FMP must specify whatever information fishermen and processors will be required or requested to submit to the Secretary. Information about harvest within state boundaries, as well as in the EEZ, may be collected if it is needed for proper implementation of the FMP and cannot be obtained otherwise. The FMP should explain the practical utility of the information specified in monitoring the fishery, in facilitating inseason management decisions, and in

judging the performance of the management regime; it should also consider the effort, cost, or social impact of obtaining it.

(2) An FMP should identify scientific information needed from other sources to improve understanding and management of the resource, marine ecosystem, and the fishery (including fishing communities).

(3) The information submitted by various data suppliers should be comparable and compatible, to the maximum extent possible.

(d) *FMP amendment.* FMPs should be amended on a timely basis, as new information indicates the necessity for change in objectives or management measures.

(e) *SAFE Report.* (1) The SAFE report is a document or set of documents that provides Councils with a summary of information concerning the most recent biological condition of stocks and the marine ecosystems in the FMU and the social and economic condition of the recreational and commercial fishing interests, fishing communities, and the fish processing industries. It summarizes, on a periodic basis, the best available scientific information concerning the past, present, and possible future condition of the stocks, marine ecosystems, and fisheries being managed under Federal regulation.

(i) The Secretary has the responsibility to assure that a SAFE report or similar document is prepared, reviewed annually, and changed as necessary for each FMP. The Secretary or Councils may utilize any combination of talent from Council, state, Federal, university, or other sources to acquire and analyze data and produce the SAFE report.

(ii) The SAFE report provides information to the Councils for determining annual harvest levels from each stock, documenting significant trends or changes in the resource, marine ecosystems, and fishery over time, and assessing the relative success of existing state and Federal fishery management programs. Information on bycatch and safety for each fishery should also be summarized. In addition, the SAFE report may be used to update or expand previous environmental and regulatory

impact documents, and ecosystem and habitat descriptions.

(iii) Each SAFE report must be scientifically based, and cite data sources and interpretations.

(2) Each SAFE report should contain information on which to base harvest specifications.

(3) Each SAFE report should contain a description of the maximum fishing mortality threshold and the minimum stock size threshold for each stock or stock complex, along with information by which the Council may determine:

(i) Whether overfishing is occurring with respect to any stock or stock complex, whether any stock or stock complex is overfished, whether the rate or level of fishing mortality applied to any stock or stock complex is approaching the maximum fishing mortality threshold, and whether the size of any stock or stock complex is approaching the minimum stock size threshold.

(ii) Any management measures necessary to provide for rebuilding an overfished stock or stock complex (if any) to a level consistent with producing the MSY in such fishery.

(4) Each SAFE report may contain additional economic, social, community, essential fish habitat, and ecological information pertinent to the success of management or the achievement of objectives of each FMP.

(5) Each SAFE report may contain additional economic, social, and ecological information pertinent to the success of management or the achievement of objectives of each FMP.

[61 FR 32540, June 24, 1996, as amended at 63 FR 24233, May 1, 1998]

§ 600.320 National Standard 3—Management Units.

(a) *Standard 3.* To the extent practicable, an individual stock of fish shall be managed as a unit throughout its range, and interrelated stocks of fish shall be managed as a unit or in close coordination.

(b) *General.* The purpose of this standard is to induce a comprehensive approach to fishery management. The geographic scope of the fishery, for planning purposes, should cover the entire range of the stock(s) of fish, and not be overly constrained by political

boundaries. Wherever practicable, an FMP should seek to manage inter-related stocks of fish.

(c) *Unity of management.* Cooperation and understanding among entities concerned with the fishery (e.g., Councils, states, Federal Government, international commissions, foreign nations) are vital to effective management. Where management of a fishery involves multiple jurisdictions, coordination among the several entities should be sought in the development of an FMP. Where a range overlaps Council areas, one FMP to cover the entire range is preferred. The Secretary designates which Council(s) will prepare the FMP, under section 304(f) of the Magnuson-Stevens Act.

(d) *Management unit.* The term “management unit” means a fishery or that portion of a fishery identified in an FMP as relevant to the FMP’s management objectives.

(1) *Basis.* The choice of a management unit depends on the focus of the FMP’s objectives, and may be organized around biological, geographic, economic, technical, social, or ecological perspectives. For example:

(i) *Biological*—could be based on a stock(s) throughout its range.

(ii) *Geographic*—could be an area.

(iii) *Economic*—could be based on a fishery supplying specific product forms.

(iv) *Technical*—could be based on a fishery utilizing a specific gear type or similar fishing practices.

(v) *Social*—could be based on fishermen as the unifying element, such as when the fishermen pursue different species in a regular pattern throughout the year.

(vi) *Ecological*—could be based on species that are associated in the ecosystem or are dependent on a particular habitat.

(2) *Conservation and management measures.* FMPs should include conservation and management measures for that part of the management unit within U.S. waters, although the Secretary can ordinarily implement them only within the EEZ. The measures need not be identical for each geographic area within the management unit, if the FMP justifies the differences. A management unit may contain, in addition

to regulated species, stocks of fish for which there is not enough information available to specify MSY and OY or to establish management measures, so that data on these species may be collected under the FMP.

(e) *Analysis.* To document that an FMP is as comprehensive as practicable, it should include discussions of the following:

(1) The range and distribution of the stocks, as well as the patterns of fishing effort and harvest.

(2) Alternative management units and reasons for selecting a particular one. A less-than-comprehensive management unit may be justified if, for example, complementary management exists or is planned for a separate geographic area or for a distinct use of the stocks, or if the unmanaged portion of the resource is immaterial to proper management.

(3) Management activities and habitat programs of adjacent states and their effects on the FMP’s objectives and management measures. Where state action is necessary to implement measures within state waters to achieve FMP objectives, the FMP should identify what state action is necessary, discuss the consequences of state inaction or contrary action, and make appropriate recommendations. The FMP should also discuss the impact that Federal regulations will have on state management activities.

(4) Management activities of other countries having an impact on the fishery, and how the FMP’s management measures are designed to take into account these impacts. International boundaries may be dealt with in several ways. For example:

(i) By limiting the management unit’s scope to that portion of the stock found in U.S. waters;

(ii) By estimating MSY for the entire stock and then basing the determination of OY for the U.S. fishery on the portion of the stock within U.S. waters; or

(iii) By referring to treaties or cooperative agreements.

[61 FR 32540, June 24, 1996, as amended at 63 FR 24234, May 1, 1998]

§ 600.325 National Standard 4—Allocations.

(a) *Standard 4.* Conservation and management measures shall not discriminate between residents of different states. If it becomes necessary to allocate or assign fishing privileges among various U.S. fishermen, such allocation shall be:

- (1) Fair and equitable to all such fishermen.
- (2) Reasonably calculated to promote conservation.
- (3) Carried out in such manner that no particular individual, corporation, or other entity acquires an excessive share of such privileges.

(b) *Discrimination among residents of different states.* An FMP may not differentiate among U.S. citizens, nationals, resident aliens, or corporations on the basis of their state of residence. An FMP may not incorporate or rely on a state statute or regulation that discriminates against residents of another state. Conservation and management measures that have different effects on persons in various geographic locations are permissible if they satisfy the other guidelines under Standard 4. Examples of these precepts are:

(1) An FMP that restricted fishing in the EEZ to those holding a permit from state X would violate Standard 4 if state X issued permits only to its own citizens.

(2) An FMP that closed a spawning ground might disadvantage fishermen living in the state closest to it, because they would have to travel farther to an open area, but the closure could be justified under Standard 4 as a conservation measure with no discriminatory intent.

(c) *Allocation of fishing privileges.* An FMP may contain management measures that allocate fishing privileges if such measures are necessary or helpful in furthering legitimate objectives or in achieving the OY, and if the measures conform with paragraphs (c)(3)(i) through (c)(3)(iii) of this section.

(1) *Definition.* An “allocation” or “assignment” of fishing privileges is a direct and deliberate distribution of the opportunity to participate in a fishery among identifiable, discrete user groups or individuals. Any management measure (or lack of manage-

ment) has incidental allocative effects, but only those measures that result in direct distributions of fishing privileges will be judged against the allocation requirements of Standard 4. Adoption of an FMP that merely perpetuates existing fishing practices may result in an allocation, if those practices directly distribute the opportunity to participate in the fishery. Allocations of fishing privileges include, for example, per-vessel catch limits, quotas by vessel class and gear type, different quotas or fishing seasons for recreational and commercial fishermen, assignment of ocean areas to different gear users, and limitation of permits to a certain number of vessels or fishermen.

(2) *Analysis of allocations.* Each FMP should contain a description and analysis of the allocations existing in the fishery and of those made in the FMP. The effects of eliminating an existing allocation system should be examined. Allocation schemes considered, but rejected by the Council, should be included in the discussion. The analysis should relate the recommended allocations to the FMP’s objectives and OY specification, and discuss the factors listed in paragraph (c)(3) of this section.

(3) *Factors in making allocations.* An allocation of fishing privileges must be fair and equitable, must be reasonably calculated to promote conservation, and must avoid excessive shares. These tests are explained in paragraphs (c)(3)(i) through (c)(3)(iii) of this section:

(i) *Fairness and equity.* (A) An allocation of fishing privileges should be rationally connected to the achievement of OY or with the furtherance of a legitimate FMP objective. Inherent in an allocation is the advantaging of one group to the detriment of another. The motive for making a particular allocation should be justified in terms of the objectives of the FMP; otherwise, the disadvantaged user groups or individuals would suffer without cause. For instance, an FMP objective to preserve the economic status quo cannot be achieved by excluding a group of long-time participants in the fishery. On the other hand, there is a rational connection between an objective of harvesting

Fishery Conservation and Management

§ 600.330

shrimp at their maximum size and closing a nursery area to trawling.

(B) An allocation of fishing privileges may impose a hardship on one group if it is outweighed by the total benefits received by another group or groups. An allocation need not preserve the status quo in the fishery to qualify as “fair and equitable,” if a restructuring of fishing privileges would maximize overall benefits. The Council should make an initial estimate of the relative benefits and hardships imposed by the allocation, and compare its consequences with those of alternative allocation schemes, including the status quo. Where relevant, judicial guidance and government policy concerning the rights of treaty Indians and aboriginal Americans must be considered in determining whether an allocation is fair and equitable.

(ii) *Promotion of conservation.* Numerous methods of allocating fishing privileges are considered “conservation and management” measures under section 303 of the Magnuson-Stevens Act. An allocation scheme may promote conservation by encouraging a rational, more easily managed use of the resource. Or, it may promote conservation (in the sense of wise use) by optimizing the yield in terms of size, value, market mix, price, or economic or social benefit of the product. To the extent that rebuilding plans or other conservation and management measures that reduce the overall harvest in a fishery are necessary, any harvest restrictions or recovery benefits must be allocated fairly and equitably among the commercial, recreational, and charter fishing sectors of the fishery.

(iii) *Avoidance of excessive shares.* An allocation scheme must be designed to deter any person or other entity from acquiring an excessive share of fishing privileges, and to avoid creating conditions fostering inordinate control, by buyers or sellers, that would not otherwise exist.

(iv) *Other factors.* In designing an allocation scheme, a Council should consider other factors relevant to the FMP’s objectives. Examples are economic and social consequences of the scheme, food production, consumer interest, dependence on the fishery by present participants and coastal com-

munities, efficiency of various types of gear used in the fishery, transferability of effort to and impact on other fisheries, opportunity for new participants to enter the fishery, and enhancement of opportunities for recreational fishing.

[61 FR 32540, June 24, 1996, as amended at 63 FR 24234, May 1, 1998]

§ 600.330 National Standard 5—Efficiency.

(a) *Standard 5.* Conservation and management measures shall, where practicable, consider efficiency in the utilization of fishery resources; except that no such measure shall have economic allocation as its sole purpose.

(b) *Efficiency in the utilization of resources—*(1) *General.* The term “utilization” encompasses harvesting, processing, marketing, and non-consumptive uses of the resource, since management decisions affect all sectors of the industry. In considering efficient utilization of fishery resources, this standard highlights one way that a fishery can contribute to the Nation’s benefit with the least cost to society: Given a set of objectives for the fishery, an FMP should contain management measures that result in as efficient a fishery as is practicable or desirable.

(2) *Efficiency.* In theory, an efficient fishery would harvest the OY with the minimum use of economic inputs such as labor, capital, interest, and fuel. Efficiency in terms of aggregate costs then becomes a conservation objective, where “conservation” constitutes wise use of all resources involved in the fishery, not just fish stocks.

(i) In an FMP, management measures may be proposed that allocate fish among different groups of individuals or establish a system of property rights. Alternative measures examined in searching for an efficient outcome will result in different distributions of gains and burdens among identifiable user groups. An FMP should demonstrate that management measures aimed at efficiency do not simply redistribute gains and burdens without an increase in efficiency.

(ii) Management regimes that allow a fishery to operate at the lowest possible cost (e.g., fishing effort, administration, and enforcement) for a particular level of catch and initial stock size are considered efficient. Restrictive measures that unnecessarily raise any of those costs move the regime toward inefficiency. Unless the use of inefficient techniques or the creation of redundant fishing capacity contributes to the attainment of other social or biological objectives, an FMP may not contain management measures that impede the use of cost-effective techniques of harvesting, processing, or marketing, and should avoid creating strong incentives for excessive investment in private sector fishing capital and labor.

(c) *Limited access.* A “system for limiting access,” which is an optional measure under section 303(b) of the Magnuson-Stevens Act, is a type of allocation of fishing privileges that may be considered to contribute to economic efficiency or conservation. For example, limited access may be used to combat overfishing, overcrowding, or overcapitalization in a fishery to achieve OY. In an unutilized or underutilized fishery, it may be used to reduce the chance that these conditions will adversely affect the fishery in the future, or to provide adequate economic return to pioneers in a new fishery. In some cases, limited entry is a useful ingredient of a conservation scheme, because it facilitates application and enforcement of other management measures.

(1) *Definition.* Limited access (or limited entry) is a management technique that attempts to limit units of effort in a fishery, usually for the purpose of reducing economic waste, improving net economic return to the fishermen, or capturing economic rent for the benefit of the taxpayer or the consumer. Common forms of limited access are licensing of vessels, gear, or fishermen to reduce the number of units of effort, and dividing the total allowable catch into fishermen’s quotas (a stock-certificate system). Two forms (i.e., Federal fees for licenses or permits in excess of administrative costs, and taxation) are not permitted under the Magnuson-

Stevens Act, except for fees allowed under section 304(d)(2).

(2) *Factors to consider.* The Magnuson-Stevens Act ties the use of limited access to the achievement of OY. An FMP that proposes a limited access system must consider the factors listed in section 303(b)(6) of the Magnuson-Stevens Act and in § 600.325(c)(3). In addition, it should consider the criteria for qualifying for a permit, the nature of the interest created, whether to make the permit transferable, and the Magnuson-Stevens Act’s limitations on returning economic rent to the public under section 304(d). The FMP should also discuss the costs of achieving an appropriate distribution of fishing privileges.

(d) *Analysis.* An FMP should discuss the extent to which overcapitalization, congestion, economic waste, and inefficient techniques in the fishery reduce the net benefits derived from the management unit and prevent the attainment and appropriate allocation of OY. It should also explain, in terms of the FMP’s objectives, any restriction placed on the use of efficient techniques of harvesting, processing, or marketing. If, during FMP development, the Council considered imposing a limited-entry system, the FMP should analyze the Council’s decision to recommend or reject limited access as a technique to achieve efficient utilization of the resources of the fishing industry.

(e) *Economic allocation.* This standard prohibits only those measures that distribute fishery resources among fishermen on the basis of economic factors alone, and that have economic allocation as their only purpose. Where conservation and management measures are recommended that would change the economic structure of the industry or the economic conditions under which the industry operates, the need for such measures must be justified in light of the biological, ecological, and social objectives of the FMP, as well as the economic objectives.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998; 63 FR 24234, May 1, 1998]

§ 600.335 National Standard 6—Variations and Contingencies.

(a) *Standard 6.* Conservation and management measures shall take into account and allow for variations among, and contingencies in, fisheries, fishery resources, and catches.

(b) *Conservation and management.* Each fishery exhibits unique uncertainties. The phrase “conservation and management” implies the wise use of fishery resources through a management regime that includes some protection against these uncertainties. The particular regime chosen must be flexible enough to allow timely response to resource, industry, and other national and regional needs. Continual data acquisition and analysis will help the development of management measures to compensate for variations and to reduce the need for substantial buffers. Flexibility in the management regime and the regulatory process will aid in responding to contingencies.

(c) *Variations.* (1) In fishery management terms, variations arise from biological, social, and economic occurrences, as well as from fishing practices. Biological uncertainties and lack of knowledge can hamper attempts to estimate stock size and strength, stock location in time and space, environmental/habitat changes, and ecological interactions. Economic uncertainty may involve changes in foreign or domestic market conditions, changes in operating costs, drifts toward overcapitalization, and economic perturbations caused by changed fishing patterns. Changes in fishing practices, such as the introduction of new gear, rapid increases or decreases in harvest effort, new fishing strategies, and the effects of new management techniques, may also create uncertainties. Social changes could involve increases or decreases in recreational fishing, or the movement of people into or out of fishing activities due to such factors as age or educational opportunities.

(2) Every effort should be made to develop FMPs that discuss and take into account these vicissitudes. To the extent practicable, FMPs should provide a suitable buffer in favor of conservation. Allowances for uncertainties should be factored into the various elements of an FMP. Examples are:

(i) *Reduce OY.* Lack of scientific knowledge about the condition of a stock(s) could be reason to reduce OY.

(ii) *Establish a reserve.* Creation of a reserve may compensate for uncertainties in estimating domestic harvest, stock conditions, or environmental factors.

(iii) *Adjust management techniques.* In the absence of adequate data to predict the effect of a new regime, and to avoid creating unwanted variations, a Council could guard against producing drastic changes in fishing patterns, allocations, or practices.

(iv) *Highlight habitat conditions.* FMPs may address the impact of pollution and the effects of wetland and estuarine degradation on the stocks of fish; identify causes of pollution and habitat degradation and the authorities having jurisdiction to regulate or influence such activities; propose recommendations that the Secretary will convey to those authorities to alleviate such problems; and state the views of the Council on unresolved or anticipated issues.

(d) *Contingencies.* Unpredictable events—such as unexpected resource surges or failures, fishing effort greater than anticipated, disruptive gear conflicts, climatic conditions, or environmental catastrophes—are best handled by establishing a flexible management regime that contains a range of management options through which it is possible to act quickly without amending the FMP or even its regulations.

(1) The FMP should describe the management options and their consequences in the necessary detail to guide the Secretary in responding to changed circumstances, so that the Council preserves its role as policy-setter for the fishery. The description should enable the public to understand what may happen under the flexible regime, and to comment on the options.

(2) FMPs should include criteria for the selection of management measures, directions for their application, and mechanisms for timely adjustment of management measures comprising the regime. For example, an FMP could include criteria that allow the Secretary to open and close seasons, close fishing grounds, or make other adjustments in management measures.

(3) Amendment of a flexible FMP would be necessary when circumstances in the fishery change substantially, or when a Council adopts a different management philosophy and objectives.

§ 600.340 National Standard 7—Costs and Benefits.

(a) *Standard 7.* Conservation and management measures shall, where practicable, minimize costs and avoid unnecessary duplication.

(b) *Necessity of Federal management—*

(1) *General.* The principle that not every fishery needs regulation is implicit in this standard. The Magnuson-Stevens Act requires Councils to prepare FMPs only for overfished fisheries and for other fisheries where regulation would serve some useful purpose and where the present or future benefits of regulation would justify the costs. For example, the need to collect data about a fishery is not, by itself, adequate justification for preparation of an FMP, since there are less costly ways to gather the data (see § 600.320(d)(2)). In some cases, the FMP preparation process itself, even if it does not culminate in a document approved by the Secretary, can be useful in supplying a basis for management by one or more coastal states.

(2) *Criteria.* In deciding whether a fishery needs management through regulations implementing an FMP, the following general factors should be considered, among others:

(i) The importance of the fishery to the Nation and to the regional economy.

(ii) The condition of the stock or stocks of fish and whether an FMP can improve or maintain that condition.

(iii) The extent to which the fishery could be or is already adequately managed by states, by state/Federal programs, by Federal regulations pursuant to FMPs or international commissions, or by industry self-regulation, consistent with the policies and standards of the Magnuson-Stevens Act.

(iv) The need to resolve competing interests and conflicts among user groups and whether an FMP can further that resolution.

(v) The economic condition of a fishery and whether an FMP can produce more efficient utilization.

(vi) The needs of a developing fishery, and whether an FMP can foster orderly growth.

(vii) The costs associated with an FMP, balanced against the benefits (see paragraph (d) of this section as a guide).

(c) *Alternative management measures.* Management measures should not impose unnecessary burdens on the economy, on individuals, on private or public organizations, or on Federal, state, or local governments. Factors such as fuel costs, enforcement costs, or the burdens of collecting data may well suggest a preferred alternative.

(d) *Analysis.* The supporting analyses for FMPs should demonstrate that the benefits of fishery regulation are real and substantial relative to the added research, administrative, and enforcement costs, as well as costs to the industry of compliance. In determining the benefits and costs of management measures, each management strategy considered and its impacts on different user groups in the fishery should be evaluated. This requirement need not produce an elaborate, formalistic cost/benefit analysis. Rather, an evaluation of effects and costs, especially of differences among workable alternatives, including the status quo, is adequate. If quantitative estimates are not possible, qualitative estimates will suffice.

(1) *Burdens.* Management measures should be designed to give fishermen the greatest possible freedom of action in conducting business and pursuing recreational opportunities that are consistent with ensuring wise use of the resources and reducing conflict in the fishery. The type and level of burden placed on user groups by the regulations need to be identified. Such an examination should include, for example: Capital outlays; operating and maintenance costs; reporting costs; administrative, enforcement, and information costs; and prices to consumers. Management measures may shift costs from one level of government to another, from one part of the private sector to another, or from the government to the private sector. Redistribution of costs through regulations is likely to

generate controversy. A discussion of these and any other burdens placed on the public through FMP regulations should be a part of the FMP's supporting analyses.

(2) *Gains*. The relative distribution of gains may change as a result of instituting different sets of alternatives, as may the specific type of gain. The analysis of benefits should focus on the specific gains produced by each alternative set of management measures, including the status quo. The benefits to society that result from the alternative management measures should be identified, and the level of gain assessed.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998; 63 FR 24234, May 1, 1998]

§ 600.345 National Standard 8—Communities.

(a) *Standard 8*. Conservation and management measures shall, consistent with the conservation requirements of the Magnuson-Stevens Act (including the prevention of overfishing and rebuilding of overfished stocks), take into account the importance of fishery resources to fishing communities in order to:

(1) Provide for the sustained participation of such communities; and

(2) To the extent practicable, minimize adverse economic impacts on such communities.

(b) *General*. (1) This standard requires that an FMP take into account the importance of fishery resources to fishing communities. This consideration, however, is within the context of the conservation requirements of the Magnuson-Stevens Act. Deliberations regarding the importance of fishery resources to affected fishing communities, therefore, must not compromise the achievement of conservation requirements and goals of the FMP. Where the preferred alternative negatively affects the sustained participation of fishing communities, the FMP should discuss the rationale for selecting this alternative over another with a lesser impact on fishing communities. All other things being equal, where two alternatives achieve similar conservation goals, the alternative that provides the greater potential for sustained participation of

such communities and minimizes the adverse economic impacts on such communities would be the preferred alternative.

(2) This standard does not constitute a basis for allocating resources to a specific fishing community nor for providing preferential treatment based on residence in a fishing community.

(3) The term "fishing community" means a community that is substantially dependent on or substantially engaged in the harvest or processing of fishery resources to meet social and economic needs, and includes fishing vessel owners, operators, and crew, and fish processors that are based in such communities. A fishing community is a social or economic group whose members reside in a specific location and share a common dependency on commercial, recreational, or subsistence fishing or on directly related fisheries-dependent services and industries (for example, boatyards, ice suppliers, tackle shops).

(4) The term "sustained participation" means continued access to the fishery within the constraints of the condition of the resource.

(c) *Analysis*. (1) FMPs must examine the social and economic importance of fisheries to communities potentially affected by management measures. For example, severe reductions of harvests for conservation purposes may decrease employment opportunities for fishermen and processing plant workers, thereby adversely affecting their families and communities. Similarly, a management measure that results in the allocation of fishery resources among competing sectors of a fishery may benefit some communities at the expense of others.

(2) An appropriate vehicle for the analyses under this standard is the fishery impact statement required by section 303(a)(9) of the Magnuson-Stevens Act. Qualitative and quantitative data may be used, including information provided by fishermen, dealers, processors, and fisheries organizations and associations. In cases where data are severely limited, effort should be directed to identifying and gathering needed data.

(3) To address the sustained participation of fishing communities that will

be affected by management measures, the analysis should first identify affected fishing communities and then assess their differing levels of dependence on and engagement in the fishery being regulated. The analysis should also specify how that assessment was made. The best available data on the history, extent, and type of participation of these fishing communities in the fishery should be incorporated into the social and economic information presented in the FMP. The analysis does not have to contain an exhaustive listing of all communities that might fit the definition; a judgment can be made as to which are primarily affected. The analysis should discuss each alternative's likely effect on the sustained participation of these fishing communities in the fishery.

(4) The analysis should assess the likely positive and negative social and economic impacts of the alternative management measures, over both the short and the long term, on fishing communities. Any particular management measure may economically benefit some communities while adversely affecting others. Economic impacts should be considered both for individual communities and for the group of all affected communities identified in the FMP. Impacts of both consumptive and non-consumptive uses of fishery resources should be considered.

(5) A discussion of social and economic impacts should identify those alternatives that would minimize adverse impacts on these fishing communities within the constraints of conservation and management goals of the FMP, other national standards, and other applicable law.

[63 FR 24234, May 1, 1998]

§ 600.350 National Standard 9—Bycatch.

(a) *Standard 9.* Conservation and management measures shall, to the extent practicable:

(1) Minimize bycatch; and

(2) To the extent bycatch cannot be avoided, minimize the mortality of such bycatch.

(b) *General.* This national standard requires Councils to consider the bycatch effects of existing and planned conservation and management meas-

ures. Bycatch can, in two ways, impede efforts to protect marine ecosystems and achieve sustainable fisheries and the full benefits they can provide to the Nation. First, bycatch can increase substantially the uncertainty concerning total fishing-related mortality, which makes it more difficult to assess the status of stocks, to set the appropriate OY and define overfishing levels, and to ensure that OYs are attained and overfishing levels are not exceeded. Second, bycatch may also preclude other more productive uses of fishery resources.

(c) *Definition—Bycatch.* The term “bycatch” means fish that are harvested in a fishery, but that are not sold or kept for personal use. Bycatch includes the discard of whole fish at sea or elsewhere, including economic discards and regulatory discards, and fishing mortality due to an encounter with fishing gear that does not result in capture of fish (i.e., unobserved fishing mortality). Bycatch does not include any fish that legally are retained in a fishery and kept for personal, tribal, or cultural use, or that enter commerce through sale, barter, or trade. Bycatch does not include fish released alive under a recreational catch-and-release fishery management program. A catch-and-release fishery management program is one in which the retention of a particular species is prohibited. In such a program, those fish released alive would not be considered bycatch. Bycatch also does not include Atlantic highly migratory species harvested in a commercial fishery that are not regulatory discards and that are tagged and released alive under a scientific tag-and-release program established by the Secretary.

(d) *Minimizing bycatch and bycatch mortality.* The priority under this standard is first to avoid catching bycatch species where practicable. Fish that are bycatch and cannot be avoided must, to the extent practicable, be returned to the sea alive. Any proposed conservation and management measure that does not give priority to avoiding the capture of bycatch species must be supported by appropriate analyses. In their evaluation, the Councils must consider the net benefits to the Nation, which include, but are not limited to:

Negative impacts on affected stocks; incomes accruing to participants in directed fisheries in both the short and long term; incomes accruing to participants in fisheries that target the bycatch species; environmental consequences; non-market values of bycatch species, which include non-consumptive uses of bycatch species and existence values, as well as recreational values; and impacts on other marine organisms. To evaluate conservation and management measures relative to this and other national standards, as well as to evaluate total fishing mortality, Councils must—

(1) *Promote development of a database on bycatch and bycatch mortality in the fishery to the extent practicable.* A review and, where necessary, improvement of data collection methods, data sources, and applications of data must be initiated for each fishery to determine the amount, type, disposition, and other characteristics of bycatch and bycatch mortality in each fishery for purposes of this standard and of section 303(a)(11) and (12) of the Magnuson-Stevens Act. Bycatch should be categorized to focus on management responses necessary to minimize bycatch and bycatch mortality to the extent practicable. When appropriate, management measures, such as at-sea monitoring programs, should be developed to meet these information needs.

(2) *For each management measure, assess the effects on the amount and type of bycatch and bycatch mortality in the fishery.* Most conservation and management measures can affect the amounts of bycatch or bycatch mortality in a fishery, as well as the extent to which further reductions in bycatch are practicable. In analyzing measures, including the status quo, Councils should assess the impacts of minimizing bycatch and bycatch mortality, as well as consistency of the selected measure with other national standards and applicable laws. The benefits of minimizing bycatch to the extent practicable should be identified and an assessment of the impact of the selected measure on bycatch and bycatch mortality provided. Due to limitations on the information available, fishery managers may not be able to generate precise estimates of bycatch and bycatch mor-

tality or other effects for each alternative. In the absence of quantitative estimates of the impacts of each alternative, Councils may use qualitative measures. Information on the amount and type of bycatch should be summarized in the SAFE reports.

(3) *Select measures that, to the extent practicable, will minimize bycatch and bycatch mortality.* (i) A determination of whether a conservation and management measure minimizes bycatch or bycatch mortality to the extent practicable, consistent with other national standards and maximization of net benefits to the Nation, should consider the following factors:

(A) Population effects for the bycatch species.

(B) Ecological effects due to changes in the bycatch of that species (effects on other species in the ecosystem).

(C) Changes in the bycatch of other species of fish and the resulting population and ecosystem effects.

(D) Effects on marine mammals and birds.

(E) Changes in fishing, processing, disposal, and marketing costs.

(F) Changes in fishing practices and behavior of fishermen.

(G) Changes in research, administration, and enforcement costs and management effectiveness.

(H) Changes in the economic, social, or cultural value of fishing activities and nonconsumptive uses of fishery resources.

(I) Changes in the distribution of benefits and costs.

(J) Social effects.

(ii) The Councils should adhere to the precautionary approach found in the Food and Agriculture Organization of the United Nations (FAO) Code of Conduct for Responsible Fisheries (Article 6.5), which is available from the Director, Publications Division, FAO, Viale delle Terme di Caracalla, 00100 Rome, Italy, when faced with uncertainty concerning any of the factors listed in this paragraph (d)(3).

(4) *Monitor selected management measures.* Effects of implemented measures should be evaluated routinely. Monitoring systems should be established prior to fishing under the selected

management measures. Where applicable, plans should be developed and coordinated with industry and other concerned organizations to identify opportunities for cooperative data collection, coordination of data management for cost efficiency, and avoidance of duplicative effort.

(e) *Other considerations.* Other applicable laws, such as the MMPA, the ESA, and the Migratory Bird Treaty Act, require that Councils consider the impact of conservation and management measures on living marine resources other than fish; i.e., marine mammals and birds.

[63 FR 24235, May 1, 1998]

§ 600.355 National Standard 10—Safety of Life at Sea.

(a) *Standard 10.* Conservation and management measures shall, to the extent practicable, promote the safety of human life at sea.

(b) *General.* (1) Fishing is an inherently dangerous occupation where not all hazardous situations can be foreseen or avoided. The standard directs Councils to reduce that risk in crafting their management measures, so long as they can meet the other national standards and the legal and practical requirements of conservation and management. This standard is not meant to give preference to one method of managing a fishery over another.

(2) The qualifying phrase “to the extent practicable” recognizes that regulation necessarily puts constraints on fishing that would not otherwise exist. These constraints may create pressures on fishermen to fish under conditions that they would otherwise avoid. This standard instructs the Councils to identify and avoid those situations, if they can do so consistent with the legal and practical requirements of conservation and management of the resource.

(3) For the purposes of this national standard, the safety of the fishing vessel and the protection from injury of persons aboard the vessel are considered the same as “safety of human life at sea. The safety of a vessel and the people aboard is ultimately the responsibility of the master of that vessel. Each master makes many decisions about vessel maintenance and loading

and about the capabilities of the vessel and crew to operate safely in a variety of weather and sea conditions. This national standard does not replace the judgment or relieve the responsibility of the vessel master related to vessel safety. The Councils, the USCG, and NMFS, through the consultation process of paragraph (d) of this section, will review all FMPs, amendments, and regulations during their development to ensure they recognize any impact on the safety of human life at sea and minimize or mitigate that impact where practicable.

(c) *Safety considerations.* The following is a non-inclusive list of safety considerations that should be considered in evaluating management measures under national standard 10.

(1) *Operating environment.* Where and when a fishing vessel operates is partly a function of the general climate and weather patterns of an area. Typically, larger vessels can fish farther offshore and in more adverse weather conditions than smaller vessels. An FMP should try to avoid creating situations that result in vessels going out farther, fishing longer, or fishing in weather worse than they generally would have in the absence of management measures. Where these conditions are unavoidable, management measures should mitigate these effects, consistent with the overall management goals of the fishery.

(2) *Gear and vessel loading requirements.* A fishing vessel operates in a very dynamic environment that can be an extremely dangerous place to work. Moving heavy gear in a seaway creates a dangerous situation on a vessel. Carrying extra gear can also significantly reduce the stability of a fishing vessel, making it prone to capsizing. An FMP should consider the safety and stability of fishing vessels when requiring specific gear or requiring the removal of gear from the water. Management measures should reflect a sensitivity to these issues and provide methods of mitigation of these situations wherever possible.

(3) *Limited season and area fisheries.* Fisheries where time constraints for harvesting are a significant factor and with no flexibility for weather, often

Fishery Conservation and Management

§ 600.410

called “derby” fisheries, can create serious safety problems. To participate fully in such a fishery, fishermen may fish in bad weather and overload their vessel with catch and/or gear. Where these conditions exist, FMPs should attempt to mitigate these effects and avoid them in new management regimes, as discussed in paragraph (e) of this section.

(d) *Consultation.* During preparation of any FMP, FMP amendment, or regulation that might affect safety of human life at sea, the Council should consult with the USCG and the fishing industry as to the nature and extent of any adverse impacts. This consultation may be done through a Council advisory panel, committee, or other review of the FMP, FMP amendment, or regulations. Mitigation, to the extent practicable, and other safety considerations identified in paragraph (c) of this section should be included in the FMP.

(e) *Mitigation measures.* There are many ways in which an FMP may avoid or provide alternative measures to reduce potential impacts on safety of human life at sea. The following is a list of some factors that could be considered when management measures are developed:

(1) Setting seasons to avoid hazardous weather.

(2) Providing for seasonal or trip flexibility to account for bad weather (weather days).

(3) Allowing for pre- and post-season “soak time” to deploy and pick up fixed gear, so as to avoid overloading vessels with fixed gear.

(4) Tailoring gear requirements to provide for smaller or lighter gear for smaller vessels.

(5) Avoiding management measures that require hazardous at-sea inspections or enforcement if other comparable enforcement could be accomplished as effectively.

(6) Limiting the number of participants in the fishery.

(7) Spreading effort over time and area to avoid potential gear and/or vessel conflicts.

(8) Implementing management measures that reduce the race for fish and the resulting incentives for fishermen

to take additional risks with respect to vessel safety.

[63 FR 24236, May 1, 1998]

Subpart E—Confidentiality of Statistics

§ 600.405 Types of statistics covered.

NOAA is authorized under the Magnuson-Stevens Act and other statutes to collect proprietary or confidential commercial or financial information. This part applies to all pertinent data required to be submitted to the Secretary with respect to any FMP including, but not limited to, information regarding the type and quantity of fishing gear used, catch by species in numbers of fish or weight thereof, areas in which fishing occurred, time of fishing, number of hauls, and the estimated processing capacity of, and the actual processing capacity utilized by, U.S. fish processors.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

§ 600.410 Collection and maintenance of statistics.

(a) *General.* (1) All statistics required to be submitted to the Secretary are provided to the Assistant Administrator.

(2) After receipt, the Assistant Administrator will remove all identifying particulars from the statistics if doing so is consistent with the needs of NMFS and good scientific practice.

(3) Appropriate safeguards as specified by NOAA Directives, or other NOAA or NMFS internal procedures, apply to the collection and maintenance of all statistics, whether separated from identifying particulars or not, so as to ensure their confidentiality.

(b) *Collection agreements with states.* (1) The Assistant Administrator may enter into an agreement with a state authorizing the state to collect statistics on behalf of the Secretary.

(2) NMFS will not enter into a cooperative collection agreement with a state unless the state has authority to protect the statistics from disclosure in a manner at least as protective as these regulations.

§ 600.415

50 CFR Ch. VI (10–1–05 Edition)

§ 600.415 Access to statistics.

(a) *General.* In determining whether to grant a request for access to confidential data, the following information will be taken into consideration (also see § 600.130):

(1) The specific types of data required.

(2) The relevance of the data to conservation and management issues.

(3) The duration of time access will be required: continuous, infrequent, or one-time.

(4) An explanation of why the availability of aggregate or non-confidential summaries of data from other sources would not satisfy the requested needs.

(b) *Federal employees.* Statistics submitted as a requirement of an FMP and that reveal the identity of the submitter will only be accessible to the following:

(1) Personnel within NMFS responsible for the collection, processing, and storage of the statistics.

(2) Federal employees who are responsible for FMP development, monitoring, and enforcement.

(3) Personnel within NMFS performing research that requires confidential statistics.

(4) Other NOAA personnel on a demonstrable need-to-know basis.

(5) NOAA/NMFS contractors or grantees who require access to confidential statistics to perform functions authorized by a Federal contract or grant.

(c) *State personnel.* Upon written request, confidential statistics will only be accessible if:

(1) State employees demonstrate a need for confidential statistics for use in fishery conservation and management.

(2) The state has entered into a written agreement between the Assistant Administrator and the head of the state's agency that manages marine and/or anadromous fisheries. The agreement shall contain a finding by the Assistant Administrator that the state has confidentiality protection authority comparable to the Magnuson-Stevens Act and that the state will exercise this authority to limit subsequent access and use of the data to fishery management and monitoring purposes.

(d) *Councils.* Upon written request by the Council Executive Director, access to confidential data will be granted to:

(1) Council employees who are responsible for FMP development and monitoring.

(2) A Council for use by the Council for conservation and management purposes, with the approval of the Assistant Administrator. In addition to the information described in paragraph (a) of this section, the Assistant Administrator will consider the following in deciding whether to grant access:

(i) The possibility that Council members might gain personal or competitive advantage from access to the data.

(ii) The possibility that the suppliers of the data would be placed at a competitive disadvantage by public disclosure of the data at Council meetings or hearings.

(3) A contractor of the Council for use in such analysis or studies necessary for conservation and management purposes, with approval of the Assistant Administrator and execution of an agreement with NMFS as described by NOAA Administrative Order (NAO) 216–100.

(e) *Prohibitions.* Persons having access to these data are prohibited from unauthorized use or disclosure and are subject to the provisions of 18 U.S.C. 1905, 16 U.S.C. 1857, and NOAA/NMFS internal procedures, including NAO 216–100.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

§ 600.420 Control system.

(a) The Assistant Administrator maintains a control system to protect the identity of submitters of statistics required by an FMP. The control system:

(1) Identifies those persons who have access to the statistics.

(2) Contains procedures to limit access to confidential data to authorized users.

(3) Provides for safeguarding the data.

(b) This system requires that all persons who have authorized access to the data be informed of the confidentiality of the data. These persons are required to sign a statement that they:

Fishery Conservation and Management

§ 600.501

(1) Have been informed that the data are confidential.

(2) Have reviewed and are familiar with the procedures to protect confidential statistics.

§ 600.425 Release of statistics.

(a) The Assistant Administrator will not release to the public any statistics required to be submitted under an FMP in a form that would identify the submitter, except as required by law.

(b) All requests from the public for statistics submitted in response to a requirement of an FMP will be processed consistent with the NOAA FOIA regulations (15 CFR part 903), NAO 205-14, Department of Commerce Administrative Orders 205-12 and 205-14 and 15 CFR part 4.

(c) NOAA does not release or allow access to confidential information in its possession to members of Council advisory groups, except as provided by law.

Subpart F—Foreign Fishing

§ 600.501 Vessel permits.

(a) *General.* (1) Each FFV fishing under the Magnuson-Stevens Act must have on board a permit issued under this section, unless it is engaged only in recreational fishing.

(2) Permits issued under this section do not authorize FFV's or persons to harass, capture, or kill marine mammals. No marine mammals may be taken in the course of fishing unless that vessel has on board a currently valid Authorization Certificate under the MMPA. Regulations governing the taking of marine mammals incidental to commercial fishing operations are contained in 50 CFR part 229 of this title.

(b) *Responsibility of owners and operators.* The owners and operators of each FFV are jointly and severally responsible for compliance with the Magnuson-Stevens Act, the applicable GIFA, this subpart, and any permit issued under the Magnuson-Stevens Act and this subpart. The owners and operators of each FFV bear civil responsibility for the acts of their employees and agents constituting violations, regardless of whether the specific acts were authorized or even forbidden by the

employer or principal, and regardless of knowledge concerning the occurrence.

(c) *Activity codes.* Permits to fish under this subpart may be issued by the Assistant Administrator for the activities described in this paragraph, but the permits may be modified by regulations of this subpart and by the conditions and restrictions attached to the permit (see paragraphs (e)(1)(v) and (1) of this section). The Assistant Administrator may issue a permit, as appropriate, for one or more of the activity codes listed. Only vessels of nations having a GIFA with the United States may be issued permits for activity codes 1 through 9. A GIFA is not required for a vessel to be issued a permit for activity code 10. The activity codes are described as follows:

(1) *Activity Code 1.* Catching, scouting, processing, transshipping, and supporting foreign vessels. Activity is limited to fish harvested or to be harvested by foreign vessels in the EEZ.

(2) *Activity Code 2.* Processing, scouting, transshipping, and supporting foreign vessels. Activity is limited to fish harvested or to be harvested by foreign vessels in the EEZ.

(3) *Activity Code 3.* Transshipping, scouting, and supporting foreign vessels. Activity is limited to fish harvested or to be harvested by foreign vessels in the EEZ.

(4) *Activity Code 4.* Processing, scouting, transshipping, and supporting U.S. vessels delivering fish to foreign vessels. Activity is limited to the receipt of unprocessed fish harvested or to be harvested by U.S. vessels.

(5) *Activity Code 5.* Transshipping, scouting, and supporting foreign vessels. Transshipment limited to fish received or to be received from foreign vessels processing fish from U.S. harvesting vessels.

(6) *Activity Code 6.* Transshipping, scouting, and supporting U.S. vessels. Transshipment limited to U.S.-harvested fish processed on board U.S. vessels.

(7) *Activity Code 7.* Processing, transshipping, and supporting foreign vessels. Activity limited to fish harvested or to be harvested by foreign vessels seaward of the EEZ.

(8) *Activity Code 8.* Transshipping and supporting foreign vessels. Activity is limited to fish harvested or to be harvested seaward of the EEZ by foreign vessels or fish duly authorized for processing in the internal waters of one of the states.

(9) *Activity Code 9.* Supporting U.S. fishing vessels and U.S. fish processing vessels and any foreign fishing vessels authorized under any activity code under paragraph (c) of this subpart.

(10) *Activity Code 10.* Transshipping at sea for the purpose of transporting fish or fish products from a point within the EEZ or, with the concurrence of a state, within the boundaries of that state, to a point outside the United States.

(d) *Application.* (1) Applications for FFV permits authorizing activity codes 1 through 9 must be submitted by an official representative of a foreign nation to the DOS. Applications for permits authorizing activity codes 1 through 9 are available from, and should be submitted to, DOS, OES/OMC, Washington, DC 20520. Applications for FFV permits authorizing activity code 10 may be submitted by any person to the Assistant Administrator. Applications for permits authorizing activity code 10 are available from NMFS, Attn: International Fisheries Division, 1315 East West Highway, Silver Spring, Maryland 20910. All applicants should allow 90 days for review and comment by the public, involved governmental agencies, and appropriate Councils and for processing before the anticipated date to begin fishing. The permit application fee must be paid at the time of application according to § 600.518.

(2) Applicants must provide complete and accurate information requested on the permit application form.

(3) Applicants for FFV's that will support U.S. vessels in joint ventures (Activity Code 4) must provide the additional information specified by the permit application form.

(4) Each applicant may request to substitute one FFV for another of the same flag by submitting a new application form and a short explanation of the reason for the substitution to the appropriate address listed at paragraph (d)(1) of this section. Each substitution

is considered a new application, and a new application fee must be paid. NMFS will promptly process an application for a vessel replacing a permitted FFV that is disabled or decommissioned, once the appropriate Council(s) and governmental agencies have been notified of the substituted application.

(e) *Issuance.* (1) Permits may be issued to an FFV by the Assistant Administrator after—

(i) The Assistant Administrator determines that the fishing described in the application will meet the requirements of the Magnuson-Stevens Act and approves the permit application.

(ii) The applicant has paid the fees and provided any assurances required by the Secretary in accordance with the provisions of § 600.518.

(iii) The applicant has appointed an agent.

(iv) The applicant has identified a designated representative.

(v) The applicant has accepted the general “conditions and restrictions” of receiving permits, as required by section 204(b)(7) of the Magnuson-Stevens Act, and any “additional restrictions” attached to the permit for the conservation and management of fishery resources or for the prevention of significant impairment of the national defense or security interests.

(2) The DOS will provide permits for activity codes 1 through 9 to the official representative of the applicant foreign nation. The Assistant Administrator will provide permits for activity code 10 directly to the applicant.

(3) An approved permit will contain—

(i) The name and IRCS of the FFV and its permit number.

(ii) The permitted fisheries and/or activity codes.

(iii) The date of issuance and expiration date, if other than December 31.

(iv) All conditions and restrictions, and any additional restrictions and technical modifications appended to the permit.

(4) Permits are not issued for boats that are launched from larger vessels. Any enforcement action that results from the activities of a launched boat will be taken against the permitted vessel.

(f) *Duration.* A permit is valid from its date of issuance to its date of expiration, unless it is revoked or suspended or the nation issuing the FFV's documents does not accept amendments to the permit made by the Assistant Administrator in accordance with the procedures of paragraph (1) of this section. The permit will be valid for no longer than the calendar year in which it was issued.

(g) *Transfer.* Permits are not transferable or assignable. A permit is valid only for the FFV to which it is issued.

(h) *Display.* Each FFV operator must have a properly completed permit form available on board the FFV when engaged in fishing activities and must produce it at the request of an authorized officer or observer.

(i) *Suspension and revocation.* NMFS may apply sanctions to an FFV's permit by revoking, suspending, or imposing additional permit restrictions on the permit under 15 CFR part 904, if the vessel is involved in the commission of any violation of the Magnuson-Stevens Act, the GIFA, or this subpart; if an agent and a designated representative are not maintained in the United States; if a civil penalty or criminal fine imposed under the Magnuson-Stevens Act has become overdue; or as otherwise specified in the Magnuson-Stevens Act.

(j) *Fees.* Permit application fees are described in § 600.518.

(k) *Change in application information.* The applicant must report, in writing, any change in the information supplied under paragraph (d) of this section to the Assistant Administrator within 15 calendar days after the date of the change. Failure to report a change in the ownership from that described in the current application within the specified time frame voids the permit, and all penalties involved will accrue to the previous owner.

(l) *Permit amendments.* (1) The Assistant Administrator may amend a permit by adding "additional restrictions" for the conservation and management of fishery resources covered by the permit, or for the national defense or security if the Assistant Administrator determines that such interests would be significantly impaired without such restrictions. Compliance with the

added additional restrictions is a condition of the permit. Violations of added additional restrictions will be treated as violations of this subpart.

(2) The Assistant Administrator may make proposed additional restrictions effective immediately, if necessary, to prevent substantial harm to a fishery resource of the United States, to allow for the continuation of ongoing fishing operations, or to allow for fishing to begin at the normal time for opening of the fishery.

(3) The Assistant Administrator will send proposed additional restrictions to each Nation whose vessels are affected (via the Secretary of State), to the appropriate Councils, and to the Commandant of the Coast Guard. NMFS will, at the same time, publish a document of any significant proposed additional restrictions in the FEDERAL REGISTER. The document will include a summary of the reasons underlying the proposal, and the reasons that any proposed additional restrictions are made effective immediately.

(4) The Nation whose vessels are involved, the owners of the affected vessels, their representatives, the agencies specified in paragraph (1)(3) of this section, and the public may submit written comments on the proposed additional restrictions within 30 days after publication in the FEDERAL REGISTER.

(5) The Assistant Administrator will make a final decision regarding the proposed additional restrictions as soon as practicable after the end of the comment period. The Assistant Administrator will provide the final additional restrictions to the Nation whose vessels are affected (via the Secretary of State) according to the procedures of paragraph (e) of this section. The Assistant Administrator will include with the final additional restrictions to the Nation, a response to comments submitted.

(6) Additional restrictions may be modified by following the procedures of paragraphs (1)(2) through (1)(5) of this section.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998; 64 FR 39019, July 21, 1999]

§ 600.502

50 CFR Ch. VI (10–1–05 Edition)

§ 600.502 Vessel reports.

(a) The operator of each FFV must report the FFV's activities to the USCG and NMFS as specified in this section.

(b) All reports required by this section must be in English and in the formats specified in the permit additions and restrictions. Reports must be delivered via private or commercial communications facilities, facsimile, or other electronic means acceptable to NMFS and the USCG, directly to the appropriate NMFS Region or Center and USCG commander. Weekly reports must also be delivered directly to the appropriate NMFS Region or Center (see tables 1 and 2 of this section). (The required reports may be delivered to the closest USCG communication station as indicated in table 3 of this section or other USCG communication station only if adequate private or commercial communications facilities have not been successfully contacted.) Radio reports must be made via radiotelegraphy, Telex, or facsimile where available. For the purposes of this section, a message is considered "transmitted" when its receipt is acknowledged by a communications facility and considered "delivered" upon its receipt by the offices of the appropriate USCG commander, NMFS Regional Office, or NMFS Center identified in table 2 of this section. Reports required by this section may be submitted by the vessel's designated representative; however, the operator of the FFV is responsible for the correct and timely filing of all required reports.

(c) *Activity reports.* The operator of each FFV must report the FFV's movements and activities before or upon the event, as specified in this paragraph (c). Appropriate forms, instructions, codes, and examples are contained in the conditions and restrictions of the FFV's permit. Each FFV report must contain the following information: The message identifier "VESREP" to indicate it is a vessel activity report, FFV name, international radio call sign IRCS, date (month and day based on GMT), time (hour and minute GMT), position (latitude and longitude to the nearest degree and minute) where required, area (by fishing area code) where required, the appropriate action

code, confirmation codes where required, and the other information specified in paragraphs (c)(1) through (c)(11) of this section.

(1) "*BEGIN*". Each operator must specify the date, time, position, and area the FFV will actually "*BEGIN*" fishing in the EEZ and the species (by species code), product (by product code), and quantity of all fish and fish products (by product weight to the nearest hundredth of a metric ton) on board when entering the EEZ (action code "*BEGIN*"). The message must be delivered at least 24 hours before the vessel begins to fish.

(2) "*DEPART*". Each operator must specify the date, time, position, and area the FFV will "*DEPART*" the EEZ to embark or debark an observer, to visit a U.S. port, to conduct a joint venture in internal waters, or to otherwise temporarily leave an authorized fishing area, but not depart the seaward limit of the EEZ (action code "*DEPART*"). The message must be transmitted before the FFV departs the present fishing area and delivered within 24 hours of its transmittal.

(3) "*RETURN*". Each operator must specify the date, time, position, and area the FFV will "*RETURN*" to the EEZ following a temporary departure, and the species (by species code), product (by product code), and quantity of all fish and fish products (by product weight to the nearest hundredth of a metric ton) on board that were received in a joint venture in internal waters (action code "*RETURN*"). The message must be transmitted before returning to the EEZ and delivered within 24 hours of its transmittal.

(4) "*SHIFT*". Each operator must report each SHIFT in fishing area (as described for each fishery) by specifying the date, time, and position the FFV will start fishing, and the new area (action code "*SHIFT*"). The message must be transmitted before leaving the original area and delivered within 24 hours of its transmittal. If a foreign vessel operates within 20 nautical miles (37.04 km) of a fishing area boundary, its operator may submit in one message the shift reports for all fishing area shifts occurring during 1 fishing day (0001–2400 GMT). This message must be

transmitted prior to the last shift expected to be made in the day and delivered within 24 hours of its transmittal.

(5) “*JV OPS*”. Each operator must specify the date, time, position, and area at which the FFV will “START” joint venture operations (action code “START JV OPS”) or “END” joint venture operations (action code “END JV OPS”). These reports must be made in addition to other activity reports made under this section. Each message must be transmitted before the event and delivered within 24 hours of its transmittal.

(6) “*TRANSFER*”. The operator of each FFV that anticipates a transshipping operation in which the FFV will receive fish or fisheries products must specify the date, time, position and area the FFV will conduct the “TRANSFER” and the name and IRCS of the other FFV or U.S. vessel involved (action code “TRANSFER”). The report must include the permit activity code under which the transfer will be made. The message must be transmitted prior to the transfer and delivered within 24 hours of its transmittal. The movement of raw fish from a permitted foreign catching vessel or, under an Activity Code 4, from a U.S. fishing vessel to the reporting processing vessel and the return of nets or codends is not considered a transfer.

(7) “*OFFLOADED*”. Each operator must specify the date, time, position, and area the FFV “OFFLOADED” fish or fisheries products TO another FFV or a U.S. vessel in a transfer, the other FFV’s or U.S. vessel’s name, IRCS, Permit Activity Code under which the transfer was made, species (by species code) and quantity of fish and fisheries products (by product code and by product weight, to the nearest hundredth of a metric ton) offloaded (action code “OFFLOADED TO”). The message must be transmitted within 12 hours after the transfer is completed and delivered within 24 hours of its transmittal and before the FFV ceases fishing in the EEZ.

(8) “*RECEIVED*”. Each operator must specify the date, time, position and area the vessel “RECEIVED” fish or fisheries products FROM another FFV in a transfer, the other FFV’s or U.S. vessel’s name, IRCS, Permit Activity

Code under which the receipt was made, species (by species code) and quantity of fish and fisheries products (by product code and by product weight, to the nearest hundredth of a metric ton) received (action code “RECEIVED FROM”). The message must be transmitted within 12 hours after the transfer is completed and delivered within 24 hours of its transmittal and before the vessel ceases fishing in the EEZ.

(9) “*CEASE*”. Each operator must specify the date, time, position, and area the FFV will “CEASE” fishing in order to leave the EEZ (action code “CEASE”). The message must be delivered at least 24 hours before the FFV’s departure.

(10) “*CHANGE*”. Each operator must report any “CHANGE” TO the FFV’s operations if the position or time of an event specified in an activity report will vary more than 5 nautical miles (9.26 km) or 4 hours from that previously reported, by sending a revised message inserting the word “CHANGE” in front of the previous report, repeating the name, IRCS, date, and time of the previous report, adding the word “TO” and the complete revised text of the new report (action code “CHANGE TO”). Changes to reports specifying an early beginning of fishing by an FFV or other changes to reports contained in paragraphs (c)(1) through (c)(9) of this section must be transmitted and delivered as if the “CHANGE” report were the original message.

(11) “*CANCEL*”. Each operator wanting to “CANCEL” a previous report may do so by sending a revised message, and inserting the word “CANCEL” in front of the previous report’s vessel name, IRCS, date, time and action code canceled (action code “CANCEL”). The message must be transmitted and delivered prior to the date and time of the event in the original message.

(d) The operator of an FFV will be in violation of paragraphs (c)(1) through (c)(9) of this section if the FFV does not pass within 5 nautical miles (9.26 km) of the position given in the report within 4 hours of the time given in the report.

(e) The notices required by this section may be provided for individual or

groups of FFV's (on a vessel-by-vessel basis) by authorized persons. An FFV operator may retransmit reports on the behalf of another FFV, if authorized by that FFV's operator. This does not relieve the individual vessel operator of the responsibility of filing required reports. In these cases, the message format should be modified so that each line of text under "VESREP" is a separate vessel report.

(f) *Weekly reports.* (1) The operator of each FFV in the EEZ must submit appropriate weekly reports through the Nation's designated representative. The report must arrive at the address and time specified in paragraph (g) of this section. The reports may be sent by facsimile or Telex, but a completed copy of the report form must be mailed or hand delivered to confirm the Telex. Appropriate forms, instructions, codes, and examples are contained in the conditions and restrictions of the FFV's permit. Designated representatives may include more than one vessel report in a facsimile or Telex message, if the information is submitted on a vessel-by-vessel basis. Requests for corrections to previous reports must be submitted through the Nation's designated representative and mailed or hand-delivered, together with a written explanation of the reasons for the errors. The appropriate Regional Administrator or Science and Research Director may accept or reject any correction and initiate any appropriate civil penalty actions.

(2) *Weekly catch report (CATREP).* The operator of each FFV must submit a weekly catch report stating any catch (Activity Code 1) in round weight of each species or species group allocated to that Nation by area and days fished in each area for the weekly period Sunday through Saturday, GMT, as modified by the fishery in which the FFV is engaged. Foreign vessels delivering unsorted, unprocessed fish to a processing vessel are not required to submit CATREP's, if that processing vessel (Activity Code 2) submits consolidated CATREP's for all fish received during each weekly period. No report is required for FFV's that do not catch or receive foreign-caught fish during the reporting period.

(3) *Weekly receipts report (RECREP).* The operator of each FFV must submit a weekly report stating any receipts of U.S.-harvested fish in a joint venture (Activity Code 4) for the weekly period Sunday through Saturday, GMT, as modified by the fishery in which the FFV is engaged, for each fishing area, by authorized or prohibited species or species group; days fish received; round weight retained or returned to the U.S. fishing vessel; number of codends received; and number of vessels transferring codends. The report must also include the names of U.S. fishing vessels transferring codends during the week. No report is required for FFV's that do not receive any U.S.-harvested fish during the reporting period.

(4) *Marine mammal report (MAMREP).* The operator of each FFV must submit a weekly report stating any incidental catch or receipt of marine mammals (Activity Codes 1 or 2 and/or 4), the geographical position caught, the condition of the animal, number caught (if more than one of the same species and condition), and nationality of the catching vessel for the period Sunday through Saturday, GMT, as modified by the fishery in which the vessel is engaged. Foreign catching vessels delivering unsorted, unprocessed fish to processing vessel are not required to submit MAMREP's, provided that the processing or factory vessel (Activity Code 2) submits consolidated MAMREP's for all fish received during each weekly period. FFV's receiving U.S.-harvested fish in a joint venture (Activity Code 4) must submit consolidated reports for U.S. vessels operating in the joint venture. No report is required for FFV's that do not catch or receive marine mammals during the reporting period.

(g) *Submission instructions for weekly reports.* The designated representative for each FFV must submit weekly reports in the prescribed format to the appropriate Regional Administrator or Science and Research Director of NMFS by 1900 GMT on the Wednesday following the end of the reporting period. However, by agreement with the appropriate Regional Administrator or Science and Research Director, the designated representative may submit

Fishery Conservation and Management

§ 600.502

weekly reports to some other facility of NMFS.

(h) *Alternative reporting procedures.* As an alternative to the use of the specific procedures provided, an applicant may submit proposed reporting procedures for a general type of fishery operation (i.e., transshipments under Activity

Code 10) to the appropriate Regional Administrator and the USCG commander (see tables 1 and 2 to § 600.502 of this chapter). With the agreement of the USCG commander, the Regional Administrator may authorize the use of alternative reporting procedures.

TABLE 1 TO § 600.502—ADDRESSES

NMFS regional administrators	NMFS science and research directors	U.S. Coast Guard commanders
Administrator, Northeast Region, National Marine Fisheries Service, NOAA, One Blackburn Drive, Gloucester, MA 01930-2298.	Director, Northeast Fisheries Science Center, National Marine Fisheries Service, NOAA, 166 Water St., Woods Hole, MA 02543-1097.	Commander, Atlantic Area, U.S. Coast Guard, 431 Crawford St., Portsmouth, VA 23704.
Administrator, Southeast Region, National Marine Fisheries Service, 9721 Exec. Center Drive N., St. Petersburg, FL 33702.	Director, Southeast Fisheries Science Center, National Marine Fisheries Service, NOAA, 75 Virginia Beach Drive, Miami, FL 33149-1003.	Commander, Atlantic Area, U.S. Coast Guard, Governor's Island, New York 10004.
Administrator, Northwest Region, National Marine Fisheries Service, NOAA, 7600 Sand Point Way, NE, BIN C15700, Bldg. 1, Seattle, WA 98115.	Director, Northwest Fisheries Science Center, National Marine Fisheries Service, NOAA, 2725 Montlake Blvd. East, Seattle, WA 98112-2097.	Commander, Pacific Area, U.S. Coast Guard, Government Island, Alameda, CA 94501.
Administrator, Alaska Region, National Marine Fisheries Service, NOAA, P.O. Box 21668, Juneau, AK 99802-1668.	Director, Alaska Fisheries Science Center, National Marine Fisheries Service, NOAA, 7600 Sand Point Way, NE, BIN C15700, Bldg. 4, Seattle, WA 98115-0070.	Commander, Seventeenth Coast Guard District, P.O. Box 25517, Juneau, AK 99802.
Administrator, Southwest Region, National Marine Fisheries Service, NOAA, 501 West Ocean Blvd., Suite 4200, Long Beach, CA 90802-4213.	Director, Southwest Fisheries Science Center, National Marine Fisheries Service, NOAA, P.O. Box 271, La Jolla, CA 92038-0271.	Commander, Fourteenth Coast Guard District, 300 Ala Moana Blvd., Honolulu, HI 96850.
Administrator, Pacific Islands Region, National Marine Fisheries Service, NOAA, 1601 Kapiolani Blvd., Suite 1110, Honolulu, HI 96814.	Director, Pacific Islands Fisheries Science Center, National Marine Fisheries Service, NOAA, 2570 Dole Street, Honolulu, HI 96822.	Commander, Fourteenth Coast Guard District, 300 Ala Moana Blvd., Honolulu, HI 96850.

TABLE 2 TO § 600.502—AREAS OF RESPONSIBILITY OF NMFS AND U.S. COAST GUARD OFFICES

Area of responsibility/fishery	National Marine Fisheries Service	U.S. Coast Guard
Atlantic Ocean North of Cape Hatteras	Director, Northeast Science Center, Attn: Observer Program.	Commander, Atlantic Area.
Atlantic Ocean South of Cape Hatteras	Director, Northeast Science Center, Attn: Observer Program.	Commander, Atlantic Area.
Atlantic Tunas, Swordfish, Billfish and Sharks.	Director, Office of Sustainable Fisheries	Commander, Atlantic Area.
Gulf of Mexico and Caribbean Sea	Administrator, Southeast Region	Commander, Atlantic Area.
Pacific Ocean off the States of California, Oregon, and Washington.	Administrator, Northwest Region	Commander, Pacific Area.
North Pacific Ocean and Bering Sea off Alaska.	Administrator, Alaska Region	Commander, Seventeenth Coast Guard District.
Pacific Ocean off Hawaii, American Samoa, Guam, Commonwealth of the Northern Mariana Islands, and U.S. Insular Possessions in the Central and Western Pacific.	Administrator, Pacific Islands Region	Commander, Fourteenth Coast Guard District.

§ 600.503 Vessel and gear identification.

(a) *Vessel identification.* (1) The operator of each FFV assigned an IRCS must display that call sign amidships on both the port and starboard sides of the deckhouse or hull, so that it is visible from an enforcement vessel, and on an appropriate weather deck so it is visible from the air.

(2) The operator of each FFV not assigned an IRCS, such as a small trawler associated with a mothership or one of a pair of trawlers, must display the IRCS of the associated vessel, followed by a numerical suffix. (For example, JCZM-1, JCZM-2, etc., would be displayed on small trawlers not assigned an IRCS operating with a mothership whose IRCS is JCZM; JANP-1 would be displayed by a pair trawler not assigned an IRCS operating with a trawler whose IRCS is JANP.)

(3) The vessel identification must be in a color in contrast to the background and must be permanently affixed to the FFV in block Roman alphabet letters and Arabic numerals at least 1 m in height for FFV's over 20 m in length, and at least 0.5 m in height for all other FFV's.

(b) *Navigational lights and shapes.* Each FFV must display the lights and shapes prescribed by the International Regulations for Preventing Collisions at Sea, 1972 (TIAS 8587, and 1981 amendment TIAS 10672), for the activity in which the FFV is engaged (as described at 33 CFR part 81).

(c) *Gear identification.* (1) The operator of each FFV must ensure that all deployed fishing gear that is not physically and continuously attached to an FFV:

(i) Is clearly marked at the surface with a buoy displaying the vessel identification of the FFV (see paragraph (a) of this section) to which the gear belongs.

(ii) Has attached a light visible for 2 nautical miles (3.70 km) at night in good visibility.

(iii) Has a radio buoy.

Trawl codends passed from one vessel to another are considered continuously attached gear and are not required to be marked.

(2) The operator of each FFV must ensure that deployed longlines, strings of traps or pots, and gillnets are marked at the surface at each terminal

Fishery Conservation and Management

§ 600.504

end with: (see paragraphs (c)(1)(i) through (c)(1)(iii) of this section).

(3) Additional requirements may be specified for the fishery in which the vessel is engaged.

(4) Unmarked or incorrectly identified fishing gear may be considered abandoned and may be disposed of in accordance with applicable Federal regulations by any authorized officer.

(d) *Maintenance.* The operator of each FFV must—

(1) Keep the vessel and gear identification clearly legible and in good repair.

(2) Ensure that nothing on the FFV obstructs the view of the markings from an enforcement vessel or aircraft.

(3) Ensure that the proper navigational lights and shapes are displayed for the FFV's activity and are properly functioning.

§ 600.504 Facilitation of enforcement.

(a) *General.* (1) The owner, operator, or any person aboard any FFV subject to this subpart must immediately comply with instructions and signals issued by an authorized officer to stop the FFV; to move the FFV to a specified location; and to facilitate safe boarding and inspection of the vessel, its gear, equipment, records, and fish and fish products on board for purposes of enforcing the Magnuson-Stevens Act and this subpart.

(2) The operator of each FFV must provide vessel position or other information when requested by an authorized officer within the time specified in the request.

(b) *Communications equipment.* (1) Each FFV must be equipped with a VHF-FM radiotelephone station located so that it may be operated from the wheelhouse. Each operator must maintain a continuous listening watch on channel 16 (156.8 MHz).

(2) Each FFV must be equipped with a radiotelephone station capable of communicating via 2182 kHz (SSB) radiotelephony and at least one set of working frequencies identified in table 3 to § 600.502 appropriate to the fishery in which the FFV is operating. Each operator must monitor and be ready to communicate via 2182 kHz (SSB) radiotelephone each day from 0800 GMT to

0830 GMT and 2000 to 2030 GMT, and in preparation for boarding.

(3) FFV's that are not equipped with processing facilities and that deliver all catches to a foreign processing vessel are exempt from the requirements of paragraph (b)(2) of this section.

(4) FFV's with no IRCS that do not catch fish and are used as auxiliary vessels to handle codends, nets, equipment, or passengers for a processing vessel are exempt from the requirements of paragraphs (b)(1) and (b)(2) of this section.

(5) The appropriate Regional Administrator, with the agreement of the appropriate USCG commander, may, upon request by a foreign nation, accept alternatives to the radio requirements of this section to certain FFV's or types of FFV's operating in a fishery, provided they are adequate for the communications needs of the fishery.

(c) *Communications procedures.* (1) Upon being approached by a USCG vessel or aircraft, or other vessel or aircraft with an authorized officer aboard, the operator of any FFV subject to this subpart must be alert for communications conveying enforcement instructions. The enforcement unit may communicate by channel 16 VHF-FM radiotelephone, 2182 kHz (SSB) radiotelephone, message block from an aircraft, flashing light or flag signals from the International Code of Signals, hand signal, placard, loudhailer, or other appropriate means. The following signals, extracted from the International Code of Signals, are among those that may be used.

(i) "AA, AA, AA, etc.", which is the call for an unknown station. The signaled vessel should respond by identifying itself or by illuminating the vessel identification required by § 600.505.

(ii) "RY-CY", meaning "You should proceed at slow speed, a boat is coming to you".

(iii) "SQ3", meaning "You should stop or heave to; I am going to board you".

(iv) "L", meaning "You should stop your vessel instantly."

(2) Failure of an FFV's operator to stop the vessel when directed to do so by an authorized officer using VHF-FM radiotelephone (channel 16), 2182 kHz (SSB) radiotelephone (where required),

message block from an aircraft, flashing light signal, flaghoist, or loudhailer constitutes a violation of this subpart.

(3) The operator of or any person aboard an FFV who does not understand a signal from an enforcement unit and who is unable to obtain clarification by radiotelephone or other means must consider the signal to be a command to stop the FFV instantly.

(d) *Boarding.* The operator of an FFV signaled for boarding must—

(1) Monitor 2182 kHz (SSB) radiotelephone and channel 16 (156.8 MHz) VHF-FM radiotelephone.

(2) Stop immediately and lay to or maneuver in such a way as to maintain the safety of the FFV and facilitate boarding by the authorized officer and the boarding party or an observer.

(3) Provide the authorized officer, boarding party, or observer a safe pilot ladder. The operator must ensure the pilot ladder is securely attached to the FFV and meets the construction requirements of Regulation 17, Chapter V of the International Convention for the Safety of Life at Sea (SOLAS), 1974 (TIAS 9700 and 1978 Protocol, TIAS 10009), or a substantially equivalent national standard approved by letter from the Assistant Administrator, with agreement with the USCG. Safe pilot ladder standards are summarized below:

(i) The ladder must be of a single length of not more than 9 m (30 ft), capable of reaching the water from the point of access to the FFV, accounting for all conditions of loading and trim of the FFV and for an adverse list of 15°. Whenever the distance from sea level to the point of access to the ship is more than 9 m (30 ft), access must be by means of an accommodation ladder or other safe and convenient means.

(ii) The steps of the pilot ladder must be—

(A) Of hardwood, or other material of equivalent properties, made in one piece free of knots, having an efficient non-slip surface; the four lowest steps may be made of rubber of sufficient strength and stiffness or of other suitable material of equivalent characteristics.

(B) Not less than 480 mm (19 inches) long, 115 mm (4.5 inches) wide, and 25

mm (1 inch) in depth, excluding any non-slip device.

(C) Equally spaced not less than 300 millimeters (12 inches) nor more than 380 mm (15 inches) apart and secured in such a manner that they will remain horizontal.

(iii) No pilot ladder may have more than two replacement steps that are secured in position by a method different from that used in the original construction of the ladder.

(iv) The side ropes of the ladder must consist of two uncovered manila ropes not less than 60 mm (2.25 inches) in circumference on each side (or synthetic ropes of equivalent size and equivalent or greater strength). Each rope must be continuous, with no joints below the top step.

(v) Battens made of hardwood, or other material of equivalent properties, in one piece and not less than 1.80 m (5 ft 10 inches) long must be provided at such intervals as will prevent the pilot ladder from twisting. The lowest batten must be on the fifth step from the bottom of the ladder and the interval between any batten and the next must not exceed nine steps.

(vi) Where passage onto or off the ship is by means of a bulwark ladder, two handhold stanchions must be fitted at the point of boarding or leaving the FFV not less than 0.70 m (2 ft 3 inches) nor more than 0.80 m (2 ft 7 inches) apart, not less than 40 mm (2.5 inches) in diameter, and must extend not less than 1.20 m (3 ft 11 inches) above the top of the bulwark.

(4) When necessary to facilitate the boarding or when requested by an authorized officer or observer, provide a manrope, safety line, and illumination for the ladder; and

(5) Take such other actions as necessary to ensure the safety of the authorized officer and the boarding party and to facilitate the boarding and inspection.

(e) *Access and records.* (1) The owner and operator of each FFV must provide authorized officers access to all spaces where work is conducted or business papers and records are prepared or stored, including but not limited to, personal quarters and areas within personal quarters.

Fishery Conservation and Management

§ 600.505

(2) The owner and operator of each FFV must provide to authorized officers all records and documents pertaining to the fishing activities of the vessel, including but not limited to, production records, fishing logs, navigation logs, transfer records, product receipts, cargo stowage plans or records, draft or displacement calculations, customs documents or records, and an accurate hold plan reflecting the current structure of the vessel's storage and factory spaces.

(f) *Product storage.* The operator of each permitted FFV storing fish or fish products in a storage space must ensure that all non-fish product items are neither stowed beneath nor covered by fish products, unless required to maintain the stability and safety of the vessel. These items include, but are not limited to, portable conveyors, exhaust fans, ladders, nets, fuel bladders, extra bin boards, or other movable non-product items. These items may be in the space when necessary for safety of the vessel or crew or for storage of the product. Lumber, bin boards, or other dunnage may be used for shoring or bracing of product to ensure safety of crew and to prevent shifting of cargo within the space.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

§ 600.505 Prohibitions.

(a) It is unlawful for any person to do any of the following:

(1) Ship, transport, offer for sale, sell, purchase, import, export, or have custody, control, or possession of any fish taken or retained in violation of the Magnuson-Stevens Act, the applicable GIFA, this subpart, or any permit issued under this subpart;

(2) Refuse to allow an authorized officer to board an FFV for purposes of conducting any search or inspection in connection with the enforcement of the Magnuson-Stevens Act, the applicable GIFA, this subpart, or any other permit issued under this subpart;

(3) Assault, resist, oppose, impede, intimidate, or interfere with any authorized officer in the conduct of any inspection or search described in paragraph (a)(2) of this section;

(4) Resist a lawful arrest for any act prohibited by the Magnuson-Stevens

Act, the applicable GIFA, this subpart, or any permit issued under this subpart;

(5) Interfere with, delay, or prevent by any means the apprehension or arrest of another person with the knowledge that such other person has committed any act prohibited by the Magnuson-Stevens Act, the applicable GIFA, this subpart, or any permit issued under this subpart;

(6) Interfere with, obstruct, delay, oppose, impede, intimidate, or prevent by any means any boarding, investigation or search, wherever conducted, in the process of enforcing the Magnuson-Stevens Act, the applicable GIFA, this subpart, or any permit issued under this subpart;

(7) Engage in any fishing activity for which the FFV does not have a permit as required under § 600.501;

(8) Engage in any fishing activity within the EEZ without a U.S. observer aboard the FFV, unless the requirement has been waived by the Assistant Administrator or appropriate Regional Administrator;

(9) Retain or attempt to retain, directly or indirectly, any U.S. harvested fish, unless the FFV has a permit for Activity Codes 4, 6, or 10;

(10) Use any fishing vessel to engage in fishing after the revocation, or during the period of suspension, of an applicable permit issued under this subpart;

(11) Violate any provision of the applicable GIFA;

(12) Falsely or incorrectly complete (including by omission) a permit application or permit form as specified in § 600.501 (d) and (k);

(13) Fail to report to the Assistant Administrator within 15 days any change in the information contained in the permit application for a FFV, as specified in § 600.501(k);

(14) Assault, resist, oppose, impede, intimidate, or interfere with an observer placed aboard an FFV under this subpart;

(15) Interfere with or bias the sampling procedure employed by an observer, including sorting or discarding any catch prior to sampling, unless the observer has stated that sampling will not occur; or tamper with, destroy, or

§ 600.506

discard an observer's collected samples, equipment, records, photographic film, papers, or effects without the express consent of the observer;

(16) Prohibit or bar by command, impediment, threat, coercion, or refusal of reasonable assistance, an observer from collecting samples, conducting product recovery rate determinations, making observations, or otherwise performing the observer's duties;

(17) Harass or sexually harass an authorized officer or observer;

(18) Fail to provide the required assistance to an observer as described at § 600.506 (c) and (e);

(19) Fail to identify, falsely identify, fail to properly maintain, or obscure the identification of the FFV or its gear as required by this subpart;

(20) Falsify or fail to make, keep, maintain, or submit any record or report required by this subpart;

(21) Fail to return to the sea or fail to otherwise treat prohibited species as required by this subpart;

(22) Fail to report or falsely report any gear conflict;

(23) Fail to report or falsely report any loss, jettisoning, or abandonment of fishing gear or other article into the EEZ that might interfere with fishing, obstruct fishing gear or vessels, or cause damage to any fishery resource or marine mammals;

(24) Continue Activity Codes 1 through 4 after those activity codes have been canceled under § 600.511;

(25) Fail to maintain health and safety standards set forth in § 600.506(d);

(26) Violate any provisions of regulations for specific fisheries of this subpart;

(27) On a scientific research vessel, engage in fishing other than recreational fishing authorized by applicable state, territorial, or Federal regulations;

(28) Violate any provision of this subpart, the Magnuson-Stevens Act, the applicable GIFA, any notice issued under this subpart or any permit issued under this subpart; or

(29) Attempt to do any of the foregoing.

(b) It is unlawful for any FFV, and for the owner or operator of any FFV except an FFV engaged only in recreational fishing, to fish—

50 CFR Ch. VI (10–1–05 Edition)

(1) Within the boundaries of any state, unless:

(i) The fishing is authorized by the Governor of that state as permitted by section 306(c) of the Magnuson-Stevens Act to engage in a joint venture for processing and support with U.S. fishing vessels in the internal waters of that state; or

(ii) The fishing is authorized by, and conducted in accordance with, a valid permit issued under § 600.501, and the Governor of that state has indicated concurrence to allow fishing consisting solely of transporting fish or fish products from a point within the boundaries of that state to a point outside the United States; or

(2) Within the EEZ, or for any anadromous species or continental shelf fishery resources beyond the EEZ, unless the fishing is authorized by, and conducted in accordance with, a valid permit issued under § 600.501.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998; 64 FR 39020, July 21, 1999]

§ 600.506 Observers.

(a) *General.* To carry out such scientific, compliance monitoring, and other functions as may be necessary or appropriate to carry out the purposes of the Magnuson-Stevens Act, the appropriate Regional Administrator or Science and Research Director (see table 2 to § 600.502) may assign U.S. observers to FFV's. Except as provided for in section 201(h)(2) of the Magnuson-Stevens Act, no FFV may conduct fishing operations within the EEZ unless a U.S. observer is aboard.

(b) *Effort plan.* To ensure the availability of an observer as required by this section, the owners and operators of FFV's wanting to fish within the EEZ will submit to the appropriate Regional Administrator or Science and Research Director and also to the Chief, Financial Services Division, NMFS, 1315 East West Highway, Silver Spring, MD 20910 a schedule of fishing effort 30 days prior to the beginning of each quarter. A quarter is a time period of 3 consecutive months beginning January 1, April 1, July 1, and October 1 of each year. The schedule will contain the name and IRCS of each FFV

intending to fish within the EEZ during the upcoming quarter, and each FFV's expected date of arrival and expected date of departure.

(1) The appropriate Regional Administrator or Science and Research Director must be notified immediately of any substitution of vessels or any cancellation of plans to fish in the EEZ for FFV's listed in the effort plan required by this section.

(2) If an arrival date of an FFV will vary more than 5 days from the date listed in the quarterly schedule, the appropriate Regional Administrator or Science and Research Director must be notified at least 10 days in advance of the rescheduled date of arrival. If the notice required by this paragraph (b)(2) is not given, the FFV may not engage in fishing until an observer is available and has been placed aboard the vessel or the requirement has been waived by the appropriate Regional Administrator or Science and Research Director.

(c) *Assistance to observers.* To assist the observer in the accomplishment of his or her assigned duties, the owner and operator of an FFV to which an observer is assigned must—

(1) Provide, at no cost to the observer or the United States, accommodations for the observer aboard the FFV that are equivalent to those provided to the officers of that vessel.

(2) Cause the FFV to proceed to such places and at such times as may be designated by the appropriate Regional Administrator or Science and Research Director for the purpose of embarking and debarking the observer.

(3) Allow the observer to use the FFV's communications equipment and personnel upon demand for the transmission and receipt of messages.

(4) Allow the observer access to and use of the FFV's navigation equipment and personnel upon demand to determine the vessel's position.

(5) Allow the observer free and unobstructed access to the FFV's bridge, trawl, or working decks, holding bins, processing areas, freezer spaces, weight scales, cargo holds and any other space that may be used to hold, process, weigh, or store fish or fish products at any time.

(6) Allow the observer to inspect and copy the FFV's daily log, communications log, transfer log, and any other log, document, notice, or record required by these regulations.

(7) Provide the observer copies of any records required by these regulations upon demand.

(8) Notify the observer at least 15 minutes before fish are brought on board or fish or fish products are transferred from the FFV to allow sampling the catch or observing the transfer, unless the observer specifically requests not to be notified.

(9) Provide all other reasonable assistance to enable the observer to carry out his or her duties.

(d) *Health and safety standards.* All foreign fishing vessels to which an observer is deployed must maintain, at all times that the vessel is in the EEZ, the following:

(1) At least one working radar.

(2) Functioning navigation lights as required by international law.

(3) A watch on the bridge by appropriately trained and experienced personnel while the vessel is underway.

(4) Lifeboats and/or inflatable life rafts with a total carrying capacity equal to or greater than the number of people aboard the vessel. Lifeboats and inflatable life rafts must be maintained in good working order and be readily available.

(5) Life jackets equal or greater in number to the total number of persons aboard the vessel. Life jackets must be stowed in readily accessible and plainly marked positions throughout the vessel, and maintained in a state of good repair.

(6) At least one ring life buoy for each 25 ft (7.6 m) of vessel length, equipped with automatic water lights. Ring life buoys must have an outside diameter of not more than 32 inches (81.3 cm) nor less than 30 inches (76.2 cm), and must be maintained in a state of good repair. Ring life buoys must be readily available, but not positioned so they pose a threat of entanglement in work areas. They must be secured in such a way that they can be easily cast loose in the event of an emergency.

(7) At least one VHF-FM radio with a functioning channel 16 (156.8 MHz),

International Distress, Safety and Calling Frequency, and one functioning AM radio (SSB-Single Side Band) capable of operating at 2182 kHz (SSB). Radios will be maintained in a radio room, chartroom, or other suitable location.

(8) At least one Emergency Position Indicating Radio Beacon (EPIRB), approved by the USCG for offshore commercial use, stowed in a location so as to make it readily available in the event of an emergency.

(9) At least six hand-held, rocket-propelled, parachute, red-flare distress signals, and three orange-smoke distress signals stowed in the pilothouse or navigation bridge in portable watertight containers.

(10) All lights, shapes, whistles, foghorns, fog bells and gongs required by and maintained in accordance with the International Regulations for Preventing Collisions at Sea.

(11) Clean and sanitary conditions in all living spaces, food service and preparation areas and work spaces aboard the vessel.

(e) *Observer transfers.* (1) The operator of the FFV must ensure that transfers of observers at sea via small boat or raft are carried out during daylight hours as weather and sea conditions allow, and with the agreement of the observer involved. The FFV operator must provide the observer 3 hours advance notice of at-sea transfers, so that the observer may collect personal belongings, equipment, and scientific samples.

(2) The FFV's involved must provide a safe pilot ladder and conduct the transfer according to the procedures of §600.504(d) to ensure the safety of the during the transfer.

(3) An experienced crew member must assist the observer in the small boat or raft in which the transfer is made.

(f) *Supplementary observers.* In the event funds are not available from Congressional appropriations of fees collected to assign an observer to a foreign fishing vessel, the appropriate Regional Administrator or Science and Research Director will assign a supplementary observer to that vessel. The costs of supplementary observers will be paid for by the owners and operators

of foreign fishing vessels as provided for in paragraph (h) of this section.

(g) *Supplementary observer authority and duties.* (1) A supplementary observer aboard a foreign fishing vessel has the same authority and must be treated in all respects as an observer who is employed by NMFS, either directly or under contract.

(2) The duties of supplementary observers and their deployment and work schedules will be specified by the appropriate Regional Administrator or Science and Research Director.

(3) All data collected by supplementary observers will be under the exclusive control of the Assistant Administrator.

(h) *Supplementary observer payment—*

(1) *Method of payment.* The owners and operators of foreign fishing vessels must pay directly to the contractor the costs of supplementary observer coverage. Payment must be made to the contractor supplying supplementary observer coverage either by letter of credit or certified check drawn on a federally chartered bank in U.S. dollars, or other financial institution acceptable to the contractor. The letter of credit used to pay supplementary observer fees to contractors must be separate and distinct from the letter of credit required by §600.518(b)(2). Billing schedules will be specified by the terms of the contract between NOAA and the contractors. Billings for supplementary observer coverage will be approved by the appropriate Regional Administrator or Science and Research Director and then transmitted to the owners and operators of foreign fishing vessels by the appropriate designated representative. Each country will have only one designated representative to receive observer bills for all vessels of that country, except as provided for by the Assistant Administrator. All bills must be paid within 10 working days of the billing date. Failure to pay an observer bill will constitute grounds to revoke fishing permits. All fees collected under this section will be considered interim in nature and subject to reconciliation at the end of the fiscal year in accordance with paragraph (h)(4) of this section and §600.518(d).

(2) *Contractor costs.* The costs charged for supplementary observer coverage to

the owners and operators of foreign fishing vessels may not exceed the costs charged to NMFS for the same or similar services, except that contractors may charge to the owners and operators of foreign fishing vessels an additional fee to cover the administrative costs of the program not ordinarily part of contract costs charged to NMFS. The costs charged foreign fishermen for supplementary observers may include, but are not limited to the following:

- (i) Salary and benefits, including overtime, for supplementary observers.
- (ii) The costs of post-certification training required by paragraph (j)(2) of this section.
- (iii) The costs of travel, transportation, and per diem associated with deploying supplementary observers to foreign fishing vessels including the cost of travel, transportation, and per diem from the supplementary observer's post of duty to the point of embarkation to the foreign fishing vessel, and then from the point of disembarkation to the post of duty from where the trip began. For the purposes of these regulations, the appropriate Regional Administrator or Science and Research Director will designate posts of duty for supplementary observers.
- (iv) The costs of travel, transportation, and per diem associated with the debriefing following deployment of a supplementary observer by NMFS officials.
- (v) The administrative and overhead costs incurred by the contractor and, if appropriate, a reasonable profit.

(3) *NMFS costs.* The owners and operators of foreign fishing vessels must also pay to NMFS as part of the surcharge required by section 201(i)(4) of the Magnuson-Stevens Act, the following costs:

- (i) The costs of certifying applicants for the position of supplementary observer.
- (ii) The costs of any equipment, including safety equipment, sampling equipment, operations manuals, or other texts necessary to perform the duties of a supplementary observer. The equipment will be specified by the appropriate Regional Administrator or Science and Research Director according to the requirements of the fishery

to which the supplementary observer will be deployed.

(iii) The costs associated with communications with supplementary observers for transmission of data and routine messages.

(iv) For the purposes of monitoring the supplementary observer program, the costs for the management and analysis of data.

(v) The costs for data editing and entry.

(vi) Any costs incurred by NMFS to train, deploy or debrief a supplementary observer.

(vii) The cost for U.S. Customs inspection for supplementary observers disembarking after deployment.

(4) *Reconciliation.* Fees collected by the contractor in excess of the actual costs of supplementary observer coverage will be refunded to the owners and operators of foreign fishing vessels, or kept on deposit to defray the costs of future supplementary observer coverage. Refunds will be made within 60 days after final costs are determined and approved by NMFS.

(i) *Supplementary observer contractors—*(1) *Contractor eligibility.* Supplementary observers will be obtained by NMFS from persons or firms having established contracts to provide NMFS with observers. In the event no such contract is in place, NMFS will use established, competitive contracting procedures to select persons or firms to provide supplementary observers. The services supplied by the supplementary observer contractors will be as described within the contract and as specified below.

(2) Supplementary observer contractors must submit for the approval of the Assistant Administrator the following:

(i) A copy of any contract, including all attachments, amendments, and enclosures thereto, between the contractor and the owners and operators of foreign fishing vessels for whom the contractor will provide supplementary observer services.

(ii) All application information for persons whom the contractor desires to employ as certified supplementary observers.

(iii) Billing schedules and billings to the owners and operators of foreign

§ 600.507

50 CFR Ch. VI (10–1–05 Edition)

fishing vessels for further transmission to the designated representative of the appropriate foreign nation.

(iv) All data on costs.

(j) *Supplementary observers—certification, training*—(1) *Certification*. The appropriate Regional Administrator or Science and Research Director will certify persons as qualified for the position of supplementary observer once the following conditions are met:

(i) The candidate is a citizen or national of the United States.

(ii) The candidate has education or experience equivalent to the education or experience required of persons used as observers by NMFS as either Federal personnel or contract employees. The education and experience required for certification may vary according to the requirements of managing the foreign fishery in which the supplementary observer is to be deployed. Documentation of U.S. citizenship or nationality, and education or experience will be provided from personal qualification statements on file with NMFS contractors who provide supplementary observer services, and will not require the submission of additional information to NMFS.

(2) *Training*. Prior to deployment to foreign fishing vessels, certified supplementary observers must also meet the following conditions:

(i) Each certified supplementary observer must satisfactorily complete a course of training approved by the appropriate Regional Administrator or Science and Research Director as equivalent to that received by persons used as observers by NMFS as either Federal personnel or contract employees. The course of training may vary according to the foreign fishery in which the supplementary observer is to be deployed.

(ii) Each certified supplementary observer must agree in writing to abide by standards of conduct as set forth in Department of Commerce Administrative Order 202–735 (as provided by the contractor).

(k) *Supplementary observer certification suspension or revocation*. (1) Certification of a supplementary observer may be suspended or revoked by the Assistant Administrator under the following conditions:

(i) A supplementary observer fails to perform the duties specified in paragraph (g)(2) of this section.

(ii) A supplementary observer fails to abide by the standards of conduct described by Department of Commerce Administrative Order 202–735.

(2) The suspension or revocation of the certification of a supplementary observer by the Assistant Administrator may be based on the following:

(i) Boarding inspection reports by authorized officers of the USCG or NMFS, or other credible information, that indicate a supplementary observer has failed to abide by the established standards of conduct; or

(ii) An analysis by NMFS of the data collected by a supplementary observer indicating improper or incorrect data collection or recording. The failure to properly collect or record data is sufficient to justify decertification of supplementary observers; no intent to defraud need be demonstrated.

(3) The Assistant Administrator will notify the supplementary observer, in writing, of the Assistant Administrator's intent to suspend or revoke certification, and the reasons therefor, and provide the supplementary observer a reasonable opportunity to respond. If the Assistant Administrator determines that there are disputed questions of material fact, then the Assistant Administrator may in this respect appoint an examiner to make an informal fact-finding inquiry and prepare a report and recommendations.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7074, 7075, Feb. 12, 1998; 64 FR 39020, July 21, 1999]

§ 600.507 Recordkeeping.

(a) *General*. The owner and operator of each FFV must maintain timely and accurate records required by this section as modified by the regulations for the fishery in which the FFV is engaged.

(1) The owner and operator of each FFV must maintain all required records in English, based on Greenwich mean time (GMT) unless otherwise specified in the regulation, and make them immediately available for inspection upon the request of an authorized officer or observer.

(2) The owner and operator of each FFV must retain all required records on board the FFV whenever it is in the EEZ, for 3 years after the end of the permit period.

(3) The owner and operator of each FFV must retain the required records and make them available for inspection upon the request of an authorized officer at any time during the 3 years after the end of the permit period, whether or not such records are on board the vessel.

(4) The owner and operator of each FFV must provide to the Assistant Administrator, in the form and at the times prescribed, any other information requested that the Assistant Administrator determines is necessary to fulfill the fishery conservation, management and enforcement purposes of the Magnuson-Stevens Act.

(b) *Communications log.* The owner and operator of each FFV must record in a separate communications log, at the time of transmittal, the time and content of each notification made under § 600.504.

(c) *Transfer log.* Except for the transfer of unsorted, unprocessed fish via codend from a catching vessel to a processing vessel (Activity Code 2 or 4), the owner and operator of each FFV must record, in a separate transfer log, each transfer or receipt of any fish or fishery product, including quantities transferred or offloaded outside the EEZ. The operator must record in the log within 12 hours of the completion of the transfer:

(1) The time and date (GMT) and location (in geographic coordinates) the transfer began and was completed.

(2) The product weight, by species and product (use species and product codes), of all fish transferred, to the nearest 0.01 mt.

(3) The name, IRCS, and permit number of both the FFV offloading the fish and the FFV receiving the fish.

(d) *Daily fishing log.* (1) The owner or operator of each FFV authorized to catch fish (Activity Code 1) must maintain a daily fishing log of the effort, catch and production of the FFV, as modified by paragraph (d)(2) of this section and the regulations for the fishery in which the FFV is engaged. The operator must maintain on a daily

and cumulative basis for the permit period a separate log for each fishery (see table 2 to § 600.502) in which the FFV is engaged according to this section and in the format specified in the instructions provided with the permit or other format authorized under paragraph (i) of this section. Daily effort entries are required for each day the vessel conducts fishing operations within the EEZ. Daily entries are not required whenever the FFV is in port or engaged in a joint venture in the internal waters of a state. Each page of log may contain entries pertaining to only one day's fishing operations or one gear set, whichever is longer.

(2) The owner or operator of each FFV authorized to catch fish (Activity Code 1) and that delivers all catches to a processing vessel, must maintain only "SECTION ONE-EFFORT", of the daily fishing log, provided the processing vessel maintains a daily consolidated fishing log as described in paragraphs (f) and (g) of this section.

(e) *Daily fishing log—contents.* The daily fishing log must contain the following information, as modified by paragraph (d)(2) of this section and the regulations for the fishery in which the FFV is engaged, and be completed according to the format and instructions provided with the permit or other format authorized under paragraph (i) of this section.

(1) "SECTION ONE-EFFORT" must contain on a daily basis—

(i) A consecutive page number, beginning with the first day the vessel started fishing operations within the EEZ and continuing throughout the log.

(ii) The date (based on GMT).

(iii) The FFV's name.

(iv) The FFV's IRCS.

(v) The FFV's U.S. permit number.

(vi) The FFV's noon (1200 GMT) position in geographic coordinates.

(vii) The master or operator's signature or title.

(2) "SECTION ONE-EFFORT" must contain, for each trawl or set, as appropriate to the gear type employed—

(i) The consecutive trawl or set number, beginning with the first set of the calendar year.

(ii) The fishing area in which the trawl or set was completed.

(iii) The gear type.

- (iv) The time the gear was set.
- (v) The position of the set.
- (vi) The course of the set.
- (vii) The sea depth.
- (viii) The depth of the set.
- (ix) The duration of the set.
- (x) The hauling time.
- (xi) The position of the haul.
- (xii) The number of pots or longline units (where applicable).
- (xiii) The average number of hooks per longline unit (where applicable).
- (xiv) The trawl speed (where applicable).
- (xv) The mesh size of the trawl's codend (where applicable).
- (xvi) The estimated total weight of the catch for the trawl of set, to at least the nearest metric ton round weight.
- (3) "SECTION TWO-CATCH" must contain, for each trawl or set—
 - (i) The consecutive set or trawl number from "SECTION ONE".
 - (ii) The catch of each allocated species or species group to at least the nearest 0.1 mt round weight.
 - (iii) The prohibited species catch to at least the nearest 0.1 mt round weight or by number, as required by the regulations for the fishery in which the FFV is engaged.
 - (iv) The species code of each marine mammal caught and its condition when released.
- (4) "SECTION TWO-CATCH" must contain, on a daily basis—
 - (i) The species codes for all allocated or prohibited species or species groups caught.
 - (ii) For each allocated species—the amount, to at least the nearest 0.1 mt, and the daily disposition, either processed for human consumption, used for fishmeal, or discarded; the daily catch by fishing area; the daily catch for all fishing areas; and the cumulative total catch.
 - (iii) For the total catch of allocated species—the amount to at least the nearest 0.1 mt and the daily disposition, daily total catch by fishing area, daily total catch for all fishing areas, and cumulative total catch.
 - (iv) The catch by fishing area, daily total, and cumulative total of each prohibited species.
- (5) "SECTION THREE—PRODUCTION" must contain, on a daily basis,

for each allocated species caught and product produced—

- (i) The product by species code and product type.
- (ii) The daily product recovery rate of each species and product.
- (iii) The daily total product produced by species to at least the nearest 0.01 mt.
- (iv) The cumulative total of each product to at least the nearest 0.01 mt.
- (v) The cumulative amount of product transferred.
- (vi) The balance of product remaining aboard the FFV.
- (vii) The total daily amount, cumulative amount, transferred product and balance of frozen product aboard the FFV to the nearest 0.01 mt.
- (viii) Transferred amount and balance of fishmeal and fish oil aboard to at least the nearest 0.01 mt.
- (f) *Daily consolidated fishing or joint venture log.* The operator of each FFV that receives unsorted, unprocessed fish from foreign catching vessels (Activity Code 2) for processing or receives U.S.-harvested fish from U.S. fishing vessels in a joint venture (Activity Code 4) must maintain a daily joint venture log of the effort, catch and production of its associated U.S. or foreign fishing vessels and the processing vessel as modified by the regulations for the fishery in which the FFV is engaged. This log is separate and in addition to the log required by paragraph (d) of this section. The operator must maintain a separate log for each fishery in which the FFV is engaged, on a daily and cumulative basis, according to this section and in the format specified in the instructions provided with the permit or other format authorized under paragraph (i) of this section. Receipts of fish caught outside the EEZ must be included. Each page of the log may contain entries pertaining to only one day's fishing operations.
- (g) *Daily joint venture log—contents.* Daily joint venture logs must contain the following information, as modified by the fishery in which the vessel is engaged, and be completed according to the format and instructions provided with the permit or other format authorized under paragraph (i) of this section.

(1) "SECTION ONE-EFFORT" must contain, on a daily basis, that information required in paragraph (e)(1) of this section.

(2) "SECTION ONE-EFFORT" must contain for each receipt of a codend—

(i) The consecutive codend number, beginning with the first codend received for the calendar year.

(ii) The name of the U.S. fishing vessel or the name and IRCS of the foreign fishing vessel the codend was received from.

(iii) The fishing area where the codend was received.

(iv) The time the codend was received.

(v) The position the codend was received.

(vi) The estimated weight of the codend to at least the nearest metric ton round weight.

(3) "SECTION TWO-CATCH" must contain, for each codend received—

(i) The consecutive codend number from "SECTION ONE".

(ii) The receipts of each authorized species or species group and its disposition, either processed for human consumption, used for fishmeal, discarded, or returned to the U.S. fishing vessel, to at least the nearest 0.1 mt round weight.

(iii) The estimated receipts of each prohibited species or species group and its disposition, either discarded or returned to the U.S. fishing vessel if authorized in the fishery in which the U.S. vessel is engaged, to at least the nearest 0.1 mt round weight.

(iv) The species code of each marine mammal received and its condition when released.

(4) "SECTION TWO-CATCH" must contain on a daily basis—

(i) The species codes of all authorized or prohibited species or species groups received.

(ii) The daily disposition, as described in paragraph (g)(3)(ii) of this section, daily total, and cumulative total receipts of each authorized species or species groups.

(iii) The daily disposition, daily total and cumulative total receipts of all authorized species or species groups.

(iv) The daily and cumulative total receipts of prohibited species groups

and their disposition as described in paragraph (g)(3)(iii) of this section.

(5) "SECTION THREE—PRODUCTION" must contain, on a daily basis, for each authorized species or species group received and product produced, that information required in paragraph (e)(5) of this section.

(h) *Daily log maintenance.* The logs required by paragraphs (e) through (g) of this section must be maintained separately for each fishery (see table 2 to § 600.502).

(1) The effort section (all of "SECTION ONE") of the daily logs must be updated within 2 hours of the hauling or receipt time. The catch or receipt by trawl or set ("SECTION TWO") must be entered within 12 hours of the hauling or receipt time. The daily and cumulative total catch or receipts ("SECTION TWO") and the production portion ("SECTION THREE") of the log must be updated within 12 hours of the end of the day on which the catch was taken. The date of catch is the day and time (GMT) the gear is hauled.

(2) Entries for total daily and cumulative catch or receipt weights (disposition "C" or "M") must be based on the most accurate method available to the vessel, either scale round weights or factory weights converted to round weights. Entries for daily and cumulative weights of discarded or returned fish (disposition "D" or "R") must be based on the most accurate method available to the vessel, either actual count, scale round weight, or estimated deck weights. Entries for product weights must be based on the number of production units (pans, boxes, blocks, trays, cans, or bags) and the average weight of the production unit, with reasonable allowances for water added. Allowances for water added cannot exceed 5 percent of the unit weight. Product weights cannot be based on the commercial or arbitrary wholesale weight of the product, but must be based on the total actual weight of the product as determined by representative samples.

(3) The owner or operator must make all entries in indelible ink, with corrections to be accomplished by lining out and rewriting, rather than erasure.

§ 600.508

50 CFR Ch. VI (10–1–05 Edition)

(i) Alternative log formats. As an alternative to the use of the specific formats provided, a Nation may submit a proposed log format for FFV's of that Nation for a general type of fishery operation in a fishery (i.e., joint venture operations) to the appropriate Regional Administrator and the USCG commander (see tables 1 and 2 to §600.502). With the agreement of the USCG commander, the Regional Administrator may authorize the use of that log format for vessels of the requesting Nation.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

§ 600.508 Fishing operations.

(a) *Catching*. Each FFV authorized for activity code 1 may catch fish. An FFV may retain its catch of any species or species group for which there is an unfilled national allocation. All fish caught will be counted against the national allocation, even if the fish are discarded, unless exempted by the regulations of the fishery in which the FFV is engaged. Catching operations may be conducted as specified by the regulations of the fishery in which the FFV is engaged and as modified by the FFV's permit.

(b) *Scouting*. Each FFV authorized for Activity Codes 1 through 6 may scout for fish. Scouting may be conducted only in the fisheries area authorized by the scouting vessel's permit and under such other circumstances as may be designated in this subpart or the permit.

(c) *Processing*. Each FFV with Activity Code 1 or 2 may process fish. Processing may only be conducted whenever and wherever catching operations for FFV's of that Nation are permitted, whenever and wherever joint venture operations are authorized by an FFV's permit under Activity Code 4, and under such other circumstances as may be designated in this subpart or the permit.

(d) *Support*. Each FFV with Activity Codes 1, 2, 3, 5, or 8 may support other permitted FFV's. Each FFV with Activity Codes 4 or 6 may support U.S. vessels. Support operations may be conducted only in the fisheries areas authorized by the supporting vessel's permit, and under such other cir-

cumstances as may be designated in this subpart or the permit.

(e) *Joint ventures*. Each FFV with Activity Code 4 in addition to Activity Codes 1 or 2 may also conduct operations with U.S. fishing vessels. These joint venture operations with U.S. fishing vessels may be conducted throughout the EEZ, and under such other circumstances as may be designated in these regulations or the permit. FFV's with activity code 4 may continue operations assisting U.S. fishing vessels, despite closures under §600.511(a).

(f) *Internal waters*. For FFV's authorized under section 306(c) of the Magnuson-Stevens Act:

(1) Each FFV may engage in fish processing and support of U.S. fishing vessels within the internal waters of that state in compliance with terms and conditions set by the authorizing Governor.

(2) The owner or operator of each FFV must submit weekly reports on the amount of fish received from vessels of the United States and the location(s) where such fish were harvested.

(i) Reports must include:

(A) Vessel identification information for the FFV.

(B) Date of each receipt of fish.

(C) Amount of fish received, by species.

(D) Location(s) from which the fish received were harvested and the name and official number of the vessel of the United States that harvested the fish.

(ii) Owners or operators of FFV's processing fish in internal waters under the provisions of this paragraph (f) must request, from the Regional Administrator, the requirements regarding timing and submission of the reports, at least 15 days prior to the first receipt of fish from a vessel of the United States. The Regional Administrator shall stipulate the timing and submission requirements in writing.

(g) *Transshipping*. Each FFV with Activity Code 1, 2, 3, 4, 5, 6, 7, 8, or 10 may transship in accordance with this subpart and the vessel's permit.

[61 FR 32540, June 24, 1996, as amended at 62 FR 27183, May 19, 1997; 62 FR 34397, June 26, 1997; 64 FR 39020, July 21, 1999]

Fishery Conservation and Management

§ 600.511

§ 600.509 Prohibited species.

(a) The owner or operator of each FFV must minimize its catch or receipt of prohibited species.

(b) After allowing for sampling by an observer (if any), the owner or operator of each FFV must sort its catch of fish received as soon as possible and return all prohibited species and species parts to the sea immediately with a minimum of injury, regardless of condition, unless a different procedure is specified by the regulations for the fishery in which the FFV is engaged. All prohibited species must be recorded in the daily fishing log and other fishing logs as specified by the regulations for the fishery in which the FFV is engaged.

(c) All species of fish that an FFV has not been specifically allocated or authorized under this subpart to retain, including fish caught or received in excess of any allocation or authorization, are prohibited species.

(d) It is a rebuttable presumption that any prohibited species or species part found on board an FFV was caught and retained in violation of this section.

§ 600.510 Gear avoidance and disposal.

(a) *Vessel and gear avoidance.* (1) FFV's arriving on fishing grounds where fishing vessels are already fishing or have set their gear for that purpose must ascertain the position and extent of gear already placed in the sea and must not place themselves or their fishing gear so as to interfere with or obstruct fishing operations already in progress. Vessels using mobile gear must avoid fixed fishing gear.

(2) The operator of each FFV must maintain on its bridge a current plot of broadcast fixed-gear locations for the area in which it is fishing, as required by the regulations for the fishery in which the FFV is engaged.

(b) *Gear conflicts.* The operator of each FFV that is involved in a conflict or that retrieves the gear of another vessel must immediately notify the appropriate USCG commander identified in tables 1 and 2 to § 600.502 and request disposal instructions. Each report must include:

(1) The name of the reporting vessel.

(2) A description of the incident and articles retrieved, including the amount, type of gear, condition, and identification markings.

(3) The location of the incident.

(4) The date and time of the incident.

(c) *Disposal of fishing gear and other articles.* (1) The operator of an FFV in the EEZ may not dump overboard, jettison or otherwise discard any article or substance that may interfere with other fishing vessels or gear, or that may catch fish or cause damage to any marine resource, including marine mammals and birds, except in cases of emergency involving the safety of the ship or crew, or as specifically authorized by communication from the appropriate USCG commander or other authorized officer. These articles and substances include, but are not limited to, fishing gear, net scraps, bale straps, plastic bags, oil drums, petroleum containers, oil, toxic chemicals or any manmade items retrieved in an FFV's gear.

(2) The operator of an FFV may not abandon fishing gear in the EEZ.

(3) If these articles or substances are encountered, or in the event of accidental or emergency placement into the EEZ, the vessel operator must immediately report the incident to the appropriate USCG Commander indicated in tables 1 and 2 to § 600.502, and give the information required in paragraph (b) of this section.

§ 600.511 Fishery closure procedures.

(a) Activity Codes 1 and 2 for a fishery are automatically canceled in the following cases, unless otherwise specified by regulations specific to a fishery, when—

(1) The OY for any allocated species or species group has been reached in that fishery;

(2) The TALFF or catch allowance for any allocated species or species group has been reached in that fishery;

(3) The foreign nation's allocation for any allocated species or species group has been reached; or

(4) The letter of credit required in § 600.518(b)(2) is not established and maintained.

(b) Activity Code 4 is automatically canceled when—

§ 600.512

(1) The OY for a species with a JVP amount is reached;

(2) The JVP amount for a species or species group is reached; or

(3) The letter of credit required in § 600.518(b)(2) is not established and maintained.

(c) *Notification.* (1) The Regional Administrator is authorized to close a fishery on behalf of NMFS. The Regional Administrator will notify each FFV's designated representative of closures.

(2) If possible, notice will be given 48 hours before the closure. However, each Nation and the owners and operators of all FFV's of that Nation are responsible for ending fishing operations when an allocation is reached.

(d) *Catch reconciliation.* Vessel activity reports, U.S. surveillance observations, observer reports, and foreign catch and effort reports will be used to make the determination listed in paragraphs (a) and (b) of this section. If NMFS estimates of catch or other values made during the season differ from those reported by the foreign fleets, efforts may be initiated by the designated representative of each Nation to resolve such differences with NMFS. If, however, differences still persist after such efforts have been made, NMFS estimates will be the basis for decisions and will prevail.

(e) *Duration.* Any closure under this section will remain in effect until an applicable new or increased allocation or JVP becomes available or the letter of credit required by § 600.518(b)(2) is re-established.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

§ 600.512 Scientific research.

(a) *Scientific research activity.* Persons planning to conduct scientific research activities in the EEZ that may be confused with fishing are encouraged to submit to the appropriate Regional Administrator, Director, or designee, 60 days or as soon as practicable prior to its start, a scientific research plan for each scientific cruise. The Regional Administrator, Director, or designee will acknowledge notification of scientific research activity by issuing to the operator or master of that vessel, or to the sponsoring institution, a let-

50 CFR Ch. VI (10–1–05 Edition)

ter of acknowledgment. This letter of acknowledgment is separate and distinct from any permit required under any other applicable law. If the Regional Administrator, Director, or designee, after review of a research plan, determines that it does not constitute scientific research activity, but rather fishing, the Regional Administrator, Director, or designee will inform the applicant as soon as practicable and in writing. The Regional Administrator, Director, or designee may also make recommendations to revise the research plan to make the cruise acceptable as scientific research activity. In order to facilitate identification of activity as scientific research, persons conducting scientific research activities are advised to carry a copy of the scientific research plan and the letter of acknowledgment on board the scientific research vessel. Activities conducted in accordance with a scientific research plan acknowledged by such a letter are presumed to be scientific research activities. The presumption may be overcome by showing that an activity does not fit the definition of scientific research activity or is outside the scope of the scientific research plan.

(b) *Reports.* Persons conducting scientific research are requested to submit a copy of any cruise report or other publication created as a result of the cruise, including the amount, composition, and disposition of their catch, to the appropriate Science and Research Director.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

§ 600.513 Recreational fishing.

(a) Foreign vessels conducting recreational fishing must comply only with this section, and §§ 600.10, 600.504(a)(1), and 600.505 (as applicable). Such vessels may conduct recreational fishing within the EEZ and within the boundaries of a state. Any fish caught may not be sold, bartered, or traded.

(b) The owners or operator and any other person aboard any foreign vessel conducting recreational fishing must comply with any Federal laws or regulations applicable to the domestic fishery while in the EEZ, and any state

Fishery Conservation and Management

§ 600.518

laws or regulations applicable while in state waters.

§ 600.514 Relation to other laws.

(a) Persons affected by these regulations should be aware that other Federal and state statutes may apply to their activities.

(b) Fishing vessel operators must exercise due care in the conduct of fishing activities near submarine cables. Damage to submarine cables resulting from intentional acts or from the failure to exercise due care in the conduct of fishing operations subjects the fishing vessel operator to enforcement action under the International Convention for the Protection of Submarine Cables, and to the criminal penalties prescribed by the Submarine Cable Act (47 U.S.C. 21) and other laws that implement that Convention. Fishing vessel operators also should be aware that the Submarine Cable Act prohibits fishing operations at a distance of less than 1 nautical mile (1.85 km) from a vessel engaged in laying or repairing a submarine cable; or at a distance of less than 0.25 nautical mile (0.46 km) from a buoy or buoys intended to mark the position of a cable when being laid, or when out of order, or broken.

§ 600.515 Interpretation of 16 U.S.C. 1857(4).

Section 307(4) of the Magnuson-Stevens Act prohibits any fishing vessel other than a vessel of the United States (foreign fishing vessel) from operating in the EEZ if all of the fishing gear on board the vessel is not stowed in compliance with that section “unless such vessel is authorized to engage in fishing in the area in which the vessel is operating.” If such a vessel has a permit authorization that is limited to fishing activities other than catching, taking or harvesting (such as support, scouting or processing activities), it must have all of its fishing gear stowed at all times while it is in the EEZ. If such a vessel has a permit authorization to engage in catching, taking or harvesting activities, but such authorization is limited to a specific area within the EEZ, and/or to a specific period of time, the vessel must have all of its fishing gear stowed while it is in the EEZ, except when it is in the spe-

cific area authorized, and/or during the specific period of time authorized.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

§ 600.516 Total allowable level of foreign fishing (TALFF).

(a) The TALFF, if any, with respect to any fishery subject to the exclusive fishery management authority of the United States, is that portion of the OY of such fishery that will not be caught by vessels of the United States.

(b) Each specification of OY and each assessment of the anticipated U.S. harvest will be reviewed during each fishing season. Adjustments to TALFF's will be made based on updated information relating to status of stocks, estimated and actual performance of domestic and foreign fleets, and other relevant factors.

(c) Specifications of OY and the initial estimates of U.S. harvests and TALFF's at the beginning of the relevant fishing year will be published in the FEDERAL REGISTER. Adjustments to those numbers will be published in the FEDERAL REGISTER upon occasion or as directed by regulations implementing FMPs. For current apportionments, contact the appropriate Regional Administrator or the Director.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

§ 600.517 Allocations.

The Secretary of State, in cooperation with the Secretary, determines the allocation among foreign nations of fish species and species groups. The Secretary of State officially notifies each foreign nation of its allocation. The burden of ascertaining and accurately transmitting current allocations and status of harvest of an applicable allocation to fishing vessels is upon the foreign nation and the owner or operator of the FFV.

§ 600.518 Fee schedule for foreign fishing.

(a) *Permit application fees.* Each vessel permit application submitted under § 600.501 must be accompanied by a fee. The amount of the fee will be determined in accordance with the procedures for determining administrative

§ 600.518

costs of each special product or service contained in the NOAA Finance Handbook, which is available upon request from the International Fisheries Division (see address at § 600.501(d)(1)). The fee is specified with the application form. At the time the application is submitted, a check for the fees, drawn on a U.S. bank, payable to the order of "Department of Commerce, NOAA," must be sent to the Assistant Administrator. The permit fee payment must be accompanied by a list of the vessels for which the payment is made. In the case of applications for permits authorizing activity code 10, the permit application fee will be waived if the applicant provides satisfactory documentary proof to the Assistant Administrator that the foreign nation under which the vessel is registered does not collect a fee from a vessel of the United States engaged in similar activities in the waters of such foreign nation. The documentation presented (e.g., copy of foreign fishing regulations applicable to vessels of the United States) must clearly exempt vessels of the United States from such a fee.

(b) *Poundage fees.* (1) *Rates.* If a Nation chooses to accept an allocation, poundage fees must be paid at the rate specified in the following table.

TABLE—SPECIES AND POUNDAGE FEES
[Dollars per metric ton]

Species	Poundage fees
Northwest Atlantic Ocean fisheries:	
1. Butterfish	277.96
2. Herring, Atlantic	25.75
3. Herring, River	49.59
4. Mackerel, Atlantic	64.76
5. Other finfish	45.48
6. Squid, <i>Illex</i>	97.56
7. Squid, <i>Loligo</i>	321.68

(2) *Method of payment of poundage fees and observer fees.* (i) If a Nation chooses to accept an allocation, a revolving letter of credit (L/C) must be established and maintained to cover the poundage fees for at least 25 percent of the previous year's total allocation at the rate in paragraph (b)(1) of this section, or as determined by the Assistant Administrator, plus the observer fees required by paragraph (c) of this section. The L/C must—

(A) Be irrevocable.

50 CFR Ch. VI (10–1–05 Edition)

(B) Be with a bank subscribing to ICC Pub. 290.

(C) Designate "Department of Commerce, NOAA" as beneficiary;

(D) Allow partial withdrawals.

(E) Be confirmed by a U.S. bank.

(ii) The customer must pay all commissions, transmission, and service charges. No fishing will be allowed until the L/C is established, and authorized written notice of its issuance is provided to the Assistant Administrator.

(3) *Assessment of poundage fees.* Poundage fees will be assessed quarterly for the actual catch during January through March, April through June, July through September, and October through December. The appropriate Regional Administrator will reconcile catch figures with each country following the procedures of § 600.511(d). When the catch figures are agreed upon, NOAA will present a bill for collection as the documentary demand for payment to the confirming bank. If, after 45 days from the end of the quarter, catches have not been reconciled, the estimate of the Regional Administrator will stand and a bill will be issued for that amount. If necessary, the catch figures may be refined by the Regional Administrator during the next 60 days, and any modifications will be reflected in the next quarter's bill.

(c) *Observer fees.* The Assistant Administrator will notify the owners or operators of FFV's of the estimated annual costs of placing observers aboard their vessels. The owners or operators of any such vessel must provide for repayment of those costs by including one-fourth of the estimated annual observer fee as determined by the Assistant Administrator in a L/C as prescribed in § 600.518(b)(2). During the fiscal year, payment will be withdrawn from the L/C as required to cover anticipated observer coverage for the upcoming fishery. The Assistant Administrator will reconcile any differences between the estimated cost and actual costs of observer coverage within 90 days after the end of the fiscal year.

(d) *Financial assurances.* (1) A foreign nation, or the owners and operators of certain vessels of that foreign nation,

Fishery Conservation and Management

§ 600.520

may be required by the Assistant Administrator to provide financial assurances. Such assurances may be required if—

(i) Civil and criminal penalties assessed against fishing vessels of the Nation have not effectively deterred violations;

(ii) Vessels of that Nation have engaged in fishing in the EEZ without proper authorization to conduct such activities;

(iii) The Nation's vessel owners have refused to answer administrative charges or summons to appear in court; or

(iv) Enforcement of Magnuson-Stevens Act civil or criminal judgments in the courts of a foreign nation is unattainable.

(2) The level of financial assurances will be guided by the level of penalties assessed and costs to the U.S. Government.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998; 64 FR 39020, July 21, 1999; 66 FR 28132, May 22, 2001]

§ 600.520 Northwest Atlantic Ocean fishery.

(a) *Purpose.* Sections 600.520 and 600.525 regulate all foreign fishing conducted under a GIFA within the EEZ in the Atlantic Ocean north of 35°00' N. lat.

(b) *Authorized fishery—(1) Allocations.* Foreign vessels may engage in fishing only in accordance with applicable national allocations.

(2) *Time and area restrictions.* (i) Fishing, including processing, scouting, and support of foreign or U.S. vessels, is prohibited south of 35°00' N. lat., and north and east of a line beginning at the shore at 44°22' N. lat., 67°52' W. long. and intersecting the boundary of the EEZ at 44°11'12" N. lat., 67°16'46" W. long.

(ii) The Regional Administrator will consult with the Council prior to giving notice of any area or time restriction. NMFS will also consult with the USCG if the restriction is proposed to reduce gear conflicts. If NMFS determines after such consultation that the restriction appears to be appropriate, NMFS will publish the proposed restriction in the FEDERAL REGISTER, together with a summary of the informa-

tion on which the restriction is based. Following a 30-day comment period, NMFS will publish a final action.

(iii) The Regional Administrator may rescind any restriction if he/she determines that the basis for the restriction no longer exists.

(iv) Any notice of restriction shall operate as a condition imposed on the permit issued to the foreign vessels involved in the fishery.

(3) *TALFF.* The TALFFs for the fisheries of the Northwest Atlantic Ocean are published in the FEDERAL REGISTER. Current TALFFs are also available from the Regional Administrator.

(4) *Species definitions.* The category "other finfish" used in TALFFs and in allocations includes all species except:

(i) The other allocated species, namely: Short-finned squid, long-finned squid, Atlantic herring, Atlantic mackerel, river herring (includes alewife, blueback herring, and hickory shad), and butterfish.

(ii) The prohibited species, namely: American plaice, American shad, Atlantic cod, Atlantic menhaden, Atlantic redfish, Atlantic salmon, all marlin, all spearfish, sailfish, swordfish, black sea bass, bluefish, croaker, haddock, ocean pout, pollock, red hake, scup, sea turtles, sharks (except dogfish), silver hake, spot, striped bass, summer flounder, tilefish, yellowtail flounder, weakfish, white hake, windowpane flounder, winter flounder, witch flounder, Continental Shelf fishery resources, and other invertebrates (except nonallocated squids).

(5) *Closures.* The taking of any species for which a Nation has an allocation is permitted, provided that:

(i) The vessels of the foreign nation have not caught the allocation of that Nation for any species or species group (e.g., "other finfish"). When vessels of a foreign nation have caught an applicable allocation of any species, all further fishing other than scouting, processing, or support by vessels of that Nation must cease, even if other allocations have not been reached. Therefore, it is essential that foreign nations plan their fishing strategy to ensure that the reaching of an allocation for one species does not result in the premature closing of a Nation's fishery for other allocated species.

§ 600.520

50 CFR Ch. VI (10–1–05 Edition)

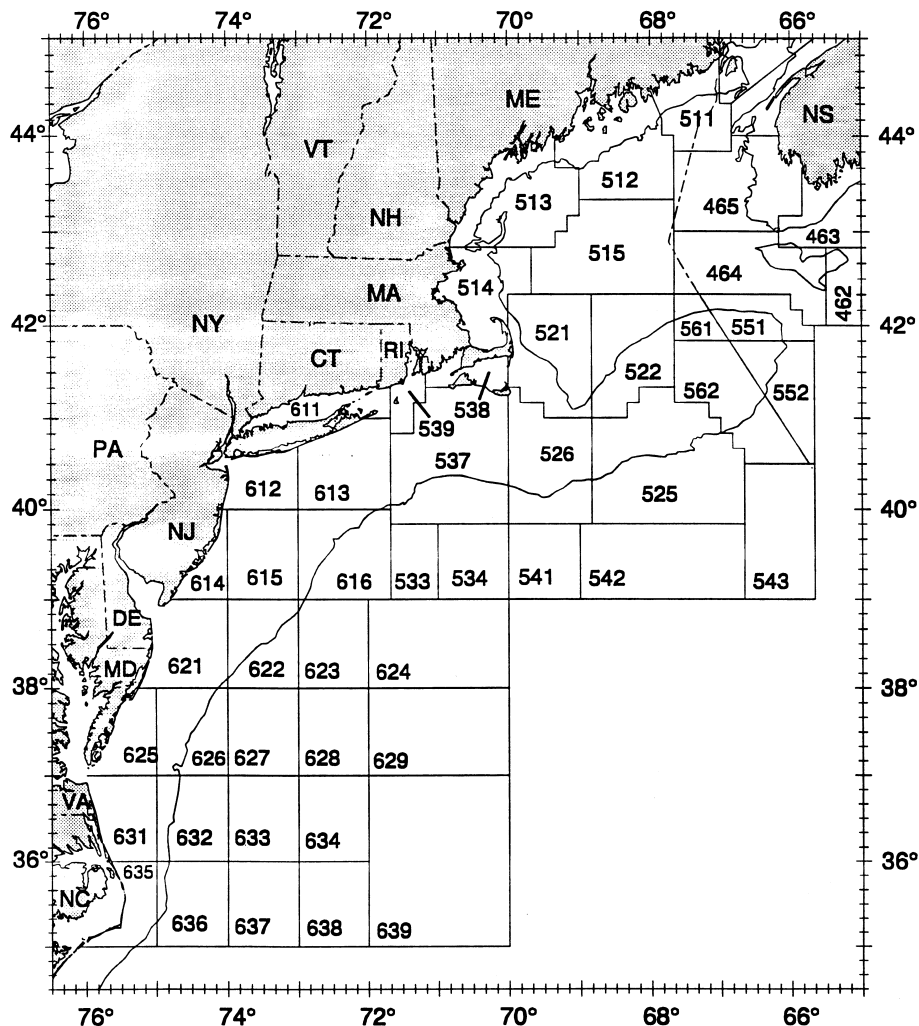

(ii) The fishery has not been closed for other reasons under § 600.511.

(6) *Allocation utilization.* Foreign fishing vessels may elect to retain or discard allocated species; however, the computation of allocation utilization and fee refunds will be based on the total quantity of that species that was caught. Prohibited species must always

be returned to the sea as required under § 600.509.

(c) *Fishing areas.* For the purposes of the Northwest Atlantic Ocean fishery, fishing areas are that portion of the EEZ shown inside the boundaries of the “three digit statistical areas” described in Figure 1 to this section.

Figure 1 to § 600.520--Fishing Areas of the Northwest Atlantic Ocean Fisheries

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

Fishery Conservation and Management

§ 600.530

§ 600.525 Applicability of Subpart F to Canadian Albacore Fishing Vessels off the West Coast.

Fishing by vessels of Canada under the 1981 Treaty Between the Government of the United States of America and the Government of Canada on Pacific Coast Albacore Tuna Vessels and Port Privileges is regulated only under this section and § 600.530 of this subpart F, and is exempt from any other requirements of this subpart F. Regulations governing fishing by U.S. vessels in waters under the fisheries jurisdiction of the Canada more than 12 nautical miles from the baseline from which the territorial sea is measured are found at §§ 300.170–300.176 of chapter II of this title.

[69 FR 31535, June 4, 2004]

§ 600.530 Pacific albacore fishery.

(a) *Purpose and scope.* This section regulates fishing by Canadian vessels under the 1981 Treaty Between the Government of the United States of America and the Government of Canada on Pacific Coast Albacore Tuna Vessels and Port Privileges as amended in 2002. Notwithstanding any other provision of this subpart F, fishing vessels of Canada may be authorized to fish in waters under the fisheries jurisdiction of the United States more than 12 nautical miles from the baseline from which the territorial sea is measured in accordance with the Treaty and this section, pursuant to Public Law 108–219 (118 Stat. 616; 16 U.S.C. 1821 note).

(b) *Definitions.* In addition to the definitions in the Magnuson-Stevens Fishery Conservation and Management Act and § 600.10, the terms used in this subpart have the following meanings:

Fishing under the Treaty as amended in 2002 means to engage in fishing for albacore tuna in waters under the fisheries jurisdiction of the United States seaward of 12 nautical miles from the baseline from which the territorial sea is measured.

Regional Administrator means the Regional Administrator, Southwest Region, NMFS, 501 W. Ocean Boulevard, Suite 4200, Long Beach, CA 90802–4213, or a designee.

Reporting Office means the office designated by the Regional Administrator

to take hail-in and hail-out reports from U.S. and Canadian vessel operators.

Treaty means the 1981 Treaty Between the Government of the United States of America and the Government of Canada on Pacific Coast Albacore Tuna Vessels and Port Privileges as amended in 2002.

(c) *Vessel list.* A Canadian vessel is not eligible to fish for albacore in U.S. waters under the Treaty as amended in 2002 unless the vessel is on the list provided to NMFS by the Government of Canada of vessels authorized by Canada to fish under the Treaty as amended in 2002.

(d) *Vessel identification.* A Canadian vessel fishing under the Treaty as amended in 2002 must clearly display its Canadian vessel registration number followed by the letter C in the same height and size as the numerals, consistent with Canadian vessel marking requirements.

(e) *Hail-in reports.* The operator of a Canadian Vessel eligible to fish for albacore in U.S. waters under the Treaty as amended in 2002 must file a hail-in report with the Reporting Office at least 24 hours prior to beginning any such fishing.

(f) *Hail-out Reports.* The operator of a Canadian vessel that has been fishing in U.S. waters under the Treaty as amended in 2002 must file a hail-out report with the Reporting Office at least 24 hours prior to exiting from U.S. waters.

(g) *Prohibitions.* It is prohibited for the operator of a Canadian vessel to engage in fishing in U.S. waters if the vessel:

(1) Is not on the vessel list in paragraph (c) of this section;

(2) Has not filed a hail-in report to advise of an intent to fish under the Treaty as amended in 2002 prior to engaging in such fishing; or

(3) Is not clearly marked in accordance with paragraph (d) of this section.

[69 FR 31535, June 4, 2004]

Subpart G—Preemption of State Authority Under Section 306(b)

§ 600.605 General policy.

It is the policy of the Secretary that preemption proceedings will be conducted expeditiously. The administrative law judge and counsel or other representative for each party are encouraged to make every effort at each stage of the proceedings to avoid delay.

§ 600.610 Factual findings for Federal preemption.

(a) The two factual findings for Federal preemption of state management authority over a fishery are:

(1) The fishing in a fishery that is covered by an FMP implemented under the Magnuson-Stevens Act is engaged in predominately within the EEZ and beyond such zone.

(2) A state has taken any action, or omitted to take any action, the results of which will substantially and adversely affect the carrying out of such FMP.

(b) Whether fishing is engaged in “predominately” within or beyond the EEZ will be determined after consideration of relevant factors, including but not limited to, the catch (based on numbers, value, or weight of fish caught, or other relevant factors) or fishing effort during the appropriate period, and in light of historical patterns of the distribution of catch or fishing effort for such stock or stocks of fish.

(c) Whether relevant effects are substantial will be determined after consideration of the magnitude of such actual or potential effects. Relevant to this determination are various factors, including but not limited to, the proportion of the fishery (stock or stocks of fish and fishing for such stocks) that is subject to the effects of a particular state’s action or omission, the characteristics and status (including migratory patterns and biological condition) of the stock or stocks of fish in the fishery, and the similarity or dissimilarity between the goals, objectives, or policies of the state’s action or omission and the management goals or objectives specified in the FMP for the fishery or between the state and Fed-

eral conservation and management measures of the fishery.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

§ 600.615 Commencement of proceedings.

(a) *Notice of proposed preemption.* (1) If a proceeding under this part is deemed necessary, the Administrator must issue a notice of proposed preemption to the Attorney General of the State or States concerned. The notice will contain:

(i) A recital of the legal authority and jurisdiction for instituting the proceeding.

(ii) A concise statement of the § 600.610 factual findings for Federal preemption upon which the notice is based.

(iii) The time, place, and date of the hearing.

(2) The notice of proposed preemption will also be published in the FEDERAL REGISTER. This notification may be combined with any notice of proposed rulemaking published under paragraph (d)(1) of this section.

(b) *Response.* The state will have the opportunity to respond in writing to the notice of proposed preemption.

(c) *Amendment.* The Administrator may, at any time prior to the Secretary’s decision, withdraw the notice of proposed preemption. Upon motion of either party before the record is closed, the administrative law judge may amend the notice of proposed preemption.

(d) *Proposed regulations.*—(1) *In general.* If additional regulations are required to govern fishing within the boundaries of a state, the Administrator may publish proposed regulations in the FEDERAL REGISTER concurrently with issuing the notification indicated in paragraph (a) of this section.

(2) *Emergency actions.* Nothing in this section will prevent the Secretary from taking emergency action under section 305(c) of the Magnuson-Stevens Act.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

§ 600.620 Rules pertaining to the hearing.

(a) The civil procedure rules of the NOAA currently set forth in 15 CFR

Fishery Conservation and Management

§ 600.630

part 904, subpart C (or as subsequently amended), apply to the proceeding after its commencement by service of notice (pursuant to § 600.615) and prior to the Secretary's decision (§ 600.625), except that the following sections will not apply:

- (1) 15 CFR 904.201 (Definitions);
- (2) 15 CFR 904.206(a)(1) (Duties and powers of Judge); and
- (3) 15 CFR 904.272 (Administrative review of decision).

(b) *Additional duties and powers of judge*—(1) *Time periods*. The administrative law judge is authorized to modify all time periods pertaining to the course of the hearing (under §§ 600.615 and 600.620) to expedite the proceedings, upon application and appropriate showing of need or emergency circumstances by a party.

(2) *Intervention*. Intervention by persons not parties is not allowed.

§ 600.625 Secretary's decision.

(a) The Secretary will, on the basis of the hearing, record the administrative law judge's recommended decision:

(1) Accept or reject any of the findings or conclusions of the administrative law judge and decide whether the factual findings exist for Federal preemption of a state's authority within its boundaries (other than in its internal waters) with respect to the fishery in question;

(2) Reserve decision on the merits or withdraw the notice of proposed preemption; or

(3) Remand the case to the administrative law judge for further proceedings as may be appropriate, along with a statement of reasons for the remand.

(b) *Notification*. (1) If the factual findings for Federal preemption are determined to exist, the Secretary will notify in writing the Attorney General of that state and the appropriate Council(s) of the preemption of that state's authority. The Secretary will also direct the Administrator to promulgate appropriate regulations proposed under § 600.615(d) and otherwise to begin regulating the fishery within the state's boundaries (other than in its internal waters).

(2) If the factual findings for Federal preemption are determined not to

exist, the Secretary will notify, in writing, the Attorney General of the state and the appropriate Council(s) of that determination. The Secretary will also direct the Administrator to issue a notice withdrawing any regulations proposed under § 600.615(d).

§ 600.630 Application for reinstatement of state authority.

(a) *Application or notice*. (1) At any time after the promulgation of regulations under § 600.625(b)(1) to regulate a fishery within a state's boundaries, the affected state may apply to the Secretary for reinstatement of state authority. The Secretary may also serve upon such state a notice of intent to terminate such Federal regulation. A state's application must include a clear and concise statement of:

(i) The action taken by the State to correct the action or omission found to have substantially and adversely affected the carrying out of the FMP; or

(ii) Any changed circumstances that affect the relationship of the state's action or omission to take action to the carrying out of the FMP (including any amendment to such plan); and

(iii) Any laws, regulations, or other materials that the state believes support the application.

(2) Any such application received by the Secretary or notice issued to the State will be published in the FEDERAL REGISTER.

(b) *Informal response*. The Secretary has sole discretion to accept or reject the application or response. If the Secretary accepts the application or rejects any responses and finds that the reasons for regulation of the fishery within the boundaries of the state no longer prevail, the Secretary will promptly terminate such regulation and publish in the FEDERAL REGISTER any regulatory amendments necessary to accomplish that end.

(c) *Hearing*. The Secretary has sole discretion to direct the Administrator to schedule hearings for the receipt of evidence by an administrative law judge. Hearings before the administrative law judge to receive such evidence will be conducted in accordance with § 600.620. Upon conclusion of such hearings, the administrative law judge will certify the record and a recommended

§ 600.705

decision to the Secretary. If the Secretary, upon consideration of the state's application or any response to the notice published under § 600.630(a)(2), the hearing record, the recommended decision, and any other relevant materials finds that the reasons for regulation of the fishery within the boundaries of the state no longer prevail, the Secretary will promptly terminate such regulation and publish in the FEDERAL REGISTER any regulatory amendments necessary to accomplish that end.

Subpart H—General Provisions for Domestic Fisheries

§ 600.705 Relation to other laws.

(a) *General.* Persons affected by these regulations should be aware that other Federal and state statutes and regulations may apply to their activities. Vessel operators may wish to refer to USCG regulations found in the Code of Federal Regulations title 33—Navigation and Navigable Waters and 46—Shipping; 15 CFR part 904, subpart D—Permit Sanctions and Denials; and title 43—Public Lands (in regard to marine sanctuaries).

(b) *State responsibilities.* Certain responsibilities relating to data collection and enforcement may be performed by authorized state personnel under a state/Federal agreement for data collection and a tripartite agreement among the state, the USCG, and the Secretary for enforcement.

(c) *Submarine cables.* Fishing vessel operators must exercise due care in the conduct of fishing activities near submarine cables. Damage to the submarine cables resulting from intentional acts or from the failure to exercise due care in the conduct of fishing operations subjects the fishing vessel operator to the criminal penalties prescribed by the Submarine Cable Act (47 U.S.C. 21) which implements the International Convention for the Protection of Submarine Cables. Fishing vessel operators also should be aware that the Submarine Cable Act prohibits fishing operations at a distance of less than 1 nautical mile (1.85 km) from a vessel engaged in laying or repairing a submarine cable; or at a distance of less than 0.25 nautical mile (0.46 km) from a

50 CFR Ch. VI (10–1–05 Edition)

buoy or buoys intended to mark the position of a cable when being laid or when out of order or broken.

(d) *Marine mammals.* Regulations governing exemption permits and the recordkeeping and reporting of the incidental take of marine mammals are set forth in part 229 of this title.

(e) *Halibut fishing.* Fishing for halibut is governed by regulations of the International Pacific Halibut Commission set forth at part 300 of this title.

(f) *Marine sanctuaries.* All fishing activity, regardless of species sought, is prohibited under 15 CFR part 924 in the U.S.S. Monitor Marine Sanctuary, which is located approximately 15 miles southwest of Cape Hatteras off the coast of North Carolina.

§ 600.710 Permits.

Regulations pertaining to permits required for certain fisheries are set forth in the parts of this chapter governing those fisheries.

§ 600.715 Recordkeeping and reporting.

Regulations pertaining to records and reports required for certain fisheries are set forth in the parts of this chapter governing those fisheries.

§ 600.720 Vessel and gear identification.

Regulations pertaining to special vessel and gear markings required for certain fisheries are set forth in the parts of this chapter governing those fisheries.

§ 600.725 General prohibitions.

It is unlawful for any person to do any of the following:

(a) Possess, have custody or control of, ship, transport, offer for sale, sell, purchase, land, import, or export, any fish or parts thereof taken or retained in violation of the Magnuson-Stevens Act or any other statute administered by NOAA and/or any regulation or permit issued under the Magnuson-Stevens Act.

(b) Transfer or attempt to transfer, directly or indirectly, any U.S.-harvested fish to any foreign fishing vessel, while such vessel is in the EEZ, unless the foreign fishing vessel has been issued a permit under section 204 of the

Fishery Conservation and Management

§ 600.725

Magnuson-Stevens Act, which authorizes the receipt by such vessel of U.S.-harvested fish.

(c) Fail to comply immediately with enforcement and boarding procedures specified in § 600.730.

(d) Refuse to allow an authorized officer to board a fishing vessel or to enter areas of custody for purposes of conducting any search, inspection, or seizure in connection with the enforcement of the Magnuson-Stevens Act or any other statute administered by NOAA.

(e) Dispose of fish or parts thereof or other matter in any manner, after any communication or signal from an authorized officer, or after the approach by an authorized officer or an enforcement vessel or aircraft.

(f) Assault, resist, oppose, impede, intimidate, threaten, or interfere with any authorized officer in the conduct of any search, inspection, or seizure in connection with enforcement of the Magnuson-Stevens Act or any other statute administered by NOAA.

(g) Interfere with, delay, or prevent by any means, the apprehension of another person, knowing that such person has committed any act prohibited by the Magnuson-Stevens Act or any other statute administered by NOAA.

(h) Resist a lawful arrest for any act prohibited under the Magnuson-Stevens Act or any other statute administered by NOAA.

(i) Make any false statement, oral or written, to an authorized officer concerning the taking, catching, harvesting, landing, purchase, sale, offer of sale, possession, transport, import, export, or transfer of any fish, or attempts to do any of the above.

(j) Interfere with, obstruct, delay, or prevent by any means an investigation, search, seizure, or disposition of seized property in connection with enforcement of the Magnuson-Stevens Act or any other statute administered by NOAA.

(k) Fish in violation of the terms or conditions of any permit or authorization issued under the Magnuson-Stevens Act or any other statute administered by NOAA.

(l) Fail to report catches as required while fishing pursuant to an exempted fishing permit.

(m) On a scientific research vessel, engage in fishing other than recreational fishing authorized by applicable state or Federal regulations.

(n) Trade, barter, or sell; or attempt to trade, barter, or sell fish possessed or retained while fishing pursuant to an authorization for an exempted educational activity.

(o) Harass or sexually harass an authorized officer or an observer.

(p) Fail to submit to a USCG safety examination when required by NMFS pursuant to § 600.746.

(q) Fail to display a Commercial Fishing Vessel Safety Examination decal or a valid certificate of compliance or inspection pursuant to § 600.746.

(r) Fail to provide to an observer, a NMFS employee, or a designated observer provider information that has been requested pursuant to § 600.746, or fail to allow an observer, a NMFS employee, or a designated observer provider to inspect any item described at § 600.746.

(s) Fish without an observer when the vessel is required to carry an observer.

(t) Assault, oppose, impede, intimidate, or interfere with a NMFS-approved observer aboard a vessel.

(u) Prohibit or bar by command, impediment, threat, coercion, or refusal of reasonable assistance, an observer from conducting his or her duties aboard a vessel.

(v) The use of any gear or participation in a fishery not on the following list of authorized fisheries and gear is prohibited after December 1, 1999. A fish, regardless whether targeted, may be retained only if it is taken within a listed fishery, is taken with a gear authorized for that fishery, and is taken in conformance with all other applicable regulations. Listed gear can only be used in a manner that is consistent with existing laws and regulations. The list of fisheries and authorized gear does not, in any way, alter or supersede any definitions or regulations contained elsewhere in this chapter. A person or vessel is prohibited from engaging in fishing or employing fishing gear when such fishing gear is prohibited or restricted by regulation under an FMP or other applicable law. However, after

December 1, 1999, an individual fisherman may notify the appropriate Council, or the Director, in the case of Atlantic highly migratory species, of the intent to use a gear or participate in a fishery not already on the list. Ninety days after such notification, the indi-

vidual may use the gear or participate in that fishery unless regulatory action is taken to prohibit the use of the gear or participate in the fishery (*e.g.*, through emergency or interim regulations). The list of authorized fisheries and gear is as follows:

Fishery	Authorized gear types
I. New England Fishery Management Council (NEFMC)	
1. Atlantic Sea Scallop Fishery (FMP):	
A. Dredge fishery	A. Dredge.
B. Trawl fishery	B. Trawl.
C. Hand harvest fishery	C. Hand harvest.
D. Recreational fishery	D. Hand harvest.
2. Iceland Scallop Fishery (Non-FMP):	
A. Dredge fishery	A. Dredge.
B. Trawl fishery	B. Trawl.
3. Atlantic Salmon Fishery (FMP)	No harvest or possession in the EEZ.
4. Striped Bass Fishery (Non-FMP)	No harvest or possession in the EEZ.
5. Northeast (NE) Multispecies Fishery (FMP):	
A. NE multispecies sink gillnet fishery	A. Gillnet.
B. North Atlantic bottom trawl fishery	B. Trawl.
C. Groundfish hook and line fishery	C. Longline, handline, rod and reel.
D. Mixed species trap and pot fishery	D. Trap, pot.
E. Dredge fishery	E. Dredge.
F. Seine fishery	F. Seine.
G. Recreational fishery	G. Rod and reel, handline, spear.
6. American Lobster Fishery (FMP):	
A. Lobster pot and trap fishery	A. Pot, trap.
B. North Atlantic bottom trawl fishery	B. Trawl.
C. Dredge fishery	C. Dredge.
D. Hand harvest fishery	D. Hand harvest.
E. Gillnet fishery	E. Gillnet.
F. Recreational fishery	F. Pot, trap, hand harvest.
7. Atlantic Herring Fishery (FMP):	
A. Trawl fishery	A. Trawl.
B. Purse seine fishery	B. Purse seine.
C. Gillnet fishery	C. Gillnet.
D. Herring pair trawl fishery	D. Pair trawl.
E. Dredge fishery	E. Dredge.
F. Recreational fishery	F. Hook and line, gillnet.
8. Spiny Dogfish Fishery (FMP jointly managed by MAFMC and NEFMC):	
A. Gillnet fishery	A. Gillnet.
B. Trawl fishery	B. Trawl.
C. Hook and line fishery	C. Hook and line, rod and reel, spear.
D. Dredge fishery	D. Dredge.
E. Longline fishery	E. Longline.
F. Recreational fishery	F. Hook and line, rod and reel, spear.
9. Atlantic Bluefish Fishery (FMP managed by MAFMC):	
A. Pelagic longline and hook and line fishery	A. Longline, handline.
B. Seine fishery	B. Purse seine, seine.
C. Mixed species pot and trap fishery	C. Pot, trap.
D. Bluefish, croaker, flounder trawl fishery	D. Trawl.
E. Gillnet fishery	E. Gillnet.
F. Dredge fishery	F. Dredge.
G. Recreational fishery	G. Rod and reel, handline, trap, pot, spear.
10. Atlantic Mackerel, Squid and Butterfish Fishery (FMP managed by the MAFMC):	
A. Mackerel, squid, and butterfish trawl fishery	A. Trawl.
B. Gillnet fishery	B. Gillnet.
C. Longline and hook-and-line fishery	C. Longline, handline, rod and reel.
D. Purse seine fishery	D. Purse seine.
E. Mixed species pot and trap fishery	E. Pot, trap.
F. Dredge fishery	F. Dredge.
G. Dip net fishery	G. Dip net.
H. Bandit gear fishery	H. Bandit gear.
I. Recreational fishery	I. Rod and reel, handline, pot, spear.
11. Surf Clam and Ocean Quahog Fishery (FMP managed by the MAFMC):	
A. Commercial fishery	A. Dredge, hand harvest.

Fishery Conservation and Management

\$ 600.725

Fishery	Authorized gear types
B. Recreational fishery	B. Hand harvest.
12. Atlantic Menhaden Fishery (Non-FMP):	
A. Purse seine fishery	A. Purse seine.
B. Trawl fishery	B. Trawl.
C. Gillnet fishery	C. Gillnet.
D. Commercial hook-and-line fishery	D. Hook and line.
E. Recreational fishery	E. Hook and line, snagging, cast nets.
13. Weakfish Fishery (Non-FMP):	
A. Commercial fishery	A. Trawl, gillnet, hook and line.
B. Recreational fishery	B. Hook and line, spear.
14. Atlantic Mussel and Sea Urchin Fishery (Non-FMP):	
A. Dredge fishery	A. Dredge.
B. Hand harvest fishery	B. Hand harvest.
C. Recreational fishery	C. Hand harvest.
15. Atlantic Skate Fishery (Non-FMP):	
A. Trawl fishery	A. Trawl.
B. Gillnet fishery	B. Gillnet.
C. Hook-and-line fishery	C. Longline and handline.
D. Dredge fishery	D. Dredge.
E. Recreational fishery	E. Rod and reel.
16. Crab Fishery (Non-FMP):	
A. Dredge fishery	A. Dredge.
B. Trawl fishery	B. Trawl.
C. Trap and pot fishery	C. Trap, pot.
17. Northern Shrimp Fishery (Non-FMP):	
A. Shrimp trawl fishery	A. Trawl.
B. Shrimp pot fishery	B. Pot.
18. Monkfish Fishery (FMP jointly managed by NEFMC and MAFMC):	
A. Trawl fishery	A. Trawl.
B. Gillnet fishery	B. Gillnet.
C. Longline fishery	C. Longline.
D. Dredge fishery	D. Dredge.
E. Trap and pot fishery	E. Trap, pot.
F. Recreational fishery	F. Rod and reel, spear.
19. Summer Flounder, Scup, Black Sea Bass Fishery (FMP managed by MAFMC):	
A. Trawl fishery	A. Trawl.
B. Longline and hook and line fishery	B. Longline, handline.
C. Mixed species pot and trap fishery	C. Pot, trap.
D. Gillnet fishery	D. Gillnet.
E. Dredge fishery	E. Dredge.
F. Recreational fishery	F. Rod and reel, handline, pot, trap, spear.
20. Hagfish Fishery (Non-FMP)	Trap, pot.
21. Tautog Fishery (Non-FMP):	
A. Gillnet fishery	A. Gillnet.
B. Pot and trap fishery	B. Pot, trap.
C. Rod and reel, hook and line fishery	C. Rod and reel, handline, hook and line.
D. Trawl fishery	D. Trawl.
E. Spear fishery	E. Spear.
F. Fyke net fishery	F. Fyke net.
G. Recreational fishery	G. Rod and reel, hook and line, handline, spear.
22. Recreational Fishery (Non-FMP)	Rod and reel, handline, spear, hook and line, hand harvest, bandit gear, powerhead, gillnet, cast net, pot, trap, dip net, bully net, snare.
23. Commercial Fishery (Non-FMP)	Trawl, pot, trap, gillnet, pound net, dredge, seine, handline, longline, hook and line, rod and reel, hand harvest, purse seine, spear, bandit gear, powerhead, dip net, bully net, snare, cast net, barrier net, slurp gun, allowable chemicals.
24. Dolphin/wahoo fishery (FMP managed by SAFMC)	Automatic reel, bandit gear, handline, pelagic longline, rod and reel, spear (including powerheads).

II. Mid-Atlantic Fishery Management Council (MAFMC)

1. Summer Flounder, Scup, Black Sea Bass Fishery (FMP):	
A. Trawl fishery	A. Trawl.
B. Pelagic longline and hook and line fishery	B. Longline, handline, rod and reel.
C. Mixed species pot and trap fishery	C. Pot, trap.
D. Gillnet fishery	D. Gillnet.
E. Dredge fishery	E. Dredge.
F. Recreational fishery	F. Rod and reel, handline, pot, trap, spear.
2. Atlantic Bluefish Fishery (FMP):	
A. Bluefish, croaker, and flounder trawl fishery	A. Trawl.

Fishery	Authorized gear types
B. Pelagic longline and hook and line fishery	B. Longline, handline, bandit gear, rod and reel.
C. Mixed species pot and trap fishery	C. Pot, trap.
D. Gillnet fishery	D. Gillnet.
E. Seine fishery	E. Purse seine, seine.
F. Dredge fishery	F. Dredge.
G. Recreational fishery	G. Rod and reel, handline, trap, pot, spear.
3. Atlantic Mackerel, Squid, and Butterfish Fishery (FMP):	
A. Mackerel, squid, and butterfish trawl fishery	A. Trawl.
B. Gillnet fishery	B. Gillnet.
C. Longline and hook-and-line fishery	C. Longline, handline, rod and reel.
D. Purse seine fishery	D. Purse seine.
E. Mixed species pot and trap fishery	E. Pot, trap.
F. Dredge fishery	F. Dredge.
G. Dip net fishery	G. Dip net.
H. Bandit gear fishery	H. Bandit gear.
I. Recreational fishery	I. Rod and reel, handline, pot, spear.
4. Surf Clam and Ocean Quahog Fishery (FMP):	
A. Commercial fishery	A. Dredge, hand harvest.
B. Recreational fishery	B. Hand harvest.
5. Atlantic Sea Scallop Fishery (FMP managed by NEFMC):	
A. Dredge fishery	A. Dredge.
B. Trawl fishery	B. Trawl.
C. Hand harvest fishery	C. Hand harvest.
D. Recreational fishery	D. Hand harvest.
6. Atlantic Menhaden Fishery (Non-FMP):	
A. Purse seine fishery	A. Purse seine.
B. Trawl fishery	B. Trawl.
C. Gillnet fishery	C. Gillnet.
D. Commercial hook-and-line fishery	D. Hook and line.
E. Recreational fishery	E. Hook and line, snagging, cast nets.
7. Striped Bass Fishery (Non-FMP)	No harvest or possession in the EEZ.
8. Northern Shrimp Trawl Fishery (Non-FMP)	Trawl.
9. American Lobster Fishery (FMP managed by NEFMC):	
A. Pot and trap fishery	A. Pot, trap.
B. Hand harvest fishery	B. Hand harvest.
C. Trawl fishery	C. Trawl.
D. Dredge fishery	D. Dredge.
E. Gillnet fishery	E. Gillnet.
F. Recreational fishery	F. Pot, trap, hand harvest.
10. Weakfish Fishery (Non-FMP):	
A. Commercial fishery	A. Trawl, gillnet, hook and line, rod and reel.
B. Recreational fishery	B. Hook and line, spear.
11. Whelk Fishery (Non-FMP):	
A. Trawl fishery	A. Trawl.
B. Pot and trap fishery	B. Pot, trap.
C. Dredge	C. Dredge.
D. Pound net, gillnet, seine	D. Pound net, gillnet, seine.
E. Recreational fishery	E. Hand harvest.
12. Monkfish Fishery (FMP jointly managed by NEFMC and MAFMC):	
A. Trawl fishery	A. Trawl.
B. Longline fishery	B. Longline, rod and reel.
C. Gillnet fishery	C. Gillnet.
D. Dredge fishery	D. Dredge.
E. Trap and pot fishery	E. Trap and pot.
F. Recreational fishery	F. Rod and reel, spear.
13. Tilefish Fishery (Non-FMP):	
A. Groundfish hook-and-line fishery	A. Longline, handline, rod and fishery reel.
B. Trawl fishery	B. Trawl.
C. Recreational fishery	C. Rod and reel, spear.
14. Spiny Dogfish Fishery (FMP jointly managed by MAFMC and NEFMC):	
A. Gillnet fishery	A. Gillnet.
B. Trawl fishery	B. Trawl.
C. Hook and line fishery	C. Hook and line, rod and reel, spear.
D. Dredge fishery	D. Dredge.
E. Longline fishery	E. Longline.
F. Recreational fishery	F. Hook and line, rod and reel, spear.
15. Tautog Fishery (Non-FMP):	
A. Gillnet fishery	A. Gillnet.
B. Pot and trap fishery	B. Pot, trap.
C. Rod and reel, hook and line handline fishery	C. Rod and reel, hook and line, handline.
D. Trawl fishery	D. Trawl.
E. Spear fishery	E. Spear.
F. Fyke net fishery	F. Fyke net.

Fishery Conservation and Management

A. Octocoral commercial fishery	Hand harvest.
B. Live rock aquaculture fishery	Hand harvest.
5. South Atlantic Shrimp Fishery (FMP)	Trawl.
6. South Atlantic Snapper-Grouper Fishery (FMP):	
A. Commercial fishery	A. Longline, rod and reel, bandit gear, handline, spear, powerhead.
B. Black sea bass trap and pot fishery	B. Pot, trap.
C. Wreckfish fishery	C. Rod and reel, bandit gear, handline.

Fishery	Authorized gear types
D. Recreational fishery	D. Handline, rod and reel, bandit gear, spear, powerhead.
7. South Atlantic Spiny Lobster Fishery (FMP):	
A. Commercial fishery	A. Trap, pot, dip net, bully net, snare, hand harvest.
B. Recreational fishery	B. Trap, pot, dip net, bully net, snare, hand harvest.
8. South Atlantic Coastal Migratory Pelagics Fishery (FMP):	
A. Commercial Spanish mackerel fishery	A. Handline, rod and reel, bandit gear, gillnet, cast net.
B. Commercial king mackerel fishery	B. Handline, rod and reel, bandit gear.
C. Other commercial coastal migratory pelagics fishery	C. Longline, handline, rod and reel, bandit gear.
D. Recreational fishery	D. Bandit gear, rod and reel, handline, spear.
9. Spiny Dogfish Fishery (FMP jointly managed by NEFMC and SAFMC):	
A. Gillnet fishery	A. Gillnet.
B. Trawl fishery	B. Trawl.
C. Hook and line fishery	C. Hook and line, rod and reel, spear, bandit gear.
D. Dredge fishery	D. Dredge.
E. Longline fishery	E. Longline.
F. Recreational fishery	F. Hook and line, rod and reel, spear.
10. Smooth Dogfish Fishery (Non-FMP):	
A. Gillnet fishery	A. Gillnet.
B. Trawl fishery	B. Trawl.
C. Hook and line fishery	C. Hook and line, rod and reel, spear, bandit gear.
D. Dredge fishery	D. Dredge.
E. Longline fishery	E. Longline.
F. Recreational fishery	F. Hook and line, rod and reel, spear.
11. Atlantic Menhaden Fishery (Non-FMP):	
A. Purse seine fishery	A. Purse seine.
B. Trawl fishery	B. Trawl.
C. Gillnet fishery	C. Gillnet.
D. Commercial hook-and-line	D. Hook and line fishery.
E. Recreational fishery	E. Hook and line, snagging, cast nets.
12. Atlantic Mackerel, Squid, and Butterfish Trawl Fishery (Non-FMP)	Trawl.
13. Bait Fisheries (Non-FMP)	Purse seine.
14. Weakfish Fishery (Non-FMP):	
A. Commercial fishery	A. Trawl, gillnet, hook and line.
B. Recreational fishery	B. Hook and line, spear.
15. Whelk Fishery (Non-FMP):	
A. Trawl fishery	A. Trawl.
B. Pot and trap fishery	B. Pot, trap.
C. Dredge fishery	C. Dredge.
D. Recreational fishery	D. Hand harvest.
16. Marine Life Aquarium Fishery (Non-FMP)	Dip net, slurp gun, barrier net, drop net, allowable chemical, trap, pot, trawl.
17. Calico Scallop Fishery (Non-FMP):	
A. Dredge fishery	A. Dredge.
B. Trawl fishery	B. Trawl.
C. Recreational fishery	C. Hand harvest.
18. Summer Flounder Fishery (FMP managed by MAFMC):	
A. Commercial fishery	A. Trawl, longline, handline, rod and reel, pot, trap, gillnet, dredge.
B. Recreational fishery	B. Rod and reel, handline, pot, trap, spear.
19. Bluefish, Croaker, and Flounder Trawl and Gillnet Fishery (Bluefish FMP managed by MAFMC).	Trawl, gillnet.
20. Commercial Fishery (Non-FMP)	Trawl, gillnet, longline, handline, hook and line, rod and reel, bandit gear, cast net, pot, trap, lampara net, spear.
21. Recreational Fishery (Non-FMP)	Rod and reel, handline, spear, hook and line, hand harvest, bandit gear, powerhead, gillnet, cast net.
22. Sargassum Fishery (Non-FMP)	Trawl.
23. Octopus Fishery (Non-FMP)	Trap, pot.
24. Dolphin/wahoo fishery (FMP)	Automatic reel, bandit gear, handline, pelagic longline, rod and reel, spear (including powerheads).
IV. Gulf of Mexico Fishery Management Council	
1. Gulf of Mexico Red Drum Fishery (FMP)	No harvest or possession in the EEZ.
2. Coral Reef Fishery (FMP):	
A. Commercial fishery	A. Hand harvest.
B. Recreational fishery	B. Hand harvest.
3. Gulf of Mexico Reef Fish Fishery (FMP):	
A. Snapper-Grouper reef fish longline and hook and line fishery	A. Longline, handline, bandit gear, rod and reel, buoy gear.

1. Washington, Oregon, and California Salmon Fisheries (FMP):	
A. Salmon set gillnet fishery	A. Gillnet.
B. Salmon hook and line fishery	B. Hook and line.
C. Trawl fishery	C. Trawl.
D. Recreational fishery	D. Rod and reel.
2. West Coast Groundfish Fisheries (FMP):	
A. Pacific groundfish trawl fishery	A. Trawl.
B. Set gillnet fishery	B. Gillnet.
C. Groundfish longline and setline fishery	C. Longline.
D. Groundfish handline and hook and line fishery	D. Handline, hook and line.
E. Groundfish pot and trap fishery	E. Pot, trap.
F. Recreational fishery	F. Rod and reel, handline, spear, hook and line.
3. Northern Anchovy Fishery (FMP)	Purse seine, lampara net.
4. Angel Shark, White Croaker, California Halibut, White Sea Bass, Pacific Mackerel Large-Mesh Set Net Fishery (Non-FMP)	Gillnet.
5. Thresher Shark and Swordfish Drift Gillnet Fishery (Non-FMP)	Gillnet.
6. Pacific Shrimp and Prawn Fishery (Non-FMP):	
A. Pot and trap fishery	A. Pot, trap.
B. Trawl fishery	B. Trawl.
7. Lobster and Rock Crab Pot and Trap Fishery (Non-FMP)	Pot, trap.
8. Pacific Halibut Fishery (Non-FMP):	
A. Longline and setline fishery	A. Longline.
B. Hook-and-line fishery	B. Hook and line.
9. California Halibut Trawl and Trammel Net Fishery	Trawl, trammel net.
10. Shark and Bonito Longline and Setline Fishery (Non-FMP)	Longline.
11. Dungeness Crab Pot and Trap Fishery (Non-FMP)	Pot, trap.
12. Hagfish Pot and Trap Fishery (Non-FMP)	Pot, trap.
13. Pacific Albacore and Other Tuna Hook-and-line Fishery (Non-FMP)	Hook and line.
14. Pacific Swordfish Harpoon Fishery (Non-FMP)	Harpoon.
15. Pacific Scallop Dredge Fishery (Non-FMP)	Dredge.
16. Pacific Yellowfin, Skipjack Tuna, Purse Seine Fishery, (Non-FMP)	Purse seine.
17. Market Squid Fishery (Non-FMP)	Purse seine, dip net.
18. Pacific Sardine, Pacific Mackerel, Pacific Saury, Pacific Bonito, and Jack Mackerel Purse Seine Fishery (Non-FMP)	Purse seine.
19. Finfish and Shellfish Live Trap, Hook-and-line, and Handline Fishery (Non-FMP)	Trap, handline, hook and line.
20. Recreational Fishery (Non-FMP)	Spear, trap, handline, pot, hook and line, rod and reel, hand harvest.
21. Commercial Fishery (Non-FMP)	Trawl, gillnet, hook and line, longline, handline, rod and reel, bandit gear, cast net, spear.

VII. North Pacific Fishery Management Council

1. Alaska Scallop Fishery (FMP)	Dredge.
2. Bering Sea (BS) and Aleutian Islands (AI) King and Tanner Crab Fishery (FMP):	
Pot fishery	Pot.
3. Bering Sea (BS) and Aleutian Islands (AI) King and Tanner Crab Fishery (FMP):	
Recreational fishery	Pot.
4. BS and AI Groundfish Fishery (FMP):	
A. Groundfish trawl fishery	A. Trawl.
B. Bottomfish hook-and-line, and handline fishery	B. Hook and line, handline.
C. Longline fishery	C. Longline.
D. BS and AI pot and trap fishery	D. Pot, trap.
5. BS and AI Groundfish Recreational Fishery (Non-FMP)	Handline, rod and reel, hook and line, pot, trap.
6. Gulf of Alaska (GOA) Groundfish Fishery (FMP):	
A. Groundfish trawl fishery	A. Trawl.
B. Bottomfish hook-and-line and handline fishery	B. Hook and line, handline.
C. Longline fishery	C. Longline.
D. GOA pot and trap fishery	D. Pot, trap.
E. Recreational fishery	E. Handline, rod and reel, hook and line, pot, trap.
7. Pacific Halibut Fishery (Non-FMP):	
A. Commercial (IFQ and CDQ)	A. Hook and line.
B. Recreational	B. Single line with no more than 2 hooks attached or spear.
C. Subsistence	C. Setline gear and hand held gear of not more than 30 hooks, including longline, handline, rod and reel, spear, jig, and hand-troll gear.

B. Gillnet fishery	B. Gillnet.
C. Purse seine fishery	C. Purse seine.
D. Recreational fishery	D. Handline, rod and reel, hook and line.
10. Finfish Purse Seine Fishery (Non-FMP)	Purse seine.
11. Octopus/Squid Longline Fishery (Non-FMP)	Longline.
12. Finfish Handline and Hook-and-line Fishery (Non-FMP)	Handline, hook and line.
13. Recreational Fishery (Non-FMP)	Handline, rod and reel, hook line.
14. Commercial Fishery (Non-FMP)	Trawl, gillnet, hook and line, longline, handline, rod and reel, bandit gear, cast net, spear.

VIII. Western Pacific Fishery Management Council

1. Western Pacific Crustacean Fishery (FMP)	Trap, hand harvest, hoop net.
2. Western Pacific Crustacean Fishery (Non-FMP):	
A. Commercial fishery	A. Gillnet, hand harvest, hoop net, spear, snare, trap, trawl.
B. Recreational fishery	B. Gillnet, hand harvest, hoop net, spear, snare, trap.
C. Charter fishery	C. Hand harvest, spear.
3. Western Pacific Precious Corals Fishery (FMP):	
A. Tangle net dredge fishery	A. Tangle net dredge.
B. Submersible fishery	B. Submersible.
C. Dive fishery	C. Hand harvest.
D. Recreational fishery	D. Hand harvest.
4. Western Pacific Precious Corals Fishery (Non-FMP)	Hand harvest, submersible, tangle net dredge.
5. Western Pacific Bottomfish and Seamount Groundfish Fishery (FMP):	
A. Bottomfish hook-and-line fishery	A. Bandit gear, buoy gear, handline, hook and line, rod and reel, hand harvest.
B. Seamount groundfish fishery	B. Longline, trawl.
C. Bottom longline fishery	C. Longline, hook and line.
D. Trap fishery	D. Trap.
E. Spear fishery	E. Spear, powerhead.
6. Western Pacific Bottomfish and Seamount Groundfish Fishery (Non-FMP):	
A. Commercial fishery	A. Bandit gear, buoy gear, gillnet, handline, hook-and-line, longline, rod and reel, spear, trap.
B. Recreational fishery	B. Bandit gear, buoy gear, Gillnet, handline, hook and line, longline, rod and reel, spear, trap, slurp gun, hand harvest.
C. Charter fishery	C. Bandit gear, buoy gear, handline, hook-and-line, rod and reel, spear.
7. Western Pacific Pelagics Fishery (FMP):	
A. Longline Fisher	A. Longline.
B. Hook and line fishery	B. Bandit gear, buoy gear, handline, hook and line, rod and reel.
C. Purse seine fishery	C. Lampara net, purse seine.
D. Spear fishery	D. Spear, powerhead.
8. Western Pacific Pelagics Fishery (Non-FMP):	
A. Recreational fishery	A. Bandit gear, buoy gear, dip net, handline, hook and line, hoop net, powerhead, rod and reel, spear.
B. Commercial fishery	B. Bandit gear, buoy gear, dip net, handline, hook and line, hoop net, powerhead, rod and reel, spear.
C. Charter fishery	C. Bandit gear, buoy gear, dip net, handline, hook and line, hoop net, powerhead, rod and reel, spear.
9. Western Pacific Coastal Pelagics Fishery (Non-FMP)	Bandit gear, buoy gear, dip net, gillnet, handline, hook and line, hoop net, lampara net, purse seine, rod and reel, spear.
10. Western Pacific Squid and Octopus Fishery (Non-FMP)	Bandit gear, hand harvest, hook and line, rod and reel, spear, trap.
11. Western Pacific Coral Reef Fishery (Non-FMP)	Allowable chemical, barrier net, dip net, gillnet, hand harvest, seine, slurp gun, trap, spear, rod and reel, hook and line.
12. Recreational Fishery (Non-FMP)	Rod and reel, hook and line, handline, hand harvest, spear.
13. Commercial Fishery (Non-FMP)	Trawl, gillnet, hook and line, longline, handline, rod and reel, bandit gear, cast net, spear.

IX. Secretary of Commerce

1. Atlantic Tunas, Swordfish, and Sharks Fisheries (FMP):

Fishery	Authorized gear types
A. Swordfish handgear fishery	A. Rod and reel, harpoon, handline, bandit gear.
B. Pelagic longline fishery	B. Longline.
C. Shark gillnet fishery	C. Gillnet.
D. Shark bottom longline fishery	D. Longline.
E. Shark handgear fishery	E. Rod and reel, handline, bandit gear.
F. Shark recreational fishery	F. Rod and reel, handline.
G. Tuna purse seine fishery	G. Purse seine.
H. Tuna recreational fishery	H. Rod and reel, handline.
I. Tuna handgear fishery	I. Rod and reel, harpoon, handline, bandit gear.
J. Tuna harpoon fishery	J. Harpoon.
2. Atlantic Billfish Fishery (FMP):	
Recreational fishery	Rod and reel.
3. Commercial Fisheries (Non-FMP)	Rod and reel, handline, longline, gillnet, harpoon, bandit gear, purse seine.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998; 63 FR 27217; May 18, 1998; 64 FR 4037, Jan. 27, 1999; 64 FR 29134, May 28, 1999; 64 FR 67516, Dec. 2, 1999; 68 FR 18161, Apr. 15, 2003; 68 FR 26230, May 15, 2003; 68 FR 74784, Dec. 24, 2003; 69 FR 30240, May 27, 2004]

§ 600.730 Facilitation of enforcement.

(a) *General.* The operator of, or any other person aboard, any fishing vessel subject to parts 622 through 699 of this chapter must immediately comply with instructions and signals issued by an authorized officer to stop the vessel and with instructions to facilitate safe boarding and inspection of the vessel, its gear, equipment, fishing record (where applicable), and catch for purposes of enforcing the Magnuson-Stevens Act or any other statute administered by NOAA and this chapter.

(b) *Communications.* (1) Upon being approached by a USCG vessel or aircraft, or other vessel or aircraft with an authorized officer aboard, the operator of a fishing vessel must be alert for communications conveying enforcement instructions.

(2) VHF-FM radiotelephone is the preferred method for communicating between vessels. If the size of the vessel and the wind, sea, and visibility conditions allow, a loudhailer may be used instead of the radio. Hand signals, placards, high frequency radiotelephone, or voice may be employed by an authorized officer, and message blocks may be dropped from an aircraft.

(3) If other communications are not practicable, visual signals may be transmitted by flashing light directed at the vessel signaled. USCG units will normally use the flashing light signal “L” as the signal to stop. In the International Code of Signals, “L” (—.) means “you should stop your vessel instantly.” (Period (.) means a short

flash of light; dash (–) means a long flash of light.)

(4) Failure of a vessel’s operator promptly to stop the vessel when directed to do so by an authorized officer using loudhailer, radiotelephone, flashing light signal, or other means constitutes prima facie evidence of the offense of refusal to permit an authorized officer to board.

(5) The operator of a vessel who does not understand a signal from an enforcement unit and who is unable to obtain clarification by loudhailer or radiotelephone must consider the signal to be a command to stop the vessel instantly.

(c) *Boarding.* The operator of a vessel directed to stop must:

(1) Guard Channel 16, VHF-FM, if so equipped.

(2) Stop immediately and lay to or maneuver in such a way as to allow the authorized officer and his/her party to come aboard.

(3) Except for those vessels with a freeboard of 4 ft (1.2 m) or less, provide a safe ladder, if needed, for the authorized officer and his/her party to come aboard.

(4) When necessary to facilitate the boarding or when requested by an authorized officer or observer, provide a manrope or safety line, and illumination for the ladder.

(5) Take such other actions as necessary to facilitate boarding and to ensure the safety of the authorized officer and the boarding party.

(d) *Signals*. The following signals, extracted from the International Code of Signals, may be sent by flashing light by an enforcement unit when conditions do not allow communications by loudhailer or radiotelephone. Knowledge of these signals by vessel operators is not required. However, knowledge of these signals and appropriate action by a vessel operator may preclude the necessity of sending the signal ‘L’ and the necessity for the vessel to stop instantly. (Period (.) means a short flash of light; dash (-) means a long flash of light.)

(1) ‘AA’ repeated (.-.-) is the call to an unknown station. The operator of the signaled vessel should respond by identifying the vessel by radiotelephone or by illuminating the vessel’s identification.

(2) ‘RY-CY’ (.-. -.-. -.-.) means ‘you should proceed at slow speed, a boat is coming to you.’ This signal is normally employed when conditions allow an enforcement boarding without the necessity of the vessel being boarded coming to a complete stop, or, in some cases, without retrieval of fishing gear which may be in the water.

(3) ‘SQ3’ (... —.- ...—) means ‘you should stop or heave to; I am going to board you.’

[61 FR 32540, June 24, 1996, as amended at 61 FR 37225, July 17, 1996; 63 FR 7075, Feb. 12, 1998]

§ 600.735 Penalties.

Any person committing, or fishing vessel used in the commission of a violation of the Magnuson-Stevens Act or any other statute administered by NOAA and/or any regulation issued under the Magnuson-Stevens Act, is subject to the civil and criminal penalty provisions and civil forfeiture provisions of the Magnuson-Stevens Act, to this section, to 15 CFR part 904 (Civil Procedures), and to other applicable law.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

§ 600.740 Enforcement policy.

(a) The Magnuson-Stevens Act provides four basic enforcement remedies for violations, in ascending order of severity, as follows:

(1) Issuance of a citation (a type of warning), usually at the scene of the offense (see 15 CFR part 904, subpart E).

(2) Assessment by the Administrator of a civil money penalty.

(3) For certain violations, judicial forfeiture action against the vessel and its catch.

(4) Criminal prosecution of the owner or operator for some offenses. It shall be the policy of NMFS to enforce vigorously and equitably the provisions of the Magnuson-Stevens Act by utilizing that form or combination of authorized remedies best suited in a particular case to this end.

(b) Processing a case under one remedial form usually means that other remedies are inappropriate in that case. However, further investigation or later review may indicate the case to be either more or less serious than initially considered, or may otherwise reveal that the penalty first pursued is inadequate to serve the purposes of the Magnuson-Stevens Act. Under such circumstances, the Agency may pursue other remedies either in lieu of or in addition to the action originally taken. Forfeiture of the illegal catch does not fall within this general rule and is considered in most cases as only the initial step in remedying a violation by removing the ill-gotten gains of the offense.

(c) If a fishing vessel for which a permit has been issued under the Magnuson-Stevens Act is used in the commission of an offense prohibited by section 307 of the Magnuson-Stevens Act, NOAA may impose permit sanctions, whether or not civil or criminal action has been undertaken against the vessel or its owner or operator. In some cases, the Magnuson-Stevens Act requires permit sanctions following the assessment of a civil penalty or the imposition of a criminal fine. In sum, the Magnuson-Stevens Act treats sanctions against the fishing vessel permit to be the carrying out of a purpose separate from that accomplished by civil and criminal penalties against the vessel or its owner or operator.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

§ 600.745 Scientific research activity, exempted fishing, and exempted educational activity.

(a) *Scientific research activity.* Nothing in this section is intended to inhibit or prevent any scientific research activity conducted by a scientific research vessel. Persons planning to conduct scientific research activities in the EEZ are encouraged to submit to the appropriate Regional Administrator, Director, or designee, 60 days or as soon as practicable prior to its start, a scientific research plan for each scientific cruise. The Regional Administrator, Director, or designee will acknowledge notification of scientific research activity by issuing to the operator or master of that vessel, or to the sponsoring institution, a letter of acknowledgment. This letter of acknowledgment is separate and distinct from any permit required by any other applicable law. If the Regional Administrator, Director, or designee, after review of a research plan, determines that it does not constitute scientific research but rather fishing, the Regional Administrator, Director, or designee will inform the applicant as soon as practicable and in writing. The Regional Administrator, Director, or designee may also make recommendations to revise the research plan to make the cruise acceptable as scientific research activity or recommend the applicant request an EFP. In order to facilitate identification of activity as scientific research, persons conducting scientific research activities are advised to carry a copy of the scientific research plan and the letter of acknowledgment on board the scientific research vessel. Activities conducted in accordance with a scientific research plan acknowledged by such a letter are presumed to be scientific research activity. The presumption may be overcome by showing that an activity does not fit the definition of scientific research activity or is outside the scope of the scientific research plan.

(b) *Exempted fishing*—(1) *General.* A NMFS Regional Administrator or Director may authorize, for limited testing, public display, data collection, exploratory, health and safety, environmental cleanup, and/or hazard removal purposes, the target or incidental har-

vest of species managed under an FMP or fishery regulations that would otherwise be prohibited. Exempted fishing may not be conducted unless authorized by an EFP issued by a Regional Administrator or Director in accordance with the criteria and procedures specified in this section. The Regional Administrator or Director may charge a fee to recover the administrative expenses of issuing an EFP. The amount of the fee will be calculated, at least annually, in accordance with procedures of the NOAA Handbook for determining administrative costs of each special product or service; the fee may not exceed such costs. Persons may contact the appropriate Regional Administrator or Director to find out the applicable fee.

(2) *Application.* An applicant for an EFP shall submit a completed application package to the appropriate Regional Administrator or Director, as soon as practicable and at least 60 days before the desired effective date of the EFP. Submission of an EFP application less than 60 days before the desired effective date of the EFP may result in a delayed effective date because of review requirements. The application package must include payment of any required fee as specified by paragraph (b)(1) of this section, and a written application that includes, but is not limited to, the following information:

- (i) The date of the application.
- (ii) The applicant's name, mailing address, and telephone number.
- (iii) A statement of the purposes and goals of the exempted fishery for which an EFP is needed, including justification for issuance of the EFP.
- (iv) For each vessel to be covered by the EFP, as soon as the information is available and before operations begin under the EFP:
 - (A) A copy of the USCG documentation, state license, or registration of each vessel, or the information contained on the appropriate document.
 - (B) The current name, address, and telephone number of the owner and master, if not included on the document provided for the vessel.
 - (v) The species (target and incidental) expected to be harvested under the EFP, the amount(s) of such harvest

necessary to conduct the exempted fishing, the arrangements for disposition of all regulated species harvested under the EFP, and any anticipated impacts on marine mammals or endangered species.

(vi) For each vessel covered by the EFP, the approximate time(s) and place(s) fishing will take place, and the type, size, and amount of gear to be used.

(vii) The signature of the applicant.

(viii) The Regional Administrator or Director, as appropriate, may request from an applicant additional information necessary to make the determinations required under this section. An incomplete application or an application for which the appropriate fee has not been paid will not be considered until corrected in writing and the fee paid. An applicant for an EFP need not be the owner or operator of the vessel(s) for which the EFP is requested.

(3) *Issuance.* (i) The Regional Administrator or Director, as appropriate, will review each application and will make a preliminary determination whether the application contains all of the required information and constitutes an activity appropriate for further consideration. If the Regional Administrator or Director finds that any application does not warrant further consideration, both the applicant and the affected Council(s) will be notified in writing of the reasons for the decision. If the Regional Administrator or Director determines that any application warrants further consideration, notification of receipt of the application will be published in the FEDERAL REGISTER with a brief description of the proposal, and the intent of NMFS to issue an EFP. Interested persons will be given a 15- to 45-day opportunity to comment and/or comments will be requested during public testimony at a Council meeting. The notification may establish a cut-off date for receipt of additional applications to participate in the same, or a similar, exempted fishing activity. The Regional Administrator or Director also will forward copies of the application to the Council(s), the USCG, and the appropriate fishery management agencies of affected states, accompanied by the following information:

(A) The effect of the proposed EFP on the target and incidental species, including the effect on any TAC.

(B) A citation of the regulation or regulations that, without the EFP, would prohibit the proposed activity.

(C) Biological information relevant to the proposal, including appropriate statements of environmental impacts, including impacts on marine mammals and threatened or endangered species.

(ii) If the application is complete and warrants additional consultation, the Regional Administrator or Director may consult with the appropriate Council(s) concerning the permit application during the period in which comments have been requested. The Council(s) or the Administrator or Regional Administrator shall notify the applicant in advance of any meeting at which the application will be considered, and offer the applicant the opportunity to appear in support of the application.

(iii) As soon as practicable after receiving responses from the agencies identified in paragraph (b)(3)(i) of this section, and/or after the consultation, if any, described in paragraph (b)(3)(ii) of this section, the Regional Administrator or Director shall notify the applicant in writing of the decision to grant or deny the EFP, and, if denied, the reasons for the denial. Grounds for denial of an EFP include, but are not limited to, the following:

(A) The applicant has failed to disclose material information required, or has made false statements as to any material fact, in connection with his or her application; or

(B) According to the best scientific information available, the harvest to be conducted under the permit would detrimentally affect the well-being of the stock of any regulated species of fish, marine mammal, or threatened or endangered species in a significant way; or

(C) Issuance of the EFP would have economic allocation as its sole purpose; or

(D) Activities to be conducted under the EFP would be inconsistent with the intent of this section, the management objectives of the FMP, or other applicable law; or

(E) The applicant has failed to demonstrate a valid justification for the permit; or

(F) The activity proposed under the EFP could create a significant enforcement problem.

(iv) The decision of a Regional Administrator or Director to grant or deny an EFP is the final action of NMFS. If the permit, as granted, is significantly different from the original application, or is denied, NMFS may publish notification in the FEDERAL REGISTER describing the exempted fishing to be conducted under the EFP or the reasons for denial.

(v) The Regional Administrator or Director may attach terms and conditions to the EFP consistent with the purpose of the exempted fishing, including, but not limited to:

(A) The maximum amount of each regulated species that can be harvested and landed during the term of the EFP, including trip limitations, where appropriate.

(B) The number, size(s), name(s), and identification number(s) of the vessel(s) authorized to conduct fishing activities under the EFP.

(C) The time(s) and place(s) where exempted fishing may be conducted.

(D) The type, size, and amount of gear that may be used by each vessel operated under the EFP.

(E) The condition that observers, a vessel monitoring system, or other electronic equipment be carried on board vessels operated under an EFP, and any necessary conditions, such as predeployment notification requirements.

(F) Reasonable data reporting requirements.

(G) Other conditions as may be necessary to assure compliance with the purposes of the EFP, consistent with the objectives of the FMP and other applicable law.

(H) Provisions for public release of data obtained under the EFP that are consistent with NOAA confidentiality of statistics procedures at set out in subpart E. An applicant may be required to waive the right to confidentiality of information gathered while conducting exempted fishing as a condition of an EFP.

(4) *Duration.* Unless otherwise specified in the EFP or a superseding notice or regulation, an EFP is effective for no longer than 1 year, unless revoked, suspended, or modified. EFPs may be renewed following the application procedures in this section.

(5) *Alteration.* Any permit that has been altered, erased, or mutilated is invalid.

(6) *Transfer.* EFPs issued under this section are not transferable or assignable. An EFP is valid only for the vessel(s) for which it is issued.

(7) *Inspection.* Any EFP issued under this section must be carried on board the vessel(s) for which it was issued. The EFP must be presented for inspection upon request of any authorized officer.

(8) *Sanctions.* Failure of a permittee to comply with the terms and conditions of an EFP may be grounds for revocation, suspension, or modification of the EFP with respect to all persons and vessels conducting activities under the EFP. Any action taken to revoke, suspend, or modify an EFP for enforcement purposes will be governed by 15 CFR part 904, subpart D.

(c) *Reports.* (1) Persons conducting scientific research activity are requested to submit a copy of any cruise report or other publication created as a result of the cruise, including the amount, composition, and disposition of their catch, to the appropriate Science and Research Director.

(2) Persons fishing under an EFP are required to report their catches to the appropriate Regional Administrator or Director, as specified in the EFP.

(d) *Exempted educational activities—*(1) *General.* A NMFS Regional Administrator or Director may authorize, for educational purposes, the target or incidental harvest of species managed under an FMP or fishery regulations that would otherwise be prohibited. The decision of a Regional Administrator or Director to grant or deny an exempted educational activity authorization is the final action of NMFS. Exempted educational activities may not be conducted unless authorized in writing by a Regional Administrator or Director in accordance with the criteria

and procedures specified in this section. Such authorization will be issued without charge.

(2) *Application.* An applicant for an exempted educational activity authorization shall submit to the appropriate Regional Administrator or Director, at least 15 days before the desired effective date of the authorization, a written application that includes, but is not limited to, the following information:

- (i) The date of the application.
- (ii) The applicant's name, mailing address, and telephone number.
- (iii) A brief statement of the purposes and goals of the exempted educational activity for which authorization is requested, including a general description of the arrangements for disposition of all species collected.
- (iv) Evidence that the sponsoring institution is a valid educational institution, such as accreditation by a recognized national or international accreditation body.
- (v) The scope and duration of the activity.
- (vi) For each vessel to be covered by the authorization:
 - (A) A copy of the U.S. Coast Guard documentation, state license, or registration of the vessel, or the information contained on the appropriate document.
 - (B) The current name, address, and telephone number of the owner and master, if not included on the document provided for the vessel.
- (vii) The species and amounts expected to be caught during the exempted educational activity.
- (viii) For each vessel covered by the authorization, the approximate time(s) and place(s) fishing will take place, and the type, size, and amount of gear to be used.
- (ix) The signature of the applicant.
- (x) The Regional Administrator or Director may request from an applicant additional information necessary to make the determinations required under this section. An incomplete application will not be considered until corrected in writing.

(3) *Issuance.* (i) The Regional Administrator or Director, as appropriate, will review each application and will make a determination whether the ap-

plication contains all of the required information, is consistent with the goals, objectives, and requirements of the FMP or regulations and other applicable law, and constitutes a valid exempted educational activity. The applicant will be notified in writing of the decision within 5 working days of receipt of the application.

(ii) The Regional Administrator or Director may attach terms and conditions to the authorization, consistent with the purpose of the exempted educational activity, including, but not limited to:

(A) The maximum amount of each regulated species that may be harvested.

(B) The time(s) and place(s) where the exempted educational activity may be conducted.

(C) The type, size, and amount of gear that may be used by each vessel operated under the authorization.

(D) Reasonable data reporting requirements.

(E) Such other conditions as may be necessary to assure compliance with the purposes of the authorization, consistent with the objectives of the FMP or regulations.

(F) Provisions for public release of data obtained under the authorization, consistent with NOAA confidentiality of statistics procedures in subpart E. An applicant may be required to waive the right to confidentiality of information gathered while conducting exempted educational activities as a condition of the authorization.

(iii) The authorization will specify the scope of the authorized activity and will include, at a minimum, the duration, vessel(s), species and gear involved in the activity, as well as any additional terms and conditions specified under paragraph (d)(3)(ii) of this section.

(4) *Duration.* Unless otherwise specified, authorization for an exempted educational activity is effective for no longer than 1 year, unless revoked, suspended, or modified. Authorizations may be renewed following the application procedures in this section.

(5) *Alteration.* Any authorization that has been altered, erased, or mutilated is invalid.

§ 600.746

(6) *Transfer.* Authorizations issued under this paragraph (d) are not transferable or assignable.

(7) *Inspection.* Any authorization issued under this paragraph (d) must be carried on board the vessel(s) for which it was issued or be in possession of the applicant to which it was issued while the exempted educational activity is being conducted. The authorization must be presented for inspection upon request of any authorized officer. Activities that meet the definition of fishing, despite an educational purpose, are fishing. An authorization may allow covered fishing activities; however, fishing activities conducted outside the scope of an authorization for exempted educational activities are illegal.

[61 FR 32540, June 24, 1996, as amended at 63 FR 7075, Feb. 12, 1998]

§ 600.746 Observers.

(a) *Applicability.* This section applies to any fishing vessel required to carry an observer as part of a mandatory observer program or carrying an observer as part of a voluntary observer program under the Magnuson-Stevens Act, MMPA (16 U.S.C. 1361 *et seq.*), the ATCA (16 U.S.C. 971 *et seq.*), the South Pacific Tuna Act of 1988 (16 U.S.C. 973 *et seq.*), or any other U.S. law.

(b) *Observer requirement.* An observer is not required to board, or stay aboard, a vessel that is unsafe or inadequate as described in paragraph (c) of this section.

(c) *Inadequate or unsafe vessels.* (1) A vessel is inadequate or unsafe for purposes of carrying an observer and allowing operation of normal observer functions if it does not comply with the applicable regulations regarding observer accommodations (see 50 CFR parts 229, 300, 600, 622, 635, 648, 660, and 679) or if it has not passed a USCG safety examination or inspection. A vessel that has passed a USCG safety examination or inspection must display one of the following:

(i) A current Commercial Fishing Vessel Safety Examination decal, issued within the last 2 years, that certifies compliance with regulations found in 33 CFR, chapter I and 46 CFR, chapter I;

(ii) A certificate of compliance issued pursuant to 46 CFR 28.710; or

(iii) A valid certificate of inspection pursuant to 46 U.S.C. 3311.

(2) Upon request by an observer, a NMFS employee, or a designated observer provider, a vessel owner/operator must provide correct information concerning any item relating to any safety or accommodation requirement prescribed by law or regulation. A vessel owner or operator must also allow an observer, a NMFS employee, or a designated observer provider to visually examine any such item.

(3) *Pre-trip safety check.* Prior to each observed trip, the observer is encouraged to briefly walk through the vessel's major spaces to ensure that no obviously hazardous conditions exist. In addition, the observer is encouraged to spot check the following major items for compliance with applicable USCG regulations:

(i) Personal flotation devices/immersion suits;

(ii) Ring buoys;

(iii) Distress signals;

(iv) Fire extinguishing equipment;

(v) Emergency position indicating radio beacon (EPIRB), when required; and

(vi) Survival craft, when required.

(d) *Corrective measures.* If a vessel is inadequate or unsafe for purposes of carrying an observer and allowing operation of normal observer functions, NMFS may require the vessel owner or operator either to:

(1) Submit to and pass a USCG safety examination or inspection; or

(2) Correct the deficiency that is rendering the vessel inadequate or unsafe (e.g., if the vessel is missing one personal flotation device, the owner or operator could be required to obtain an additional one), before the vessel is boarded by the observer.

(e) *Timing.* The requirements of this section apply both at the time of the observer's boarding, at all times the observer is aboard, and at the time the observer is disembarking from the vessel.

(f) *Effect of inadequate or unsafe status.* A vessel that would otherwise be

50 CFR Ch. VI (10–1–05 Edition)

Fishery Conservation and Management

§ 600.747

required to carry an observer, but is inadequate or unsafe for purposes of carrying an observer and for allowing operation of normal observer functions, is prohibited from fishing without observer coverage.

[63 FR 27217, May 18, 1998, as amended at 67 FR 64312, Oct. 18, 2002]

§ 600.747 Guidelines and procedures for determining new fisheries and gear.

(a) *General.* Section 305(a) of the Magnuson-Stevens Act requires the Secretary to prepare a list of all fisheries under the authority of each Council, or the Director in the case of Atlantic highly migratory species, and all gear used in such fisheries. This section contains guidelines in paragraph (b) for determining when fishing gear or a fishery is sufficiently different from those listed in § 600.725(v) as to require notification of a Council or the Director in order to use the gear or participate in the unlisted fishery. This section also contains procedures in paragraph (c) for notification of a Council or the Director of potentially new fisheries or gear, and for amending the list of fisheries and gear.

(b) *Guidelines.* The following guidance establishes the basis for determining when fishing gear or a fishery is sufficiently different from those listed to require notification of the appropriate Council or the Director.

(1) The initial step in the determination of whether a fishing gear or fishery is sufficiently different to require notification is to compare the gear or fishery in question to the list of authorized fisheries and gear in § 600.725(v) and to the existing gear definitions in § 600.10.

(2) If the gear in question falls within the bounds of a definition in § 600.10 for an allowable gear type within that fishery, as listed under § 600.725(v), then the gear is not considered different, is considered allowable gear, and does not require notification of the Council or Secretary 90 days before it can be used in that fishery.

(3) If, for any reason, the gear is not consistent with a gear definition for a listed fishery as described in paragraph (b)(2) of this section, the gear is considered different and requires Council or

Secretarial notification as described in paragraph (c) of this section 90 days before it can be used in that fishery.

(4) If a fishery falls within the bounds of the list of authorized fisheries and gear in § 600.725(v) under the Council's or Secretary's authority, then the fishery is not considered different, is considered an allowable fishery and does not require notification of the Council or Director before that fishery can occur.

(5) If a fishery is not already listed in the list of authorized fisheries and gear in § 600.725(v), then the fishery is considered different and requires notification as described in paragraph (c) of this section 90 days before it can occur.

(c) *Procedures.* If a gear or fishery does not appear on the list in § 600.725(v), or if the gear is different from that defined in § 600.10, the process for notification, and consideration by a Council or the Director, is as follows:

(1) *Notification.* After July 26, 1999, no person or vessel may employ fishing gear or engage in a fishery not included on the list of approved gear types in § 600.725(v) without notifying the appropriate Council or the Director at least 90 days before the intended use of that gear.

(2) *Notification procedures.* (i) A signed return receipt for the notice serves as adequate evidence of the date that the notification was received by the appropriate Council or the Director, in the case of Atlantic highly migratory species, and establishes the beginning of the 90-day notification period, unless required information in the notification is incomplete.

(ii) The notification must include:

(A) Name, address, and telephone number of the person submitting the notification.

(B) Description of the gear.

(C) The fishery or fisheries in which the gear is or will be used.

(D) A diagram and/or photograph of the gear, as well as any specifications and dimensions necessary to define the gear.

(E) The season(s) in which the gear will be fished.

(F) The area(s) in which the gear will be fished.

(G) The anticipated bycatch species associated with the gear, including protected species, such as marine mammals, sea turtles, sea birds, or species listed as endangered or threatened under the ESA.

(H) How the gear will be deployed and fished, including the portions of the marine environment where the gear will be deployed (surface, midwater, and bottom).

(iii) Failure to submit complete and accurate information will result in a delay in beginning the 90-day notification period. The 90-day notification period will not begin until the information received is determined to be accurate and complete.

(3) *Action upon receipt of notification.*

(i) *Species other than Atlantic Highly Migratory Species.* (A) Upon signing a return receipt of the notification by certified mail regarding an unlisted fishery or gear, a Council must immediately begin consideration of the notification and send a copy of the notification to the appropriate Regional Administrator.

(B) If the Council finds that the use of an unlisted gear or participation in a new fishery would not compromise the effectiveness of conservation and management efforts, it shall:

(1) Recommend to the RA that the list be amended;

(2) Provide rationale and supporting analysis, as necessary, for proper consideration of the proposed amendment; and

(3) Provide a draft proposed rule for notifying the public of the proposed addition, with a request for comment.

(C) If the Council finds that the proposed gear or fishery will be detrimental to conservation and management efforts, it will recommend to the RA that the authorized list of fisheries and gear not be amended, that a proposed rule not be published, give reasons for its recommendation of a disapproval, and may request NMFS to publish emergency or interim regulations, and begin preparation of an FMP or amendment to an FMP, if appropriate.

(D) After considering information in the notification and Council's recommendation, NMFS will decide whether to publish a proposed rule. If

information on the new gear or fishery being considered indicates it is likely that it will compromise conservation and management efforts under the Magnuson-Stevens Act, and no additional new information is likely to be gained from a public comment period, then a proposed rule will not be published and NMFS will notify the appropriate Council. In such an instance, NMFS will publish emergency or interim regulations to prohibit or restrict use of the gear or participation in the fishery. If NMFS determines that the proposed amendment is not likely to compromise conservation and management efforts under the Magnuson-Stevens Act, NMFS will publish a proposed rule in the FEDERAL REGISTER with a request for public comment.

(ii) *Atlantic Highly Migratory Species.* (A) Upon signing a return receipt of the notification by certified mail regarding an unlisted fishery or gear for Atlantic highly migratory species (HMS), NMFS will immediately begin consideration of the notification.

(B) Based on information in the notification and submitted by the Council, NMFS will make a determination whether the use of an unlisted gear or participation in an unlisted HMS fishery will compromise the effectiveness of conservation and management efforts under the Magnuson-Stevens Act. If it is determined that the proposed amendment will not compromise conservation and management efforts, NMFS will publish a proposed rule.

(C) If NMFS finds that the proposed gear or fishery will be detrimental to conservation and management efforts in this initial stage of review, it will not publish a proposed rule and notify the applicant of the negative determination with the reasons therefor.

(4) *Final determination and publication of a final rule.* Following public comment, NMFS will approve or disapprove the amendment to the list of gear and fisheries.

(i) If approved, NMFS will publish a final rule in the FEDERAL REGISTER and notify the applicant and the Council, if appropriate, of the final approval.

(ii) If disapproved, NMFS will withdraw the proposed rule, notify the applicant and the Council, if appropriate, of the disapproval; publish emergency

Fishery Conservation and Management

§ 600.752

or interim regulations, if necessary, to prohibit or restrict the use of gear or the participation in a fishery; and either notify the Council of the need to amend an FMP or prepare an amendment to an FMP in the case of Atlantic highly migratory species.

[64 FR 4043, Jan. 27, 1999]

Subpart I—Fishery Negotiation Panels

SOURCE: 62 FR 23669, May 1, 1997, unless otherwise noted.

§ 600.750 Definitions.

Consensus means unanimous concurrence among the members on a Fishery Negotiation Panel established under this rule, unless such Panel:

- (1) Agrees to define such term to mean a general but not unanimous concurrence; or
- (2) agrees upon another specified definition.

Fishery negotiation panel (FNP) means an advisory committee established by one or more Councils or the Secretary in accordance with these regulations to assist in the development of fishery conservation and management measures.

Interest means, with respect to an issue or matter, multiple parties that have a similar point of view or that are likely to be affected in a similar manner.

Report means a document submitted by an FNP in accordance with the Magnuson-Stevens Act.

[62 FR 23669, May 1, 1997, as amended at 63 FR 7075, Feb. 12, 1998]

§ 600.751 Determination of need for a fishery negotiation panel.

A Council or NMFS may establish an FNP to assist in the development of specific fishery conservation and management measures. In determining whether to establish an FNP, NMFS or the Council, as appropriate, shall consider whether:

- (a) There is a need for specific fishery conservation and management measures.
- (b) There are a limited number of identifiable interests that will be sig-

nificantly affected by the conservation and management measure.

(c) There is a reasonable likelihood that an FNP can be convened with a balanced representation of persons who:

(1) Can adequately represent the interests identified under paragraph (b) of this section.

(2) Are willing to negotiate in good faith to reach a consensus on a report regarding the issues presented.

(d) There is a reasonable likelihood that an FNP will reach

a consensus on a report regarding the issues presented within 1 year from date of establishment of the FNP.

(e) The use of an FNP will not unreasonably delay Council or NMFS fishery management plan development or rule-making procedures.

(f) The costs of establishment and operation of an FNP are reasonable when compared to fishery management plan development or rulemaking procedures that do not use FNP procedures.

(g) The Council or NMFS has adequate resources and is willing to commit such resources, including technical assistance, to an FNP.

(h) The use of an FNP is in the public interest.

§ 600.752 Use of conveners and facilitators.

(a) *Purposes of conveners.* A Council or NMFS may use the services of a trained convenueer to assist the Council or NMFS in: (1) Conducting discussions to identify the issues of concern, and to ascertain whether the establishment of an FNP regarding such matter is feasible and appropriate.

(2) Identifying persons who will be significantly affected by the issues presented in paragraph (a)(1) of this section.

(b) *Duties of conveners.* The convenueer shall report findings under paragraph (a)(2) of this section and shall make recommendations to the Council or NMFS. Upon request of the Council or NMFS, the convenueer shall ascertain the names of persons who are willing and qualified to represent interests that will be significantly affected by the potential conservation and management measures relevant to the issues to be negotiated. The report and

any recommendations of the convener shall be made available to the public upon request.

(c) *Selection of facilitator.* Notwithstanding section 10(e) of the Federal Advisory Committee Act (FACA), a Council or NMFS may nominate a person trained in facilitation either from the Federal Government or from outside the Federal Government to serve as an impartial, neutral facilitator for the negotiations of the FNP, subject to the approval of the FNP, by consensus. The facilitator may be the same person as the convener used under paragraph (a) of this section. If the FNP does not approve the nominee of the Council or NMFS for facilitator, the FNP shall submit a substitute nomination. If an FNP does not approve any nominee of the Council or NMFS for facilitator, the FNP shall select, by consensus, a person to serve as facilitator. A person designated to represent the Council or NMFS in substantive issues may not serve as facilitator or otherwise chair the FNP.

(d) *Roles and duties of facilitator.* A facilitator shall:

(1) Chair the meetings of the FNP in an impartial manner.

(2) Impartially assist the members of the FNP in conducting discussions and negotiations.

(3) Manage the keeping of minutes and records as required under section 10(b) and (c) of FACA.

§ 600.753 Notice of intent to establish a fishery negotiation panel.

(a) *Publication of notice.* If, after considering the report of a convener or conducting its own assessment, a Council or NMFS decides to establish an FNP, NMFS shall publish in the FEDERAL REGISTER and, as appropriate, in trade or other specialized publications, a document that shall include:

(1) An announcement that the Council or NMFS intends to establish an FNP to negotiate and develop a report concerning specific conservation and management measures.

(2) A description of the subject and scope of the conservation and management measure, and the issues to be considered.

(3) A list of the interests that are likely to be significantly affected by

the conservation and management measure.

(4) A list of the persons proposed to represent such interests and the person or persons proposed to represent the Council or NMFS.

(5) A proposed agenda and schedule for completing the work of the FNP.

(6) A description of administrative support for the FNP to be provided by the Council or NMFS, including technical assistance.

(7) A solicitation for comments on the proposal to establish the FNP, and the proposed membership of the FNP.

(8) An explanation of how a person may apply or nominate another person for membership on the FNP, as provided under paragraph (b) of this section.

(b) *Nomination of members and public comment.* Persons who may be significantly affected by the development of conservation and management measure and who believe that their interests will not be adequately represented by any person specified in a document under paragraph (a)(4) of this section may apply for, or nominate another person for, membership on the FNP to represent such interests. Each application or nomination shall include:

(1) The name of the applicant or nominee and a description of the interests such person shall represent.

(2) Evidence that the applicant or nominee is authorized to represent parties related to the interests the person proposes to represent.

(3) A written commitment that the applicant or nominee shall actively participate in good faith in the development of the conservation and management measure under consideration.

(4) The reasons that the persons specified in the document under paragraph (a)(4) of this section do not adequately represent the interests of the person submitting the application or nomination.

(c) *Public comment.* The Council or NMFS shall provide at least 30 calendar days for the submission of comments and applications under this section.

Fishery Conservation and Management

§ 600.757

§ 600.754 Decision to establish a fishery negotiation panel.

(a) *Determination to establish an FNP.* If, after considering comments and applications submitted under § 600.753, the Council or NMFS determines that an FNP can adequately represent the interests that will be significantly affected and that it is feasible and appropriate in the particular case, the Council or NMFS may establish an FNP.

(b) *Determination not to establish FNP.* If, after considering such comments and applications, the Council or NMFS decides not to establish an FNP, the Council or NMFS shall promptly publish notification of such decision and the reasons therefor in the FEDERAL REGISTER and, as appropriate, in trade or other specialized publications, a copy of which shall be sent to any person who applied for, or nominated another person for membership on the FNP to represent such interests with respect to the issues of concern.

§ 600.755 Establishment of a fishery negotiation panel.

(a) *General authority.* (1) A Council may establish an FNP to assist in the development of specific conservation and management measures for a fishery under its authority.

(2) NMFS may establish an FNP to assist in the development of specific conservation and management measures required for:

(i) A fishery for which the Secretary has authority under section 304(e)(5) of the Magnuson-Stevens Act, regarding rebuilding of overfished fisheries;

(ii) A fishery for which the Secretary has authority under 16 U.S.C. section 304(g), regarding highly migratory species; or

(iii) Any fishery with the approval of the appropriate Council.

(b) *Federal Advisory Committee Act (FACA)* In establishing and administering such an FNP, the Council or NMFS shall comply with the FACA with respect to such FNP.

(c) *Balance.* Each potentially affected organization or individual does not necessarily have to have its own representative, but each interest must be adequately represented. The intent is to have a group that as a whole reflects a proper balance and mix of interests.

Representatives must agree, in writing, to negotiate in good faith.

(d) *Membership.* The Council or NMFS shall limit membership on an FNP to no more than 25 members, unless the Council or NMFS determines that a greater number of members is necessary for the functioning of the FNP or to achieve balanced membership. Each FNP shall include at least one person representing the Council in addition to at least one person representing NMFS.

§ 600.756 Conduct and operation of a fishery negotiation panel.

(a) *Roles and duties of an FNP.* Each FNP shall consider the issue proposed by the Council or NMFS for consideration and shall attempt to reach a consensus concerning a report to assist in the development of a conservation and management measure with respect to such matter and any other matter the FNP determines is relevant to the development of a conservation and management measure. An FNP may adopt procedures for the operation of the FNP.

(b) *Roles and duties of representative of the council or NMFS.* The person or persons representing the Council or NMFS on an FNP shall participate in the deliberations and activities of the FNP with the same rights and responsibilities as other members of the FNP, and shall be authorized to fully represent the Council or NMFS in the discussions and negotiations of the FNP.

§ 600.757 Operational protocols.

(a) *Services of conveners and facilitators.* A Council or NMFS may employ or enter into contracts for the services of an individual or organization to serve as a convener or facilitator for an FNP established under § 600.755, or may use the services of a government employee to act as a convener or a facilitator for such an FNP.

(b) *Councils.* For an FNP proposed and established by one or more Councils approved expenses shall be paid out of the Council's operating budget.

(c) *Expenses of FNP members.* Members of an FNP shall be responsible for their own expenses of participation in such an FNP, except that NMFS or the

§ 600.758

Council may, in accordance with section 7(d) of FACA, pay for a member's reasonable travel and per diem expenses, and a reasonable rate of compensation, if:

(1) Such member certifies a lack of adequate financial resources to participate in the FNP.

(2) The Council or NMFS determines that such member's participation in the FNP is necessary to assure an adequate representation of the member's interest.

(d) *Administrative support.* The Council or NMFS shall provide appropriate administrative support to an FNP including technical assistance.

§ 600.758 Preparation of report.

(a) At the conclusion of the negotiations, an FNP may submit a report. Such report shall specify:

(1) All the areas where consensus was reached by the FNP, including, if appropriate, proposed conservation and management measures.

(2) Any other information submitted by members of the FNP.

(b) Upon receipt of the report, the Council or NMFS shall publish such report in the FEDERAL REGISTER for public comment.

§ 600.759 Use of report.

A Council or NMFS may, at its discretion, use all or a part of a report prepared in accordance with § 600.758 in the development of conservation and management measures. Neither a Council nor NMFS, whichever is appropriate, is required to use such report.

§ 600.760 Fishery Negotiation Panel lifetime.

(a) An FNP shall terminate upon either:

(1) Submission of a report prepared in accordance with § 600.758; or

(2) Submission of a written statement from the FNP to the Council or NMFS that no consensus can be reached.

(b) In no event shall an FNP exist for longer than 1 year from the date of establishment unless granted an extension. Upon written request by the FNP to the Council or NMFS, and written authorization from the Council or NMFS (whichever is appropriate), the

50 CFR Ch. VI (10–1–05 Edition)

Secretary may authorize an extension for a period not to exceed 6 months. No more than one extension may be granted per FNP.

Subpart J—Essential Fish Habitat (EFH)

SOURCE: 67 FR 2376, Jan. 17, 2002, unless otherwise noted.

§ 600.805 Purpose and scope.

(a) *Purpose.* This subpart provides guidelines for Councils and the Secretary to use in adding the required EFH provisions to an FMP, i.e., description and identification of EFH, adverse effects on EFH (including minimizing, to the extent practicable, adverse effects from fishing), and actions to conserve and enhance EFH.

(b) *Scope*—(1) *Species covered.* An EFH provision in an FMP must include all fish species in the fishery management unit (FMU). An FMP may describe, identify, and protect the habitat of species not in an FMU; however, such habitat may not be considered EFH for the purposes of sections 303(a)(7) and 305(b) of the Magnuson-Stevens Act.

(2) *Geographic.* EFH may be described and identified in waters of the United States, as defined in 33 CFR 328.3, and in the exclusive economic zone, as defined in § 600.10. Councils may describe, identify, and protect habitats of managed species beyond the exclusive economic zone; however, such habitat may not be considered EFH for the purposes of sections 303(a)(7) and 305(b) of the Magnuson-Stevens Act. Activities that may adversely affect such habitat can be addressed through any process conducted in accordance with international agreements between the United States and the foreign nation(s) undertaking or authorizing the action.

§ 600.810 Definitions and word usage.

(a) *Definitions.* In addition to the definitions in the Magnuson-Stevens Act and § 600.10, the terms in this subpart have the following meanings:

Adverse effect means any impact that reduces quality and/or quantity of EFH. Adverse effects may include direct or indirect physical, chemical, or biological alterations of the waters or substrate and loss of, or injury to,

benthic organisms, prey species and their habitat, and other ecosystem components, if such modifications reduce the quality and/or quantity of EFH. Adverse effects to EFH may result from actions occurring within EFH or outside of EFH and may include site-specific or habitat-wide impacts, including individual, cumulative, or synergistic consequences of actions.

Council includes the Secretary, as applicable, when preparing FMPs or amendments under sections 304(c) and (g) of the Magnuson-Stevens Act.

Ecosystem means communities of organisms interacting with one another and with the chemical and physical factors making up their environment.

Habitat areas of particular concern means those areas of EFH identified pursuant to § 600.815(a)(8).

Healthy ecosystem means an ecosystem where ecological productive capacity is maintained, diversity of the flora and fauna is preserved, and the ecosystem retains the ability to regulate itself. Such an ecosystem should be similar to comparable, undisturbed ecosystems with regard to standing crop, productivity, nutrient dynamics, trophic structure, species richness, stability, resilience, contamination levels, and the frequency of diseased organisms.

Overfished means any stock or stock complex, the status of which is reported as overfished by the Secretary pursuant to section 304(e)(1) of the Magnuson-Stevens Act.

(b) *Word usage.* The terms “must”, “shall”, “should”, “may”, “may not”, “will”, “could”, and “can” are used in the same manner as in § 600.305(c).

§ 600.815 Contents of Fishery Management Plans.

(a) *Mandatory contents—(1) Description and identification of EFH—(i) Overview.* FMPs must describe and identify EFH in text that clearly states the habitats or habitat types determined to be EFH for each life stage of the managed species. FMPs should explain the physical, biological, and chemical characteristics of EFH and, if known, how these characteristics influence the use of EFH by the species/life stage. FMPs must identify the specific geographic

location or extent of habitats described as EFH. FMPs must include maps of the geographic locations of EFH or the geographic boundaries within which EFH for each species and life stage is found.

(ii) *Habitat information by life stage.* (A) Councils need basic information to understand the usage of various habitats by each managed species. Pertinent information includes the geographic range and habitat requirements by life stage, the distribution and characteristics of those habitats, and current and historic stock size as it affects occurrence in available habitats. FMPs should summarize the life history information necessary to understand each species' relationship to, or dependence on, its various habitats, using text, tables, and figures, as appropriate. FMPs should document patterns of temporal and spatial variation in the distribution of each major life stage (defined by developmental and functional shifts) to aid in understanding habitat needs. FMPs should summarize (e.g., in tables) all available information on environmental and habitat variables that control or limit distribution, abundance, reproduction, growth, survival, and productivity of the managed species. The information should be supported with citations.

(B) Councils should obtain information to describe and identify EFH from the best available sources, including peer-reviewed literature, unpublished scientific reports, data files of government resource agencies, fisheries landing reports, and other sources of information. Councils should consider different types of information according to its scientific rigor. FMPs should identify species-specific habitat data gaps and deficits in data quality (including considerations of scale and resolution; relevance; and potential biases in collection and interpretation). FMPs must demonstrate that the best scientific information available was used in the description and identification of EFH, consistent with national standard 2.

(iii) *Analysis of habitat information.* (A) The following approach should be used to organize the information necessary to describe and identify EFH.

(1) *Level 1: Distribution data are available for some or all portions of the geographic range of the species.* At this level, only distribution data are available to describe the geographic range of a species (or life stage). Distribution data may be derived from systematic presence/absence sampling and/or may include information on species and life stages collected opportunistically. In the event that distribution data are available only for portions of the geographic area occupied by a particular life stage of a species, habitat use can be inferred on the basis of distributions among habitats where the species has been found and on information about its habitat requirements and behavior. Habitat use may also be inferred, if appropriate, based on information on a similar species or another life stage.

(2) *Level 2: Habitat-related densities of the species are available.* At this level, quantitative data (i.e., density or relative abundance) are available for the habitats occupied by a species or life stage. Because the efficiency of sampling methods is often affected by habitat characteristics, strict quality assurance criteria should be used to ensure that density estimates are comparable among methods and habitats. Density data should reflect habitat utilization, and the degree that a habitat is utilized is assumed to be indicative of habitat value. When assessing habitat value on the basis of fish densities in this manner, temporal changes in habitat availability and utilization should be considered.

(3) *Level 3: Growth, reproduction, or survival rates within habitats are available.* At this level, data are available on habitat-related growth, reproduction, and/or survival by life stage. The habitats contributing the most to productivity should be those that support the highest growth, reproduction, and survival of the species (or life stage).

(4) *Level 4: Production rates by habitat are available.* At this level, data are available that directly relate the production rates of a species or life stage to habitat type, quantity, quality, and location. Essential habitats are those necessary to maintain fish production consistent with a sustainable fishery and the managed species' contribution to a healthy ecosystem.

(B) Councils should strive to describe habitat based on the highest level of detail (i.e., Level 4). If there is no information on a given species or life stage, and habitat usage cannot be inferred from other means, such as information on a similar species or another life stage, EFH should not be designated.

(iv) *EFH determination.* (A) Councils should analyze available ecological, environmental, and fisheries information and data relevant to the managed species, the habitat requirements by life stage, and the species' distribution and habitat usage to describe and identify EFH. The information described in paragraphs (a)(1)(ii) and (iii) of this section will allow Councils to assess the relative value of habitats. Councils should interpret this information in a risk-averse fashion to ensure adequate areas are identified as EFH for managed species. Level 1 information, if available, should be used to identify the geographic range of the species at each life stage. If only Level 1 information is available, distribution data should be evaluated (e.g., using a frequency of occurrence or other appropriate analysis) to identify EFH as those habitat areas most commonly used by the species. Level 2 through 4 information, if available, should be used to identify EFH as the habitats supporting the highest relative abundance; growth, reproduction, or survival rates; and/or production rates within the geographic range of a species. FMPs should explain the analyses conducted to distinguish EFH from all habitats potentially used by a species.

(B) FMPs must describe EFH in text, including reference to the geographic location or extent of EFH using boundaries such as longitude and latitude, isotherms, isobaths, political boundaries, and major landmarks. If there are differences between the descriptions of EFH in text, maps, and tables, the textual description is ultimately determinative of the limits of EFH. Text and tables should explain pertinent physical, chemical, and biological characteristics of EFH for the managed species and explain any variability in habitat usage patterns, but the boundaries of EFH should be static.

(C) If a species is overfished and habitat loss or degradation may be contributing to the species being identified as overfished, all habitats currently used by the species may be considered essential in addition to certain historic habitats that are necessary to support rebuilding the fishery and for which restoration is technologically and economically feasible. Once the fishery is no longer considered overfished, the EFH identification should be reviewed and amended, if appropriate.

(D) Areas described as EFH will normally be greater than or equal to aquatic areas that have been identified as "critical habitat" for any managed species listed as threatened or endangered under the Endangered Species Act.

(E) Ecological relationships among species and between the species and their habitat require, where possible, that an ecosystem approach be used in determining the EFH of a managed species. EFH must be designated for each managed species, but, where appropriate, may be designated for assemblages of species or life stages that have similar habitat needs and requirements. If grouping species or using species assemblages for the purpose of designating EFH, FMPs must include a justification and scientific rationale. The extent of the EFH should be based on the judgment of the Secretary and the appropriate Council(s) regarding the quantity and quality of habitat that are necessary to maintain a sustainable fishery and the managed species' contribution to a healthy ecosystem.

(F) If degraded or inaccessible aquatic habitat has contributed to reduced yields of a species or assemblage and if, in the judgment of the Secretary and the appropriate Council(s), the degraded conditions can be reversed through such actions as improved fish passage techniques (for stream or river blockages), improved water quality measures (removal of contaminants or increasing flows), and similar measures that are technologically and economically feasible, EFH should include those habitats that would be necessary to the species to obtain increased yields.

(v) *EFH mapping requirements.* (A) FMPs must include maps that display, within the constraints of available information, the geographic locations of EFH or the geographic boundaries within which EFH for each species and life stage is found. Maps should identify the different types of habitat designated as EFH to the extent possible. Maps should explicitly distinguish EFH from non-EFH areas. Councils should confer with NMFS regarding mapping standards to ensure that maps from different Councils can be combined and shared efficiently and effectively. Ultimately, data used for mapping should be incorporated into a geographic information system (GIS) to facilitate analysis and presentation.

(B) Where the present distribution or stock size of a species or life stage is different from the historical distribution or stock size, then maps of historical habitat boundaries should be included in the FMP, if known.

(C) FMPs should include maps of any habitat areas of particular concern identified under paragraph (a)(8) of this section.

(2) *Fishing activities that may adversely affect EFH*—(i) *Evaluation.* Each FMP must contain an evaluation of the potential adverse effects of fishing on EFH designated under the FMP, including effects of each fishing activity regulated under the FMP or other Federal FMPs. This evaluation should consider the effects of each fishing activity on each type of habitat found within EFH. FMPs must describe each fishing activity, review and discuss all available relevant information (such as information regarding the intensity, extent, and frequency of any adverse effect on EFH; the type of habitat within EFH that may be affected adversely; and the habitat functions that may be disturbed), and provide conclusions regarding whether and how each fishing activity adversely affects EFH. The evaluation should also consider the cumulative effects of multiple fishing activities on EFH. The evaluation should list any past management actions that minimize potential adverse effects on EFH and describe the benefits of those actions to EFH. The evaluation should give special attention to

adverse effects on habitat areas of particular concern and should identify for possible designation as habitat areas of particular concern any EFH that is particularly vulnerable to fishing activities. Additionally, the evaluation should consider the establishment of research closure areas or other measures to evaluate the impacts of fishing activities on EFH. In completing this evaluation, Councils should use the best scientific information available, as well as other appropriate information sources. Councils should consider different types of information according to its scientific rigor.

(ii) *Minimizing adverse effects.* Each FMP must minimize to the extent practicable adverse effects from fishing on EFH, including EFH designated under other Federal FMPs. Councils must act to prevent, mitigate, or minimize any adverse effects from fishing, to the extent practicable, if there is evidence that a fishing activity adversely affects EFH in a manner that is more than minimal and not temporary in nature, based on the evaluation conducted pursuant to paragraph (a)(2)(i) of this section and/or the cumulative impacts analysis conducted pursuant to paragraph (a)(5) of this section. In such cases, FMPs should identify a range of potential new actions that could be taken to address adverse effects on EFH, include an analysis of the practicability of potential new actions, and adopt any new measures that are necessary and practicable. Amendments to the FMP or to its implementing regulations must ensure that the FMP continues to minimize to the extent practicable adverse effects on EFH caused by fishing. FMPs must explain the reasons for the Council's conclusions regarding the past and/or new actions that minimize to the extent practicable the adverse effects of fishing on EFH.

(iii) *Practicability.* In determining whether it is practicable to minimize an adverse effect from fishing, Councils should consider the nature and extent of the adverse effect on EFH and the long and short-term costs and benefits of potential management measures to EFH, associated fisheries, and the nation, consistent with national standard 7. In determining whether management

measures are practicable, Councils are not required to perform a formal cost/benefit analysis.

(iv) Options for managing adverse effects from fishing. Fishery management options may include, but are not limited to:

(A) *Fishing equipment restrictions.* These options may include, but are not limited to: seasonal and areal restrictions on the use of specified equipment, equipment modifications to allow escapement of particular species or particular life stages (e.g., juveniles), prohibitions on the use of explosives and chemicals, prohibitions on anchoring or setting equipment in sensitive areas, and prohibitions on fishing activities that cause significant damage to EFH.

(B) *Time/area closures.* These actions may include, but are not limited to: closing areas to all fishing or specific equipment types during spawning, migration, foraging, and nursery activities and designating zones for use as marine protected areas to limit adverse effects of fishing practices on certain vulnerable or rare areas/species/life stages, such as those areas designated as habitat areas of particular concern.

(C) *Harvest limits.* These actions may include, but are not limited to, limits on the take of species that provide structural habitat for other species assemblages or communities and limits on the take of prey species.

(3) *Non-Magnuson-Stevens Act fishing activities that may adversely affect EFH.* FMPs must identify any fishing activities that are not managed under the Magnuson-Stevens Act that may adversely affect EFH. Such activities may include fishing managed by state agencies or other authorities.

(4) *Non-fishing related activities that may adversely affect EFH.* FMPs must identify activities other than fishing that may adversely affect EFH. Broad categories of such activities include, but are not limited to: dredging, filling, excavation, mining, impoundment, discharge, water diversions, thermal additions, actions that contribute to non-point source pollution and sedimentation, introduction of potentially hazardous materials, introduction of exotic species, and the conversion of

aquatic habitat that may eliminate, diminish, or disrupt the functions of EFH. For each activity, the FMP should describe known and potential adverse effects to EFH.

(5) *Cumulative impacts analysis.* Cumulative impacts are impacts on the environment that result from the incremental impact of an action when added to other past, present, and reasonably foreseeable future actions, regardless of who undertakes such actions. Cumulative impacts can result from individually minor, but collectively significant actions taking place over a period of time. To the extent feasible and practicable, FMPs should analyze how the cumulative impacts of fishing and non-fishing activities influence the function of EFH on an ecosystem or watershed scale. An assessment of the cumulative and synergistic effects of multiple threats, including the effects of natural stresses (such as storm damage or climate-based environmental shifts) and an assessment of the ecological risks resulting from the impact of those threats on EFH, also should be included.

(6) *Conservation and enhancement.* FMPs must identify actions to encourage the conservation and enhancement of EFH, including recommended options to avoid, minimize, or compensate for the adverse effects identified pursuant to paragraphs (a)(3) through (5) of this section, especially in habitat areas of particular concern.

(7) *Prey species.* Loss of prey may be an adverse effect on EFH and managed species because the presence of prey makes waters and substrate function as feeding habitat, and the definition of EFH includes waters and substrate necessary to fish for feeding. Therefore, actions that reduce the availability of a major prey species, either through direct harm or capture, or through adverse impacts to the prey species' habitat that are known to cause a reduction in the population of the prey species, may be considered adverse effects on EFH if such actions reduce the quality of EFH. FMPs should list the major prey species for the species in the fishery management unit and discuss the location of prey species' habitat. Adverse effects on prey species and their

habitats may result from fishing and non-fishing activities.

(8) *Identification of habitat areas of particular concern.* FMPs should identify specific types or areas of habitat within EFH as habitat areas of particular concern based on one or more of the following considerations:

(i) The importance of the ecological function provided by the habitat.

(ii) The extent to which the habitat is sensitive to human-induced environmental degradation.

(iii) Whether, and to what extent, development activities are, or will be, stressing the habitat type.

(iv) The rarity of the habitat type.

(9) *Research and information needs.* Each FMP should contain recommendations, preferably in priority order, for research efforts that the Councils and NMFS view as necessary to improve upon the description and identification of EFH, the identification of threats to EFH from fishing and other activities, and the development of conservation and enhancement measures for EFH.

(10) *Review and revision of EFH components of FMPs.* Councils and NMFS should periodically review the EFH provisions of FMPs and revise or amend EFH provisions as warranted based on available information. FMPs should outline the procedures the Council will follow to review and update EFH information. The review of information should include, but not be limited to, evaluating published scientific literature and unpublished scientific reports; soliciting information from interested parties; and searching for previously unavailable or inaccessible data. Councils should report on their review of EFH information as part of the annual Stock Assessment and Fishery Evaluation (SAFE) report prepared pursuant to § 600.315(e). A complete review of all EFH information should be conducted as recommended by the Secretary, but at least once every 5 years.

(b) *Development of EFH recommendations for Councils.* After reviewing the best available scientific information, as well as other appropriate information, and in consultation with the Councils, participants in the fishery,

interstate commissions, Federal agencies, state agencies, and other interested parties, NMFS will develop written recommendations to assist each Council in the identification of EFH, adverse impacts to EFH, and actions that should be considered to ensure the conservation and enhancement of EFH for each FMP. NMFS will provide such recommendations for the initial incorporation of EFH information into an FMP and for any subsequent modification of the EFH components of an FMP. The NMFS EFH recommendations may be provided either before the Council's development of a draft EFH document or later as a review of a draft EFH document developed by a Council, as appropriate.

(c) *Relationship to other fishery management authorities.* Councils are encouraged to coordinate with state and interstate fishery management agencies where Federal fisheries affect state and interstate managed fisheries or where state or interstate fishery regulations affect the management of Federal fisheries. Where a state or interstate fishing activity adversely affects EFH, NMFS will consider that action to be an adverse effect on EFH pursuant to paragraph (a)(3) of this section and will provide EFH Conservation Recommendations to the appropriate state or interstate fishery management agency on that activity.

Subpart K—EFH Coordination, Consultation, and Recommendations

SOURCE: 67 FR 2376, Jan. 17, 2002, unless otherwise noted.

§ 600.905 Purpose, scope, and NMFS/Council cooperation.

(a) *Purpose.* These procedures address the coordination, consultation, and recommendation requirements of sections 305(b)(1)(D) and 305(b)(2–4) of the Magnuson-Stevens Act. The purpose of these procedures is to promote the protection of EFH in the review of Federal and state actions that may adversely affect EFH.

(b) *Scope.* Section 305(b)(1)(D) of the Magnuson-Stevens Act requires the Secretary to coordinate with, and provide information to, other Federal

agencies regarding the conservation and enhancement of EFH. Section 305(b)(2) requires all Federal agencies to consult with the Secretary on all actions or proposed actions authorized, funded, or undertaken by the agency that may adversely affect EFH. Sections 305(b)(3) and (4) direct the Secretary and the Councils to provide comments and EFH Conservation Recommendations to Federal or state agencies on actions that affect EFH. Such recommendations may include measures to avoid, minimize, mitigate, or otherwise offset adverse effects on EFH resulting from actions or proposed actions authorized, funded, or undertaken by that agency. Section 305(b)(4)(B) requires Federal agencies to respond in writing to such comments. The following procedures for coordination, consultation, and recommendations allow all parties involved to understand and implement the requirements of the Magnuson-Stevens Act.

(c) *Cooperation between Councils and NMFS.* The Councils and NMFS should cooperate closely to identify actions that may adversely affect EFH, to develop comments and EFH Conservation Recommendations to Federal and state agencies, and to provide EFH information to Federal and state agencies. NMFS will work with each Council to share information and to coordinate Council and NMFS comments and recommendations on actions that may adversely affect EFH. However, NMFS and the Councils also have the authority to act independently.

§ 600.910 Definitions and word usage.

(a) *Definitions.* In addition to the definitions in the Magnuson-Stevens Act and § 600.10, the terms in this subpart have the following meanings:

Adverse effect means any impact that reduces quality and/or quantity of EFH. Adverse effects may include direct or indirect physical, chemical, or biological alterations of the waters or substrate and loss of, or injury to, benthic organisms, prey species and their habitat, and other ecosystem components, if such modifications reduce the quality and/or quantity of EFH. Adverse effects to EFH may result from actions occurring within

EFH or outside of EFH and may include site-specific or habitat-wide impacts, including individual, cumulative, or synergistic consequences of actions.

Anadromous fishery resource under Council authority means an anadromous species managed under an FMP.

Federal action means any action authorized, funded, or undertaken, or proposed to be authorized, funded, or undertaken by a Federal agency.

Habitat areas of particular concern means those areas of EFH identified pursuant to § 600.815(a)(8).

State action means any action authorized, funded, or undertaken, or proposed to be authorized, funded, or undertaken by a state agency.

(b) *Word usage.* The terms “must”, “shall”, “should”, “may”, “may not”, “will”, “could”, and “can” are used in the same manner as in § 600.305(c).

§ 600.915 Coordination for the conservation and enhancement of EFH.

To further the conservation and enhancement of EFH in accordance with section 305(b)(1)(D) of the Magnuson-Stevens Act, NMFS will compile and make available to other Federal and state agencies, and the general public, information on the locations of EFH, including maps and/or narrative descriptions. NMFS will also provide information on ways to improve ongoing Federal operations to promote the conservation and enhancement of EFH. Federal and state agencies empowered to authorize, fund, or undertake actions that may adversely affect EFH are encouraged to contact NMFS and the Councils to become familiar with areas designated as EFH, potential threats to EFH, and opportunities to promote the conservation and enhancement of EFH.

§ 600.920 Federal agency consultation with the Secretary.

(a) *Consultation generally*—(1) *Actions requiring consultation.* Pursuant to section 305(b)(2) of the Magnuson-Stevens Act, Federal agencies must consult with NMFS regarding any of their actions authorized, funded, or undertaken, or proposed to be authorized, funded, or undertaken that may adversely affect EFH. EFH consultation

is not required for actions that were completed prior to the approval of EFH designations by the Secretary, e.g., issued permits. Consultation is required for renewals, reviews, or substantial revisions of actions if the renewal, review, or revision may adversely affect EFH. Consultation on Federal programs delegated to non-Federal entities is required at the time of delegation, review, and renewal of the delegation. EFH consultation is required for any Federal funding of actions that may adversely affect EFH. NMFS and Federal agencies responsible for funding actions that may adversely affect EFH should consult on a programmatic level under paragraph (j) of this section, if appropriate, with respect to these actions. Consultation is required for emergency Federal actions that may adversely affect EFH, such as hazardous material clean-up, response to natural disasters, or actions to protect public safety. Federal agencies should contact NMFS early in emergency response planning, but may consult after-the-fact if consultation on an expedited basis is not practicable before taking the action.

(2) *Approaches for conducting consultation.* Federal agencies may use one of the five approaches described in paragraphs (f) through (j) of this section to fulfill the EFH consultation requirements. The selection of a particular approach for handling EFH consultation depends on the nature and scope of the actions that may adversely affect EFH. Federal agencies should use the most efficient approach for EFH consultation that is appropriate for a given action or actions. The five approaches are: use of existing environmental review procedures, General Concurrence, abbreviated consultation, expanded consultation, and programmatic consultation.

(3) *Early notification and coordination.* The Federal agency should notify NMFS in writing as early as practicable regarding actions that may adversely affect EFH. Notification will facilitate discussion of measures to conserve EFH. Such early coordination should occur during pre-application planning for projects subject to a Federal permit or license and during preliminary planning for projects to be

funded or undertaken directly by a Federal agency.

(b) *Designation of lead agency.* If more than one Federal agency is responsible for a Federal action, the consultation requirements of sections 305(b)(2) through (4) of the Magnuson-Stevens Act may be fulfilled through a lead agency. The lead agency should notify NMFS in writing that it is representing one or more additional agencies. Alternatively, if one Federal agency has completed an EFH consultation for an action and another Federal agency acts separately to authorize, fund, or undertake the same activity (such as issuing a permit for an activity that was funded via a separate Federal action), the completed EFH consultation may suffice for both Federal actions if it adequately addresses the adverse effects of the actions on EFH. Federal agencies may need to consult with NMFS separately if, for example, only one of the agencies has the authority to implement measures necessary to minimize adverse effects on EFH and that agency does not act as the lead agency.

(c) *Designation of non-Federal representative.* A Federal agency may designate a non-Federal representative to conduct an EFH consultation by giving written notice of such designation to NMFS. If a non-Federal representative is used, the Federal action agency remains ultimately responsible for compliance with sections 305(b)(2) and 305(b)(4)(B) of the Magnuson-Stevens Act.

(d) *Best available information.* The Federal agency and NMFS must use the best scientific information available regarding the effects of the action on EFH and the measures that can be taken to avoid, minimize, or offset such effects. Other appropriate sources of information may also be considered.

(e) *EFH Assessments—(1) Preparation requirement.* For any Federal action that may adversely affect EFH, Federal agencies must provide NMFS with a written assessment of the effects of that action on EFH. For actions covered by a General Concurrence under paragraph (g) of this section, an EFH Assessment should be completed during the development of the General Concurrence and is not required for the in-

dividual actions. For actions addressed by a programmatic consultation under paragraph (j) of this section, an EFH Assessment should be completed during the programmatic consultation and is not required for individual actions implemented under the program, except in those instances identified by NMFS in the programmatic consultation as requiring separate EFH consultation. Federal agencies are not required to provide NMFS with assessments regarding actions that they have determined would not adversely affect EFH. Federal agencies may incorporate an EFH Assessment into documents prepared for other purposes such as Endangered Species Act (ESA) Biological Assessments pursuant to 50 CFR part 402 or National Environmental Policy Act (NEPA) documents and public notices pursuant to 40 CFR part 1500. If an EFH Assessment is contained in another document, it must include all of the information required in paragraph (e)(3) of this section and be clearly identified as an EFH Assessment. The procedure for combining an EFH consultation with other environmental reviews is set forth in paragraph (f) of this section.

(2) *Level of detail.* The level of detail in an EFH Assessment should be commensurate with the complexity and magnitude of the potential adverse effects of the action. For example, for relatively simple actions involving minor adverse effects on EFH, the assessment may be very brief. Actions that may pose a more serious threat to EFH warrant a correspondingly more detailed EFH Assessment.

(3) *Mandatory contents.* The assessment must contain:

- (i) A description of the action.
- (ii) An analysis of the potential adverse effects of the action on EFH and the managed species.
- (iii) The Federal agency's conclusions regarding the effects of the action on EFH.

(iv) Proposed mitigation, if applicable.

(4) *Additional information.* If appropriate, the assessment should also include:

- (i) The results of an on-site inspection to evaluate the habitat and the site-specific effects of the project.

(ii) The views of recognized experts on the habitat or species that may be affected.

(iii) A review of pertinent literature and related information.

(iv) An analysis of alternatives to the action. Such analysis should include alternatives that could avoid or minimize adverse effects on EFH.

(v) Other relevant information.

(5) *Incorporation by reference.* The assessment may incorporate by reference a completed EFH Assessment prepared for a similar action, supplemented with any relevant new project specific information, provided the proposed action involves similar impacts to EFH in the same geographic area or a similar ecological setting. It may also incorporate by reference other relevant environmental assessment documents. These documents must be provided to NMFS with the EFH Assessment.

(f) *Use of existing environmental review procedures—(1) Purpose and criteria.* Consultation and commenting under sections 305(b)(2) and 305(b)(4) of the Magnuson-Stevens Act should be consolidated, where appropriate, with interagency consultation, coordination, and environmental review procedures required by other statutes, such as NEPA, the Fish and Wildlife Coordination Act, Clean Water Act, ESA, and Federal Power Act. The requirements of sections 305(b)(2) and 305(b)(4) of the Magnuson-Stevens Act, including consultations that would be considered to be abbreviated or expanded consultations under paragraphs (h) and (i) of this section, can be combined with existing procedures required by other statutes if such processes meet, or are modified to meet, the following criteria:

(i) The existing process must provide NMFS with timely notification of actions that may adversely affect EFH. The Federal agency should notify NMFS according to the same timeframes for notification (or for public comment) as in the existing process. Whenever possible, NMFS should have at least 60 days notice prior to a final decision on an action, or at least 90 days if the action would result in substantial adverse impacts. NMFS and the action agency may agree to use shorter timeframes provided that they

allow sufficient time for NMFS to develop EFH Conservation Recommendations.

(ii) Notification must include an assessment of the impacts of the action on EFH that meets the requirements for EFH Assessments contained in paragraph (e) of this section. If the EFH Assessment is contained in another document, the Federal agency must identify that section of the document as the EFH Assessment.

(iii) NMFS must have made a finding pursuant to paragraph (f)(3) of this section that the existing process can be used to satisfy the requirements of sections 305(b)(2) and 305(b)(4) of the Magnuson-Stevens Act.

(2) *NMFS response to Federal agency.* If an existing environmental review process is used to fulfill the EFH consultation requirements, the comment deadline for that process should apply to the submittal of NMFS EFH Conservation Recommendations under section 305(b)(4)(A) of the Magnuson-Stevens Act, unless NMFS and the Federal agency agree to a different deadline. If NMFS EFH Conservation Recommendations are combined with other NMFS or NOAA comments on a Federal action, such as NOAA comments on a draft Environmental Impact Statement, the EFH Conservation Recommendations will be clearly identified as such (e.g., a section in the comment letter entitled “EFH Conservation Recommendations”) and a Federal agency response pursuant to section 305(b)(4)(B) of the Magnuson-Stevens Act is required for only the identified portion of the comments.

(3) *NMFS finding.* A Federal agency with an existing environmental review process should contact NMFS at the appropriate level (regional offices for regional processes, headquarters office for national processes) to discuss how to combine the EFH consultation requirements with the existing process, with or without modifications. If, at the conclusion of these discussions, NMFS determines that the existing or modified process meets the criteria of paragraph (f)(1) of this section, NMFS will make a finding that the process can be used to satisfy the EFH consultation requirements of the Magnuson-Stevens Act. If NMFS does not

make such a finding, or if there are no existing consultation processes relevant to the Federal agency's actions, the agency and NMFS should follow one of the approaches for consultation discussed in the following sections.

(g) *General Concurrence*—(1) *Purpose*. A General Concurrence identifies specific types of Federal actions that may adversely affect EFH, but for which no further consultation is generally required because NMFS has determined, through an analysis of that type of action, that it will likely result in no more than minimal adverse effects individually and cumulatively. General Concurrences may be national or regional in scope.

(2) *Criteria*. (i) For Federal actions to qualify for General Concurrence, NMFS must determine that the actions meet all of the following criteria:

(A) The actions must be similar in nature and similar in their impact on EFH.

(B) The actions must not cause greater than minimal adverse effects on EFH when implemented individually.

(C) The actions must not cause greater than minimal cumulative adverse effects on EFH.

(ii) Actions qualifying for General Concurrence must be tracked to ensure that their cumulative effects are no more than minimal. In most cases, tracking actions covered by a General Concurrence will be the responsibility of the Federal agency. However, NMFS may agree to track such actions. Tracking should include numbers of actions and the amount and type of habitat adversely affected, and should specify the baseline against which the actions will be tracked. The agency responsible for tracking such actions should make the information available to NMFS, the applicable Council(s), and to the public on an annual basis.

(iii) Categories of Federal actions may also qualify for General Concurrence if they are modified by appropriate conditions that ensure the actions will meet the criteria in paragraph (g)(2)(i) of this section. For example, NMFS may provide General Concurrence for additional actions contingent upon project size limitations, seasonal restrictions, or other conditions.

(iv) If a General Concurrence is proposed for actions that may adversely affect habitat areas of particular concern, the General Concurrence should be subject to a higher level of scrutiny than a General Concurrence not involving a habitat area of particular concern.

(3) *General Concurrence development*. A Federal agency may request a General Concurrence for a category of its actions by providing NMFS with an EFH Assessment containing a description of the nature and approximate number of the actions, an analysis of the effects of the actions on EFH, including cumulative effects, and the Federal agency's conclusions regarding the magnitude of such effects. If NMFS agrees that the actions fit the criteria in paragraph (g)(2)(i) of this section, NMFS will provide the Federal agency with a written statement of General Concurrence that further consultation is not required. If NMFS does not agree that the actions fit the criteria in paragraph (g)(2)(i) of this section, NMFS will notify the Federal agency that a General Concurrence will not be issued and that another type of consultation will be required. If NMFS identifies specific types of Federal actions that may meet the requirements for a General Concurrence, NMFS may initiate and complete a General Concurrence.

(4) *Further consultation*. NMFS may request notification for actions covered under a General Concurrence if NMFS concludes there are circumstances under which such actions could result in more than a minimal impact on EFH, or if it determines that there is no process in place to adequately assess the cumulative impacts of actions covered under the General Concurrence. NMFS may request further consultation for these actions on a case-by-case basis. Each General Concurrence should establish specific procedures for further consultation, if appropriate.

(5) *Notification*. After completing a General Concurrence, NMFS will provide a copy to the appropriate Council(s) and will make the General Concurrence available to the public by posting the document on the internet or through other appropriate means.

(6) *Revisions.* NMFS will periodically review and revise its General Concurrences, as appropriate.

(h) *Abbreviated consultation procedures—(1) Purpose and criteria.* Abbreviated consultation allows NMFS to determine quickly whether, and to what degree, a Federal action may adversely affect EFH. Federal actions that may adversely affect EFH should be addressed through the abbreviated consultation procedures when those actions do not qualify for a General Concurrence, but do not have the potential to cause substantial adverse effects on EFH. For example, the abbreviated consultation procedures should be used when the adverse effect(s) of an action could be alleviated through minor modifications.

(2) *Notification by agency and submittal of EFH Assessment.* Abbreviated consultation begins when NMFS receives from the Federal agency an EFH Assessment in accordance with paragraph (e) of this section and a written request for consultation.

(3) *NMFS response to Federal agency.* If NMFS determines, contrary to the Federal agency's assessment, that an action would not adversely affect EFH, or if NMFS determines that no EFH Conservation Recommendations are needed, NMFS will notify the Federal agency either informally or in writing of its determination. If NMFS believes that the action may result in substantial adverse effects on EFH, or that additional analysis is needed to assess the effects of the action, NMFS will request in writing that the Federal agency initiate expanded consultation. Such request will explain why NMFS believes expanded consultation is needed and will specify any new information needed. If expanded consultation is not necessary, NMFS will provide EFH Conservation Recommendations, if appropriate, pursuant to section 305(b)(4)(A) of the Magnuson-Stevens Act.

(4) *Timing.* The Federal agency must submit its EFH Assessment to NMFS as soon as practicable, but at least 60 days prior to a final decision on the action. NMFS must respond in writing within 30 days. NMFS and the Federal agency may agree to use a compressed schedule in cases where regulatory ap-

provals or emergency situations cannot accommodate 30 days for consultation, or to conduct consultation earlier in the planning cycle for actions with lengthy approval processes.

(i) *Expanded consultation procedures—(1) Purpose and criteria.* Expanded consultation allows maximum opportunity for NMFS and the Federal agency to work together to review the action's impacts on EFH and to develop EFH Conservation Recommendations. Expanded consultation procedures must be used for Federal actions that would result in substantial adverse effects to EFH. Federal agencies are encouraged to contact NMFS at the earliest opportunity to discuss whether the adverse effects of an action make expanded consultation appropriate.

(2) *Notification by agency and submittal of EFH Assessment.* Expanded consultation begins when NMFS receives from the Federal agency an EFH Assessment in accordance with paragraph (e) of this section and a written request for expanded consultation. Federal agencies are encouraged to provide in the EFH Assessment the additional information identified under paragraph (e)(4) of this section to facilitate review of the effects of the action on EFH.

(3) *NMFS response to Federal agency.* NMFS will:

(i) Review the EFH Assessment, any additional information furnished by the Federal agency, and other relevant information.

(ii) Conduct a site visit, if appropriate, to assess the quality of the habitat and to clarify the impacts of the Federal agency action. Such a site visit should be coordinated with the Federal agency and appropriate Council(s), if feasible.

(iii) Coordinate its review of the action with the appropriate Council(s).

(iv) Discuss EFH Conservation Recommendations with the Federal agency and provide such recommendations to the Federal agency, pursuant to section 305(b)(4)(A) of the Magnuson-Stevens Act.

(4) *Timing.* The Federal agency must submit its EFH Assessment to NMFS as soon as practicable, but at least 90 days prior to a final decision on the action. NMFS must respond within 60

days of submittal of a complete EFH Assessment unless consultation is extended by agreement between NMFS and the Federal agency. NMFS and Federal agencies may agree to use a compressed schedule in cases where regulatory approvals or emergency situations cannot accommodate 60 days for consultation, or to conduct consultation earlier in the planning cycle for actions with lengthy approval processes.

(5) *Extension of consultation.* If NMFS determines that additional data or analysis would provide better information for development of EFH Conservation Recommendations, NMFS may request additional time for expanded consultation. If NMFS and the Federal agency agree to an extension, the Federal agency should provide the additional information to NMFS, to the extent practicable. If NMFS and the Federal agency do not agree to extend consultation, NMFS must provide EFH Conservation Recommendations to the Federal agency using the best scientific information available to NMFS.

(j) *Programmatic consultation*—(1) *Purpose.* Programmatic consultation provides a means for NMFS and a Federal agency to consult regarding a potentially large number of individual actions that may adversely affect EFH. Programmatic consultation will generally be the most appropriate option to address funding programs, large-scale planning efforts, and other instances where sufficient information is available to address all reasonably foreseeable adverse effects on EFH of an entire program, parts of a program, or a number of similar individual actions occurring within a given geographic area.

(2) *Process.* A Federal agency may request programmatic consultation by providing NMFS with an EFH Assessment in accordance with paragraph (e) of this section. The description of the proposed action in the EFH Assessment should describe the program and the nature and approximate number (annually or by some other appropriate time frame) of the actions. NMFS may also initiate programmatic consultation by requesting pertinent information from a Federal agency.

(3) *NMFS response to Federal agency.* NMFS will respond to the Federal agency with programmatic EFH Conservation Recommendations and, if applicable, will identify any potential adverse effects that could not be addressed programmatically and require project-specific consultation. NMFS may also determine that programmatic consultation is not appropriate, in which case all EFH Conservation Recommendations will be deferred to project-specific consultations. If appropriate, NMFS' response may include a General Concurrence for activities that qualify under paragraph (g) of this section.

(k) *Responsibilities of Federal agency following receipt of EFH Conservation Recommendations*—(1) *Federal agency response.* As required by section 305(b)(4)(B) of the Magnuson-Stevens Act, the Federal agency must provide a detailed response in writing to NMFS and to any Council commenting on the action under section 305(b)(3) of the Magnuson-Stevens Act within 30 days after receiving an EFH Conservation Recommendation from NMFS. Such a response must be provided at least 10 days prior to final approval of the action if the response is inconsistent with any of NMFS' EFH Conservation Recommendations, unless NMFS and the Federal agency have agreed to use alternative time frames for the Federal agency response. The response must include a description of measures proposed by the agency for avoiding, mitigating, or offsetting the impact of the activity on EFH. In the case of a response that is inconsistent with NMFS Conservation Recommendations, the Federal agency must explain its reasons for not following the recommendations, including the scientific justification for any disagreements with NMFS over the anticipated effects of the action and the measures needed to avoid, minimize, mitigate, or offset such effects.

(2) *Further review of decisions inconsistent with NMFS or Council recommendations.* If a Federal agency decision is inconsistent with a NMFS EFH Conservation Recommendation, the Assistant Administrator for Fisheries may request a meeting with the head of the Federal agency, as well as with

any other agencies involved, to discuss the action and opportunities for resolving any disagreements. If a Federal agency decision is also inconsistent with a Council recommendation made pursuant to section 305(b)(3) of the Magnuson-Stevens Act, the Council may request that the Assistant Administrator initiate further review of the Federal agency's decision and involve the Council in any interagency discussion to resolve disagreements with the Federal agency. The Assistant Administrator will make every effort to accommodate such a request. NMFS may develop written procedures to further define such review processes.

(1) *Supplemental consultation.* A Federal agency must reinstitute consultation with NMFS if the agency substantially revises its plans for an action in a manner that may adversely affect EFH or if new information becomes available that affects the basis for NMFS EFH Conservation Recommendations.

§ 600.925 NMFS EFH Conservation Recommendations to Federal and state agencies.

(a) *General.* Under section 305(b)(4)(A) of the Magnuson-Stevens Act, NMFS is required to provide EFH Conservation Recommendations to Federal and state agencies for actions that would adversely affect EFH. NMFS will not recommend that state or Federal agencies take actions beyond their statutory authority.

(b) *Recommendations to Federal agencies.* For Federal actions, EFH Conservation Recommendations will be provided to Federal agencies as part of EFH consultations conducted pursuant to § 600.920. If NMFS becomes aware of a Federal action that would adversely affect EFH, but for which a Federal agency has not initiated an EFH consultation, NMFS may request that the Federal agency initiate EFH consultation, or NMFS will provide EFH Conservation Recommendations based on the information available.

(c) *Recommendations to state agencies—*
(1) *Establishment of procedures.* The Magnuson-Stevens Act does not require state agencies to consult with the Secretary regarding EFH. NMFS will use existing coordination procedures or es-

tablish new procedures to identify state actions that may adversely affect EFH, and to determine the most appropriate method for providing EFH Conservation Recommendations to state agencies.

(2) *Coordination with states on recommendations to Federal agencies.* When an action that would adversely affect EFH is authorized, funded, or undertaken by both Federal and state agencies, NMFS will provide the appropriate state agencies with copies of EFH Conservation Recommendations developed as part of the Federal consultation procedures in § 600.920. NMFS will also seek agreements on sharing information and copies of recommendations with Federal or state agencies conducting similar consultation and recommendation processes to ensure coordination of such efforts.

(d) *Coordination with Councils.* NMFS will coordinate with each Council to identify the types of actions on which Councils intend to comment pursuant to section 305(b)(3) of the Magnuson-Stevens Act. For such actions NMFS will share pertinent information with the Council, including copies of NMFS' EFH Conservation Recommendations.

§ 600.930 Council comments and recommendations to Federal and state agencies.

Under section 305(b)(3) of the Magnuson-Stevens Act, Councils may comment on and make recommendations to the Secretary and any Federal or state agency concerning any activity or proposed activity authorized, funded, or undertaken by the agency that, in the view of the Council, may affect the habitat, including EFH, of a fishery resource under its authority. Councils must provide such comments and recommendations concerning any activity that, in the view of the Council, is likely to substantially affect the habitat, including EFH, of an anadromous fishery resource under Council authority.

(a) *Establishment of procedures.* Each Council should establish procedures for reviewing Federal or state actions that may adversely affect the habitat, including EFH, of a species under its authority. Each Council may receive information on actions of concern by methods such as directing Council staff

to track proposed actions, recommending that the Council's habitat committee identify actions of concern, or entering into an agreement with NMFS to have the appropriate Regional Administrator notify the Council of actions of concern that would adversely affect EFH. Federal and state actions often follow specific timetables which may not coincide with Council meetings. Therefore, Councils should consider establishing abbreviated procedures for the development of Council recommendations.

(b) *Early involvement.* Councils should provide comments and recommendations on proposed state and Federal actions of concern as early as practicable in project planning to ensure thorough consideration of Council concerns by the action agency. Each Council should provide NMFS with copies of its comments and recommendations to state and Federal agencies.

Subpart L—Fishing Capacity Reduction Framework

AUTHORITY: 16 U.S.C. 1861a(b)–(e).

SOURCE: 65 FR 31443, May 18, 2000, unless otherwise noted.

§ 600.1000 Definitions.

In addition to the definitions in the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) and in § 600.10 of this title, the terms used in this subpart have the following meanings:

Address of Record means the business address of a person, partnership, or corporation. Addresses listed on permits or other NMFS records are presumed to be business addresses, unless clearly indicated otherwise.

Bid means the price a vessel owner or reduction fishery permit holder requests for reduction of his/her fishing capacity. It is an irrevocable offer in response to the invitation to bid in § 600.1009.

Borrower means, individually and collectively, each post-reduction fishing permit holder and/or fishing vessel owner fishing in the reduction fishery.

Business plan means the document containing the information specified in § 600.1003(n) and required to be sub-

mitted with a request for a financed program.

Business week means a 7-day period, Saturday through Friday.

Controlling fishery management plan or program (CFMP) means either any fishery management plan or any state fishery management plan or program, including amendments to the plan or program, pursuant to which a fishery is managed.

Delivery value means:

- (1) For unprocessed fish, all compensation that a fish buyer pays to a fish seller in exchange for fee fish; and
- (2) For processed fish, all compensation that a fish buyer would have paid to a fish seller in exchange for fee fish if the fee fish had been unprocessed fish instead of processed fish.

Delivery value encompasses fair market value, as defined herein, and includes the value of all in-kind compensation or all other goods or services exchanged in lieu of cash. It is synonymous with the statutory term “ex-vessel value” as used in section 312 of the Magnuson Act.

Deposit principal means all collected fee revenue that a fish buyer deposits in a segregated account maintained at a federally insured financial institution for the sole purpose of aggregating collected fee revenue before sending the fee revenue to NMFS for repaying a reduction loan.

Fair market value means the amount that a buyer pays a seller in an arm's length transaction or, alternatively, would pay a seller if the transaction were at arm's length.

Fee means the amount that fish buyers deduct from the delivery value under a financed reduction program. The fee is the delivery value times the reduction fishery's applicable fee rate under section 600.1013.

Fee fish means all fish harvested from a reduction fishery involving a financed program during the period in which any amount of the reduction loan remains unpaid. The term fee fish excludes fish harvested incidentally while fishing for fish not included in the reduction fishery.

Final development plan means the document NMFS prepares, under

Fishery Conservation and Management

§ 600.1000

§ 600.1006(b) and based on the preliminary development plan the requester submits, for a subsidized program.

Financed means funded, in any part, by a reduction loan.

Fish buyer means the first ex-vessel party who:

(1) in an arm's-length transaction, purchases fee fish from a fish seller;

(2) takes fish on consignment from a fish seller; or

(3) otherwise receives fish from a fish seller in a non arm's-length transaction.

Fish delivery means the point at which a fish buyer first purchases fee fish or takes possession of fee fish from a fish seller.

Fishing capacity reduction specifications means the minimum amount of fishing capacity reduction and the maximum amount of reduction loan principal specified in a business plan.

Fish seller means the party who harvests and first sells or otherwise delivers fee fish to a fish buyer.

Fishery Management Plan (FMP) means any Federal fishery management plan, including amendments to the plan, that the Secretary of Commerce approves or adopts pursuant to section 303 of the Magnuson-Stevens Act.

Fund means the Fishing Capacity Reduction Fund, and each subaccount for each program, established in the U.S. Treasury for the deposit into, and disbursement from, all funds, including all reduction loan capital and all fee revenue, involving each program.

Implementation plan means the plan in § 600.1008 for carrying out each program.

Implementation regulations mean the regulations in § 600.1008 for carrying out each program.

Net delivery value means the delivery value minus the fee.

Post-bidding referendum means a referendum that follows bidding under § 600.1009.

Post-reduction means after a program reduces fishing capacity in a reduction fishery.

Pre-bidding referendum means a referendum that occurs at any time after a request for a financed program but before a proposal under § 600.1008 of a

implementation plan and implementation regulations.

Preliminary development plan means the document specified in § 600.1005(g) and required to be submitted with a request for a subsidized program.

Processed fish means fish in any form different from the form in which the fish existed at the time the fish was first harvested, unless any such difference in form represents, in the reduction fishery involved, the standard ex-vessel form upon which fish sellers and fish buyers characteristically base the delivery value of unprocessed fish.

Program means each instance of reduction under this subpart, in each reduction fishery—starting with a request and ending, for a financed program, with full reduction loan repayment.

Reduction means the act of reducing fishing capacity under any program.

Reduction amendment means any amendment, or, where appropriate, framework adjustment, to a CFMP that may be necessary for a program to meet the requirements of this subpart.

Reduction amendment specifications mean the reduction amendment to a CFMP specified in a business plan.

Reduction contract means the invitation to bid under § 600.1009, together with each bidder's irrevocable offer and NMFS' conditional or non-conditional acceptance of each such bid under § 600.1009.

Reduction cost means the total dollar amount of all reduction payments to fishing permit owners, fishing vessel owners, or both, in a reduction fishery.

Reduction fishery means the fishery or portion of a fishery to which a program applies. The reduction fishery must specify each included species, as well as any limitations by gear type, fishing vessel size, geographic area, and any other relevant factor(s).

Reduction loan means a loan, under section 1111 and section 1112 of Title XI of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1279f and g App.), for financing any portion, or all, of a financed program's reduction cost and repayable by a fee under, and in accordance with, § 600.1012, § 600.1013, and § 600.1014.

§ 600.1001

50 CFR Ch. VI (10–1–05 Edition)

Reduction payment means the Federal Government's fishing capacity reduction payment to a fishing permit owner, fishing vessel owner, or both, under a reduction contract. Additionally, it is payment for reduction to each bidder whose bid NMFS accepts under § 600.1009. In a financed program each reduction payment constitutes a disbursement of a reduction loan's proceeds and is for either revoking a fishing permit or both revoking a fishing permit and withdrawing a vessel from fishing either by scrapping or title restriction.

Reduction permit means any fishing permit revoked in a program in exchange for a reduction payment under a reduction contract.

Reduction vessel means any fishing vessel withdrawn from fishing either by scrapping or title restriction in exchange for a reduction payment under a reduction contract.

Referendum means the voting process under § 600.1010 for approving the fee system for repaying a reduction loan.

Request means a request, under § 600.1001, for a program.

Requester means a Council for a fishery identified in § 600.1001(c), a state governor for a fishery identified in § 600.1001(d), or the Secretary for a fishery identified in § 600.1001(e).

Scrap means to completely and permanently reduce a fishing vessel's hull, superstructures, and other fixed structural components to fragments having value, if any, only as raw materials for reprocessing or for other non-fisheries use.

Subsidized means wholly funded by anything other than a reduction loan.

Treasury percentage means the annual percentage rate at which NMFS must pay interest to the U.S. Treasury on any principal amount that NMFS borrows from the U.S. Treasury in order to generate the funds with which to later disburse a reduction loan's principal amount.

Unprocessed fish means fish in the same form as the fish existed at the time the fish was harvested, unless any difference in form represents, in the reduction fishery involved, the standard ex-vessel form upon which fish sellers and fish buyers characteristically base the delivery value of unprocessed fish.

Vote means a vote in a referendum.

§ 600.1001 Requests.

(a) A Council or the Governor of a State under whose authority a proposed reduction fishery is subject may request that NMFS conduct a program in that fishery. Each request shall be in writing and shall be submitted to the Director, Office of Sustainable Fisheries, NMFS. Each request shall satisfy the requirements of § 600.1003 or § 600.1005, as applicable, and enable NMFS to make the determinations required by § 600.1004 or § 600.1006, as applicable.

(b) NMFS cannot conduct a program in any fishery subject to the jurisdiction of a Council or a state unless NMFS first receives a request from the Council or the governor to whose jurisdiction the fishery is subject.

(c) For a fishery subject to the jurisdiction of a Council, only that Council can or must make the request. If the fishery is subject to the jurisdiction of two or more Councils, those Councils must make a joint request. No Council may make a request, or join in making a request, until after the Council conducts a public hearing about the request.

(d) For a fishery subject to the jurisdiction of a State, only the Governor of that State can make the request. If the fishery is subject to the jurisdiction of two or more states, the Governors of those States shall make a joint request. No Governor of a State may make a request, or join in making a request, until the State conducts a public hearing about the request.

(e) For a fishery under the direct management authority of the Secretary, NMFS may conduct a program on NMFS' own motion by fulfilling the requirements of this subpart that reasonably apply to a program not initiated by a request.

(f) Where necessary to accommodate special circumstances in a particular fishery, NMFS may waive, as NMFS deems necessary and appropriate, compliance with any specific requirements under this subpart not required by statute.

Fishery Conservation and Management

§ 600.1003

§ 600.1002 General requirements.

(a) Each program must be: (1) Necessary to prevent or end overfishing, rebuild stocks of fish, or achieve measurable and significant improvements in the conservation and management of the reduction fishery;

(2) Accompanied by the appropriate environmental, economic and/or socioeconomic analyses, in accordance with applicable statutes, regulations, or other authorities; and

(3) Consistent with the CFMP, including any reduction amendment, for the reduction fishery.

(b) Each CFMP for a reduction fishery must: (1) Prevent the replacement of fishing capacity removed by the program through a moratorium on new entrants, restrictions on vessel upgrades, and other effort control measures, taking into account the full potential fishing capacity of the fleet;

(2) Establish a specified or target total allowable catch or other measures that trigger closure of the fishery or adjustments to reduce catch; and

(3) Include, for a financed program in a reduction fishery involving only a portion of a fishery, appropriate provisions for the post-reduction allocation of fish between the reduction fishery and the rest of the fishery that both protect the borrower's reduction investment in the program and support the borrower's ability to repay the reduction loan.

§ 600.1003 Content of a request for a financed program.

A request for a financed program shall:

(a) Specify the reduction fishery.

(b) Project the amount of the reduction and specify what a reduction of that amount achieves in the reduction fishery.

(c) Specify whether the program is to be wholly or partially financed and, if the latter, specify the amount and describe the availability of all funding from sources other than a reduction loan.

(d) Project the availability of all Federal appropriation authority or other funding, if any, that the financed program requires, including the time at which funding from each source will be available and how that relates to

the time at which elements of the reduction process are projected to occur.

(e) Demonstrate how the program meets, or will meet after an appropriate reduction amendment, the requirements in § 600.1002(a).

(f) Demonstrate how the CFMP meets, or will meet after an appropriate reduction amendment, the requirements in § 600.1002(b).

(g) If a reduction amendment is necessary, include an actual reduction amendment or the requester's endorsement in principle of the reduction amendment specifications in the business plan. Endorsement in principle is non-binding.

(h) Request that NMFS conduct, at the appropriate time, a referendum under § 600.1010 of this subpart.

(i) List the names and addresses of record of all fishing permit or fishing vessel owners who are currently authorized to harvest fish from the reduction fishery, excluding those whose authority is limited to incidentally harvesting fish from the reduction fishery during directed fishing for fish not in the reduction fishery. The list shall be based on the best information available to the requester. The list shall take into account any limitation by type of fishing gear operated, size of fishing vessel operated, geographic area of operation, or other factor that the proposed program involves. The list may include any relevant information that NMFS may supply to the requester.

(j) Specify the aggregate total allowable catch in the reduction fishery during each of the preceding 5 years and the aggregate portion of such catch harvested by the parties listed under paragraph (i) of this section.

(k) Specify the criteria for determining the types and number of fishing permits or fishing permits and fishing vessels that are eligible for reduction under the program. The criteria shall take into account:

(1) The characteristics of the fishery;

(2) Whether the program is limited to a particular gear type within the reduction fishery or is otherwise limited by size of fishing vessel operated, geographic area of operation, or other factor;

§ 600.1003

50 CFR Ch. VI (10–1–05 Edition)

(3) Whether the program is limited to fishing permits or involves both fishing permits and fishing vessels;

(4) The reduction amendment required;

(5) The needs of fishing communities;

(6) Minimizing the program's reduction cost; and

(7) All other relevant factors.

(l) Include the requester's assessment of the program's potential impact on fisheries other than the reduction fishery, including an evaluation of the likely increase in participation or effort in such other fisheries, the general economic impact on such other fisheries, and recommendations that could mitigate, or enable such other fisheries to mitigate, any undesirable impacts.

(m) Include any other information or guidance that would assist NMFS in developing an implementation plan and implementation regulations.

(n) Include a business plan, prepared by, or on behalf of, knowledgeable and concerned harvesters in the reduction fishery, that:

(1) Specifies a detailed reduction methodology that accomplishes the maximum sustained reduction in the reduction fishery's fishing capacity at the least reduction cost and in the minimum period of time, and otherwise achieves the program result that the requester specifies under paragraph (b) of this section. The methodology shall:

(i) Establish the appropriate point for NMFS to conduct a pre-bidding referendum and be sufficiently detailed to enable NMFS to readily:

(A) Design, propose, and adopt a timely and reliable implementation plan,

(B) Propose and issue timely and reliable implementation regulations,

(C) Invite bids,

(D) Accept or reject bids, and

(E) Complete a program in accordance with this subpart, and

(ii) Address, consistently with this subpart:

(A) The contents and terms of invitations to bid,

(B) Bidder eligibility,

(C) The type of information that bidders shall supply,

(D) The criteria for accepting or rejecting bids,

(E) The terms of bid acceptances,

(F) Any referendum procedures in addition to, but consistent with, those in § 600.1010, and

(G) All other technical matters necessary to conduct a program;

(2) Projects and supports the reduction fishery's annual delivery value during the reduction loan's repayment period based on documented analysis of actual representative experience for a reasonable number of past years in the reduction fishery;

(3) Includes the fishing capacity reduction specifications upon which both the pre-bidding referendum and the bidding under § 600.1009 will be based. The reduction loan's maximum principal amount cannot, at the interest rate projected to prevail at the time of reduction, exceed the principal amount that can be amortized in 20 years by 5 percent of the projected delivery value;

(4) States the reduction loan's repayment term and the fee rate, or range of fee rates, prospectively necessary to amortize the reduction loan over its repayment term;

(5) Analyzes and demonstrates the ability to repay the reduction loan at the minimum reduction level and at various reduction-level increments reasonably greater than the minimum one, based on the:

(i) Best and most representative historical fishing revenue and expense data and any other relevant productivity measures available in the reduction fishery, and

(ii) Projected effect of the program on the post-reduction operating economics of typical harvesters in the reduction fishery, with particular emphasis on the extent to which the reduction increases the ratio of delivery value to fixed cost and improves harvesting's other relevant productivity measures;

(6) Demonstrates how the business plan's proposed program meets, or will meet after an appropriate reduction amendment, the requirements in § 600.1002(a);

(7) Demonstrates how the CFMP meets, or will meet after an appropriate reduction amendment, the requirements in § 600.1002(b);

(8) Includes, if a reduction amendment is necessary, the reduction amendment specifications upon which

Fishery Conservation and Management

§ 600.1004

the pre-bidding referendum will be based;

(9) Includes an assessment of the program's potential impact on fisheries other than the reduction fishery, including an evaluation of the likely increase in participation or effort in such other fisheries, the general economic impact on such other fisheries, and recommendations that could mitigate, or enable such other fisheries to mitigate, any undesirable impacts;

(10) Specifies the names and addresses of record of all fish buyers who can, after reduction, reasonably be expected to receive deliveries of fee fish. This shall be based on the best information available, including any information that NMFS may be able to supply to the business planners;

(11) Specifies, after full consultation with fish buyers, any special circumstances in the reduction fishery that may require the implementing regulations to contain provisions in addition to, or different from, those contained in §600.1013 and/or §600.1014 in order to accommodate the circumstances of, and practices in, the reduction fishery while still fulfilling the intent and purpose of §600.1013 and/or §600.1014—including, but not limited to:

(i) In the case of reduction fisheries in which state data confidentiality laws or other impediments may negatively affect the efficient and effective conduct of the same, specification of who needs to take what action to resolve any such impediments, and

(ii) In the case of reduction fisheries in which some fish sellers sell unprocessed, and other fish sellers sell processed fish to fish buyers, specification of an accurate and efficient method of establishing the delivery value of processed fish; and

(12) Demonstrates by a survey of potential voters, or by any other convincing means, a substantial degree of potential voter support for the business plan and confidence in its feasibility.

(o) Include the requester's statement of belief that the business plan, the CFMP, the reduction amendment specifications, and all other request aspects constitute a complete, realistic, and practical prospect for successfully completing a program in accordance with this subpart.

§ 600.1004 Accepting a request for, and determinations about initiating, a financed program.

(a) *Accepting a request.* Once it receives a request, NMFS will review any request for a financed program to determine whether the request conforms with the requirements of §600.1003. If the request does not conform, NMFS will return the request with guidance on how to make the request conform. If the request conforms, NMFS shall accept it and publish a notice in the FEDERAL REGISTER requesting public comments on the request. Such notice shall state the name and address of record of each eligible voter, as well as the basis for having determined the eligibility of those voters. This shall constitute notice and opportunity to respond about adding eligible voters, deleting ineligible voters, and/or correcting any voter's name and address of record. If, in NMFS' discretion, the comments received in response to such notice warrants it, or other good cause warrants it, NMFS may modify such list by publishing another notice in the FEDERAL REGISTER.

(b) *Determination about initiating a financed program.* After receipt of a conforming request for a financed program, NMFS will, after reviewing and responding to any public comments received in response to the notice published in the FEDERAL REGISTER under paragraph (a) of this section, initiate the program if NMFS determines that:

(1) The program meets, or will meet after an appropriate reduction amendment, the requirements in §600.1002(a);

(2) The CFMP meets, or will meet after an appropriate reduction amendment, the requirements in §600.1002(b);

(3) The program, if successfully implemented, is cost effective;

(4) The reduction requested constitutes a realistic and practical prospect for successfully completing a program in accordance with this subpart and the borrower is capable of repaying the reduction loan. This includes enabling NMFS to readily design, propose, and adopt a timely and reliable implementation plan as well as propose and issue timely and reliable implementation regulations and otherwise complete the program in accordance with this subpart; and

§ 600.1005

50 CFR Ch. VI (10–1–05 Edition)

(5) The program accords with all other applicable law.

§ 600.1005 Content of a request for a subsidized program.

A request for a subsidized program shall:

- (a) Specify the reduction fishery.
- (b) Project the amount of the reduction and specify what a reduction of that amount achieves in the reduction fishery.
- (c) Project the reduction cost, the amount of reduction cost to be funded by Federal appropriations, and the amount, if any, to be funded by other sources.
- (d) Project the availability of Federal appropriations or other funding, if any, that completion of the program requires, including the time at which funding from each source will be available and how that relates to the time at which elements of the reduction process are projected to occur.
- (e) List the names and addresses of record of all fishing permit or fishing vessel owners who are currently authorized to harvest fish from the reduction fishery, excluding those whose authority is limited to incidentally harvesting fish from the reduction fishery during directed fishing for fish not in the reduction fishery. The list shall be based on the best information available to the requester, including any information that NMFS may supply to the requester, and take into account any limitation by type of fishing gear operated, size of fishing vessel operated, geographic area of operation, or other factor that the proposed program involves.
- (f) Specify the aggregate total allowable catch in the reduction fishery during each of the preceding 5 years and the aggregate portion of such catch harvested by the parties listed under paragraph (e) of this section.
- (g) Include a preliminary development plan that:
 - (1) Specifies a detailed reduction methodology that accomplishes the maximum sustained reduction in the reduction fishery's fishing capacity at the least cost and in a minimum period of time, and otherwise achieves the program result that the requester specifies under paragraph (b) of this section. The methodology shall:

(i) Be sufficiently detailed to enable NMFS to prepare a final development plan to serve as the basis for NMFS to readily design, propose, and adopt a timely and reliable implementation plan and propose and issue timely and reliable implementation regulations, and

(ii) Include:

(A) The contents and terms of invitations to bid,

(B) Eligible bidders,

(C) The type of information that bidders shall supply,

(D) The criteria for accepting or rejecting bids, and

(E) The terms of bid acceptances;

(2) Specifies the criteria for determining the types and numbers of fishing permits or fishing permits and fishing vessels that are eligible for reduction under the program. The criteria shall take into account:

(i) The characteristics of the fishery,

(ii) Whether the program is limited to a particular gear type within the reduction fishery, or is otherwise limited by size of fishing vessel operated, geographic area of operation, or other factor,

(iii) Whether the program is limited to fishing permits or involves both fishing permits and fishing vessels,

(iv) The reduction amendment required,

(v) The needs of fishing communities, and

(vi) The need to minimize the program's reduction cost; and

(3) Demonstrates the program's cost effectiveness.

(h) Demonstrate how the program meets, or will meet after an appropriate reduction amendment, the requirements in § 600.1002(a).

(i) Demonstrate how the CFMP meets, or will meet after an appropriate reduction amendment, the requirements in § 600.1002(b)(1) and (2).

(j) Specify any other information or guidance that assists NMFS in preparing a final development plan and a proposed implementation plan and proposed implementation regulations.

(k) Include the requester's statement of belief that the program constitutes a reasonably realistic and practical prospect for successfully completing a program in accordance with this subpart.

Fishery Conservation and Management

§ 600.1007

§ 600.1006 Accepting a request for, and determinations about conducting, a subsidized program.

(a) *Accepting a request.* NMFS will review any request for a subsidized program submitted to NMFS to determine whether the request conforms with the requirements of § 600.1005. If the request does not conform, NMFS will return it with guidance on how to make the request conform. If the request conforms, NMFS shall accept it and publish a notice in the FEDERAL REGISTER requesting public comments about the request.

(b) *Final development plan.* After receipt of a conforming request, NMFS will prepare a final development plan if NMFS determines that the reduction requested constitutes a realistic and practical prospect for successfully completing a program in accordance with this subpart. This includes enabling NMFS to readily design, propose, and adopt a timely and reliable implementation plan as well as propose and issue timely and reliable implementation regulations and otherwise complete the program in accordance with this subpart. NMFS will, as far as possible, base the final development plan on the requester's preliminary development plan. Before completing the final development plan, NMFS will consult, as NMFS deems necessary, with the requester, Federal agencies, state and regional authorities, affected fishing communities, participants in the reduction fishery, conservation organizations, and other interested parties in preparing the final development plan.

(c) *Reaffirmation of the request.* After completing the final development plan, NMFS will submit the plan to the requester for the requester's reaffirmation of the request. Based on the final development plan, the reaffirmation shall: (1) Certify that the final development plan meets, or will meet after an appropriate reduction amendment, the requirements in § 600.1002(a);

(2) Certify that the CFMP meets, or will meet after an appropriate reduction amendment, the requirements in § 600.1002(b)(1) and (2); and

(3) Project the date on which the requester will forward any necessary reduction amendment and, if the requester is a Council, proposed regulations to implement the reduction

amendment. The requester shall base any necessary reduction amendment on the final development plan.

(d) *Determinations about conducting a subsidized program.* After NMFS' receipt of the requester's reaffirmation, any required reduction amendment, and any proposed regulations required to implement the amendment, NMFS will initiate the program if NMFS determines that:

(1) The program meets, or will meet after an appropriate reduction amendment, the requirements in § 600.1002(a);

(2) The CFMP meets, or will meet after an appropriate reduction amendment, the requirements in § 600.1002(b)(1) and (2); and

(3) The program is reasonably capable of being successfully implemented;

(4) The program, if successfully implemented, will be cost effective; and

(5) The program is in accord with all other applicable provisions of the Magnuson-Stevens Act and this subpart.

§ 600.1007 Reduction amendments.

(a) Each reduction amendment may contain provisions that are either dependent upon or independent of a program. Each provision of a reduction amendment is a dependent provision unless the amendment expressly designates the provision as independent.

(b) Independent provisions are effective without regard to any subsequent program actions.

(c) Dependent provisions are initially effective for the sole limited purpose of enabling initiation and completion of the pre-reduction processing stage of a program.

(d) All dependent provisions of a reduction amendment for a financed program are fully in force and effect for all other purposes only when NMFS either:

(1) For bidding results that conform to the fishing capacity reduction specifications and are not subject to any other condition, notifies bidders, under § 600.1009(e)(3), that reduction contracts then exist between the bidders and the United States; or

(2) For bidding results that do not conform to the fishing capacity reduction specifications or are subject to any other condition, notifies bidders

whose bids NMFS had conditionally accepted, under § 600.1010 (d)(8)(iii), that the condition pertaining to the reduction contracts between them and the United States is fulfilled.

(e) If NMFS does not, in accordance with this subpart and any special provisions in the implementation regulations, subsequently make all reduction payments that circumstances, in NMFS' judgment, reasonably permit NMFS to make and, thus, complete a program, no dependent provisions shall then have any further force or effect for any purpose and all final regulations involving such dependent provisions shall then be repealed.

§ 600.1008 Implementation plan and implementation regulations.

(a) As soon as practicable after deciding to initiate a program, NMFS will prepare and publish, for a 60-day public comment period, a proposed implementation plan and implementation regulations. During the public comment period, NMFS will conduct a public hearing of the proposed implementation plan and implementation regulations in each state that the program affects.

(b) To the greatest extent practicable, NMFS will base the implementation plan and implementation regulations for a financed program on the business plan. The implementation plan for a financed program will describe in detail all relevant aspects of implementing the program, including:

- (1) The reduction fishery;
- (2) The reduction methodology;
- (3) The maximum reduction cost;
- (4) The maximum reduction loan amount, if different from the maximum reduction cost;
- (5) The reduction cost funding, if any, other than a reduction loan;
- (6) The minimum acceptable reduction level;
- (7) The potential amount of the fee;
- (8) The criteria for determining the types and number of fishing permits or fishing permits and fishing vessels eligible to participate in the program;
- (9) The invitation to bid and bidding procedures;
- (10) The criteria for determining bid acceptance;
- (11) The referendum procedures; and

(12) Any relevant post-referendum reduction procedures other than those in the implementation regulations or this subpart.

(c) NMFS will base each implementation plan and implementation regulations for a subsidized program on the final development plan. The implementation plan will describe in detail all relevant aspects of implementing the program, including:

- (1) The reduction fishery;
- (2) The reduction methodology;
- (3) The maximum reduction cost;
- (4) The reduction-cost funding, if any, other than Federal appropriations;
- (5) The criteria for determining the types and number of fishing permits or fishing permits and fishing vessels eligible to participate in the program;
- (6) The invitation to bid and bidding procedures;
- (7) The criteria for determining bid acceptance; and
- (8) Any relevant post-bidding program procedures other than those in the implementation regulations or this subpart.

(d) The implementation regulations will:

(1) Specify, for invitations to bid, bids, and reduction contracts under § 600.1009:

- (i) Bidder eligibility,
- (ii) Bid submission requirements and procedures,
- (iii) A bid opening date, before which a bidder may not bid, and a bid closing date, after which a bidder may not bid,
- (iv) A bid expiration date after which the irrevocable offer contained in each bid expires unless NMFS, before that date, accepts the bid by mailing a written acceptance notice to the bidder at the bidder's address of record,
- (v) The manner of bid submission and the information each bidder shall supply for NMFS to deem a bid responsive,
- (vi) The conditions under which NMFS will accept or reject a bid,
- (vii) The manner in which NMFS will accept or reject a bid, and
- (viii) The manner in which NMFS will notify each bidder of bid acceptance or rejection;
- (2) Specify any other special referendum procedures or criteria; and

(3) Specify such other provisions, in addition to and consistent with those in this subpart, necessary to regulate the individual terms and conditions of each program and reduction loan. This includes, but is not limited to:

(i) Provisions for the payment of costs and penalties for non-payment, non-collection, non-deposit, and/or non-disbursement of the fee in accordance with § 600.1013 and § 600.1014,

(ii) Prospective fee rate determinations, and

(iii) Any other aspect of fee payment, collection, deposit, disbursement, accounting, record keeping, and/or reporting.

(e) NMFS will issue final implementation regulations and adopt a final implementation plan within 45 days of the close of the public-comment period.

(f) NMFS may repeal the final implementation regulations for any program if:

(1) For a financed program, the bidding results do not conform to the fishing capacity reduction specifications or a post-bidding referendum does not subsequently approve an industry fee system based on the bidding results;

(2) For a subsidized program, NMFS does not accept bids; and

(3) For either a financed program or a subsidized program, if NMFS is unable to make all reduction payments due to a material adverse change.

§ 600.1009 Bids.

(a) Each invitation to bid, bid, bid acceptance, reduction contract, and bidder—or any other party in any way affected by any of the foregoing—under this subpart is subject to the terms and conditions in this section:

(1) Each invitation to bid constitutes the entire terms and conditions of a reduction contract under which:

(i) Each bidder makes an irrevocable offer to the United States of fishing capacity for reduction, and

(ii) NMFS accepts or rejects, on behalf of the United States, each bidder's offer;

(2) NMFS may, at any time before the bid expiration date, accept or reject any or all bids;

(3) For a financed program in which bidding results do not conform to the fishing capacity reduction specifica-

tions, NMFS' acceptance of any bid is subject to the condition that the industry fee system necessary to repay the reduction loan is subsequently approved by a successful post-bidding referendum conducted under § 600.1010. Approval or disapproval of the industry fee system by post-bidding referendum is an event that neither the United States nor the bidders can control. Disapproval of the industry fee system by an unsuccessful post-bidding referendum fully excuses both parties from any performance and fully discharges all duties under any reduction contract;

(4) For a financed program in one reduction fishery that is being conducted under appropriate implementation regulations simultaneously with another financed program in another reduction fishery, where the acceptance of bids for each financed program is conditional upon successful post-bidding referenda approving industry fee systems for both financed programs, NMFS' acceptance of all bids is, in addition to any condition under paragraph (a)(3) of this section, also subject to the additional conditions that both referenda approve the industry fee systems required for both financed programs—all as otherwise provided in paragraph (a)(3) of this section;

(5) Upon NMFS' acceptance of the bid and tender of a reduction payment, the bidder consents to:

(i) The revocation, by NMFS, of any reduction permit, and

(ii) Where the program also involves the withdrawal of reduction vessels from fishing:

(A) Title restrictions imposed by the U.S. Coast Guard on any reduction vessel that is federally documented to forever prohibit and effectively prevent any future use of the reduction vessel for fishing in any area subject to the jurisdiction of the United States or any state, territory, commonwealth, or possession of the United States, or

(B) Where reduction vessel scrapping is involved and the reduction vessel's owner does not comply with the owner's obligation under the reduction contract to scrap the reduction vessel, take such measures as necessary to cause the reduction vessel's prompt scrapping. The scrapping will be at the

reduction vessel owner's risk and expense. Upon completion of scrapping, NMFS will take such action as may be necessary to recover from the reduction vessel owner any cost or expense NMFS incurred in causing the reduction vessel to be scrapped and any other damages NMFS may have incurred and such owner shall be liable to the United States for such cost, expenses, and damages;

(6) Money damages not being an adequate remedy for a bidder's breach of a reduction contract, the United States is, in all particulars, entitled to specific performance of each reduction contract. This includes, but is not limited to, the scrapping of a reduction vessel;

(7) Any reduction payment is available, upon timely and adequately documented notice to NMFS, to satisfy liens, as allowed by law, against any reduction permit and or reduction vessel; provided, however, that:

(i) No reduction payment to any bidder either relieves the bidder of responsibility to discharge the obligation which gives rise to any lien or relieves any lien holder of responsibility to protect the lien holder's interest,

(ii) No reduction payment in any way gives rise to any

liability of the United States for the obligation underlying any lien,

(iii) No lien holder has any right or standing, not otherwise provided by law, against the United States in connection with the revocation of any reduction permit or the title restriction or scrapping of any reduction vessel under this subpart, and

(iv) This subpart does not provide any lien holder with any right or standing to seek to set aside any revocation of any reduction permit or the title restriction or scrapping of any reduction vessel for which the United States made, or has agreed to make, any reduction payment. A lien holder is limited to recovery against the holder of the reduction permit or the owner of the reduction vessel as otherwise provided by law; and

(8) Each invitation to bid may specify such other terms and conditions as NMFS believes necessary to enforce specific performance of each reduction contract or otherwise to ensure com-

pleting each program. This includes, but is not limited to, each bidder's certification, subject to the penalties in § 600.1017, of the bidder's full authority to submit each bid and to dispose of the property involved in the bid in the manner contemplated by each invitation to bid.

(b) NMFS will not invite bids for any program until NMFS determines that:

(1) Any necessary reduction amendment is fully and finally approved and all provisions except those dependent on the completion of reduction are implemented;

(2) The final implementation plan is adopted and the final implementation regulations are issued;

(3) All required program funding is approved and in place, including all Federal appropriation and apportionment authority;

(4) Any reduction loan involved is fully approved;

(5) Any non-Federal funding involved is fully available at the required time for NMFS disbursement as reduction payments; and

(6) All other actions necessary to disburse reduction payments, except for matters involving bidding and post-bidding referenda, are completed.

(c) After making the affirmative determinations required under paragraph (b) of this section, NMFS will publish a FEDERAL REGISTER notice inviting eligible bidders to offer to the United States, under this subpart, fishing capacity for reduction.

(d) NMFS may extend a bid closing date and/or a bid expiration date for a reasonable period. NMFS may also issue serial invitations to bid if the result of previous bidding, in NMFS' judgment, warrant this.

(e) After the bid expiration date, NMFS will:

(1) Analyze responsive bids;

(2) Determine which bids, if any, NMFS accepts; and

(3) Notify, by U.S. mail at each bidder's address of

record, those bidders whose bids NMFS accepts that a reduction contract now exists between them and the United States—subject, where appropriate, to the conditions provided for elsewhere in this subpart.

(f) NMFS will keep confidential the identity of all bidders whose bids NMFS does not accept. In financed programs where bidding results do not conform to the fishing capacity reduction specifications, NMFS also will keep confidential the identity of all bidders whose bids NMFS does accept until after completing a successful post-bidding referendum under § 600.1010.

§ 600.1010 Referenda.

(a) *Referendum success.* A referendum is successful if at least two-thirds of the ballots that qualify to be counted as referendum votes under subparagraph (d)(6) of this section are cast in favor of an industry fee system.

(b) *Pre-bidding referendum*—(1) *Initial referendum.* An initial pre-bidding referendum shall be conducted for each financed program. The business plan shall, subject to this subpart, determine the chronological relationship of the initial pre-bidding referendum to other pre-bidding aspects of the reduction process sequence. The initial pre-bidding referendum shall be based on the fishing capacity reduction specifications. If the initial pre-bidding referendum precedes the adoption of any necessary reduction amendment, the initial pre-bidding referendum shall also be based on the reduction amendment specifications. If the initial pre-bidding referendum follows the adoption of any necessary reduction amendment, the initial pre-bidding referendum shall also be based on the adopted reduction amendment;

(2) *Successful initial pre-bidding referendum.* If the initial pre-bidding referendum is successful, the reduction process will proceed as follows:

(i) If the initial pre-bidding referendum follows reduction amendment adoption, no second pre-bidding referendum shall be conducted,

(ii) If the initial pre-bidding referendum precedes reduction amendment adoption, a second pre-bidding referendum shall be conducted if, in NMFS' judgment, the reduction amendment subsequently adopted differs, in any respect materially affecting the borrower's reduction investment in the program and the borrower's ability to repay the reduction

loan, from the reduction amendment specifications upon which the initial pre-bidding referendum successfully occurred. The sole purpose of any second pre-bidding referendum shall be to determine whether the voters authorize an industry fee system despite any such difference between the reduction amendment specifications and a subsequently adopted reduction amendment.

(3) *Unsuccessful initial pre-bidding referendum.* If the initial pre-bidding referendum is unsuccessful, the reduction process will either cease or NMFS may suspend the process pending an appropriate amendment of the business plan and the request.

(c) *Post-bidding referendum.* A post-bidding referendum shall occur only if, in NMFS' judgment, the result of bidding under § 600.1009 does not conform, in any material respect, to the fishing capacity reduction specifications and such result justifies, in NMFS' judgment, conducting a post-bidding referendum. Bidding that results in reducing fishing capacity in any amount not less than the minimum fishing capacity reduction amount for any reduction loan amount not more than the maximum reduction loan amount, and otherwise achieves all material requirements of the fishing capacity reduction specifications, shall conform to the fishing capacity reduction specifications. The sole purpose of any post-bidding referendum shall be to determine whether voters authorize an industry fee system for bidding that results in reducing fishing capacity in any amount materially less than the minimum amount in the fishing capacity reduction specifications.

(d) NMFS will conduct referenda in accordance with the following: (1) *Eligible voters.* The parties eligible to vote in each referendum are the parties whose names are listed as being eligible to vote in the notice published in the FEDERAL REGISTER under § 600.1004(a);

(2) *Ballot issuance.* NMFS will mail, by U.S. certified mail, return receipt requested, a ballot to each eligible voter. Each ballot will bear a randomly derived, 5-digit number assigned to each eligible voter. Each ballot will contain a place for the voter to vote for or against the proposed industry fee

system and a place, adjacent to the 5-digit number, for the signature of the fishing permit or fishing vessel owner to whom the ballot is addressed or, if the fishing permit or fishing vessel owner is an organization, the person having authority to vote and cast the ballot on the organization's behalf. Each ballot will contain a place for the person signing the ballot to print his or her name. NMFS will enclose with each ballot a specially-marked, postage-paid, pre-addressed envelope that each voter shall use to return the ballot to NMFS;

(3) *Voter certification.* Each ballot will contain a certification, subject to the penalties set forth in § 600.1017, that the person signing the ballot is the fishing permit or fishing vessel owner to whom the ballot is addressed or, if the fishing permit or fishing vessel owner is an organization, the person having authority to vote and cast the ballot on the organization's behalf;

(4) *Information included on a ballot.* Each ballot mailing will:

(i) Summarize the referendum's nature and purpose,

(ii) Specify the date by which NMFS must receive a ballot in order for the ballot to be counted as a qualified vote,

(iii) Identify the place on the ballot for the voter to vote for or against the proposed industry fee system, the place on the ballot where the voter shall sign the ballot, and the purpose of the return envelope,

(iv) For each pre-bidding referendum, state:

(A) The fishing capacity reduction specifications,

(B) The reduction loan's repayment term, and

(C) The fee rate, or range of fee rates, prospectively necessary to amortize the reduction loan over the loan's term,

(v) For each initial pre-bidding referendum that precedes reduction amendment adoption, state the reduction amendment specifications,

(vi) For each initial pre-bidding referendum that follows reduction amendment adoption, summarize the material aspects of the reduction amendment adopted,

(vii) For each second pre-bidding referendum, summarize how the adopted

reduction amendment materially differs from the reduction amendment specifications upon which a successful initial pre-bidding referendum occurred and how this material difference affects the borrower's reduction investment in the program and the borrower's ability to repay the reduction loan,

(viii) For each post-bidding referendum, specify the actual bidding results that do not conform to the fishing capacity reduction specifications, and

(ix) State or include whatever else NMFS deems appropriate;

(5) *Enclosures to accompany a ballot.* Each ballot mailing will include:

(i) A specially-marked, postage-paid, and pre-addressed envelope that a voter must use to return the original of a ballot to NMFS by whatever means of delivery the voter chooses, and

(ii) Such other materials as NMFS deems appropriate;

(6) *Vote qualification.* A completed ballot qualifies to be counted as a vote if the ballot:

(i) Is physically received by NMFS on or before the last day NMFS specifies for receipt of the ballot,

(ii) Is cast for or against the proposed industry fee system,

(iii) Is signed by the voter,

(iv) Is the original ballot NMFS sent to the voter bearing the same 5-digit number that NMFS assigned to the voter, and

(v) Was returned to NMFS in the specially-marked envelope that NMFS provided for the ballot's return;

(6) *Vote tally and notification.* NMFS will:

(i) Tally all ballots qualified to be counted as referendum votes,

(ii) Notify, by U.S. mail at the address of record, all eligible voters who received ballots of:

(A) The number of potential voters,

(B) The number of actual voters who returned a ballot,

(C) The number of returned ballots that qualified to be counted as referendum votes,

(D) The number of votes for and the number of votes against the industry fee system, and

(E) Whether the referendum was successful and approved the industry fee

system or unsuccessful and disapproved the industry fee system, and

(iii) If a successful referendum is a post-bidding referendum, NMFS will, at the same time and in the same manner, also notify the bidders whose bids were conditionally accepted that the condition pertaining to the reduction contracts between them and the United States is fulfilled;

(7) *Conclusiveness of referendum determinations.* NMFS' determinations about ballot qualifications and about all other referendum matters, including, but not limited to, eligible voters and their addresses of record, are conclusive and final as of the date NMFS makes such determinations. No matter respecting such determinations shall impair, invalidate, avoid, or otherwise render unenforceable any referendum, reduction contract, reduction loan, or fee payment and collection obligation under § 600.1013 and § 600.1014 necessary to repay any reduction loan;

(8) *Ballot confidentiality.* NMFS will not voluntarily release the name of any party who voted. NMFS will restrict the availability of all voter information to the maximum extent allowed by law; and

(9) *Conclusive authorization of industry fee system.* Each successful referendum conclusively authorizes NMFS' imposition of an industry fee system—including the fee payment, collection, and other provisions regarding fee payment and collection under § 600.1013 and § 600.1014—to repay the reduction loan for each financed program that NMFS conducts under this subpart.

§ 600.1011 Reduction methods and other conditions.

(a) *Reduction permits or reduction permits and reduction vessels.* Each program may involve either the surrender and revocation of reduction permits or both the surrender and revocation of reduction permits and the withdrawal from fishing either by title restriction or by scrapping of reduction vessels. No financed program may, however, require such title restriction or scrapping of reduction vessels unless the business plan voluntarily includes the same.

(b) *Reduction permit revocation and surrender.* Each reduction permit is, upon NMFS' tender of the reduction

payment for the reduction permit, forever revoked. Each reduction permit holder shall, upon NMFS' tender of the reduction payment, surrender the original reduction permit to NMFS. The reduction permit holder, upon NMFS' tender of the reduction payment, forever relinquishes any claim associated with the reduction permit and with the fishing vessel that was used to harvest fishery resources under the reduction permit that could qualify the reduction permit holder or the fishing vessel owner for any present or future limited access system fishing permit in the reduction fishery.

(c) *Reduction vessel title restriction or scrapping.* For each program that involves reduction vessel title restriction or scrapping:

(1) Each reduction vessel that is subject to title restriction only and is thus not required to be scrapped, is, upon NMFS' tender of the reduction payment, forever prohibited from any future use for fishing in any area subject to the jurisdiction of the United States or any State, territory, possession, or commonwealth of the United States. NMFS will request that the U.S. Coast Guard permanently restrict each such reduction vessel's title to exclude the reduction vessel's future use for fishing in any such area;

(2) Each reduction vessel owner whose reduction vessel is required to be scrapped shall, upon NMFS' tender of the reduction payment, immediately cease all further use of the reduction vessel and arrange, without delay and at the reduction vessel owner's expense, to scrap the reduction vessel to NMFS' satisfaction, including adequate provision for NMFS to document the physical act of scrapping; and

(3) Each reduction vessel owner, upon NMFS' tender of the reduction payment, forever relinquishes any claim associated with the reduction vessel and with the reduction permit that could qualify the reduction vessel owner or the reduction permit holder for any present or future limited access system fishing permit in the reduction fishery.

(d) *Fishing permits in a non-reduction fishery.* A financed program that does not involve the withdrawal from fishing or scrapping of reduction vessels

may not require any holder of a reduction permit in a reduction fishery to surrender any fishing permit in any non-reduction fishery or restrict or revoke any fishing permit other than a reduction permit in the reduction fishery, except those fishing permits authorizing the incidental harvesting of species in any non-reduction fishery during, and as a consequence of, directed fishing for species in the reduction fishery.

(e) *Reduction vessels disposition.* Where a business plan requires the withdrawal from fishing of reduction vessels as well as the revocation of reduction permits: (1) Each reduction vessel that is not documented under Federal law must in every case always be scrapped, without regard to whether a program is a financed program or a subsidized program;

(2) No financed program may require any disposition of a reduction vessel documented under Federal law other than the title restriction in paragraph (b) of this section unless the business plan volunteers to do otherwise; and

(3) Any subsidized program may require the scrapping of reduction vessels documented under Federal law.

(f) *Reduction payments.* NMFS will disburse all reduction payments in the amount and in the manner prescribed in reduction contracts, except reduction payments that a bidder's reduction-contract nonperformance prevents NMFS from disbursing. In financed programs, the reduction loan's principal amount is the total amount of all reduction payments that NMFS disburses from the proceeds of a reduction loan. Any reduction payment that NMFS, because of a bidder's reduction-contract nonperformance, disburses but subsequently recovers, shall reduce the principal amount of the reduction loan accordingly.

(g) *Effect of reduction-contract nonperformance.* No referendum, no reduction contract, no reduction loan, and no fee payment and collection obligation under § 600.1013 and § 600.1014 necessary to repay any reduction loan, shall be impaired, invalidated, avoided, or otherwise rendered unenforceable by virtue of any reduction contract's nonperformance. This is without regard to the cause of, or reason for, nonperform-

ance. NMFS shall endeavor to enforce the specific performance of all reduction contracts, but NMFS' inability, for any reason, to enforce specific performance for any portion of such reduction contracts shall not relieve fish sellers of their obligation to pay, and fish buyers of their obligation to collect, the fee necessary to fully repay the full reduction loan balance that results from all reduction payments that NMFS actually makes and does not recover.

(h) *Program completion.* Other than the payment and collection of the fee that repays a reduction loan and any other residual matters regarding reduction payments and the disposition of reduction permits and reduction vessels, a program shall be completed when NMFS tenders or makes all reduction payments under all reduction contracts that circumstances, in NMFS' judgment, reasonably permit NMFS to make.

§ 600.1012 Reduction loan.

(a) *Obligation.* The borrower shall be obligated to repay a reduction loan. The borrower's obligation to repay a reduction loan shall be discharged by fish sellers paying a fee in accordance with § 600.1013. Fish buyers shall be obligated to collect the fee in accordance with § 600.1013 and to deposit and disburse the fee revenue in accordance with § 600.1014.

(b) *Principal amount, interest rate, repayment term, and penalties for non-payment or non-collection.* The reduction loan shall be:

(1) In a principal amount that shall be determined by subsequent program events under this subpart, but which shall not exceed the maximum principal amount in the fishing capacity reduction specifications;

(2) At an annual rate, that shall be determined by subsequent events, of simple interest on the reduction loan's principal balance that shall equal 2 percent plus the Treasury percentage;

(3) Repayable over the repayment term specified in the business plan or otherwise determined by subsequent events; and

(4) Subject to such provisions as implementation regulations shall specify for the payment of costs and penalties

Fishery Conservation and Management

§ 600.1013

for non-payment, non-collection, non-deposit, and/or non-disbursement in accordance with § 600.1013 and § 600.1014.

(c) *Effect of prospective interest rate.* Any difference between a prospective interest rate projected, for the purpose of any aspect of reduction planning or processing under this subpart, before the U.S. Treasury determines the Treasury percentage and an interest rate first known after the U.S. Treasury determines the Treasury percentage shall not void, invalidate, or otherwise impair any reduction contract, any reduction loan repayment obligation, or any other aspect of the reduction process under this subpart. Should any such difference result in a reduction loan that cannot, at the maximum fee rate allowed by law, be repaid, as previously projected, within the maximum maturity, any amount of the reduction loan remaining unpaid at maturity shall be repaid after maturity by continuing fee payment and collection under this subpart at such maximum fee rate until the reduction loan's unpaid principal balance and accrued interest is fully repaid. The above notwithstanding, at the discretion of the Secretary, the reduction contract can be voided if a material adverse change affects the reduction contract, reduction loan obligation, or any other aspect of the reduction process under this subpart.

§ 600.1013 Fee payment and collection.

(a) *Amount.* The fee amount is the delivery value times the fee rate.

(b) *Rate.* NMFS will establish the fee rate. The fee rate may not exceed 5 percent of the delivery value. NMFS will establish the initial fee rate by calculating the fee revenue annually required to amortize a reduction loan over the reduction loan's term, projecting the annual delivery value, and expressing such fee revenue as a percentage of such delivery value. Before each anniversary of the initial fee rate determination, NMFS will recalculate the fee rate reasonably required to ensure reduction loan repayment. This will include any changed delivery value projections and any adjustment required to correct for previous delivery values higher or lower than projected.

(c) *Payment and collection.* (1) The full fee is due and payable at the time of fish delivery. Each fish buyer shall collect the fee at the time of fish delivery by deducting the fee from the delivery value before paying, or promising to pay, the net delivery value. Each fish seller shall pay the fee at the time of fish delivery by receiving from the fish buyer the net delivery value, or the fish buyer's promise to pay the net delivery value, rather than the delivery value. Regardless of when the fish buyer pays the net delivery value, the fish buyer shall collect the fee at the time of fish delivery;

(2) In the event of any post-delivery payment for fee fish—including, but not limited to bonuses—whose amount depends on conditions that cannot be known until after fish delivery, that either first determines the delivery value or later increases the previous delivery value, the fish seller shall pay, and the fish buyer shall collect, at the time the amount of such post-delivery payment first becomes known, the fee that would otherwise have been due and payable as if the amount of the post-delivery payment had been known, and as if the post-delivery payment had consequently occurred, at the time of initial fish delivery;

(3)(i) Each fish seller shall be deemed to be, for the purpose of the fee collection, deposit, disbursement, and accounting requirements of this subpart, both the fish seller and the fish buyer, and shall be responsible for all requirements and liable for any penalties under this subpart applicable to fish sellers and/or fish buyers, each time that a fish seller sells fee fish to:

(A) Any party whose place of business is not located in the United States, who does not take delivery or possession of the fee fish in the United States, who is not otherwise subject to this subpart, or to whom or against whom NMFS cannot otherwise apply or enforce this subpart,

(B) Any party who is a general food-service wholesaler or supplier, a restaurant, a retailer, a consumer, some other type of end-user, or some other party not engaged in the business of buying fish from fish sellers for the purpose of reselling the fish, either with or without processing the fish, or

(C) Any other party who the fish seller has good reason to believe is a party not subject to this subpart or to whom or against whom NMFS cannot otherwise apply or enforce this subpart,

(ii) In each such case the fish seller shall, with respect to the fee fish involved in each such case, discharge, in addition to the fee payment requirements of this subpart, all the fee collection, deposit, disbursement, accounting, record keeping, and reporting requirements that this subpart otherwise imposes on the fish buyer, and the fish seller shall be subject to all the penalties this subpart provides for a fish buyer's failure to discharge such requirements;

(4) Fee payment begins on the date NMFS specifies under the notification procedures of paragraph (d) of this section and continues without interruption at the fee rates NMFS specifies in accordance this subpart until NMFS determines that the reduction loan is fully repaid. If a reduction loan is, for any reason, not fully repaid at the maturity of the reduction loan's original amortization period, fee payment and collection shall continue until the reduction loan is fully repaid, notwithstanding that the time required to fully repay the reduction loan exceeds the reduction loan's initially permissible maturity.

(d) *Notification.* (1) At least 30 days before the effective date of any fee or of any fee rate change, NMFS will publish a FEDERAL REGISTER notice establishing the date from and after which the fee or fee rate change is effective. NMFS will then also send, by U.S. mail, an appropriate notification to each affected fish seller and fish buyer of whom NMFS has notice;

(2) When NMFS determines that a reduction loan is fully repaid, NMFS will publish a FEDERAL REGISTER notice that the fee is no longer in effect and should no longer be either paid or collected. NMFS will then also send, by U.S. mail, notification to each affected fish seller and fish buyer of whom NMFS has knowledge;

(3) If NMFS fails to notify a fish seller or a fish buyer by U.S. mail, or if the fish seller or fish buyer otherwise does not receive the notice, of the date fee payments start or of the fee rate in ef-

fect, each fish seller is, nevertheless, obligated to pay the fee at the fee rate in effect and each fish buyer is, nevertheless, obligated to collect the fee at the fee rate in effect.

(e) *Failure to pay or collect.* (1) If a fish buyer refuses to collect the fee in the amount and manner that this subpart requires, the fish seller shall then advise the fish buyer of the fish seller's fee payment obligation and of the fish buyer's fee collection obligation. If the fish buyer still refuses to properly collect the fee, the fish seller, within the next 7 calendar days, shall forward the fee to NMFS. The fish seller at the same time shall also advise NMFS in writing of the full particulars, including:

(i) The fish buyer's and fish seller's name, address, and telephone number,

(ii) The name of the fishing vessel from which the fish seller made fish delivery and the date of doing so,

(iii) The quantity and delivery value of each species of fee fish that the fish seller delivered, and

(iv) The fish buyer's reason, if known, for refusing to collect the fee in accordance with this subpart;

(2) If a fish seller refuses to pay the fee in the amount and manner that this subpart requires, the fish buyer shall then advise the fish seller of the fish buyer's collection obligation and of the fish seller's payment obligation. If the fish seller still refuses to pay the fee, the fish buyer shall then either deduct the fee from the delivery value over the fish seller's protest or refuse to buy the fee fish. The fish buyer shall also, within the next 7 calendar days, advise NMFS in writing of the full particulars, including:

(i) The fish buyer's and fish seller's name, address, and telephone number,

(ii) The name of the fishing vessel from which the fish seller made or attempted to make fish delivery and the date of doing so,

(iii) The quantity and delivery value of each species of fee fish the fish seller delivered or attempted to deliver,

(iv) Whether the fish buyer deducted the fee over the fish seller's protest or refused to buy the fee fish, and

(v) The fish seller's reason, if known, for refusing to pay the fee in accordance with this subpart.

(f) *Implementation regulations at variance with this section.* If any special circumstances in a reduction fishery require, in NMFS's judgment, fee payment and/or collection provisions in addition to, or different from, those in this section in order to accommodate the circumstances of, and practices in, a reduction fishery while still fulfilling the intent and purpose of this section, NMFS may, notwithstanding this section, include such provisions in the implementation regulations for such reduction fishery.

§ 600.1014 Fee collection deposits, disbursements, records, and reports.

(a) *Deposit accounts.* Each fish buyer that this subpart requires to collect a fee shall maintain a segregated account at a federally insured financial institution for the sole purpose of depositing collected fee revenue and disbursing the fee revenue directly to NMFS in accordance with paragraph (c) of this section.

(b) *Fee collection deposits.* Each fish buyer, no less frequently than at the end of each business week, shall deposit, in the deposit account established under paragraph (a) of this section, all fee revenue, not previously deposited, that the fish buyer collects through a date not more than two calendar days before the date of deposit. Neither the deposit account nor the principal amount of deposits in the account may be pledged, assigned, or used for any purpose other than aggregating collected fee revenue for disbursement to the Fund in accordance with paragraph (c) of this section. The fish buyer is entitled, at any time, to withdraw deposit interest, if any, but never deposit principal, from the deposit account for the fish buyer's own use and purposes.

(c) *Deposit principal disbursement.* On the last business day of each month, or more frequently if the amount in the account exceeds the account limit for insurance purposes, the fish buyer shall disburse to NMFS the full amount of deposit principal then in the deposit account. The fish buyer shall do this by check made payable to the Fund subaccount to which the deposit principal relates. The fish buyer shall mail each such check to the Fund subaccount

lockbox that NMFS establishes for the receipt of the disbursements for each program. Each disbursement shall be accompanied by the fish buyer's settlement sheet completed in the manner and form that NMFS specifies. NMFS will specify the Fund subaccount lockbox and the manner and form of settlement sheet by means of the notification in § 600.1013(d).

(d) *Records maintenance.* Each fish buyer shall maintain, in a secure and orderly manner for a period of at least 3 years from the date of each transaction involved, at least the following information:

(1) For all deliveries of fee fish that the fish buyer buys from each fish seller:

- (i) The date of delivery,
- (ii) The seller's identity,
- (iii) The weight, number, or volume of each species of fee fish delivered,
- (iv) The identity of the fishing vessel that delivered the fee fish,
- (v) The delivery value of each species of fee fish,
- (vi) The net delivery value,
- (vii) The identity of the party to whom the net delivery value is paid, if other than the fish seller,
- (viii) The date the net delivery value was paid, and
- (ix) The total fee amount collected;

(2) For all fee collection deposits to and disbursements from the deposit account:

- (i) The dates and amounts of deposits,
- (ii) The dates and amounts of disbursements to the Fund's lockbox account, and
- (iii) The dates and amounts of disbursements to the fish buyer or other parties of interest earned on deposits.

(e) *Annual report.* In each year, on the date to be specified in each implementation regulation, succeeding the year during which NMFS first implemented a fee, each fish buyer shall submit to NMFS a report, on or in the form NMFS specifies, containing the following information for the preceding year, or whatever longer period may be involved in the first annual report, for all fee fish each fish buyer purchases from fish sellers: (1) Total weight, number, or volume bought;

(2) Total delivery value paid;

§ 600.1015

50 CFR Ch. VI (10–1–05 Edition)

(3) Total fee amounts collected;
(4) Total fee collection amounts deposited by month;

(5) Dates and amounts of monthly disbursements to each Fund lockbox account;

(6) Total amount of interest earned on deposits; and

(7) Depository account balance at year-end.

(f) *State records.* If landing records that a state requires from fish sellers contain some or all of the data that this section requires and state confidentiality laws or regulations do not prevent NMFS' access to the records maintained for the state, then fish buyers can use such records to meet appropriate portions of this section's record-keeping requirements. If, however, state confidentiality laws or regulations make such records unavailable to NMFS, then fish buyers shall maintain separate records for NMFS that meet the requirements of this section. If any state law or regulation prohibits fish buyers, or fish sellers where appropriate, from keeping, for the purpose of complying with any requirement of this section, separate records that involve some or all of the same data elements as the landing records that the fish buyers also keep, for state purposes and under state law or regulation, then a financed reduction program will not be possible.

(g) *Audits.* NMFS or its agents may audit, in whatever manner NMFS believes reasonably necessary for the duly diligent administration of reduction loans, the financial records of fish buyers and fish sellers in each reduction fishery in order to ensure proper fee payment, collection, deposit, disbursement, accounting, record keeping, and reporting. Fish buyers and fish sellers shall make all records of all program transactions involving post-reduction fish harvests, fish deliveries, and fee payments, collections, deposits, disbursements, accounting, record keeping, and reporting available to NMFS or NMFS' agents at reasonable times and places and promptly provide all requested information reasonably related to these records that such fish sellers and fish buyers may otherwise lawfully provide. Trip tickets (or similar accounting records establishing the

pounds of fee fish that each fish buyer buys from each fish seller each time that each fish buyer does so and each price that each fish buyer then pays to each fish seller for the fee fish) are essential audit documentation.

(h) *Confidentiality of records.* NMFS and NMFS' auditing agents shall maintain the confidentiality of all data to which NMFS has access under this section and shall neither release the data nor allow the data's use for any purpose other than the purpose of this subpart; provided, however, that NMFS may aggregate such data so as to preclude their identification with any fish buyer or any fish seller and use them in the aggregate for other purposes).

(i) *Refunds.* When NMFS determines that a reduction loan is fully repaid, NMFS will refund any excess fee receipts, on a last-in/first-out basis, to the fish buyers. Fish buyers shall return the refunds, on a last-in/first-out basis, to the fish sellers who paid the amounts refunded.

(j) *Implementation regulations at variance with this section.* If any special circumstances in a reduction fishery require, in NMFS's judgment, fee collection deposit, disbursement, or records provisions in addition to, or different from, those in this section in order to accommodate the circumstances of, and practices in, a reduction fishery while still fulfilling the intent and purpose of this section, NMFS may, notwithstanding this section, include such provisions in the implementation regulations for such reduction fishery.

§ 600.1015 Late charges.

The late charge to fish buyers for fee payment, collection, deposit, and/or disbursement shall be one and one-half (1.5) percent per month, or the maximum rate permitted by state law, for the total amount of the fee not paid, collected, deposited, and/or disbursed when due to be paid, collected, deposited, and/or disbursed. The full late charge shall apply to the fee for each month or portion of a month that the fee remains unpaid, uncollected, undeposited, and/or undisbursed.

§ 600.1016 Enforcement.

In accordance with applicable law or other authority, NMFS may take appropriate action against each fish seller and/or fish buyer responsible for non-payment, non-collection, non-deposit, and/or non-disbursement of the fee in accordance with this subpart to enforce the collection from such fish seller and/or fish buyer of any fee (including penalties and all costs of collection) due and owing the United States on account of the loan that such fish seller and/or fish buyer should have, but did not, pay, collect, deposit, and/or disburse in accordance with this subpart. All such loan recoveries shall be applied to reduce the unpaid balance of the loan.

§ 600.1017 Prohibitions and penalties.

(a) The following activities are prohibited, and it is unlawful for any party to:

- (1) Vote in any referendum under this subpart if the party is ineligible to do so;
- (2) Vote more than once in any referendum under this subpart;
- (3) Sign or otherwise cast a ballot on behalf of a voter in any referendum under this subpart unless the voter has fully authorized the party to do so and doing so otherwise comports with this subpart;
- (4) Interfere with or attempt to hinder, delay, buy, or otherwise unduly or unlawfully influence any eligible voter's vote in any referendum under this subpart;
- (5) Submit a fraudulent, unauthorized, incomplete, misleading, unenforceable by specific performance, or inaccurate bid in response to an invitation to bid under this subpart or, in any other way, interfere with or attempt to interfere with, hinder, or delay, any invitation to bid, any bid submitted under any invitation to bid, any reduction contract, or any other reduction process in connection with any invitation to bid;
- (6) Revoke or attempt to revoke any bid under this subpart;
- (7) Fail to comply with the terms and conditions of any invitation to bid, bid, or reduction contract under this subpart, including NMFS' right under such

reduction contracts to specific performance;

(8) Fail to fully and properly pay and collect any fee due payable, and collectible under this subpart or otherwise avoid, decrease, interfere with, hinder, or delay any such payment and collection;

(9) Convert, or otherwise use for any purpose other than the purpose this subpart intends, any paid or collected fee;

(10) Fail to fully and properly deposit on time the full amount of all fee revenue collected under this subpart into a deposit account and disburse the full amount of all deposit principal to the Fund's lockbox account—all as this subpart requires;

(11) Fail to maintain full, timely, and proper fee payment, collection, deposit, and/or disbursement records or make full, timely, and proper reports of such information to NMFS—all as this subpart requires;

(12) Fail to advise NMFS of any fish seller's refusal to pay, or of any fish buyer's refusal to collect, any fee due and payable under this subpart;

(13) Refuse to allow NMFS or agents that NMFS designates to review and audit at reasonable times all books and records reasonably pertinent to fee payment, collection, deposit, disbursement, and accounting under this subpart or otherwise interfere with, hinder, or delay NMFS or its agents in the course of their activities under this subpart;

(14) Make false statements to NMFS, any of the NMFS' employees, or any of NMFS' agents about any of the matters in this subpart;

(15) Obstruct, prevent, or unreasonably delay or attempt to obstruct, prevent, or unreasonably delay any audit or investigation NMFS or its agents conduct, or attempt to conduct, in connection with any of the matters in this subpart; and/or

(16) Otherwise materially interfere with the efficient and effective conduct of reduction and the repayment of reduction loans under this subpart.

(b) Any party who violates one or more of the prohibitions of paragraph (a) of this section is subject to the full range of penalties the Magnuson-Stevens Act and 15 CFR part 904 provide—

including, but not limited to: civil penalties, sanctions, forfeitures, and punishment for criminal offenses—and to the full penalties and punishments otherwise provided by any other applicable law of the United States.

(c) Additionally, NMFS may take any and all appropriate actions, including the communication of action at law, against each party responsible for the non-payment, non-collection, non-deposit, and/or non-disbursement in accordance with § 600.1013 and/or § 600.1014 to enforce the United States' receipt from such party of any fee—including penalties and all costs of collection—due and owing the United States on account of the reduction loan that such party should have, but did not, pay, collect, deposit, and/or disburse in accordance with § 600.1013 and/or § 600.1014. All such reduction loan recoveries shall be applied to reduce the unpaid balances of reduction loans.

Subpart M—Specific Fishery or Program Fishing Capacity Reduction Regulations

AUTHORITY: 5 U.S.C. 561, 16 U.S.C. 1801 *et seq.*, 16 U.S.C. 1861a(b) through (e), 46 App. U.S.C. 1279f and 1279g, section 144(d) of Division B of Pub. L. 106–554, section 2201 of Pub. L. 107–20, section 205 of Pub. L. 107–117, Pub. L. 107–206, and Pub. L. 108–7.

SOURCE: 69 FR 53361, Sept. 1, 2004, unless otherwise noted.

§ 600.1100 [Reserved]

§ 600.1101 Inshore fee system for repayment of the loan to harvesters of Pollock from the directed fishing allowance allocated to the inshore component under section 206(b)(1) of the AFA.

(a) *Definition.* In addition to the definitions in the Magnuson-Stevens Act and in § 679.2 of this title, the terms used in this subpart have the following meanings:

American Fisheries Act (AFA) means Title II of Pub. L. 105–277.

Borrower means (individually and collectively) all persons who, after January 1, 2000, harvest fee fish from the IC directed fishing allowance.

Business week means a 7-day period, Saturday through Friday.

Delivery value means the gross ex-vessel value of all fee fish at fish delivery.

Deposit principal means all collected fee revenue that a fish buyer deposits in a segregated deposit account maintained in a federally chartered national bank for the sole purpose of aggregating collected fee revenue before sending the fee revenue to NMFS for repaying the loan.

Fee means the six-tenths (0.6) of one cent that fish buyers deduct at fish delivery from the delivery value of each pound of round weight fee fish.

Fee fish means all pollock harvested from the IC directed fishing allowance beginning on February 10, 2000 and ending at such time as the loan's principal and interest are fully repaid.

Fish buyer means the first ex-vessel fish buyer who purchases fee fish from a fish seller.

Fish delivery means the point at which a fish buyer first takes delivery or possession of fee fish from a fish seller.

Fish seller means the harvester who catches and first sells fee fish to a fish buyer.

IC directed fishing allowance means the directed fishing allowance allocated to the inshore component under section 206(b)(1) of the AFA.

Loan means the loan authorized by section 207(a) of the AFA.

Net delivery value means the delivery value minus the fee.

Subaccount means the Inshore Component Pollock Subaccount of the Fishing Capacity Reduction Fund in the U.S. Treasury for the deposit of all funds involving the loan.

(b) *Loan.* (1) *Principal amount.* The loan's principal amount is \$75,000,000 (seventy five million dollars).

(2) *Interest.* Interest shall, from December 30, 1998, when NMFS disbursed the loan, until the date the borrower fully repays the loan, accrue at a fixed rate of 7.09 percent. Interest shall be simple interest and shall accrue on the basis of a 365-day year.

(3) *Repayment.* The fee shall be the exclusive source of loan repayment. The fee shall be paid on all fee fish.

(4) *Application of fee receipts.* NMFS shall apply all fee receipts it receives, first, to payment of the loan's accrued

interest and, second, to reduction of the loan's principal balance.

(5) *Obligation.* The borrower shall repay the loan in accordance with the AFA and this subpart.

(c) *Fee payment and collection.* (1) *Payment and collection.* (i) The fee is due and payable at the time of fish delivery. Each fish buyer shall collect the fee at the time of fish delivery by deducting the fee from the delivery value before paying or promising later to pay the net delivery value. Each fish seller shall pay the fee at the time of fish delivery by receiving from the fish buyer the net delivery value or the fish buyer's promise later to pay the net delivery value. Regardless of when the fish buyer pays the net delivery value, the fish buyer shall collect the fee at the time of fish delivery;

(ii)(A) Each fish seller shall be deemed, for the purpose of the fee collection, deposit, disbursement, and accounting requirements of this subpart, to be both the fish seller and the fish buyer—and all requirements and penalties under this subpart applicable to both a fish seller and a fish buyer shall equally apply to the fish seller—each time that the fish seller sells fee fish to:

(1) Any fish buyer whose place of business is not located in the United States, who does not take delivery or possession of the fee fish in the United States, who is not otherwise subject to this subpart, or to whom or against whom NMFS cannot otherwise apply or enforce this subpart,

(2) Any fish buyer who is a general food-service wholesaler or supplier, a restaurant, a retailer, a consumer, some other type of end-user, or some other fish buyer not engaged in the business of buying fish from fish sellers for the purpose of reselling the fish, or

(3) Any other fish buyer who the fish seller has good reason to believe is a fish buyer not subject to this subpart or to whom or against whom NMFS cannot otherwise apply or enforce this subpart,

(B) In each such case the fish seller shall, with respect to the fee fish involved in each such case, discharge, in addition to the fee payment requirements of this subpart, all the fee col-

lection, deposit, disbursement, accounting, recordkeeping, and reporting requirements that this subpart otherwise imposes on the fish buyer, and the fish seller shall be subject to all the penalties this subpart provides for a fish buyer's failure to discharge such requirements;

(2) *Notification.* (i) NMFS will send an appropriate fee payment and collection commencement notification to each affected fish seller and fish buyer of whom NMFS has knowledge.

(ii) When NMFS determines that the loan is fully repaid, NMFS will publish a FEDERAL REGISTER notification that the fee is no longer in effect and should no longer be either paid or collected. NMFS will then also send an appropriate fee termination notification to each affected fish seller and fish buyer of whom NMFS has knowledge;

(3) *Failure to pay or collect.* (i) If a fish buyer refuses to collect the fee in the amount and manner that this subpart requires, the fish seller shall then advise the fish buyer of the fish seller's fee payment obligation and of the fish buyer's fee collection obligation. If the fish buyer still refuses to properly collect the fee, the fish seller, within the next 7 calendar days, shall forward the fee to NMFS. The fish seller at the same time shall also advise NMFS in writing of the full particulars, including:

(A) The fish buyer's and fish seller's name, address, and telephone number,

(B) The name of the fishing vessel from which the fish seller made fish delivery and the date of doing so,

(C) The quantity and delivery value of fee fish that the fish seller delivered, and

(D) The fish buyer's reason (if known) for refusing to collect the fee in accordance with this subpart;

(ii) If a fish seller refuses to pay the fee in the amount and manner that this subpart requires, the fish buyer shall then advise the fish seller of the fish buyer's collection obligation and of the fish seller's payment obligation. If the fish seller still refuses to pay the fee, the fish buyer shall then either deduct the fee from the delivery value over the fish seller's protest or refuse to buy the fee fish. The fish buyer shall also, within the next 7 calendar days, advise

§ 600.1101

50 CFR Ch. VI (10–1–05 Edition)

NMFS in writing of the full particulars, including:

(A) The fish buyer's and fish seller's name, address, and telephone number,

(B) The name of the fishing vessel from which the fish seller made or attempted to make fish delivery and the date of doing so,

(C) The quantity and delivery value of fee fish the fish seller delivered or attempted to deliver,

(D) Whether the fish buyer deducted the fee over the fish seller's protest or refused to buy the fee fish, and

(E) The fish seller's reason (if known) for refusing to pay the fee in accordance with this subpart.

(d) *Fee collection deposits, disbursements, records, and reports.* (1) *Deposit accounts.* Each fish buyer that this subpart requires to collect a fee shall maintain a segregated account at a federally insured financial institution for the sole purpose of depositing collected fee revenue and disbursing the fee revenue directly to NMFS in accordance with paragraph (c) of this section.

(2) *Fee collection deposits.* Each fish buyer, no less frequently than at the end of each business week, shall deposit, in the deposit account established under paragraph (a) of this section, all fee revenue, not previously deposited, that the fish buyer has collected through a date not more than 2 calendar days before the date of deposit. Neither the deposit account nor the principal amount of deposits in the account may be pledged, assigned, or used for any purpose other than aggregating collected fee revenue for disbursement to the subaccount in accordance with paragraph (c) of this section. The fish buyer is entitled, at any time, to withdraw deposit interest, if any, but never deposit principal, from the deposit account for the fish buyer's own use and purposes.

(3) *Deposit principal disbursement.* On the last business day of each month, or more frequently if the amount in the account exceeds the account limit for insurance purposes, the fish buyer shall disburse to NMFS the full amount of deposit principal then in the deposit account. The fish buyer shall do this by check made payable to "NOAA Inshore Component Pollock Loan Subaccount." The fish buyer shall mail each such

check to the subaccount lockbox account that NMFS establishes for the receipt of the disbursements of deposit principal. Each disbursement shall be accompanied by the fish buyer's settlement sheet completed in the manner and form that NMFS specifies. NMFS will specify the subaccount's lockbox and the manner and form of settlement sheet by means of the notification in § 600.1101(c).

(4) *Records maintenance.* Each fish buyer shall maintain, in a secure and orderly manner for a period of at least 3 years from the date of each transaction involved, at least the following information:

(i) For all deliveries of fee fish that the fish buyer buys from each fish seller:

(A) The date of delivery,

(B) The fish seller's identity,

(C) The round weight of fee fish delivered,

(D) The identity of the fishing vessel that delivered the fee fish,

(E) The delivery value,

(F) The net delivery value,

(G) The identity of the party to whom the net delivery value is paid, if other than the fish seller,

(H) The date the net delivery value was paid, and

(I) The total fee amount collected;

(ii) For all fee collection deposits to and disbursements from the deposit account:

(A) The dates and amounts of deposits,

(B) The dates and amounts of disbursements to the subaccount's lockbox account, and

(C) The dates and amounts of disbursements to the fish buyer or other parties of interest earned on deposits.

(5) *Annual report.* By January 15, 2001, and by each January 15 thereafter until the loan is fully repaid, each fish buyer shall submit to NMFS a report, on or in the form NMFS specifies, containing the following information for the preceding year for all fee fish each fish buyer purchases from fish sellers:

(i) Total round weight bought;

(ii) Total delivery value paid;

(iii) Total fee amount collected;

(iv) Total fee collection amounts deposited by month;

(v) Dates and amounts of monthly disbursements to the subaccount lockbox;

(vi) Total amount of interest earned on deposits; and

(vii) Depository account balance at year-end.

(6) *State records.* If landing records that a state requires from fish sellers contain some or all of the data that this section requires and state confidentiality laws or regulations do not prevent NMFS' access to the records maintained for the state, then fish buyers can use such records to meet appropriate portions of this section's record-keeping requirements. If, however, state confidentiality laws or regulations make such records unavailable to NMFS, then fish buyers shall maintain separate records for NMFS that meet the requirements of this section.

(7) *Audits.* NMFS or its agents may audit, in whatever manner NMFS believes reasonably necessary for the duly diligent administration of the loan, the financial records of the fish buyers and the fish sellers in order to ensure proper fee payment, collection, deposit, disbursement, accounting, recordkeeping, and reporting. Fish buyers and fish sellers shall make all records of all transactions involving fee fish catches, fish deliveries, and fee payments, collections, deposits, disbursements, accounting, recordkeeping, and reporting available to NMFS or its agents at reasonable times and places and promptly provide all requested information reasonably related to these records that such fish sellers and fish buyers may otherwise lawfully provide. Trip tickets (or similar accounting records establishing the round weight pounds of fee fish that each fish buyer buys from each fish seller each time that each fish buyer does so) are essential audit documentation.

(8) *Confidentiality of records.* NMFS and its auditing agents shall maintain the confidentiality of all data to which NMFS has access under this section and shall neither release the data nor allow the data's use for any purpose other than the purpose of this subpart, unless otherwise required by law; provided, however, that NMFS may aggregate such data so as to preclude their identification with any fish buyer or

any fish seller and use them in the aggregate for other purposes.

(9) *Refunds.* When NMFS determines that the loan is fully repaid, NMFS will refund any excess fee receipts, on a last-in/first-out basis, to the fish buyers. Fish buyers shall return the refunds, on a last-in/first-out basis, to the fish sellers who paid the amounts refunded.

(e) *Late charges.* The late charge to fish buyers for fee payment, collection, deposit, and/or disbursement shall be one and one-half (1.5) percent per month, or the maximum rate permitted by state law, for the total amount of the fee not paid, collected, deposited, and/or disbursed when due to be paid, collected, deposited, and/or disbursed within 5 days of the date due. The full late charge shall apply to the fee for each month or portion of a month that the fee remains unpaid, uncollected, undeposited, and/or undisbursed.

(f) *Enforcement.* In accordance with applicable law or other authority, NMFS may take appropriate action against each fish seller and/or fish buyer responsible for non-payment, non-collection, non-deposit, and/or non-disbursement of the fee in accordance with this subpart to enforce the collection from such fish seller and/or fish buyer of any fee (including penalties and all costs of collection) due and owing the United States on account of the loan that such fish seller and/or fish buyer should have, but did not, pay, collect, deposit, and/or disburse in accordance with this subpart. All such loan recoveries shall be applied to reduce the unpaid balance of the loan.

(g) *Prohibitions and penalties.* (1) The following activities are prohibited, and it is unlawful for anyone to:

(i) Avoid, decrease, interfere with, hinder, or delay payment or collection of, or otherwise fail to fully and properly pay or collect, any fee due and payable under this subpart or convert, or otherwise use for any purpose other than the purpose this subpart intends, any paid or collected fee;

(ii) Fail to fully and properly deposit on time the full amount of all fee revenue collected under this subpart into a deposit account and disburse the full

amount of all deposit principal to the subaccount's lockbox account—all as this subpart requires;

(iii) Fail to maintain full, timely, and proper fee payment, collection, deposit, and/or disbursement records or make full, timely, and proper reports of such information to NMFS—all as this subpart requires;

(iv) Fail to advise NMFS of any fish seller's refusal to pay, or of any fish buyer's refusal to collect, any fee due and payable under this subpart;

(v) Refuse to allow NMFS or agents that NMFS designates to review and audit at reasonable times all books and records reasonably pertinent to fee payment, collection, deposit, disbursement, and accounting under this subpart or otherwise interfere with, hinder, or delay NMFS or its agents in the course of their activities under this subpart;

(vi) Make false statements to NMFS, any of the NMFS' employees, or any of NMFS' agents about any of the matters in this subpart;

(vii) Obstruct, prevent, or unreasonably delay or attempt to obstruct, prevent, or unreasonably delay any audit or investigation NMFS or its agents conduct, or attempt to conduct, in connection with any of the matters in this subpart; and/or

(viii) Otherwise materially interfere with the efficient and effective repayment of the loan.

(2) Anyone who violates one or more of the prohibitions of paragraph (a) of this section is subject to the full range of penalties the Magnuson-Stevens Act and 15 CFR part 904 provide (including, but not limited to: civil penalties, sanctions, forfeitures, and punishment for criminal offenses) and to the full penalties and punishments otherwise provided by any other applicable law of the United States.

§ 600.1102 Pacific Coast groundfish fee.

(a) *Purpose.* This section implements the fee for repaying the reduction loan financing the Pacific Coast Groundfish Program authorized by section 212 of Division B, Title II, of Public Law 108–7 and implemented by a final notification in the FEDERAL REGISTER (July 18, 2003; 68 FR 42613).

(b) *Definitions.* Unless otherwise defined in this section, the terms defined in § 600.1000 of subpart L expressly apply to this section. The following terms have the following meanings for the purpose of this section:

Borrower means, individually and collectively, each post-reduction fishing permit holder and/or fishing vessel owner fishing in the reduction fishery, in any or all of the fee-share fisheries, or in both the reduction fishery and any or all of the fee-share fisheries.

Deposit principal means all collected fee revenue that a fish buyer deposits in an account maintained at a federally insured financial institution for the purpose of aggregating collected fee revenue before sending the fee revenue to NMFS for repaying the reduction loan.

Fee fish means all fish harvested from the reduction fishery during the period in which any portion of the reduction fishery's subamount is outstanding and all fish harvested from each of the fee-share fisheries during the period in which any portion of each fee-share fishery's subamount is outstanding.

Fee-share fishery means each of the fisheries for coastal Dungeness crab and pink shrimp in each of the states of California, Oregon, and Washington.

Fee-share fishery subaccount means each of the six subaccounts established in the groundfish program's fund subaccount in which each of the six fee-share fishery subamounts are deposited.

Reduction fishery means all species in, and that portion of, the limited entry trawl fishery under the Federal Pacific Coast Groundfish Fishery Management Plan that is conducted under permits, excluding those registered to whiting catcher-processors, which are endorsed for trawl gear operation.

Reduction fishery subaccount means the subaccount established in the groundfish program's fund subaccount in which the reduction fishery subamount is deposited.

Subamount means each portion of the reduction loan's original principal amount which is allocated either to the reduction fishery or to any one of the fee-share fisheries.

Fishery Conservation and Management

§ 600.1102

(c) *Reduction loan amount.* The reduction loan's original principal amount is \$35,662,471.

(d) *Subamounts.* The subamounts of the reduction loan amount are:

(1) Reduction fishery, \$28,428,719; and

(2) Fee-share fisheries:

(i) California coastal Dungeness crab fee-share fishery, \$2,334,334,

(ii) California pink shrimp fee-share fishery, \$674,202,

(iii) Oregon coastal Dungeness crab fee-share fishery, \$1,367,545,

(iv) Oregon pink shrimp fee-share fishery, \$2,228,845,

(v) Washington coastal Dungeness crab fee-share fishery, \$369,426, and

(vi) Washington pink shrimp fee-share fishery, \$259,400.

(e) *Interest accrual inception.* Interest began accruing on each portion of the reduction loan amount on and from the date each such portion was disbursed.

(f) *Interest rate.* The reduction loan's interest rate is 6.97 percent. This is a fixed rate of interest for the full term of the reduction loan's life.

(g) *Repayment term.* For the purpose of determining fee rates, the reduction loan's repayment term shall be 30 years from March 1, 2004, but each fee shall continue for as long as necessary to fully repay each subamount.

(h) *Reduction loan.* The reduction loan shall be subject to the provisions of § 600.1012 of subpart L, except that:

(1) The borrower's obligation to repay the reduction loan shall be discharged by fish sellers in the reduction fishery and in each of the fee-share fisheries paying the fee applicable to each such fishery's subamount in accordance with § 600.1013 of subpart L, and

(2) Fish buyers in the reduction fishery and in each of the fee-share fisheries shall be obligated to collect the fee applicable to each such fishery's subamount in accordance with § 600.1013 of this subpart.

(i) *Fee collection, deposits, disbursements, records, and reports.* Fish buyers in the reduction fishery and in each of the fee share fisheries shall deposit and disburse, as well as keep records for and submit reports about, the fees applicable to each such fishery in accordance with § 600.1014 of this subpart, except that:

(1) *Deposit accounts.* Each fish buyer that this section requires to collect a fee shall maintain an account at a federally insured financial institution for the purpose of depositing collected fee revenue and disbursing the deposit principal directly to NMFS in accordance with paragraph (i)(3) of this section. The fish buyer may use this account for other operational purposes as well, but the fish buyer shall ensure that the account separately accounts for all deposit principal collected from the reduction fishery and from each of the six fee-share fisheries. The fish buyer shall separately account for all fee collections as follows:

(i) All fee collections from the reduction fishery shall be accounted for in a reduction fishery subaccount,

(ii) All fee collections from the California pink shrimp fee-share fishery shall be accounted for in a California shrimp fee-share fishery subaccount,

(iii) All fee collections from the California coastal Dungeness crab fishery shall be accounted for in a California crab fee-share fishery subaccount,

(iv) All fee collections from the Oregon pink shrimp fee-share fishery shall be accounted for in an Oregon shrimp fee-share fishery subaccount,

(v) All fee collections from the Oregon coastal Dungeness crab fee-share fishery shall be accounted for in an Oregon crab fee-share fishery subaccount,

(vi) All fee collections from the Washington pink shrimp fee-share fishery shall be accounted for in a Washington shrimp fee-share fishery subaccount, and

(vii) All fee collections from the Washington coastal Dungeness crab fishery shall be accounted for in a Washington crab fee-share fishery subaccount;

(2) *Fee collection deposits.* Each fish buyer, no less frequently than at the end of each month, shall deposit, in the deposit account established under paragraph (i)(1) of this section, all collected fee revenue not previously deposited that the fish buyer collects through a date not more than two calendar days before the date of deposit. The deposit principal may not be pledged, assigned, or used for any purpose other than aggregating collected fee revenue for disbursement to the fund in accordance

with paragraph (i)(3) of this section. The fish buyer is entitled, at any time, to withdraw interest (if any) on the deposit principal, but never the deposit fee principal itself, for the fish buyer's own use and purposes;

(3) *Deposit principal disbursement.* Not later than the 14th calendar day after the last calendar day of each month, or more frequently if the amount in the account exceeds the account limit for insurance purposes, the fish buyer shall disburse to NMFS the full deposit principal then in the deposit account, provided that the deposit principal then totals \$100 or more. If the deposit principal then totals less than \$100, the fish buyer need not disburse the deposit principal until either the next month during which the deposit principal then totals \$100 or more, or not later than the 14th calendar day after the last calendar day of any year in which the deposit principal has not since the last required disbursement totaled \$100 or more, whichever comes first. The fish buyer shall disburse deposit principal by check made payable to the groundfish program's fund subaccount. The fish buyer shall mail each such check to the groundfish program's fund subaccount lockbox that NMFS establishes for the receipt of groundfish program disbursements. Each disbursement shall be accompanied by the fish buyer's fee collection report completed in the manner and form which NMFS specifies. NMFS will, before fee payment and collection begins, specify the groundfish program's fund subaccount lockbox and the manner and form of fee collection report. NMFS will do this by means of the notification in § 600.1013(d) of subpart L. NMFS' fee collection report instructions will include provisions for the fish buyer to specify the amount of each disbursement which was disbursed from the reduction fishery subaccount and/or from each of the six fee-share fishery subaccounts;

(4) *Records maintenance.* Each fish buyer shall maintain, in a secure and orderly manner for a period of at least 3 years from the date of each transaction involved, at least the following information:

(i) For all deliveries of fee fish that the fish buyer buys from each fish seller:

- (A) The date of delivery,
- (B) The fish seller's identity,
- (C) The weight, number, or volume of each species of fee fish delivered,
- (D) Information sufficient to specifically identify the fishing vessel which delivered the fee fish,
- (E) The delivery value of each species of fee fish,
- (F) The net delivery value of each species of fee fish,
- (G) The identity of the payor to whom the net delivery value is paid, if different than the fish seller,
- (H) The date the net delivery value was paid,

(I) The total fee amount collected as a result of all fee fish, and

(J) The total fee amount collected as a result of all fee fish from the reduction fishery and/or all fee fish from each of the six fee-share fisheries; and

(ii) For all collected fee deposits to, and disbursements of deposit principal from, the deposit account include:

- (A) The date of each deposit,
- (B) The total amount deposited,
- (C) The total amount deposited in the reduction fishery subaccount and/or in each of the six fee-share fishery subaccounts,
- (D) The date of each disbursement to the Fund's lockbox,
- (E) The total amount disbursed,
- (F) The total amount disbursed from the reduction fishery subaccount and/or from each of the six fee-share fishery subaccounts, and

(G) The dates and amounts of disbursements to the fish buyer, or other parties, of interest earned on deposits; and

(5) *Annual report.* No fish buyer needs to submit an annual report about fee fish collection activities unless, during the course of an audit under § 600.1014(g), NMFS requires a fish buyer to submit such a report or reports.

(j) Other provisions. The reduction loan is, in all other respects, subject to the provisions of § 600.1012 through applicable portions of § 600.1017, except § 600.1014(e).

[70 FR 40229, July 13, 2005]

§ 600.1103 Bering Sea and Aleutian Islands (BSAI) Crab species program.

(a) *Purpose.* This section's purpose is to implement the program that Section 144(d) of Division B of Pub. L. 106-554, as amended by section 2201 of Pub. L. 107-20 and section 205 of Pub. L. 107-117, enacted for BSAI crab species.

(b) *Terms.* Unless otherwise defined in this section, the terms defined in § 600.1000 expressly apply to the program for BSAI crab. Likewise, the terms defined in § 679.2 of this chapter also apply to terms not otherwise defined in either § 600.1000 or this section. The following terms used in this section have the following meanings for the purpose of this section:

Acceptance means NMFS' acceptance, on behalf of the United States, of a bid.

Bid means a bidder's irrevocable offer, in response to an invitation to bid under this section, to surrender, to have revoked, to have restricted, to relinquish, to have withdrawn, or to have extinguished by other means, in the manner this section requires, the bidder's reduction fishing interest.

Bid amount means the dollar amount of each bid.

Bidder means either a qualifying bidder bidding alone or a qualifying bidder and a co-bidder bidding together who at the time of bidding holds the reduction fishing interests specified at § 600.1018(e).

Bid crab means the crab that NMFS determines each bidder's reduction/history vessel (see definition) harvested, according to the State of Alaska's records of the documented harvest of crab, from each reduction endorsement fishery and from the Norton Sound fishery during the most recent 5 calendar years in which each reduction endorsement fishery was for any length of time open for directed crab fishing during a 10-calendar-year period beginning on January 1, 1990, and ending on December 31, 1999.

Bid score means the criterion by which NMFS decides in what order to accept bids in the reverse auction this section specifies.

Co-bidder means a person who is not a qualifying bidder, but who at the time of bidding owns the reduction/privilege vessel this section requires to be in-

cluded in a bid and is bidding together with a qualifying bidder.

Crab means the crab species covered by the Fishery Management Plan for the Bering Sea/Aleutian Islands King and Tanner Crabs pursuant to § 679.2 of this chapter.

Crab license means a License Limitation Program license for crab issued pursuant to § 679.4(k)(5) of this chapter.

Crab reduction permit means a non-interim crab license endorsed for one or more reduction endorsement fisheries, regardless of whether it is also endorsed for the Norton Sound fishery.

FSD means NMFS' Financial Services Division, located in NMFS' Silver Spring, MD, headquarters office.

Non-crab reduction permit means a fishing license, including all of its predecessor history, for which a bidder is the holder of record on December 12, 2003 and which was issued based on the fishing history of the bidder's -reduction/history vessel.

Norton Sound fishery means the non-reduction fishery defined in § 679.2 of this chapter as the area/species endorsement for Norton Sound red king and Norton Sound blue king crab.

NVDC means the U.S. Coast Guard's National Vessel Documentation Center located in Falling Waters, WV.

Qualifying bidder means a person who at the time of bidding is the license holder of record of a crab reduction permit.

Qualifying voter means a person who at the time of voting in a referendum is the license holder of record either of an interim or a non-interim crab license, except a crab license whose sole area/species endorsement is for the Norton Sound fishery.

RAM Program means NMFS' Restricted Access Management Program located in NMFS' Juneau, AK, regional office.

Reduction endorsement fishery means any of the seven fisheries that § 679.2 of this chapter defines as area/species endorsements except the area/species endorsement for the Norton Sound fishery.

Reduction fishery means the fishery for all crab covered by the Bering Sea/Aleutian Islands King and Tanner Crabs Fishery Management Plan under

all area/species endorsements that section 679.2 of the chapter defines, except the area/species endorsement for the Norton Sound fishery.

Reduction fishing history means, for each bid, the complete documented harvest of the bidder's reduction/history vessel, upon any part of which such harvest NMFS based issuance of the crab license included in the bid as a crab reduction permit, plus such fishing history, after the issuance of such crab license, of any other vessel upon which the bidder used such crab license.

Reduction fishing interest means, for each bid, the bidder's:

- (1) Reduction fishing privilege (see definition);
- (2) Crab reduction permit;
- (3) Non-crab reduction permit;
- (4) Reduction fishing history (see definition); and
- (5) Any other claim that could in any way qualify the owner, holder, or retainer of any of the reduction components, or any person claiming under such owner, holder, or retainer, for any present or future limited access system fishing license or permit in any United States fishery (including, but not limited to, any harvesting privilege or quota allocation under any present or future individual fishing quota system).

Reduction fishing privilege means the worldwide fishing privileges of a bid's reduction/privilege vessel (see definition).

Reduction/history vessel means the vessel or vessels which generated the reduction fishing history.

Reduction loan sub-amount means the portion of the original principal amount of reduction loan this section specifies each reduction endorsement fishery must repay with interest.

Reduction/privilege vessel means the vessel designated on a crab license on December 12, 2003.

Referendum means a referendum under this section to determine whether voters approve the fee required to repay this program's reduction loan.

Replacement vessel means a reduction/history vessel which replaced the lost or destroyed one whose reduction fishing history qualified during the general qualification period and the endorse-

ment qualification period and, which under the exceptions in Amendment 10, qualified during the recent participation period.

(c) *Relationship to this subpart*—(1) *Provisions that apply.* The provisions of § 600.1000 through § 600.1017 of this subpart apply to this program except as paragraph (c)(2) of this section provides; and

(2) *Provisions that do not apply.* The following sections, or portions of them, of this subpart do not apply to this program:

- (i) All of:
 - (A) Section 600.1001,
 - (B) Section 600.1002,
 - (C) Section 600.1003,
 - (D) Section 600.1004,
 - (E) Section 600.1005,
 - (F) Section 600.1006, and
 - (G) Section 600.1007,
- (ii) The portions of § 600.1008:
 - (A) Pertaining to an implementation plan,
 - (B) Pertaining to a 60-day comment period for a proposed implementation regulation,
 - (C) Pertaining to public hearings in each State that the this program affects,
 - (D) Pertaining to basing the implementation regulation on a business plan,
 - (E) Within paragraphs (d)(1)(ii) through (viii),
 - (F) Within paragraph (d)(2)(ii),
 - (G) Within paragraph (e), and
 - (H) Within paragraph (f) and pertaining to fishing capacity reduction specifications and a subsidized program,
- (iii) The portions of § 600.1009:
 - (A) Pertaining to fishing capacity reduction specifications,
 - (B) Within paragraph (a)(4),
 - (C) Pertaining to a reduction amendment,
 - (D) Within paragraph (a)(5)(ii), to the extent that the paragraph is inconsistent with the requirements of this section,
 - (E) Within paragraph (b)(i), and
 - (F) Pertaining to an implementation plan,
- (iv) The portions of § 600.1010:
 - (A) Within paragraph (b),
 - (B) Pertaining to fishing capacity reduction specifications,

Fishery Conservation and Management

§ 600.1103

(C) Within paragraph (d)(1), and
(D) Within paragraphs (d)(4)(iv) through (vii),

(v) The portions of § 600.1011:

(A) That comprise the last sentence of paragraph (a),

(B) Within paragraph (d), and

(C) Within paragraph (e)(2),

(vi) The portions of § 600.1012:

(A) Within paragraph (b)(3) following the word “subpart”, and

(B) Within paragraph (b)(3), and

(vii) The last sentence of § 600.1014(f).

(d) *Reduction cost financing.* NMFS will use the proceeds of a reduction loan, authorized for this purpose, to finance 100 percent of the reduction cost. The original principal amount of the reduction loan will be the total of all reduction payments that NMFS makes under reduction contracts. This amount shall not exceed \$100 million.

(e) *Who constitutes a bidder.* A bidder is a person or persons who is the:

(1) Holder of record and person otherwise fully and legally entitled to offer, in the manner this section requires, the bid's crab reduction permit and the bid's non-crab reduction permit;

(2) Reduction/privilege vessel owner, title holder of record, and person otherwise fully and legally entitled to offer, in the manner this section requires, the bid's reduction fishing privilege; and

(3) Retainer and person otherwise fully and legally entitled to offer, in the manner this section requires, the bid's reduction fishing history.

(f) *How crab licenses determine qualifying bidders and qualifying voters—*(1) *Non-interim crab licenses.* Each person who is the record holder of a non-interim crab license endorsed for one or more reduction endorsement fisheries is both a qualifying bidder and a qualifying voter and can both bid and vote;

(2) *Interim crab licenses.* Each person who is the record holder of an interim crab license endorsed for one or more reduction endorsement fisheries is a qualifying voter but not a qualifying bidder and can vote but not bid;

(3) *Crab licenses endorsed solely for the Norton Sound Fishery.* Each person who is the record holder of any crab license endorsed solely for the Norton Sound fishery is neither a qualifying bidder

nor a qualifying voter and can neither bid nor vote; and

(4) *Time at which qualifying bidders and voters must hold required crab licenses.* A qualifying bidder must be the record holder of the required crab license at the time the qualifying bidder submits its bid. A qualifying voter must be the record holder of the required crab license at the time the qualifying voter submits its referendum ballot.

(g) *Qualifying bidders and co-bidders—*

(1) *Qualifying bidders bidding alone.* There is no co-bidder when a qualifying bidder owns, holds, or retains all the required components of the reduction fishing interest;

(2) *Qualifying bidders bidding together with co-bidders.* When a qualifying bidder does not own the reduction/privilege vessel, the person who does may be the qualifying bidder's co-bidder; and

(3) *Minimum reduction components that qualifying bidders must hold or retain when bidding with co-bidders.* At a minimum, a qualifying bidder must hold the crab reduction permit and the non-crab reduction permit and retain the reduction fishing history. The reduction/privilege vessel may, however, be owned by another person who is a co-bidder.

(h) *Reduction fishing interest—*(1) *General requirements.* Each bidder must:

(i) In its bid, offer to surrender, to have revoked, to have restricted, to relinquish, to have withdrawn, or to have extinguished by other means, in the manner that this section requires, the reduction fishing interest,

(ii) At the time of bidding, hold, own, or retain the reduction fishing interest and be fully and legally entitled to offer, in the manner that this section requires, the reduction fishing interest, and

(iii) Continuously thereafter hold, own, or retain the reduction fishing interest and remain fully and legally entitled to offer, in the manner that this section requires, the reduction fishing interest until:

(A) The bid expires without NMFS first having accepted the bid,

(B) NMFS notifies the bidder that NMFS rejects the bid,

(C) NMFS notifies the bidder that a reduction contract between the bidder

and the United States no longer exists, or

(D) NMFS tenders reduction payment to the bidder;

(2) *Reduction/privilege vessel requirements.* The reduction/privilege vessel in each bid must be:

(i) The vessel designated, at the time this final rule is published in the FEDERAL REGISTER, on a crab license which becomes a bid's crab reduction permit, and

(ii) Be neither lost nor destroyed at the time of bidding;

(3) *Reduction fishing privilege requirements.* The reduction fishing privilege in each bid must be the reduction/privilege vessel's:

(i) Fisheries trade endorsement under the Merchant Marine Act, 1936 (46 U.S.C.A. 12108),

(ii) Qualification for any present or future U.S. Government approval under section (9)(c)(2) of the Shipping Act, 1916 (46 U.S.C. App. 808(c)(2)) for placement under foreign registry or operation under the authority of a foreign country, and

(iii) Any other privilege to ever fish anywhere in the world;

(4) *Crab reduction permit requirements.*

(i) Except as otherwise provided in paragraph (i) of this section, the crab reduction permit must in each bid:

(A) Be the crab license that NMFS issued on the basis of the bidder's reduction fishing history,

(B) Be non-interim at the time each bidder submits its bid, and

(C) Include an area/species endorsement for any one or more reduction endorsement fisheries,

(ii) Although the Norton Sound fishery is not a reduction endorsement fishery, an area/species endorsement for the Norton Sound fishery occurring on a crab reduction permit must be surrendered and revoked (and all fishing history involving it relinquished) in the same manner as all other reduction endorsement fisheries occurring on the crab reduction permit;

(5) *Non-crab reduction permit requirements.* The non-crab reduction permit must in each bid be every license, permit, or other harvesting privilege that:

(i) NMFS issued on the basis of the fishing history of the bidder's reduction/history vessel, and

(ii) For which the bidder was the license holder of record on the effective date of this section; and

(6) *Reduction fishing history requirements.* Except as otherwise provided in paragraph (i) of this section, the reduction fishing history in each bid must that of a single reduction/history vessel.

(i) *Exceptions to the reduction fishing interest requirements*—(1) *Lost or destroyed vessel salvaged.* When a bidder has salvaged a lost or destroyed vessel and has made from the salvaged vessel the documented harvest of crab § 679.4(k)(5)(iii)(B)(3) of this chapter requires, the crab portion of the reduction fishing history is the salvaged vessel's documented harvest of crab; and

(2) *Lost or destroyed vessel not salvaged.* When a bidder has not salvaged the lost or destroyed vessel but has made from a replacement vessel the documented harvest of crab § 679.4(k)(5)(iii)(B)(3) of this chapter requires:

(i) The crab portion of the reduction fishing history is the total of the lost or destroyed vessel's documented harvest of crab through the date of such vessel's loss or destruction plus the replacement vessel's documented harvest of crab after such date, and

(ii) For the purposes of this program, the lost or destroyed vessel's documented harvest of crab merges with, and becomes a part of, the replacement vessel's documented harvest of crab; and

(3) *Acquired crab fishing history.* When a bidder, in the manner § 679.4(k)(5)(iv) of this chapter requires, has made a documented harvest of crab from one vessel and has acquired a replacement vessel's documented harvest of crab:

(i) The crab portion of the reduction fishing history is the total of the acquired documented harvest of crab through December 31, 1994, plus the documented harvest of crab after December 31, 1994, of the vessel from which the bidder made the documented crab harvest § 679.4(k)(5)(iv) of this chapter requires, and

(ii) [Reserved]

(iii) For the purposes of this program, the acquired documented harvest of crab merges with, and becomes a

part of, the non-acquired documented harvest of crab.

(j) *Determining value of reduction/history vessels' bid crab*—(1) *In each fishery.* NMFS will determine the dollar value of each reduction/history vessel's bid crab in each reduction endorsement fishery and in the Norton Sound Fishery by multiplying each reduction/history vessel's number of pounds of each species of bid crab by the average ex-vessel price per pound that the State of Alaska annually publishes for each crab species in the bid crab; and

(2) *In all fisheries.* NMFS will determine the dollar value of each reduction/history vessel's bid crab in all reduction endorsement fisheries and in the Norton Sound fishery by adding each of the products of the multiplications in paragraph (j)(1) of this section; and

(3) *Crab excluded from bid crab.* A reduction/history vessel's bid crab may not include, to the extent that NMFS has knowledge:

(i) Triangle tanner crab, grooved tanner crab, and any other crab not involved in the various area/species endorsements,

(ii) Discarded crab,

(iii) Crab caught for personal use,

(iv) Unspecified crab, and

(v) Any other crab for which the dollar value, crab fishery, landing date, or harvesting vessel NMFS cannot, for whatever reason, determine.

(k) *Determining bid score.* NMFS will determine each bid score by dividing each bid amount by the sum in paragraph (j)(2) of this section.

(l) *Determining reduction loan sub-amount*—(1) *Value of all bid crab in each fishery.* NMFS will add the dollar value of bid crab of all accepted bidders' reduction/history vessels in each reduction endorsement fishery;

(2) *Value of all bid crab in all fisheries.* NMFS will add the dollar value of bid crab of all accepted bidders' reduction/history vessels in all reduction endorsement fisheries plus the Norton Sound fishery;

(3) *Each fishery as a percentage of all fisheries.* NMFS will divide each of the sums in paragraph (l)(1) of this section by the sum in paragraph (l)(2) of this section. The result of this calculation will be the dollar value of all bid crab

in each reduction endorsement fishery as a percentage of the dollar value of all bid crab in all reduction endorsement fisheries plus the Norton Sound fishery;

(4) *Applying percentages to loan amount.* NMFS will multiply the reduction loan's full original principal amount by each of the yields in paragraph (l)(3) of this section; and

(5) *Loan sub-amount.* Each of the amounts resulting from the calculation in paragraph (l)(4) of this section will be the reduction loan subamount that a reduction endorsement fishery must repay.

(m) *Prospectively qualifying bidder and voter notification*—(1) *General.* At the appropriate point before issuing an invitation to bid, NMFS will publish a notification in the FEDERAL REGISTER listing all persons who at the time of publishing the notification prospectively are qualifying bidders and qualifying voters;

(2) *Qualifying bidder list.* The prospectively qualifying bidder list will include the names and addresses of record of each license holder of record for all non-interim crab licenses except only crab licenses whose sole area/species endorsement is for the Norton Sound fishery;

(3) *Qualifying voter list.* The prospectively qualifying voter list will include the names and addresses of record of each license holder of record for all non-interim and interim crab licenses except only crab licenses whose sole area/species endorsement is for the Norton Sound fishery;

(4) *Basis of lists.* NMFS will base both the lists on the RAM Program's license holder records for crab licenses meeting the requirements of § 679.4(k)(5) of this chapter as well as the requirements of this section;

(5) *Purpose.* The purpose of the notification is to provide the public notice of:

(i) The prospectively qualifying bidders, and

(ii) The prospectively qualifying voters; and

(6) *Public comment.* Any person who wants to comment about the notification has 30 days from the notification's publication date to do so. Persons should send their comments to both

FSD and the RAM Program (at addresses that the notification will specify). Comments may address:

- (i) Persons who appear on one or more lists but should not,
- (ii) Persons who do not appear on one or more lists but should, and
- (iii) Persons who believe their names and/or business mailing addresses appearing on one or more lists are incorrect.

(n) *Invitation to bid*—(1) *Notification*. At the appropriate point after issuing the notification in paragraph (m) of this section, NMFS will publish the invitation to bid in the FEDERAL REGISTER notification further specified in § 600.1009(c) of this subpart, along with a bidding form and terms of capacity reduction agreement. No person may, however, bid at this stage;

(2) *Notification contents*. The invitation to bid notification will state all applicable bid submission requirements and procedures (including, but not limited to, those included in this section). In particular, the invitation to bid notification will:

- (i) State the date on which NMFS will invite bids by mailing an invitation to bid to each person on the prospectively qualifying bidder list,
- (ii) State a bid opening date, before which a bidder may not bid, and a bid closing date, after which a bidder may not bid,
- (iii) State a bid expiration date after which each bid expires unless, prior to that date, NMFS accepts the bid by mailing a written acceptance notice to the bidder at the bidder's address of record,
- (iv) State the manner of bid submission and the information each bidder must submit for NMFS to deem a bid responsive,
- (v) State any other information required for bid submission, and
- (vi) Include a facsimile of the invitation to bid, along with a bidding form and terms of capacity reduction agreement comprising the entire terms and conditions of the reduction contract under which each bidder must bid and under which NMFS must accept a bid; and

(3) *Mailing*. On the date specified in this notification, NMFS will invite bids by mailing the invitation to bid

and a bidding package, including a bidding form terms of capacity reduction agreement, to each person then on the prospectively qualifying bidder list. NMFS will not mail the invitation to bid to any potential co-bidder because NMFS will not then know which bids may include a co-bidder. Each qualifying bidder is solely responsible to have any required co-bidder properly complete the bid. No person may bid before receiving the invitation to bid and the bidding package that NMFS mailed to that person.

(o) *Bids*—(1) *Content*. Each invitation to bid that NMFS mails to a qualifying bidder will have a bid form requiring each bid to:

- (i) Identify, by name, regular mail address, telephone number, and (if available) electronic mail address, the qualifying bidder and each co-bidder,
- (ii) State the bid amount in U.S. dollars,
- (iii) Identify, by crab license number, the qualifying bidder's crab reduction permit and include an exact copy of this crab license (which the RAM Program issued),
- (iv) Identify, by vessel name and official number, the bidder's reduction/privilege vessel, and include an exact copy of this vessel's official document (which NVDC issued),
- (v) Identify, by license or permit number, each of the bidder's non-crab reduction permits; and include an exact copy of each of these licenses or permits (which the RAM Program issued for licenses or permits involving species under the jurisdiction of NMFS' Alaska Region and which other NMFS offices issued for licenses or permits involving species under those offices' jurisdiction),
- (vi) Identify, separately for crab and for each other species:
 - (A) The qualifying bidder's reduction fishing history, and
 - (B) The dates that each portion of the reduction fishing history encompasses; the name and official number of the reduction/history vessel or vessels which gave rise to it; and the dates during which the qualifying bidder owned such vessels or, if the qualifying bidder acquired any reduction fishing history from another person, the name of the person from which the qualifying

bidder acquired such reduction fishing history and the manner in which and the date on which the qualifying bidder did so,

(vii) State, declare, and affirm that the qualifying bidder holds the crab reduction permit and retains the complete reduction fishing history, and is fully and legally entitled to offer both in the manner this section requires,

(viii) State, declare, and affirm that either the qualifying bidder or the co-bidder owns the reduction/privilege vessel and holds the non-crab reduction permit and is fully and legally entitled to offer both in the manner that this section requires, and

(ix) Provide any other information or materials that NMFS believes is necessary and appropriate; and

(2) *Rejection.* NMFS, regardless of bid scores, will reject any bid that NMFS believes is unresponsive to the invitation to bid. All bid rejections will constitute final agency action as of the date of rejection. Before rejection, NMFS may, however, contact any bidder to attempt to correct a bid deficiency if NMFS, in its discretion, believes the attempt warranted.

(p) *Acceptance*—(1) *Reverse auction.* NMFS will determine which responsive bids NMFS accepts by using a reverse auction in which NMFS first accepts the responsive bid with the lowest bid score and successively accepts each additional responsive bid with the next lowest bid score until either there are no more responsive bids to accept or acceptance of the last responsive bid with the next lowest bid score would cause the reduction cost to exceed \$100 million. If two or more responsive bid scores are exactly the same, NMFS will first accept the bid that NMFS first received;

(2) *Notification.* NMFS will, after the conclusion of a successful referendum, notify accepted bidders that NMFS had, before the referendum, accepted their bids; and

(3) *Post-acceptance reduction permit transfer.* After NMFS has accepted bids, neither the RAM Program (nor any other NMFS office) will transfer to other persons any reduction permits that accepted bidders included in the bids unless and until FSD advises the RAM Program (or some other NMFS

office) that the resulting reduction contracts are no longer in effect because a referendum failed to approve the fee that this section requires to repay this program's reduction loan.

(q) *Reduction contracts subject to successful post-bidding referendum condition.* Although this program involves no fishing capacity reduction specifications under this subpart, each bid, each acceptance, and each reduction contract is nevertheless subject to the successful post-bidding referendum condition that § 600.1009(a)(3) of this subpart specifies for bidding results that do not conform to the fishing capacity reduction specifications.

(r) *Post-bidding referendum*—(1) *Purpose.* NMFS will conduct a post-bidding referendum whose sole purpose is to determine whether, based on the bidding results, qualifying voters who cast referendum ballots in the manner that this section requires authorize the fee required to repay this program's reduction loan;

(2) *Manner of conducting.* NMFS will mail a referendum ballot to each person then on the prospectively qualifying voter list for each crab license that the person holds and otherwise conduct the referendum as specified in § 600.1010 of this subpart;

(3) *One vote per crab license.* Each qualifying voter may cast only one vote for each crab license that each qualifying voter holds;

(4) *Crab license numbers on ballots.* Each referendum ballot that NMFS mails will contain the license number of the prospectively qualifying voter's crab license to which the ballot relates;

(5) *Potential reduction results stated.* Each referendum ballot that NMFS mails will state the aggregate potential reduction results of all the bids that NMFS accepted, including:

(i) The amount of reduction that all accepted bids potentially effect, including:

(A) The number of crab reduction permits, together with each area/species endorsement for which each of these licenses is endorsed,

(B) The number of reduction/privilege vessels and reduction/history vessels, and

(C) The aggregate and average dollar value of bid crab (together with the

number of pounds of bid crab upon which NMFS based the dollar value), in each reduction endorsement fishery and in the reduction fishery, for all reduction/history vessels during the period for which NMFS calculates the dollar value of bid crab,

(ii) The reduction loan sub-amount that each reduction endorsement fishery must repay if a referendum approves the fee, and

(iii) Any other useful information NMFS may then have about the potential sub-fee rate initially necessary in each reduction endorsement fishery to repay each reduction loan sub-amount; and

(6) *Notice that condition fulfilled.* If the referendum is successful, NMFS will notify accepted bidders, in the manner that § 600.1010(d)(6)(iii) of this subpart specifies, that a successful referendum has fulfilled the reduction contracts' successful post-bidding referendum condition specified in paragraph (q) of this section.

(s) *Reduction method.* In return for each reduction payment, NMFS will permanently:

(1) Revoke each crab reduction permit;

(2) Revoke each non-crab reduction permit;

(3) Revoke each reduction fishing privilege (which revocation will run with the reduction/privilege vessel's title in the manner § 600.1009(a)(5)(ii)(A) of this subpart requires and in accordance with 46 U.S.C. 12108(d));

(4) Effect relinquishment of each reduction fishing history for the purposes specified in this section by noting in the RAM Program records (or such other records as may be appropriate for reduction permits issued elsewhere) that the reduction fishing history has been relinquished under this section and will never again be available to anyone for any fisheries purpose; and

(5) Otherwise restrict in accordance with this subpart each reduction/privilege vessel and fully effect the surrender, revocation, restriction, relinquishment, withdrawal, or extinguishment by other means of all components of each reduction fishing interest.

(t) *Reduction payment tender and disbursement—(1) Fishing continues until tender.* Each accepted bidder may con-

tinue fishing as it otherwise would have absent the program until NMFS, after a successful referendum, tenders reduction payment to the accepted bidder;

(2) *Notification to the public.* After a successful referendum but before tendering reduction payment, NMFS will publish a notification in the FEDERAL REGISTER listing all proposed reduction payments and putting the public on notice;

(i) Of the crab reduction permits, the reduction/privilege vessels, the reduction fishing histories, and the non-crab reduction permits upon whose holding, owning, retaining, or other legal authority representations accepted bidders based their bids and NMFS based its acceptances, and

(ii) That NMFS intends, in accordance with the reduction contracts, to tender reduction payments in return for the actions specified in paragraph (s) of this section;

(3) *Public response.* The public has 30 days after the date on which NMFS publishes the reduction payment tender notification to advise NMFS in writing of any holding, owning, or retaining claims that conflict with the representations upon which the accepted bidders based their bids and on which NMFS based its acceptances;

(4) *Tender and disbursement parties.* NMFS will tender reduction payments only to accepted bidders, unless otherwise provided contrary written instructions by accepted bidders. Creditors or other parties with secured or other interests in reduction/privilege vessels or reduction permits are responsible to make their own arrangements with accepted bidders;

(5) *Time of tender.* At the end of the reduction payment tender notification period, NMFS will tender reduction payments to accepted bidders, unless NMFS then knows of a material dispute about an accepted bidder's authority to enter into the reduction contract with respect to any one or more components of the reduction fishing interest that warrants, in NMFS' discretion, an alternative course of action;

(6) *Method of tender and disbursement.* NMFS will tender reduction payment by requesting from each accepted bidder specific, written instructions for

paying the reduction payments. Upon receipt of these payment instructions, NMFS will immediately disburse reduction payments in accordance with the payment instructions; and

(7) *Effect of tender.* Concurrently with NMFS' tender of reduction payment to each accepted bidder:

(i) All fishing activity for any species anywhere in the world in any way associated with each accepted bidder's reduction fishing interest must cease,

(ii) Each accepted bidder must retrieve all fixed fishing gear for whose deployment the accepted bidder's reduction/privilege vessel was responsible, and

(iii) NMFS will fully exercise its reduction contract rights with respect to the reduction fishing interest by taking the actions specified in paragraph (s) of this section.

(u) *Fee payment and collection*—(1) *Fish sellers who pay the fee.* Any person who harvests any crab, but whom ADF&G's fisheries reporting requirements do not require to record and submit an ADF&G fish ticket for that crab, is a fish seller for the purpose of paying any fee on that crab and otherwise complying with the requirements of § 600.1013 of this subpart;

(2) *Fish buyers who collect the fee.* Any person whom ADF&G's fisheries reporting requirements require to record and submit an ADF&G fish ticket for any crab that another person harvested is a fish buyer for the purpose of collecting the fee on that crab and otherwise complying with the requirements of § 600.1013 of this subpart; and

(3) *Persons who are both fish sellers and fish buyers and both pay and collect the fee.* Any person who harvests any crab, and whom ADF&G's fisheries reporting requirements require to record and submit an ADF&G fish ticket for that crab, is both a fish seller and a fish buyer for the purpose of paying and collecting the fee on that crab and otherwise complying with the requirements of § 600.1013 of this subpart.

(v) *Fishing prohibition and penalties*—(1) *General.* Fishing, for the purpose of this section, includes the full range of activities defined in the term "fishing" in the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801),

(2) *Prohibitions.* Concurrently with NMFS' tender of each reduction payment, and with the sole exception in paragraph (t)(7)(i) of this section, no person whatsoever may, and it is unlawful for any person to:

(i) Fish with or attempt to fish with, or allow others to fish with or attempt to fish with, the reduction/privilege vessel anywhere in the world for any species under any conditions and regardless of the reduction/privilege vessel's ownership or registry for so long as the reduction/privilege vessel exists. This prohibition includes, but is not limited to, fishing on the high seas or in the jurisdiction of any foreign country (to the extent prohibited by law) while operating under U.S. flag,

(ii) Place or attempt to place, or allow others to place or attempt to place, the reduction/privilege vessel under foreign flag or registry,

(iii) Operate or attempt to operate, or allow others to operate or attempt to operate, the reduction/privilege vessel under the authority of a foreign country to the extent prohibited by law,

(iv) Otherwise avoid or attempt to avoid, or allow others to avoid or attempt to avoid, the revocation of the reduction fishing privilege with respect to any reduction/privilege vessel, and

(v) Make any claim or attempt to make any claim, or allow others to claim or attempt to make any claim, for any present or future limited access fishing license or permit in any U.S. fishery (including, but not limited to, any quota allocation under any present or future individual quota allocation system) based in any way on any portion of a reduction fishing interest surrendered, revoked, restricted, relinquished, withdrawn, or extinguished by other means under this section; and

(3) *Penalties.* The activities that this paragraph prohibits are subject to the full penalties provided in § 600.1017 of this subpart, and immediate cause for NMFS to take action to, among other things:

(i) At the reduction/privilege vessel owner's expense, seize and scrap the reduction/privilege vessel, and

(ii) Pursue such other remedies and enforce such other penalties as may be applicable.

§ 600.1104

50 CFR Ch. VI (10–1–05 Edition)

(w) *Program administration*—(1) *FSD responsibilities*. FSD is responsible for implementing and administering this program. FSD will:

- (i) Issue all notifications and mailings that this section requires,
- (ii) Prepare and issue the invitation to bid,
- (iii) Receive bids,
- (iv) Reject bids,
- (v) Score bids,
- (vi) Make acceptances,
- (vii) Prepare and issue referendum ballots,
- (viii) Receive referendum ballots,
- (ix) Tally referendum ballots,
- (x) Determine referendum success or failure,
- (xi) Tender and disburse reduction payments,
- (xii) Administer reduction contracts,
- (xiii) Administer fees and reduction loan repayment, and
- (xiv) Discharge all other management and administration functions that this section requires;

(2) *RAM Program responsibilities*. Upon FSD's advice, the RAM Program (for fishing licenses under the jurisdiction of NMFS's Alaska Region) and any other appropriate NMFS authority (for fishing licenses under the jurisdiction of any other NMFS office) will revoke reduction permits and effect the surrender of fishing histories in accordance with this section; and

(3) *NVDC and MARAD responsibilities*. FSD will advise NVDC, MARAD, such other agency or agencies as may be involved, or all of them to revoke reduction/privilege vessels' fisheries trade endorsements and otherwise restrict reduction/privilege vessels in accordance with this section.

(x) *Reduction loan and reduction loan sub-amounts*. [Reserved]

[68 FR 69337, Dec. 12, 2003. Redesignated at 69 FR 53362, Sept. 1, 2004]

§ 600.1104 Bering Sea and Aleutian Islands (BSAI) crab species fee payment and collection system.

(a) *Purpose*. As authorized by Public Law 106–554, this section's purpose is to:

(1) In accordance with § 600.1012 of subpart L, establish:

(i) The borrower's obligation to repay a reduction loan, and

(ii) The loan's principal amount, interest rate, and repayment term; and

(2) In accordance with § 600.1013 through § 600.1016 of subpart L, implement an industry fee system for the reduction fishery.

(b) *Definitions*. Unless otherwise defined in this section, the terms defined in § 600.1000 of subpart L and § 600.1103 of this subpart expressly apply to this section. The following terms have the following meanings for the purpose of this section:

Crab rationalization crab means the same as in § 680.2 of this chapter.

Crab rationalization fisheries means the same as in § 680.2 of this chapter.

Reduction endorsement fishery means any of the seven fisheries that § 679.2 of this chapter formerly (before adoption of part 680 of this chapter) defined as crab area/species endorsements, except the area/species endorsement for Norton Sound red king. More specifically, the reduction endorsement fisheries, and the crab rationalization fisheries which (after adoption of part 680 of this chapter) correspond to the reduction endorsement fisheries, are:

(1) Bristol Bay red king (the corresponding crab rationalization fishery is Bristol Bay red king crab),

(2) Bering Sea and Aleutian Islands Area *C. opilio* and *C. bairdi* (the corresponding crab rationalization fisheries are two separate fisheries, one for Bering Sea snow crab and another for Bering Sea Tanner crab),

(3) Aleutian Islands brown king (the corresponding crab rationalization fisheries are the two separate fisheries, one for Eastern Aleutian Islands golden king crab and another for Western Aleutian Islands golden king crab),

(4) Aleutian Islands red king (the corresponding crab rationalization fishery is Western Aleutian Islands red king crab),

(5) Pribilof red king and Pribilof blue king (the corresponding crab rationalization fishery is Pribilof red king and blue king crab), and

(6) St. Matthew blue king (the corresponding crab rationalization fishery is also St. Matthew blue king crab).

Reduction fishery means the fishery for all crab rationalization crab in all crab rationalization fisheries. *Sub-*

Fishery Conservation and Management

§ 600.1202

amount means the portion of the reduction loan amount for whose repayment the borrower in each reduction endorsement fishery is obligated.

(c) *Reduction loan amount.* The reduction loan's original principal amount is \$97,399,357.11.

(d) *Sub-amounts.* The sub-amounts are:

(1) For Bristol Bay red king, \$17,129,957.23;

(2) For Bering Sea and Aleutian Islands Area *C. opilio* and *C. bairdi*, \$66,410,767.20;

(3) For Aleutian Islands brown king, \$6,380,837.19;

(4) For Aleutian Islands red king, \$237,588.04;

(5) For Pribilof red king and Pribilof blue king, \$1,571,216.35; and

(6) For St. Matthew blue king, \$5,668,991.10.

(e) *Interest accrual from inception.* Interest began accruing on each portion of the reduction loan amount on and from the date on which NMFS disbursed each such portion.

(f) *Interest rate.* The reduction loan's interest rate shall be the applicable rate which the U.S. Treasury determines at the end of fiscal year 2005 plus 2 percent.

(g) *Repayment term.* For the purpose of determining fee rates, the reduction loan's repayment term is 30 years from January 19, 2005, but each fee shall continue indefinitely for as long as necessary to fully repay each subamount.

(h) *Reduction loan repayment.* (1) The borrower shall, in accordance with § 600.1012, repay the reduction loan;

(2) Fish sellers in each reduction endorsement fishery shall, in accordance with § 600.1013, pay the fee at the rate applicable to each such fishery's subamount;

(3) Fish buyers in each reduction endorsement fishery shall, in accordance with § 600.1013, collect the fee at the rate applicable to each such fishery;

(4) Fish buyers in each reduction endorsement fishery shall, in accordance with § 600.1014, deposit and disburse, as well as keep records for and submit reports about, the fees applicable to each such fishery; and,

(5) The reduction loan is, in all other respects, subject to the provisions of § 600.1012 through § 600.1017.

[70 FR 54656, Sept. 16, 2005]

EFFECTIVE DATE NOTE: At 70 FR 54656, Sept. 16, 2005, § 600.1104 was amended by adding text, effective Oct. 17, 2005.

Subpart N—Shark Finning

SOURCE: 67 FR 6200, Feb. 11, 2002, unless otherwise noted. Redesignated at 69 FR 53361, Sept. 1, 2004.

§ 600.1200 Purpose and scope.

The regulations in this subpart govern “shark finning” (the removal of shark fins and discarding of the carcass), the possession of shark fins, and the landing into U.S. ports of shark fins without corresponding carcasses under the authority of the Magnuson-Stevens Act. They implement the Shark Finning Prohibition Act of 2000.

§ 600.1201 Relation to other laws.

(a) The relation of this subpart to other laws is set forth in §§ 600.514 and 600.705 and in paragraphs (b) and (c) of this section.

(b) Regulations pertaining to shark conservation and management for certain shark fisheries are also set forth in this subpart and in parts 635 (for Federal Atlantic Ocean, Gulf of Mexico, and Caribbean shark fisheries), 648 (for spiny dogfish fisheries), and 660 (for fisheries off West Coast states and in the western Pacific) of this chapter governing those fisheries.

(c) Nothing in this regulation supercedes more restrictive state laws or regulations regarding shark finning in state waters.

(d) A person who owns or operates a vessel that has been issued an Atlantic Federal commercial shark limited access permit or a spiny dogfish permit is subject to the reporting and record-keeping requirements found at parts 635 and 648 of this chapter, respectively.

§ 600.1202 Definitions.

(a) In addition to the definitions in the Magnuson-Stevens Act and in § 600.10, the terms used in this subpart have the following meanings:

§ 600.1203

Land or *landing* means offloading fish, or causing fish to be offloaded, from a fishing vessel, either to another vessel or to a shoreside location or facility, or arriving in port, or at a dock, berth, beach, seawall, or ramp to begin offloading fish.

Shark finning means taking a shark, removing a fin or fins (whether or not including the tail), and returning the remainder of the shark to the sea.

(b) If there is any difference between a definition in this section and in § 600.10, the definition in this section is the operative definition for the purposes of this subpart.

§ 600.1203 Prohibitions.

(a) In addition to the prohibitions in §§ 600.505 and 600.725, it is unlawful for any person to do, or attempt to do, any of the following:

(1) Engage in shark finning, as provided in § 600.1204(a) and (i).

(2) Possess shark fins without the corresponding carcasses while on board a U.S. fishing vessel, as provided in § 600.1204(b) and (j).

(3) Land shark fins without the corresponding carcasses, as provided in § 600.1204(c) and (k).

(4) Fail to have all shark fins and carcasses from a U.S. or foreign fishing vessel landed at one time and weighed at the time of the landing, as provided in § 600.1204(d).

(5) Possess, purchase, offer to sell, or sell shark fins taken, landed, or possessed in violation of this section, as provided in § 600.1204(e) and (l).

(6) When requested, fail to allow an authorized officer or any employee of NMFS designated by a Regional Administrator access to and/or inspection or copying of any records pertaining to the landing, sale, purchase, or other disposition of shark fins and/or shark carcasses, as provided in § 600.1204(f).

(7) Fail to have shark fins and carcasses recorded as specified in § 635.30(c)(3) of this chapter.

(8) Fail to have all shark carcasses and fins landed and weighed at the same time if landed in an Atlantic coastal port, and to have all weights recorded on the weighout slips specified in § 635.5(a)(2) of this chapter.

(9) Fail to maintain a shark intact through landing as specified in

50 CFR Ch. VI (10–1–05 Edition)

§§ 600.1204(h) and 635.30(c)(4) of this chapter.

(b)(1) For purposes of this section, it is a rebuttable presumption that shark fins landed by a U.S. or foreign fishing vessel were taken, held, or landed in violation of this section if the total weight of the shark fins landed exceeds 5 percent of the total dressed weight of shark carcasses on board or landed from the fishing vessel.

(2) For purposes of this section, it is a rebuttable presumption that shark fins possessed by a U.S. fishing vessel were taken and held in violation of this section if the total weight of the shark fins on board, or landed, exceeds 5 percent of the total dressed weight of shark carcasses on board or landed from the fishing vessel.

§ 600.1204 Shark finning; possession at sea and landing of shark fins.

(a)(1) No person aboard a U.S. fishing vessel shall engage in shark finning in waters seaward of the inner boundary of the U.S. EEZ.

(2) No person aboard a foreign fishing vessel shall engage in shark finning in waters shoreward of the outer boundary of the U.S. EEZ.

(b) No person aboard a U.S. fishing vessel shall possess on board shark fins harvested seaward of the inner boundary of the U.S. EEZ without the corresponding carcass(es), as may be determined by the weight of the shark fins in accordance with § 600.1203(b)(2), except that sharks may be dressed at sea.

(c) No person aboard a U.S. or foreign fishing vessel (including any cargo vessel that received shark fins from a fishing vessel at sea) shall land shark fins harvested in waters seaward of the inner boundary of the U.S. EEZ without corresponding shark carcasses, as may be determined by the weight of the shark fins in accordance with § 600.1203(b)(1).

(d) Except as provided in paragraphs (g) and (h) of this section, a person who operates a U.S. or foreign fishing vessel and who lands shark fins harvested in waters seaward of the inner boundary of the U.S. EEZ shall land all fins and corresponding carcasses from the vessel at the same point of landing and

shall have all fins and carcasses weighed at that time.

(e) A person may not purchase, offer to sell, or sell shark fins taken, landed, or possessed in violation of this section.

(f) Upon request, a person who owns or operates a vessel or a dealer shall allow an authorized officer or any employee of NMFS designated by a Regional Administrator access to, and/or inspection or copying of, any records pertaining to the landing, sale, purchase, or other disposition of shark fins and/or shark carcasses.

(g) A person who owns or operates a vessel that has been issued a Federal Atlantic commercial shark limited access permit and who lands shark in an Atlantic coastal port must have all fins weighed in conjunction with the weighing of the carcasses at the vessel's first point of landing. Such weights must be recorded on the "weighout slips" specified in §635.5(a)(2) of this chapter.

(h) A person who owns or operates a vessel that has not been issued a Federal Atlantic commercial shark limited access permit and who lands shark in or from the U.S. EEZ in an Atlantic coastal port must comply with regulations found at §635.30(c)(4) of this chapter.

(i) No person aboard a vessel that has been issued a Federal Atlantic commercial shark limited access permit shall engage in shark finning.

(j) No person aboard a vessel that has been issued a Federal Atlantic commercial shark limited access permit shall possess on board shark fins without the corresponding carcass(es), as may be determined by the weight of the shark fins in accordance with §600.1203(b)(2), except that sharks may be dressed at sea.

(k) No person aboard a vessel that has been issued a Federal Atlantic commercial shark limited access permit shall land shark fins without the corresponding carcass(es).

(l) A dealer may not purchase from an owner or operator of a fishing vessel issued a Federal Atlantic commercial shark limited access permit who lands shark in an Atlantic coastal port fins whose wet weight exceeds 5 percent of the dressed weight of the carcasses.

PART 622—FISHERIES OF THE CARIBBEAN, GULF, AND SOUTH ATLANTIC

Subpart A—General Provisions

Sec.

- 622.1 Purpose and scope.
- 622.2 Definitions and acronyms.
- 622.3 Relation to other laws and regulations.
- 622.4 Permits and fees.
- 622.5 Recordkeeping and reporting.
- 622.6 Vessel and gear identification.
- 622.7 Prohibitions.
- 622.8 At-sea observer coverage.
- 622.9 Vessel monitoring systems (VMSs).

Subpart B—Effort Limitations

- 622.15 Wreckfish individual transferable quota (ITQ) system.
- 622.16 Red snapper individual transferable quota (ITQ) system.
- 622.17 South Atlantic golden crab controlled access.
- 622.18 South Atlantic snapper-grouper limited access.
- 622.19 South Atlantic rock shrimp limited access.

Subpart C—Management Measures

- 622.30 Fishing years.
- 622.31 Prohibited gear and methods.
- 622.32 Prohibited and limited-harvest species.
- 622.33 Caribbean EEZ seasonal and/or area closures.
- 622.34 Gulf EEZ seasonal and/or area closures.
- 622.35 Atlantic EEZ seasonal and/or area closures.
- 622.36 Seasonal harvest limitations.
- 622.37 Size limits.
- 622.38 Landing fish intact.
- 622.39 Bag and possession limits.
- 622.40 Limitations on traps and pots.
- 622.41 Species specific limitations.
- 622.42 Quotas.
- 622.43 Closures.
- 622.44 Commercial trip limits.
- 622.45 Restrictions on sale/purchase.
- 622.46 Prevention of gear conflicts.
- 622.47 Gulf groundfish trawl fishery.
- 622.48 Adjustment of management measures.

APPENDIX A TO PART 622—SPECIES TABLES

APPENDIX B TO PART 622—GULF AREAS

APPENDIX C TO PART 622—FISH LENGTH MEASUREMENTS

APPENDIX D TO PART 622—SPECIFICATIONS FOR CERTIFIED BRDs

AUTHORITY: 16 U.S.C. 1801 *et seq.*

SOURCE: 61 FR 34934, July 3, 1996, unless otherwise noted.

Subpart A—General Provisions

§ 622.1 Purpose and scope.

(a) The purpose of this part is to implement the FMPs prepared under the Magnuson Act by the CFMC, GMFMC, and/or SAFMC listed in Table 1 of this section.

(b) This part governs conservation and management of species included in the FMPs in or from the Caribbean, Gulf, Mid-Atlantic, South Atlantic, or Atlantic EEZ, as indicated in Table 1 of this section. For the FMPs noted in the following table, conservation and management extends to adjoining state waters for the purposes of data collection and monitoring.

TABLE 1—FMPs IMPLEMENTED UNDER PART 622

FMP title	Responsible fishery management council(s)	Geographical area
Atlantic Coast Red Drum FMP	SAFMC	Mid-Atlantic and South Atlantic.
FMP for Coastal Migratory Pelagic Resources	GMFMC/SAFMC	Gulf, ¹ Mid-Atlantic ^{1,2} and South Atlantic. ^{1,3}
FMP for Coral and Coral Reefs of the Gulf of Mexico	GMFMC	Gulf.
FMP for Coral, Coral Reefs, and Live/Hard Bottom Habitats of the South Atlantic Region.	SAFMC	South Atlantic.
FMP for Corals and Reef Associated Plants and Invertebrates of Puerto Rico and the U.S. Virgin Islands.	CFMC	Caribbean.
FMP for the Dolphin and Wahoo Fishery off the Atlantic States	SAFMC	Atlantic.
FMP for the Golden Crab Fishery of the South Atlantic Region	SAFMC	South Atlantic
FMP for Queen Conch Resources of Puerto Rico and the U.S. Virgin Islands.	CFMC	Caribbean.
FMP for Pelagic Sargassum Habitat of the South Atlantic Region	SAFMC	South Atlantic
FMP for the Red Drum Fishery of the Gulf of Mexico	GMFMC	Gulf. ¹
FMP for the Reef Fish Fishery of Puerto Rico and the U.S. Virgin Islands.	CFMC	Caribbean.
FMP for the Reef Fish Resources of the Gulf of Mexico	GMFMC	Gulf. ¹
FMP for the Shrimp Fishery of the Gulf of Mexico	GMFMC	Gulf. ¹
FMP for the Shrimp Fishery of the South Atlantic Region	SAFMC	South Atlantic.
FMP for the Snapper-Grouper Fishery of the South Atlantic Region ...	SAFMC	South Atlantic. ^{1,4}
FMP for the Spiny Lobster Fishery of Puerto Rico and the U.S. Virgin Islands.	CFMC	Caribbean.

¹ Regulated area includes adjoining state waters for purposes of data collection and quota monitoring.

² Only king and Spanish mackerel and cobia are managed under the FMP in the Mid-Atlantic.

³ Bluefish are not managed under the FMP in the South Atlantic.

⁴ Bank, rock, and black sea bass and scup are not managed by the FMP or regulated by this part north of 35°15.19' N. lat., the latitude of Cape Hatteras Light, NC.

[61 FR 34934, July 3, 1996, as amended at 61 FR 43956, Aug. 27, 1996; 61 FR 65483, Dec. 13, 1996; 63 FR 10565, Mar. 4, 1998; 67 FR 22362, May 3, 2002; 68 FR 57378, Oct. 3, 2003; 69 FR 30240, May 27, 2004]

§ 622.2 Definitions and acronyms.

In addition to the definitions in the Magnuson Act and in § 600.10 of this chapter, and the acronyms in § 600.15 of this chapter, the terms and acronyms used in this part have the following meanings:

Allowable chemical means a substance, generally used to immobilize marine life so that it can be captured alive, that, when introduced into the water, does not take Gulf and South Atlantic prohibited coral and is allowed by Florida for the harvest of tropical fish (e.g., quinaldine, quinaldine compounds, or similar substances).

Allowable octocoral means an erect, nonencrusting species of the subclass Octocorallia, except the seafans *Gorgonia flabellum* and *G. ventalina*, plus the attached substrate within 1 inch (2.54 cm) of an allowable octocoral.

NOTE: An erect, nonencrusting species of the subclass Octocorallia, except the seafans *Gorgonia flabellum* and *G. ventalina*, with attached substrate exceeding 1 inch (2.54 cm) is considered to be live rock and not allowable octocoral.

Aquacultured live rock means live rock that is harvested under a Federal aquacultured live rock permit, as required under § 622.4(a)(3)(iii).

Fishery Conservation and Management

§ 622.2

Atlantic means the North Atlantic, Mid-Atlantic, and South Atlantic.

Authorized statistical reporting agent means:

(1) Any person so designated by the SRD; or

(2) Any person so designated by the head of any Federal or State agency that has entered into an agreement with the Assistant Administrator to collect fishery data.

Automatic reel means a reel that remains attached to a vessel when in use from which a line and attached hook(s) are deployed. The line is payed out from and retrieved on the reel electrically or hydraulically.

Bandit gear means a rod and reel that remain attached to a vessel when in use from which a line and attached hook(s) are deployed. The line is payed out from and retrieved on the reel manually, electrically, or hydraulically.

BRD means bycatch reduction device.

Buoy gear means fishing gear consisting of a float and one or more weighted lines suspended therefrom, generally long enough to reach the bottom. A hook or hooks (usually 6 to 10) are on the lines at or near the end. The float and line(s) drift freely and are retrieved periodically to remove catch and rebait hooks.

Carapace length means the straight-line distance from the orbital notch inside the orbital spine, in a line parallel to the lateral rostral sulcus, to the posterior margin of the cephalothorax. (See Figure 1 in Appendix C of this part.)

Caribbean means the Caribbean Sea around Puerto Rico and the U.S. Virgin Islands.

Caribbean conch resource means one or more of the following species, or a part thereof:

(1) Atlantic triton's trumpet, *Charonia variegata*.

(2) Cameo helmet, *Cassis madagascarensis*.

(3) Caribbean helmet, *Cassis tuberosa*.

(4) Caribbean vase, *Vasum muricatum*.

(5) Flame helmet, *Cassis flammea*.

(6) Green star shell, *Astrea tuber*.

(7) Hawking conch, *Strombus raninus*.

(8) Milk conch, *Strombus costatus*.

(9) Queen conch, *Strombus gigus*.

(10) Roostertail conch, *Strombus gallus*.

(11) True tulip, *Fasciolaria tulipa*.

(12) West Indian fighting conch, *Strombus pugilis*.

(13) Whelk (West Indian top shell), *Cittarium pica*.

Caribbean coral reef resource means one or more of the species, or a part thereof, listed in Table 1 in Appendix A of this part, whether living or dead.

Caribbean prohibited coral means, in the Caribbean; a gorgonian, that is, a Caribbean coral reef resource of the Class Anthozoa, Subclass Octocorallia, Order Gorgonacea; a live rock; or a stony coral, that is, a Caribbean coral reef resource of the Class Hydrozoa (fire corals and hydrocorals) or of the Class Anthozoa, Subclass Hexacorallia, Orders Scleractinia (stony corals) and Antipatharia (black corals); or a part thereof.

Caribbean reef fish means one or more of the species, or a part thereof, listed in Table 2 in Appendix A of this part.

Caribbean spiny lobster means the species *Panulirus argus*, or a part thereof.

CFMC means the Caribbean Fishery Management Council.

Charter vessel means a vessel less than 100 gross tons (90.8 mt) that meets the requirements of the USCG to carry six or fewer passengers for hire and that engages in charter fishing at any time during the calendar year. A charter vessel with a commercial permit, as required under §622.4(a)(2), is considered to be operating as a charter vessel when it carries a passenger who pays a fee or when there are more than three persons aboard, including operator and crew.

Coastal migratory pelagic fish means one or more of the following species, or a part thereof:

(1) Bluefish, *Pomatomus saltatrix* (Gulf of Mexico only).

(2) Cero, *Scomberomorus regalis*.

(3) Cobia, *Rachycentron canadum*.

(4) Dolphin, *Coryphaena hippurus* (Gulf of Mexico only).

(5) King mackerel, *Scomberomorus cavalla*.

(6) Little tunny, *Euthynnus alletteratus*.

(7) Spanish mackerel, *Scomberomorus maculatus*.

§ 622.2

Coral area means marine habitat in the Gulf or South Atlantic EEZ where coral growth abounds, including patch reefs, outer bank reefs, deep water banks, and hard bottoms.

Dealer, in addition to the definition specified in § 600.10 of this chapter, means the person who first receives rock shrimp harvested from the EEZ or dolphin or wahoo harvested from the Atlantic EEZ upon transfer ashore.

Dolphin means the species *Coryphaena equiselis* or *C. hippurus*, or a part thereof, in the Atlantic. (See the definition of *Coastal migratory pelagic fish* for dolphin in the Gulf of Mexico.)

Drift gillnet, for the purposes of this part, means a gillnet, other than a long gillnet or a run-around gillnet, that is unattached to the ocean bottom, regardless of whether attached to a vessel.

Fish trap means—

(1) In the Caribbean EEZ, a trap and its component parts (including the lines and buoys), regardless of the construction material, used for or capable of taking finfish.

(2) In the Gulf EEZ, a trap and its component parts (including the lines and buoys), regardless of the construction material, used for or capable of taking finfish, except a trap historically used in the directed fishery for crustaceans (that is, blue crab, stone crab, and spiny lobster).

(3) In the South Atlantic EEZ, a trap and its component parts (including the lines and buoys), regardless of the construction material, used for or capable of taking fish, except a sea bass pot, a golden crab trap, or a crustacean trap (that is, a type of trap historically used in the directed fishery for blue crab, stone crab, red crab, jonah crab, or spiny lobster and that contains at any time not more than 25 percent, by number, of fish other than blue crab, stone crab, red crab, jonah crab, and spiny lobster).

Fork length means the straight-line distance from the tip of the head (snout) to the rear center edge of the tail (caudal fin). (See Figure 2 in Appendix C of this part.)

Golden crab means the species *Chaceon fenneri*, or a part thereof.

Golden crab trap means any trap used or possessed in association with a di-

50 CFR Ch. VI (10–1–05 Edition)

rected fishery for golden crab in the South Atlantic EEZ, including any trap that contains a golden crab in or from the South Atlantic EEZ or any trap on board a vessel that possesses golden crab in or from the South Atlantic EEZ.

GMFMC means the Gulf of Mexico Fishery Management Council.

Gulf means the Gulf of Mexico. The line of demarcation between the Atlantic Ocean and the Gulf of Mexico is specified in § 600.105(c) of this chapter.

Gulf reef fish means one or more of the species, or a part thereof, listed in Table 3 in Appendix A of this part.

Gulf and South Atlantic prohibited coral means, in the Gulf and South Atlantic, one or more of the following, or a part thereof:

(1) Coral belonging to the Class Hydrozoa (fire corals and hydrocorals).

(2) Coral belonging to the Class Anthozoa, Subclass Hexacorallia, Orders Scleractinia (stony corals) and Antipatharia (black corals).

(3) A seafan, *Gorgonia flabellum* or *G. ventalina*.

(4) Coral in a coral reef, except for allowable octocoral.

(5) Coral in an HAPC, including allowable octocoral.

Handline means a line with attached hook(s) that is tended directly by hand.

HAPC means habitat area of particular concern.

Headboat means a vessel that holds a valid Certificate of Inspection issued by the USCG to carry passengers for hire. A headboat with a commercial vessel permit, as required under § 622.4(a)(2), is considered to be operating as a headboat when it carries a passenger who pays a fee or—

(1) In the case of persons aboard fishing for or possessing South Atlantic snapper-grouper, when there are more persons aboard than the number of crew specified in the vessel's Certificate of Inspection; or

(2) In the case of persons aboard fishing for or possessing coastal migratory pelagic fish or Gulf reef fish, when there are more than three persons aboard, including operator and crew.

Headrope length means the distance, measured along the forwardmost webbing of a trawl net, between the points at which the upper lip (top edge) of the

mouth of the net are attached to sleds, doors, or other devices that spread the net.

Hook-and-line gear means automatic reel, bandit gear, buoy gear, handline, longline, and rod and reel.

Live rock means living marine organisms, or an assemblage thereof, attached to a hard substrate, including dead coral or rock (excluding individual mollusk shells).

Long gillnet means a gillnet that has a float line that is more than 1,000 yd (914 m) in length.

Longline means a line that is deployed horizontally to which gangions and hooks are attached. A longline may be a bottom longline, i.e., designed for use on the bottom, or a pelagic longline, i.e., designed for use off the bottom. The longline hauler may be manually, electrically, or hydraulically operated.

MAFMC means the Mid-Atlantic Fishery Management Council.

Mid-Atlantic means the Atlantic Ocean off the Atlantic coastal states from the boundary between the New England Fishery Management Council and the MAFMC, as specified in § 600.105(a) of this chapter, to the boundary between the MAFMC and the SAFMC, as specified in § 600.105(b) of this chapter.

Migratory group, for king and Spanish mackerel, means a group of fish that may or may not be a separate genetic stock, but that is treated as a separate stock for management purposes. King and Spanish mackerel are divided into migratory groups—the Atlantic migratory group and the Gulf migratory group. The boundaries between these groups are as follows:

(1) *King mackerel*—(i) *Summer separation*. From April 1 through October 31, the boundary separating the Gulf and Atlantic migratory groups of king mackerel is 25°48' N. lat., which is a line directly west from the Monroe/Collier County, FL, boundary to the outer limit of the EEZ.

(ii) *Winter separation*. From November 1 through March 31, the boundary separating the Gulf and Atlantic migratory groups of king mackerel is 29°25' N. lat., which is a line directly east from the Volusia/Flagler County,

FL, boundary to the outer limit of the EEZ.

(2) *Spanish mackerel*. The boundary separating the Gulf and Atlantic migratory groups of Spanish mackerel is 25°20.4' N. lat., which is a line directly east from the Miami-Dade/Monroe County, FL, boundary to the outer limit of the EEZ.

North Atlantic means the Atlantic Ocean off the Atlantic coastal states from the boundary between the United States and Canada to the boundary between the New England Fishery Management Council and the MAFMC, as specified in § 600.105(a) of this chapter.

Off Florida means the waters in the Gulf and South Atlantic from 30°42'45.6" N. lat., which is a line directly east from the seaward terminus of the Georgia/Florida boundary, to 87°31'06" W. long., which is a line directly south from the Alabama/Florida boundary.

Off Georgia means the waters in the South Atlantic from a line extending in a direction of 104° from true north from the seaward terminus of the South Carolina/Georgia boundary to 30°42'45.6" N. lat., which is a line directly east from the seaward terminus of the Georgia/Florida boundary.

Official sunrise or *official sunset* means the time of sunrise or sunset as determined for the date and location in *The Nautical Almanac*, prepared by the U.S. Naval Observatory.

Off Louisiana, Mississippi, and Alabama means the waters in the Gulf other than off Florida and off Texas.

Off North Carolina means the waters in the South Atlantic from 36°34'55" N. lat., which is a line directly east from the Virginia/North Carolina boundary, to a line extending in a direction of 135°34'55" from true north from the North Carolina/South Carolina boundary, as marked by the border station on Bird Island at 33°51'07.9" N. lat., 78°32'32.6" W. long.

Off South Carolina means the waters in the South Atlantic from a line extending in a direction of 135°34'55" from true north from the North Carolina/South Carolina boundary, as marked by the border station on Bird Island at 33°51'07.9" N. lat., 78°32'32.6" W. long., to a line extending in a direction of 104°

§ 622.2

50 CFR Ch. VI (10–1–05 Edition)

from true north from the seaward terminus of the South Carolina/Georgia boundary.

Off Texas means the waters in the Gulf west of a rhumb line from 29°32.1' N. lat., 93°47.7' W. long. to 26°11.4' N. lat., 92°53' W. long., which line is an extension of the boundary between Louisiana and Texas.

Pelagic longline means a longline that is suspended by floats in the water column and that is not fixed to or in contact with the ocean bottom.

Pelagic sargassum means the species *Sargassum natans* or *S. fluitans*, or a part thereof.

Penaeid shrimp trawler means any vessel that is equipped with one or more trawl nets whose on-board or landed catch of brown, pink, or white shrimp (penaeid shrimp) is more than 1 percent, by weight, of all fish comprising its on-board or landed catch.

Powerhead means any device with an explosive charge, usually attached to a speargun, spear, pole, or stick, that fires a projectile upon contact.

Processor means a person who processes fish or fish products, or parts thereof, for commercial use or consumption.

Purchase means the act or activity of buying, trading, or bartering, or attempting to buy, trade, or barter.

Red drum, also called redfish, means *Sciaenops ocellatus*, or a part thereof.

Red snapper means *Lutjanus campechanus*, or a part thereof, one of the Gulf reef fish species.

Regional Administrator (RA), for the purposes of this part, means the Administrator, Southeast Region, NMFS, 9721 Executive Center Drive N., St. Petersburg, FL 33702, or a designee.

Rod and reel means a rod and reel unit that is not attached to a vessel, or, if attached, is readily removable, from which a line and attached hook(s) are deployed. The line is payed out from and retrieved on the reel manually, electrically, or hydraulically.

Run-around gillnet means a gillnet, other than a long gillnet, that, when used, encloses an area of water.

SAFMC means the South Atlantic Fishery Management Council.

Sale or sell means the act or activity of transferring property for money or credit, trading, or bartering, or at-

tempting to so transfer, trade, or barter.

Science and Research Director (SRD), for the purposes of this part, means the Science and Research Director, Southeast Fisheries Science Center, NMFS (see Table 1 of § 600.502 of this chapter).

Sea bass pot means a trap has six rectangular sides and does not exceed 25 inches (63.5 cm) in height, width, or depth.

Shrimp means one or more of the following species, or a part thereof:

(1) Brown shrimp, *Farfantepenaeus aztecus*.

(2) White shrimp, *Litopenaeus setiferus*.

(3) Pink shrimp, *Farfantepenaeus duorarum*.

(4) Royal red shrimp, *Hymenopenaeus robustus*.

(5) Rock shrimp, *Sicyonia brevirostris*.

(6) Seabob shrimp, *Xiphopenaeus kroyeri*.

Shrimp trawler means any vessel that is equipped with one or more trawl nets whose on-board or landed catch of shrimp is more than 1 percent, by weight, of all fish comprising its on-board or landed catch.

SMZ means special management zone.

South Atlantic means the Atlantic Ocean off the Atlantic coastal states from the boundary between the MAFMC and the SAFMC, as specified in § 600.105(b) of this chapter, to the line of demarcation between the Atlantic Ocean and the Gulf of Mexico, as specified in § 600.105(c) of this chapter.

South Atlantic snapper-grouper means one or more of the species, or a part thereof, listed in Table 4 in Appendix A of this part.

Stab net means a gillnet, other than a long gillnet, or trammel net whose weight line sinks to the bottom and submerges the float line.

Total length (TL), for the purposes of this part, means the straight-line distance from the tip of the snout to the tip of the tail (caudal fin), excluding any caudal filament, while the fish is lying on its side. The mouth of the fish may be closed and/or the tail may be squeezed together to give the greatest overall measurement. (See Figure 2 in Appendix C of this part.)

Fishery Conservation and Management

§ 622.4

Toxic chemical means any substance, other than an allowable chemical, that, when introduced into the water, can stun, immobilize, or take marine life.

Trammel net means two or more panels of netting, suspended vertically in the water by a common float line and a common weight line, with one panel having a larger mesh size than the other(s), to entrap fish in a pocket of netting.

Trip means a fishing trip, regardless of number of days duration, that begins with departure from a dock, berth, beach, seawall, or ramp and that terminates with return to a dock, berth, beach, seawall, or ramp.

Try net, also called test net, means a net pulled for brief periods by a shrimp trawler to test for shrimp concentrations or determine fishing conditions (e.g., presence or absence of bottom debris, jellyfish, bycatch, seagrasses).

Wahoo means the species *Acanthocybium solandri*, or a part thereof, in the Atlantic.

Wild live rock means live rock other than aquacultured live rock.

Wreckfish means the species *Polyprion americanus*, or a part thereof, one of the South Atlantic snapper-grouper species.

[61 FR 34934, July 3, 1996, as amended at 61 FR 43956, Aug. 27, 1996; 61 FR 47448, Sept. 9, 1996; 61 FR 65483, Dec. 13, 1996; 62 FR 18539, Apr. 16, 1997; 63 FR 10565, Mar. 4, 1998; 63 FR 18144, Apr. 14, 1998; 64 FR 59125, Nov. 2, 1999; 65 FR 52957, Aug. 31, 2000; 67 FR 51078, Aug. 7, 2002; 68 FR 57378, Oct. 3, 2003; 69 FR 30240, May 27, 2004]

§ 622.3 Relation to other laws and regulations.

(a) The relation of this part to other laws is set forth in § 600.705 of this chapter and paragraphs (b) and (c) of this section.

(b) Except for regulations on allowable octocoral, Gulf and South Atlantic prohibited coral, and live rock, this part is intended to apply within the EEZ portions of applicable National Marine Sanctuaries and National Parks, unless the regulations governing such Sanctuaries or Parks prohibit their application. Regulations on allowable octocoral, Gulf and South Atlantic prohibited coral, and live rock do not apply within the EEZ portions

of the following National Marine Sanctuaries and National Parks:

(1) Everglades National Park (36 CFR 7.45).

(2) Looe Key National Marine Sanctuary (15 CFR part 937).

(3) Fort Jefferson National Monument (36 CFR 7.27).

(4) Key Largo Coral Reef National Marine Sanctuary (15 CFR part 929).

(5) Biscayne National Park (16 U.S.C. 410gg).

(6) Gray's Reef National Marine Sanctuary (15 CFR Part 938).

(7) Monitor Marine Sanctuary (15 CFR part 924).

(c) For allowable octocoral, if a state has a catch, landing, or gear regulation that is more restrictive than a catch, landing, or gear regulation in this part, a person landing in such state allowable octocoral taken from the Gulf or South Atlantic EEZ must comply with the more restrictive state regulation.

(d) General provisions on facilitation of enforcement, penalties, and enforcement policy applicable to all domestic fisheries are set forth in §§ 600.730, 600.735, and 600.740 of this chapter, respectively.

(e) An activity that is otherwise prohibited by this part may be conducted if authorized as scientific research activity, exempted fishing, or exempted educational activity, as specified in § 600.745 of this chapter.

§ 622.4 Permits and fees.

(a) *Permits required.* To conduct activities in fisheries governed in this part, valid permits, licenses, and endorsements are required as follows:

(1) *Charter vessel/headboat permits.* (i) For a person aboard a vessel that is operating as a charter vessel or headboat to fish for or possess, in or from the EEZ, species in any of the following species groups, a valid charter vessel/headboat permit for that species group must have been issued to the vessel and must be on board—

(A) Gulf coastal migratory pelagic fish.

(B) South Atlantic coastal migratory pelagic fish.

(C) Gulf reef fish.

(D) South Atlantic snapper-grouper.

(E) Atlantic dolphin and wahoo. (See paragraph (a)(5) of this section for the

requirements for operator permits in the dolphin and wahoo fishery.)

(ii) See paragraph (r) of this section regarding a moratorium on Gulf charter vessel/headboat permits and the associated provisions.

(iii) See paragraph (r)(12) of this section for an explanation of the requirement for the new charter vessel/headboat permit for South Atlantic coastal migratory pelagic fish and for procedures for initial application and issuance of that permit.

(iv) A charter vessel or headboat may have both a charter vessel/headboat permit and a commercial vessel permit. However, when a vessel is operating as a charter vessel or headboat, a person aboard must adhere to the bag limits. See the definitions of “Charter vessel” and “Headboat” in § 622.2 for an explanation of when vessels are considered to be operating as a charter vessel or headboat, respectively.

(2) *Commercial vessel permits, licenses, and endorsements*—(i) *Fish traps in the Gulf*. For a person to possess or use a fish trap in the EEZ in the Gulf of Mexico, a commercial vessel permit for Gulf reef fish with a fish trap endorsement must have been issued to the vessel and must be on board. See paragraph (n) of this section regarding fish trap endorsements.

(ii) *Gillnets for king mackerel in the southern Florida west coast subzone*. For a person aboard a vessel to use a run-around gillnet for king mackerel in the southern Florida west coast subzone (see § 622.42(c)(1)(i)(A)(3)), a commercial vessel permit for king mackerel and a king mackerel gillnet permit must have been issued to the vessel and must be on board. See paragraph (o) of this section regarding a limited access system applicable to king mackerel gillnet permits and restrictions on transferability of king mackerel gillnet permits.

(iii) *King mackerel*. For a person aboard a vessel to be eligible for exemption from the bag limits and to fish under a quota for king mackerel in or from the Gulf, Mid-Atlantic, or South Atlantic EEZ, a commercial vessel permit for king mackerel must have been issued to the vessel and must be on board. To obtain or renew a commercial vessel permit for king mackerel, at

least 25 percent of the applicant’s earned income, or at least \$10,000, must have been derived from commercial fishing (i.e., harvest and first sale of fish) or from charter fishing during one of the three calendar years preceding the application. See paragraph (q) of this section regarding a limited access system applicable to commercial vessel permits for king mackerel, transfers of permits under the limited access system, and limited exceptions to the earned income or gross sales requirement for a permit.

(iv) *Spanish mackerel*. For a person aboard a vessel to be eligible for exemption from the bag limits and to fish under a quota for Spanish mackerel in or from the Gulf, Mid-Atlantic, or South Atlantic EEZ, a commercial vessel permit for Spanish mackerel must have been issued to the vessel and must be on board. To obtain or renew a commercial vessel permit for Spanish mackerel, at least 25 percent of the applicant’s earned income, or at least \$10,000, must have been derived from commercial fishing (i.e., harvest and first sale of fish) or from charter fishing during one of the 3 calendar years preceding the application.

(v) *Gulf reef fish*. For a person aboard a vessel to be eligible for exemption from the bag limits, to fish under a quota, or to sell Gulf reef fish in or from the Gulf EEZ, a commercial vessel permit for Gulf reef fish must have been issued to the vessel and must be on board. To obtain or renew a commercial vessel permit for Gulf reef fish, more than 50 percent of the applicant’s earned income must have been derived from commercial fishing (i.e., harvest and first sale of fish) or from charter fishing during either of the 2 calendar years preceding the application. See paragraph (m) of this section regarding a limited access system for commercial vessel permits for Gulf reef fish and limited exceptions to the earned income requirement for a permit.

(vi) *South Atlantic snapper-grouper*. For a person aboard a vessel to be eligible for exemption from the bag limits for South Atlantic snapper-grouper in or from the South Atlantic EEZ, to engage in the directed fishery for tilefish in the South Atlantic EEZ, to use a longline to fish for South Atlantic

snapper-grouper in the South Atlantic EEZ, or to use a sea bass pot in the South Atlantic EEZ between 35°15.19' N. lat. (due east of Cape Hatteras Light, NC) and 28°35.1' N. lat. (due east of the NASA Vehicle Assembly Building, Cape Canaveral, FL), a commercial vessel permit for South Atlantic snapper-grouper must have been issued to the vessel and must be on board. A vessel with longline gear and more than 200 lb (90.7 kg) of tilefish on board is considered to be in the directed fishery for tilefish. It is a rebuttable presumption that a fishing vessel with more than 200 lb (90.7 kg) of tilefish on board harvested such tilefish in the EEZ. See §622.18 for limitations on the use, transfer, and renewal of a commercial vessel permit for South Atlantic snapper-grouper.

(vii) *Wreckfish*. For a person aboard a vessel to fish for wreckfish in the South Atlantic EEZ, possess wreckfish in or from the South Atlantic EEZ, off-load wreckfish from the South Atlantic EEZ, or sell wreckfish in or from the South Atlantic EEZ, a commercial vessel permit for wreckfish must have been issued to the vessel and must be on board. To obtain a commercial vessel permit for wreckfish, the applicant must be a wreckfish shareholder; and either the shareholder must be the vessel owner or the owner or operator must be an employee, contractor, or agent of the shareholder. (See §622.15 for information on wreckfish shareholders.)

(viii) *South Atlantic rock shrimp*. (A) For a person aboard a vessel to fish for rock shrimp in the South Atlantic EEZ or possess rock shrimp in or from the South Atlantic EEZ, a commercial vessel permit for rock shrimp must be issued to the vessel and must be on board. (See paragraph (a)(5) of this section for the requirements for operator permits for the South Atlantic rock shrimp fishery.)

(B) In addition, effective July 15, 2003, for a person aboard a vessel to fish for rock shrimp in the South Atlantic EEZ off Georgia or off Florida or possess rock shrimp in or from the South Atlantic EEZ off Georgia or off Florida, a limited access endorsement for South Atlantic rock shrimp must be issued to the vessel and must be on

board. See §622.19 for limitations on the issuance, transfer, renewal, and reissuance of a limited access endorsement for South Atlantic rock shrimp.

(ix) *Gulf red snapper*. For a person aboard a vessel for which a commercial vessel permit for Gulf reef fish has been issued to retain red snapper under the trip limits specified in §622.44(d)(1) or (2), a Class 1 or Class 2 Gulf red snapper license must have been issued to the vessel and must be on board. See paragraph (p) of this section regarding initial issue of red snapper licenses.

(x) *South Atlantic golden crab*. For a person aboard a vessel to fish for golden crab in the South Atlantic EEZ, possess golden crab in or from the South Atlantic EEZ, off-load golden crab from the South Atlantic EEZ, or sell golden crab in or from the South Atlantic EEZ, a commercial vessel permit for golden crab must be issued to the vessel and must be on board. It is a rebuttable presumption that a golden crab on board a vessel in the South Atlantic or off-loaded from a vessel in a port adjoining the South Atlantic was harvested from the South Atlantic EEZ. See §622.17 for limitations on the use, transfer, and renewal of a commercial vessel permit for golden crab.

(xi) *Gulf shrimp*. For a person aboard a vessel to fish for shrimp in the Gulf EEZ or possess shrimp in or from the Gulf EEZ, a valid commercial vessel permit for Gulf shrimp must have been issued to the vessel and must be on board.

(xii) *Atlantic dolphin and wahoo*. (A) For a person aboard a vessel to be eligible for exemption from the bag and possession limits for dolphin or wahoo in or from the Atlantic EEZ or to sell such dolphin or wahoo, a commercial vessel permit for Atlantic dolphin and wahoo must be issued to the vessel and must be on board, except as provided in paragraph (a)(2)(xii)(B) of this section. (See paragraph (a)(5) of this section for the requirements for operator permits in the Atlantic dolphin and wahoo fishery.)

(B) The provisions of paragraph (a)(2)(xii)(A) of this section notwithstanding, a fishing vessel, except a vessel operating as a charter vessel or

§ 622.4

50 CFR Ch. VI (10–1–05 Edition)

headboat, that does not have a commercial vessel permit for Atlantic dolphin and wahoo but has a Federal commercial vessel permit in any other fishery, is exempt from the bag and possession limits for dolphin and wahoo and may sell dolphin and wahoo, subject to the trip and geographical limits specified in § 622.44(f)(2). (A charter vessel/headboat permit is not a commercial vessel permit.)

(3) *Coral permits*—(i) *Allowable chemical*. For an individual to take or possess fish or other marine organisms with an allowable chemical in a coral area, other than fish or other marine organisms that are landed in Florida, a Federal allowable chemical permit must have been issued to the individual. Such permit must be available when the permitted activity is being conducted and when such fish or other marine organisms are possessed, through landing ashore.

(ii) *Allowable octocoral*. For an individual to take or possess allowable octocoral in the Gulf or South Atlantic EEZ, other than allowable octocoral that is landed in Florida, a Federal allowable octocoral permit must have been issued to the individual. Such permit must be available for inspection when the permitted activity is being conducted and when allowable octocoral is possessed, through landing ashore.

(iii) *Aquacultured live rock*. For a person to take or possess aquacultured live rock in the Gulf or South Atlantic EEZ, a Federal aquacultured live rock permit must have been issued for the specific harvest site. Such permit, or a copy, must be on board a vessel depositing or possessing material on an aquacultured live rock site or harvesting or possessing live rock from an aquacultured live rock site.

(iv) *Prohibited coral*. A Federal permit may be issued to take or possess Gulf and South Atlantic prohibited coral or Caribbean prohibited coral only as scientific research activity, exempted fishing, or exempted educational activity. See § 600.745 of this chapter for the procedures and limitations for such activities and fishing.

(v) *Florida permits*. Appropriate Florida permits and endorsements are required for the following activities,

without regard to whether they involve activities in the EEZ or Florida's waters:

(A) Landing in Florida fish or other marine organisms taken with an allowable chemical in a coral area.

(B) Landing allowable octocoral in Florida.

(C) Landing live rock in Florida.

(4) *Dealer permits*. For a dealer to receive Gulf reef fish, golden crab harvested from the South Atlantic EEZ, South Atlantic snapper-grouper, rock shrimp harvested from the South Atlantic EEZ, dolphin or wahoo harvested from the Atlantic EEZ, or wreckfish, a dealer permit for Gulf reef fish, golden crab, South Atlantic snapper-grouper, rock shrimp, Atlantic dolphin and wahoo, or wreckfish, respectively, must be issued to the dealer. To obtain a dealer permit, the applicant must have a valid state wholesaler's license in the state(s) where the dealer operates, if required by such state(s), and must have a physical facility at a fixed location in such state(s).

(5) *Operator permits*. (i) The following persons are required to have operator permits:

(A) An operator of a vessel that has or is required to have a valid permit for South Atlantic rock shrimp issued under this section.

(B) An operator of a vessel that has or is required to have a charter vessel/headboat or commercial permit for Atlantic dolphin and wahoo issued under this section.

(ii) A person required to have an operator permit under paragraph (a)(5)(i) of this section must carry on board such permit and one other form of personal identification that includes a picture (driver's license, passport, etc.).

(iii) An owner of a vessel that is required to have a permitted operator under paragraph (a)(5)(i) of this section must ensure that at least one person with a valid operator permit is aboard while the vessel is at sea or offloading.

(iv) An owner of a vessel that is required to have a permitted operator under paragraph (a)(5)(i) of this section and the operator of such vessel are responsible for ensuring that a person whose operator permit is suspended, revoked, or modified pursuant to subpart

D of 15 CFR part 904 is not aboard that vessel.

(b) *Applications for permits.* Application forms for all permits are available from the RA. Completed application forms and all required supporting documents must be submitted to the RA at least 30 days prior to the date on which the applicant desires to have the permit made effective. All vessel permits are mailed to owners, whether the applicant is an owner or an operator.

(1) *Coral permits.* (i) The applicant for a coral permit must be the individual who will be conducting the activity that requires the permit. In the case of a corporation or partnership that will be conducting live rock aquaculture activity, the applicant must be the principal shareholder or a general partner.

(ii) An applicant must provide the following:

(A) Name, address, telephone number, and other identifying information of the applicant.

(B) Name and address of any affiliated company, institution, or organization.

(C) Information concerning vessels, harvesting gear/methods, or fishing areas, as specified on the application form.

(D) Any other information that may be necessary for the issuance or administration of the permit.

(E) If applying for an aquacultured live rock permit, identification of each vessel that will be depositing material on or harvesting aquacultured live rock from the proposed aquacultured live rock site, specification of the port of landing of aquacultured live rock, and a site evaluation report prepared pursuant to generally accepted industry standards that—

(1) Provides accurate coordinates of the proposed harvesting site so that it can be located using LORAN or Global Positioning System equipment;

(2) Shows the site on a chart in sufficient detail to determine its size and allow for site inspection;

(3) Discusses possible hazards to safe navigation or hindrance to vessel traffic, traditional fishing operations, or other public access that may result from aquacultured live rock at the site;

(4) Describes the naturally occurring bottom habitat at the site; and

(5) Specifies the type and origin of material to be deposited on the site and how it will be distinguishable from the naturally occurring substrate.

(2) *Dealer permits.* (i) The application for a dealer permit must be submitted by the owner (in the case of a corporation, an officer or shareholder; in the case of a partnership, a general partner).

(ii) An applicant must provide the following:

(A) A copy of each state wholesaler's license held by the dealer.

(B) Name, address, telephone number, date the business was formed, and other identifying information of the business.

(C) The address of each physical facility at a fixed location where the business receives fish.

(D) Name, address, telephone number, other identifying information, and official capacity in the business of the applicant.

(E) Any other information that may be necessary for the issuance or administration of the permit, as specified on the application form.

(3) *Vessel permits.* (i) The application for a commercial vessel permit, other than for wreckfish, or for a charter vessel/headboat permit must be submitted by the owner (in the case of a corporation, an officer or shareholder; in the case of a partnership, a general partner) or operator of the vessel. A commercial vessel permit that is issued based on the earned income qualification of an operator is valid only when that person is the operator of the vessel. The applicant for a commercial vessel permit for wreckfish must be a wreckfish shareholder.

(ii) An applicant must provide the following:

(A) A copy of the vessel's valid USCG certificate of documentation or, if not documented, a copy of its valid state registration certificate.

(B) Vessel name and official number.

(C) Name, address, telephone number, and other identifying information of the vessel owner and of the applicant, if other than the owner.

§ 622.4

50 CFR Ch. VI (10–1–05 Edition)

(D) Any other information concerning the vessel, gear characteristics, principal fisheries engaged in, or fishing areas, as specified on the application form.

(E) Any other information that may be necessary for the issuance or administration of the permit, as specified on the application form.

(F) If applying for a commercial vessel permit, documentation, as specified in the instructions accompanying each application form, showing that applicable eligibility requirements of paragraph (a)(2) of this section have been met.

(G) If a fish trap or sea bass pot will be used, the number, dimensions, and estimated cubic volume of the traps/pots that will be used and the applicant's desired color code for use in identifying his or her vessel and buoys (white is not an acceptable color code).

(4) *Operator permits.* An applicant for an operator permit must provide the following:

(i) Name, address, telephone number, and other identifying information specified on the application.

(ii) Two recent (no more than 1-yr old), color, passport-size photographs.

(iii) Any other information that may be necessary for the issuance or administration of the permit, as specified on the application form.

(c) *Change in application information.* The owner or operator of a vessel with a permit, a person with a coral permit, a person with an operator permit, or a dealer with a permit must notify the RA within 30 days after any change in the application information specified in paragraph (b) of this section. The permit is void if any change in the information is not reported within 30 days.

(d) *Fees.* A fee is charged for each application for a permit, license, or endorsement submitted under this section, for each request for transfer or replacement of such permit, license, or endorsement, and for each fish trap or sea bass pot identification tag required under § 622.6(b)(1)(i)(B). The amount of each fee is calculated in accordance with the procedures of the NOAA Finance Handbook, available from the RA, for determining the administrative costs of each special product or service.

The fee may not exceed such costs and is specified with each application form. The appropriate fee must accompany each application, request for transfer or replacement, or request for fish trap/sea bass pot identification tags.

(e) *Initial issuance.* (1) The RA will issue an initial permit at any time to an applicant if the application is complete and the specific requirements for the requested permit have been met. An application is complete when all requested forms, information, and documentation have been received.

(2) Upon receipt of an incomplete application, the RA will notify the applicant of the deficiency. If the applicant fails to correct the deficiency within 30 days of the date of the RA's letter of notification, the application will be considered abandoned.

(f) *Duration.* A permit remains valid for the period specified on it unless it is revoked, suspended, or modified pursuant to subpart D of 15 CFR part 904 or, in the case of a vessel or dealer permit, the vessel or dealership is sold.

(g) *Transfer—*(1) *Vessel permits, licenses, and endorsements and dealer permits.* A vessel permit, license, or endorsement or a dealer permit issued under this section is not transferable or assignable, except as provided in paragraph (m) of this section for a commercial vessel permit for Gulf reef fish, in paragraph (n) of this section for a fish trap endorsement, in paragraph (o) of this section for a king mackerel gillnet permit, in paragraph (p) of this section for a red snapper license, in paragraph (q) of this section for a commercial vessel permit for king mackerel, in paragraph (r) of this section for a charter vessel/headboat permit for Gulf coastal migratory pelagic fish or Gulf reef fish, in § 622.17(c) for a commercial vessel permit for golden crab, in § 622.18(e) for a commercial vessel permit for South Atlantic snapper-grouper, or in § 622.19(e) for a commercial vessel permit for South Atlantic rock shrimp. A person who acquires a vessel or dealership who desires to conduct activities for which a permit, license, or endorsement is required must apply for a permit, license, or endorsement in accordance with the provisions of this section. If the acquired vessel or dealership is currently permitted, the

application must be accompanied by the original permit and a copy of a signed bill of sale or equivalent acquisition papers.

(2) *Operator permits.* An operator permit is not transferable.

(h) *Renewal*—(1) *Vessel permits, licenses, and endorsements and dealer permits.* Although a vessel permit, license, or endorsement or a dealer permit required by this section is issued on an annual basis, an application for its renewal is required only every 2 years. In the interim years, renewal is automatic (without application) for a vessel owner or a dealer who has met the specific requirements for the requested permit, license, or endorsement; who has complied with all reporting and data collection requirements, including observer requirements, under the Magnuson-Stevens Act; and who is not subject to a sanction or denial under paragraph (j) of this section. An owner or dealer whose permit, license, or endorsement is expiring will be mailed a notification by the RA approximately 2 months prior to its expiration. That notification will advise the status of the renewal. That is, the notification will advise that the renewal will be issued without further action by the owner or dealer (automatic renewal); that the permit, license, or endorsement is ineligible for automatic renewal; or that a new application is required.

(i) *If eligible for automatic renewal.* If the RA's notification indicates that the owner's or dealer's permit, license, or endorsement is eligible for automatic renewal, the RA will mail the automatically renewed permit, license, or endorsement approximately 1 month prior to expiration of the old permit, license, or endorsement.

(ii) *If ineligible for automatic renewal.* If the RA's notification indicates that the owner's or dealer's permit, license, or endorsement is ineligible for automatic renewal, the notification will specify the reasons and, if applicable, will provide an opportunity for correction of any deficiencies. If the owner or dealer does not correct such deficiencies within 60 days after the date of the RA's notification, the renewal will be considered abandoned. A permit, license, or endorsement that is not re-

newed within the applicable deadline will not be reissued.

(iii) *If new application is required.* If the RA's notification indicates that a new application is required, the notification will include a preprinted renewal application. If the RA receives an incomplete application, the RA will notify the applicant of the deficiency. If the applicant fails to correct the deficiency within 30 days of the date of the RA's letter of notification, the application will be considered abandoned. A permit, license, or endorsement that is not renewed within the applicable deadline will not be reissued.

(iv) *If notification is not received.* A vessel owner or dealer must contact the RA if he/she does not receive a notification from the RA regarding status of renewal of a permit, license, or endorsement by 45 days prior to expiration of the current permit.

(2) *Operator permits.* An operator permit required by this section is issued for a period not longer than 3 years. A permit not renewed immediately upon its expiration would expire at the end of the operator's birth month that is between 2 and 3 years after issuance. For renewal, a new application must be submitted in accordance with paragraph (b)(4) of this section.

(i) *Display.* A vessel permit, license, or endorsement issued under this section must be carried on board the vessel. A dealer permit issued under this section, or a copy thereof, must be available on the dealer's premises. In addition, a copy of the dealer's permit must accompany each vehicle that is used to pick up from a fishing vessel reef fish harvested from the Gulf EEZ. The operator of a vessel must present the vessel permit, license, or endorsement for inspection upon the request of an authorized officer. A dealer or a vehicle operator must present the permit or a copy for inspection upon the request of an authorized officer. An operator of a vessel in a fishery in which an operator permit is required must present his/her operator permit and one other form of personal identification that includes a picture (driver's license, passport, etc.) for inspection upon the request of an authorized officer.

(j) *Sanctions and denials.* (1) A permit, license, or endorsement issued pursuant to this section may be revoked, suspended, or modified, and a permit, license, or endorsement application may be denied, in accordance with the procedures governing enforcement-related permit sanctions and denials found at subpart D of 15 CFR part 904.

(2) A person whose operator permit is suspended, revoked, or modified may not be aboard any fishing vessel subject to Federal fishing regulations in any capacity, if so sanctioned by NOAA, while the vessel is at sea or off-loading. The vessel's owner and operator are responsible for compliance with this measure. A list of operators whose permits are revoked or suspended may be obtained from the RA.

(k) *Alteration.* A permit, license, or endorsement that is altered, erased, or mutilated is invalid.

(l) *Replacement.* A replacement permit, license, or endorsement may be issued. An application for a replacement permit, license, or endorsement is not considered a new application. An application for a replacement operator permit must include two new photographs, as specified in paragraph (b)(4)(ii) of this section.

(m) *Limited access system for commercial vessel permits for Gulf reef fish.* (1) No applications for additional commercial vessel permits for Gulf reef fish will be accepted. Existing vessel permits may be renewed, are subject to the restrictions on transfer or change in paragraphs (m)(2) through (5) of this section, and are subject to the requirement for timely renewal in paragraph (m)(6) of this section.

(2) An owner of a permitted vessel may transfer the commercial vessel permit for Gulf reef fish to another vessel owned by the same entity.

(3) An owner whose earned income qualified for the commercial vessel permit for Gulf reef fish may transfer the permit to the owner of another vessel, or to the new owner when he or she transfers ownership of the permitted vessel. Such owner of another vessel, or new owner, may receive a commercial vessel permit for Gulf reef fish for his or her vessel, and renew it through April 15 following the first full calendar year after obtaining it, without

meeting the earned income requirement of paragraph (a)(2)(v) of this section. However, to further renew the commercial vessel permit, the owner of the other vessel, or new owner, must meet the earned income requirement not later than the first full calendar year after the permit transfer takes place.

(4) An owner of a permitted vessel, the permit for which is based on an operator's earned income and, thus, is valid only when that person is the operator of the vessel, may transfer the permit to the income qualifying operator when such operator becomes an owner of a vessel.

(5) An owner of a permitted vessel, the permit for which is based on an operator's earned income and, thus, is valid only when that person is the operator of the vessel, may have the operator qualification on the permit removed, and renew it without such qualification through April 15 following the first full calendar year after removing it, without meeting the earned income requirement of paragraph (a)(2)(v) of this section. However, to further renew the commercial vessel permit, the owner must meet the earned income requirement not later than the first full calendar year after the operator qualification is removed. To have an operator qualification removed from a permit, the owner must return the original permit to the RA with an application for the changed permit.

(6) A commercial vessel permit for Gulf reef fish that is not renewed or that is revoked will not be reissued. A permit is considered to be not renewed when an application for renewal is not received by the RA within 1 year of the expiration date of the permit.

(n) *Endorsements for fish traps in the Gulf.* The provisions of this paragraph (n) are applicable through February 7, 2007. After February 7, 2007, no fish trap endorsements are valid.

(1) Only those fish trap endorsements that are valid on February 7, 1997, may be renewed. Such endorsements are subject to the restrictions on transfer in paragraphs (n)(2) and (3) of this section and are subject to the requirement for timely renewal in paragraph (n)(5) of this section.

(2) Through February 7, 1999, a fish trap endorsement may be transferred only to a vessel that has a commercial permit for reef fish.

(3) After February 7, 1999, a fish trap endorsement is not transferable except as follows:

(i) An owner of a vessel with a fish trap endorsement may transfer the endorsement to another vessel owned by the same entity.

(ii) A fish trap endorsement is transferable upon a change of ownership of a permitted vessel with such endorsement from one to another of the following: Husband, wife, son, daughter, brother, sister, mother, or father.

(iii) When a change of ownership of a vessel with a fish trap endorsement is directly related to the disability or death of the owner, the RA may issue such endorsement, temporarily or permanently, with the commercial vessel permit for Gulf reef fish that is issued for the vessel under the new owner. Such new owner will be the person specified by the owner or his/her legal guardian, in the case of a disabled owner, or by the will or executor/administrator of the estate, in the case of a deceased owner. (Paragraphs (m)(3) and (4) of this section apply for the transfer of a commercial vessel permit for Gulf reef fish upon disability or death of an owner.)

(iv) A fish trap endorsement may be transferred to a vessel with a commercial vessel permit for Gulf reef fish whose owner has a record of landings of reef fish from fish traps in the Gulf EEZ, as reported on fishing vessel logbooks received by the SRD, from November 20, 1992, through February 6, 1994, and who was unable to obtain a fish trap endorsement for the vessel with the reported landings.

(4) The owner of a vessel that is to receive a transferred endorsement must return the originals of the endorsed commercial vessel permit for Gulf reef fish and the unendorsed permit to the RA with an application for a fish trap endorsement for his or her vessel.

(5) A fish trap endorsement that is not renewed or that is revoked will not be reissued. Such endorsement is considered to be not renewed when an application for renewal is not received by

the RA within 1 year of the expiration date of the permit.

(o) *Limited access system for king mackerel gillnet permits applicable in the southern Florida west coast subzone.* Except for applications for renewals of king mackerel gillnet permits, no applications for king mackerel gillnet permits will be accepted. Application forms for permit renewal are available from the RA.

(1) An owner of a vessel with a king mackerel gillnet permit issued under this limited access system may transfer that permit upon a change of ownership of a permitted vessel with such permit from one to another of the following: Husband, wife, son, daughter, brother, sister, mother, or father. Such permit also may be transferred to another vessel owned by the same entity.

(2) A king mackerel gillnet permit that is not renewed or that is revoked will not be reissued. A permit is considered to be not renewed when an application for renewal is not received by the RA within one year after the expiration date of the permit.

(p) *Gulf red snapper licenses*—(1) *Class 1 licenses.* To be eligible for the 2,000-lb (907-kg) trip limit for Gulf red snapper specified in § 622.44(d)(1), a vessel must have been issued both a valid commercial vessel permit for Gulf reef fish and a valid Class 1 Gulf red snapper license, and such permit and license must be on board.

(2) *Class 2 licenses.* To be eligible for the 200-lb (91-kg) trip limit for Gulf red snapper specified in § 622.44(d)(2), a vessel must have been issued both a valid commercial vessel permit for Gulf reef fish and a valid Class 2 Gulf red snapper license, and such permit and license must be on board.

(3) *Operator restriction.* An initial Gulf red snapper license that is issued for a vessel based on the qualification of an operator or historical captain is valid only when that operator or historical captain is the operator of the vessel. When applicable, this operator restriction is shown on the license.

(4) *Transfer of Gulf red snapper licenses.* A red snapper license may be transferred independently of a commercial vessel permit for Gulf reef fish. To request the transfer of a red snapper

§ 622.4

50 CFR Ch. VI (10–1–05 Edition)

license, complete the transfer information on the reverse of the license and return it to the RA.

(5) *Initial issue of Gulf red snapper licenses*—(i) *Class 1 licenses*. (A) An initial Class 1 license will be issued for the vessel specified by the holder of a valid red snapper endorsement on March 1, 1997, and to a historical captain. In the event of death or disability of such holder between March 1, 1997, and the date Class 1 licenses are issued, a Class 1 license will be issued for the vessel specified by the person to whom the red snapper endorsement was transferred.

(B) Status as a historical captain is based on information collected under Amendment 9 to the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico (FMP) (59 FR 39301, August 2, 1994). A historical captain is an operator who—

(1) From November 6, 1989, through 1993, fished solely under verbal or written share agreements with an owner, and such agreements provided for the operator to be responsible for hiring the crew, who was paid from the share under his or her control;

(2) Landed from that vessel at least 5,000 lb (2,268 kg) of red snapper per year in 2 of the 3 years 1990, 1991, and 1992;

(3) Derived more than 50 percent of his or her earned income from commercial fishing, that is, sale of the catch, in each of the years 1989 through 1993; and

(4) Landed red snapper prior to November 7, 1989.

(ii) *Class 2 licenses*. (A) An initial Class 2 license will be issued for the vessel specified by an owner or operator whose income qualified for a commercial vessel permit for reef fish that was valid on March 1, 1997, and such owner or operator was the person whose earned income qualified for a commercial vessel permit for reef fish that had a landing of red snapper during the period from January 1, 1990, through February 28, 1997.

(B) For the purpose of paragraph (p)(5)(ii)(A) of this section, landings of red snapper are as recorded in the information collected under Amendment 9 to the FMP (59 FR 39301, August 2, 1994) for the period 1990 through 1992

and in fishing vessel logbooks, as required under § 622.5(a)(1)(ii), received by the SRD not later than March 31, 1997, for the period from January 1, 1993, through February 28, 1997.

(C) A vessel's red snapper landings record during the period from January 1, 1990, through February 28, 1997, is retained by the owner at the time of the landings if the vessel's permit was transferred to another vessel owned by him or her. When a vessel has had a change of ownership and concurrent transfer of its permit, the vessel's red snapper landings record is credited to the owner of that vessel on March 1, 1997, unless there is a legally binding agreement under which a previous owner retained the landings record. An owner who claims such retention of a landings record must submit a copy of the agreement to the RA postmarked or hand delivered not later than January 30, 1998. However, an owner who submits a copy of such agreement after January 6, 1998, is not assured that a red snapper license will be issued before the opening of the commercial fishery for red snapper on February 1, 1998.

(6) *Implementation procedures*—(i) *Initial notification*. The RA will notify each owner of a vessel that had a valid permit for Gulf reef fish on March 1, 1997, each operator whose earned income qualified for a valid permit on that date, and each potential historical captain of his or her eligibility for a Class 1 or Class 2 red snapper license. Initial determinations of eligibility will be based on NMFS' records of red snapper endorsements, red snapper landings during the period from January 1, 1990, through February 28, 1997, and applications for historical captain status under Amendment 9 to the FMP (59 FR 39301, August 2, 1994). An owner, operator, or potential historical captain who concurs with NMFS' initial determination of eligibility need take no further action. Each owner, operator, and historical captain who is initially determined to be eligible will be issued an appropriate license not later than January 23, 1998.

(ii) *Reconsideration*. (A) An owner, operator, or potential historical captain

who does not concur with NMFS' initial determination of eligibility for historical captain status or for a Class 2 red snapper license may request reconsideration of that initial determination by the RA.

(B) A written request for reconsideration must be submitted to the RA postmarked or hand delivered not later than February 10, 1998, and must provide written documentation supporting the basis for reconsideration. However, an owner who submits such request after January 13, 1998, is not assured that a red snapper license will be issued before the opening of the commercial fishery for red snapper on February 1, 1998. Upon request by the owner, operator, or potential historical captain, the RA will forward the initial determination, the request for reconsideration, and pertinent records to a committee consisting of the principal state officials who are members of the GMFMC, or their designees. An owner, operator, or potential historical captain may request to make a personal appearance before the committee in his or her request for reconsideration. If an owner, operator, or potential historical captain requests that his or her request be forwarded to the committee, such a request constitutes the applicant's written authorization under section 402(b)(1)(F) of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*) for the RA to make available to the committee members such confidential catch and other records as are pertinent to the matter under reconsideration.

(C) Members of the committee will provide their individual recommendations for each application for reconsideration referred to the committee to the RA. The committee may only deliberate whether the eligibility criteria specified in paragraph (p)(5) of this section were applied correctly in the applicant's case, based solely on the available record, including documentation submitted by the applicant. Neither the committee nor the RA may consider whether a person should have been eligible for historical captain status or a Class 2 license because of hardship or other factors. The RA will make a final decision based on the initial eligibility criteria in paragraph

(p)(5) of this section and the available record, including documentation submitted by the applicant, and, if the request is considered by the committee, the recommendations and comments from each member of the committee. The RA will notify the applicant of the decision and the reason therefore, in writing, within 15 days of receiving the recommendations of the committee members. If the application is not considered by the committee, the RA will provide such notification within 15 days of the RA's receipt of the request for reconsideration. The RA's decision will constitute the final administrative action by NMFS on an application for reconsideration.

(q) *Limited access system for commercial vessel permits for king mackerel.* (1) No applications for additional commercial vessel permits for king mackerel will be accepted. Existing vessel permits may be renewed, are subject to the restrictions on transfer or change in paragraphs (q)(2) through (q)(5) of this section, and are subject to the requirement for timely renewal in paragraph (q)(6) of this section.

(2) An owner of a permitted vessel may transfer the commercial vessel permit for king mackerel issued under this limited access system to another vessel owned by the same entity.

(3) An owner whose percentage of earned income or gross sales qualified him/her for the commercial vessel permit for king mackerel issued under this limited access system may request that NMFS transfer that permit to the owner of another vessel, or to the new owner when he or she transfers ownership of the permitted vessel. Such owner of another vessel, or new owner, may receive a commercial vessel permit for king mackerel for his or her vessel, and renew it through April 15 following the first full calendar year after obtaining it, without meeting the percentage of earned income or gross sales requirement of paragraph (a)(2)(iii) of this section. However, to further renew the commercial vessel permit, the owner of the other vessel, or new owner, must meet the earned income or gross sales requirement not later than the first full calendar year after the permit transfer takes place.

(4) An owner of a permitted vessel, the permit for which is based on an operator's earned income and, thus, is valid only when that person is the operator of the vessel, may request that NMFS transfer the permit to the income-qualifying operator when such operator becomes an owner of a vessel.

(5) An owner of a permitted vessel, the permit for which is based on an operator's earned income and, thus, is valid only when that person is the operator of the vessel, may have the operator qualification on the permit removed, and renew it without such qualification through April 15 following the first full calendar year after removing it, without meeting the earned income or gross sales requirement of paragraph (a)(2)(iii) of this section. However, to further renew the commercial vessel permit, the owner must meet the earned income or gross sales requirement not later than the first full calendar year after the operator qualification is removed. To have an operator qualification removed from a permit, the owner must return the original permit to the RA with an application for the changed permit.

(6) NMFS will not reissue a commercial vessel permit for king mackerel if the permit is revoked or if the RA does not receive an application for renewal within one year of the permit's expiration date.

(r) *Moratorium on charter vessel/headboat permits for Gulf coastal migratory pelagic fish and Gulf reef fish.* The provisions of this paragraph (r) are applicable through June 16, 2006. Notwithstanding the other provisions of this paragraph (r), the expiration dates of all charter vessel/headboat permits for Gulf reef fish or Gulf coastal migratory pelagic fish that were not issued under the provision of this paragraph (r) and that were valid or renewable as of December 17, 2002, will be extended through November 13, 2003, provided that a permit has not been issued under this paragraph (r) for the applicable vessel.

(1) *Applicability.* Beginning November 13, 2003, the only valid charter vessel/headboat permits for Gulf coastal migratory pelagic fish or Gulf reef fish are those that have been issued under the moratorium criteria in this para-

graph (r). No applications for additional charter vessel/headboat permits for these fisheries will be accepted. Existing permits may be renewed, are subject to the transferability provisions in paragraph (r)(9) of this section, and are subject to the requirement for timely renewal in paragraph (r)(10) of this section.

(2) *Initial eligibility.* Initial eligibility for a charter vessel/headboat permit for Gulf coastal migratory pelagic fish or Gulf reef fish is limited to the following:

(i) An owner of a vessel that had a valid charter vessel/headboat permit for Gulf reef fish or coastal migratory pelagic fish on March 29, 2001, or held such a permit during the preceding year or whose application for such permit had been received by NMFS, by March 29, 2001, and was being processed or awaiting processing.

(ii) Any person who can provide NMFS with documentation verifying that, prior to March 29, 2001, he/she had a charter vessel or headboat under construction and that the associated expenditures were at least \$5,000 as of that date. If the vessel owner was constructing the vessel, the vessel owner must provide NMFS with receipts for the required expenditures. If the vessel was being constructed by someone other than the owner, the owner must provide NMFS with a copy of the contract and/or receipts for the required expenditures.

(iii) A historical captain, defined for the purposes of paragraph (r) of this section as a person who provides NMFS with documentation verifying that

(A) Prior to March 29, 2001, he/she was issued either a USCG Operator of Uninspected Passenger Vessel license (commonly referred to as a 6-pack license) or a USCG Masters license; operated, as a captain, a federally permitted charter vessel or headboat in the Gulf reef fish and/or coastal migratory pelagic fisheries; but does not have a fishery permit issued in their name; and

(B) At least 25 percent of his/her earned income was derived from charter vessel or headboat fishing in one of the years, 1997, 1998, 1999, or 2000.

(3) *Special conditions applicable to eligibility based on historical captain status.*

A person whose eligibility is based on historical captain status will be issued a letter of eligibility by the RA. The letter of eligibility may be redeemed through the RA for a charter vessel/headboat permit for Gulf coastal migratory pelagic fish and/or Gulf reef fish, with a historical captain endorsement. The letter of eligibility is valid for the duration of the moratorium; is valid only for a vessel of the same or lesser authorized passenger capacity as the vessel used to document earned income in paragraph (r)(2)(iii)(B) of this section; and is valid only for the fisheries certified on the application under paragraph (r)(2)(iii)(A) of this section. A charter vessel/headboat permit for Gulf coastal migratory pelagic fish or Gulf reef fish with a historical captain endorsement is valid only on a vessel that the historical captain operates as a captain.

(4) *Determination of eligibility based on permit history.* NMFS' permit records are the sole basis for determining eligibility based on permit or application history. An owner of a currently permitted vessel who believes he/she meets the permit or application history criterion based on ownership of a vessel under a different name, as may have occurred when ownership has changed from individual to corporate or vice versa, must document his/her continuity of ownership. An owner will not be issued initial charter vessel/headboat permits for Gulf coastal migratory pelagic fish or Gulf reef fish under the moratorium in excess of the number of federally permitted charter vessels and/or headboats that he/she owned simultaneously at some time during the period March 29, 2000 through March 29, 2001.

(5) *Application requirements and procedures*—(1) *General.* An applicant who desires a charter vessel/headboat permit for Gulf coastal migratory pelagic fish or Gulf reef fish must submit an application for such permit to the RA postmarked or hand-delivered not later than September 15, 2003. Application forms are available from the RA. The information requested on the application form varies according to the eligibility criterion that the application is based upon as indicated in paragraphs (r)(5)(ii), (r)(5)(iii), and (r)(5)(iv) of this

section; however, all applicants must provide a copy of the applicable, valid USCG Operator of Uninspected Passenger Vessel license or Masters license and valid USCG Certificate of Inspection. Failure to apply in a timely manner will preclude permit issuance even when the applicant meets the eligibility criteria for such permit.

(ii) *Application based on the prior permit/application history criterion.* On or about June 16, 2003, the RA will mail an application for a charter vessel/headboat permit for Gulf coastal migratory pelagic fish and/or Gulf reef fish to each owner of a vessel who, according to NMFS' permit records, is eligible based on the permit or application history criterion in paragraph (r)(2)(i) of this section. Information requested on the application is consistent with the standard information required in paragraph (b)(3)(ii) of this section. The RA will also mail each such owner a notice that his/her existing charter vessel/headboat permit(s) for coastal migratory pelagic fish and/or Gulf reef fish will expire November 13, 2003, and that the new permit(s) required under this moratorium will be required as of that date. A vessel owner who believes he/she qualifies for a charter vessel/headboat permit for Gulf coastal migratory pelagic fish and/or Gulf reef fish based on permit or application history, but who does not receive an application from the RA, must request an application from the RA and provide documentation of eligibility. The RA will mail applications and notifications to vessel owner addresses as indicated in NMFS' permit records.

(iii) *Application based on a charter vessel/headboat under construction prior to March 29, 2001.* A person who intends to obtain a charter vessel/headboat permit for Gulf coastal migratory pelagic fish and/or Gulf reef fish based on the vessel-under-construction eligibility criterion in paragraph (r)(2)(ii) of this section must obtain an application from the RA. Information requested on the application includes the standard information required in paragraph (b)(3)(ii) of this section and the documentation of construction and associated costs as specified in paragraph (r)(2)(ii) of this section.

(iv) *Application based on historical captain status.* A person who intends to obtain a charter vessel/headboat permit for Gulf coastal migratory pelagic fish and/or Gulf reef fish based on historical captain status must obtain an application from the RA. Information requested on the application includes the standard information required in paragraph (b)(3)(ii) of this section and documentation of the criteria specified in paragraphs (r)(2)(iii)(A) and (B) of this section. Such documentation includes income tax records pertinent to verifying earned income; a copy of the applicable USCG license and/or Certificate of Inspection; and a notarized affidavit signed by a vessel owner certifying the period the applicant served as captain of a charter vessel or headboat permitted for Gulf reef fish and/or coastal migratory pelagic fish, whether the charter vessel or headboat was permitted for Gulf reef fish or coastal migratory pelagic fish or both, and whether the charter vessel or headboat was uninspected (i.e., 6-pack) or had a USCG Certificate of Inspection.

(v) *Incomplete applications.* If an application that is postmarked or hand-delivered in a timely manner is incomplete, the RA will notify the applicant of the deficiency. If the applicant fails to correct the deficiency within 20 days of the date of the RA's notification, the application will be considered abandoned.

(6) *Issuance of initial permits.* If a complete application is submitted in a timely manner and the applicable eligibility requirements specified in paragraph (r)(2) of this section are met, the RA will issue a charter vessel/headboat permit for Gulf coastal migratory pelagic fish and/or Gulf reef fish or a letter of eligibility for such fisheries, as appropriate, and mail it to the applicant not later than November 3, 2003.

(7) *Notification of ineligibility.* If the applicant does not meet the applicable eligibility requirements of paragraph (r)(2) of this section, the RA will notify the applicant, in writing, of such determination and the reasons for it not later than October 14, 2003.

(8) *Appeal process.* (i) An applicant may request an appeal of the RA's determination regarding initial permit eligibility, as specified in paragraph

(r)(2) of this section, by submitting a written request for reconsideration to the RA with copies of the appropriate records for establishing eligibility. Such request must be postmarked or hand-delivered within 45 days after the date of the RA's notification of ineligibility and may include a request for an oral hearing. If an oral hearing is granted, the RA will notify the applicant of the place and date of the hearing and will provide the applicant a maximum of 45 days prior to the hearing to provide information in support of the appeal.

(ii) A request for an appeal constitutes the appellant's authorization under section 402(b)(1)(F) of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 et. seq.) for the RA to make available to the appellate officer(s) such confidential records as are pertinent to the appeal.

(iii) The RA may independently review the appeal or may appoint one or more appellate officers to review the appeal and make independent recommendations to the RA. The RA will make the final determination regarding granting or denying the appeal.

(iv) The RA and appellate officer(s) are empowered only to deliberate whether the eligibility criteria in paragraph (r)(2) of this section were applied correctly. Hardship or other factors will not be considered in determining eligibility.

(v) The RA will notify the applicant of the decision regarding the appeal within 45 days after receipt of the request for appeal or within 45 days after the conclusion of the oral hearing, if applicable. The RA's decision will constitute the final administrative action by NMFS.

(9) *Transfer of permits*—(i) *Permits without a historical captain endorsement.* A charter vessel/headboat permit for Gulf coastal migratory pelagic fish or Gulf reef fish that does not have a historical captain endorsement is fully transferable, with or without sale of the permitted vessel, except that no transfer is allowed to a vessel with a greater authorized passenger capacity than that of the vessel from which the permit was transferred. The determination of authorized passenger capacity

will be based on the USCG Certificate of Inspection or USCG Operator of Uninspected Passenger Vessel license associated with the vessels involved in the transfer. If no valid Certificate of Inspection is provided for a vessel, that vessel will be considered an uninspected vessel with an authorized passenger capacity restricted to six or fewer passengers.

(ii) *Permits with a historical captain endorsement.* A charter vessel/headboat permit for Gulf coastal migratory pelagic fish or Gulf reef fish that has a historical captain endorsement may only be transferred to a vessel operated by the historical captain, cannot be transferred to a vessel with a higher authorized passenger capacity than the vessel from which the permit was transferred, and is not otherwise transferable.

(iii) *Procedure for permit transfer.* To request that the RA transfer a charter vessel/headboat permit for Gulf coastal migratory pelagic fish or Gulf reef fish, the owner of a vessel that is to receive the transferred permit must complete the transfer information on the reverse side of the permit and return the permit and a completed application for transfer to the RA.

(10) *Renewal.* (i) Renewal of a charter vessel/headboat permit for Gulf coastal migratory pelagic fish or Gulf reef fish is contingent upon the permitted vessel and/or captain, as appropriate, being included in an active survey frame for, and, if selected to report, providing the information required in one of the following—

(A) NMFS' Marine Recreational Fishing Vessel Directory Telephone Survey (conducted by the Gulf States Marine Fisheries Commission);

(B) NMFS' Southeast Headboat Survey (as required by § 622.5(b)(1));

(C) Texas Parks and Wildlife Marine Recreational Fishing Survey; or

(D) A data collection system that replaces one or more of the surveys in paragraph (r)(10)(i)(A)(B) or (C) of this section.

(ii) A charter vessel/headboat permit for Gulf coastal migratory pelagic fish or Gulf reef fish that is not renewed or that is revoked will not be reissued during the moratorium. A permit is considered to be not renewed when an

application for renewal, as required, is not received by the RA within 1 year of the expiration date of the permit.

(11) *Requirement to display a vessel decal.* Upon issuance, renewal, or transfer of a charter vessel/headboat permit for Gulf coastal migratory pelagic fish or Gulf reef fish, the RA will issue the owner of the permitted vessel a vessel decal for the applicable permitted fishery or fisheries. The vessel decal must be displayed on the port side of the deckhouse or hull and must be maintained so that it is clearly visible.

(12) *Requirement and procedure for obtaining an initial charter vessel/headboat permit for South Atlantic coastal migratory pelagic fish—(i) General.* This paragraph (r)(12) explains the necessity of requiring and the procedure for obtaining an initial charter vessel/headboat permit for South Atlantic coastal migratory pelagic fish. Formerly, the charter vessel/headboat permit for coastal migratory pelagic fish applied in the EEZ of the Gulf and South Atlantic. The establishment of a separate charter vessel/headboat permit for Gulf coastal migratory pelagic fish under the moratorium established by paragraph (r) of this section necessitates that a separate charter vessel/headboat permit for South Atlantic coastal migratory pelagic fish also be established effective December 26, 2002, and that the former charter vessel/headboat permit for coastal migratory pelagic fish (applicable in both the Gulf and South Atlantic) be voided effective as of that same date. The newly required charter vessel/headboat permit for South Atlantic coastal migratory pelagic fish is not subject to the provisions of the moratorium in paragraphs (r)(1) through (11) of this section.

(ii) *Application for and issuance of an initial charter vessel/headboat permit for South Atlantic coastal migratory pelagic fish—(A) Owner of a vessel with a valid charter vessel/headboat permit for coastal migratory pelagic fish.* On or about June 28, 2002, the RA, based on NMFS' permit records, will mail an application for an initial charter vessel/headboat permit for South Atlantic coastal migratory pelagic fish to each owner of a vessel with a valid charter vessel/headboat permit for coastal migratory

pelagic fish. Any such owner who desires an initial charter vessel/headboat permit for South Atlantic coastal migratory pelagic fish must submit the completed application to the RA. To avoid any lapse in authorization to fish for coastal migratory species in the South Atlantic EEZ (i.e., valid permit status), such owners must submit the completed application to the RA post-marked or hand-delivered not later than September 26, 2002. For completed applications received by that deadline, the RA will issue the permit no later than December 16, 2002. Applications will be accepted at any time, but if received after the deadline, the permit may not be issued prior to the date that the permit is first required (i.e., December 26, 2002). These special procedures apply only to the application and issuance of the initial permit; subsequent permitting activities will be conducted in accordance with the standard permitting procedures as specified in paragraphs (b) through (l) of this section.

(B) *Owner or operator of a vessel without a valid charter vessel/headboat permit for coastal migratory pelagic fish.* An owner or operator of a vessel who desires a charter vessel/headboat permit for South Atlantic coastal migratory pelagic fish and who does not have a valid charter vessel/headboat permit for coastal migratory pelagic fish must obtain a permit application from the RA. For additional permitting procedures, see paragraphs (b) through (l) of this section.

[61 FR 34937, July 3, 1996, as amended at 61 FR 43956, Aug. 27, 1996; 61 FR 47448, Sept. 9, 1996; 61 FR 48414, Sept. 13, 1996; 62 FR 13986, Mar. 25, 1997; 62 FR 67721, 67722, Dec. 30, 1997; 63 FR 10565, 10569, Mar. 4, 1998; 63 FR 38301, July 16, 1998; 63 FR 57590, Oct. 28, 1998; 64 FR 59126, Nov. 2, 1999; 65 FR 16339, Mar. 28, 2000; 65 FR 41017, July 3, 2000; 65 FR 52956, Aug. 31, 2000; 65 FR 61115, Oct. 16, 2000; 67 FR 22362, May 3, 2002; 67 FR 43562, June 28, 2002; 67 FR 51078, Aug. 7, 2002; 68 FR 2192, Jan. 16, 2003; 68 FR 26235, May 15, 2003; 69 FR 30240, May 27, 2004; 68 FR 38232, June 27, 2003; 69 FR 30240, May 27, 2004; 70 FR 32271, June 2, 2005; 70 FR 39189, July 7, 2005; 70 FR 41163, July 18, 2005]

§ 622.5 Recordkeeping and reporting.

Participants in fisheries governed in this part are required to keep records and report as follows.

(a) *Commercial vessel owners and operators—(1) Requirements by species—(i) Coastal migratory pelagic fish.* The owner or operator of a vessel that fishes for or lands coastal migratory pelagic fish for sale in or from the Gulf, Mid-Atlantic, or South Atlantic EEZ or adjoining state waters, or whose vessel is issued a commercial permit for king or Spanish mackerel, as required under § 622.4(a)(2)(iii) or (iv), who is selected to report by the SRD, must maintain a fishing record on a form available from the SRD and must submit such record as specified in paragraph (a)(2) of this section.

(ii) *Gulf reef fish.* The owner or operator of a vessel for which a commercial permit for Gulf reef fish has been issued, as required under § 622.4(a)(2)(v), or whose vessel fishes for or lands reef fish in or from state waters adjoining the Gulf EEZ, who is selected to report by the SRD must maintain a fishing record on a form available from the SRD and must submit such record as specified in paragraph (a)(2) of this section.

(A) *Fish traps.* In addition to the other reporting requirements in paragraph (a)(1)(ii) of this section, the owner or operator of a vessel for which a fish trap endorsement has been issued, as required under § 622.4(a)(2)(i), must comply with the following requirements.

(1) *Inspection.* The RA will establish a 1-month period for mandatory inspection of all fish trap gear, permits, and vessels. The RA will provide written notification of the inspection period to each owner of a vessel for which a fish trap endorsement has been issued as required under § 622.4(a)(2)(i). Each such owner or operator must contact the Special Agent-in-Charge, NMFS, Office of Enforcement, Southeast Region, St. Petersburg, FL (SAC) or his designee by telephone (727–570–5344) to schedule an inspection during the 1-month period. Requests for inspection must be made between 8:00 a.m. and 4:30 p.m. Monday through Friday and must be made at least 72 hours in advance of the desired inspection date. Inspections will be conducted Monday through Friday between 8:00 a.m. and 4:30 p.m. only. On the inspection date, the owner or operator must make all fish trap

Fishery Conservation and Management

§ 622.5

gear with attached trap tags and buoys and all applicable permits available for inspection on land. Vessels must also be made available for inspection as directed by the SAC or his designee. Upon completion of the inspection and a determination that all fish trap gear, permits, and vessels are in compliance, an owner or operator may resume fishing with the lawful gear. However, an owner or operator who fails to comply with the inspection requirements during the 1-month inspection period or during any other random inspection may not use or possess a fish trap in the Gulf EEZ until the required inspection or reinspection, as directed by the SAC, has been completed and all fish trap gear, permits, and vessels are determined to be in compliance with all applicable regulations.

(2) *Trip reports.* For each fishing trip on which a fish trap will be used or possessed, an owner or operator of a vessel for which a fish trap endorsement has been issued, as required under § 622.4(a)(2)(i), must submit a trip initiation report and a trip termination report to the SAC or his designee, by telephone, using the following 24-hour toll-free number—800-305-0697.

(i) *Trip initiation report.* The trip initiation report must be submitted before beginning the trip and must include: vessel name; official number; number of traps to be deployed; sequence of trap tag numbers; date, time, and point of departure; and intended time and date of trip termination.

(ii) *Trip termination report.* The trip termination report must be submitted immediately upon returning to port and prior to any offloading of catch or fish traps. The trip termination report must include: vessel name; official number; name and address of dealer where catch will be offloaded and sold; the time offloading will begin; notification of any lost traps; and notification of any traps left deployed for any reason.

(B) [Reserved]

(iii) *Gulf shrimp.* The owner or operator of a vessel that fishes for shrimp in the Gulf EEZ or in adjoining state waters, or that lands shrimp in an adjoining state, must provide information for any fishing trip, as requested by the SRD, including, but not limited

to, vessel identification, gear, effort, amount of shrimp caught by species, shrimp condition (heads on/heads off), fishing areas and depths, and person to whom sold.

(iv) *South Atlantic snapper-grouper.*

(A) The owner or operator of a vessel for which a commercial permit for South Atlantic snapper-grouper has been issued, as required under § 622.4(a)(2)(vi), or whose vessel fishes for or lands South Atlantic snapper-grouper in or from state waters adjoining the South Atlantic EEZ, who is selected to report by the SRD must maintain a fishing record on a form available from the SRD and must submit such record as specified in paragraph (a)(2) of this section.

(B) The wreckfish shareholder under § 622.15, or operator of a vessel for which a commercial permit for wreckfish has been issued, as required under § 622.4(a)(2)(vii), must maintain a fishing record on a form available from the SRD and must submit such record as specified in paragraph (a)(2) of this section.

(C) The wreckfish shareholder under § 622.15, or operator of a vessel for which a commercial permit for wreckfish has been issued, as required under § 622.4(a)(2)(vii), must make available to an authorized officer upon request all records of offloadings, purchases, or sales of wreckfish.

(v) *South Atlantic golden crab.* The owner or operator of a vessel for which a commercial permit for golden crab has been issued, as required under § 622.4(a)(2)(x), who is selected to report by the SRD must maintain a fishing record on a form available from the SRD.

(vi) *Atlantic dolphin and wahoo.* The owner or operator of a vessel for which a commercial permit for Atlantic dolphin and wahoo has been issued, as required under § 622.4 (a)(2)(xii), or whose vessel fishes for or lands Atlantic dolphin or wahoo in or from state waters adjoining the Atlantic EEZ, who is selected to report by the SRD must maintain a fishing record on a form available from the SRD and must submit such record as specified in paragraph (a)(2) of this section.

(2) *Reporting deadlines.* (i) Completed fishing records required by paragraphs

(a)(1)(i), (ii), (iv), and (vi) of this section must be submitted to the SRD postmarked not later than 7 days after the end of each fishing trip. If no fishing occurred during a calendar month, a report so stating must be submitted on one of the forms postmarked not later than 7 days after the end of that month. Information to be reported is indicated on the form and its accompanying instructions.

(ii) Reporting forms required in paragraph (a)(1)(v) of this section must be submitted to the SRD postmarked not later than 30 days after sale of the golden crab offloaded from a trip. If no fishing occurred during a calendar month, a report so stating must be submitted on one of the forms postmarked not later than 7 days after the end of that month. Information to be reported is indicated on the form and its accompanying instructions.

(b) *Charter vessel/headboat owners and operators*—(1) *Coastal migratory pelagic fish, reef fish, snapper-grouper, and Atlantic dolphin and wahoo*. The owner or operator of a vessel for which a charter vessel/headboat permit for Gulf coastal migratory pelagic fish, South Atlantic coastal migratory pelagic fish, Gulf reef fish, South Atlantic snapper-grouper, or Atlantic dolphin and wahoo has been issued, as required under § 622.4(a)(1), or whose vessel fishes for or lands such coastal migratory pelagic fish, reef fish, snapper-grouper, or Atlantic dolphin or wahoo in or from state waters adjoining the applicable Gulf, South Atlantic, or Atlantic EEZ, who is selected to report by the SRD must maintain a fishing record for each trip, or a portion of such trips as specified by the SRD, on forms provided by the SRD and must submit such record as specified in paragraph (b)(2) of this section.

(2) *Reporting deadlines*—(i) *Charter vessels*. Completed fishing records required by paragraph (b)(1) of this section for charter vessels must be submitted to the SRD weekly, postmarked not later than 7 days after the end of each week (Sunday). Information to be reported is indicated on the form and its accompanying instructions.

(ii) *Headboats*. Completed fishing records required by paragraph (b)(1) of this section for headboats must be sub-

mitted to the SRD monthly and must either be made available to an authorized statistical reporting agent or be postmarked not later than 7 days after the end of each month. Information to be reported is indicated on the form and its accompanying instructions.

(c) *Dealers*—(1) *Coastal migratory pelagic fish*. (i) A person who purchases coastal migratory pelagic fish from a fishing vessel, or person, that fishes for or lands such fish in or from the EEZ or adjoining state waters who is selected to report by the SRD must submit information on forms provided by the SRD. This information must be submitted to the SRD at monthly intervals, postmarked not later than 5 days after the end of each month. Reporting frequency and reporting deadlines may be modified upon notification by the SRD. If no coastal migratory pelagic fish were received during a calendar month, a report so stating must be submitted on one of the forms, in accordance with the instructions on the form, and must be postmarked not later than 5 days after the end of the month. The information to be reported is as follows:

(A) Dealer's or processor's name and address.

(B) County where fish were landed.

(C) Total poundage of each species received during that month, or other requested interval.

(D) Average monthly price paid for each species.

(E) Proportion of total poundage landed by each gear type.

(ii) *Alternate SRD*. For the purposes of paragraph (c)(1)(i) of this section, in the states from New York through Virginia, or in the waters off those states, "SRD" means the Science and Research Director, Northeast Fisheries Science Center, NMFS (see Table 1 of § 600.502 of this chapter), or a designee.

(2) *Gulf red drum*. A dealers or processor who purchases red drum harvested from the Gulf who is selected to report by the SRD must report to the SRD such information as the SRD may request and in the form and manner as the SRD may require. The information required to be submitted must include, but is not limited to, the following:

(i) Dealer's or processor's name and address.

(ii) State and county where red drum were landed.

(iii) Total poundage of red drum received during the reporting period, by each type of gear used for harvest.

(3) *Gulf reef fish*. A person who purchases Gulf reef fish from a fishing vessel, or person, that fishes for or lands such fish in or from the EEZ or adjoining state waters must maintain records and submit information as follows:

(i) A dealer must maintain at his/her principal place of business a record of Gulf reef fish that he/she receives. The record must contain the name of each fishing vessel from which reef fish were received and the date, species, and quantity of each receipt. A dealer must retain such record for at least 1 year after receipt date and must provide such record for inspection upon the request of an authorized officer or the SRD.

(ii) When requested by the SRD, a dealer must provide information from his/her record of Gulf reef fish received the total poundage of each species received during the month, average monthly price paid for each species by market size, and proportion of total poundage landed by each gear type. This information must be provided on forms available from the SRD and must be submitted to the SRD at monthly intervals, postmarked not later than 5 days after the end of the month. Reporting frequency and reporting deadlines may be modified upon notification by the SRD. If no reef fish were received during a calendar month, a report so stating must be submitted on one of the forms, postmarked not later than 5 days after the end of the month.

(iii) The operator of a car or truck that is used to pick up from a fishing vessel reef fish harvested from the Gulf must maintain a record containing the name of each fishing vessel from which reef fish on the car or truck have been received. The vehicle operator must provide such record for inspection upon the request of an authorized officer.

(4) *Gulf shrimp*. A person who purchases shrimp from a vessel, or person, that fishes for shrimp in the Gulf EEZ or in adjoining state waters, or that lands shrimp in an adjoining state,

must provide the following information when requested by the SRD:

(i) Name and official number of the vessel from which shrimp were received or the name of the person from whom shrimp were received, if received from other than a vessel.

(ii) Amount of shrimp received by species and size category for each receipt.

(iii) Exvessel value, by species and size category, for each receipt.

(5) *South Atlantic snapper-grouper*. (i) A person who purchases South Atlantic snapper-grouper that were harvested from the EEZ or from adjoining state waters and who is selected to report by the SRD and a dealer who has been issued a dealer permit for wreckfish, as required under § 622.4(a)(4), must provide information on receipts of South Atlantic snapper-grouper and prices paid, by species, on forms available from the SRD. The required information must be submitted to the SRD at monthly intervals, postmarked not later than 5 days after the end of the month. Reporting frequency and reporting deadlines may be modified upon notification by the SRD. If no South Atlantic snapper-grouper were received during a calendar month, a report so stating must be submitted on one of the forms, postmarked not later than 5 days after the end of the month. However, during complete months encompassed by the wreckfish spawning-season closure (that is, February and March), a wreckfish dealer is not required to submit a report stating that no wreckfish were received.

(ii) A dealer reporting South Atlantic snapper-grouper other than wreckfish may submit the information required in paragraph (c)(5)(i) of this section via facsimile (fax).

(iii) A dealer who has been issued a dealer permit for wreckfish, as required under § 622.4(a)(4), must make available to an authorized officer upon request all records of offloadings, purchases, or sales of wreckfish.

(6) *South Atlantic golden crab*. A dealer who receives from a fishing vessel golden crab harvested from the South Atlantic EEZ and who is selected by the SRD must provide information on receipts of, and prices paid for, South Atlantic golden crab to the SRD at

§ 622.5

50 CFR Ch. VI (10–1–05 Edition)

monthly intervals, postmarked not later than 5 days after the end of each month. Reporting frequency and reporting deadlines may be modified upon notification by the SRD.

(7) *South Atlantic rock shrimp*. (i) A dealer who has been issued a permit for rock shrimp, as required under § 622.4(a)(4), and who is selected by the SRD must provide information on receipts of rock shrimp and prices paid on forms available from the SRD. The required information must be submitted to the SRD at monthly intervals postmarked not later than 5 days after the end of each month. Reporting frequencies and reporting deadlines may be modified upon notification by the SRD.

(ii) On demand, a dealer who has been issued a dealer permit for rock shrimp, as required under § 622.4(a)(4), must make available to an authorized officer all records of offloadings, purchases, or sales of rock shrimp.

(8) *Atlantic dolphin and wahoo*. (i) A dealer who has been issued a permit for Atlantic dolphin and wahoo, as required under § 622.4(a)(4), and who is selected by the SRD must provide information on receipts of Atlantic dolphin and wahoo and prices paid on forms available from the SRD. The required information must be submitted to the SRD at monthly intervals postmarked not later than 5 days after the end of each month. Reporting frequencies and reporting deadlines may be modified upon notification by the SRD.

(ii) For the purposes of paragraph (c)(8)(i) of this section, in the states from Maine through Virginia, or in the waters off those states, “SRD” means the Science and Research Director, Northeast Fisheries Science Center, NMFS, (see Table 1 of § 600.502 of this chapter), or a designee.

(iii) On demand, a dealer who has been issued a dealer permit for Atlantic dolphin and wahoo, as required under § 622.4(a)(4), must make available to an authorized officer all records of offloadings, purchases, or sales of dolphin and wahoo.

(d) *Individuals with coral or live rock permits*. (1) An individual with a Federal allowable octocoral permit must submit a report of harvest to the SRD.

Specific reporting requirements will be provided with the permit.

(2) A person with a Federal aquacultured live rock permit must report to the RA each deposition of material on a site. Such reports must be postmarked not later than 7 days after deposition and must contain the following information:

(i) Permit number of site and date of deposit.

(ii) Geological origin of material deposited.

(iii) Amount of material deposited.

(iv) Source of material deposited, that is, where obtained, if removed from another habitat, or from whom purchased.

(3) A person who takes aquacultured live rock must submit a report of harvest to the RA. Specific reporting requirements will be provided with the permit. This reporting requirement is waived for aquacultured live rock that is landed in Florida.

(e) *Additional data and inspection*. Additional data will be collected by authorized statistical reporting agents and by authorized officers. A person who fishes for or possesses species in or from the EEZ governed in this part is required to make the applicable fish or parts thereof available for inspection by the SRD or an authorized officer upon request.

(f) *Commercial vessel, charter vessel, and headboat inventory*. The owner or operator of a commercial vessel, charter vessel, or headboat operating in a fishery governed in this part who is not selected to report by the SRD under paragraph (a) or (b) of this section must provide the following information when interviewed by the SRD:

(1) Name and official number of vessel and permit number, if applicable.

(2) Length and tonnage.

(3) Current home port.

(4) Fishing areas.

(5) Ports where fish were offloaded during the last year.

(6) Type and quantity of gear.

Fishery Conservation and Management

§ 622.6

(7) Number of full- and part-time fishermen or crew members.

[61 FR 34940, July 3, 1996, as amended at 61 FR 43956, Aug. 27, 1996; 61 FR 47448, Sept. 9, 1996; 63 FR 10567, Mar. 4, 1998; 63 FR 57590, Oct. 28, 1998; 64 FR 59126, Nov. 2, 1999; 64 FR 68935, Dec. 9, 1999; 67 FR 43565, June 28, 2002; 69 FR 30241, May 27, 2004]

§ 622.6 Vessel and gear identification.

(a) *Vessel identification*—(1) *Applicability*—(i) *Official number*. A vessel for which a permit has been issued under § 622.4, and a vessel that fishes for or possesses *pelagic sargassum* in the South Atlantic EEZ, must display its official number—

(A) On the port and starboard sides of the deckhouse or hull and, for vessels over 25 ft (7.6 m) long, on an appropriate weather deck, so as to be clearly visible from an enforcement vessel or aircraft.

(B) In block arabic numerals permanently affixed to or painted on the vessel in contrasting color to the background.

(C) At least 18 inches (45.7 cm) in height for vessels over 65 ft (19.8 m) long; at least 10 inches (25.4 cm) in height for vessels over 25 ft (7.6 m) long; and at least 3 inches (7.6 cm) in height for vessels 25 ft (7.6 m) long or less.

(ii) *Official number and color code*. The following vessels must display their official number as specified in paragraph (a)(1)(i) of this section and, in addition, must display their assigned color code: A vessel for which a fish trap endorsement has been issued, as required under § 622.4(a)(2)(i); a vessel for which a permit has been issued to fish with a sea bass pot, as required under § 622.4(a)(2)(vi); a vessel in the commercial Caribbean reef fish fishery fishing with traps; and a vessel in the Caribbean spiny lobster fishery. Color codes required for the Caribbean reef fish fishery and Caribbean spiny lobster fishery are assigned by Puerto Rico or the U.S. Virgin Islands, whichever is applicable; color codes required in all other fisheries are assigned by the RA. The color code must be displayed—

(A) On the port and starboard sides of the deckhouse or hull and, for vessels over 25 ft (7.6 m) long, on an appropriate weather deck, so as to be clearly

visible from an enforcement vessel or aircraft.

(B) In the form of a circle permanently affixed to or painted on the vessel.

(C) At least 18 inches (45.7 cm) in diameter for vessels over 65 ft (19.8 m) long; at least 10 inches (25.4 cm) in diameter for vessels over 25 ft (7.6 m) long; and at least 3 inches (7.6 cm) in diameter for vessels 25 ft (7.6 m) long or less.

(2) *Duties of operator*. The operator of a vessel specified in paragraph (a)(1) of this section must keep the official number and the color code, if applicable, clearly legible and in good repair and must ensure that no part of the fishing vessel, its rigging, fishing gear, or any other material on board obstructs the view of the official number or the color code, if applicable, from an enforcement vessel or aircraft.

(b) *Gear identification*—(1) *Traps/pots and associated buoys*—(i) *Traps or pots*—(A) *Caribbean EEZ*. A fish trap or spiny lobster trap used or possessed in the Caribbean EEZ must display the official number specified for the vessel by Puerto Rico or the U.S. Virgin Islands so as to be easily identified.

(B) *Gulf and South Atlantic EEZ*. A fish trap used or possessed in the Gulf EEZ and a sea bass pot used or possessed in the South Atlantic EEZ between 35°15.19' N. lat. (due east of Cape Hatteras Light, NC) and 28°35.1' N. lat. (due east of the NASA Vehicle Assembly Building, Cape Canaveral, FL), or a fish trap or sea bass pot on board a vessel with a commercial permit for Gulf reef fish or South Atlantic snapper-grouper, must have a valid identification tag issued by the RA attached. A golden crab trap used or possessed in the South Atlantic EEZ or on board a vessel with a commercial permit for golden crab must have the commercial vessel permit number permanently affixed so as to be easily distinguished, located, and identified; an identification tag issued by the RA may be used for this purpose but is not required.

(ii) *Associated buoys*. A buoy that is attached to a trap or pot must display the official number and assigned color code so as to be easily distinguished, located, and identified as follows:

§ 622.7

50 CFR Ch. VI (10–1–05 Edition)

(A) *Caribbean EEZ*. Each buoy must display the official number and color code assigned to the vessel by Puerto Rico or the U.S. Virgin Islands, whichever is applicable.

(B) *Gulf and South Atlantic EEZ*. Each buoy must display the official number and color code assigned by the RA. In the Gulf EEZ, a buoy must be attached to each trap, or each end trap if traps are connected by a line. In the South Atlantic EEZ, buoys are not required to be used, but, if used, each buoy must display the official number and color code. However, no color code is required on a buoy attached to a golden crab trap.

(iii) *Presumption of ownership*. A Caribbean spiny lobster trap, a fish trap, a golden crab trap, or a sea bass pot in the EEZ will be presumed to be the property of the most recently documented owner. This presumption will not apply with respect to such traps and pots that are lost or sold if the owner reports the loss or sale within 15 days to the RA.

(iv) *Unmarked traps, pots, or buoys*. An unmarked Caribbean spiny lobster trap, a fish trap, a golden crab trap, a sea bass pot, or a buoy deployed in the EEZ where such trap, pot, or buoy is required to be marked is illegal and may be disposed of in any appropriate manner by the Assistant Administrator or an authorized officer.

(2) *Gillnet buoys*. On board a vessel with a valid Spanish mackerel permit that is fishing for Spanish mackerel in, or that possesses Spanish mackerel in or from, the South Atlantic EEZ off Florida north of 25°20.4' N. lat., which is a line directly east from the Miami-Dade/Monroe County, FL, boundary, the float line of each gillnet possessed, including any net in use, must have a maximum of nine distinctive floats, i.e., different from the usual net buoys, spaced uniformly at a distance of 100 yd (91.4 m) or less. Each such distinctive float must display the official number of the vessel.

[61 FR 34934, July 3, 1996, as amended at 61 FR 43957, Aug. 27, 1996; 63 FR 10567, Mar. 4, 1998; 63 FR 57590, Oct. 28, 1998; 64 FR 59126, Nov. 2, 1999; 65 FR 52957, Aug. 31, 2000; 67 FR 22362, May 3, 2002; 67 FR 51078, Aug. 7, 2002; 68 FR 57378, Oct. 3, 2003]

§ 622.7 Prohibitions.

In addition to the general prohibitions in § 600.725 of this chapter, it is unlawful for any person to do any of the following:

(a) Engage in an activity for which a valid Federal permit, license, or endorsement is required under § 622.4 without such permit, license, or endorsement.

(b) Falsify information on an application for a permit, license, or endorsement or submitted in support of such application, as specified in § 622.4(b), (g), (p), (q), or (r) or in §§ 622.18 or 622.19.

(c) Fail to display a permit, license, or endorsement, or other required identification, as specified in § 622.4(i).

(d) Falsify or fail to maintain, submit, or provide information or fail to comply with inspection requirements or restrictions, as specified in § 622.5(a) through (f).

(e) Fail to make a fish, or parts thereof, available for inspection, as specified in § 622.5(e).

(f) Falsify or fail to display and maintain vessel and gear identification, as specified in § 622.6(a) and (b) or § 622.4(r)(11).

(g) Fail to comply with any requirement or restriction regarding ITQ coupons, as specified in § 622.15(c)(3), (c)(5), (c)(6), or (c)(7).

(h) Possess wreckfish as specified in § 622.15(c)(4), receive wreckfish except as specified in § 622.15(c)(7), or offload a wreckfish except as specified in § 622.15(d)(3) and (d)(4).

(i) Transfer—

(1) A wreckfish, as specified in § 622.15(d)(1);

(2) A limited-harvest species, as specified in § 622.32(c) introductory text;

(3) A species/species group subject to a bag limit, as specified § 622.39(a)(1);

(4) South Atlantic snapper-grouper from a vessel with unauthorized gear on board, as specified in § 622.41(d)(2)(iii); or

(5) A species subject to a commercial trip limit, as specified in § 622.44.

(j) Use or possess prohibited gear or methods or possess fish in association with possession or use of prohibited gear, as specified in § 622.31.

(k) Fish for, harvest, or possess a prohibited species, or a limited-harvest species in excess of its limitation, sell

Fishery Conservation and Management

§ 622.8

or purchase such species, fail to comply with release requirements, or molest or strip eggs from a Caribbean spiny lobster, as specified in § 622.32.

(l) Fish in violation of the prohibitions, restrictions, and requirements applicable to seasonal and/or area closures, including but not limited to: Prohibition of all fishing, gear restrictions, restrictions on take or retention of fish, fish release requirements, and restrictions on use of an anchor or grapple, as specified in § 622.33, § 622.34, or § 622.35, or as may be specified under § 622.46 (b) or (c).

(m) Harvest, possess, offload, sell, or purchase fish in excess of the seasonal harvest limitations, as specified in § 622.36.

(n) Except as allowed under § 622.37(c) (2) and (3) for king and Spanish mackerel, possess undersized fish, fail to release undersized fish, or sell or purchase undersized fish, as specified in § 622.37.

(o) Fail to maintain a fish intact through offloading ashore, as specified in § 622.38.

(p) Exceed a bag or possession limit, as specified in § 622.39.

(q) Fail to comply with the limitations on traps and pots, including but not limited to: Tending requirements, constructions requirements, and area specific restrictions, as specified in § 622.40.

(r) Fail to comply with the species-specific limitations, as specified in § 622.41.

(s) Fail to comply with the restrictions that apply after closure of a fishery, as specified in § 622.43.

(t) Possess on board a vessel or land, purchase, or sell fish in excess of the commercial trip limits, as specified in § 622.44.

(u) Fail to comply with the restrictions on sale/purchase, as specified in § 622.45.

(v) Interfere with fishing or obstruct or damage fishing gear or the fishing vessel of another, as specified in § 622.46(a).

(w) Fail to comply with the requirements for observer coverage as specified in § 622.10.

(x) Assault, resist, oppose, impede, intimidate, or interfere with a NMFS-approved observer aboard a vessel.

(y) Prohibit or bar by command, impediment, threat, coercion, or refusal of reasonable assistance, an observer from conducting his or her duties aboard a vessel.

(z) Fish for or possess golden crab in or from a fishing zone or sub-zone of the South Atlantic EEZ other than the zone or sub-zone for which the vessel is permitted or authorized, as specified in § 622.17(b).

(aa) Falsify information submitted regarding an application for testing a BRD, testing of a BRD, or the results of such testing, as specified in § 622.41(g)(3)(i) or (h)(3).

(bb) Make a false statement, oral or written, to an authorized officer regarding the installation, use, operation, or maintenance of a vessel monitoring system (VMS) unit or communication service provider.

(cc) Operate or own a vessel that is required to have a permitted operator aboard when the vessel is at sea or offloading without such operator aboard, as specified in § 622.4(a)(5)(i) and (ii).

(dd) When a vessel that is subject to Federal fishing regulations is at sea or offloading, own or operate such vessel with a person aboard whose operator permit is revoked, suspended, or modified.

(ee) Fail to comply with any provision related to a vessel monitoring system as specified in § 622.9, including but not limited to, requirements for use, installation, activation, access to data, procedures related to interruption of VMS operation, and prohibitions on interference with the VMS.

[61 FR 34934, July 3, 1996, as amended at 61 FR 43957, Aug. 27, 1996; 61 FR 48415, Sept. 13, 1996; 62 FR 67722, Dec. 30, 1997; 63 FR 38301, July 16, 1998; 63 FR 57590, Oct. 28, 1998; 64 FR 37693, July 13, 1999; 64 FR 43941, Aug. 12, 1999; 64 FR 68935, Dec. 9, 1999; 67 FR 22361, May 3, 2002; 67 FR 43565, June 28, 2002; 68 FR 2194, Jan. 16, 2003]

§ 622.8 At-sea observer coverage.

(a) *Required coverage*—(1) *Pelagic sargassum*. A vessel that harvests or possesses pelagic sargassum on any trip in the South Atlantic EEZ must carry a NMFS-approved observer.

(2) *Golden crab*. A vessel for which a Federal commercial permit for golden crab has been issued must carry a

§ 622.9

50 CFR Ch. VI (10–1–05 Edition)

NMFS-approved observer, if the vessel's trip is selected by the SRD for observer coverage.

(3) *Gulf reef fish.* A vessel for which a Federal commercial vessel permit for Gulf reef fish or a charter vessel/headboat permit for Gulf reef fish has been issued must carry a NMFS-approved observer, if the vessel's trip is selected by the SRD for observer coverage. Vessel permit renewal is contingent upon compliance with this paragraph (a)(3).

(b) *Notification to the SRD.* When observer coverage is required, an owner or operator must advise the SRD in writing not less than 5 days in advance of each trip of the following:

(1) Departure information (port, dock, date, and time).

(2) Expected landing information (port, dock, and date).

(c) *Observer accommodations and access.* An owner or operator of a vessel on which a NMFS-approved observer is embarked must:

(1) Provide accommodations and food that are equivalent to those provided to the crew.

(2) Allow the observer access to and use of the vessel's communications equipment and personnel upon request for the transmission and receipt of messages related to the observer's duties.

(3) Allow the observer access to and use of the vessel's navigation equipment and personnel upon request to determine the vessel's position.

(4) Allow the observer free and unobstructed access to the vessel's bridge, working decks, holding bins, weight scales, holds, and any other space used to hold, process, weigh, or store fish.

(5) Allow the observer to inspect and copy the vessel's log, communications logs, and any records associated with the catch and distribution of fish for that trip.

[61 FR 43957, Aug. 27, 1996, as amended at 63 FR 57590, Oct. 28, 1998; 68 FR 57378, Oct. 3, 2003; 70 FR 32272, June 2, 2005]

§ 622.9 Vessel monitoring systems (VMSs).

(a) *Requirement for use.* As of October 14, 2003 or 90 days after NMFS publishes in the FEDERAL REGISTER, the list of approved transmitting units and asso-

ciated communications service providers, whichever is later, an owner or operator of a vessel that has been issued a limited access endorsement for South Atlantic rock shrimp must ensure that such vessel has a NMFS-approved, operating VMS on board when on a trip in the South Atlantic. An operating VMS includes an operating mobile transmitting unit on the vessel and a functioning communication link between the unit and NMFS as provided by a NMFS-approved communication service provider.

(b) *Installing and activating the VMS.* Only a VMS that has been approved by NMFS for use in the South Atlantic rock shrimp fishery may be used. When installing and activating the NMFS-approved VMS, or when reinstalling and reactivating such VMS, the vessel owner or operator must—

(1) Follow procedures indicated on an installation and activation checklist, which is available from NMFS, Office of Enforcement, Southeast Region, St. Petersburg, FL; phone: 727-570-5344; and

(2) Submit to NMFS, Office of Enforcement, Southeast Region, St. Petersburg, FL, a statement certifying compliance with the checklist, as prescribed on the checklist.

(c) *Interference with the VMS.* No person may interfere with, tamper with, alter, damage, disable, or impede the operation of the VMS, or attempt any of the same.

(d) *Interruption of operation of the VMS.* When a vessel's VMS is not operating properly, the owner or operator must immediately contact NMFS, Office of Enforcement, Southeast Region, St. Petersburg, FL, and follow instructions from that office. If notified by NMFS that a vessel's VMS is not operating properly, the owner and operator must follow instructions from that office. In either event, such instructions may include, but are not limited to, manually communicating to a location designated by NMFS the vessel's positions or returning to port until the VMS is operable.

(e) *Access to position data.* As a condition of authorized fishing for or possession of South Atlantic rock shrimp in

or from the South Atlantic EEZ, a vessel owner or operator subject to the requirements for a VMS in this section must allow NMFS, the USCG, and their authorized officers and designees access to the vessel's position data obtained from the VMS.

[68 FR 2194, Jan. 16, 2003]

Subpart B—Effort Limitations

§ 622.15 Wreckfish individual transferable quota (ITQ) system.

The provisions of this section apply to wreckfish in or from the South Atlantic EEZ.

(a) *Percentage shares.* (1) In accordance with the procedure specified in the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic Region, percentage shares of the quota for wreckfish have been assigned. Each person has been notified by the RA of his or her percentage share and shareholder certificate number.

(2) All or a portion of a person's percentage shares may be transferred to another person. Transfer of shares must be reported on a form available from the RA. The RA will confirm, in writing, each transfer of shares. The effective date of each transfer is the confirmation date provided by the RA. The confirmation date will normally be not later than 3 working days after receipt of a properly completed transfer form. A fee is charged for each transfer of shares. The amount of the fee is calculated in accordance with the procedures of the NOAA Finance Handbook, available from the RA, for determining the administrative costs of each special product or service provided by NOAA to non-Federal recipients. The fee may not exceed such costs and is specified with each transfer form. The appropriate fee must accompany each transfer form.

(b) *Lists of wreckfish shareholders and permitted vessels.* Annually, on or about March 1, the RA will provide each wreckfish shareholder with a list of all wreckfish shareholders and their percentage shares, reflecting share transactions on forms received through February 15. Annually by April 15, the RA will provide each dealer who holds a dealer permit for wreckfish, as re-

quired under § 622.4(a)(4), with a list of vessels for which wreckfish permits have been issued, as required under § 622.4(a)(2)(vii). Annually, by April 15, the RA will provide each wreckfish shareholder with a list of dealers who have been issued dealer permits for wreckfish. From April 16 through January 14, updated lists will be provided when required. Updated lists may be obtained at other times or by a person who is not a wreckfish shareholder or wreckfish dealer permit holder by written request to the RA.

(c) *ITQs.* (1) Annually, as soon after March 1 as the TAC for wreckfish for the fishing year that commences April 16 is known, the RA will calculate each wreckfish shareholder's ITQ. Each ITQ is the product of the wreckfish TAC, in round weight, for the ensuing fishing year, the factor for converting round weight to eviscerated weight, and each wreckfish shareholder's percentage share, reflecting share transactions reported on forms received by the RA through February 15. Thus, the ITQs will be in terms of eviscerated weight of wreckfish.

(2) The RA will provide each wreckfish shareholder with ITQ coupons in various denominations, the total of which equals his or her ITQ, and a copy of the calculations used in determining his or her ITQ. Each coupon will be coded to indicate the initial recipient.

(3) An ITQ coupon may be transferred from one wreckfish shareholder to another by completing the sale endorsement thereon (that is, the signature and shareholder certificate number of the buyer). An ITQ coupon may be possessed only by the shareholder to whom it has been issued, or by the shareholder's employee, contractor, or agent, unless the ITQ coupon has been transferred to another shareholder. An ITQ coupon that has been transferred to another shareholder may be possessed only by the shareholder whose signature appears on the coupon as the buyer, or by the shareholder's employee, contractor, or agent, and with all required sale endorsements properly completed.

(4) Wreckfish may not be possessed on board a fishing vessel—

§ 622.16

50 CFR Ch. VI (10–1–05 Edition)

(i) In an amount exceeding the total of the ITQ coupons on board the vessel;

(ii) That does not have on board a commercial vessel permit for wreckfish, as required under § 622.4(a)(2)(vii); or

(iii) That does not have on board logbook forms for that fishing trip, as required under § 622.5(a)(1)(iv)(B).

(5) Prior to termination of a trip, a signature and date signed must be affixed in ink to the “Fisherman” part of ITQ coupons in denominations equal to the eviscerated weight of the wreckfish on board. The “Fisherman” part of each such coupon must be separated from the coupon and submitted with the logbook forms required by § 622.5(a)(1)(iv)(B) for that fishing trip.

(6) The “Fish House” part of each such coupon must be given to the dealer to whom the wreckfish are transferred in amounts totaling the eviscerated weight of the wreckfish transferred to that dealer. A wreckfish may be transferred only to a dealer who holds a dealer permit for wreckfish, as required under § 622.4(a)(4).

(7) A dealer may receive a wreckfish only from a vessel for which a commercial permit for wreckfish has been issued, as required under § 622.4(a)(2)(vii). A dealer must receive the “Fish House” part of ITQ coupons in amounts totaling the eviscerated weight of the wreckfish received; enter the permit number of the vessel from which the wreckfish were received, enter the date the wreckfish were received, enter the dealer’s permit number, and sign each such “Fish House” part; and submit all such parts with the dealer reports required by § 622.5(c)(5)(i).

(8) An owner or operator of a vessel and a dealer must make available to an authorized officer all ITQ coupons in his or her possession upon request.

(d) *Wreckfish limitations.* (1) A wreckfish taken in the South Atlantic EEZ may not be transferred at sea, regardless of where the transfer takes place; and a wreckfish may not be transferred in the South Atlantic EEZ.

(2) A wreckfish possessed by a fisherman or dealer shoreward of the outer boundary of the South Atlantic EEZ or in a South Atlantic coastal state will be presumed to have been harvested

from the South Atlantic EEZ unless accompanied by documentation that it was harvested from other than the South Atlantic EEZ.

(3) A wreckfish may be offloaded from a fishing vessel only between 8 a.m. and 5 p.m., local time.

(4) If a wreckfish is to be offloaded at a location other than a fixed facility of a dealer who holds a dealer permit for wreckfish, as required under § 622.4(a)(4), the wreckfish shareholder or the vessel operator must advise the NMFS, Office of Enforcement, Southeast Region, St. Petersburg, FL, by telephone (1-800-853-1964), of the location not less than 24 hours prior to offloading.

[61 FR 34934, July 3, 1996, as amended at 64 FR 59126, Nov. 2, 1999]

§ 622.16 Red snapper individual transferable quota (ITQ) system.

The ITQ system established by this section will remain in effect through March 31, 2000, during which time NMFS and the GMFMC will evaluate the effectiveness of the system. Based on the evaluation, the system may be modified, extended, or terminated.

(a) *Percentage shares.* (1) Initial percentage shares of the annual quota of red snapper are assigned to persons in accordance with the procedure specified in Amendment 8 to the Fishery Management Plan for the Reef Fish Fishery of the Gulf of Mexico (FMP) and in paragraphs (c)(1) through (c)(4) of this section. Each person is notified by the RD of his or her initial percentage shares. If additional shares become available to NMFS, such as by forfeiture pursuant to subpart F of 15 CFR part 904 for rule violations, such shares will be proportionately reissued to shareholders based on their shares as of November 1, after the additional shares become available. If NMFS is required to issue additional shares, such as may be required in the resolution of disputes, existing shares will be proportionately reduced. This reduction of shares will be based on shares as of November 1 after the required addition of shares.

(2) All or a portion of a person’s percentage shares may be transferred to another person who is a U.S. citizen or

permanent resident alien. (See paragraph (c)(5) of this section for restrictions on the transfer of shares in the initial months under the ITQ system.) Transfer of shares must be reported on a form available from the RD. The RD will confirm, in writing, the registration of each transfer. The effective date of each transfer is the confirmation date provided by the RD. The confirmation of registration date will normally be not later than 3 working days after receipt of a properly completed transfer form. However, reports of share transfers received by the RD from November 1 through December 31 will not be recorded or confirmed until after January 1. A fee is charged for each transfer of percentage shares. The amount of the fee is calculated in accordance with the procedures of the NOAA Finance Handbook for determining the administrative costs of each special product or service provided by NOAA to non-Federal recipients. The fee may not exceed such costs and is specified with each transfer form. The appropriate fee must accompany each transfer form.

(3) On or about January 1 each year, the RD will provide each red snapper shareholder with a list of all red snapper shareholders and their percentage shares, reflecting share transfers as indicated on properly completed transfer forms received through October 31. Updated lists may be obtained at other times, and by persons who are not red snapper shareholders, by written request to the RD.

(b) *ITQs.* (1) Annually, as soon after November 15 as the following year's red snapper quota is established, the RD will calculate each red snapper shareholder's ITQ in terms of eviscerated weight. Each ITQ is the product of the red snapper quota, in round weight, for the ensuing fishing year, the factor for converting round weight to eviscerated weight, and each red snapper shareholder's percentage share, reflecting share transfers reported on forms received by the RD through October 31.

(2) The RD will provide each red snapper shareholder with ITQ coupons in various denominations, the total of which equals his or her ITQ, and a copy of the calculations used in determining

his or her ITQ. Each coupon will be coded to indicate the initial recipient.

(3) An ITQ coupon may be transferred. If the transfer is by sale, the seller must enter the sale price on the coupon.

(4) Except when the red snapper bag limit applies, red snapper in or from the EEZ or on board a vessel that has been issued a commercial permit for Gulf reef fish, as required under § 622.4(a)(2)(v), may not be possessed in an amount, in eviscerated weight, exceeding the total of ITQ coupons on board. (See § 622.39(a) for applicability of the bag limit.)

(5) Prior to termination of a trip, the operator's signature and the date signed must be written in ink on the "Vessel" part of ITQ coupons totaling at least the eviscerated weight of the red snapper on board. An owner or operator of a vessel must separate the "Vessel" part of each such coupon, enter thereon the permit number of the dealer to whom the red snapper are transferred, and submit the "Vessel" parts with the logbook forms for that fishing trip. An owner or operator of a vessel must make available to an authorized officer all ITQ coupons in his or her possession upon request.

(6) Red snapper harvested from the EEZ or possessed by a vessel with a commercial permit for Gulf reef fish, as required under § 622.4(a)(2)(v), may be transferred only to a dealer with a Gulf reef fish permit, as required under § 622.4(a)(4). The "Fish House" part of each ITQ coupon must be given to such dealer, or the agent or employee of such dealer, in amounts totaling at least the eviscerated weight of the red snapper transferred to that dealer.

(7) A dealer with a Gulf reef fish permit may receive red snapper only from a vessel that has on board a commercial permit for Gulf reef fish. A dealer, or the agent or employee of a dealer, must receive the "Fish House" part of ITQ coupons totaling at least the eviscerated weight of the red snapper received. Immediately upon receipt of red snapper, the dealer, or the agent or employee of the dealer, must enter the permit number of the vessel received from and date and sign each such "Fish House" part. The dealer must submit all such parts as required by paragraph

(d)(6) of this section. A dealer, agent, or employee must make available to an authorized officer all ITQ coupons in his or her possession upon request.

(c) *Procedures for implementation*—(1) *Initial shareholders.* The following persons are initial shareholders in the red snapper ITQ system:

(i) Either the owner or operator of a vessel with a valid permit on August 29, 1995, provided such owner or operator had a landing of red snapper during the period 1990 through 1992. If the earned income of an operator was used to qualify for the permit that is valid on August 29, 1995, such operator is the initial shareholder rather than the owner. In the case of an owner, the term “person” includes a corporation or other legal entity; and

(ii) A historical captain. A historical captain means an operator who meets all of the following qualifications:

(A) From November 6, 1989, through 1993, fished solely under verbal or written share agreements with an owner, and such agreements provided for the operator to be responsible for hiring the crew, who was paid from the share under his or her control.

(B) Landed from that vessel at least 5,000 lb (2,268 kg) of red snapper per year in 2 of the 3 years 1990, 1991, and 1992.

(C) Derived more than 50 percent of his or her earned income from commercial fishing, that is, sale of the catch, in each of the years 1989 through 1993.

(D) Landed red snapper prior to November 7, 1989.

(2) *Initial shares.* (i) Initial shares are apportioned to initial shareholders based on each shareholder’s average of the top 2 years’ landings in 1990, 1991, and 1992. However, no person who is an initial shareholder under paragraph (c)(1) of this section will receive an initial percentage share that will amount to less than 100 lb (45.36 kg), round weight, of red snapper (90 lb (41 kg), eviscerated weight).

(ii) The percentage shares remaining after the minimum shares have been calculated under paragraph (c)(2)(i) of this section are apportioned based on each remaining shareholder’s average of the top 2 years’ landings in 1990, 1991, and 1992. In a case where a landing is associated with an owner and a histor-

ical captain, such landing is apportioned between the owner and historical captain in accordance with the share agreement in effect at the time of the landing.

(iii) The determinations of landings of red snapper during the period 1990 through 1992 and historical captain status are made in accordance with the data collected under Amendment 9 to the FMP. Those data identify each red snapper landing during the period 1990 through 1992. Each landing is associated with an owner and, when an operator’s earned income was used to qualify for the vessel permit at the time of the landing, with such operator. Where appropriate, a landing is also associated with a historical captain. However, a red snapper landings record during that period that is associated solely with an owner may be retained by that owner or transferred as follows:

(A) An owner of a vessel with a valid commercial permit for Gulf reef fish on August 29, 1995, who transferred a vessel permit to another vessel owned by him or her will retain the red snapper landings record for the previous vessel.

(B) An owner of a vessel with a valid commercial permit for Gulf reef fish on August 29, 1995, will retain the landings record of a permitted vessel if the vessel had a change of ownership to another entity without a substantive change in control of the vessel. It will be presumed that there was no substantive change in control of a vessel if a successor in interest received at least a 50 percent interest in the vessel as a result of the change of ownership whether the change of ownership was—

(1) From a closely held corporation to its majority shareholder;

(2) From an individual who became the majority shareholder of a closely held corporation receiving the vessel;

(3) Between closely held corporations with a common majority shareholder; or

(4) From one to another of the following: Husband, wife, son, daughter, brother, sister, mother, or father.

(C) In other cases of transfer of a permit through change of ownership of a vessel, an owner of a vessel with a valid commercial permit for Gulf reef fish on August 29, 1995, will receive credit for the landings record of the vessel before

his or her ownership only if there is a legally binding agreement for transfer of the landings record.

(iv) Requests for transfers of landings records must be submitted to the RD and must be postmarked not later than December 14, 1995. The RD may require documentation supporting such request. After considering requests for transfers of landings records, the RD will advise each initial shareholder or applicant of his or her tentative allocation of shares.

(3) *Notification of status.* The RD will advise each owner, operator, and historical captain for whom NMFS has a record of a red snapper landing during the period 1990 through 1992, including those who submitted such record under Amendment 9 to the FMP, of his or her tentative status as an initial shareholder and the tentative landings record that will be used to calculate his or her initial share.

(4) *Appeals.* (i) A special advisory panel, appointed by the GMFMC to function as an appeals board, will consider written requests from persons who contest their tentative status as an initial shareholder, including historical captain status, or tentative landings record. In addition to considering written requests, the board may allow personal appearances by such persons before the board.

(ii) The panel is only empowered to consider disputed calculations or determinations based on documentation submitted under Amendment 9 to the FMP regarding landings of red snapper during the period 1990 through 1992, including transfers of such landings records, or regarding historical captain status. In addition, the panel may consider applications and documentation of landings not submitted under Amendment 9 if, in the board's opinion, there is justification for the late application and documentation. The board is not empowered to consider an application from a person who believes he or she should be eligible because of hardship or other factors.

(iii) A written request for consideration by the board must be submitted to the RD, postmarked not later than December 27, 1995, and must contain documentation supporting the allega-

tions that form the basis for the request.

(iv) The board will meet as necessary to consider each request that is submitted in a timely manner. Members of the appeals board will provide their individual recommendations for each appeal to the GMFMC, which will in turn submit its recommendation to the RD. The board and the GMFMC will recommend whether the eligibility criteria, specified in Amendment 8 to the FMP and paragraphs (c)(1) and (c)(2) of this section, were correctly applied in each case, based solely on the available record including documentation submitted by the applicant. The GMFMC will also base its recommendation on the recommendations of the board. The RD will decide the appeal based on the above criteria and the available record, including documentation submitted by the applicant and the recommendation of the GMFMC. The RD will notify the appellant of his decision and the reason therefor, in writing, normally within 45 days of receiving the GMFMC's recommendation. The RD's decision will constitute the final administrative action by NMFS on an appeal.

(v) Upon completion of the appeal process, the RD will issue share certificates to initial shareholders.

(5) *Transfers of shares.* The following restrictions apply to the transfer of shares:

(i) The transfer of shares is prohibited through September 30, 1996.

(ii) From October 1, 1996, through September 30, 1997, shares may be transferred only to other persons who are initial shareholders and are U.S. citizens or permanent resident aliens.

(d) *Exceptions/additions to general measures.* Other provisions of this part notwithstanding—

(1) Management of the red snapper ITQ system extends to adjoining state waters in the manner stated in paragraphs (d)(2) and (d)(3) of this section.

(2) For a dealer to receive red snapper harvested from state waters adjoining the Gulf EEZ by or possessed on board a vessel with a commercial permit for Gulf reef fish, the dealer permit for Gulf reef fish specified in § 622.4(a)(4) must have been issued to the dealer.

(3) A copy of the dealer's permit must accompany each vehicle that is used to

§ 622.17

50 CFR Ch. VI (10–1–05 Edition)

pick up from a fishing vessel red snapper from adjoining state waters harvested by or possessed on board a vessel with a commercial permit for Gulf reef fish.

(4) As a condition of a commercial vessel permit for Gulf reef fish, without regard to where red snapper are harvested or possessed, a vessel with such permit must comply with the red snapper ITQ requirements of paragraph (b) of this section; may not transfer or receive red snapper at sea; and must maintain red snapper with head and fins intact through landing, and the exceptions to that requirement contained in § 622.38(d) do not apply to red snapper. Red snapper may be eviscerated, gilled, and scaled but must otherwise be maintained in a whole condition.

(5) As a condition of a dealer permit for Gulf reef fish, as required under § 622.4(a)(4) or under paragraph (d)(2) of this section, without regard to where red snapper are harvested or possessed, a permitted dealer must comply with the red snapper ITQ requirements of paragraph (b) of this section.

(6) In any month that a red snapper is received, a dealer must submit the report required under § 622.5(c)(3)(ii). The “Fish House” parts of red snapper individual transferable coupons, received during the month in accordance with paragraph (b) of this section, must be submitted to the SRD with the report.

(7) It is unlawful for a person to do any of the following:

(i) Receive red snapper from a fishing vessel without a dealer permit for Gulf reef fish.

(ii) Fail to carry a copy of the dealer’s permit, as specified in paragraph (d)(3) of this section.

(iii) Fail to comply with a condition of a permit, as specified in paragraph (d)(4) or (d)(5) of this section.

(iv) Fail to report red snapper received, as specified in paragraph (d)(6) of this section.

EFFECTIVE DATE NOTE: At 61 FR 48415, Sept. 13, 1996, § 622.16 was stayed indefinitely.

§ 622.17 South Atlantic golden crab controlled access.

(a) *General.* In accordance with the procedures specified in the Fishery Management Plan for the Golden Crab Fishery of the South Atlantic Region,

initial commercial vessel permits have been issued for the fishery. All permits in the fishery are issued on a fishing-year (calendar-year) basis. No additional permits may be issued except as follows:

(1) *For the southern zone.* (i) Upon application, the RA will reissue a permit for the southern zone for a vessel that held a valid permit for that zone in October 2000 but did not meet the 5,000-lb (2,268-kg) requirement for renewal in the following year.

(ii) An application for a permit under paragraph (a)(1) of this section must be received by the RA no later than July 2, 2002.

(2) *For the northern zone.* (i) The RA will issue up to two new vessel permits for the northern zone. Selection will be made from the list of historical participants in the South Atlantic golden crab fishery. Such list was used at the October 1995 meeting of the South Atlantic Fishery Management Council and was prioritized based on pounds of golden crab landed, without reference to a specific zone. Individuals on the list who originally received permits will be deleted from the list.

(ii) The RA will offer in writing an opportunity to apply for a permit for the northern zone to the individuals highest on the list until two accept and apply in a timely manner. An offer that is not accepted within 30 days after it is received will no longer be valid.

(iii) An application for a permit from an individual who accepts the RA’s offer must be received by the RA no later than 30 days after the date of the individual’s acceptance. Application forms are available from the RA.

(iv) A vessel permit for the northern zone issued under paragraph (a)(2) of this section, and any successor permit, may not be changed to another zone. A successor permit includes a permit issued to that vessel for a subsequent owner and a permit issued via transfer from that vessel to another vessel.

(b) *Fishing zones*—(1) *Designation of fishing zones.* The South Atlantic EEZ is divided into three fishing zones for golden crab as follows:

(i) Northern zone—the South Atlantic EEZ north of 28° N. lat.

(ii) Middle zone—the South Atlantic EEZ from 28° N. lat. to 25° N. lat.

(iii) Southern zone—the South Atlantic EEZ south of 25° N. lat.

(2) *Authorization to fish in zones.* Each vessel permit indicates one of the zones specified in paragraph (b)(1) of this section. A vessel with a permit to fish for golden crab in the northern zone or the middle zone may fish only in that zone. A vessel with a documented length overall greater than 65 ft (19.8 m) with a permit to fish for golden crab in the southern zone may fish in that zone, consistent with the provisions of paragraph (b)(3) of this section, and, through May 3, 2005, may also fish in the northern zone. A vessel may possess golden crab only in a zone in which it is authorized to fish, except that other zones may be transited if the vessel notifies NMFS, Office of Enforcement, Southeast Region, St. Petersburg, FL, by telephone (727-570-5344) in advance and does not fish in a zone in which it is not authorized to fish.

(3) *Small-vessel sub-zone.* Within the southern zone, a small-vessel sub-zone is established bounded on the north by 24°15' N. lat., on the south by 24°07' N. lat., on the east by 81°22' W. long., and on the west by 81°56' W. long. No vessel with a documented length overall greater than 65 ft (19.8 m) may fish for golden crab in this sub-zone, and a vessel with a documented length overall of 65 ft (19.8 m) or less that is permitted for the southern zone may fish for golden crab only in this sub-zone.

(4) *Procedure for changing zones.* (i) Upon request from an owner of a permitted vessel, the RA will change the zone specified on a permit from the middle or southern zone to the northern zone. No other changes in the zone specified on a permit are allowed, except as specified in paragraph (b)(4)(ii) of this section. An owner of a permitted vessel who desires a change to the northern zone must submit his/her request with the existing permit to the RA.

(ii) Through May 3, 2005, upon request, the RA will change a vessel permit back to the southern zone for an owner of a vessel, or the subsequent owner of a vessel, whose permit was changed from the southern zone to the

northern zone provided that the documented length overall of the vessel to be used in the southern zone is not more than 20 percent greater than the vessel whose permit was originally changed from the southern zone to the northern zone.

(c) *Transferring permits between vessels—(1) Procedure for transferring.* An owner of a vessel who desires a golden crab permit may request that NMFS transfer an existing permit or permits to his or her vessel by returning an existing permit or permits to the RA with an application for a permit for the replacement vessel.

(2) *Vessel size limitations on transferring.* (i) To obtain a permit for the middle or southern zone via transfer, the documented length overall of the replacement vessel may not exceed the documented length overall, or aggregate documented lengths overall, of the replaced vessel(s) by more than 20 percent. The owner of a vessel permitted for the middle or southern zone who has requested that NMFS transfer that permit to a smaller vessel (i.e., downsized) may subsequently request NMFS transfer that permit to a vessel of a length calculated from the length of the permitted vessel immediately prior to downsizing.

(ii) There are no vessel size limitations to obtain a permit for the northern zone via transfer.

(d) *Permit renewal.* NMFS will not renew a commercial vessel permit for South Atlantic golden crab if the permit is revoked or if the RA does not receive a required application for renewal within 6 months after the permit's expiration. See § 622.4(h) for the applicable general procedures and requirements for permit renewals.

[67 FR 22361, May 3, 2002]

§ 622.18 South Atlantic snapper-group- er limited access.

(a) *Applicability.* Beginning December 14, 1998, the only valid commercial vessel permits for South Atlantic snapper-grouper are those that have been issued under the limited access criteria in this section. A vessel may have either a transferable commercial permit or a trip-limited commercial permit for South Atlantic snapper-grouper.

(b) *Initial eligibility.* A vessel is eligible for an initial limited access commercial permit for South Atlantic snapper-grouper if the owner owned a vessel with a commercial vessel permit for South Atlantic snapper-grouper at any time from February 11, 1996, through February 11, 1997, and owned a permitted vessel that had at least one landing of snapper-grouper from the South Atlantic from January 1, 1993, through August 20, 1996, as reported on fishing vessel logbooks received by the SRD on or before August 20, 1996. An owner whose permitted vessels had landings of snapper-grouper from the South Atlantic of at least 1,000 lb (453.6 kg), whole weight, in any one of the years 1993, 1994, or 1995, or in 1996 through August 20, as reported on fishing vessel logbooks received by the SRD on or before August 20, 1996, is eligible for an initial transferable permit. All other qualifying owners are eligible for an initial trip-limited permit.

(c) *Determinations of eligibility—(1) Permit history.* The sole basis for determining whether a vessel had a commercial vessel permit for South Atlantic snapper-grouper at any time from February 11, 1996, through February 11, 1997, is NMFS' permit records. An owner of a currently permitted vessel who believes he/she meets the February 11, 1996, through February 11, 1997, permit history criterion based on ownership of a vessel under a different name, as may have occurred when ownership has changed from individual to corporate or vice versa, must document his/her continuity of ownership. No more than one owner of a currently permitted vessel will be credited with meeting the permit history criterion based on a vessel's permit history.

(2) *Landings.* (i) Landings of snapper-grouper from the South Atlantic during the qualifying period are determined from fishing vessel logbooks received by the SRD on or before August 20, 1996. State trip ticket data may be considered in support of claimed landings provided such trip ticket data were received by the state on or before September 20, 1996.

(ii) Only landings when a vessel had a valid commercial permit for snapper-grouper and only landings that were harvested, landed, and sold in compli-

ance with state and Federal regulations may be used to establish eligibility.

(iii) For the purpose of eligibility for a limited access commercial permit for snapper-grouper, the owner of a vessel that had a commercial snapper-grouper permit during the qualifying period retains the snapper-grouper landings record of that vessel during the time of his/her ownership unless a sale of the vessel included a written agreement that credit for such landings was transferred to the new owner. Such transfer of credit must be for the vessel's entire record of landings of snapper-grouper from the South Atlantic.

(d) *Implementation procedures—(1) Notification of status.* On or about July 27, 1998, the RA will notify each owner of a vessel that had a commercial permit for South Atlantic snapper-grouper at any time from February 11, 1996, through February 11, 1997, and each owner of a vessel that has a commercial permit for South Atlantic snapper-grouper on July 16, 1998, of NMFS' initial determination of eligibility for either a transferable or a trip-limited, limited access commercial permit for South Atlantic snapper-grouper. Each notification will include an application for such permit. Addresses for such notifications will be based on NMFS' permit records. A vessel owner who believes he/she qualifies for a limited access commercial permit for South Atlantic snapper-grouper and who does not receive such notification must obtain an application from the RA.

(2) *Applications.* (i) An owner of a vessel who desires a limited access commercial permit for South Atlantic snapper-grouper must submit an application for such permit postmarked or hand-delivered not later than October 14, 1998. Failure to apply in a timely manner will preclude permit issuance even when the vessel owner meets the eligibility criteria for such permit.

(ii) A vessel owner who agrees with NMFS' initial determination of eligibility, including type of permit (transferable or trip-limited), need provide no documentation of eligibility with his/her application.

(iii) A vessel owner who disagrees with the initial determination of eligibility or type of permit must specify

the type of permit applied for and provide documentation of eligibility. Documentation and other information submitted on or with an application are subject to verification by comparison with state, Federal, and other records and information. Submission of false documentation or information may disqualify an owner from initial participation in the limited access commercial South Atlantic snapper-grouper fishery and is a violation of the regulations in this part.

(iv) If an application that is postmarked or hand delivered in a timely manner is incomplete, the RA will notify the vessel owner of the deficiency. If the owner fails to correct the deficiency within 20 days of the date of the RA's notification, the application will be considered abandoned.

(3) *Issuance.* (i) If a complete application is submitted in a timely manner and the eligibility requirements specified in paragraph (b) of this section are met, the RA will issue an initial commercial vessel permit, transferable or trip-limited, as appropriate, and mail it to the vessel owner not later than December 3, 1998.

(ii) If the eligibility requirements specified in paragraph (b) of this section are not met, the RA will notify the vessel owner, in writing, not later than November 13, 1998 of such determination and the reasons for it.

(4) *Reconsideration.* (i) A vessel owner may request reconsideration of the RA's determination regarding initial permit eligibility by submitting a written request for reconsideration to the RA. Such request must be postmarked or hand delivered within 20 days of the date of the RA's notification denying initial permit issuance and must provide written documentation supporting permit eligibility.

(ii) Upon receipt of a request for reconsideration, the RA will forward the initial application, the RA's response to that application, the request for reconsideration, and pertinent records to an Application Oversight Board consisting of state directors (or their designees) from each state in the Council's area of jurisdiction. Upon request, a vessel owner may make a personal appearance before the Application Oversight Board.

(iii) If reconsideration by the Application Oversight Board is requested, such request constitutes the vessel owner's written authorization under section 402(b)(1)(F) of the Magnuson-Stevens Act for the RA to make available to the Application Oversight Board members such confidential catch and other records as are pertinent to the matter under reconsideration.

(iv) The Application Oversight Board may only deliberate whether the eligibility criteria specified in paragraph (b) of this section were applied correctly in the vessel owner's case, based solely on the available record, including documentation submitted by the owner. The Application Oversight Board may not consider whether an owner should have been eligible for a commercial vessel permit because of hardship or other factors. The Application Oversight Board members will provide individual recommendations for each application for reconsideration to the RA.

(v) The RA will make a final decision based on the eligibility criteria specified in paragraph (b) of this section and the available record, including documentation submitted by the vessel owner, and the recommendations and comments from members of the Application Oversight Board. The RA may not consider whether a vessel owner should have been eligible for a commercial vessel permit because of hardship or other factors. The RA will notify the owner of the decision and the reason for it, in writing, within 15 days of receiving the recommendations from the Application Oversight Board members. The RA's decision will constitute the final administrative action by NMFS.

(e) *Transfers of permits.* A snapper-grouper limited access permit is valid only for the vessel and owner named on the permit. To change either the vessel or the owner, an application for transfer must be submitted to the RA.

(1) *Transferable permits.* (i) An owner of a vessel with a transferable permit may request that the RA transfer the permit to another vessel owned by the same entity.

(ii) A transferable permit may be transferred upon a change of ownership of a permitted vessel with such permit

from one to another of the following: Husband, wife, son, daughter, brother, sister, mother, or father.

(iii) A transferable permit may be transferred to a vessel whose owner had, as of August 20, 1996, a written contract for the purchase of a vessel that included a provision transferring to the new owner the rights to any limited access permit to which the former owner might become entitled under the provisions for initial issue of limited access permits. To be considered, any such written contract must be submitted to the RA postmarked or hand-delivered on or before December 14, 1998.

(iv) Except as provided in paragraphs (e)(1)(i), (ii), and (iii) of this section, a person desiring to acquire a limited access, transferable permit for South Atlantic snapper-grouper must obtain and exchange two such permits for one new permit.

(v) A transfer of a permit that is undertaken under paragraph (e)(1)(ii), (e)(1)(iii), or (e)(1)(iv) of this section will constitute a transfer of the vessel's entire catch history to the new owner.

(2) *Trip-limited permits.* An owner of a vessel with a triplimited permit may request that the RA transfer the permit to another vessel owned by the same entity.

(f) *Renewal.* NMFS will not reissue a commercial vessel permit for South Atlantic snapper-grouper if the permit is revoked or if the RA does not receive an application for renewal within 60 days of the permit's expiration date.

[63 FR 38301, July 16, 1998, as amended at 64 FR 59126, Nov. 2, 1999; 65 FR 51252, Aug. 23, 2000]

§ 622.19 South Atlantic rock shrimp limited access.

(a) *Applicability.* Effective July 15, 2003, for a person aboard a vessel to fish for rock shrimp in the South Atlantic EEZ off Georgia or off Florida or possess rock shrimp in or from the South Atlantic EEZ off Georgia or off Florida, a limited access endorsement for South Atlantic rock shrimp must be issued to the vessel and must be on board.

(b) *Initial eligibility.* A vessel is eligible for an initial limited access en-

dorsement for South Atlantic rock shrimp if the owner—

(1) Owned a vessel with a Federal permit for South Atlantic rock shrimp on or before December 31, 2000, and

(2) Landed at least 15,000 lbs (6,804 kg) of South Atlantic rock shrimp in any one of the calendar years 1996 through 2000 from a vessel that he/she owned.

(c) *Determinations of eligibility—(1) Permit history.* The sole basis for determining whether a vessel had a Federal permit for South Atlantic rock shrimp, and that vessel's owner during the time it was permitted, is the RA's permit records. A person who believes he/she meets the permit history criterion based on ownership of a vessel under a different name, as may have occurred when ownership changed from individual to corporate or vice versa, must document his/her ownership.

(2) *Landings.* (i) Landings of rock shrimp from the South Atlantic EEZ during the qualifying period are verified from landings data that were submitted on or before January 31, 2001 and are in state or Federal database systems; no additional landings data will be accepted.

(ii) Only landings when a vessel had a valid Federal permit for rock shrimp, that were harvested from the South Atlantic EEZ, and that were landed and sold in compliance with state and Federal regulations will be used to establish eligibility.

(iii) For the purpose of eligibility for an initial limited access endorsement for South Atlantic rock shrimp, the owner of a vessel that had a permit for South Atlantic rock shrimp during the qualifying period retains the rock shrimp landings record of that vessel during the time of his/her ownership, unless, prior to January 16, 2003, a sale of the vessel includes a written agreement that credit for qualifying landings is transferred to the new owner. Qualifying landings are landings of at least 15,000 lb (6,804 kg) of rock shrimp harvested from the South Atlantic EEZ in any one of the calendar years 1996 through 2000. Such transfer of credit must be for the vessel's entire record of landings of rock shrimp from the South Atlantic during the time of the seller's ownership; no partial transfers are allowed.

(d) *Implementation procedures*—(1) *Notification of status*. On or about March 17, 2003, the RA will notify each owner of a vessel that had a permit for South Atlantic rock shrimp on or before December 31, 2000, and each owner of a vessel currently permitted for South Atlantic rock shrimp, of the RA's initial determination of eligibility for a limited access endorsement for South Atlantic rock shrimp. The notification will include a determination regarding the 15,000-lb (6,804-kg) threshold level for the endorsement. If the landings in the combined state and Federal databases do not meet the 15,000-lb (6,804-kg) threshold for any of the qualifying years, the landings in each of the qualifying years, as shown in those databases, will be included. Each notification will include an application for such endorsement. Addresses for notifications will be based on the RA's permit records. Each owner of a vessel that had a permit for South Atlantic rock shrimp on or before December 31, 2000, and each owner of a currently permitted vessel, who does not receive notification by April 1, 2003 must advise the RA of non-receipt within 15 days thereafter.

(2) *Applications*. (i) An owner of a vessel who desires a limited access endorsement for South Atlantic rock shrimp must submit an application for such endorsement postmarked or hand-delivered not later than May 16, 2003. Failure to apply in a timely manner will preclude issuance of an endorsement even if the vessel owner meets the eligibility criteria for the endorsement.

(ii) An applicant who agrees with the RA's initial determination of eligibility does not need to provide documentation of eligibility with his/her application.

(iii) An applicant who disagrees with the RA's initial determination of eligibility must provide documentation of eligibility with his/her application. Such documentation must include the name and official number of the vessel permitted for South Atlantic rock shrimp and the dates, quantities, trip tickets, and purchasing dealers for specific landings claimed for the vessel. In addition, if an owner's application for a limited access endorsement is based on

qualifying landings that were transferred to him/her through a written agreement, as discussed in paragraph (c)(2)(iii) of this section, the application must be accompanied by a copy of that agreement and a statement of the cost associated with obtaining the catch history. Documentation and other information submitted on or with an application are subject to verification by comparison with state or Federal records and information. If such documentation and information cannot be verified from state or Federal records and information, the documentation and other information will be rejected. Submission of false documentation or information may disqualify an owner from obtaining an initial limited access endorsement for South Atlantic rock shrimp and is a violation of the regulations in this part.

(iv) If an application that is postmarked or hand delivered in a timely manner is incomplete, the RA will notify the applicant of the deficiency. If the applicant fails to correct the deficiency within 20 days of the date of the RA's notification, the application will be considered abandoned.

(3) *Issuance*. If a complete application is submitted in a timely manner and the eligibility requirements specified in paragraph (b) of this section are met, the RA will take action as follows:

(i) If a qualified applicant owns a vessel that has a valid permit for South Atlantic rock shrimp, the RA will issue an initial limited access endorsement for South Atlantic rock shrimp and mail it to the vessel owner prior to July 15, 2003.

(ii) If a qualified applicant does not currently own a vessel, the RA will inform him/her of qualification, but no endorsement will be issued. Such qualified applicant must apply for a permit and endorsement for a vessel that he/she owns, or transfer the rights to the endorsement to an owner of a vessel, prior to July 15, 2005. After that date, the rights to an initial limited access endorsement for South Atlantic rock shrimp that were based on the qualification will expire. A qualified applicant who desires to transfer the rights to an initial endorsement to the owner

of a vessel must submit an application requesting such transfer to the RA. Such transfer of rights will include transfer of credit for the vessel's entire record of landings of rock shrimp from the South Atlantic during the time of the qualified applicant's ownership.

(4) *Reconsideration.* (i) If the eligibility requirements specified in paragraph (b) of this section are not met, the RA will notify the applicant, in writing, not later than July 16, 2003. The notification will include the reason for the determination that the eligibility requirements were not met. An applicant may request reconsideration of the RA's determination regarding initial endorsement eligibility by submitting a written request for reconsideration to the RA. Such request must be postmarked or hand-delivered not later than September 15, 2003 and must provide additional written documentation supporting eligibility for the endorsement.

(ii) Upon receipt of a request for reconsideration, the RA will forward the initial application, the RA's response to that application, the request for reconsideration, and pertinent records to an Application Oversight Board consisting of state directors (or their designees) from each state in the Council's area of jurisdiction. Upon request, a vessel owner may make a personal appearance before the Application Oversight Board.

(iii) If reconsideration by the Application Oversight Board is requested, such request constitutes the applicant's written authorization under section 402(b)(1)(F) of the Magnuson-Stevens Act for the RA to make available to the members of the Application Oversight Board such confidential catch and other records as are pertinent to the matter under reconsideration.

(iv) The Application Oversight Board may only deliberate whether the eligibility criteria specified in paragraph (b) of this section were applied correctly in the applicant's case, based solely on the available record, including documentation submitted by the applicant. The Application Oversight Board may not consider whether an applicant should have been eligible for a vessel permit because of hardship or

other factors. The Application Oversight Board members will provide individual recommendations for each application for reconsideration to the RA.

(v) The RA will make a final decision based on the eligibility criteria specified in paragraph (b) of this section and the available record, including documentation submitted by the applicant, and the recommendations and comments from members of the Application Oversight Board. The RA may not consider whether an applicant should have been eligible for a vessel permit because of hardship or other factors. The RA will notify the applicant of the decision and the reason for it, in writing, within 15 days of receiving the recommendations from the Application Oversight Board members. The RA's decision will constitute the final administrative action by NMFS.

(e) *Transfer of an endorsement.* A limited access endorsement for South Atlantic rock shrimp is valid only for the vessel and owner named on the permit/endorsement. To change either the vessel or the owner, an application for transfer must be submitted to the RA. An owner of a vessel with an endorsement may request that the RA transfer the endorsement to another vessel owned by the same entity, to the same vessel owned by another entity, or to another vessel with another owner. A transfer of an endorsement under this paragraph will include the transfer of the vessel's entire catch history of South Atlantic rock shrimp to a new owner; no partial transfers are allowed.

(f) *Renewal.* The RA will not reissue a limited access endorsement for South Atlantic rock shrimp if the endorsement is revoked or if the RA does not receive a complete application for renewal of the endorsement within 1 year after the endorsement's expiration date.

(g) *Non-renewal of inactive endorsements.* In addition to the sanctions and denials specified in § 622.4(j)(1), a limited access endorsement for South Atlantic rock shrimp that is inactive for a period of 4 consecutive calendar years will not be renewed. For the purpose of this paragraph, "inactive" means that the vessel with the endorsement has not landed at least 15,000 lb (6,804 kg) of

rock shrimp from the South Atlantic EEZ in a calendar year.

(h) *Reissuance of non-renewed permits.* A permit that is not renewed under paragraph (g) of this section will be made available to a vessel owner randomly selected from a list of owners who had documented landings of rock shrimp from the South Atlantic EEZ prior to 1996 but who did not qualify for an initial limited access endorsement. To be placed on the list, an owner must submit a written request to the RA postmarked or hand-delivered not later than January 16, 2004. The written request must contain documentation of each specific landing claimed, i.e., date, quantity of rock shrimp, name and official number of the harvesting vessel, ownership of the vessel at the time of landing, and name and address of the purchasing dealer. Claimed landings that are not verified by comparison with state trip ticket or dealer records will not be recognized.

[68 FR 2194, Jan. 16, 2003]

Subpart C—Management Measures

§ 622.30 Fishing years.

The fishing year for species or species groups governed in this part is January 1 through December 31 except for the following:

(a) *Allowable octocoral*— October 1 through September 30.

(b) *King and Spanish mackerel.* The fishing year for the king and Spanish mackerel bag limits specified in § 622.39(c)(1) is January 1 through December 31. The following fishing years apply only for the king and Spanish mackerel quotas specified in § 622.42(c):

(1) *Gulf migratory group king mackerel*— July 1 through June 30.

(2) *Gulf migratory group Spanish mackerel*—April through March.

(3) *South Atlantic migratory group king and Spanish mackerel*—March through February.

(c) *Wreckfish*— April 16 through April 15.

(d) *South Atlantic greater amberjack*— May 1 through April 30.

[61 FR 34934, July 3, 1996, as amended at 64 FR 3627, Jan. 25, 1999; 70 FR 39190, July 7, 2005]

§ 622.31 Prohibited gear and methods.

In addition to the prohibited gear/methods specified in this section, see §§ 622.33, 622.34, and 622.35 for seasonal/area prohibited gear/methods and § 622.41 for species specific authorized and unauthorized gear/methods.

(a) *Explosives.* An explosive (except an explosive in a powerhead) may not be used to fish in the Caribbean, Gulf, or South Atlantic EEZ. A vessel fishing in the EEZ for a species governed in this part, or a vessel for which a permit has been issued under § 622.4, may not have on board any dynamite or similar explosive substance.

(b) *Chemicals and plants.* A toxic chemical may not be used or possessed in a coral area, and a chemical, plant, or plant-derived toxin may not be used to harvest a Caribbean coral reef resource in the Caribbean EEZ.

(c) *Fish traps.* (1) A fish trap may not be used in the South Atlantic EEZ.

(2) A fish trap may not be used or possessed in the Gulf EEZ west of 85°30' W. long. and, after February 7, 2007, may not be used or possessed in the Gulf EEZ.

(3) A fish trap used other than where authorized in paragraph (c) (1) or (2) of this section may be disposed of in any appropriate manner by the Assistant Administrator or an authorized officer.

(d) *Longlines for wreckfish.* A bottom longline may not be used to fish for wreckfish in the South Atlantic EEZ. A person aboard a vessel that has a longline on board may not retain a wreckfish in or from the South Atlantic EEZ. For the purposes of this paragraph, a vessel is considered to have a longline on board when a power-operated longline hauler, a cable of diameter suitable for use in the longline fishery longer than 1.5 mi (2.4 km) on any reel, and gangions are on board. Removal of any one of these three elements constitutes removal of a longline.

(e) *Poisons.* (1) A poison, drug, or other chemical may not be used to fish for Caribbean reef fish in the Caribbean EEZ.

(2) A poison may not be used to take Gulf reef fish in the Gulf EEZ.

(3) A poison may not be used to fish for South Atlantic snapper-grouper in the South Atlantic EEZ.

§ 622.32

(f) *Power-assisted tools.* A power-assisted tool may not be used in the Caribbean EEZ to take a Caribbean coral reef resource or in the Gulf or South Atlantic EEZ to take allowable octocoral, prohibited coral, or live rock.

(g) *Powerheads.* A powerhead may not be used in the Caribbean EEZ to harvest Caribbean reef fish or in the EEZ off South Carolina to harvest South Atlantic snapper-grouper. The possession of a mutilated Caribbean reef fish in or from the Caribbean EEZ, or a mutilated South Atlantic snapper-grouper in or from the EEZ off South Carolina, and a powerhead is *prima facie* evidence that such fish was harvested by a powerhead.

(h) *Rebreathers and spearfishing gear.* In the South Atlantic EEZ, a person using a rebreather may not harvest South Atlantic snapper-grouper with spearfishing gear. The possession of such snapper-grouper while in the water with a rebreather is *prima facie* evidence that such fish was harvested with spearfishing gear while using a rebreather.

(i) *Sea bass pots.* A sea bass pot may not be used in the South Atlantic EEZ south of 28°35.1' N. lat. (due east of the NASA Vehicle Assembly Building, Cape Canaveral, FL). A sea bass pot deployed in the EEZ south of 28°35.1' N. lat. may be disposed of in any appropriate manner by the Assistant Administrator or an authorized officer.

(j) *Spears and hooks.* A spear, hook, or similar device may not be used in the Caribbean EEZ to harvest a Caribbean spiny lobster. The possession of a speared, pierced, or punctured Caribbean spiny lobster in or from the Caribbean EEZ is *prima facie* evidence of violation of this section.

(k) *Traps for royal red shrimp in the Gulf EEZ and transfer at sea.* A trap may not be used to fish for royal red shrimp in the Gulf EEZ. Possession of a trap and royal red shrimp on board a vessel is prohibited. A trap used to fish for royal red shrimp in the Gulf EEZ may be disposed of in any appropriate manner by the Assistant Administrator or an authorized officer. In addition, royal red shrimp cannot be transferred in the Gulf EEZ, and royal red shrimp taken in the Gulf EEZ cannot

50 CFR Ch. VI (10–1–05 Edition)

be transferred at sea regardless of where the transfer takes place.

[61 FR 34934, July 3, 1996, as amended at 62 FR 13987, Mar. 25, 1997; 63 FR 10567, Mar. 4, 1998; 63 FR 57590, Oct. 28, 1998; 67 FR 51079, Aug. 7, 2002]

§ 622.32 Prohibited and limited-harvest species.

(a) *General.* The harvest and possession restrictions of this section apply without regard to whether the species is harvested by a vessel operating under a commercial vessel permit. The operator of a vessel that fishes in the EEZ is responsible for the limit applicable to that vessel.

(b) *Prohibited species.* Prohibited species, by geographical area, are as follows:

(1) *Caribbean.* (i) Caribbean prohibited coral may not be fished for or possessed in or from the Caribbean EEZ. The taking of Caribbean prohibited coral in the Caribbean EEZ is not considered unlawful possession provided it is returned immediately to the sea in the general area of fishing.

(ii) Four-eye, banded, and longsnout butterflyfish; jewfish; Nassau grouper; and seahorses may not be harvested or possessed in or from the Caribbean EEZ. Such fish caught in the Caribbean EEZ must be released immediately with a minimum of harm.

(iii) Egg-bearing spiny lobster in the Caribbean EEZ must be returned to the water unharmed. An egg-bearing spiny lobster may be retained in a trap, provided the trap is returned immediately to the water. An egg-bearing spiny lobster may not be stripped, scraped, shaved, clipped, or in any other manner molested, in order to remove the eggs.

(2) *Gulf.* (i) Gulf and South Atlantic prohibited coral taken as incidental catch in the Gulf EEZ must be returned immediately to the sea in the general area of fishing. In fisheries where the entire catch is landed unsorted, such as the scallop and groundfish fisheries, unsorted prohibited coral may be landed ashore; however, no person may sell or purchase such prohibited coral.

(ii) Jewfish may not be harvested or possessed in or from the Gulf EEZ.

(iii) Red drum and Nassau grouper may not be harvested or possessed in or

Fishery Conservation and Management

§ 622.33

from the Gulf EEZ. Such fish caught in the Gulf EEZ must be released immediately with a minimum of harm.

(3) *Mid-Atlantic*. Red drum may not be harvested or possessed in or from the Mid-Atlantic EEZ south of a line extending in a direction of 115° from true north commencing at a point at 40°29.6' N. lat., 73°54.1' W. long., such point being the intersection of the New Jersey/New York boundary with the 3-nm line denoting the seaward limit of state waters. Red drum caught in such portion of the Mid-Atlantic EEZ must be released immediately with a minimum of harm.

(4) *South Atlantic*. (i) Gulf and South Atlantic prohibited coral taken as incidental catch in the South Atlantic EEZ must be returned immediately to the sea in the general area of fishing. In fisheries where the entire catch is landed unsorted, such as the scallop and groundfish fisheries, unsorted prohibited coral may be landed ashore; however, no person may sell or purchase such prohibited coral.

(ii) Jewfish and Nassau grouper may not be harvested or possessed in or from the South Atlantic EEZ. Jewfish and Nassau grouper taken in the South Atlantic EEZ incidentally by hook-and-line must be released immediately by cutting the line without removing the fish from the water.

(iii) Red drum may not be harvested or possessed in or from the South Atlantic EEZ. Red drum caught in the South Atlantic EEZ must be released immediately with a minimum of harm.

(iv) Wild live rock may not be harvested or possessed in the South Atlantic EEZ.

(v) It is intended that no female golden crabs in or from the South Atlantic EEZ be retained on board a vessel and that any female golden crab in or from the South Atlantic EEZ be released in a manner that will ensure maximum probability of survival. However, to accommodate legitimate incidental catch and retention, the number of female golden crabs in or from the South Atlantic EEZ retained on board a vessel may not exceed 0.5 percent, by number, of all golden crabs on board. See §622.45(f)(1) regarding the prohibition of sale of female golden crabs.

(vi) South Atlantic snapper-grouper may not be possessed in whole, gutted, or filleted form by a person aboard a vessel fishing for or possessing golden crab in or from the South Atlantic EEZ or possessing a golden crab trap in the South Atlantic. Only the head, fins, and backbone (collectively the 'rack') of South Atlantic snapper-grouper may be possessed for use as bait.

(c) *Limited-harvest species*. A person who fishes in the EEZ may not combine a harvest limitation specified in this paragraph (c) with a harvest limitation applicable to state waters. A species subject to a harvest limitation specified in this paragraph (c) taken in the EEZ may not be transferred at sea, regardless of where such transfer takes place, and such species may not be transferred in the EEZ.

(1) *Cobia*. No person may possess more than two cobia per day in or from the Gulf, Mid-Atlantic, or South Atlantic EEZ, regardless of the number of trips or duration of a trip.

(2) *Cubera snapper*. No person may harvest more than two cubera snapper measuring 30 inches (76.2 cm), TL, or larger, per day in the South Atlantic EEZ off Florida and no more than two such cubera snapper in or from the South Atlantic EEZ off Florida may be possessed on board a vessel at any time.

(3) *Speckled hind and warsaw grouper*. The possession of speckled hind and warsaw grouper in or from the South Atlantic EEZ is limited to one of each per vessel per trip.

[61 FR 34934, July 3, 1996, as amended at 61 FR 43959, Aug. 27, 1996; 62 FR 13988, Mar. 25, 1997; 63 FR 10567, Mar. 4, 1998]

§ 622.33 Caribbean EEZ seasonal and/or area closures.

(a) *Seasonal closures*. (1) *Mutton snapper spawning aggregation area*. From March 1 through June 30, each year, fishing is prohibited in that part of the following area that is in the EEZ. The area is bounded by rhumb lines connecting, in order, the points listed.

Point	North lat.	West long.
A	17°37.8'	64°53.0'
B	17°39.0'	64°53.0'
C	17°39.0'	64°50.5'
D	17°38.1'	64°50.5'
E	17°37.8'	64°52.5'

§ 622.34

Point	North lat.	West long.
A	17°37.8'	64°53.0'

(2) *Red hind spawning aggregation areas.* From December 1 through February 28, each year, fishing is prohibited in those parts of the following areas that are in the EEZ. Each area is bounded by rhumb lines connecting, in order, the points listed.

(i) East of St. Croix.

Point	North lat.	West long.
A	17°50.2'	64°27.9'
B	17°50.1'	64°26.1'
C	17°49.2'	64°25.8'
D	17°48.6'	64°25.8'

F	17°47.5'	64°26.9'
A	17°50.2'	64°27.9'

(ii) *West of Puerto Rico—(A) Bajo de Cico.*

Point	North lat.	West long.
A	18°15.7'	67°26.4'
B	18°15.7'	67°23.2'
C	18°12.7'	67°23.4'
D	18°12.7'	67°26.4'
A	18°15.7'	67°26.47

(B) *Tourmaline Bank.*

Point	North lat.	West long.
A	18°11.2'	67°22.4'
B	18°11.2'	67°19.2'
C	18°08.2'	67°19.2'
D	18°08.2'	67°22.4'
A	18°11.2'	67°22.4'

(C) *Abrir La Sierra Bank.*

Point	North lat.	West long.
A	18°06.5'	67°26.9'
B	18°06.5'	67°23.9'
C	18°03.5'	67°23.9'
D	18°03.5'	67°26.9'
A	18°06.5'	67°26.9'

(3) *Queen conch closure.* From July 1 through September 30, each year, no person may fish for queen conch in the Caribbean EEZ and no person may possess on board a fishing vessel a queen conch in or from the Caribbean EEZ.

(b) *Year-round area closures.* (1) *Hind Bank Marine Conservation District (MCD).* The following activities are prohibited within the Hind Bank MCD: Fishing for any species, and anchoring by fishing vessels. The Hind Bank MCD is bounded by rhumb lines connecting, in order, the points listed.

50 CFR Ch. VI (10–1–05 Edition)

Point	North lat.	West long.
A	18°13.2'	65°06.0'
B	18°13.2'	64°59.0'
C	18°11.8'	64°59.0'
D	18°10.7'	65°06.0'
A	18°13.2'	65°06.0'

(2) [Reserved]

[64 FR 60133, Nov. 4, 1999]

§ 622.34 Gulf EEZ seasonal and/or area closures.

(a) *Alabama SMZ.* The Alabama SMZ consists of artificial reefs and surrounding areas. In the Alabama SMZ, fishing by a vessel that is operating as a charter vessel or headboat, a vessel that does not have a commercial permit for Gulf reef fish, as required under § 622.4(a)(2), or a vessel with such a permit fishing for Gulf reef fish is limited to hook-and-line gear with three or fewer hooks per line and spearfishing gear. A person aboard a vessel that uses on any trip gear other than hook-and-line gear with three or fewer hooks per line and spearfishing gear in the Alabama SMZ is limited on that trip to the bag limits for Gulf reef fish specified in § 622.39(b) and, for Gulf reef fish for which no bag limit is specified in § 622.39(b), the vessel is limited to 5 percent, by weight, of all fish on board or landed. The Alabama SMZ is bounded by rhumb lines connecting, in order, the following points:

Point	North lat.	West long.
A	30°02.5'	88°07.7'
B	30°02.6'	87°59.3'
C	29°55.0'	87°55.5'
D	29°54.5'	88°07.5'
A	30°02.5'	88°07.7'

(b) *Florida middle grounds HAPC.* Fishing with a bottom longline, bottom trawl, dredge, pot, or trap is prohibited year round in the area bounded by rhumb lines connecting, in order, the following points:

Point	North lat.	West long.
A	28°42.5'	84°24.8'
B	28°42.5'	84°16.3'
C	28°11.0'	84°00.0'
D	28°11.0'	84°07.0'
E	28°26.6'	84°24.8'
A	28°42.5'	84°24.8'

(c) *Reef fish longline and buoy gear restricted area.* A person aboard a vessel

Fishery Conservation and Management

§ 622.34

that uses, on any trip, longline or buoy gear in the longline and buoy gear restricted area is limited on that trip to the bag limits for Gulf reef fish specified in § 622.39(b)(1) and, for Gulf reef fish for which no bag limit is specified in § 622.39(b)(1), the vessel is limited to 5 percent, by weight, of all fish on board or landed. The longline and buoy gear restricted area is that part of the Gulf EEZ shoreward of rhumb lines connecting, in order, the points listed in Table 1, in Appendix B of this part.

(d) *Tortugas marine reserves.* The following activities are prohibited within the Tortugas marine reserves: Fishing for any species and anchoring by fishing vessels.

(1) *EEZ portion of Tortugas North.* The area is bounded by rhumb lines connecting the following points: From point A at 24°40'00" N. lat., 83°06'00" W. long. to point B at 24°46'00" N. lat., 83°06'00" W. long. to point C at 24°46'00" N. lat., 83°00'00" W. long.; thence along the line denoting the seaward limit of Florida's waters, as shown on the current edition of NOAA chart 11438, to point A at 24°40'00" N. lat., 83°06'00" W. long.

(2) *Tortugas South.* The area is bounded by rhumb lines connecting, in order, the following points:

Point	North lat.	West long.
A	24°33'00"	83°09'00"
B	24°33'00"	83°05'00"
C	24°18'00"	83°05'00"
D	24°18'00"	83°09'00"
A	24°33'00"	83°09'00"

(e) *Shrimp/stone crab separation zones.* Five zones are established in the Gulf EEZ and Florida's waters off Citrus and Hernando Counties for the separation of shrimp trawling and stone crab trapping. Although Zone II is entirely within Florida's waters, it is included in this paragraph (e) for the convenience of fishermen. Restrictions that apply to Zone II and those parts of the other zones that are in Florida's waters are contained in Rule 46-38.001, Florida Administrative Code. Geographical coordinates of the points referred to in this paragraph (e) are as follows:

Point	North lat.	West long.
A	28°59'30"	82°45'36"
B	28°59'30"	83°00'10"
C	28°26'01"	82°59'47"

Point	North lat.	West long.
D	28°26'01"	82°56'54"
E	28°41'39"	82°55'25"
F	28°41'39"	82°56'09"
G	28°48'56"	82°56'19"
H	28°53'51"	82°51'19"
I ¹	28°54'43"	82°44'52"
J ²	28°51'09"	82°44'00"
K	28°50'59"	82°54'16"
L	28°41'39"	82°53'56"
M ³	28°41'39"	82°38'46"
N	28°41'39"	82°53'12"
O	28°30'51"	82°55'11"
P	28°40'00"	82°53'08"
Q	28°40'00"	82°47'58"
R	28°35'14"	82°47'47"
S	28°30'51"	82°52'55"
T	28°27'46"	82°55'09"
U	28°30'51"	82°52'09"

¹ Crystal River Entrance Light 1A.

² Long Pt. (southwest tip).

³ Shoreline.

(1) *Zone I* is enclosed by rhumb lines connecting, in order, points A, B, C, D, T, E, F, G, H, I, and J, plus the shoreline between points A and J. It is unlawful to trawl in that part of Zone I that is in the EEZ from October 5 through May 20, each year.

(2) *Zone II* is enclosed by rhumb lines connecting, in order, points J, I, H, K, L, and M, plus the shoreline between points J and M.

(3) *Zone III* is enclosed by rhumb lines connecting, in order, points P, Q, R, U, S, and P. It is unlawful to trawl in that part of Zone III that is in the EEZ from October 5 through May 20, each year.

(4) *Zone IV* is enclosed by rhumb lines connecting, in order, points E, N, S, O, and E.

(i) It is unlawful to place a stone crab trap in that part of Zone IV that is in the EEZ from October 5 through December 1 and from April 2 through May 20, each year.

(ii) It is unlawful to trawl in that part of Zone IV that is in the EEZ from December 2 through April 1, each year.

(5) *Zone V* is enclosed by rhumb lines connecting, in order, points F, G, K, L, and F.

(i) It is unlawful to place a stone crab trap in that part of Zone V that is in the EEZ from October 5 through November 30 and from March 16 through May 20, each year.

(ii) It is unlawful to trawl in that part of Zone V that is in the EEZ from December 1 through March 15, each year.

§ 622.34

50 CFR Ch. VI (10–1–05 Edition)

(f) *Southwest Florida seasonal trawl closure.* From January 1 to 1 hour after official sunset on May 20, each year, trawling, including trawling for live bait, is prohibited in that part of the Gulf EEZ shoreward of rhumb lines connecting, in order, the following points:

Point	North lat.	West long.
B ¹	26°16.0'	81°58.5'
C	26°00.0'	82°04.0'
D	25°09.0'	81°47.6'
E	24°54.5'	81°50.5'
M ¹	24°49.3'	81°46.4'

¹ On the seaward limit of Florida's waters.

(g) *Reef fish stressed area.* The stressed area is that part of the Gulf EEZ shoreward of rhumb lines connecting, in order, the points listed in Table 2, in Appendix B of this part.

(1) A powerhead may not be used in the stressed area to take Gulf reef fish. Possession of a powerhead and a mutilated Gulf reef fish in the stressed area or after having fished in the stressed area constitutes *prima facie* evidence that such reef fish was taken with a powerhead in the stressed area. The provisions of this paragraph do not apply to the following species: dwarf sand perch, hogfish, and sand perch.

(2) A roller trawl may not be used in the stressed area. Roller trawl means a trawl net equipped with a series of large, solid rollers separated by several smaller spacer rollers on a separate cable or line (sweep) connected to the footrope, which makes it possible to fish the gear over rough bottom, that is, in areas unsuitable for fishing conventional shrimp trawls. Rigid framed trawls adapted for shrimping over uneven bottom, in wide use along the west coast of Florida, and shrimp trawls with hollow plastic rollers for fishing on soft bottoms, are not considered roller trawls.

(3) A fish trap may not be used in the stressed area. A fish trap used in the stressed area will be considered unclaimed or abandoned property and may be disposed of in any appropriate manner by the Assistant Administrator (including an authorized officer).

(h) *Texas closure.* (1) From 30 minutes after official sunset on May 15 to 30 minutes after official sunset on July

15, trawling, except trawling for royal red shrimp beyond the 100-fathom (183-m) depth contour, is prohibited in the Gulf EEZ off Texas.

(2) In accordance with the procedures and restrictions of the Fishery Management Plan for the Shrimp Fishery of the Gulf of Mexico, the RA may adjust the closing and/or opening date of the Texas closure to provide an earlier, later, shorter, or longer closure, but the duration of the closure may not exceed 90 days or be less than 45 days. Notification of the adjustment of the closing or opening date will be published in the FEDERAL REGISTER.

(i) *Tortugas shrimp sanctuary.* (1) The Tortugas shrimp sanctuary is closed to trawling. The Tortugas shrimp sanctuary is that part of the EEZ off Florida shoreward of rhumb lines connecting, in order, the following points:

Point	North lat.	West long.
N ¹	25°52.9'	81°37.9'
F	24°50.7'	81°51.3'
G ²	24°40.1'	82°26.7'
H ³	24°34.7'	82°35.2'
P ⁴	24°35.0'	82°08.0'

¹ Coon Key Light.

² New Ground Rocks Light.

³ Rebecca Shoal Light.

⁴ Marquesas Keys.

(2) The provisions of paragraph (i)(1) of this section notwithstanding—

(i) Effective from April 11 through September 30, each year, that part of the Tortugas shrimp sanctuary seaward of rhumb lines connecting the following points is open to trawling: From point T at 24°47.8' N. lat., 82°01.0' W. long. to point U at 24°43.83' N. lat., 82°01.0' W. long. (on the line denoting the seaward limit of Florida's waters); thence along the seaward limit of Florida's waters, as shown on the current edition of NOAA chart 11439, to point V at 24°42.55' N. lat., 82°15.0' W. long.; thence north to point W at 24°43.6' N. lat., 82°15.0' W. long.

(ii) Effective from April 11 through July 31, each year, that part of the Tortugas shrimp sanctuary seaward of rhumb lines connecting the following points is open to trawling: From point W to point V, both points as specified in paragraph (i)(2)(i) of this section, to point G, as specified in paragraph (i)(1) of this section.

Fishery Conservation and Management

§ 622.34

(iii) Effective from May 26 through July 31, each year, that part of the Tortugas shrimp sanctuary seaward of rhumb lines connecting the following points is open to trawling: From point F, as specified in paragraph (i)(1) of this section, to point Q at 24°46.7' N. lat., 81°52.2' W. long. (on the line denoting the seaward limit of Florida's waters); thence along the seaward limit of Florida's waters, as shown on the current edition of NOAA chart 11439, to point U and north to point T, both points as specified in paragraph (i)(2)(i) of this section.

(j) *West and East Flower Garden Banks HAPC.* Fishing with a bottom longline, bottom trawl, dredge, pot, or trap is prohibited year-round in the HAPC. The West and East Flower Garden Banks are geographically centered at 27°52'14.21" N. lat., 93°48'54.79" W. long. and 27°55'07.44" N. lat., 93°36'08.49" W. long., respectively. The HAPC extends from these centers to the 50-fathom (300-ft) (91.4-m) isobath.

(k) *Closure provisions applicable to the Madison and Swanson sites and Steamboat Lumps.* (1)(i) The Madison and Swanson sites are bounded by rhumb lines connecting, in order, the following points:

Point	North lat.	West long.
A	29°17'	85°50'
B	29°17'	85°38'
C	29°06'	85°38'
D	29°06'	85°50'
A	29°17'	85°50'

(ii) Steamboat Lumps is bounded by rhumb lines connecting, in order, the following points:

Point	North lat.	West long.
A	28°14'	84°48'
B	28°14'	84°37'
C	28°03'	84°37'
D	28°03'	84°48'
A	28°14'	84°48'

(iii) The provisions of paragraphs (k)(2) through (6) of this section apply within the Madison and Swanson sites and Steamboat Lumps through June 16, 2010.

(2) Possession of Gulf reef fish is prohibited, except for such possession aboard a vessel in transit with fishing gear stowed as specified in paragraph (k)(4) of this section.

(3) During November through April, all fishing is prohibited, and possession of any fish species is prohibited, except for such possession aboard a vessel in transit with fishing gear stowed as specified in paragraph (k)(4) of this section. The provisions of this paragraph, (k)(3), do not apply to highly migratory species.

(4) For the purpose of paragraph (k) of this section, transit means non-stop progression through the area; fishing gear appropriately stowed means -

(i) A longline may be left on the drum if all gangions and hooks are disconnected and stowed below deck. Hooks cannot be baited. All buoys must be disconnected from the gear; however, buoys may remain on deck.

(ii) A trawl net may remain on deck, but trawl doors must be disconnected from the trawl gear and must be secured.

(iii) A gillnet must be left on the drum. Any additional gillnets not attached to the drum must be stowed below deck.

(iv) A rod and reel must be removed from the rod holder and stowed securely on or below deck. Terminal gear (i.e., hook, leader, sinker, flasher, or bait) must be disconnected and stowed separately from the rod and reel. Sinkers must be disconnected from the down rigger and stowed separately.

(5) During May through October, surface trolling is the only allowable fishing activity. For the purpose of this paragraph (k)(5), surface trolling is defined as fishing with lines trailing behind a vessel which is in constant motion at speeds in excess of four knots with a visible wake. Such trolling may not involve the use of down riggers, wire lines, planers, or similar devices.

(6) For the purpose of paragraph (k) of this section, fish means finfish, mollusks, crustaceans, and all other forms of marine animal and plant life other than marine mammals and birds. Highly migratory species means tuna species, marlin (*Tetrapturus* spp. and *Makaira* spp.), oceanic sharks, sailfishes (*Istiophorus* spp.), and swordfish (*Xiphias gladius*).

(1) *Closures of the commercial fishery for red snapper.* The commercial fishery for red snapper in or from the Gulf EEZ is closed from January 1 to noon on

February 1 and thereafter from noon on the 10th of each month to noon on the first of each succeeding month until the quota specified in § 622.42(a)(1)(i)(A) is reached or until noon on October 1, whichever occurs first. From October 1 to December 1, the commercial fishery for red snapper in or from the Gulf EEZ is closed from noon on the 10th of each month to noon on the first of each succeeding month until the quota specified in § 622.42(a)(1)(i)(B) is reached or until the end of the fishing year, whichever occurs first. All times are local times. During these closed periods, the possession of red snapper in or from the Gulf EEZ and in the Gulf on board a vessel for which a commercial permit for Gulf reef fish has been issued, as required under § 622.4(a)(2)(v), without regard to where such red snapper were harvested, is limited to the bag and possession limits, as specified in § 622.39(b)(1)(iii) and (b)(2), respectively, and such red snapper are subject to the prohibition on sale or purchase of red snapper possessed under the bag limit, as specified in § 622.45(c)(1). However, when the recreational quota for red snapper has been reached and the bag and possession limit has been reduced to zero, the limit for such possession during a closed period is zero.

(m) *Closures of the recreational fishery for red snapper.* The recreational fishery for red snapper in or from the Gulf EEZ is closed from January 1 through April 20 and from November 1 through December 31. During a closure, the bag and possession limit for red snapper in or from the Gulf EEZ is zero.

(n) *Seasonal closure of the commercial fishery for vermilion snapper.* The commercial fishery for vermilion snapper in or from the Gulf EEZ is closed from April 22 through May 31, each year. During the closure, no person aboard a vessel for which a valid Federal commercial permit for Gulf reef fish has been issued may fish for or possess vermilion snapper in the Gulf, regardless of where harvested. However, a person aboard a vessel for which the permit indicates both charter vessel/headboat for Gulf reef fish and commercial Gulf reef fish may continue to retain vermilion snapper under the bag and possession limits specified in

§ 622.39(b)(1)(v) and (b)(2), respectively, provided the vessel is operating as a charter vessel or headboat. During the closure, the sale or purchase of vermilion snapper is prohibited as specified in § 622.45(c)(5).

(o) *Seasonal closure of the commercial fishery for gag, red grouper, and black grouper.* From February 15 to March 15, each year, no person aboard a vessel for which a valid Federal commercial permit for Gulf reef fish has been issued may possess gag, red grouper, or black grouper in the Gulf, regardless of where harvested. However, a person aboard a vessel for which the permit indicates both charter vessel/headboat for Gulf reef fish and commercial Gulf reef fish may continue to retain gag, red grouper, and black grouper under the bag and possession limit specified in § 622.39(b), provided the vessel is operating as a charter vessel or headboat. From February 15 until March 15, each year, the sale or purchase of gag, red grouper, or black grouper is prohibited as specified in § 622.45(c)(4).

(p) *Closures of the Gulf group king mackerel gillnet fishery.* The gillnet fishery for Gulf group king mackerel in or from the Gulf EEZ is closed each fishing year from July 1 until 6:00 a.m. on the day after the Martin Luther King Jr. Federal holiday. The gillnet fishery also is closed during all subsequent weekends and observed Federal holidays, except for the first weekend following the Martin Luther King Jr. holiday which will remain open to the gillnet fishery provided a notification of closure of that fishery has not been filed under § 622.43(a). Weekend closures are effective from 6:00 a.m. Saturday to 6:00 a.m. Monday. Holiday closures are effective from 6:00 a.m. on the observed Federal holiday to 6:00 a.m. the following day. All times are eastern standard time. During these closures, a person aboard a vessel using or possessing a gillnet with a stretched-mesh size of 4.75 inches (12.1 cm) or larger in the southern Florida west coast subzone may not fish for or possess Gulf group king mackerel.

(q) *Seasonal closure of the recreational fishery for groupers.* The recreational fishery for any grouper species in or from the Gulf EEZ is closed from November through December 2005. During

Fishery Conservation and Management

§ 622.35

this closure, the bag and possession limit for groupers in or from the Gulf EEZ is zero.

[61 FR 34934, July 3, 1996, as amended at 61 FR 48642, Sept. 16, 1996; 62 FR 46679, Sept. 4, 1997; 62 FR 47767, Sept. 11, 1997; 62 FR 67722, Dec. 30, 1997; 64 FR 47713, Sept. 1, 1999; 64 FR 57404, Oct. 25, 1999; 64 FR 59126, Nov. 2, 1999; 65 FR 30363, May 11, 2000; 65 FR 31830, May 19, 2000; 65 FR 50162, Aug. 17, 2000; 67 FR 47468, July 19, 2002; 69 FR 24535, May 4, 2004; 70 FR 33389, June 8, 2005]

EFFECTIVE DATE NOTE: At 70 FR 42511, July 25, 2005, § 622.34 was amended by adding paragraph (q), effective Aug. 9, 2005, through Jan. 23, 2006.

§ 622.35 Atlantic EEZ seasonal and/or area closures.

(a) *Allowable octocoral closed area.* No person may harvest or possess allowable octocoral in the South Atlantic EEZ north of 28°35.1' N. lat. (due east of the NASA Vehicle Assembly Building, Cape Canaveral, FL).

(b) *Longline closed areas.* A longline may not be used to fish in the EEZ for South Atlantic snapper-grouper south of 27°10' N. lat. (due east of the entrance to St. Lucie Inlet, FL); or north of 27°10' N. lat. where the charted depth is less than 50 fathoms (91.4 m), as shown on the latest edition of the largest scale NOAA chart of the location. A person aboard a vessel with a longline on board that fishes on a trip in the South Atlantic EEZ south of 27°10' N. lat., or north of 27°10' N. lat. where the charted depth is less than 50 fathoms (91.4 m), is limited on that trip to the bag limit for South Atlantic snapper-grouper for which a bag limit is specified in § 622.39(d)(1), and to zero for all other South Atlantic snapper-grouper. For the purpose of this paragraph, a vessel is considered to have a longline on board when a power-operated longline hauler, a cable or monofilament of diameter and length suitable for use in the longline fishery, and gangions are on board. Removal of any one of these three elements constitutes removal of a longline.

(c) *Oculina Bank*—(1) *HAPC.* The Oculina Bank HAPC encompasses an area bounded on the north by 28°30' N. lat., on the south by 27°30' N. lat., on the east by the 100-fathom (183-m) contour, as shown on the latest edition of NOAA chart 11460, and on the west by

80°00' W. long.; and two adjacent areas: the first bounded on the north by 28°30' N. lat., on the south by 28°29' N. lat., on the east by 80°00' W. long., and on the west by 80°03' W. long.; and the second bounded on the north by 28°17' N. lat., on the south by 28°16' N. lat., on the east by 80°00' W. long., and on the west by 80°03' W. long. In the Oculina Bank HAPC, no person may:

(i) Use a bottom longline, bottom trawl, dredge, pot, or trap.

(ii) If aboard a fishing vessel, anchor, use an anchor and chain, or use a grapple and chain.

(iii) Fish for rock shrimp or possess rock shrimp in or from the area on board a fishing vessel.

(2) *Experimental closed area.* Within the Oculina Bank HAPC, the experimental closed area is bounded on the north by 27°53' N. lat., on the south by 27°30' N. lat., on the east by 79°56' W. long., and on the west by 80°00' W. long. No person may fish for South Atlantic snapper-grouper in the experimental closed area, and no person may retain South Atlantic snapper-grouper in or from the area. In the experimental closed area, any South Atlantic snapper-grouper taken incidentally by hook-and-line gear must be released immediately by cutting the line without removing the fish from the water.

(d) *South Atlantic shrimp cold weather closure.* (1) Pursuant to the procedures and criteria established in the FMP for the Shrimp Fishery of the South Atlantic Region, when Florida, Georgia, North Carolina, or South Carolina closes all or a portion of its waters of the South Atlantic to the harvest of brown, pink, and white shrimp, the Assistant Administrator may concurrently close the South Atlantic EEZ adjacent to the closed state waters by filing a notification of closure with the Office of the Federal Register. Closure of the adjacent EEZ will be effective until the ending date of the closure in state waters, but may be ended earlier based on the state's request. In the latter case, the Assistant Administrator will terminate a closure of the EEZ by filing a notification to that effect with the Office of the Federal Register.

(2) During a closure, as specified in paragraph (d)(1) of this section—

(i) No person may trawl for brown shrimp, pink shrimp, or white shrimp in the closed portion of the EEZ (closed area); and no person may possess on board a fishing vessel brown shrimp, pink shrimp, or white shrimp in or from a closed area, except as authorized in paragraph (d)(2)(iii) of this section.

(ii) No person aboard a vessel trawling in that part of a closed area that is within 25 nm of the baseline from which the territorial sea is measured may use or have on board a trawl net with a mesh size less than 4 inches (10.2 cm), as measured between the centers of opposite knots when pulled taut.

(iii) Brown shrimp, pink shrimp, or white shrimp may be possessed on board a fishing vessel in a closed area, provided the vessel is in transit and all trawl nets with a mesh size less than 4 inches (10.2 cm), as measured between the centers of opposite knots when pulled taut, are stowed below deck while transiting the closed area. For the purpose of this paragraph, a vessel is in transit when it is on a direct and continuous course through a closed area.

(e) SMZs. (1) The SMZs consist of artificial reefs and surrounding areas as follows:

(i) *Paradise Reef* is bounded on the north by 33°31.59' N. lat.; on the south by 33°30.51' N. lat.; on the east by 78°57.55' W. long.; and on the west by 78°58.85' W. long.

(ii) *Ten Mile Reef* is bounded on the north by 33°26.65' N. lat.; on the south by 33°24.80' N. lat.; on the east by 78°51.08' W. long.; and on the west by 78°52.97' W. long.

(iii) *Pawleys Island Reef* is bounded on the north by 33°26.58' N. lat.; on the south by 33°25.76' N. lat.; on the east by 79°00.29' W. long.; and on the west by 79°01.24' W. long.

(iv) *Georgetown Reef* is bounded on the north by 33°14.90' N. lat.; on the south by 33°13.85' N. lat.; on the east by 78°59.45' W. long.; and on the west by 79°00.65' W. long.

(v) *Capers Reef* is bounded on the north by 32°45.45' N. lat.; on the south by 32°43.91' N. lat.; on the east by 79°33.81' W. long.; and on the west by 79°35.10' W. long.

(vi) *Kiawah Reef* is bounded on the north by 32°29.78' N. lat.; on the south by 32°28.25' N. lat.; on the east by 79°59.00' W. long.; and on the west by 80°00.95' W. long.

(vii) *Edisto Offshore Reef* is bounded on the north by 32°15.30' N. lat.; on the south by 32°13.90' N. lat.; on the east by 79°50.25' W. long.; and on the west by 79°51.45' W. long.

(viii) *Hunting Island Reef* is bounded on the north by 32°13.72' N. lat.; on the south by 32°12.30' N. lat.; on the east by 80°19.23' W. long.; and on the west by 80°21.00' W. long.

(ix) *Fripp Island Reef* is bounded on the north by 32°15.92' N. lat.; on the south by 32°14.75' N. lat.; on the east by 80°21.62' W. long.; and on the west by 80°22.90' W. long.

(x) *Betsy Ross Reef* is bounded on the north by 32°03.60' N. lat.; on the south by 32°02.88' N. lat.; on the east by 80°24.57' W. long.; and on the west by 80°25.50' W. long.

(xi) *Hilton Head Reef/Artificial Reef—T* is bounded on the north by 32°00.71' N. lat.; on the south by 31°59.42' N. lat.; on the east by 80°35.23' W. long.; and on the west by 80°36.37' W. long.

(xii) *Artificial Reef—A* is bounded on the north by 30°57.4' N. lat.; on the south by 30°55.4' N. lat.; on the east by 81°13.9' W. long.; and on the west by 81°16.3' W. long.

(xiii) *Artificial Reef—C* is bounded on the north by 30°52.0' N. lat.; on the south by 30°50.0' N. lat.; on the east by 81°08.5' W. long.; and on the west by 81°10.9' W. long.

(xiv) *Artificial Reef—G* is bounded on the north by 31°00.0' N. lat.; on the south by 30°58.0' N. lat.; on the east by 80°56.8' W. long.; and on the west by 80°59.2' W. long.

(xv) *Artificial Reef—F* is bounded on the north by 31°06.8' N. lat.; on the south by 31°04.8' N. lat.; on the east by 81°10.5' W. long.; and on the west by 81°13.4' W. long.

(xvi) *Artificial Reef—J* is bounded on the north by 31°36.7' N. lat.; on the south by 31°34.7' N. lat.; on the east by 80°47.3' W. long.; and on the west by 80°50.1' W. long.

(xvii) *Artificial Reef—L* is bounded on the north by 31°46.0' N. lat.; on the south by 31°44.0' N. lat.; on the east by

Fishery Conservation and Management

§ 622.35

80°34.7' W. long.; and on the west by 80°37.1' W. long.

(xviii) *Artificial Reef—KC* is bounded on the north by 31°51.2' N. lat.; on the south by 31°49.2' N. lat.; on the east by 80°45.3' W. long.; and on the west by 80°47.7' W. long.

(xix) *Ft. Pierce Inshore Reef* is bounded on the north by 27°26.8' N. lat.; on the south by 27°25.8' N. lat.; on the east by 80°09.24' W. long.; and on the west by 80°10.36' W. long.

(xx) *Ft. Pierce Offshore Reef* is bounded by rhumb lines connecting, in order, the following points:

Point	North lat.	West long.
A	27°23.68'	80°03.95'
B	27°22.80'	80°03.60'
C	27°23.94'	80°00.02'
D	27°24.85'	80°00.33'
A	27°23.68'	80°03.95'

(xxi) *Key Biscayne/Artificial Reef—H* is bounded on the north by 25°42.82' N. lat.; on the south by 25°41.32' N. lat.; on the east by 80°04.22' W. long.; and on the west by 80°05.53' W. long.

(xxii) *Little River Offshore Reef* is bounded on the north by 33°42.10' N. lat.; on the south by 33°41.10' N. lat.; on the east by 78°26.40' W. long.; and on the west by 78°27.10' W. long.

(xxiii) *BP-25 Reef* is bounded on the north by 33°21.70' N. lat.; on the south by 33°20.70' N. lat.; on the east by 78°24.80' W. long.; and on the west by 78°25.60' W. long.

(xxiv) *Vermilion Reef* is bounded on the north by 32°57.80' N. lat.; on the south by 32°57.30' N. lat.; on the east by 78°39.30' W. long.; and on the west by 78°40.10' W. long.

(xxv) *Cape Romaine Reef* is bounded on the north by 33°00.00' N. lat.; on the south by 32°59.50' N. lat.; on the east by 79°02.01' W. long.; and on the west by 79°02.62' W. long.

(xxvi) *Y-73 Reef* is bounded on the north by 32°33.20' N. lat.; on the south by 32°32.70' N. lat.; on the east by 79°19.10' W. long.; and on the west by 79°19.70' W. long.

(xxvii) *Eagles Nest Reef* is bounded on the north by 32°01.48' N. lat.; on the south by 32°00.98' N. lat.; on the east by 80°30.00' W. long.; and on the west by 80°30.65' W. long.

(xxviii) *Bill Perry Jr. Reef* is bounded on the north by 33°26.20' N. lat.; on the

south by 33°25.20' N. lat.; on the east by 78°32.70' W. long.; and on the west by 78°33.80' W. long.

(xxix) *Comanche Reef* is bounded on the north by 32°27.40' N. lat.; on the south by 32°26.90' N. lat.; on the east by 79°18.80' W. long.; and on the west by 79°19.60' W. long.

(xxx) *Murrel's Inlet 60 Foot Reef* is bounded on the north by 33°17.50' N. lat.; on the south by 33°16.50' N. lat.; on the east by 78°44.67' W. long.; and on the west by 78°45.98' W. long.

(xxxi) *Georgetown 95 Foot Reef* is bounded on the north by 33°11.75' N. lat.; on the south by 33°10.75' N. lat.; on the east by 78°24.10' W. long.; and on the west by 78°25.63' W. long.

(xxxii) *New Georgetown 60 Foot Reef* is bounded on the north by 33°09.25' N. lat.; on the south by 33°07.75' N. lat.; on the east by 78°49.95' W. long.; and on the west by 78°51.45' W. long.

(xxxiii) *North Inlet 45 Foot Reef* is bounded on the north by 33°21.03' N. lat.; on the south by 33°20.03' N. lat.; on the east by 79°00.31' W. long.; and on the west by 79°01.51' W. long.

(xxxiv) *CJ Davidson Reef* is bounded on the north by 33°06.48' N. lat.; on the south by 33°05.48' N. lat.; on the east by 79°00.27' W. long.; and on the west by 79°01.39' W. long.

(xxxv) *Greenville Reef* is bounded on the north by 32°57.25' N. lat.; on the south by 32°56.25' N. lat.; on the east by 78°54.25' W. long.; and on the west by 78°55.25' W. long.

(xxxvi) *Charleston 60 Foot Reef* is bounded on the north by 32°33.60' N. lat.; on the south by 32°32.60' N. lat.; on the east by 79°39.70' W. long.; and on the west by 79°40.90' W. long.

(xxxvii) *Edisto 60 Foot Reef* is bounded on the north by 32°21.75' N. lat.; on the south by 32°20.75' N. lat.; on the east by 80°04.10' W. longitude; and on the west by 80°05.70' W. long.

(xxxviii) *Edisto 40 Foot Reef* is bounded on the north by 32°25.78' N. lat.; on the south by 32°24.78' N. lat.; on the east by 80°11.24' W. long.; and on the west by 80°12.32' W. long.

(xxxix) *Beaufort 45 Foot Reef* is bounded on the north by 32°07.65' N. lat.; on the south by 32°06.65' N. lat.; on the east by 80°28.80' W. long.; and on the west by 80°29.80' W. long.

50 CFR Ch. VI (10-1-05 Edition)

(2) To determine what restrictions apply in the SMZs listed in § 622.35(e)(1), follow this table:

IN SMZs SPECIFIED IN THE FOLLOWING PARAGRAPHS OF § 622.35	THESE RESTRICTIONS APPLY
(e)(1)(i) through (x), (e)(1)(xx), and (e)(1)(xxii) through (xxxix) ..	Use of a powerhead to take South Atlantic snapper-grouper is prohibited. Possession of a powerhead and a mutilated South Atlantic snapper-grouper in, or after having fished in, one of these SMZs constitutes <i>prima facie</i> evidence that such fish was taken with a powerhead in the SMZ.
(e)(1)(i) through (xviii) and (e)(1)(xxii) through (li)	Fishing may only be conducted with handline, rod and reel, and spearfishing gear.
(e)(1)(i) through (li)	Use of a sea bass pot or bottom longline is prohibited.
(e)(1)(xii) through (xviii) and (e)(1)(xl) through (li)	Possession of South Atlantic snapper-grouper taken with a powerhead is limited to the bag limits specified in § 622.39(d)(1).
(e)(1)(xix) and (e)(1)(xx)	A hydraulic or electric reel that is permanently affixed to the vessel is prohibited when fishing for South Atlantic snapper-grouper.
(e)(1)(xix) and (e)(1)(xxi)	Use of spearfishing gear is prohibited.

(g) *Pelagic sargassum area and seasonal restrictions*—(1) *Area limitations.* (i) No person may harvest pelagic sargassum in the South Atlantic EEZ between 36°34'55" N. lat. (directly east from the Virginia/North Carolina boundary) and 34° N. lat., within 100 nautical miles east of the North Carolina coast.

(ii) No person may harvest or possess pelagic sargassum in or from the South Atlantic EEZ south of 34° N. lat.

(2) *Seasonal limitation.* No person may harvest or possess pelagic sargassum in or from the South Atlantic EEZ during the months of July through October. This prohibition on possession does not apply to pelagic sargassum that was harvested and landed ashore prior to the closed period.

(h) *Dolphin/wahoo closed areas.* (1) If pelagic longline gear is on board a vessel, a person aboard such vessel may not fish for or retain a dolphin or wahoo—

(i) In the Northeastern United States closed area from June 1 through June 30 each year. The Northeastern United States closed area is that portion of the EEZ between 40° N. lat. and 39° N. lat. from 68° W. long. to 74° W. long.

(ii) In the Charleston Bump closed area from February 1 through April 30 each year. The Charleston Bump closed area is that portion of the EEZ off North Carolina, South Carolina, and Georgia between 34° N. lat. and 31° N. lat. and west of 76° W. long.

(iii) In the East Florida Coast closed area year round. The East Florida Coast closed area is that portion of the EEZ off Georgia and the east coast of Florida from the inner boundary of the EEZ at 31° N. lat.; thence due east to 78° W. long.; thence by a rhumb line to 28°17' N. lat., 79°12' W. long.; thence proceeding in a southerly direction along the outer boundary of the EEZ to 24° N. lat.; thence due west to 24° N. lat., 81°47' W. long.; thence due north to the innermost boundary of the EEZ at 81°47' W. long.

(2) A vessel is considered to have pelagic longline gear on board when a power-operated longline hauler, a mainline, floats capable of supporting the mainline, and gangions with hooks are on board. Removal of any one of these elements constitutes removal of pelagic longline gear.

(3) If a vessel is in a closed area during a time specified in paragraph (h)(1) of this section with pelagic longline gear on board, it is a rebuttable presumption that fish on board such vessel

were taken with pelagic longline gear in the closed area.

[61 FR 34934, July 3, 1996, as amended at 61 FR 43959, Aug. 27, 1996; 61 FR 47449, Sept. 9, 1996; 63 FR 10567, Mar. 4, 1998; 63 FR 57590, Oct. 28, 1998; 63 FR 71794, Dec. 30, 1998; 65 FR 37295, June 14, 2000; 65 FR 61115, Oct. 16, 2000; 68 FR 57378, Oct. 3, 2003; 69 FR 30241, May 27, 2004]

§ 622.36 Seasonal harvest limitations.

(a) *Gulf EEZ.* During March, April, and May, each year, the possession of greater amberjack in or from the Gulf EEZ and in the Gulf on board a vessel for which a commercial permit for Gulf reef fish has been issued, as required under § 622.4(a)(2)(v), without regard to where such greater amberjack were harvested, is limited to the bag and possession limits, as specified in § 622.39(b)(1)(i) and (b)(2), respectively, and such greater amberjack are subject to the prohibition on sale or purchase of greater amberjack possessed under the bag limit, as specified in § 622.45(c)(1).

(b) *South Atlantic EEZ—(1) Greater amberjack spawning season.* During April, each year, the possession of greater amberjack in or from the South Atlantic EEZ and in the South Atlantic on board a vessel for which a valid Federal commercial or charter vessel/headboat permit for South Atlantic snapper-grouper has been issued, without regard to where such greater amberjack were harvested, is limited to one per person per day or one per person per trip, whichever is more restrictive. Such greater amberjack are subject to the prohibition on sale or purchase, as specified in § 622.45(d)(6).

(2) *Mutton snapper spawning season.* During May and June, each year, the possession of mutton snapper in or from the EEZ on board a vessel that has a commercial permit for South Atlantic snapper-grouper is limited to 10 per person per day or 10 per person per trip, whichever is more restrictive.

(3) *Wreckfish spawning-season closure.* From January 15 through April 15, each year, no person may harvest or possess on a fishing vessel wreckfish in or from the EEZ; offload wreckfish from the EEZ; or sell or purchase wreckfish in or from the EEZ. The prohibition on sale or purchase of wreckfish does not

§ 622.37

50 CFR Ch. VI (10–1–05 Edition)

apply to trade in wreckfish that were harvested, offloaded, and sold or purchased prior to January 15 and were held in cold storage by a dealer or processor.

(4) *Black grouper and gag*. During March and April, each year, the possession of black grouper and gag in or from the South Atlantic EEZ and in the South Atlantic on board a vessel for which a valid Federal commercial or charter vessel/headboat permit for South Atlantic snapper-grouper has been issued, without regard to where such black grouper or gag were harvested, is limited to two black grouper or gag, combined, per person per day or two black grouper or gag, combined, per person per trip, whichever is more restrictive. Such black grouper or gag are subject to the prohibition on sale or purchase, as specified in § 622.45(d)(5).

(5) *Red porgy*. During January, February, March, and April, each year, the harvest or possession of red porgy in or from the South Atlantic EEZ, and in the South Atlantic on board a vessel for which a valid Federal commercial or charter vessel/headboat permit for South Atlantic snapper-grouper has been issued without regard to where such red porgy were harvested, is limited to one per person per day or one per person per trip, whichever is more restrictive. Such red porgy are subject to the prohibition on sale or purchase, as specified in § 622.45(d)(5).

[61 FR 34934, July 3, 1996, as amended at 62 FR 67723, Dec. 30, 1997; 64 FR 3627, Jan. 25, 1999; 65 FR 51252, Aug. 23, 2000]

§ 622.37 Size limits.

All size limits in this section are minimum size limits unless specified otherwise. Except for undersized king and Spanish mackerel allowed in paragraphs (c)(2) and (c)(3) of this section, a fish not in compliance with its size limit, as specified in this section, in or from the Caribbean, Gulf, South Atlantic, and/or Mid-Atlantic EEZ, as appropriate, may not be possessed, sold, or purchased. A fish not in compliance with its size limit must be released immediately with a minimum of harm. The operator of a vessel that fishes in the EEZ is responsible for ensuring that fish on board are in compliance

with the size limits specified in this section.

(a) *Caribbean reef fish*: Yellowtail snapper—12 inches (30.5 cm), TL.

(b) *Caribbean spiny lobster*—3.5 inches (8.9 cm), carapace length.

(c) *Coastal migratory pelagic fish*. (1) Cobia in the Gulf, Mid-Atlantic, or South Atlantic—33 inches (83.8 cm), fork length.

(2) King mackerel in the Gulf, South Atlantic, or Mid-Atlantic—24 inches (61.0 cm), fork length, except that a vessel fishing under a quota for king mackerel specified in § 622.42(c)(1) may possess undersized king mackerel in quantities not exceeding 5 percent, by weight, of the king mackerel on board.

(3) Spanish mackerel in the Gulf, South Atlantic, or Mid-Atlantic—12 inches (30.5 cm), fork length, except that a vessel fishing under a quota for Spanish mackerel specified in § 622.42(c)(2) may possess undersized Spanish mackerel in quantities not exceeding 5 percent, by weight, of the Spanish mackerel on board.

(d) *Gulf reef fish*—(1) *Snapper*. (i) Lane snapper—8 inches (20.3 cm), TL.

(ii) Vermilion snapper—11 inches (27.9 cm), TL.

(iii) Cubera, dog, gray, mahogany, and yellowtail snappers and schoolmaster—12 inches (30.5 cm), TL.

(iv) Red snapper—16 inches (40.6 cm), TL, for a fish taken by a person subject to the bag limit specified in § 622.39(b)(1)(iii) and 15 inches (38.1 cm), TL, for a fish taken by a person not subject to the bag limit.

(v) Mutton snapper—16 inches (40.6 cm), TL.

(2) *Grouper*. (i) Scamp—16 inches (40.6 cm), TL.

(ii) Red grouper and yellowfin grouper—20 inches (50.8 cm), TL.

(iii) Black grouper and gag—(A) For a person not subject to the bag limit specified in § 622.39(b)(1)(ii)—24 inches (61.0 cm), TL.

(B) For a person subject to the bag limit specified in § 622.39(b)(1)(ii)—22 inches (55.9 cm), TL.

(3) *Other Gulf reef fish species*. (i) Gray triggerfish—12 inches (30.5 cm), TL.

(ii) Hogfish—12 inches (30.5 cm), fork length.

(iii) Banded rudderfish and lesser amberjack—14 inches (35.6 cm), fork

length (minimum size); 22 inches (55.9 cm), fork length (maximum size).

(iv) Greater amberjack—28 inches (71.1 cm), fork length, for a fish taken by a person subject to the bag limit specified in § 622.39(b)(1)(i); and 36 inches (91.4 cm), fork length, for a fish taken by a person not subject to the bag limit.

(e) *South Atlantic snapper-grouper*—(1) *Snapper*. (i) Lane snapper—8 inches (20.3 cm), TL.

(ii) Vermilion snapper—11 inches (27.9 cm), TL, for a fish taken by a person subject to the bag limit specified in § 622.39 (d)(1)(v) and 12 inches (30.5 cm), TL, for a fish taken by a person not subject to the bag limit.

(iii) Blackfin, cubera, dog, gray, mahogany, queen, silk, and yellowtail snappers; and schoolmaster—12 inches (30.5 cm), TL.

(iv) Mutton snapper—16 inches (40.6 cm), TL.

(v) Red snapper—20 inches (50.8 cm), TL.

(2) *Grouper*. (i) Red, yellowfin, and yellowmouth grouper; and scamp—20 inches (50.8 cm), TL.

(ii) Black grouper and gag—24 inches (61.0 cm), TL.

(3) *Other snapper-grouper species*. (i) Black sea bass—10 inches (25.4 cm), TL.

(ii) Gray triggerfish in the South Atlantic EEZ off Florida—12 inches (30.5 cm), TL.

(iii) Hogfish—12 inches (30.5 cm), fork length.

(iv) Red porgy—14 inches (35.6 cm), TL.

(v) Greater amberjack—28 inches (71.1 cm), fork length, for a fish taken by a person subject to the bag limit specified in § 622.39(d)(1)(i) and 36 inches (91.4 cm), fork length, for a fish taken by a person not subject to the bag limit.

(f) *Gulf shrimp*. White shrimp harvested in the EEZ are subject to the minimum-size landing and possession limits of Louisiana when possessed within the jurisdiction of that State.

(g) *Caribbean queen conch*—9 inches (22.9 cm) in length, that is, from the tip of the spire to the distal end of the shell, and $\frac{3}{8}$ inch (9.5 mm) in lip width at its widest point. A queen conch with a length of at least 9 inches (22.9 cm) or a lip width of at least $\frac{3}{8}$ inch (9.5 mm) is not undersized.

(h) *Dolphin in the Atlantic off Florida and off Georgia*—20 inches (50.8 cm), fork length.

[61 FR 34934, July 3, 1996, as amended at 61 FR 65483, Dec. 13, 1996; 62 FR 13988, Mar. 25, 1997; 63 FR 444, Jan. 6, 1998; 63 FR 10567, Mar. 4, 1998; 64 FR 3628, Jan. 25, 1999; 64 FR 45459, Aug. 20, 1999; 64 FR 57404, Oct. 25, 1999; 65 FR 31831, May 19, 2000; 65 FR 50162, Aug. 17, 2000; 69 FR 30242, May 27, 2004; 70 FR 33389, June 8, 2005]

§ 622.38 Landing fish intact.

The operator of a vessel that fishes in the EEZ is responsible for ensuring that fish on that vessel in the EEZ are maintained intact and, if taken from the EEZ, are maintained intact through offloading ashore, as specified in this section.

(a) The following must be maintained with head and fins intact: Cobia, king mackerel, and Spanish mackerel in or from the Gulf, Mid-Atlantic, or South Atlantic EEZ, except as specified for king mackerel in paragraph (g) of this section; dolphin and wahoo in or from the Atlantic EEZ; South Atlantic snapper-grouper in or from the South Atlantic EEZ, except as specified in paragraph (h) of this section; yellowtail snapper in or from the Caribbean EEZ; and finfish in or from the Gulf EEZ, except as specified in paragraphs (c) and (d) of this section. Such fish may be eviscerated, gilled, and scaled, but must otherwise be maintained in a whole condition.

(b) A Caribbean spiny lobster in or from the Caribbean EEZ must be maintained with head and carapace intact.

(c) Shark, swordfish, and tuna species are exempt from the requirements of paragraph (a) of this section.

(d) In the Gulf EEZ:

(1) Bait is exempt from the requirement to be maintained with head and fins intact.

(i) For the purpose of this paragraph (d)(1), bait means—

(A) Packaged, headless fish fillets that have the skin attached and are frozen or refrigerated;

(B) Headless fish fillets that have the skin attached and are held in brine; or

(C) Small pieces no larger than 3 in³ (7.6 cm³) or strips no larger than 3 inches by 9 inches (7.6 cm by 22.9 cm) that have the skin attached and are frozen, refrigerated, or held in brine.

§ 622.39

50 CFR Ch. VI (10–1–05 Edition)

(ii) Paragraph (d)(1)(i) of this section notwithstanding, a finfish or part thereof possessed in or landed from the Gulf EEZ that is subsequently sold or purchased as a finfish species, rather than as bait, is not bait.

(2) Legal-sized finfish possessed for consumption at sea on the harvesting vessel are exempt from the requirement to have head and fins intact, provided—

(i) Such finfish do not exceed any applicable bag limit;

(ii) Such finfish do not exceed 1.5 lb (680 g) of finfish parts per person aboard; and

(iii) The vessel is equipped to cook such finfish on board.

(e) A golden crab in or from the South Atlantic EEZ must be maintained in whole condition through landing ashore. For the purposes of this paragraph, whole means a crab that is in its natural condition and that has not been gutted or separated into component pieces, e.g., clusters.

(f) A Caribbean conch resource in or from the Caribbean EEZ must be maintained with meat and shell intact.

(g) Cut-off (damaged) king or Spanish mackerel that comply with the minimum size limits in § 622.37(c)(2) and (c)(3), respectively, and the trip limits in § 622.44(a) and (b), respectively, may be possessed in the Gulf, Mid-Atlantic, or South Atlantic EEZ on, and offloaded ashore from, a vessel that is operating under the respective trip limits. Such cut-off fish also may be sold. A maximum of five additional cut-off (damaged) king mackerel, not subject to the size limits or trip limits, may be possessed or offloaded ashore but may not be sold or purchased and are not counted against the trip limit.

(h) In the South Atlantic EEZ, snapper-grouper lawfully harvested in Bahamian waters are exempt from the requirement that they be maintained with head and fins intact, provided valid Bahamian fishing and cruising permits are on board the vessel and the vessel is in transit through the South Atlantic EEZ. For the purpose of this paragraph, a vessel is in transit through the South Atlantic EEZ when it is on a direct and continuous course through the South Atlantic EEZ and

no one aboard the vessel fishes in the EEZ.

[61 FR 34934, July 3, 1996, as amended at 61 FR 43959, Aug. 27, 1996; 61 FR 65483, Dec. 13, 1996; 63 FR 10567, Mar. 4, 1998; 63 FR 38303, July 16, 1998; 64 FR 3628, Jan. 25, 1999; 65 FR 16340, Mar. 28, 2000; 67 FR 22362, May 3, 2002; 69 FR 30242, May 27, 2004]

§ 622.39 Bag and possession limits.

(a) *Applicability.* (1) The bag and possession limits apply for species/species groups listed in this section in or from the EEZ. Unless specified otherwise, bag limits apply to a person on a daily basis, regardless of the number of trips in a day. Unless specified otherwise, possession limits apply to a person on a trip after the first 24 hours of that trip. The bag and possession limits apply to a person who fishes in the EEZ in any manner, except a person aboard a vessel in the EEZ that has on board the commercial vessel permit required under § 622.4(a)(2) for the appropriate species/species group. However, see § 622.32 for limitations on taking prohibited and limited-harvest species. The limitations in § 622.32 apply without regard to whether the species is harvested by a vessel operating under a commercial vessel permit or by a person subject to the bag limits. The possession of a commercial vessel permit notwithstanding, the bag and possession limits apply when the vessel is operating as a charter vessel or headboat. A person who fishes in the EEZ may not combine a bag limit specified in this section with a bag or possession limit applicable to state waters. A species/species group subject to a bag limit specified in this section taken in the EEZ by a person subject to the bag limits may not be transferred at sea, regardless of where such transfer takes place, and such fish may not be transferred in the EEZ. The operator of a vessel that fishes in the EEZ is responsible for ensuring that the bag and possession limits specified in this section are not exceeded.

(2) Paragraph (a)(1) of this section notwithstanding, bag and possession limits also apply for Gulf reef fish in or from the EEZ to a person aboard a vessel that has on board a commercial permit for Gulf reef fish—

Fishery Conservation and Management

§ 622.39

(i) When trawl gear or entangling net gear is on board. A vessel is considered to have trawl gear on board when trawl doors and a net are on board. Removal from the vessel of all trawl doors or all nets constitutes removal of trawl gear.

(ii) When a longline or buoy gear is on board and the vessel is fishing or has fished on a trip in the reef fish longline and buoy gear restricted area specified in § 622.34(c). A vessel is considered to have a longline on board when a power-operated longline hauler, a cable of diameter and length suitable for use in the longline fishery, and gangions are on board. Removal of any one of these three elements, in its entirety, constitutes removal of a longline.

(iii) For a species/species group when its quota has been reached and closure has been effected.

(iv) When the vessel has on board or is tending any trap other than a fish trap authorized under § 622.40(a)(2), a stone crab trap, or a spiny lobster trap.

(3) Paragraph (a)(1) of this section notwithstanding, the bag and other limits specified in § 622.35(b) apply for South Atlantic snapper-grouper in or from the EEZ to a person aboard a vessel for which a commercial permit for South Atlantic snapper-grouper has been issued that has on board a longline in the longline closed area.

(4) Paragraph (a)(1) of this section notwithstanding, a person aboard a vessel for which a commercial permit for South Atlantic snapper-grouper has been issued must comply with the bag limits specified in paragraph (d)(1) of this section for South Atlantic snapper-grouper taken with a powerhead, regardless of where taken, when such snapper-grouper are possessed in an SMZ specified in § 622.35(e)(1)(xii) through (e)(1)(xviii) or (e)(1)(xl) through (e)(1)(li).

(b) *Gulf reef fish*—(1) *Bag limits*. (i) Greater amberjack—1.

(ii) Groupers, combined, excluding jewfish and Nassau grouper—5 per person per day, but not to exceed 2 red grouper per person per day or 1 speckled hind or 1 Warsaw grouper per vessel per day.

(iii) Red snapper—4.

(iv) Snappers, combined, excluding red, lane, and vermilion snapper—10.

(v) Gulf reef fish, combined, excluding those specified in paragraphs (b)(1)(i) through (b)(1)(iv) and paragraphs (b)(1)(vi) through (b)(1)(vii) of this section and excluding dwarf sand perch and sand perch—20, but not to exceed 10 vermilion snapper.

(vi) Banded rudderfish and lesser amberjack, combined—5.

(vii) Hogfish—5.

(viii) Groupers, combined, excluding goliath grouper and Nassau grouper—3 per person per day, but not to exceed 1 speckled hind or 1 warsaw grouper per vessel per day or 1 red grouper per person per day.

(ix) Gulf reef fish, combined, excluding those specified in paragraphs (b)(1)(i), (iii), (iv), (vi), (vii), and (viii) of this section and excluding dwarf sand perch and sand perch—20.

(2) *Possession limits*. A person, or a vessel in the case of speckled hind or Warsaw grouper, on a trip that spans more than 24 hours may possess no more than two daily bag limits, provided such trip is on a vessel that is operating as a charter vessel or headboat, the vessel has two licensed operators aboard, and each passenger is issued and has in possession a receipt issued on behalf of the vessel that verifies the length of the trip.

(c) *King and Spanish mackerel*—(1) *Bag limits*. (i) Atlantic migratory group king mackerel—

(A) Mid-Atlantic and South Atlantic, other than off Florida—3.

(B) Off Florida—2, which is the daily bag limit specified by Florida for its waters (Rule 46-12.004(1), Florida Administrative Code). If Florida changes its limit, the bag limit specified in this paragraph (c)(1)(i)(B) will be changed to conform to Florida's limit, provided such limit does not exceed 5.

(ii) Gulf migratory group king mackerel—2.

(iii) Atlantic migratory group Spanish mackerel—15.

(iv) Gulf migratory group Spanish mackerel—15.

(2) *Possession limits*. A person who is on a trip that spans more than 24 hours may possess no more than two daily bag limits, provided such trip is on a vessel that is operating as a charter vessel or headboat, the vessel has two licensed operators aboard, and each

§ 622.40

50 CFR Ch. VI (10–1–05 Edition)

passenger is issued and has in possession a receipt issued on behalf of the vessel that verifies the length of the trip.

(d) *South Atlantic snapper-grouper*—(1) *Bag limits.* (i) Greater amberjack—1.

(ii) Groupers, combined, excluding jewfish and Nassau grouper, and tilefishes—5. However, within the 5-fish aggregate bag limit, no more than two fish may be gag or black grouper, combined.

(iii) Hogfish in the South Atlantic off Florida—5.

(iv) Snappers, combined, excluding cubera snapper measuring 30 inches (76.2 cm), TL, or larger, in the South Atlantic off Florida, and excluding vermilion snapper—10, of which no more than 2 may be red snapper. (See § 622.32(c)(2) for limitations on cubera snapper measuring 30 inches (76.2 cm), TL, or larger, in or from the South Atlantic EEZ off Florida.)

(v) Vermilion snapper—10.

(vi) Red porgy—1.

(vii) Black sea bass—20.

(viii) South Atlantic snapper-grouper, combined, excluding tomtate and blue runner and those specified in paragraphs (d)(1)(i) through (vii) of this section—20.

(2) *Possession limits.* (i) Provided each passenger is issued and has in possession a receipt issued on behalf of the vessel that verifies the duration of the trip—

(A) A person aboard a charter vessel or headboat on a trip that spans more than 24 hours may possess no more than two daily bag limits of species other than red porgy.

(B) A person aboard a headboat on a trip that spans more than 48 hours and who can document that fishing was conducted on at least 3 days may possess no more than three daily bag limits of species other than red porgy.

(ii) A person aboard a vessel may not possess red porgy in or from the EEZ in excess of one per day or one per trip, whichever is more restrictive.

(3) *Longline bag limits.* Other provisions of this paragraph (d) notwithstanding, a person on a trip aboard a vessel for which the bag limits apply that has a longline on board is limited on that trip to the bag limit for South Atlantic snapper-grouper for which a

bag limit is specified in paragraph (d)(1) of this section, and to zero for all other South Atlantic snapper-grouper. For the purpose of this paragraph (d)(3), a vessel is considered to have a longline on board when a power-operated longline hauler, a cable or monofilament of diameter and length suitable for use in the longline fishery, and gangions are on board. Removal of any one of these three elements constitutes removal of a longline.

(e) *Caribbean queen conch*—(1) *Applicability.* Paragraph (a)(1) of this section notwithstanding, the bag limit of paragraph (e)(2) of this section does not apply to a fisherman who has a valid commercial fishing license issued by Puerto Rico or the U.S. Virgin Islands. See § 622.44 for the commercial daily trip limit.

(2) *Bag limit.* The bag limit for queen conch in or from the Caribbean EEZ is 3 per person or, if more than 4 persons are aboard, 12 per boat.

(f) *Atlantic dolphin and wahoo.* Bag and possession limits are as follows:

(1) Dolphin—10, not to exceed 60 per vessel, whichever is less, except, on board a headboat, 10 per paying passenger.

(2) Wahoo—2.

[61 FR 34934, July 3, 1996, as amended at 61 FR 65483, Dec. 13, 1996; 61 FR 65985, Dec. 16, 1996; 62 FR 23674, May 1, 1997; 62 FR 67723, Dec. 30, 1997; 63 FR 8356, Feb. 19, 1998; 63 FR 38303, July 16, 1998; 63 FR 72203, Dec. 31, 1998; 64 FR 3628, Jan. 25, 1999; 64 FR 33800, June 24, 1999; 64 FR 45459, Aug. 20, 1999; 64 FR 47713, Sept. 1, 1999; 64 FR 57404, Oct. 25, 1999; 65 FR 30363, May 11, 2000; 65 FR 41016, July 3, 2000; 65 FR 50162, Aug. 17, 2000; 65 FR 51252, Aug. 23, 2000; 65 FR 61116, Oct. 16, 2000; 66 FR 17369, Mar. 30, 2001; 69 FR 30242, May 27, 2004; 69 FR 33320, June 15, 2004; 70 FR 33389, June 8, 2005]

EFFECTIVE DATE NOTE: At 70 FR 42511, July 25, 2005, § 622.39 was amended by suspending paragraphs (b)(1)(ii) and (b)(1)(v) and adding paragraphs (b)(1)(viii) and (b)(1)(ix), effective Aug. 9, 2005, through Jan. 23, 2006.

§ 622.40 Limitations on traps and pots.

(a) *Tending*—(1) *Caribbean EEZ.* A fish trap or Caribbean spiny lobster trap in the Caribbean EEZ may be pulled or tended only by a person (other than an authorized officer) aboard the fish trap or spiny lobster trap owner's vessel, or aboard another vessel if such vessel has on board written consent of the trap

owner, or if the trap owner is aboard and has documentation verifying his identification number and color code. An owner's written consent must specify the time period such consent is effective and the trap owner's gear identification number and color code.

(2) *Gulf EEZ*. A fish trap in the Gulf EEZ may be pulled or tended only by a person (other than an authorized officer) aboard the vessel with the fish trap endorsement to fish such trap. If such vessel has a breakdown that prevents it from retrieving its traps, the owner or operator must immediately notify the nearest NMFS Office of Enforcement and must obtain authorization for another vessel to retrieve and land its traps. The request for such authorization must include the requested effective period for the retrieval and landing, the persons and vessel to be authorized to retrieve the traps, and the point of landing of the traps. Such authorization will be specific as to the effective period, authorized persons and vessel, and point of landing. Such authorization is valid solely for the removal of fish traps from the EEZ and for harvest of fish incidental to such removal.

(3) *South Atlantic EEZ*. A sea bass pot or golden crab trap in the South Atlantic EEZ may be pulled or tended only by a person (other than an authorized officer) aboard the vessel permitted to fish such pot or trap or aboard another vessel if such vessel has on board written consent of the owner or operator of the vessel so permitted. For golden crab only, a vessel with written consent on board must also possess a valid commercial vessel permit for golden crab.

(b) *Escape mechanisms*—(1) *Caribbean EEZ*. (i) A fish trap used or possessed in the Caribbean EEZ must have a panel located on each of two sides of the trap, excluding the top, bottom, and side containing the trap entrance. The opening covered by a panel must measure not less than 8 by 8 inches (20.3 by 20.3 cm). The mesh size of a panel may not be smaller than the mesh size of the trap. A panel must be attached to the trap with untreated jute twine with a diameter not exceeding $\frac{1}{8}$ inch (3.2 mm). An access door may serve as one of the panels, provided it is on an

appropriate side, it is hinged only at its bottom, its only other fastening is untreated jute twine with a diameter not exceeding $\frac{1}{8}$ inch (3.2 mm), and such fastening is at the top of the door so that the door will fall open when such twine degrades. Jute twine used to secure a panel may not be wrapped or overlapped.

(ii) A spiny lobster trap used or possessed in the Caribbean EEZ must contain on any vertical side or on the top a panel no smaller in diameter than the throat or entrance of the trap. The panel must be made of or attached to the trap by one of the following degradable materials:

(A) Untreated fiber of biological origin with a diameter not exceeding $\frac{1}{8}$ inch (3.2 mm). This includes, but is not limited to tyre palm, hemp, jute, cotton, wool, or silk.

(B) Ungalvanized or uncoated iron wire with a diameter not exceeding $\frac{1}{16}$ inch (1.6 mm), that is, 16 gauge wire.

(2) *Gulf EEZ*. A fish trap used or possessed in the Gulf EEZ must have at least two escape windows on each of two sides, excluding the bottom (a total of four escape windows), that are 2 by 2 inches (5.1 by 5.1 cm) or larger. In addition, a fish trap must have a panel or access door located opposite each side of the trap that has a funnel. The opening covered by each panel or access door must be 144 in² (929 cm²) or larger, with one dimension of the area equal to or larger than the largest interior axis of the trap's throat (funnel) with no other dimension less than 6 inches (15.2 cm). The hinges and fasteners of each panel or access door must be constructed of one of the following degradable materials:

(i) Untreated jute string with a diameter not exceeding $\frac{3}{16}$ inch (4.8 mm) that is not wrapped or overlapped.

(ii) Magnesium alloy, time float releases (pop-up devices) or similar magnesium alloy fasteners.

(3) *South Atlantic EEZ*. (i) A sea bass pot that is used or possessed in the South Atlantic EEZ between 35°15.19' N. lat. (due east of Cape Hatteras Light, NC) and 28°35.1' N. lat. (due east of the NASA Vehicle Assembly Building, Cape Canaveral, FL) is required to have—

(A) On at least one side, excluding top and bottom, a panel or door with an opening equal to or larger than the interior end of the trap's throat (funnel). The hinges and fasteners of each panel or door must be made of one of the following degradable materials:

(1) Ungalvanized or uncoated iron wire with a diameter not exceeding 0.041 inches (1.0 mm), that is, 19 gauge wire.

(2) Galvanic timed-release mechanisms with a letter grade designation (degradability index) no higher than J.

(B) An unobstructed escape vent opening on at least two opposite vertical sides, excluding top and bottom. The minimum dimensions of an escape vent opening (based on inside measurement) are:

(1) 1½ by 5¾ inches (2.9 by 14.6 cm) for a rectangular vent.

(2) 1.75 by 1.75 inches (4.5 by 4.5 cm) for a square vent.

(3) 2.0-inch (5.1-cm) diameter for a round vent.

(ii) A golden crab trap that is used or possessed in the South Atlantic EEZ must have at least one escape gap or escape ring on each of two opposite vertical sides. The minimum allowable inside dimensions of an escape gap are 2.75 by 3.75 inches (7.0 by 9.5 cm); the minimum allowable inside diameter of an escape ring is 4.5 inches (11.4 cm). In addition to the escape gaps—

(A) A golden crab trap constructed of webbing must have an opening (slit) at least 1 ft (30.5 cm) long that may be closed (relaced) only with untreated cotton string no larger than ⅜ inch (0.48 cm) in diameter.

(B) A golden crab trap constructed of material other than webbing must have an escape panel or door measuring at least 11 7/8 by 11 7/8 inches (30.2 by 30.2 cm), located on at least one side, excluding top and bottom. The hinges or fasteners of such door or panel must be made of either ungalvanized or uncoated iron wire no larger than 19 gauge (0.04 inch (1.0 mm) in diameter) or untreated cotton string no larger than ⅜ inch (4.8 mm) in diameter.

(c) *Construction requirements and mesh sizes*—(1) *Caribbean EEZ*. A bare-wire fish trap used or possessed in the EEZ that has hexagonal mesh openings must have a minimum mesh size of 1.5

inches (3.8 cm) in the smallest dimension measured between centers of opposite strands. A bare-wire fish trap used or possessed in the EEZ that has other than hexagonal mesh openings or a fish trap of other than bare wire, such as coated wire or plastic, used or possessed in the EEZ, must have a minimum mesh size of 2.0 inches (5.1 cm) in the smallest dimension measured between centers of opposite strands.

(2) *Gulf EEZ*. A fish trap used or possessed in the Gulf EEZ must meet all of the following mesh size requirements (based on centerline measurements between opposite wires or netting strands):

(i) A minimum of 2 in² (12.9 cm²) opening for each mesh.

(ii) One-inch (2.5-cm) minimum length for the shortest side.

(iii) Minimum distance of 1 inch (2.5 cm) between parallel sides of rectangular openings, and 1.5 inches (3.8 cm) between parallel sides of square openings and of mesh openings with more than four sides.

(iv) One and nine-tenths inches (4.8 cm) minimum distance for diagonal measures of mesh.

(3) *South Atlantic EEZ*. (i) A sea bass pot used or possessed in the South Atlantic EEZ must have mesh sizes as follows (based on centerline measurements between opposite, parallel wires or netting strands):

(A) Hexagonal mesh (chicken wire)—at least 1.5 inches (3.8 cm) between the wrapped sides;

(B) Square mesh—at least 1.5 inches (3.8 cm) between sides; or

(C) Rectangular mesh—at least 1 inch (2.5 cm) between the longer sides and 2 inches (5.1 cm) between the shorter sides.

(ii) A golden crab trap deployed or possessed in the South Atlantic EEZ may not exceed 64 ft³ (1.8 m³) in volume in the northern zone or 48 ft³ (1.4 m³) in volume in the middle and southern zones. See § 622.17(b) for specification of the golden crab zones.

(d) *Area-specific restrictions*—(1) *Gulf EEZ*. In the Gulf EEZ, a fish trap may be pulled or tended only from official sunrise to official sunset. The operator of a vessel from which a fish trap is deployed in the Gulf EEZ must retrieve all the vessel's fish traps and return

them to port on each trip. A fish trap that is not returned to port on a trip, and its attached line and buoy, may be disposed of in any appropriate manner by the Assistant Administrator or an authorized officer. The owner of such trap and/or the operator of the responsible vessel is subject to appropriate civil penalties. A buoy that floats on the surface must be attached to each fish trap, or to each end trap of traps that are connected by a line, used in the Gulf EEZ. The maximum allowable size for a fish trap fished in the Gulf EEZ shoreward of the 50-fathom (91.4-m) isobath is 33 ft³ (0.9 m³) in volume. Fish trap volume is determined by measuring the external dimensions of the trap, and includes both the enclosed holding capacity of the trap and the volume of the funnel(s) within those dimensions. There is no size limitation for fish traps fished seaward of the 50-fathom (91.4-m) isobath. The maximum number of traps that may be assigned to, possessed, or fished in the Gulf EEZ by a vessel is 100.

(2) *South Atlantic EEZ.* (i) In the South Atlantic EEZ, sea bass pots may not be used or possessed in multiple configurations, that is, two or more pots may not be attached one to another so that their overall dimensions exceed those allowed for an individual sea bass pot. This does not preclude connecting individual pots to a line, such as a “trawl” or trot line.

(ii) Rope is the only material allowed to be used for a buoy line or mainline attached to a golden crab trap, except that wire cable is allowed for a mainline through December 31, 2002.

[61 FR 34934, July 3, 1996, as amended at 61 FR 43959, Aug. 27, 1996; 62 FR 13988, Mar. 25, 1997; 63 FR 10568, Mar. 4, 1998; 63 FR 38303, July 16, 1998; 63 FR 57590, Oct. 28, 1998; 64 FR 3628, Jan. 25, 1999; 67 FR 22362, May 3, 2002]

§ 622.41 Species specific limitations.

(a) *Aquacultured live rock.* In the Gulf or South Atlantic EEZ:

(1) Aquacultured live rock may be harvested only under a permit, as required under § 622.4(a)(3)(iii), and aquacultured live rock on a site may be harvested only by the person, or his or her employee, contractor, or agent, who has been issued the aquacultured live rock permit for the site. A person

harvesting aquacultured live rock is exempt from the prohibition on taking prohibited coral for such prohibited coral as attaches to aquacultured live rock.

(2) The following restrictions apply to individual aquaculture activities:

(i) No aquaculture site may exceed 1 acre (0.4 ha) in size.

(ii) Material deposited on the aquaculture site—

(A) May not be placed over naturally occurring reef outcrops, limestone ledges, coral reefs, or vegetated areas.

(B) Must be free of contaminants.

(C) Must be nontoxic.

(D) Must be placed on the site by hand or lowered completely to the bottom under restraint, that is, not allowed to fall freely.

(E) Must be placed from a vessel that is anchored.

(F) In the Gulf EEZ, must be distinguishable, geologically or otherwise (for example, be indelibly marked or tagged), from the naturally occurring substrate.

(G) In the South Atlantic EEZ, must be geologically distinguishable from the naturally occurring substrate and, in addition, may be indelibly marked or tagged.

(iii) A minimum setback of at least 50 ft (15.2 m) must be maintained from natural vegetated or hard bottom habitats.

(3) Mechanically dredging or drilling, or otherwise disturbing, aquacultured live rock is prohibited, and aquacultured live rock may be harvested only by hand. In addition, the following activities are prohibited in the South Atlantic: Chipping of aquacultured live rock in the EEZ, possession of chipped aquacultured live rock in or from the EEZ, removal of allowable octocoral or prohibited coral from aquacultured live rock in or from the EEZ, and possession of prohibited coral not attached to aquacultured live rock or allowable octocoral, while aquacultured live rock is in possession. See the definition of “Allowable octocoral” for clarification of the distinction between allowable octocoral and live rock. For the purposes of this paragraph (a)(3), chipping means breaking up reefs, ledges, or rocks into

§ 622.41

50 CFR Ch. VI (10–1–05 Edition)

fragments, usually by means of a chisel and hammer.

(4) Not less than 24 hours prior to harvest of aquacultured live rock, the owner or operator of the harvesting vessel must provide the following information to the NMFS Law Enforcement Office, Southeast Area, St. Petersburg, FL, telephone 727–570–5344:

(i) Permit number of site to be harvested and date of harvest.

(ii) Name and official number of the vessel to be used in harvesting.

(iii) Date, port, and facility at which aquacultured live rock will be landed.

(b) *Caribbean reef fish*. A marine aquarium fish may be harvested in the Caribbean EEZ only by a hand-held dip net or by a hand-held slurp gun. For the purposes of this paragraph, a hand-held slurp gun is a device that rapidly draws seawater containing fish into a self-contained chamber, and a marine aquarium fish is a Caribbean reef fish that is smaller than 5.5 inches (14.0 cm), TL.

(c) *Coastal migratory pelagic fish*—(1) *Authorized gear*. Subject to the prohibitions on gear/methods specified in § 622.31, the following are the only fishing gears that may be used in the Gulf, Mid-Atlantic, and South Atlantic EEZ in directed fisheries for coastal migratory pelagic fish:

(i) King mackerel, Atlantic migratory group—

(A) North of 34°37.3' N. lat., the latitude of Cape Lookout Light, NC—all gear except drift gillnet and long gillnet.

(B) South of 34°37.3' N. lat.—automatic reel, bandit gear, handline, and rod and reel.

(ii) King mackerel, Gulf migratory group—hook-and-line gear and, in the southern Florida west coast subzone only, run-around gillnet. (See § 622.42(c)(1)(i)(A)(3) for a description of the southern Florida west coast subzone.)

(iii) Spanish mackerel, Atlantic migratory group—automatic reel, bandit gear, handline, rod and reel, cast net, run-around gillnet, and stab net.

(iv) Spanish mackerel, Gulf migratory group—all gear except drift gillnet, long gillnet, and purse seine.

(v) Cobia in the Mid-Atlantic and South Atlantic EEZ and little tunny in

the South Atlantic EEZ south of 34°37.3' N. lat.—automatic reel, bandit gear, handline, rod and reel, and pelagic longline.

(vi) Cero in the South Atlantic EEZ and little tunny in the South Atlantic EEZ north of 34°37.3' N. lat.—all gear except drift gillnet and long gillnet.

(vii) Bluefish, cero, cobia, dolphin, and little tunny in the Gulf EEZ—all gear except drift gillnet and long gillnet.

(2) *Unauthorized gear*. Gear types other than those specified in paragraph (c)(1) of this section are unauthorized gear and the following possession limitations apply:

(i) *Long gillnets*. A vessel with a long gillnet on board in, or that has fished on a trip in, the Gulf, Mid-Atlantic, or South Atlantic EEZ may not have on board on that trip a coastal migratory pelagic fish.

(ii) *Drift gillnets*. A vessel with a drift gillnet on board in, or that has fished on a trip in, the Gulf EEZ may not have on board on that trip a coastal migratory pelagic fish.

(iii) *Other unauthorized gear*. Except as specified in paragraph (c)(2)(iv) of this section, a person aboard a vessel with unauthorized gear other than a drift gillnet in the Gulf EEZ or a long gillnet on board in, or that has fished in, the EEZ where such gear is not authorized in paragraph (c)(1) of this section, is subject to the bag limit for king and Spanish mackerel specified in § 622.39(c)(1)(ii) and to the limit on cobia specified in § 622.32(c)(1).

(iv) *Exception for king mackerel in the Gulf EEZ*. The provisions of this paragraph (c)(2)(iv) apply to king mackerel taken in the Gulf EEZ and to such king mackerel possessed in the Gulf. Paragraph (c)(2)(iii) of this section notwithstanding, a person aboard a vessel that has a valid commercial permit for king mackerel is not subject to the bag limit for king mackerel when the vessel has on board on a trip unauthorized gear other than a drift gillnet in the Gulf EEZ, a long gillnet, or a run-around gillnet in an area other than the southern Florida west coast subzone. Thus, the following applies to a vessel that has a commercial permit for king mackerel:

(A) Such vessel may not use unauthorized gear in a directed fishery for king mackerel in the Gulf EEZ.

(B) If such a vessel has a drift gillnet or a long gillnet on board or a run-around gillnet in an area other than the southern Florida west coast subzone, no king mackerel may be possessed.

(C) If such a vessel has unauthorized gear on board other than a drift gillnet in the Gulf EEZ, a long gillnet, or a run-around gillnet in an area other than the southern Florida west coast subzone, the possession of king mackerel taken incidentally is restricted only by the closure provisions of § 622.43(a)(3) and the trip limits specified in § 622.44(a). See also paragraph (c)(4) of this section regarding the purse seine incidental catch allowance of king mackerel.

(3) *Gillnets*—(i) *King mackerel*. The minimum allowable mesh size for a gillnet used to fish in the Gulf, Mid-Atlantic, or South Atlantic EEZ for king mackerel is 4.75 inches (12.1 cm), stretched mesh. A vessel in such EEZ, or having fished on a trip in such EEZ, with a gillnet on board that has a mesh size less than 4.75 (12.1 cm) inches, stretched mesh, may not possess on that trip an incidental catch of king mackerel that exceeds 10 percent, by number, of the total lawfully possessed Spanish mackerel on board.

(ii) *Spanish mackerel*. (A) The minimum allowable mesh size for a gillnet used to fish for Spanish mackerel in the Gulf, Mid-Atlantic, or South Atlantic EEZ is 3.5 inches (8.9 cm), stretched mesh.

(1) A vessel in the Gulf EEZ, or having fished on a trip in the Gulf EEZ, with a gillnet on board that has a mesh size less than 3.5 inches (8.9 cm), stretched mesh, may not possess on that trip any Spanish mackerel.

(2) A vessel in the South Atlantic or Mid-Atlantic EEZ, or having fished on a trip in such EEZ, with a gillnet on board that has a mesh size less than 3.5 inches (8.9 cm), stretched mesh, may possess or land on the day of that trip no more than 500 lb (227 kg) of incidentally caught Spanish mackerel.

(B) On board a vessel with a valid Spanish mackerel permit that is fishing for Spanish mackerel in, or that

possesses Spanish mackerel in or from, the South Atlantic EEZ off Florida north of 25°20.4' N. lat., which is a line directly east from the Miami-Dade/Monroe County, FL, boundary—

(1) No person may fish with, set, place in the water, or have on board a gillnet with a float line longer than 800 yd (732 m).

(2) No person may fish with, set, or place in the water more than one gillnet at any one time.

(3) No more than two gillnets, including any net in use, may be possessed at any one time; provided, however, that if two gillnets, including any net in use, are possessed at any one time, they must have stretched mesh sizes (as allowed under the regulations) that differ by at least .25 inch (.64 cm).

(4) No person may soak a gillnet for more than 1 hour. The soak period begins when the first mesh is placed in the water and ends either when the first mesh is retrieved back on board the vessel or the gathering of the gillnet is begun to facilitate retrieval on board the vessel, whichever occurs first; providing that, once the first mesh is retrieved or the gathering is begun, the retrieval is continuous until the gillnet is completely removed from the water.

(5) The float line of each gillnet possessed, including any net in use, must have the distinctive floats specified in § 622.6(b)(2).

(4) *Purse seine incidental catch allowance*. A vessel in the EEZ, or having fished in the EEZ, with a purse seine on board will not be considered as fishing, or having fished, for king or Spanish mackerel in violation of a prohibition of purse seines under paragraph (c)(2) of this section, in violation of the possession limits under paragraph (c)(2)(iii) of this section, or, in the case of king mackerel from the Atlantic migratory group, in violation of a closure effected in accordance with § 622.43(a), provided the king mackerel on board does not exceed 1 percent, or the Spanish mackerel on board does not exceed 10 percent, of all fish on board the vessel. Incidental catch will be calculated by number and/or weight of fish. Neither calculation may exceed the allowable percentage. Incidentally caught king or Spanish mackerel are counted

toward the quotas provided for under § 622.42(c) and are subject to the prohibition of sale under § 622.43(a)(3)(iii).

(d) *South Atlantic snapper-grouper*—(1) *Authorized gear*. Subject to the gear restrictions specified in § 622.31, the following are the only gear types authorized in a directed fishery for snapper-grouper in the South Atlantic EEZ: Bandit gear, bottom longline, buoy gear, handline, rod and reel, sea bass pot, and spearfishing gear.

(2) *Unauthorized gear*. All gear types other than those specified in paragraph (d)(1) of this section are unauthorized gear and the following possession and transfer limitations apply.

(i) A vessel with trawl gear on board that fishes in the EEZ on a trip may possess no more than 200 lb (90.7 kg) of South Atlantic snapper-grouper, excluding wreckfish, in or from the EEZ on that trip. It is a rebuttable presumption that a vessel with more than 200 lb (90.7 kg) of South Atlantic snapper-grouper, excluding wreckfish, on board harvested such fish in the EEZ.

(ii) Except as specified in paragraphs (d)(3) through (d)(5) of this section, a person aboard a vessel with unauthorized gear on board, other than trawl gear, that fishes in the EEZ on a trip is limited on that trip to:

(A) South Atlantic snapper-grouper species for which a bag limit is specified in § 622.39(d)(1)—the bag limit.

(B) All other South Atlantic snapper-grouper—zero.

(iii) South Atlantic snapper-grouper on board a vessel with unauthorized gear on board may not be transferred at sea, regardless of where such transfer takes place, and such snapper-grouper may not be transferred in the EEZ.

(iv) No vessel may receive at sea any South Atlantic snapper-grouper from a vessel with unauthorized gear on board, as specified in paragraph (d)(2)(iii) of this section.

(3) *Possession allowance regarding sink nets off North Carolina*. A vessel that has on board a commercial permit for South Atlantic snapper-grouper, excluding wreckfish, that fishes in the EEZ off North Carolina with a sink net on board, may retain, without regard to the limits specified in paragraph (d)(2)(ii) of this section, otherwise legal

South Atlantic snapper-grouper taken with bandit gear, buoy gear, handline, rod and reel, or sea bass pot. For the purpose of this paragraph (d)(3), a sink net is a gillnet with stretched mesh measurements of 3 to 4.75 inches (7.6 to 12.1 cm) that is attached to the vessel when deployed.

(4) *Possession allowance regarding bait nets*. A vessel that has on board a commercial permit for South Atlantic snapper-grouper, excluding wreckfish, that fishes in the South Atlantic EEZ with no more than one bait net on board, may retain, without regard to the limits specified in paragraph (d)(2)(ii) of this section, otherwise legal South Atlantic snapper-grouper taken with bandit gear, buoy gear, handline, rod and reel, or sea bass pot. For the purpose of this paragraph (d)(4), a bait net is a gillnet not exceeding 50 ft (15.2 m) in length or 10 ft (3.1 m) in height with stretched mesh measurements of 1.5 inches (3.8 cm) or smaller that is attached to the vessel when deployed.

(5) *Possession allowance regarding cast nets*. A vessel that has on board a commercial permit for South Atlantic snapper-grouper, excluding wreckfish, that fishes in the South Atlantic EEZ with a cast net on board, may retain, without regard to the limits specified in paragraph (d)(2)(ii) of this section, otherwise legal South Atlantic snapper-grouper taken with bandit gear, buoy gear, handline, rod and reel, or sea bass pot. For the purpose of this paragraph (d)(5), a cast net is a cone-shaped net thrown by hand and designed to spread out and capture fish as the weighted circumference sinks to the bottom and comes together when pulled by a line.

(6) *Longline species limitation*. A vessel that has on board a valid Federal commercial permit for South Atlantic snapper-grouper, excluding wreckfish, that fishes in the EEZ on a trip with a longline on board, may possess only the following South Atlantic snapper-grouper: snowy grouper, warsaw grouper, yellowedge grouper, misty grouper, golden tilefish, blueline tilefish, and sand tilefish. For the purpose of this paragraph, a vessel is considered to have a longline on board when a power-operated longline hauler, a cable of diameter suitable for use in the longline

fishery on any reel, and gangions are on board. Removal of any one of these three elements constitutes removal of a longline.

(e) *South Atlantic golden crab*. Traps are the only fishing gear authorized in directed fishing for golden crab in the South Atlantic EEZ. Golden crab in or from the South Atlantic EEZ may not be retained on board a vessel possessing or using unauthorized gear.

(f) *Caribbean queen conch*. In the Caribbean EEZ, no person may harvest queen conch by diving while using a device that provides a continuous air supply from the surface.

(g) *Penaeid shrimp in the South Atlantic*—(1) *BRD requirement*. Except as exempted in paragraph (g)(3)(ii) of this section, on a penaeid shrimp trawler in the South Atlantic EEZ, each trawl net that is rigged for fishing and has a mesh size less than 2.50 inches (6.35 cm), as measured between the centers of opposite knots when pulled taut, and each try net that is rigged for fishing and has a headrope length longer than 16.0 ft (4.9 m), must have a certified BRD installed. A trawl net, or try net, is rigged for fishing if it is in the water, or if it is shackled, tied, or otherwise connected to a sled, door, or other device that spreads the net, or to a tow rope, cable, pole, or extension, either on board or attached to a shrimp trawler.

(2) *Certified BRDs*. The following BRDs are certified for use by penaeid shrimp trawlers in the South Atlantic EEZ. Specifications of these certified BRDs are contained in Appendix D of this part.

- (i) Extended funnel.
- (ii) Expanded mesh.
- (iii) Fisheye.

(3) *Certification of BRDs*—(i) A person who seeks to have a BRD certified for use in the South Atlantic EEZ must submit an application to test such BRD, conduct the testing, and submit to the RA the results of the test conducted and recorded in accordance with the Testing Protocol for BRD Certification, which along with forms and procedures, is included in the *Bycatch Reduction Device Testing Protocol Manual* which is available from the SAFMC, One Southpark Circle, Suite 306, Charleston, SC 29407-4699, and from

the RA. A BRD that meets the certification criterion, as determined under the Testing Protocol for BRD Certification, will be added to the list of certified BRDs in paragraph (g)(2) of this section.

(ii) A penaeid shrimp trawler that is authorized to test a BRD in the EEZ for possible certification, has such written authorization on board, and is conducting such test in accordance with the Testing Protocol for BRD Certification is granted a limited exemption from the BRD requirement specified in paragraph (g)(1) of this section. The exemption from the BRD requirement is limited to those trawls that are being used in the certification trials. All other trawls rigged for fishing must be equipped with certified BRDs.

(h) *Shrimp in the Gulf*—(1) *BRD requirement*—(i) *West of 85°30' W. long.* On a shrimp trawler in the Gulf EEZ west of 85°30' W. long. and shoreward of the 100-fathom (183-m) depth contour, each net that is rigged for fishing must have a certified BRD listed in paragraph (h)(2)(i) of this section installed, unless exempted as specified in paragraphs (h)(1)(iii) through (v) or paragraph (h)(3)(iii) of this section.

(ii) *East of 85°30' W. long.* On a shrimp trawler in the Gulf EEZ east of 85°30' W. long., each net that is rigged for fishing must have a certified BRD listed in paragraph (h)(2)(ii) of this section installed, unless exempted as specified in paragraphs (h)(1)(iii) through (v) or paragraph (h)(3)(iii) of this section.

(iii) A shrimp trawler is exempt from the requirement to have a certified BRD installed in each net provided that at least 90 percent (by weight) of all shrimp on board or offloaded from such trawler are royal red shrimp.

(iv) A shrimp trawler is exempt from the requirement to have a BRD installed in a single try net with a headrope length of 16 ft (4.9 m) or less provided the single try net is either pulled immediately in front of another net or is not connected to another net.

(v) A shrimp trawler is exempt from the requirement to have a certified BRD installed in up to two rigid-frame roller trawls that are 16 ft (4.9 m) or less in length used or possessed on board. A rigid-frame roller trawl is a

trawl that has a mouth formed by a rigid frame and a grid of rigid vertical bars; has rollers on the lower horizontal part of the frame to allow the trawl to roll over the bottom and any obstruction while being towed; and has no doors, boards, or similar devices attached to keep the mouth of the trawl open.

(vi) A trawl net is rigged for fishing if it is in the water, or if it is shackled, tied, or otherwise connected to a sled, door, or other device that spreads the net, or to a tow rope, cable, pole, or extension, either on board or attached to a shrimp trawler.

(2) *Certified BRDs.* The following BRDs are certified for use by shrimp trawlers in the respective areas of the Gulf EEZ specified in paragraphs (h)(2)(i) and (ii) of this section. Specifications of these certified BRDs are contained in appendix D to this part.

(i) *West of 85°30' W. long.*

(A) Fisheye.

(B) Gulf fisheye.

(C) Jones-Davis.

(ii) *East of 85°30' W. long.*

(A) Fisheye.

(B) Gulf fisheye.

(C) Jones-Davis.

(D) Extended funnel.

(E) Expanded mesh.

(3) *Procedures for certification of additional BRDs.* The process for the certification of additional BRDs consists of two phases—an optional pre-certification phase and a required certification phase.

(i) *Pre-certification.* The pre-certification phase allows a person to test and evaluate a new BRD design for up to 60 days without being subject to the observer requirements and rigorous testing requirements specified for certification testing in the *Gulf Of Mexico Bycatch Reduction Device Testing Protocol Manual*.

(A) A person who wants to conduct pre-certification phase testing must submit an application, as specified in the *Gulf Of Mexico Bycatch Reduction Device Testing Protocol Manual*, to the RA. The *Gulf Of Mexico Bycatch Reduction Device Testing Protocol Manual*, which is available from the RA, upon request, contains the application forms.

(B) After reviewing the application, the RA will determine whether to issue a letter of authorization (LOA) to conduct pre-certification trials upon the vessel specified in the application. The RA will issue a pre-certification phase LOA if the BRD design is substantially unlike any BRD design previously determined not to meet the BRD certification criterion or, if the design is substantially similar to a BRD design previously determined not to meet the BRD certification criteria, and the application demonstrates that the design could meet the certification criterion through design revision or upon retesting (e.g., the application shows that statistical results could be improved upon retesting by such things as using a larger sample size than that previously used). If the RA authorizes pre-certification, the RA's letter of authorization must be on board the vessel during any trip involving the BRD testing.

(ii) *Certification.* A person who proposes a BRD for certification for use in the Gulf EEZ must submit an application to test such BRD, conduct the testing, and submit the results of the test in accordance with the *Gulf Of Mexico Bycatch Reduction Device Testing Protocol Manual*. The RA will issue a LOA to conduct certification trials upon the vessel specified in the application if the RA finds that: The test plan meets the requirements of the protocol; the observer identified in the application is qualified and has no current or prior financial relationship with the entity seeking BRD certification; the application presents a BRD candidate substantially unlike BRDs previously determined not to meet the current bycatch reduction criterion, or the applicant has shown good cause for reconsideration (such as the likelihood of improved statistical results yielded from a larger sample size than that previously used); and for BRDs not previously tested for certification, the results of any pre-certification trials conducted have been reviewed and deemed to indicate a reasonable scientific basis for conducting certification testing. If authorization to conduct certification trials is denied, the RA will provide a letter of explanation

to the applicant, together with relevant recommendations to address the deficiencies resulting in the denial. If a BRD meets the certification criterion, as determined under the testing protocol, NMFS will publish a notice in the FEDERAL REGISTER adding the BRD to the list of certified BRDs in paragraph (h)(2) of this section providing the specifications for the newly certified BRD, including any special conditions deemed appropriate based on the certification testing results.

(iii) A shrimp trawler that is authorized to participate in the pre-certification phase or to test a BRD in the EEZ for possible certification has such written authorization on board and is conducting such test in accordance with the *Gulf Of Mexico Bycatch Reduction Device Testing Protocol Manual* is granted a limited exemption from the BRD requirement specified in paragraph (h)(1) of this section. The exemption from the BRD requirement is limited to those trawls that are being used in the certification trials. All other trawls rigged for fishing must be equipped with certified BRDs.

(i) *Gulf reef fish exhibiting trap rash.* Gulf reef fish in or from the Gulf EEZ that exhibit trap rash may be possessed on board a vessel only if that vessel has a valid fish trap endorsement, as required under § 622.4(a)(2)(i), on board. Possession of such fish on board a vessel without a valid fish trap endorsement is prima facie evidence of illegal trap use and is prohibited. For the purpose of this paragraph, trap rash is defined as physical damage to fish that characteristically results from contact with wire fish traps. Such damage includes, but is not limited to, broken fin spines, fin rays, or teeth; visually obvious loss of scales; and cuts or abrasions on the body of the fish, particularly on the head, snout, or mouth.

(j) *Rock shrimp in the South Atlantic off Georgia and Florida.* The minimum mesh size for the cod end of a rock shrimp trawl net in the South Atlantic EEZ off Georgia and Florida is 1 7/8 inches (4.8 cm), stretched mesh. This minimum mesh size is required in at least the last 40 meshes forward of the cod end drawstring (tie-off rings), and smaller-mesh bag liners are not allowed. A vessel that has a trawl net on

board that does not meet these requirements may not possess a rock shrimp in or from the South Atlantic EEZ off Georgia and Florida.

(k) *Pelagic sargassum.* The minimum allowable mesh size for a net used to fish for pelagic sargassum in the South Atlantic EEZ is 4.0 inches (10.2 cm), stretched mesh, and such net must be attached to a frame no larger than 4 ft by 6 ft (1.2 m by 1.8 m). A vessel in the South Atlantic EEZ with a net on board that does not meet these requirements may not possess any pelagic sargassum.

(1) *Atlantic dolphin and wahoo*—(1) *Authorized gear.* The following are the only authorized gear types in the fisheries for dolphin and wahoo in the Atlantic EEZ: Automatic reel, bandit gear, handline, pelagic longline, rod and reel, and spearfishing gear (including powerheads). A person aboard a vessel in the Atlantic EEZ that has on board gear types other than authorized gear types may not possess a dolphin or wahoo.

(2) *Sea turtle protection measures applicable to pelagic longliners.* The owner or operator of a vessel for which a commercial permit for Atlantic dolphin and wahoo has been issued, as required under § 622.4(a)(2)(xii), and that has on board a pelagic longline must post inside the wheelhouse the sea turtle handling and release guidelines provided by NMFS. Such owner or operator must also comply with the sea turtle bycatch mitigation measures, including gear requirements and sea turtle handling requirements, as specified in § 635.21(c)(5)(i) and (ii) of this chapter, respectively. For the purpose of this paragraph, a vessel is considered to have pelagic longline gear on board when a power-operated longline hauler, a mainline, floats capable of supporting the mainline, and leaders (gangions) with hooks are on board. Removal of any one of these elements

§ 622.42

50 CFR Ch. VI (10–1–05 Edition)

constitutes removal of pelagic longline gear.

[61 FR 34934, July 3, 1996, as amended at 61 FR 43959, Aug. 27, 1996; 61 FR 65484, Dec. 13, 1996; 62 FR 18539, Apr. 16, 1997; 63 FR 10568, Mar. 4, 1998; 63 FR 18144, Apr. 14, 1998; 63 FR 38303, July 16, 1998; 64 FR 3628, Jan. 25, 1999; 64 FR 36781, July 8, 1999; 64 FR 37694, July 13, 1999; 64 FR 43941, Aug. 12, 1999; 64 FR 45459, Aug. 20, 1999; 64 FR 52428, Sept. 29, 1999; 64 FR 59126, Nov. 2, 1999; 64 FR 68935, Dec. 9, 1999; 65 FR 16340, Mar. 28, 2000; 65 FR 52957, Aug. 31, 2000; 65 FR 61116, Oct. 16, 2000; 68 FR 2196, Jan. 16, 2003; 68 FR 57378, Oct. 3, 2003; 69 FR 1541, Jan. 9, 2004; 69 FR 30242, May 27, 2004]

§ 622.42 Quotas.

Quotas apply for the fishing year for each species or species group. Except for the quotas for Gulf and South Atlantic coral, the quotas include species harvested from state waters adjoining the EEZ. Quotas for species managed under this part are as follows. (See § 622.32 for limitations on taking prohibited and limited-harvest species. The limitations in § 622.32 apply without regard to whether the species is harvested by a vessel operating under a commercial vessel permit or by a person subject to the bag limits.)

(a) *Gulf reef fish*—(1) *Commercial quotas*. The following quotas apply to persons who fish under commercial vessel permits for Gulf reef fish, as required under § 622.4(a)(2)(v).

(i) Red snapper—4.65 million lb (2.11 million kg), round weight, apportioned as follows:

(A) Two-thirds of the quota specified in § 622.42(a)(1)(i), 3.10 million lb (1.41 million kg), available at noon on February 1 each year, subject to the closure provisions of §§ 622.34(l) and 622.43(a)(1)(i).

(B) The remainder available at noon on October 1 each year, subject to the closure provisions of §§ 622.34(l) and 622.43(a)(1)(i).

(ii) Deep-water groupers (i.e., yellowedge grouper, misty grouper, warsaw grouper, snowy grouper, and speckled hind), and, after the quota for shallow-water grouper is reached, scamp, combined—1.02 million lb (0.46 million kg), gutted weight, that is, eviscerated but otherwise whole.

(iii) Shallow-water groupers (i.e., all groupers other than deep-water groupers, jewfish, and Nassau grouper),

including scamp before the quota for shallow-water groupers is reached, combined—8.80 million lb (3.99 million kg), gutted weight, that is, eviscerated but otherwise whole. Within the shallow-water grouper quota there is a separate quota for red grouper—5.31 million lb (2.41 million kg), gutted weight. When either the shallow-water grouper quota or the red grouper quota is reached, the entire shallow-water grouper fishery will be closed and the closure provisions of § 622.43(a) introductory text and § 622.43(a)(1)(i) apply to the entire shallow-water grouper fishery.

(iv) Tilefishes (i.e., tilefish and goldface, blackline, anchor, and blueline tilefish) combined—0.44 million lb (0.20 million kg), gutted weight, that is, eviscerated but otherwise whole.

(2) *Recreational quota for red snapper*. The following quota applies to persons who harvest red snapper other than under commercial vessel permits for Gulf reef fish and the commercial quota specified in paragraph (a)(1)(i) of this section—4.47 million lb (2.03 million kg), round weight.

(3) Shallow-water groupers, that is, all groupers other than deep-water groupers, jewfish, and Nassau grouper, including scamp before the quota for shallow-water groupers is reached, combined—9.8 million lb (4.4 million kg), round weight.

(b) *Gulf and South Atlantic allowable octocoral*. The quota for all persons who harvest allowable octocoral in the EEZ of the Gulf and South Atlantic is 50,000 colonies. A colony is a continuous group of coral polyps forming a single unit.

(c) *King and Spanish mackerel*. King and Spanish mackerel quotas apply to persons who fish under commercial vessel permits for king or Spanish mackerel, as required under § 622.4(a)(2)(iii) or (iv). A fish is counted against the quota for the area where it is caught when it is first sold.

(1) *Migratory groups of king mackerel*—

(i) *Gulf migratory group*. The quota for the Gulf migratory group of king mackerel is 3.26 million lb (1.48 million kg). The Gulf migratory group is divided into eastern and western zones separated by 87°31'06" W. long., which is

Fishery Conservation and Management

§ 622.43

a line directly south from the Alabama/Florida boundary. Quotas for the eastern and western zones are as follows:

(A) Eastern zone—2.25 million lb (1.02 million kg), which is further divided into quotas as follows:

(1) Florida east coast subzone—1,040,625 lb (472,020 kg).

(2) Florida west coast subzone—(i) *Southern*—1,040,625 lb (472,020 kg), which is further divided into a quota of 520,312 lb (236,010 kg) for vessels fishing with hook-and-line and a quota of 520,312 lb (236,010 kg) for vessels fishing with run-around gillnets.

(ii) *Northern*—168,750 lb (76,544 kg).

(3) Description of Florida subzones. The Florida east coast subzone is that part of the eastern zone north of 25°20.4' N. lat., which is a line directly east from the Miami-Dade/Monroe County, FL, boundary. The Florida west coast subzone is that part of the eastern zone south and west of 25°20.4' N. lat. The Florida west coast subzone is further divided into southern and northern subzones. From November 1 through March 31, the southern subzone is that part of the Florida west coast subzone that extends south and west from 25°20.4' N. lat. to 26°19.8' N. lat., a line directly west from the Lee/Collier County, FL, boundary (i.e., the area off Collier and Monroe Counties). From April 1 through October 31, the southern subzone is that part of the Florida west coast subzone that is between 26°19.8' N. lat. and 25°48' N. lat., which is a line directly west from the Monroe/Collier County, FL, boundary (i.e., off Collier County). The northern subzone is that part of the Florida west coast subzone that is between 26°19.8' N. lat. and 87°31'06" W. long., which is a line directly south from the Alabama/Florida boundary.

(B) Western zone—1.01 million lb (0.46 million kg).

(ii) *Atlantic migratory group*. The quota for the Atlantic migratory group of king mackerel is 3.71 million lb (1.68 million kg). No more than 0.40 million lb (0.18 million kg) may be harvested by purse seines.

(2) *Migratory groups of Spanish mackerel*—(i) *Gulf migratory group*. The quota for the Gulf migratory group of Spanish mackerel is 5.187 million lb (2.353 million kg).

(ii) *Atlantic migratory group*. The quota for the Atlantic migratory group of Spanish mackerel is 3.87 million lb (1.76 million kg).

(d) *Royal red shrimp in the Gulf*. The quota for all persons who harvest royal red shrimp in the Gulf is 392,000 lb (177.8 mt), tail weight.

(e) *South Atlantic snapper-grouper, excluding wreckfish*. The quotas apply to persons who are not subject to the bag limits. (See § 622.39(a)(1) for applicability of the bag limits.)

(1) *Snowy grouper*—344,508 lb (156,266 kg), gutted weight, that is, eviscerated but otherwise whole.

(2) *Golden tilefish*—1,001,663 lb (454,347 kg), gutted weight, that is, eviscerated but otherwise whole.

(3) *Greater amberjack*—1,169,931 lb (530,672 kg), gutted weight, that is, eviscerated but otherwise whole.

(f) *Wreckfish*. The quota for wreckfish applies to wreckfish shareholders, or their employees, contractors, or agents, and is 2 million lb (907,185 kg), round weight. See § 622.15 for information on the wreckfish shareholder under the ITQ system.

(g) *Pelagic sargassum*. The quota for all persons who harvest pelagic sargassum in the South Atlantic EEZ is 5,000 lb (2,268 kg), wet, landed weight. See § 622.35(g)(1) for area limitations on the harvest of pelagic sargassum.

[61 FR 34934, July 3, 1996, as amended at 61 FR 48643, Sept. 16, 1996; 62 FR 13988, Mar. 25, 1997; 62 FR 23674, May 1, 1997; 62 FR 46679, Sept. 4, 1997; 62 FR 67723, Dec. 30, 1997; 63 FR 8356, Feb. 19, 1998; 63 FR 10569, Mar. 4, 1998; 64 FR 3629, Jan. 25, 1999; 64 FR 45459, Aug. 20, 1999; 64 FR 59126, Nov. 2, 1999; 65 FR 16340, Mar. 28, 2000; 65 FR 30363, May 11, 2000; 65 FR 41016, July 3, 2000; 65 FR 50162, Aug. 17, 2000; 66 FR 17369, Mar. 30, 2001; 68 FR 57378, Oct. 3, 2003; 69 FR 33320, June 15, 2004]

§ 622.43 Closures.

(a) *General*. When a quota specified in § 622.42 is reached, or is projected to be reached, the Assistant Administrator will file a notification to that effect with the Office of the Federal Register. On and after the effective date of such notification, for the remainder of the fishing year, the following closure restrictions apply:

(1) *Gulf reef fish*—(i) *Commercial quotas*. The bag and possession limits

specified in § 622.39(b) apply to all harvest or possession in or from the Gulf EEZ of the indicated species, and the sale or purchase of the indicated species taken from the Gulf EEZ is prohibited. In addition, the bag and possession limits for red snapper apply on board a vessel for which a commercial permit for Gulf reef fish has been issued, as required under § 622.4(a)(2)(v), without regard to where such red snapper were harvested. However, the bag and possession limits for red snapper apply only when the recreational quota for red snapper has not been reached and the bag and possession limit has not been reduced to zero under paragraph (a)(1)(ii) of this section.

(ii) *Recreational quota for red snapper.* The bag and possession limit for red snapper in or from the Gulf EEZ is zero.

(iii) *Commercial quotas.* If the recreational fishery for the indicated species is open, the bag and possession limits specified in § 622.39(b) apply to all harvest or possession in or from the Gulf EEZ of the indicated species, and the sale or purchase of the indicated species taken from the Gulf EEZ is prohibited. In addition, the bag and possession limits for red snapper, when applicable, apply on board a vessel for which a commercial permit for Gulf reef fish has been issued, as required under § 622.4(a)(2)(v), without regard to where such red snapper were harvested. If the recreational fishery for the indicated species is closed, all harvest or possession in or from the Gulf EEZ of the indicated species is prohibited.

(2) *Gulf and South Atlantic allowable octocoral.* Allowable octocoral may not be harvested or possessed in the Gulf EEZ or South Atlantic EEZ and the sale or purchase of allowable octocoral in or from the Gulf EEZ or South Atlantic EEZ is prohibited.

(3) *King and Spanish mackerel.* The closure provisions of this paragraph (a)(3) do not apply to Atlantic migratory group Spanish mackerel, which are managed under the commercial trip limits specified in § 622.44(b) in lieu of the closure provisions of this section.

(i) A person aboard a vessel for which a commercial permit for king or Spanish mackerel has been issued, as re-

quired under § 622.4(a)(2)(iii) or (iv), may not fish for king or Spanish mackerel in the EEZ or retain king or Spanish mackerel in or from the EEZ under a bag or possession limit specified in § 622.39(c) for the closed species, migratory group, zone, subzone, or gear, except as provided for under paragraph (a)(3)(ii) of this section.

(ii) A person aboard a vessel for which valid charter vessel/headboat permits for Gulf coastal migratory pelagic fish or South Atlantic coastal migratory pelagic fish and a valid commercial vessel permit for king or Spanish mackerel have been issued may continue to retain fish under a bag and possession limit specified in § 622.39(c), provided the vessel is operating as a charter vessel or headboat.

(iii) The sale or purchase of king or Spanish mackerel of the closed species, migratory group, zone, subzone, or gear type is prohibited, including such king or Spanish mackerel taken under the bag limits.

(4) *Royal red shrimp in the Gulf.* Royal red shrimp in or from the Gulf EEZ may not be retained, and the sale or purchase of royal red shrimp taken from the Gulf EEZ is prohibited.

(5) *South Atlantic snapper-grouper, excluding wreckfish*—(i) *Greater amberjack.* The bag limit specified in § 622.39(d)(1)(i) and the possession limits specified in § 622.39(d)(2) apply to all harvest or possession of greater amberjack in or from the South Atlantic EEZ, and the sale or purchase of greater amberjack taken from the EEZ is prohibited. In addition, the bag and possession limits for greater amberjack and the prohibition on sale/purchase apply in the South Atlantic on board a vessel for which a valid Federal commercial or charter vessel/headboat permit for South Atlantic snapper-grouper has been issued, without regard to where such greater amberjack were harvested.

(ii) *Golden tilefish and snowy grouper.* Golden tilefish and snowy grouper, for which there are quotas, are managed under the commercial trip limits specified in § 622.44(c) in lieu of the closure provisions of this section.

(6) *Wreckfish.* Wreckfish in or from the South Atlantic EEZ may not be retained, and the sale or purchase of

Fishery Conservation and Management

§ 622.44

wreckfish taken from the South Atlantic EEZ is prohibited.

(7) *Pelagic sargassum*. Pelagic sargassum may not be fished for or possessed in the South Atlantic EEZ and the sale or purchase of pelagic sargassum in or from the South Atlantic EEZ is prohibited.

(b) *Exception to prohibition on sale/purchase*. (1) The prohibition on sale/purchase during a closure for Gulf reef fish, king and Spanish mackerel, royal red shrimp, greater amberjack, or wreckfish in paragraphs (a)(1), (a)(3)(iii), (a)(4), (a)(5)(i), or (a)(6) of this section does not apply to the indicated species that were harvested, landed ashore, and sold prior to the effective date of the closure and were held in cold storage by a dealer or processor.

(2) The prohibition on sale/purchase during a closure for allowable octocoral in paragraph (a)(2) of this section or for pelagic sargassum in paragraph (a)(7) of this section does not apply to allowable octocoral or pelagic sargassum that was harvested and landed ashore prior to the effective date of the closure.

(c) *Reopening*. When a fishery has been closed based on a projection of the quota specified in § 622.42 being reached and subsequent data indicate that the quota was not reached, the Assistant Administrator may file a notification to that effect with the Office of the Federal Register. Such notification may reopen the fishery to provide an opportunity for the quota to be reached.

[61 FR 34934, July 3, 1996, as amended at 62 FR 13988, Mar. 25, 1997; 62 FR 46679, Sept. 4, 1997; 62 FR 67723, Dec. 30, 1997; 63 FR 10569, Mar. 4, 1998; 64 FR 3629, Jan. 25, 1999; 64 FR 59126, Nov. 2, 1999; 67 FR 43565, June 28, 2002; 68 FR 57378, Oct. 3, 2003]

EFFECTIVE DATE NOTE: At 70 FR 42512, July 25, 2005, § 622.43 was amended by suspending paragraph (a)(1)(i) and adding paragraph (a)(1)(iii), effective Aug. 9, 2005, through Jan. 23, 2006.

§ 622.44 Commercial trip limits.

Commercial trip limits are limits on the amount of the applicable species that may be possessed on board or landed, purchased, or sold from a vessel per day. A person who fishes in the

EEZ may not combine a trip limit specified in this section with any trip or possession limit applicable to state waters. A species subject to a trip limit specified in this section taken in the EEZ may not be transferred at sea, regardless of where such transfer takes place, and such species may not be transferred in the EEZ. For fisheries governed by this part, commercial trip limits apply as follows (all weights are round or eviscerated weights):

(a) *King mackerel*—(1) *Atlantic group*. The following trip limits apply to vessels for which commercial permits for king mackerel have been issued, as required under § 622.4(a)(2)(iii):

(i) North of 29°25' N. lat., which is a line directly east from the Flagler/Volusia County, FL, boundary, king mackerel in or from the EEZ may not be possessed on board or landed from a vessel in a day in amounts exceeding 3,500 lb (1,588 kg).

(ii) In the area between 29°25' N. lat. and 28°47.8' N. lat., which is a line directly east from the Volusia/Brevard County, FL, boundary, king mackerel in or from the EEZ may not be possessed on board or landed from a vessel in a day in amounts exceeding 3,500 lb (1,588 kg) from April 1 through October 31.

(iii) In the area between 28°47.8' N. lat. and 25°20.47' N. lat., which is a line directly east from the Miami-Dade/Monroe County, FL, boundary, king mackerel in or from the EEZ may not be possessed on board or landed from a vessel in a day in amounts exceeding 75 fish from April 1 through October 31.

(iv) In the area between 25°20.4' N. lat. and 25°48' N. lat., which is a line directly west from the Monroe/Collier County, FL, boundary, king mackerel in or from the EEZ may not be possessed on board or landed from a vessel in a day in amounts exceeding 1,250 lb (567 kg) from April 1 through October 31.

(2) *Gulf group*. Commercial trip limits are established in the eastern and western zones as follows. (See § 622.42(c)(1)(i) for specification of the eastern and western zones and § 622.42(c)(1)(i)(A)(3) for specifications of the subzones in the eastern zone.)

(i) *Eastern zone-Florida east coast subzone*. In the Florida east coast

§ 622.44

50 CFR Ch. VI (10–1–05 Edition)

subzone, king mackerel in or from the EEZ may be possessed on board at any time or landed in a day from a vessel with a commercial permit for king mackerel as required under § 622.4(a)(2)(iii) as follows:

(A) From November 1 through January 31—not to exceed 50 fish.

(B) Beginning on February 1 and continuing through March 31—

(1) If 75 percent or more of the Florida east coast subzone quota as specified in § 622.42(c)(1)(i)(A)(1) has been taken—not to exceed 50 fish.

(2) If less than 75 percent of the Florida east coast subzone quota as specified in § 622.42(c)(1)(i)(A)(1) has been taken—not to exceed 75 fish.

(ii) *Eastern zone-Florida west coast subzone—(A) Gillnet gear.* (1) In the southern Florida west coast subzone, king mackerel in or from the EEZ may be possessed on board or landed from a vessel for which a commercial vessel permit for king mackerel and a king mackerel gillnet permit have been issued, as required under § 622.4(a)(2)(ii), in amounts not exceeding 25,000 lb (11,340 kg) per day, provided the gillnet fishery for Gulf group king mackerel is not closed under § 622.34(p) or § 622.43(a).

(2) In the southern Florida west coast subzone:

(i) King mackerel in or from the EEZ may be possessed on board or landed from a vessel that uses or has on board a run-around gillnet on a trip only when such vessel has on board a commercial vessel permit for king mackerel and a king mackerel gillnet permit.

(ii) King mackerel from the southern west coast subzone landed by a vessel for which a commercial vessel permit for king mackerel and a king mackerel gillnet permit have been issued will be counted against the run-around gillnet quota of § 622.42(c)(1)(i)(A)(2)(i).

(iii) King mackerel in or from the EEZ harvested with gear other than run-around gillnet may not be retained on board a vessel for which a commercial vessel permit for king mackerel and a king mackerel gillnet permit have been issued.

(B) *Hook-and-line gear.* In the Florida west coast subzone, king mackerel in or from the EEZ may be possessed on board or landed from a vessel with a

commercial permit for king mackerel, as required by § 622.4(a)(2)(iii), and operating under the hook-and-line gear quotas in § 622.42(c)(1)(i)(A)(2)(i) or (c)(1)(i)(A)(2)(ii):

(1) From July 1, each fishing year, until 75 percent of the respective northern or southern subzone's hook-and-line gear quota has been harvested—in amounts not exceeding 1,250 lb (567 kg) per day.

(2) From the date that 75 percent of the respective northern or southern subzone's hook-and-line gear quota has been harvested, until a closure of the respective northern or southern subzone's fishery for vessels fishing with hook-and-line gear has been effected under § 622.43(a)—in amounts not exceeding 500 lb (227 kg) per day.

(iii) *Notice of trip limit changes.* The Assistant Administrator, by filing a notification of trip limit change with the Office of the Federal Register, will effect the trip limit changes specified in paragraphs (a)(2)(i) and (a)(2)(ii)(B) of this section when the requisite harvest level has been reached or is projected to be reached.

(iv) *Western zone.* In the western zone, king mackerel in or from the EEZ may be possessed on board or landed from a vessel for which a commercial permit for king mackerel has been issued, as required under § 622.4(a)(2)(ii), from July 1, each fishing year, until a closure of the western zone's fishery has been effected under § 622.43(a)—in amounts not exceeding 3,000 lb (1,361 kg) per day.

(b) *Spanish mackerel.* (1) Commercial trip limits are established for Atlantic migratory group Spanish mackerel as follows:

(i) North of 30°42'45.6" N. lat., which is a line directly east from the Georgia/Florida boundary, Spanish mackerel in or from the EEZ may not be possessed on board or landed in a day from a vessel for which a permit for Spanish mackerel has been issued, as required under § 622.4(a)(2)(iv), in amounts exceeding 3,500 lb (1,588 kg).

(ii) South of 30°42'45.6" N. lat., Spanish mackerel in or from the EEZ may not be possessed on board or landed in a day from a vessel for which a permit for Spanish mackerel has been issued, as required under § 622.4(a)(2)(iv)—

Fishery Conservation and Management

§ 622.44

(A) From April 1 through November 30, in amounts exceeding 3,500 lb (1,588 kg).

(B) From December 1 until 75 percent of the adjusted quota is taken, in amounts as follows:

(1) Mondays through Fridays—unlimited.

(2) Saturdays and Sundays—not exceeding 1,500 lb (680 kg).

(C) After 75 percent of the adjusted quota is taken until 100 percent of the adjusted quota is taken, in amounts not exceeding 1,500 lb (680 kg).

(D) After 100 percent of the adjusted quota is taken through the end of the fishing year, in amounts not exceeding 500 lb (227 kg).

(2) For the purpose of paragraph (b)(1)(ii) of this section, the adjusted quota is 3.62 million lb (1.64 million kg). The adjusted quota is the quota for Atlantic migratory group Spanish mackerel reduced by an amount calculated to allow continued harvests of Atlantic migratory group Spanish mackerel at the rate of 500 lb (227 kg) per vessel per day for the remainder of the fishing year after the adjusted quota is reached. By filing a notification with the Office of the Federal Register, the Assistant Administrator will announce when 75 percent and 100 percent of the adjusted quota is reached or is projected to be reached.

(3) For the purpose of paragraph (b)(1)(ii) of this section, a day starts at 6 a.m., local time, and extends for 24 hours. If a vessel terminates a trip prior to 6 a.m., but retains Spanish mackerel on board after that time, the Spanish mackerel retained on board will not be considered in possession during the succeeding day, provided the vessel is not underway between 6 a.m. and the time such Spanish mackerel are unloaded, and provided such Spanish mackerel are unloaded prior to 6 p.m.

(c) *South Atlantic snapper-grouper.* When a vessel fishes on a trip in the South Atlantic EEZ, the vessel trip limits specified in this paragraph (c) apply, provided persons aboard the vessel are not subject to the bag limits. See § 622.39(a) for applicability of the bag limits.

(1) *Trip-limited permits.* A vessel for which a trip-limited permit for South

Atlantic snapper-grouper has been issued is limited to 225 lb (102.1 kg) of snapper-grouper.

(2) *Golden tilefish.* (i) Until the fishing year quota specified in § 622.42(e)(2) is reached, 5,000 lb (2,268 kg).

(ii) After the fishing year quota specified in § 622.42(e)(2) is reached, 300 lb (136 kg).

(3) *Snowy grouper.* (i) Until the fishing year quota specified in § 622.42(e)(1) is reached, 2,500 lb (1,134 kg).

(ii) After the fishing year quota specified in § 622.42(e)(1) is reached, 300 lb (136 kg).

(4) *Red porgy.* (i) From May 1 through December 31, 50 lb (22.7 kg).

(ii) From January 1 through April 30, the seasonal harvest limit specified in § 622.36(b)(5) applies.

(5) *Greater amberjack.* Until the fishing year quota specified in § 622.42(e)(3) is reached, 1,000 lb (454 kg). See § 622.43(a)(5)(i) for the limitations regarding greater amberjack after the fishing year quota is reached.

(d) *Gulf red snapper.* (1) The trip limit for red snapper in or from the Gulf for a vessel that has on board a valid commercial permit for Gulf reef fish and a valid Class 1 red snapper license is 2,000 lb (907 kg), round or eviscerated weight.

(2) The trip limit for red snapper in or from the Gulf for a vessel that has on board a valid commercial permit for Gulf reef fish and a valid Class 2 red snapper license is 200 lb (91 kg), round or eviscerated weight.

(3) The trip limit for red snapper in or from the Gulf for any other vessel for which a commercial permit for Gulf reef fish has been issued is zero.

(4) As a condition of a commercial vessel permit for Gulf reef fish, as required under § 622.4(a)(2)(v), without regard to where red snapper are harvested or possessed, a vessel that has been issued such permit—

(i) May not possess red snapper in or from the Gulf in excess of the appropriate vessel trip limit, as specified in paragraphs (d)(1) through (d)(3) of this section.

(ii) May not transfer or receive at sea red snapper in or from the Gulf.

(e) *Caribbean queen conch.* A person who fishes in the Caribbean EEZ and is not subject to the bag limit may not

§ 622.45

possess in or from the Caribbean EEZ more than 150 queen conch per day.

(f) *Atlantic dolphin and wahoo*. (1) The trip limit for wahoo in or from the Atlantic EEZ is 500 lb (227 kg). This trip limit applies to a vessel that has a Federal commercial permit for Atlantic dolphin and wahoo, provided that the vessel is not operating as a charter vessel or headboat.

(2) The trip limit for a vessel that does not have a Federal commercial vessel permit for Atlantic dolphin and wahoo but has a Federal commercial vessel permit in any other fishery is 200 lb (91 kg) of dolphin and wahoo, combined, provided that all fishing on and landings from that trip are north of 39° N. lat. (A charter vessel/headboat permit is not a commercial vessel permit.)

(g) *Gulf deep-water and shallow-water grouper, combined*. (1) For vessels operating under the quotas in § 622.42(a)(1)(ii) or § 622.42(a)(1)(iii), the following trip limits apply to Gulf deep-water and shallow-water grouper combined. However, when the quotas in § 622.42(a)(1)(ii) or § 622.42(a)(1)(iii) are reached and the respective fishery is closed, the commercial trip limit for the species subject to the closure is zero. (See § 622.42(a)(1)(ii) and § 622.42(a)(1)(iii) for the species included in the deep-water and shallow-water grouper categories, respectively.)

(i) Beginning January 1—10,000 lb (4,536 kg), gutted weight.

(ii) If on or before August 1 more than 50 percent of either the shallow-water grouper quota or red grouper quota specified in § 622.42(a)(1)(iii) is reached or is projected to be reached—7,500 lb (3,402 kg), gutted weight.

(iii) If on or before October 1 more than 75 percent of either the shallow-water grouper quota or red grouper quota specified in § 622.42(a)(1)(iii) is reached or is projected to be reached—5,500 lb (2,495 kg), gutted weight.

(2) The Assistant Administrator, by filing a notification of trip limit change with the Office of the Federal Register, will effect the trip limit changes specified in paragraphs (h)(1)(ii) and (iii) of this section when the applicable conditions have been met.

[61 FR 34934, July 3, 1996]

50 CFR Ch. VI (10–1–05 Edition)

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 622.44, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and on GPO Access.

EFFECTIVE DATE NOTE: At 70 FR 48324, Aug. 17, 2005, § 622.44 was amended by adding paragraph (g), effective Aug. 17, 2005, through Feb. 12, 2006.

§ 622.45 Restrictions on sale/purchase.

In addition to restrictions on sale/purchase related to closures, as specified in § 622.43 (a) and (b), restrictions on sale and/or purchase apply as follows.

(a) *Caribbean coral reef resource*. (1) No person may sell or purchase a Caribbean prohibited coral harvested in the Caribbean EEZ.

(2) A Caribbean prohibited coral that is sold in Puerto Rico or the U.S. Virgin Islands will be presumed to have been harvested in the Caribbean EEZ, unless it is accompanied by documentation showing that it was harvested elsewhere. Such documentation must contain:

(i) The information specified in subpart K of part 300 of this title for marking containers or packages of fish or wildlife that are imported, exported, or transported in interstate commerce.

(ii) The name and home port of the vessel, or the name and address of the individual, harvesting the Caribbean prohibited coral.

(iii) The port and date of landing the Caribbean prohibited coral.

(iv) A statement signed by the person selling the Caribbean prohibited coral attesting that, to the best of his or her knowledge, information, and belief, such Caribbean prohibited coral was harvested other than in the Caribbean EEZ or the waters of Puerto Rico or the U.S. Virgin Islands.

(b) *Caribbean reef fish*. A live red hind or live mutton snapper in or from the Caribbean EEZ may not be sold or purchased and used in the marine aquarium trade.

(c) *Gulf reef fish*. (1) A Gulf reef fish harvested in the EEZ on board a vessel that does not have a valid commercial permit for Gulf reef fish, as required under § 622.4(a)(2)(v), or a Gulf reef fish possessed under the bag limits specified in § 622.39(b), may not be sold or purchased.

(2) A Gulf reef fish harvested on board a vessel that has a valid commercial permit for Gulf reef fish may be sold only to a dealer who has a valid permit for Gulf reef fish, as required under § 622.4(a)(4).

(3) A Gulf reef fish harvested in the EEZ may be purchased by a dealer who has a valid permit for Gulf reef fish, as required under § 622.4(a)(4), only from a vessel that has a valid commercial permit for Gulf reef fish.

(4) From February 15 until March 15, each year, no person may sell or purchase a gag, black grouper, or red grouper harvested from the Gulf by a vessel with a valid Federal commercial permit for Gulf reef fish. This prohibition on sale/purchase does not apply to gag, black grouper, or red grouper that were harvested, landed ashore, and sold prior to February 15 and were held in cold storage by a dealer or processor.

(5) From April 22 through May 31, each year, no person may sell or purchase vermilion snapper harvested from the Gulf by a vessel with a valid Federal commercial permit for Gulf reef fish. This prohibition on sale/purchase does not apply to vermilion snapper that were harvested, landed ashore, and sold prior to April 22 and were held in cold storage by a dealer or processor.

(d) *South Atlantic snapper-grouper.* (1) A person may sell South Atlantic snapper-grouper harvested in the EEZ only to a dealer who has a valid permit for South Atlantic snapper-grouper, as required under § 622.4(a)(4).

(2) A person may purchase South Atlantic snapper-grouper harvested in the EEZ only from a vessel that has a valid commercial permit for South Atlantic snapper-grouper, as required under § 622.4(a)(2)(vi), or from a person who has a valid commercial license to sell fish in the state where the purchase occurs.

(3) Except for the sale or purchase of South Atlantic snapper-grouper harvested by a vessel that has a valid commercial permit for South Atlantic snapper-grouper, the sale or purchase of such fish is limited to the bag limits specified in § 622.39(d)(1).

(4) A warsaw grouper or speckled hind in or from the South Atlantic EEZ may not be sold or purchased.

(5) During January, February, March, and April, no person may sell or purchase a red porgy harvested from the South Atlantic EEZ or, if harvested by a vessel for which a valid Federal commercial or charter vessel/headboat permit for South Atlantic snapper-grouper has been issued, harvested from the South Atlantic. The prohibition on sale/purchase during January through April does not apply to red porgy that were harvested, landed ashore, and sold prior to January 1 and were held in cold storage by a dealer or processor. This prohibition also does not apply to a dealer's purchase or sale of red porgy harvested from an area other than the South Atlantic, provided such fish is accompanied by documentation of harvest outside the South Atlantic. Such documentation must contain:

(i) The information specified in 50 CFR part 300 subpart K for marking containers or packages of fish or wildlife that are imported, exported, or transported in interstate commerce;

(ii) The official number, name, and home port of the vessel harvesting the red porgy;

(iii) The port and date of offloading from the vessel harvesting the red porgy; and

(iv) A statement signed by the dealer attesting that the red porgy was harvested from an area other than the South Atlantic.

(6) During April, no person may sell or purchase a greater amberjack harvested from the South Atlantic EEZ or, if harvested by a vessel for which a valid Federal commercial or charter vessel/headboat permit for South Atlantic snapper-grouper has been issued, harvested from the South Atlantic. The prohibition on sale/purchase during April does not apply to greater amberjack that were harvested, landed ashore, and sold prior to April 1 and were held in cold storage by a dealer or processor. This prohibition also does not apply to a dealer's purchase or sale of greater amberjack harvested from an area other than the South Atlantic, provided such fish is accompanied by documentation of harvest outside the South Atlantic. Such documentation must contain:

(i) The information specified in 50 CFR part 300 subpart K for marking

§ 622.45

50 CFR Ch. VI (10–1–05 Edition)

containers or packages of fish or wild-life that are imported, exported, or transported in interstate commerce;

(ii) The official number, name, and home port of the vessel harvesting the greater amberjack;

(iii) The port and date of offloading from the vessel harvesting the greater amberjack; and

(iv) A statement signed by the dealer attesting that the greater amberjack was harvested from an area other than the South Atlantic.

(7) During March and April, no person may sell or purchase a gag or black grouper harvested from the South Atlantic EEZ or, if harvested by a vessel for which a valid Federal commercial or charter vessel/headboat permit for South Atlantic snapper-grouper has been issued, harvested from the South Atlantic. The prohibition on sale/purchase during March and April does not apply to gag or black grouper that were harvested, landed ashore, and sold prior to March 1 and were held in cold storage by a dealer or processor. This prohibition also does not apply to a dealer's purchase or sale of gag or black grouper harvested from an area other than the South Atlantic, provided such fish is accompanied by documentation of harvest outside the South Atlantic. Such documentation must contain:

(i) The information specified in 50 CFR part 300 subpart K for marking containers or packages of fish or wild-life that are imported, exported, or transported in interstate commerce;

(ii) The official number, name, and home port of the vessel harvesting the gag or black grouper;

(iii) The port and date of offloading from the vessel harvesting the gag or black grouper; and

(iv) A statement signed by the dealer attesting that the gag or black grouper was harvested from an area other than the South Atlantic.

(e) *Gulf and South Atlantic wild live rock*. Wild live rock in or from the Gulf EEZ or South Atlantic EEZ may not be sold or purchased. The prohibition on sale or purchase does not apply to wild live rock from the South Atlantic EEZ that was harvested and landed prior to January 1, 1996, or to wild live rock

from the Gulf EEZ that was harvested and landed prior to January 1, 1997.

(f) *South Atlantic golden crab*. (1) A female golden crab in or from the South Atlantic EEZ may not be sold or purchased.

(2) A golden crab harvested in the South Atlantic EEZ on board a vessel that does not have a valid commercial permit for golden crab, as required under § 622.4(a)(2)(x), may not be sold or purchased.

(3) A golden crab harvested on board a vessel that has a valid commercial permit for golden crab may be sold only to a dealer who has a valid permit for golden crab, as required under § 622.4(a)(4).

(4) A golden crab harvested in the South Atlantic EEZ may be purchased by a dealer who has a valid permit for golden crab, as required under § 622.4(a)(4), only from a vessel that has a valid commercial permit for golden crab.

(g) *South Atlantic rock shrimp*. (1) Rock shrimp harvested in the South Atlantic EEZ on board a vessel that does not have a valid commercial permit for rock shrimp, as required under § 622.4(a)(2)(viii), may not be transferred, received, sold, or purchased.

(2) Rock shrimp harvested on board a vessel that has a valid commercial permit for rock shrimp may be transferred or sold only to a dealer who has a valid permit for rock shrimp, as required under § 622.4(a)(4).

(3) Rock shrimp harvested in the South Atlantic EEZ may be received or purchased by a dealer who has a valid permit for rock shrimp, as required under § 622.4(a)(4), only from a vessel that has a valid commercial permit for rock shrimp.

(h) *Cut-off (damaged) king or Spanish mackerel*. A person may not sell or purchase a cut-off (damaged) king or Spanish mackerel that does not comply with the minimum size limits specified in § 622.37(c)(2) or (c)(3), respectively, or that is in excess of the trip limits specified in § 622.44(a) or (b), respectively.

(i) *Atlantic dolphin and wahoo*. (1) A person may sell dolphin or wahoo harvested in the Atlantic EEZ only if it is harvested by a vessel that has a commercial permit for Atlantic dolphin and wahoo, as required under

Fishery Conservation and Management

§ 622.48

§ 622.4(a)(2)(xii)(A), or by a vessel authorized a 200-lb (91-kg) trip limit for dolphin or wahoo, as specified in § 622.44(f)(2), and only to a dealer who has a permit for Atlantic dolphin or wahoo, as required under § 622.4(a)(4).

(2) In addition to the provisions of paragraph (i)(1) of this section, a person may not sell dolphin in excess of the bag limit or any wahoo harvested in the Atlantic EEZ by a vessel while it was operating as a charter vessel or headboat.

(3) Dolphin or wahoo harvested in the Atlantic EEZ may be purchased only by a dealer who has a permit for Atlantic dolphin and wahoo and only from a vessel authorized to sell dolphin or wahoo under paragraph (i)(1) or (i)(2) of this section.

[61 FR 34934, July 3, 1996, as amended at 61 FR 43960, Aug. 27, 1996; 61 FR 47449, Sept. 9, 1996; 63 FR 10569, Mar. 4, 1998; 63 FR 57590, Oct. 28, 1998; 64 FR 3629, Jan. 25, 1999; 64 FR 59126, Nov. 2, 1999; 65 FR 16341, Mar. 28, 2000; 65 FR 31831, May 19, 2000; 65 FR 51253, Aug. 23, 2000; 69 FR 30242, May 27, 2004; 70 FR 33389, June 8, 2005]

§ 622.46 Prevention of gear conflicts.

(a) No person may knowingly place in the Gulf EEZ any article, including fishing gear, that interferes with fishing or obstructs or damages fishing gear or the fishing vessel of another; or knowingly use fishing gear in such a fashion that it obstructs or damages the fishing gear or fishing vessel of another.

(b) In accordance with the procedures and restrictions of the FMP for the Shrimp Fishery of the Gulf of Mexico, the RA may modify or establish separation zones for shrimp trawling and the use of fixed gear to prevent gear conflicts. Necessary prohibitions or restrictions will be published in the FEDERAL REGISTER.

(c) In accordance with the procedures and restrictions of the FMP for Coastal Migratory Pelagic Resources, when the RA determines that a conflict exists in the king mackerel fishery between hook-and-line and gillnet fishermen in the South Atlantic EEZ off the east coast of Florida between 27°00.6' N. lat. and 27°50.0' N. lat., the RA may prohibit or restrict the use of hook-and-line and/or gillnets in all or a portion

of that area. Necessary prohibitions or restrictions will be published in the FEDERAL REGISTER.

[61 FR 34934, July 3, 1996, as amended at 64 FR 59126, Nov. 2, 1999]

§ 622.47 Gulf groundfish trawl fishery.

Gulf groundfish trawl fishery means fishing in the Gulf EEZ by a vessel that uses a bottom trawl, the unsorted catch of which is ground up for animal feed or industrial products.

(a) Other provisions of this part notwithstanding, the owner or operator of a vessel in the Gulf groundfish trawl fishery is exempt from the following requirements and limitations for the vessel's unsorted catch of Gulf reef fish:

(1) The requirement for a valid commercial vessel permit for Gulf reef fish in order to sell Gulf reef fish.

(2) Minimum size limits for Gulf reef fish.

(3) Bag limits for Gulf reef fish.

(4) The prohibition on sale of Gulf reef fish after a quota closure.

(b) Other provisions of this part notwithstanding, a dealer in a Gulf state is exempt from the requirement for a dealer permit for Gulf reef fish to receive Gulf reef fish harvested from the Gulf EEZ by a vessel in the Gulf groundfish trawl fishery.

§ 622.48 Adjustment of management measures.

In accordance with the framework procedures of the applicable FMPs, the RA may establish or modify the following items:

(a) *Caribbean coral reef resources.* Species for which management measures may be specified; prohibited species; harvest limitations, including quotas, trip, or daily landing limits; gear restrictions; closed seasons or areas; and marine conservation districts.

(b) *Caribbean reef fish.* Size limits, closed seasons or areas, fish trap mesh size, and the threshold level for overfishing.

(c) *Coastal migratory pelagic fish.* For a species or species group: Age-structured analyses, target date for rebuilding an overfished species, MSY (or proxy), stock biomass achieved by fishing at MSY (B_{MSY}) (or proxy), maximum fishing mortality threshold

(MFMT), minimum stock size threshold (MSST), OY, TAC, quota (including a quota of zero), bag limit (including a bag limit of zero), size limits, vessel trip limits, closed seasons or areas and reopenings, gear restrictions (ranging from regulation to complete prohibition), reallocation of the commercial/recreational allocation of Atlantic group Spanish mackerel, permit requirements, definitions of essential fish habitat, and essential fish habitat HAPCs or Coral HAPCs.

(d) *Gulf reef fish*. (1) For a species or species group: Target date for rebuilding an overfished species, TAC, bag limits, size limits, vessel trip limits, closed seasons or areas, gear restrictions, quotas, MSY (or proxy), OY, and estimates of stock biomass achieved by fishing at MSY (B_{MSY}), minimum stock size threshold (MSST), and maximum fishing mortality threshold (MFMT).

(2) SMZs and the gear restrictions applicable in each.

(e) *Gulf royal red shrimp*. MSY, OY, and TAC.

(f) *South Atlantic snapper-grouper and wreckfish*. Biomass levels, age-structured analyses, target dates for rebuilding overfished species, MSY, ABC, TAC, quotas, trip limits, bag limits, minimum sizes, gear restrictions (ranging from regulation to complete prohibition), seasonal or area closures, definitions of essential fish habitat, essential fish habitat HAPCs or Coral HAPCs, and restrictions on gear and fishing activities applicable in essential fish habitat and essential fish habitat HAPCs.

(g) *South Atlantic golden crab*. Biomass levels, age-structured analyses, MSY, ABC, TAC, quotas (including quotas equal to zero), trip limits, minimum sizes, gear regulations and restrictions, permit requirements, seasonal or area closures, sub-zones and their management measures, time frame for recovery of golden crab if overfished, fishing year (adjustment not to exceed 2 months), observer requirements, authority for the RA to close the fishery when a quota is reached or is projected to be reached, definitions of essential fish habitat, and essential fish habitat HAPCs or Coral HAPCs.

(h) *South Atlantic shrimp*. Biomass levels, age-structured analyses, BRD certification criteria, BRD specifications, BRD testing protocol, certified BRDs, nets required to use BRDs, times and locations when the use of BRDs is required, definitions of essential fish habitat, and essential fish habitat HAPCs or Coral HAPCs.

(i) *Gulf shrimp*. Bycatch reduction criteria, BRD certification and decertification criteria, BRD testing protocol, certified BRDs, and BRD specifications.

(j) *Gulf red drum*. Target date for rebuilding an overfished species, MSY (or proxy), stock biomass achieved by fishing at MSY (B_{MSY}), OY, TAC, minimum stock size threshold (MSST), maximum fishing mortality threshold (MFMT), escapement rates for juvenile fish, bag limits, size limits, gear harvest limits, and other restrictions required to prevent exceeding allocations or quotas.

(k) *Atlantic coast red drum*. Definitions of essential fish habitat and essential fish habitat HAPCs or Coral HAPCs.

(l) *South Atlantic coral, coral reefs, and live/hard bottom habitats*. Definitions of essential fish habitat and essential fish habitat HAPCs or Coral HAPCs.

(m) *Atlantic dolphin and wahoo*. Biomass levels, age-structured analyses, MSY, OY, ABC, TAC, trip limits, minimum sizes, gear regulations and restrictions, permit requirements, seasonal or area closures, sub-zones and their management measures, overfishing definitions and other status determination criteria, time frame for recovery of Atlantic dolphin or wahoo if overfished, fishing year (adjustment not to exceed 2 months), authority for the RA to close a fishery when a quota is reached or is projected to be reached or reopen a fishery when additional quota becomes available, definitions of essential fish habitat, and essential fish habitat HAPCs or Coral HAPCs.

[61 FR 34934, July 3, 1996, as amended at 61 FR 43960, Aug. 27, 1996; 62 FR 13988, Mar. 25, 1997; 62 FR 18539, Apr. 16, 1997; 63 FR 10569, Mar. 4, 1998; 63 FR 18144, Apr. 14, 1998; 64 FR 36781, July 8, 1999; 65 FR 31835, May 19, 2000; 65 FR 37296, June 14, 2000; 65 FR 51253, Aug. 23, 2000; 67 FR 22362, May 3, 2002; 69 FR 30242, May 27, 2004]

Fishery Conservation and Management

Pt. 622, App. A

APPENDIX A TO PART 622—SPECIES TABLES

TABLE 1 OF APPENDIX A TO PART 622—
CARIBBEAN CORAL REEF RESOURCES

- I. Sponges—Phylum Porifera
 - A. Demosponges—Class Demospongiae
 - Aphimedes compressa*, Erect rope sponge
 - Chondrilla nucula*, Chicken liver sponge
 - Cynachirella alloclada*
 - Geodia neptuni*, Potato sponge
 - Haliclona* sp., Finger sponge
 - Myriastrea* sp.
 - Niphates digitalis*, Pink vase sponge
 - N. erecta*, Lavender rope sponge
 - Spinoseella polycifera*
 - S. vaginalis*
 - Tethya crypta*
- II. Coelenterates—Phylum Coelenterata
 - A. Hydrocorals—Class Hydrozoa
 - 1. Hydroids—Order Athecatae
 - Family Milleporidae
 - Millepora* spp., Fire corals
 - Family Stylasteridae
 - Stylaster roseus*, Rose lace corals
 - B. Anthozoans—Class Anthozoa
 - 1. Soft corals—Order Alcyonacea
 - Family Anthothelidae
 - Erythropodium caribaeorum*, Encrusting gorgonian
 - Iciligorgia schrammi*, Deepwater sea fan
 - Family Briaridae
 - Briareum asbestinum*, Corky sea finger
 - Family Clavulariidae
 - Carijoa riisei*
 - Telesto* spp.
 - 2. Gorgonian corals—Order Gorgonacea
 - Family Ellisellidae
 - Ellisella* spp., Sea whips
 - Family Gorgoniidae
 - Gorgonia flabellum*, Venus sea fan
 - G. mariae*, Wide-mesh sea fan
 - G. ventalina*, Common sea fan
 - Pseudopterogorgia acerosa*, Sea plume
 - P. albatrossae*
 - P. americana*, Slimy sea plume
 - P. bipinnata*, Bipinnate plume
 - P. rigida*
 - Pterogorgia anceps*, Angular sea whip
 - P. citrina*, Yellow sea whip
 - Family Plexauridae
 - Eunicea calyculata*, Warty sea rod
 - E. clavigera*
 - E. fusca*, Doughnut sea rod
 - E. knighti*
 - E. laciniata*
 - E. laxispica*
 - E. mammosa*, Swollen-knob
 - E. succinea*, Shelf-knob sea rod
 - E. touneforti*
 - Muricea atlantica*
 - M. elongata*, Orange spiny rod
 - M. laxa*, Delicate spiny rod
 - M. muricata*, Spiny sea fan
 - M. pinnata*, Long spine sea fan
 - Muriceopsis* sp.

- M. flavida*, Rough sea plume
- M. sulphurea*
- Plexaura flexuosa*, Bent sea rod
- P. homomalla*, Black sea rod
- Plexaurella dichotoma*, Slit-pore sea rod
- P. fusifera*
- P. grandiflora*
- P. grisea*
- P. nutans*, Giant slit-pore
- Pseudoplexaura crucis*
- P. flagellosa*
- P. porosa*, Porous sea rod
- P. wagenari*
- 3. Hard Corals—Order Scleractinia
 - Family Acroporidae
 - Acropora cervicornis*, Staghorn coral
 - A. palmata*, Elkhorn coral
 - A. prolifera*, Fused staghorn
 - Family Agaricidae
 - Agaricia agaricities*, Lettuce leaf coral
 - A. fragilis*, Fragile saucer
 - A. lamarcki*, Lamarck's sheet
 - A. tenuifolia*, Thin leaf lettuce
 - Leptoseris cucullata*, Sunray lettuce
 - Family Astrocoeniidae
 - Stephanocoenia michelinii*, Blushing star
 - Family Caryophyllidae
 - Eusmilia fastigiata*, Flower coral
 - Tubastrea aurea*, Cup coral
 - Family Faviidae
 - Cladocora arbuscula*, Tube coral
 - Colpophyllia natans*, Boulder coral
 - Diploria clivosa*, Knobby brain coral
 - D. labyrinthiformis*, Grooved brain
 - D. strigosa*, Symmetrical brain
 - Favia fragum*, Golfball coral
 - Manicina areolata*, Rose coral
 - M. mayori*, Tortugas rose coral
 - Montastrea annularis*, Boulder star coral
 - M. cavernosa*, Great star coral
 - Solenastrea bournoni*, Smooth star coral
 - Family Meandrinidae
 - Dendrogyra cylindrus*, Pillar coral
 - Dichocoenia stellaris*, Pancake star
 - D. stokesi*, Elliptical star
 - Meandrina meandrites*, Maze coral
 - Family Mussidae
 - Isophyllastrea rigida*, Rough star coral
 - Isophyllia sinuosa*, Sinuous cactus
 - Mussa angulosa*, Large flower coral
 - Mycetophyllia aliciae*, Thin fungus coral
 - M. danae*, Fat fungus coral
 - M. ferox*, Grooved fungus
 - M. lamarckiana*, Fungus coral
 - Scolymia cubensis*, Artichoke coral
 - S. lacera*, Solitary disk
 - Family Oculinidae
 - Oculina diffusa*, Ivory bush coral
 - Family Pocilloporidae
 - Madracis decactis*, Ten-ray star coral
 - M. mirabilis*, Yellow pencil
 - Family Poritidae
 - Porites astreoides*, Mustard hill coral
 - P. branneri*, Blue crust coral
 - P. divaricata*, Small finger coral
 - P. porites*, Finger coral
 - Family Rhizangiidae

- Astrangia solitaria*, Dwarf cup coral
Phyllangia americana, Hidden cup coral
 Family Siderastreidae
Siderastrea radians, Lesser starlet
S. siderea, Massive starlet
 4. Black Corals—Order Antipatharia
Antipathes spp., Bushy black coral
Stichopathes spp., Wire coral
 5. Anemones—Order Actiniaria
Aiptasia tagetes, Pale anemone
Bartholomea annulata, Corkscrew anemone
Condylactis gigantea, Giant pink-tipped anemone
Hereractis lucida, Knobby anemone
Lebrunia spp., Staghorn anemone
Stichodactyla helianthus, Sun anemone
 6. Colonial Anemones—Order Zoanthidea
Zoanthus spp., Sea mat
 7. False Corals—Order Corallimorpharia
Discosoma spp. (formerly *Rhodactis*), False coral
Ricordia florida, Florida false coral
 III. Annelid Worms—Phylum Annelida
 A. Polychaetes—Class Polychaeta
 Family Sabellidae, Feather duster worms
Sabellastarte spp., Tube worms
S. magnifica, Magnificent duster
 Family Serpulidae
Spirobranchus giganteus, Christmas tree worm
 IV. Mollusks—Phylum Mollusca
 A. Gastropods—Class Gastropoda
 Family Elysidae
Tridachia crispata, Lettuce sea slug
 Family Olividae
Oliva reticularis, Notted olive
 Family Ovulidae
Cyphoma gibbosum, Flamingo tongue
 Family Ranellidae
Charonia tritonis, Atlantic triton trumpet
 Family Strombidae, Winged conchs
Strombus spp. (except Queen conch, *S. gigas*)
 B. Bivalves—Class Bivalvia
 Family Limidae
Lima spp., Fileclams
L. scabra, Rough fileclam
 Family Spondylidae
Spondylus americanus, Atlantic thorny oyster
 C. Cephalopods—Class Cephalopoda
 1. Octopuses—Order Octopoda
 Family Octopodidae
Octopus spp. (except the Common octopus, *O. vulgaris*)
 V. Arthropods—Phylum Arthropoda
 A. Crustaceans—Subphylum Crustacea
 1. Decapods—Order Decapoda
 Family Alpheidae
Alpheus armatus, Snapping shrimp
 Family Diogenidae
Paguristes spp., Hermit crabs
P. cadenati, Red reef hermit
 Family Grapsidae
Percnon gibbesi, Nimble spray crab
 Family Hippolytidae
Lysemata spp., Peppermint shrimp
Thor amboinensis, Anemone shrimp
 Family Majidae, Coral crabs
Mithrax spp., Clinging crabs
M. cinctimanus, Banded clinging
M. sculptus, Green clinging
Stenorhynchus seticornis, Yellowline arrow
 Family Palaemonida
Periclimenes spp., Cleaner shrimp
 Family Squillidae, Mantis crabs
Gonodactylus spp.
Lysiosquilla spp.
 Family Stenopodidae, Coral shrimp
Stenopus hispidus, Banded shrimp
S. scutellatus, Golden shrimp
 VI. Bryozoans—Phylum Bryozoa
 VII. Echinoderms—Phylum Echinodermata
 A. Feather stars—Class Crinoidea
Analcidometra armata, Swimming crinoid
Davidaster spp., Crinoids
Nemaster spp., Crinoids
 B. Sea stars—Class Asteroidea
Astropecten spp., Sand stars
Linckia guildingii, Common comet star
Ophidiaster guildingii, Comet star
Oreaster reticulatus, Cushion sea star
 C. Brittle and basket stars—Class Ophiuroidea
Astrophyton muricatum, Giant basket star
Ophiocoma spp., Brittlestars
Ophioderma spp., Brittlestars
O. rubicundum, Ruby brittlestar
 D. Sea Urchins—Class Echinoidea
Diadema antillarum, Long-spined urchin
Echinometra spp., Purple urchin
Euclidaris tribuloides, Pencil urchin
Lytechinus spp., Pin cushion urchin
Tripeustes ventricosus, Sea egg
 E. Sea Cucumbers—Class Holothuroidea
Holothuria spp., Sea cucumbers
 VIII. Chordates—Phylum Chordata
 A. Tunicates—Subphylum Urochordata
 IX. Green Algae—Phylum Chlorophyta
Caulerpa spp., Green grape algae
Halimeda spp., Watercress algae
Penicillus spp., Neptune's brush
Udotea spp., Mermaid's fan
Ventricaria ventricosa, Sea pearls
 X. Red Algae—Phylum Rhodophyta
 XI. Sea grasses—Phylum Angiospermae
Halodule wrightii, Shoal grass
Halophila spp., Sea vines
Ruppia maritima, Widgeon grass
Syringodium filiforme, Manatee grass
Thalassia testudinum, Turtle grass

TABLE 2 OF APPENDIX A TO PART 622—
CARIBBEAN REEF FISH

- Acanthuridae—Surgeonfishes
 Ocean surgeonfish, *Acanthurus bahianus*
 Doctorfish, *Acanthurus chirurgus*
 Blue tang, *Acanthurus coeruleus*
 Antennariidae—Frogfishes
 Frogfish, *Antennarius* spp.
 Apogonidae—Cardinalfishes
 Flamefish, *Apogon maculatus*
 Conchfish, *Astrapogen stellatus*
 Aulostomidae—Trumpetfishes
 Trumpetfish, *Aulostomus maculatus*

- Balistidae—Leatherjackets
 Scrawled filefish, *Aluterus scriptus*
 Queen triggerfish, *Balistes vetula*
 Whitespotted filefish, *Cantherhines macrocerus*
 Ocean triggerfish, *Canthidermis sufflamen*
 Black durgon, *Melichthys niger*
 Sargassum triggerfish, *Xanthichthys rigens*
 Blenniidae—Combtooth blennies
 Redlip blenny, *Ophioblennius atlanticus*
 Bothidae—Lefteye flounders
 Peacock flounder, *Bothus lunatus*
 Carangidae—Jacks
 Yellow jack, *Caranx bartholomaei*
 Blue runner, *Caranx crysos*
 Horse-eye jack, *Caranx latus*
 Black jack, *Caranx lugubris*
 Bar jack, *Caranx ruber*
 Greater amberjack, *Seriola dumerili*
 Almaco jack, *Seriola rivoliana*
 Chaetodontidae—Butterflyfishes
 Longsnout butterflyfish, *Chaetodon aculeatus*
 Foureye butterflyfish, *Chaetodon capistratus*
 Spotfin butterflyfish, *Chaetodon ocellatus*
 Banded butterflyfish, *Chaetodon striatus*
 Cirrhitidae—Hawkfishes
 Redspotted hawkfish, *Amblycirrhitus pinos*
 Dactylopteridae—Flying gurnards
 Flying gurnard, *Dactylopterus volitans*
 Ephippidae—Spadefishes
 Atlantic spadefish, *Chaetodipterus faber*
 Gobiidae—Gobies
 Neon goby, *Gobiosoma oceanops*
 Rusty goby, *Priolepis hipoliti*
 Grammatidae—Basslets
 Royal gramma, *Gramma loreto*
 Haemulidae—Grunts
 Porkfish, *Anisotremus virginicus*
 Margate, *Haemulon album*
 Tomtate, *Haemulon aurolineatum*
 French grunt, *Haemulon flavolineatum*
 White grunt, *Haemulon plumieri*
 Bluestriped grunt, *Haemulon sciurus*
 Holocentridae—Squirrelfishes
 Squirrelfish, *Holocentrus adscensionis*
 Longspine squirrelfish, *Holocentrus rufus*
 Blackbar soldierfish, *Myripristis jacobus*
 Cardinal soldierfish, *Plectrypops retrospinis*
 Labridae—Wrasses
 Spanish hogfish, *Bodianus rufus*
 Creole wrasse, *Clepticus parrae*
 Yellowcheek wrasse, *Halichoeres cyanocephalus*
 Yellowhead wrasse, *Halichoeres garnoti*
 Clown wrasse, *Halichoeres maculipinna*
 Puddingwife, *Halichoeres radiatus*
 Pearly razorfish, *Hemipteronotus novacula*
 Green razorfish, *Hemipteronotus splendens*
 Hogfish, *Lachnolaimus maximus*
 Bluehead wrasse, *Thalassoma bifasciatum*
 Lutjanidae—Snappers
 Black snapper, *Apsilus dentatus*
 Queen snapper, *Etelis oculatus*
 Mutton snapper, *Lutjanus analis*
 Schoolmaster, *Lutjanus apodus*
 Blackfin snapper, *Lutjanus buccanella*
 Gray snapper, *Lutjanus griseus*
 Dog snapper, *Lutjanus jocu*
 Mahogany snapper, *Lutjanus mahogani*
 Lane snapper, *Lutjanus synagris*
 Silk snapper, *Lutjanus vivanus*
 Yellowtail snapper, *Ocyurus chrysurus*
 Wenchman, *Pristipomoides aquilonaris*
 Vermilion snapper, *Rhomboplites aurorubens*
 Malacanthidae—Tilefishes
 Blackline tilefish, *Caulolatilus cyanops*
 Sand tilefish, *Malacanthus plumieri*
 Mullidae—Goatfishes
 Yellow goatfish, *Mulloidichthys martinicus*
 Spotted goatfish, *Pseudupeneus maculatus*
 Muraenidae—Morays
 Chain moray, *Echidna catenata*
 Green moray, *Gymnothorax funebris*
 Goldentail moray, *Gymnothorax miliaris*
 Ogcocephalidae—Batfishes
 Batfish, *Ogcocephalus* spp.
 Ophichthidae—Snake eels
 Goldspotted eel, *Myrichthys ocellatus*
 Opistognathidae—Jawfishes
 Yellowhead jawfish, *Opistognathus aurifrons*
 Dusky jawfish, *Opistognathus whitehursti*
 Ostraciidae—Boxfishes
 Spotted trunkfish, *Lactophrys bicaudalis*
 Honeycomb cowfish, *Lactophrys polygonia*
 Scrawled cowfish, *Lactophrys quadricornis*
 Trunkfish, *Lactophrys trigonus*
 Smooth trunkfish, *Lactophrys triqueter*
 Pomacanthidae—Angelfishes
 Cherubfish, *Centropyge argi*
 Queen angelfish, *Holacanthus ciliaris*
 Rock beauty, *Holacanthus tricolor*
 Gray angelfish, *Pomacanthus arcuatus*
 French angelfish, *Pomacanthus paru*
 Pomacentridae—Damsel-fishes
 Sergeant major, *Abudefduf saxatilis*
 Blue chromis, *Chromis cyanea*
 Sunshinefish, *Chromis insolata*
 Yellowtail damselfish, *Microspathodon chrysurus*
 Dusky damselfish, *Pomacentrus fuscus*
 Beaugregory, *Pomacentrus leucostictus*
 Bicolor damselfish, *Pomacentrus partitus*
 Threespot damselfish, *Pomacentrus planifrons*
 Priacanthidae—Bigeyes
 Bigeye, *Priacanthus arenatus*
 Glasseye snapper, *Priacanthus cruentatus*
 Scaridae—Parrotfishes
 Midnight parrotfish, *Scarus coelestinus*
 Blue parrotfish, *Scarus coerules*
 Striped parrotfish, *Scarus croicensis*
 Rainbow parrotfish, *Scarus guacamaia*
 Princess parrotfish, *Scarus taeniopterus*
 Queen parrotfish, *Scarus vetula*
 Redband parrotfish, *Sparisoma aurofrenatum*
 Redtail parrotfish, *Sparisoma chrysopteron*
 Redfin parrotfish, *Sparisoma rubripinne*
 Stoplight parrotfish, *Sparisoma viride*
 Sciaenidae—Drums
 High-hat, *Equetus acuminatus*

Jackknife-fish, *Equetus lanceolatus*
 Spotted drum, *Equetus punctatus*
 Scorpaeonidae—Scorpionfishes
 Serranidae—Sea basses
 Rock hind, *Epinephelus adscensionis*
 Graysby, *Epinephelus cruentatus*
 Yellowedge grouper, *Epinephelus flavolimbatus*
 Coney, *Epinephelus fulvus*
 Red hind, *Epinephelus guttatus*
 Jewfish, *Epinephelus itajara*
 Red grouper, *Epinephelus morio*
 Misty grouper, *Epinephelus mystacinus*
 Nassau Grouper, *Epinephelus striatus*
 Butter hamlet, *Hypoplectrus unicolor*
 Swisshard basslet, *Liopropoma rubre*
 Yellowfin grouper, *Mycteroperca venenosa*
 Tiger grouper, *Mycteroperca tigris*
 Creole-fish, *Paranthias furcifer*
 Greater soapfish, *Rypticus saponaceus*
 Orangeback bass, *Serranus annularis*
 Lantern bass, *Serranus baldwini*
 Tobaccosfish, *Serranus tabacarius*
 Harlequin bass, *Serranus tigrinus*
 Chalk bass, *Serranus tortugarum*
 Soleidae—Soles
 Caribbean tonguefish, *Symphurus arawak*
 Sparidae—Porgies
 Sea bream, *Archosargus rhomboidalis*
 Jolthead porgy, *Calamus bajonado*
 Sheepshead porgy, *Calamus penna*
 Pluma, *Calamus pennatula*
 Syngnathidae—Pipefishes
 Seahorses, *Hippocampus* spp.
 Pipefishes, *Syngnathus* spp.
 Synodontidae—Lizardfishes
 Sand diver, *Synodus intermedius*
 Tetraodontidae—Puffers
 Sharpnose puffer, *Canthigaster rostrata*
 Porcupinefish, *Diodon hystrix*

TABLE 3 OF APPENDIX A TO PART 622—GULF REEF FISH

Balistidae—Triggerfishes
 Gray triggerfish, *Balistes capriscus*
 Carangidae—Jacks
 Greater amberjack, *Seriola dumerili*
 Lesser amberjack, *Seriola fasciata*
 Almaco jack, *Seriola rivoliana*
 Banded rudderfish, *Seriola zonata*
 Labridae—Wrasses
 Hogfish, *Lachnolaimus maximus*
 Lutjanidae—Snappers
 Queen snapper, *Etelis oculatus*
 Mutton snapper, *Lutjanus analis*
 Schoolmaster, *Lutjanus apodus*
 Blackfin snapper, *Lutjanus buccanella*
 Red snapper, *Lutjanus campechanus*
 Cubera snapper, *Lutjanus cyanopterus*
 Gray (mangrove) snapper, *Lutjanus griseus*
 Dog snapper, *Lutjanus jocu*
 Mahogany snapper, *Lutjanus mahogoni*
 Lane snapper, *Lutjanus synagris*
 Silk snapper, *Lutjanus vivanus*
 Yellowtail snapper, *Ocyurus chrysurus*
 Wenchman, *Pristipomoides aquilonaris*
 Vermilion snapper, *Rhomboplites aurorubens*

Malacanthidae—Tilefishes
 Goldface tilefish, *Caulolatilus chrysops*
 Blackline tilefish, *Caulolatilus cyanops*
 Anchor tilefish, *Caulolatilus intermedius*
 Blueline tilefish, *Caulolatilus microps*
 Tilefish, *Lopholatilus chamaeleonticeps*
 Serranidae—Groupers
 Dwarf sand perch, *Diplectrum bivittatum*
 Sand perch, *Diplectrum formosum*
 Rock hind, *Epinephelus adscensionis*
 Speckled hind, *Epinephelus drummondhayi*
 Yellowedge grouper, *Epinephelus flavolimbatus*
 Red hind, *Epinephelus guttatus*
 Jewfish, *Epinephelus itajara*

 Misty grouper, *Epinephelus mystacinus*
 Warsaw grouper, *Epinephelus nigritus*
 Snowy grouper, *Epinephelus niveatus*
 Nassau grouper, *Epinephelus striatus*
 Black grouper, *Mycteroperca bonaci*
 Yellowmouth grouper, *Mycteroperca interstitialis*
 Gag, *Mycteroperca microlepis*
 Scamp, *Mycteroperca phenax*
 Yellowfin grouper, *Mycteroperca venenosa*

TABLE 4 OF APPENDIX A TO PART 622—SOUTH ATLANTIC SNAPPER-GROUPER

Balistidae—Triggerfishes
 Gray triggerfish, *Balistes capriscus*
 Queen triggerfish, *Balistes vetula*
 Ocean triggerfish, *Canthidermis sufflamen*
 Carangidae—Jacks
 Yellow jack, *Caranx bartholomaei*
 Blue runner, *Caranx crysos*
 Crevalle jack, *Caranx hippos*
 Bar jack, *Caranx ruber*
 Greater amberjack, *Seriola dumerili*
 Lesser amberjack, *Seriola fasciata*
 Almaco jack, *Seriola rivoliana*
 Banded rudderfish, *Seriola zonata*
 Ehippididae—Spadefishes
 Spadefish, *Chaetodipterus faber*
 Haemulidae—Grunts
 Black margate, *Anisotremus surinamensis*
 Porkfish, *Anisotremus virginicus*
 Margate, *Haemulon album*
 Tomtate, *Haemulon aurolineatum*
 Smallmouth grunt, *Haemulon chrysargyreum*
 French grunt, *Haemulon flavolineatum*
 Spanish grunt, *Haemulon macrostomum*
 Cottonwick, *Haemulon melanurum*
 Sailors choice, *Haemulon parrai*
 White grunt, *Haemulon plumieri*
 Blue stripe grunt, *Haemulon sciurus*
 Labridae—Wrasses
 Hogfish, *Lachnolaimus maximus*
 Puddingwife, *Halichoeres radiatus*
 Lutjanidae—Snappers
 Black snapper, *Apsilus dentatus*
 Queen snapper, *Etelis oculatus*
 Mutton snapper, *Lutjanus analis*
 Schoolmaster, *Lutjanus apodus*
 Blackfin snapper, *Lutjanus buccanella*
 Red snapper, *Lutjanus campechanus*

Fishery Conservation and Management

29 Northeast of Port Mansfield	26°46.5'	96°52.0'
30 Northeast of Port Isabel	26°21.5'	96°35.0'
31 U.S./Mexico EEZ boundary	26°00.5'	96°36.0'
Thence westerly along U.S./Mexico EEZ boundary to the seaward limit of Texas' waters.		

¹ Nearest identifiable landfall, boundary, navigational aid, or submarine area.

APPENDIX C TO PART 622—FISH LENGTH MEASUREMENTS

FIGURE 1 OF APPENDIX C TO PART 622—CARAPACE LENGTH

FIGURE 2 OF APPENDIX C TO PART 622—ILLUSTRATION OF LENGTH MEASUREMENTS

[61 FR 34934, July 3, 1996, as amended at 64 FR 3630, Jan. 25, 1999]

APPENDIX D TO PART 622—
SPECIFICATIONS FOR CERTIFIED BRDS

A. *Extended Funnel.*

1. *Description.* The extended funnel BRD consists of an extension with large-mesh webbing in the center (the large-mesh escape section) and small-mesh webbing on each end held open by a semi-rigid hoop. A funnel of small-mesh webbing is placed inside the extension to form a passage for shrimp to the codend. It also creates an area of reduced water flow to allow for fish escapement through the large mesh. One side of the funnel is extended vertically to form a lead panel and area of reduced water flow. There are two sizes of extended funnel BRDs, a standard size and an inshore size for small trawls.

2. *Minimum Construction and Installation Requirements for Standard Size.*

(a) *Extension Material.* The small-mesh sections used on both sides of the large-mesh escape section are constructed of 1½ inch (4.13 cm), No. 30 stretched mesh, nylon webbing. The front section is 120 meshes around by 6½ meshes deep. The back section is 120 meshes around by 23 meshes deep.

(b) *Large-Mesh Escape Section.* The large-mesh escape section is constructed of 8 to 10 inch (20.3 to 25.4 cm), stretched mesh, webbing. This section is cut on the bar to form a section that is 15 inches (38.1 cm) in length by 95 inches (241.3 cm) in circumference. The leading edge is attached to the 6½-mesh extension section and the rear edge is attached to the 23-mesh extension section.

(c) *Funnel.* The funnel is constructed of 1½ inch (3.81 cm), stretched mesh, No. 30 depth-stretched and heat-set polyethylene webbing. The circumference of the leading edge is 120 meshes and the back edge is 78 meshes. The short side of the funnel is 34 to 36 inches (86.4 to 91.4 cm) long and the opposite side of the funnel extends an additional 22 to 24 inches (55.9 to 61.0 cm). The circumference of the leading edge of the funnel is attached to the forward small-mesh section three meshes forward of the large-mesh escape section and is evenly sewn, mesh for mesh, to the small-mesh section. The after edge of the funnel is attached to the after small-mesh section at its top and bottom eight meshes back from the large-mesh escape panel. Seven meshes of the top and seven meshes of the bottom of the funnel are attached to eight meshes at the top and bottom of the small-mesh section, such eight meshes being located immediately adjacent to the top and bottom centers of the small-mesh section on the side of the funnel's extended side. The extended side of the funnel is sewn at its top and bottom to the top and bottom of the small-mesh section, extending at an angle toward the top and bottom centers of the small-mesh section.

(d) *Semi-Rigid Hoop.* A 30-inch (76.2-cm) diameter hoop constructed of plastic-coated trawl cable, swaged together with a ¾-inch (9.53-mm) micropress sleeve, is installed five meshes behind the trailing edge of the large-

mesh escape section. The extension webbing must be laced to the ring around the entire circumference and must be equally distributed on the hoop, that is, 30 meshes must be evenly attached to each quadrant.

(e) *Installation.* The extended funnel BRD is attached 8 inches (20.3 cm) behind the posterior edge of the TED. If it is attached behind a soft TED, a second semi-rigid hoop, as prescribed in paragraph A.2.(d), must be installed in the front section of the BRD extension webbing at the leading edge of the funnel. The codend of the trawl net is attached to the trailing edge of the BRD.

3. *Minimum Construction and Installation Requirements for Inshore Size.*

(a) *Extension Material.* The small-mesh sections used on both sides of the large-mesh escape section are constructed of 1½ inch (3.5 cm), No. 18 stretched mesh, nylon webbing. The front section is 120 meshes around by 6½ meshes deep. The back section is 120 meshes around by 23 meshes deep.

(b) *Large-Mesh Escape Section.* The large-mesh escape section is constructed of 8 to 10 inch (20.3 to 25.4 cm), stretched mesh, webbing. This section is cut on the bar to form a section that is 15 inches (38.1 cm) by 75 inches (190.5 cm) in circumference. The leading edge is attached to the 6½-mesh extension section and the rear edge is attached to the 23-mesh extension section.

(c) *Funnel.* The funnel is constructed of 1¾ inch (3.5 cm), stretched mesh, No. 18 depth-stretched and heat-set polyethylene webbing. The circumference of the leading edge is 120 meshes and the back edge is 78 meshes. The short side of the funnel is 30 to 32 inches (76.2 to 81.3 cm) long and the opposite side of the funnel extends an additional 20 to 22 inches (50.8 to 55.9 cm). The circumference of the leading edge of the funnel is attached to the forward small-mesh section three meshes forward of the large-mesh escape section and is evenly sewn, mesh for mesh, to the small-mesh section. The after edge of the funnel is attached to the after small-mesh section at its top and bottom eight meshes back from the large-mesh escape panel. Seven meshes of the top and seven meshes of the bottom of the funnel are attached to eight meshes at the top and bottom of the small-mesh section, such eight meshes being located immediately adjacent to the top and bottom centers of the small-mesh section on the side of the funnel's extended side. The extended side of the funnel is sewn at its top and bottom to the top and bottom of the small-mesh section, extending at an angle toward the top and bottom centers of the small-mesh section.

(d) *Semi-Rigid Hoop.* A 24-inch (61.0-cm) diameter hoop constructed of plastic-coated trawl cable, swaged together with a ¾-inch (9.53-mm) micropress sleeve, is installed five meshes behind the trailing edge of the large mesh section. The extension webbing must

be laced to the ring around the entire circumference and must be equally distributed on the hoop, that is, 30 meshes must be evenly attached to each quadrant.

(e) *Installation.* The extended funnel BRD is attached 8 inches (20.3 cm) behind the posterior edge of the TED. If it is attached behind a soft TED, a second semi-rigid hoop, as prescribed in paragraph A.3.(d), must be installed in the front section of the BRD extension webbing at the leading edge of the funnel. The codend of the trawl net is attached to the trailing edge of the BRD.

B. *Expanded Mesh.* The expanded mesh BRD is constructed and installed exactly the same as the standard size extended funnel BRD, except that one side of the funnel is not extended to form a lead panel.

C. *Fisheye.*

1. *Description.* The fisheye BRD is a cone-shaped rigid frame constructed from aluminum or steel rod of at least ¼ inch diameter, which is inserted into the codend to form an escape opening. Fisheyes of several different shapes and sizes have been tested in different positions in the codend.

2. *Minimum Construction and Installation Requirements.* The fisheye has a minimum opening dimension of 5 inches (12.7 cm) and a minimum total opening area of 36 square inches (91.4 square cm). The fisheye must be installed at the top center of the codend of the trawl to create an opening in the trawl facing in the direction of the mouth of the trawl no further forward than 11 ft (3.4 m) from the codend drawstring (tie-off rings) or 70 percent of the distance between the codend drawstring and the forward edge of the codend, excluding any extension, whichever is the shorter distance. In the Gulf EEZ only, when the fisheye BRD is installed in this position, no part of the lazy line attachment system (i.e., any mechanism, such as elephant ears or choker straps, used to attach the lazy line to the codend) may overlap the fisheye escape opening when the fisheye is installed aft of the attachment point of the codend retrieval system.

D. *Gulf fisheye.*

1. *Description.* The Gulf fisheye BRD is a cone-shaped rigid frame constructed from aluminum or steel that is inserted into the top center of the codend, or is offset not more than 15 meshes perpendicular to the top center of the codend, to form an escape opening.

2. *Minimum Construction and Installation Requirements.* The Gulf fisheye is a cone-shaped rigid frame constructed of aluminum or steel rods. The rods must be at least ¼-inch (6.35-mm) diameter. Any dimension of the escape opening must be at least 5.0 inches (12.7 cm), and the total escape opening area must be at least 36.0 in² (232.3 cm²). The Gulf fisheye must be installed in the codend of the trawl to create an escape opening in the trawl, facing in the direction of the mouth of the

trawl, no further forward than 12.5 ft (3.81 m) and no less than 8.5 ft (2.59 m) from the codend tie-off rings. When installed in this position, no part of the lazy line attachment system (i.e., any mechanism, such as elephant ears or choker straps, used to attach the lazy line to the codend) may overlap the fisheye escape opening when the fisheye is installed aft of the attachment point of the codend retrieval system. The Gulf fisheye may not be offset more than 15 meshes perpendicular to the top center of the codend.

E. *Jones-Davis.*

1. *Description.* The Jones-Davis BRD is similar to the expanded mesh and the extended funnel BRDs except that the fish escape openings are windows cut around the funnel rather than large-mesh sections. In addition, a webbing cone fish deflector is installed behind the funnel.

2. *Minimum Construction and Installation Requirements.* The Jones-Davis BRD must contain all of the following.

(a) *Webbing extension.* The webbing extension must be constructed from a single piece of 1½-inch (3.5-cm) stretch mesh number 30 nylon 42 meshes by 120 meshes. A tube is formed from the extension webbing by sewing the 42-mesh side together.

(b) *28-inch (71.1-cm) cable hoop.* A single hoop must be constructed of ½-inch (1.3-cm) steel cable 88 inches (223.5 cm) in length. The cable must be joined at its ends by a 3-inch (7.6-cm) piece of ½-inch (1.3-cm) aluminum pipe and pressed with a ⅝-inch (0.95-cm) die to form a hoop. The inside diameter of this hoop must be between 27 and 29 inches (68.6 and 73.7 cm). The hoop must be attached to the extension webbing 17½ meshes behind the leading edge. The extension webbing must be quartered and attached in four places around the hoop, and every other mesh must be attached all the way around the hoop using number 24 twine or larger. The hoop must be laced with ⅝-inch (0.95-cm) polypropylene or polyethylene rope for chaffing.

(c) *24-inch (61.0-cm) hoop.* A single hoop must be constructed of either number 60 twine 80 inches (203.2 cm) in length or ⅝-inch (0.95-cm) steel cable 75½ inches (191.8 cm) in length. If twine is used, the twine must be laced in and out of the extension webbing 39 meshes behind the leading edge, and the ends must be tied together. If cable is used, the cable must be joined at its ends by a 3-inch (7.6-cm) piece of ⅝-inch (0.95-cm) aluminum pipe and pressed together with a ¼-inch (0.64-cm) die to form a hoop. The inside diameter of this hoop must be between 23 and 25 inches (58.4 and 63.4 cm). The hoop must be attached to the extension webbing 39 meshes behind the leading edge. The extension webbing must be quartered and attached in four places around the hoop, and every other mesh must be attached all the way around the hoop using number 24 twine or larger.

The hoop must be laced with $\frac{3}{8}$ -inch (0.95-cm) polypropylene or polyethylene rope for chaffing.

(d) *Funnel*. The funnel must be constructed from four sections of $1\frac{1}{2}$ -inch (3.8-cm) heat-set and depth-stretched polypropylene or polyethylene webbing. The two side sections must be rectangular in shape, $29\frac{1}{2}$ meshes on the leading edge by 23 meshes deep. The top and bottom sections are $29\frac{1}{2}$ meshes on the leading edge by 23 meshes deep and tapered 1 point 2 bars on both sides down to 8 meshes across the back. The four sections must be sewn together down the 23-mesh edge to form the funnel.

(e) *Attachment of the funnel in the webbing extension*. The funnel must be installed two meshes behind the leading edge of the extension starting at the center seam of the extension and the center mesh of the funnel's top section leading edge. On the same row of meshes, the funnel must be sewn evenly all the way around the inside of the extension. The funnel's top and bottom back edges must be attached one mesh behind the 28-inch (71.1-cm) cable hoop (front hoop). Starting at the top center seam, the back edge of the top funnel section must be attached four meshes each side of the center. Counting around 60 meshes from the top center, the back edge of the bottom section must be attached 4 meshes on each side of the bottom center. Clearance between the side of the funnel and the 28-inch (71.1-cm) cable hoop (front hoop) must be at least 6 inches (15.2 cm) when measured in the hanging position.

(f) *Cutting the escape openings*. The leading edge of the escape opening must be located within 18 inches (45.7 cm) of the posterior edge of the turtle excluder device (TED) grid. The area of the escape opening must total at least 864 in² (5,574.2 cm²). Two escape openings 10 meshes wide by 13 meshes deep must be cut 6 meshes apart in the extension webbing, starting at the top center extension seam, 3 meshes back from the leading edge and 16 meshes to the left and to the right (total of four openings). The four escape openings must be double selvaged for strength.

(g) *Alternative Method for Constructing the Funnel and Escape Openings*. The following method for constructing the funnel and escape openings may be used instead of the method described in paragraphs F.2.d., F.2.e., and F.2.f. of this section. With this alternative method, the funnel and escape openings are formed by cutting a flap in each side of the extension webbing; pushing the flaps inward; and attaching the top and bottom edges along the bars of the extension webbing to form the v-shape of the funnel. Minimum requirements applicable to this method include: (1) The funnel's top and bottom back edges must be attached one mesh behind the 28-inch (71.1-cm) cable hoop (front hoop); (2) clearance between the side of the

funnel and the 28-inch (71.1-cm) cable hoop (front hoop) must be at least 6 inches (15.2 cm) when measured in the hanging position; (3) the leading edge of the escape opening must be located within 18 inches (45.7 cm) of the posterior edge of the turtle excluder device (TED) grid; and, (4) the area of the escape opening must total at least 864 in² (5,574.2 cm²). To construct the funnel and escape openings using this method, begin $3\frac{1}{2}$ meshes from the leading edge of the extension, at the top center seam, count over 18 meshes on each side, and cut 13 meshes toward the back of the extension. Turn parallel to the leading edge, and cut 26 meshes toward the bottom center of the extension. Next, turn parallel to the top center seam, and cut 13 meshes forward toward the leading edge, creating a flap of webbing 13 meshes by 26 meshes by 13 meshes. Lengthen the flap to 18 meshes by adding a $4\frac{1}{2}$ -mesh by 26-mesh rectangular section of webbing to the 26-mesh edge. Attach the 18-mesh edges to the top and bottom of the extension by sewing 2 bars of the extension to 1 mesh on the flap in toward the top center and bottom center of the extension, forming the exit opening and the funnel. Connect the two flaps together in the center with a 7-inch piece of number 42 twine to allow adequate clearance for fish escapement between the flaps and the side openings. On each side, sew a 6-mesh by $10\frac{1}{2}$ -mesh section of webbing to 6 meshes of the center of the 26-mesh cut on the extension and 6 meshes centered between the 13-mesh cuts $3\frac{1}{2}$ meshes from the leading edge. This forms two 10-mesh by 13-mesh openings on each side.

(h) *Cone fish deflector*. The cone fish deflector is constructed of 2 pieces of $1\frac{1}{8}$ -inch (4.13-cm) polypropylene or polyethylene webbing, 40 meshes wide by 20 meshes in length and cut on the bar on each side forming a triangle. Starting at the apex of the two triangles, the two pieces must be sewn together to form a cone of webbing. The apex of the cone fish deflector must be positioned within 10–14 inches (25.4–35.6 cm) of the posterior edge of the funnel.

(i) *11-inch (27.9-cm) cable hoop for cone deflector*. A single hoop must be constructed of $\frac{1}{8}$ -inch (0.79-cm) or $\frac{3}{8}$ -inch (0.95-cm) cable $34\frac{1}{2}$ inches (87.6 cm) in length. The ends must be joined by a 3-inch (7.6-cm) piece of $\frac{3}{8}$ -inch (0.95-cm) aluminum pipe pressed together with a $\frac{1}{4}$ -inch (0.64-cm) die. The hoop must be inserted in the webbing cone, attached 10 meshes from the apex and laced all the way around with heavy twine.

(j) *Installation of the cone in the extension*. The cone must be installed in the extension 12 inches (30.5 cm) behind the back edge of the funnel and attached in four places. The midpoint of a piece of number 60 twine 4 ft (1.22 m) in length must be attached to the apex of the cone. This piece of twine must be attached to the 28-inch (71.1-cm) cable hoop

Pt. 635

at the center of each of its sides; the points of attachment for the two pieces of twine must be measured 20 inches (50.8 cm) from the midpoint attachment. Two 8-inch (20.3-cm) pieces of number 60 twine must be attached to the top and bottom of the 11-inch (27.9-cm) cone hoop. The opposite ends of these two pieces of twine must be attached to the top and bottom center of the 24-inch (61-cm) cable hoop; the points of attachment for the two pieces of twine must be measured 4 inches (10.2 cm) from the points where they are tied to the 11-inch (27.9-cm) cone hoop.

APPENDIX A TO PART 635—SPECIES TABLES

AUTHORITY: 16 U.S.C. 971 *et seq.*; 16 U.S.C. 1801 *et seq.*

SOURCE: 64 FR 29135, May 28, 1999, unless otherwise noted.

Subpart A—General

§ 635.1 Purpose and scope.

(a) The regulations in this part govern the conservation and management of Atlantic tunas, Atlantic billfish, Atlantic sharks, and Atlantic swordfish under the authority of the Magnuson-Stevens Act and ATCA. They implement the Fishery Management Plan for Atlantic Tunas, Swordfish, and Sharks, and the Fishery Management Plan for Atlantic Billfishes. The Atlantic tunas regulations govern conservation and management of Atlantic tunas in the management unit. The Atlantic billfish regulations govern conservation and management of Atlantic billfish in the management unit. The Atlantic swordfish regulations govern conservation and management of North and South Atlantic swordfish in the management unit. North Atlantic swordfish are managed under the authority of both ATCA and the Magnuson-Stevens Act. South Atlantic swordfish are managed under the sole authority of ATCA. The shark regulations govern conservation and management of sharks in the management unit, solely under the authority of the Magnuson-Stevens Act. Sharks are managed under the authority of the Magnuson-Stevens Act.

(b) Under section 9(d) of ATCA, NMFS has determined that the regulations contained in this part with respect to Atlantic tunas are applicable within the territorial sea of the United States adjacent to, and within the boundaries of, the States of New Hampshire, Massachusetts, Rhode Island, New York, New Jersey, Delaware, Maryland, Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Louisiana and Texas, and the Commonwealths of Puerto Rico and

the Virgin Islands. NMFS will undertake a continuing review of State regulations to determine if regulations applicable to Atlantic tunas, swordfish or billfish are at least as restrictive as regulations contained in this part and if such regulations are effectively enforced. In such case, NMFS will file with the Office of the Federal Register for publication notification of the basis for the determination and of the specific regulations that shall or shall not apply in the territorial sea of the identified State.

§ 635.2 Definitions.

In addition to the definitions in the Magnuson-Stevens Act, ATCA, and § 600.10 of this chapter, the terms used in this part have following meanings. If applicable, the terms used in this part supercede those used in § 600.10:

Archival tag means a device that is implanted or affixed to a fish to electronically record scientific information about the migratory behavior of that fish.

ATCA Certificate of Eligibility (COE) means the certificate that must accompany any applicable shipment of fish pursuant to a finding under 16 U.S.C. 971d (c)(4) or (c)(5).

Atlantic HMS means Atlantic tunas, billfish, sharks, and swordfish.

Atlantic Ocean, as used in this part, includes the North and South Atlantic Oceans, the Gulf of Mexico, and the Caribbean Sea.

BFT landings quota means the portion of the ICCAT BFT catch quota allocated to the United States against which landings of BFT are counted.

Billfish Certificate of Eligibility (COE) means a certificate that accompanies a shipment of billfish indicating that the billfish or related species, or parts thereof, are not from the respective Atlantic Ocean management units.

Bottom longline means a longline that is deployed with enough weights and/or anchors to maintain contact with the ocean bottom.

BSD tag means a numbered tag affixed to a BFT issued by any country in conjunction with a catch statistics information program and recorded on a BSD.

Caudal keel means the horizontal ridges along each side of a fish at the base of the tail fin.

CFL (curved fork length) means the length of a fish measured from the tip of the upper jaw to the fork of the tail along the contour of the body in a line that runs along the top of the pectoral fin and the top of the caudal keel.

Charleston Bump closed area means the Atlantic Ocean area seaward of the inner boundary of the U.S. EEZ from a point intersecting the inner boundary of the U.S. EEZ at 34°00' N. lat. near Wilmington Beach, NC, and proceeding due east to connect by straight lines the following coordinates in the order stated: 34°00' N. lat., 76°00' W. long.; 31°00' N. lat., 76°00' W. long.; then proceeding due west to intersect the inner boundary of the U.S. EEZ at 31°00' N. lat. near Jekyll Island, GA.

Circle hook means a fishing hook originally designed and manufactured so that the point is turned perpendicularly back to the shank to form a generally circular, or oval, shape.

CK means the length of a fish measured along the body contour, i.e., a curved measurement, from the point on the cleithrum that provides the shortest possible measurement along the body contour to the anterior portion of the caudal keel. The cleithrum is the semicircular bony structure at the posterior edge of the gill opening.

Convention means the International Convention for the Conservation of Atlantic Tunas, signed at Rio de Janeiro, Brazil, on May 14, 1966, 20 U.S.T. 2887, TIAS 6767, including any amendments or protocols thereto, which are binding upon the United States.

Conventional tag means a numbered, flexible ribbon that is implanted or affixed to a fish that is released back into the ocean that allows for the identification of that fish in the event it is recaptured.

Corrodible Hook means a fishing hook composed of any material other than stainless steel.

Dealer tag means the numbered, flexible, self-locking ribbon issued by NMFS for the identification of BFT sold to a permitted dealer as required under § 635.5(b)(2)(ii).

Dehooking device means a device intended to remove a hook embedded in a

§ 635.2

50 CFR Ch. VI (10–1–05 Edition)

fish in order to release the fish with minimum damage.

Designated by NMFS means the address or location indicated in a letter to permit holders or in a letter accompanying reporting forms.

DeSoto Canyon closed area means the area within the Gulf of Mexico bounded by straight lines connecting the following coordinates in the order stated: 30°00' N. lat., 88°00' W. long.; 30°00' N. lat., 86°00' W. long.; 28°00' N. lat., 86°00' W. long.; 28°00' N. lat., 84°00' W. long.; 26°00' N. lat., 84°00' W. long.; 26°00' N. lat., 86°00' W. long.; 28°00' N. lat., 86°00' W. long.; 28°00' N. lat., 88°00' W. long.; 30°00' N. lat., 88°00' W. long.

Display permit means a permit issued in order to catch and land HMS for the purpose of public display pursuant to § 635.32.

Division Chief means the Chief, Highly Migratory Species Management Division, NMFS (F/SF1), 1315 East-West Highway, Silver Spring, MD, 20910; (301) 713-2347.

Downrigger means a piece of equipment attached to a vessel and with a weight on a cable that is in turn attached to hook-and-line gear to maintain lures or bait at depth while trolling. The downrigger has a release system to retrieve the weight by rod and reel or by manual, electric, or hydraulic winch after a fish strike on the hook-and-line gear.

Dress means to process a fish by removal of head, viscera, and fins, but does not include removal of the backbone, halving, quartering, or otherwise further reducing the carcass.

Dressed weight (dw) means the weight of a fish after it has been dressed.

East Florida Coast closed area means the Atlantic Ocean area seaward of the inner boundary of the U.S. EEZ from a point intersecting the inner boundary of the U.S. EEZ at 31°00' N. lat. near Jeckyll Island, GA, and proceeding due east to connect by straight lines the following coordinates in the order stated: 31°00' N. lat., 78°00' W. long.; 28°17' N. lat., 79°12' W. long.; then proceeding along the outer boundary of the EEZ to the intersection of the EEZ with 24°00' N. lat.; then proceeding due west to the following coordinates: 24°00' N. lat., 81°47' W. long.; then proceeding due north to intersect the inner boundary

of the U.S. EEZ at 81°47' W. long. near Key West, FL.

EFP means an exempted fishing permit issued pursuant to § 600.745 of this chapter or to § 635.32.

Eviscerated means a fish that has only the alimentary organs removed.

Export, for purposes of this subpart, means to effect exportation.

Exportation has the same general meaning as 19 CFR 101.1 and generally refers to a severance of goods from the mass of things belonging to one country with the intention of uniting them to the mass of things belonging to some foreign country. For purposes of this subpart, a shipment between the United States and its insular possessions is not an export.

Exporter, for purposes of this subpart, is the principal party in interest, meaning the party that receives the primary benefit, monetary or otherwise, of the export transaction. For exports from the United States, the exporter is the U.S. principal party in interest, as identified in Part 30 of title 15 of the CFR. An exporter is subject to the requirements of this subpart, even if exports are exempt from statistical reporting requirements under Part 30 of title 15 of the CFR.

Finlet means one of the small individual fins on a tuna located behind the second dorsal and anal fins and forward of the tail fin.

First transaction in the United States means the time and place at which a fish is filleted, cut into steaks, or processed in any way that physically alters it after being landed in or imported into the United States.

Fishing record means all records of navigation and operations of a fishing vessel, as well as all records of catching, harvesting, transporting, landing, purchasing, or selling a fish.

Fishing vessel means any vessel engaged in fishing, processing, or transporting fish loaded on the high seas, or any vessel outfitted for such activities.

Fishing year means—

(1) For Atlantic tunas, billfish, and swordfish—June 1 through May 31 of the following year; and

(2) For sharks—January 1 through December 31.

FL (fork length) means the straight-line measurement of a fish from the tip

of the snout to the fork of the tail. The measurement is not made along the curve of the body.

Floatline means a line attached to a buoyant object that is used to support the mainline of a longline at a specific target depth.

For-hire trip means a recreational fishing trip taken by a vessel with an Atlantic HMS Charter/Headboat permit during which paying passenger(s) are aboard; or, for uninspected vessels, trips during which there are more than three persons aboard, including operator and crew; or, for vessels that have been issued a Certificate of Inspection by the U.S. Coast Guard to carry passengers for hire, trips during which there are more persons aboard than the number of crew specified on the vessel's Certificate of Inspection.

Freeboard is defined as the working distance between the top rail of the gunwale to the water's surface, and will vary based on the vessel design.

Gangion means a line that serves to attach a hook, suspended at a specific target depth, to the mainline of a longline.

Giant BFT means an Atlantic BFT measuring 81 inches (206 cm) CFL or greater.

Handgear means handline, harpoon, rod and reel or bandit gear.

Handline means fishing gear that consists of a mainline to which no more than two leaders (gangions) with hooks are attached, and that is released and retrieved by hand, rather than by mechanical means.

High-flyer means a flag, radar reflector or radio beacon transmitter, suitable for attachment to a longline to facilitate its location and retrieval.

Highly migratory species (HMS) means bluefin, bigeye, yellowfin, albacore, and skipjack tunas; swordfish; sharks (listed in appendix A to this part); white marlin; blue marlin; sailfish; and longbill spearfish.

ILAP means an initial limited access permit issued pursuant to § 635.4.

Import, for purposes of this subpart, generally means the act of bringing or causing any goods to be brought into the customs territory of a country with the intent to unlade them. For purposes of this subpart, goods brought into the United States from a U.S. in-

sular possession, or vice-versa, are not considered imports.

Importer, for purposes of this subpart, means the principal party responsible for the import of product into a country. For imports into the United States, and for purposes of this subpart, "importer" means the consignee as identified on entry documentation or any authorized, equivalent electronic medium required for release of shipments, or any authorized equivalent entry documentation from the customs authority of the United States or the separate customs territory of a U.S. insular possession. If a consignee is not declared, then the importer of record is considered to be the consignee.

LAP means a limited access permit issued pursuant to § 635.4.

Large coastal shark (LCS) means one of the species, or a part thereof, listed in paragraph (a) of table 1 in appendix A to this part.

Large medium BFT means a BFT measuring at least 73 inches (185 cm) and less than 81 inches (206 cm) CFL.

Large school BFT means a BFT measuring at least 47 inches (119 cm) and less than 59 inches (150 cm) CFL.

LJFL (lower jaw-fork length) means the straight-line measurement of a fish from the tip of the lower jaw to the fork of the caudal fin. The measurement is not made along the curve of the body.

Longline means fishing gear that is set horizontally, either anchored, floating, or attached to a vessel, and that consists of a mainline or groundline with three or more leaders (gangions) and hooks, whether retrieved by hand or mechanical means.

Management unit means in this part:

(1) For Atlantic tunas, longbill spearfish, blue marlin and white marlin, means all fish of these species in the Atlantic Ocean;

(2) For sailfish, means all fish of this species in the Atlantic Ocean west of 30° W. long.;

(3) For North Atlantic swordfish, means all fish of this species in the Atlantic Ocean north of 5° N. lat.;

(4) For South Atlantic swordfish, means all fish of this species in the Atlantic Ocean south of 5° N. lat.; and

(5) For sharks, means all fish of these species in the western north Atlantic Ocean, including the Gulf of Mexico and the Caribbean Sea, excluding those species listed in Table 2 of Appendix A.

Mid-Atlantic Bight means the area bounded by straight lines connecting the mid-Atlantic states' internal waters and extending to 71° W. long. between 35° N. lat. and 43° N. lat.

Mid-Atlantic shark closed area means the Atlantic Ocean area seaward of the inner boundary of the U.S. EEZ from a point intersecting the inner boundary of the U.S. EEZ at 35°41' N. lat. just south of Oregon Inlet, North Carolina, and connecting by straight lines the following coordinates in the order stated: 35°41' N. lat., 75°25' W. long. proceeding due east to 35°41' N. lat., 74°51' W. long.; then proceeding southeast to 35°30' N. lat., 74°46' W. long.; then proceeding southwest, roughly following the 55 fathom mark, to 33°51' N. lat., 76°24' W. long.; then proceeding due west to intersect the inner boundary of the U.S. EEZ at 33°51' N. lat., 77°53' W. long. near Cape Fear, North Carolina.

Net check refers to a visual inspection of a shark gillnet where the vessel operator transits the length of the gear and inspects it either with a spotlight or by pulling up the gear.

Non-ridgeback large coastal shark means one of the species, or a part thereof, listed in paragraph (a)(2) of table 1 in appendix A to this part.

North Atlantic swordfish or North Atlantic swordfish stock means those swordfish occurring in the Atlantic Ocean north of 5° N. lat.

Northeast Distant closed area means the Atlantic Ocean area bounded by straight lines connecting the following coordinates in the order stated: 35°00' N. lat., 60°00' W. long.; 55°00' N. lat., 60°00' W. long.; 55°00' N. lat., 20°00' W. long.; 35°00' N. lat., 20°00' W. long.; 35°00' N. lat., 60°00' W. long.

Northeastern United States closed area means the area bounded by straight lines connecting the following coordinates in the order stated: 40°00' N. lat., 74°00' W. long.; 40°00' N. lat., 68°00' W. long.; 39°00' N. lat., 68°00' W. long.; and 39°00' N. lat., 74°00' W. long.

Offset circle hook means a circle hook originally designed and manufactured so that the barbed end of the hook is

displaced relative to the parallel plane of the eyed-end, or shank, of the hook when laid on its side.

Operator, with respect to any vessel, means the master or other individual aboard and in charge of that vessel.

Pectoral fin means the fin located behind the gill cover on either side of a fish.

Pelagic longline means a longline that is suspended by floats in the water column and that is not fixed to or in contact with the ocean bottom.

Pelagic shark means one of the species, or a part thereof, listed in paragraph (c) of table 1 in appendix A to this part.

PFCFL (pectoral fin curved fork length) means the length of a beheaded fish from the dorsal insertion of the pectoral fin to the fork of the tail measured along the contour of the body in a line that runs along the top of the pectoral fin and the top of the caudal keel.

Prohibited shark means one of the species, or a part thereof, listed in paragraph (d) of table 1 in appendix A to this part.

Restricted-fishing day (RFD) means a day, beginning at 0000 hours and ending at 2400 hours local time, during which a person aboard a vessel for which a General category permit for Atlantic Tunas has been issued may not fish for, possess, or retain a BFT.

Ridgeback large coastal shark means one of the species, or a part thereof, listed in paragraph (a)(1) of table 1 in appendix A to this part.

School BFT means a BFT measuring at least 27 inches (69 cm) and less than 47 inches (119 cm) CFL.

Shark means one of the oceanic species, or a part thereof, listed in tables 1 and 2 in appendix A to this part.

Small coastal shark (SCS) means one of the species, or a part thereof, listed in paragraph (b) of table 1 in appendix A to this part.

Small medium BFT means a BFT measuring at least 59 inches (150 cm) and less than 73 inches (185 cm) CFL.

South Atlantic swordfish or south Atlantic swordfish stock means those swordfish occurring in the Atlantic Ocean south of 5° N. lat.

Tournament means any fishing competition involving Atlantic HMS in

Fishery Conservation and Management

§ 635.4

which participants must register or otherwise enter or in which a prize or award is offered for catching or landing such fish.

Tournament operator means a person or entity responsible for maintaining records of participants and results used for awarding tournament points or prizes, regardless of whether fish are retained.

Trip limit means the total allowable take from a single trip as defined in § 600.10 of this chapter.

Tuna or tuna-like means the Scombriformes (with the exception of families Trichiuridae and Gempylidae and the genus Scomber) and such other species of fishes that are regulated by ICCAT in the Atlantic Ocean.

Weighout slip means a document provided to the owner or operator of the vessel by a person who weighs fish or parts thereof that are landed from a fishing vessel. A document, such as a “tally sheet,” “trip ticket,” or “sales receipt,” that contains such information is considered a weighout slip.

Young school BFT means an Atlantic BFT measuring less than 27 inches (69 cm) CFL.

[64 FR 29135, May 28, 1999, as amended at 65 FR 47237, Aug. 1, 2000; 66 FR 8904, Feb. 5, 2001; 67 FR 45400, July 9, 2002; 67 FR 77436, Dec. 18, 2002; 68 FR 74784, Dec. 24, 2003; 69 FR 40754, July 6, 2004; 69 FR 67283, Nov. 17, 2004; 69 FR 70399, Dec. 6, 2004]

§ 635.3 Relation to other laws.

(a) The relation of this part to other laws is set forth in § 600.705 of this chapter and in paragraphs (b) and (c) of this section.

(b) In accordance with regulations issued under the Marine Mammal Protection Act of 1972, as amended, it is unlawful for a commercial fishing vessel, a vessel owner, or a master or operator of a vessel to engage in fisheries for HMS in the Atlantic Ocean, unless the vessel owner or authorized representative has complied with specified requirements including, but not limited to, registration, exemption certificates, decals, and reports, as contained in part 229 of this title.

(c) General provisions on facilitation of enforcement, penalties, and enforcement policy applicable to all domestic fisheries are set forth in §§ 600.730,

600.735, and § 600.740 of this chapter, respectively.

(d) An activity that is otherwise prohibited by this part may be conducted if authorized as scientific research activity, exempted fishing or exempted educational activity, or for public display, as specified in § 635.32.

[64 FR 29135, May 28, 1999, as amended at 68 FR 74784, Dec. 24, 2003]

§ 635.4 Permits and fees.

Information on permits and permit requirements may be obtained from the Division Chief or where otherwise stated in this part.

(a) *General.* (1) *Authorized activities.* Each permit issued by NMFS authorizes certain activities, and persons may not conduct these activities without the appropriate permit, unless otherwise authorized by NMFS in accordance with this part. In certain cases, additional permits may be required to authorize these same or related activities under federal, state or local jurisdictions.

(2) *Vessel permit inspection.* The owner or operator of a vessel of the United States must have the appropriate valid permit on board the vessel to fish for, take, retain, or possess Atlantic HMS when engaged in recreational fishing and to fish for, take, retain or possess Atlantic tunas, swordfish, or sharks when engaged in commercial fishing. The vessel operator must make such permit available for inspection upon request by NMFS or by a person authorized by NMFS. The owner of the vessel is responsible for satisfying all of the requirements associated with obtaining, maintaining, and making available for inspection all required vessel permits.

(3) *Property rights.* Limited access vessel permits or any other permit issued pursuant to this part do not represent either an absolute right to the resource or any interest that is subject to the takings provision of the Fifth Amendment of the U.S. Constitution. Rather, limited access vessel permits represent only a harvesting privilege that may be revoked, suspended, or amended subject to the requirements of the Magnuson-Stevens Act or other applicable law.

(4) *Dealer permit inspection.* A dealer permit issued under this section, or a copy thereof, must be available at each of the dealer's places of business. A dealer must present the permit or a copy for inspection upon the request of a NMFS-authorized officer.

(5) *Display upon offloading.* Upon transfer of Atlantic HMS, the owner or operator of the harvesting vessel must present for inspection the vessel's HMS Charter/Headboat permit and/or Atlantic tunas, shark, or swordfish permit to the receiving dealer. The permit must be presented prior to completing any applicable landing report specified at § 635.5(a)(1), (a)(2) and (b)(2)(i).

(6) *Sanctions and denials.* A permit issued under this section may be revoked, suspended, or modified, and a permit application may be denied, in accordance with the procedures governing enforcement-related permit sanctions and denials found at subpart D of 15 CFR part 904.

(7) *Alteration.* A vessel or dealer permit that is altered, erased, mutilated, or otherwise modified is invalid.

(8) *Replacement.* NMFS may issue a replacement permit upon the request of the permittee. An application for a replacement permit will not be considered a new application. An appropriate fee, consistent with paragraph (b) of this section, may be charged for issuance of the replacement permit.

(9) *Fees.* NMFS may charge a fee for each application for a permit or for each transfer or replacement of a permit. The amount of the fee is calculated in accordance with the procedures of the NOAA Finance Handbook, available from NMFS, for determining administrative costs of each special product or service. The fee may not exceed such costs and is specified in the instructions provided with each application form. Each applicant must include the appropriate fee with each application or request for transfer or replacement. A permit will not be issued to anyone who fails to pay the fee.

(10) *Permit condition.* An owner issued a swordfish or shark permit pursuant to this part must agree, as a condition of such permit, that the vessel's swordfish or shark fishing, catch and gear are subject to the requirements of this part during the period of validity of the

permit, without regard to whether such fishing occurs in the EEZ, or outside the EEZ, and without regard to where such swordfish or shark, or gear are possessed, taken or landed. However, when a vessel fishes within the waters of a state that has more restrictive regulations on swordfish or shark fishing, persons aboard the vessel must abide by the state's more restrictive regulations.

(b) *HMS Charter/Headboat permits.* (1) The owner of a charter boat or headboat used to fish for, take, retain, or possess any Atlantic HMS must obtain an HMS Charter/Headboat permit. A vessel issued an HMS Charter/Headboat permit for a fishing year shall not be issued an HMS Angling permit or an Atlantic Tunas permit in any category for that same fishing year, regardless of a change in the vessel's ownership.

(2) While persons aboard a vessel that has been issued an HMS Charter/Headboat permit are fishing for or are in possession of Atlantic HMS, the operator of the vessel must have a valid Merchant Marine License or Uninspected Passenger Vessel License, as applicable, issued by the U.S. Coast Guard pursuant to regulations at 46 CFR part 10. Such Coast Guard license must be carried on board the vessel.

(c) *HMS Angling permits.* (1) The owner of any vessel used to fish recreationally for Atlantic HMS or on which Atlantic HMS are retained or possessed recreationally, must obtain an HMS Angling permit, except as provided in § 635.4(c)(2). Atlantic HMS caught, retained, possessed, or landed by persons on board vessels with an HMS Angling permit may not be sold or transferred to any person for a commercial purpose. A vessel issued an HMS Angling permit for a fishing year shall not be issued an HMS Charter/Headboat permit or an Atlantic Tunas permit in any category for that same fishing year, regardless of a change in the vessel's ownership.

(2) A vessel issued an Atlantic Tunas General category permit under paragraph (d) of this section may fish in a recreational HMS fishing tournament if the vessel has registered for, paid an entry fee to, and is fishing under the rules of a tournament that has notified

Fishery Conservation and Management

§ 635.4

NMFS as required under §635.5(d). When a vessel issued an Atlantic Tunas General category permit is fishing in such a tournament, such vessel must comply with HMS Angling category regulations, except as provided in §635.4(c)(3).

(3) A vessel issued an Atlantic Tunas General category permit fishing in a tournament, as authorized under §635.4(c)(2), shall comply with Atlantic Tunas General category regulations when fishing for, retaining, possessing, or landing Atlantic tunas.

(d) *Atlantic Tunas vessel permits.* (1) The owner of each vessel used to fish for or take Atlantic tunas commercially or on which Atlantic tunas are retained or possessed with the intention of sale must obtain an HMS Charter/Headboat permit issued under paragraph (b) of this section, or an Atlantic tunas permit in one, and only one, of the following categories: General, Harpoon, Longline, Purse Seine, or Trap.

(2) Persons aboard a vessel with a valid Atlantic Tunas, HMS Angling, or HMS Charter/Headboat permit may fish for, take, retain, or possess Atlantic tunas, but only in compliance with the quotas, catch limits, size classes, and gear applicable to the permit category of the vessel from which he or she is fishing. Persons may sell Atlantic tunas only if the harvesting vessel has a valid permit in the General, Harpoon, Longline, Purse Seine, or Trap category of the Atlantic Tunas permit or a valid HMS Charter/Headboat permit.

(3) A vessel issued an Atlantic Tunas permit in any category for a fishing year shall not be issued an HMS Angling permit, HMS Charter/Headboat permit, or an Atlantic Tunas permit in any other category for that same fishing year, regardless of a change in the vessel's ownership.

(4) A person can obtain an Atlantic Tunas Longline category permit for a vessel only if the vessel has been issued both a limited access permit for shark and a limited access permit for swordfish. NMFS will issue Atlantic Tunas Longline category permits to qualifying vessels in calendar year 1999. Thereafter, such permits may be obtained through transfer from current

owners consistent with the provisions under paragraph (1)(2) of this section.

(5) An owner of a vessel with an Atlantic Tunas permit in the Purse Seine category may transfer the permit to another purse seine vessel that he or she owns. In either case, the owner must submit a written request for transfer to NMFS, to an address designated by NMFS, and attach an application for the new vessel and the existing permit. NMFS will issue no more than 5 Atlantic Tunas Purse Seine category permits.

(e) *Shark vessel LAPs.* (1) As of July 1, 1999, the only valid Federal commercial vessel permits for shark are those that have been issued under the limited access criteria specified in §635.16.

(2) The owner of each vessel used to fish for or take Atlantic sharks or on which Atlantic sharks are retained, possessed with an intention to sell, or sold must obtain, in addition to any other required permits, only one of two types of commercial limited access shark permits: Shark directed limited access permit or shark incidental limited access permit. See §635.16 regarding the initial issuance of these two types of permits. It is a rebuttable presumption that the owner or operator of a vessel on which sharks are possessed in excess of the recreational retention limits intends to sell the sharks.

(3) A commercial limited access permit for sharks is not required if the vessel is recreational fishing and retains no more sharks than the recreational retention limit, is operating pursuant to the conditions of a shark EFP, or that fishes exclusively within state waters.

(f) *Swordfish vessel LAPs.*

(1) The owner of each vessel used to fish for or take Atlantic swordfish or on which Atlantic swordfish are retained, possessed with an intention to sell, or sold must obtain, in addition to any other required permits, only one of three types of commercial limited access swordfish permits: swordfish directed limited access permit, swordfish incidental limited access permit, or swordfish handgear limited access permit. See §635.16 regarding the initial issuance of these three types of permits.

(2) As of July 1, 1999, the only valid commercial Federal vessel permits for swordfish are those that have been issued under the limited access criteria specified in § 635.16.

(3) A commercial Federal permit for swordfish is not required if the vessel is recreational fishing.

(4) Unless the owner has been issued a swordfish handgear permit, a limited access permit for swordfish is valid only when the vessel has on board a valid limited access permit for shark and a valid Atlantic Tunas Longline category permit issued for such vessel.

(g) *Dealer permits*—(1) *Atlantic tunas*. A person that receives, purchases, trades for, or barter for Atlantic tunas from a fishing vessel of the United States, as defined under § 600.10 of this chapter, must possess a valid dealer permit.

(2) *Shark*. A person that receives, purchases, trades for, or barter for Atlantic sharks from a fishing vessel of the United States, as defined under § 600.10 of this chapter, must possess a valid dealer permit.

(3) *Swordfish*. A person that receives, purchases, trades for, or barter for Atlantic swordfish from a fishing vessel of the United States, as defined under § 600.10 of this chapter, must possess a valid dealer permit.

(h) *Applications for permits*. An owner of a vessel or a dealer must submit to NMFS, at an address designated by NMFS, a complete application and required supporting documents at least 30 days before the date on which the permit is to be made effective. Application forms and instructions for their completion are available from NMFS.

(1) *Atlantic Tunas, HMS Angling, and HMS Charter/Headboat vessel permits*. (i) An applicant must provide all information concerning his or her identification, vessel, gear used, fishing areas, fisheries participated in, the corporation or partnership owning the vessel, and income requirements requested by NMFS and included on the application form.

(ii) An applicant must also submit a copy of the vessel's valid U.S. Coast Guard documentation or, if not documented, a copy of its valid state registration and any other information that may be necessary for the issuance

or administration of the permit as requested by NMFS. The owner must submit such information to an address designated by NMFS.

(iii) NMFS may require an applicant to provide documentation supporting the application before a permit is issued or to substantiate why such permit should not be revoked or otherwise sanctioned under paragraph (a)(7) of this section.

(2) *Limited access permits for swordfish and shark*. See § 635.16 for the issuance of ILAPs for shark and swordfish. See paragraph (l) of this section for transfers of ILAPs and LAPs for shark and swordfish. See paragraph (m) of this section for renewals of LAPs for shark and swordfish.

(3) *Dealer permits*. (i) An applicant for a dealer permit must provide all the information requested on the application form necessary to identify the company, its principal place of business, and mechanisms by which the company can be contacted.

(ii) An applicant must also submit a copy of each state wholesaler's license held by the dealer and, if a business is owned by a corporation or partnership, the corporate or partnership documents requested on the application form.

(iii) An applicant must also submit any other information that may be necessary for the issuance or administration of the permit, as requested by NMFS.

(i) *Change in application information*. A vessel owner or dealer must report any change in the information contained in an application for a permit within 30 days after such change. The report must be submitted in writing to NMFS, to an address designated by NMFS with the issuance of each permit. In the case of a vessel permit for Atlantic tunas or an HMS Charter/Headboat permit, the vessel owner or operator must report the change by phone or internet to a number or website designated by NMFS. A new permit will be issued to incorporate the new information, subject to limited access provisions specified in paragraph (l)(2) of this section. For certain information changes, NMFS may require supporting documentation before a new permit will be issued. If a change in the

permit information is not reported within 30 days, the permit is void as of the 31st day after such change.

(j) *Permit issuance.* (1) NMFS will issue a permit within 30 days of receipt of a complete and qualifying application. An application is complete when all requested forms, information, and documentation have been received, including all reports and fishing or catch information required to be submitted under this part.

(2) NMFS will notify the applicant of any deficiency in the application, including failure to provide information or reports required to be submitted under this part. If the applicant fails to correct the deficiency within 30 days following the date of notification, the application will be considered abandoned.

(3) Except for Atlantic Tunas Longline and Purse Seine category permits, a vessel owner issued a permit under paragraphs (b), (c), or (d) of this section may change the category of the vessel's permit within 10-calendar days of the date of issuance of the permit. Beyond 10 calendar days after the date of issuance of the permit, no permit category changes may be made.

(k) *Duration.* A permit issued under this section will be valid for the period specified on it unless it is revoked, suspended, or modified pursuant to subpart D of 15 CFR part 904, the vessel or dealership is sold, or any other information previously submitted on the application changes, as specified in paragraph (i) of this section.

(l) *Transfer—(1) General.* A permit issued under this section is not transferable or assignable to another vessel or owner or dealer; it is valid only for the vessel or owner or dealer to whom it is issued. If a person acquires a vessel or dealership and wants to conduct activities for which a permit is required, that person must apply for a permit in accordance with the provisions of paragraph (h) of this section or, if the acquired vessel is permitted in either the shark, swordfish or tuna longline fishery, in accordance with paragraph (1)(2) of this section. If the acquired vessel or dealership is currently permitted, an application must be accompanied by the original permit

and by a copy of a signed bill of sale or equivalent acquisition papers.

(2) *Shark, swordfish, and tuna longline LAPs.* (i) Subject to the restrictions on upgrading the harvesting capacity of permitted vessels in paragraph (1)(2)(ii) of this section and to the limitations on ownership of permitted vessels in paragraph (1)(2)(iii) of this section, an owner may transfer a shark or swordfish ILAP or LAP or an Atlantic Tunas Longline category permit to another vessel that he or she owns or to another person. Directed handgear ILAPs and LAPs for swordfish may be transferred to another vessel but only for use with handgear and subject to the upgrading restrictions in paragraph (1)(2)(ii) of this section and the limitations on ownership of permitted vessels in paragraph (1)(2)(iii) of this section. Incidental catch ILAPs and LAPs are not subject to the requirements specified in paragraphs (1)(2)(ii) and (1)(2)(iii) of this section.

(ii) An owner may upgrade a vessel with a shark, swordfish, or tuna longline limited access permit, or transfer the limited access permit to another vessel, and be eligible to retain or renew a limited access permit only if the upgrade or transfer does not result in an increase in horsepower of more than 20 percent or an increase of more than 10 percent in length overall, gross registered tonnage, or net tonnage from the vessel baseline specifications.

(A) The vessel baseline specifications are the respective specifications (length overall, gross registered tonnage, net tonnage, horsepower) of the first vessel that was issued an initial limited access permit or, if applicable, of that vessel's replacement owned as of May 28, 1999.

(B) The vessel's horsepower may be increased only once subsequent to the issuance of a limited access permit, whether through refitting, replacement, or transfer. Such an increase may not exceed 20 percent of the horsepower of the vessel's baseline specifications, as applicable.

(C) The vessel's length overall, gross registered tonnage, and net tonnage may be increased only once subsequent

to the issuance of a limited access permit, whether through refitting, replacement, or transfer. Any increase in any of these three specifications of vessel size may not exceed 10 percent of the vessel's baseline specifications, as applicable. If any of these three specifications is increased, any increase in the other two must be performed at the same time. This type of upgrade may be done separately from an engine horsepower upgrade.

(iii) No person or entity may own or control more than 5 percent of the vessels for which swordfish directed, shark directed or tuna longline limited access permits have been issued.

(iv) In order to transfer a swordfish, shark or tuna longline limited access permit to a replacement vessel, the owner of the vessel issued the limited access permit must submit a request to NMFS, at an address designated by NMFS, to transfer the limited access permit to another vessel, subject to requirements specified in paragraph (1)(2)(ii) of this section, if applicable. The owner must return the current valid limited access permit to NMFS with a complete application for a limited access permit, as specified in paragraph (h) of this section, for the replacement vessel. Copies of both vessels' U.S. Coast Guard documentation or state registration must accompany the application.

(v) For swordfish, shark, and tuna longline limited access permit transfers to a different person, the transferee must submit a request to NMFS, at an address designated by NMFS, to transfer the original limited access permit(s), subject to requirements specified in paragraphs (1)(2)(ii) and (1)(2)(iii) of this section, if applicable. The following must accompany the completed application: The original limited access permit(s) with signatures of both parties to the transaction on the back of the permit(s) and the bill of sale for the permit(s). A person must include copies of both vessels' U.S. Coast Guard documentation or state registration for limited access permit transfers involving vessels.

(vi) For limited access permit transfers in conjunction with the sale of the permitted vessel, the transferee of the vessel and limited access permit(s)

issued to that vessel must submit a request to NMFS, at an address designated by NMFS, to transfer the limited access permit(s), subject to requirements specified in paragraphs (1)(2)(ii) and (1)(2)(iii) of this section, if applicable. The following must accompany the completed application: The original limited access permit(s) with signatures of both parties to the transaction on the back of the permit(s), the bill of sale for the limited access permit(s) and the vessel, and a copy of the vessel's U.S. Coast Guard documentation or state registration.

(vii) The owner of a vessel issued a limited access permit(s) who sells the permitted vessel but retains the limited access permit(s) must notify NMFS within 30 days after the sale of the change in application information in accordance with paragraph (i) of this section. If the owner wishes to transfer the limited access permit(s) to a replacement vessel, he/she must apply according to the procedures in paragraph (1)(2)(iv) of this section.

(viii) As specified in paragraph (f)(4) of this section, a directed or incidental ILAP or LAP for swordfish, a directed or an incidental catch ILAP or LAP for shark, and an Atlantic Tunas commercial category permit are required to retain swordfish. Accordingly, a LAP for swordfish obtained by transfer without either a directed or incidental catch shark LAP or an Atlantic tunas commercial category permit will not entitle an owner or operator to use a vessel to fish in the swordfish fishery.

(ix) As specified in paragraph (d)(4) of this section, a directed or incidental ILAP or LAP for swordfish, a directed or an incidental catch ILAP or LAP for shark, and an Atlantic Tunas Longline category permit are required to retain Atlantic tunas taken by pelagic longline gear. Accordingly, an Atlantic Tunas Longline category permit obtained by transfer without either a directed or incidental catch swordfish or shark LAP will not entitle an owner or operator to use the permitted vessel to fish in the Atlantic tunas fishery with pelagic longline gear.

(m) *Renewal*—(1) *General*. Persons must apply annually for a dealer permit for Atlantic tunas, sharks, and

swordfish, and for an Atlantic HMS Angling, HMS Charter/Headboat, tunas, shark, or swordfish vessel permit. Except as specified in the instructions for automated renewals, a renewal application must be submitted to NMFS, at an address designated by NMFS, at least 30 days before a permit's expiration to avoid a lapse of permitted status. NMFS will renew a permit provided that the specific requirements for the requested permit are met, including those described in § 635.4 (1)(2), all reports required under the Magnuson-Stevens Act and ATCA have been submitted, including those described in § 635.5, and the applicant is not subject to a permit sanction or denial under paragraph (a)(6) of this section.

(2) *Shark, swordfish, and tuna longline LAPs.* As of June 1, 2000, the owner of a vessel of the United States that fishes for, possesses, lands or sells shark or swordfish from the management unit, or takes or possesses such shark or swordfish as incidental catch or that fishes for Atlantic tunas with longline gear must have the applicable limited access permit(s) issued pursuant to the requirements in § 635.4, paragraphs (e) and (f). However, any ILAP that expires on June 30, 2000, is valid through that date. Only valid limited access permit holders in the preceding year are eligible for renewal of a limited access permit(s). Limited access permits that have been transferred according to the procedures of paragraph (1) of this section are not eligible for renewal by the transferor.

[64 FR 29135, May 28, 1999, as amended at 64 FR 37703, July 13, 1999; 65 FR 47238, Aug. 1, 2000; 66 FR 30652, June 7, 2001; 67 FR 77436, Dec. 18, 2002; 68 FR 56787, Oct. 2, 2003; 69 FR 67283, Nov. 17, 2004]

§ 635.5 Recordkeeping and reporting.

Information on HMS vessel and dealer reporting requirements may be obtained from the Division Chief or where otherwise stated in this part.

(a) *Vessels*—(1) *Logbooks.* If an owner of an HMS Charter/Headboat vessel, an Atlantic Tunas vessel, or a commercial shark or swordfish vessel, for which a permit has been issued under § 635.4(b), (d), (e), or (f), is selected for logbook reporting in writing by NMFS, he or she must maintain and submit a fish-

ing record on a logbook specified by NMFS. Entries are required regarding the vessel's fishing effort and the number of fish landed and discarded. Entries on a day's fishing activities must be entered on the form within 48 hours of completing that day's activities and, for a 1-day trip, before offloading. The owner or operator of the vessel must submit the logbook form(s) postmarked within 7 days of offloading all Atlantic HMS.

(2) *Weighout slips.* If an owner of a permitted vessel is required to maintain and submit logbooks under paragraph (a)(1) of this section, and Atlantic HMS harvested on a trip are sold, the owner or operator must obtain and submit copies of weighout slips for those fish. Each weighout slip must show the dealer to whom the fish were transferred, the date they were transferred, and the carcass weight of each fish for which individual weights are normally recorded. For fish that are not individually weighed, a weighout slip must record total weights by species and market category. A weighout slip for sharks prior to or as part of a commercial transaction involving shark carcasses or fins must record the weights of carcasses and any detached fins. The owner or operator must also submit copies of weighout slips with the logbook forms required to be submitted under paragraph (a)(1) of this section.

(3) *BFT not sold.* If a person who catches and lands a large medium or giant BFT from a vessel issued a permit in any of the commercial categories for Atlantic tunas does not sell or otherwise transfer the BFT to a dealer who has a dealer permit for Atlantic tunas, the person must contact a NMFS enforcement agent, at a number designated by NMFS, immediately upon landing such BFT, provide the information needed for the reports required under paragraph (b)(2)(i) of this section, and, if requested, make the tuna available so that a NMFS enforcement agent or authorized officer may inspect the fish and attach a tag to it. Alternatively, such reporting requirement may be fulfilled if a dealer who has a dealer permit for Atlantic tunas affixes a dealer tag as required under paragraph (b)(2)(ii) of this section and

§ 635.5

reports the BFT as being landed but not sold on the reports required under paragraph (b)(2)(i) of this section. If a vessel is placed on a trailer, the person must contact a NMFS enforcement agent, or the BFT must have a dealer tag affixed to it by a permitted Atlantic tunas dealer, immediately upon the vessel being removed from the water. All BFT landed but not sold will be applied to the quota category according to the permit category of the vessel from which it was landed.

(4) *Pelagic longline sea turtle reporting.* The operators of vessels that have pelagic longline gear on board and that have been issued, or are required to have, a limited access swordfish, shark, and tuna longline category permit for use in the Atlantic Ocean including the Caribbean Sea and the Gulf of Mexico are required to report any sea turtles that are dead when they are captured or that die during capture to the NOAA Fisheries Southeast Fisheries Science Center Observer Program, at a number designated by NOAA Fisheries, within 48 hours of returning to port, in addition to submitting all other reporting forms required by this part and 50 CFR parts 223 and 224.

(5) *Shark gillnet whale reporting.* The vessel operators of vessels that are shark gillnetting, as defined by 50 CFR 229.2, and that have been issued, or are required to have, shark directed or incidental limited access permits for use in the Atlantic Ocean including the Caribbean Sea and the Gulf of Mexico are required to contact the NOAA Fisheries Southeast Regional Office, at a number designated by NOAA Fisheries, if a listed whale is taken, in addition to submitting all other reporting forms required by this part and 50 CFR part 229.

(6) *Chartering Arrangements.* (i) For the purposes of this section, a chartering arrangement means any contract, agreement, or commitment between a U.S. vessel owner and a foreign entity (e.g., government, company, person) by which the control, use, possession, or services of a vessel are secured, for a period of time for fishing targeting Atlantic HMS. Chartering arrangements under this part do not include bareboat charters under which a vessel enters into a fishing agreement

50 CFR Ch. VI (10–1–05 Edition)

with a foreign entity, changes registration to fish under another country's registration then, once the agreed-upon fishing is completed, reverts back to the vessel's original registration.

(ii) Before fishing under a chartering arrangement, the owner of a fishing vessel subject to U.S. jurisdiction must apply for, and obtain, a chartering permit as specified in § 635.32 (e) and (f). If a chartering permit is obtained, the vessel owner must submit catch information as specified in the terms and conditions of that permit. All catches will be recorded and counted against the applicable quota of the Contracting Party to which the chartering foreign entity is a member and, unless otherwise provided in the chartering permit, must be offloaded in the ports of the chartering foreign entity or offloaded under the direct supervision of the chartering foreign entity.

(iii) If the chartering arrangement terminates before the expiration of the charter permit, the vessel owner must notify NMFS immediately and in writing, upon termination of the chartering arrangement. Such notification requirements shall also apply to situations where the chartering arrangement is temporarily suspended and during intermittent periods where the vessel may be fishing under U.S. quotas for Atlantic HMS.

(b) *Dealers.* Persons who have been issued a dealer permit under § 635.4 must submit reports to NMFS, to an address designated by NMFS, and maintain records as follows:

(1) *Atlantic HMS.* (i) Dealers that have been issued an Atlantic tunas, swordfish and/or sharks dealer permit under § 635.4 must submit to NMFS all reports required under this section.

(ii) Reports of Atlantic tunas, Atlantic swordfish, and/or Atlantic sharks received by dealers from U.S. vessels, as defined under § 600.10 of this chapter, on the first through the 15th of each month, must be postmarked not later than the 25th of that month. Reports of such fish received on the 16th through the last day of each month must be postmarked not later than the 10th of the following month. If a dealer issued an Atlantic tunas, swordfish or sharks dealer permit under § 635.4 has not received any Atlantic HMS from U.S.

vessels during a reporting period as specified in this section, he or she must still submit the report required under paragraph (b)(1)(i) of this section stating that no Atlantic HMS were received. This negative report must be postmarked for the applicable reporting period as specified in this section. This negative reporting requirement does not apply for bluefin tuna.

(iii) The reporting requirement of paragraph (b)(1)(i) of this section may be satisfied by a dealer if he or she provides a copy of each appropriate weighout slip or sales record, provided such weighout slip or sales record by itself or combined with the form available from NMFS includes all of the required information and identifies each fish by species.

(iv) The dealer may mail or fax such report to an address designated by NMFS or may hand-deliver such report to a state or Federal fishery port agent designated by NMFS. If the dealer hand-delivers the report to a port agent, a dealer must deliver such report no later than the prescribed postmark date for the reporting period.

(2) *Requirements for bluefin tuna*—(i) *Dealer reports*—(A) *Landing reports*. Each dealer issued an Atlantic tunas permit under § 635.4 must submit a completed landing report on a form available from NMFS for each BFT received from a U.S. fishing vessel. Such report must be submitted by electronic facsimile (fax) to a number designated by NMFS not later than 24 hours after receipt of the BFT. The landing report must indicate the name and permit number of the vessel that landed the BFT and must be signed by the permitted vessel's owner or operator immediately upon transfer of the BFT. The dealer must inspect the vessel's permit to verify that the required vessel name and vessel permit number as listed on the permit are correctly recorded on the landing report.

(B) *Bi-weekly reports*. Each dealer issued an Atlantic tunas permit under § 635.4 must submit a bi-weekly report on forms supplied by NMFS for BFT received from U.S. vessels. For BFT received from U.S. vessels on the first through the 15th of each month, the dealer must submit the bi-weekly report form to NMFS postmarked not

later than the 25th of that month. Reports of BFT received on the 16th through the last day of each month must be postmarked not later than the 10th of the following month.

(ii) *Dealer Tags*. NMFS will issue numbered dealer tags to each person issued a dealer permit for Atlantic tunas under § 635.4. A dealer tag is not transferable and is usable only by the dealer to whom it is issued. Dealer tags may not be reused once affixed to a tuna or recorded on a package, container, or report.

(A) *Affixing dealer tags*. A dealer or a dealer's agent must affix a dealer tag to each BFT purchased or received from a U.S. vessel immediately upon offloading the BFT. If a vessel is placed on a trailer, the dealer or dealer's agent must affix the dealer tag to the BFT immediately upon the vessel being removed from the water. The dealer tag must be affixed to the BFT between the fifth dorsal finlet and the caudal keel.

(B) *Removal of dealer tags*. A dealer tag affixed to any BFT under paragraph (b)(2)(ii)(A) of this section or a BSD tag affixed to an imported bluefin tuna must remain on the fish until it is cut into portions. If the bluefin tuna or bluefin tuna parts subsequently are packaged for transport for domestic commercial use or for export, the number of the dealer tag or the BSD tag must be written legibly and indelibly on the outside of any package containing the tuna. Such tag number also must be recorded on any document accompanying the shipment of bluefin tuna for commercial use or export.

(3) *Recordkeeping*. Dealers must retain at their place of business a copy of each written report required under paragraphs (b)(1)(i) through (b)(1)(iii) and paragraph (b)(2)(i) of this section for a period of 2 years from the date on which each report was required to be submitted.

(c) *Anglers*. All bluefin tuna, billfish, and North Atlantic swordfish non-tournament landings must be reported as specified under paragraphs (c)(1) or (c)(2) of this section, unless an alternative recreational catch reporting

system has been established as specified under paragraph (c)(3) of this section. Tournament landings must be reported as specified under paragraph (d) of this section.

(1) *Bluefin tuna*. The owner of a vessel permitted, or required to be permitted, in the Atlantic HMS Angling or Atlantic HMS Charter/Headboat category must report all BFT landings under the Angling category quota designated at § 635.27(a) through the NMFS automated catch reporting system within 24 hours of the landing. Such reports may be made by calling 1-888-872-8862 or by submitting the required information over the Internet at: www.nmfspermits.com.

(2) *Billfish and North Atlantic Swordfish*. Anglers must report all non-tournament landings of Atlantic blue marlin, Atlantic white marlin, Atlantic sailfish and North Atlantic swordfish, including those landed on a charter/headboat, to NMFS by calling 1-800-894-5528 within 24 hours of the landing. For telephone reports, a contact phone number must be provided so that NMFS can call the angler back for follow up questions and to provide a confirmation of the reported landing. The landing telephone report has not been completed unless the angler has received a confirmation number from a NMFS' designee.

(3) *Alternative recreational catch reporting*. Alternative recreational catch reporting procedures may be established by NMFS with cooperation from states which may include such methodologies as telephone, dockside or mail surveys, mail in or phone-in reports, tagging programs, catch cards, or mandatory check-in stations. A census or a statistical sample of persons fishing under the recreational fishing regulations of this part may be used for these alternative reporting programs (after the programs have received Paperwork Reduction Act approval from OMB). Persons or vessel owners selected for reporting will be notified by NMFS or by the cooperating state agency of the requirements and procedures for reporting recreational catch. Each person so notified must comply with those requirements and procedures. Additionally, NMFS may determine that recreational landing report-

ing systems implemented by the states, if mandatory, at least as restrictive, and effectively enforced, are sufficient for recreational landing monitoring as required under this part. In such case, NMFS will file with the Office of the Federal Register for publication notification indicating that compliance with the state system satisfies the reporting requirements of paragraph (c) of this section.

(d) *Tournament operators*. A tournament operator must notify NMFS of the purpose, dates, and location of the tournament conducted from a port in an Atlantic coastal state, including the U.S. Virgin Islands and Puerto Rico, at least 4 weeks prior to commencement of the tournament. NMFS will notify a tournament operator in writing, when his or her tournament has been selected for reporting. The tournament operator that is selected must maintain and submit to NMFS a record of catch and effort on forms available from NMFS. Tournament operators must submit completed forms to NMFS, at an address designated by NMFS, postmarked no later than the 7th day after the conclusion of the tournament and must attach a copy of the tournament rules.

(e) *Inspection*. Any person authorized to carry out enforcement activities under the regulations in this part has the authority, without warrant or other process, to inspect, at any reasonable time, catch on board a vessel or on the premises of a dealer, logbooks, catch reports, statistical records, sales receipts, or other records and reports required by this part to be made, kept, or furnished. An owner or operator of a fishing vessel that has been issued a permit under § 635.4 or § 635.32 must allow NMFS or an authorized person to inspect and copy any required reports and the records, in any form, on which the completed reports are based, wherever they exist. An agent of a person issued a permit under this part, or anyone responsible for off-loading, storing, packing, or selling regulated HMS for such permittee, shall be subject to the inspection provisions of this section.

(f) *Additional data and inspection*. Additional data on fishing effort directed

at Atlantic HMS or on catch of Atlantic HMS, regardless of whether retained, may be collected by contractors and statistical reporting agents, as designees of NMFS, and by authorized officers. A person issued a permit under § 635.4 is required to provide requested information about fishing activity, and a person, regardless of whether issued a permit under § 635.4, who possesses an Atlantic HMS is required to make such fish or parts thereof available for inspection by NMFS or its designees upon request.

[64 FR 29135, May 28, 1999, as amended at 64 FR 37704, July 13, 1999; 66 FR 30653, June 7, 2001; 66 FR 42804, Aug. 15, 2001; 67 FR 45400, July 9, 2002; 67 FR 77437, Dec. 18, 2002; 68 FR 714, Jan. 7, 2003; 68 FR 37773, June 25, 2003; 68 FR 74784, Dec. 24, 2003; 69 FR 67284, Nov. 17, 2004; 69 FR 70399, Dec. 6, 2004]

§ 635.6 Vessel and gear identification.

(a) *Vessel number.* For the purposes of this section, a vessel's number is the vessel's official number issued by either by the U.S. Coast Guard or by the appropriate state agency.

(b) *Vessel identification.* (1) An owner or operator of a vessel for which a permit has been issued under § 635.4, other than an HMS Angling permit, must display the vessel number—

(i) On the port and starboard sides of the deckhouse or hull and on an appropriate weather deck, so as to be clearly visible from an enforcement vessel or aircraft.

(ii) In block arabic numerals permanently affixed to or painted on the vessel in contrasting color to the background.

(iii) At least 18 inches (45.7 cm) in height for vessels over 65 ft (19.8 m) in length; at least 10 inches (25.4 cm) in height for all other vessels over 25 ft (7.6 m) in length; and at least 3 inches (7.6 cm) in height for vessels 25 ft (7.6 m) in length or less.

(2) The owner or operator of a vessel for which a permit has been issued under § 635.4 must keep the vessel's number clearly legible and in good repair and ensure that no part of the vessel, its rigging, its fishing gear, or any other material on board obstructs the view of the vessel's number from an enforcement vessel or aircraft.

(c) *Gear identification.* (1) The owner or operator of a vessel for which a permit has been issued under § 635.4 and that uses a handline, harpoon, longline, or gillnet, must display the vessel's name, registration number or Atlantic Tunas, HMS Angling, or HMS Charter/Headboat permit number on each float attached to a handline or harpoon and on the terminal floats and high-flyers (if applicable) on a longline or gillnet used by the vessel. The vessel's name or number must be at least 1 inch (2.5 cm) in height in block letters or arabic numerals in a color that contrasts with the background color of the float or high-flyer.

(2) An unmarked handline, harpoon, longline, or gillnet, is illegal and may be disposed of in an appropriate manner by NMFS or an authorized officer.

(3) In addition to gear marking requirements in this paragraph (c)(1), provisions on gear marking for the southeast U.S. shark gillnet fishery to implement the Atlantic Large Whale Take Reduction Plan are set forth in § 229.32(b) of this title.

[64 FR 29135, May 28, 1999, as amended at 66 FR 42804, Aug. 15, 2001; 67 FR 77437, Dec. 18, 2002]

§ 635.7 At-sea observer coverage.

(a) *Applicability.* NMFS may select for at-sea observer coverage any vessel that has an Atlantic HMS, tunas, shark or swordfish permit issued under § 635.4 or § 635.32. Vessels permitted in the HMS Charter/Headboat and Angling categories will be requested to take observers on a voluntary basis. When selected, vessels issued any other permit under § 635.4 or § 635.32 are required to take observers on a mandatory basis.

(b) *Selection of vessels.* NMFS will notify a vessel owner, in writing, when his or her vessel is selected for observer coverage. Vessels will be selected to provide information on catch, bycatch and other fishery data according to the need for representative samples.

(c) *Notification of trips.* The owner or operator of a vessel that is selected under paragraph (b) of this section must notify NMFS, at an address designated by NMFS, before commencing any fishing trip that may result in the incidental catch or harvest of Atlantic

§ 635.16

HMS. Notification procedures and information requirements such as expected gear deployment, trip duration and fishing area will be specified in a selection letter sent by NMFS.

(d) *Assignment of observers.* Once notified of a trip, NMFS will assign an observer for that trip based on current information needs relative to the expected catch and bycatch likely to be associated with the indicated gear deployment, trip duration and fishing area. If an observer is not assigned for a fishing trip, NMFS will issue a waiver for that trip to the owner or operator of the selected vessel, so long as the waiver is consistent with other applicable laws. If an observer is assigned for a trip, the operator of the selected vessel must arrange to embark the observer and shall not fish for or retain any Atlantic HMS unless the NMFS-assigned observer is aboard.

(e) *Requirements.* The owner or operator of a vessel on which a NMFS-approved observer is embarked, regardless of whether required to carry the observer, must comply with §§ 600.725 and 600.746 of this chapter and—

(1) Provide accommodations and food that are equivalent to those provided to the crew.

(2) Allow the observer access to and use of the vessel's communications equipment and personnel upon request for the transmission and receipt of messages related to the observer's duties.

(3) Allow the observer access to and use of the vessel's navigation equipment and personnel upon request to determine the vessel's position.

(4) Allow the observer free and unobstructed access to the vessel's bridge, working decks, holding bins, weight scales, holds, and any other space used to hold, process, weigh, or store fish.

(5) Allow the observer to inspect and copy the vessel's log, communications logs, and any records associated with the catch and distribution of fish for that trip.

[64 FR 29135, May 28, 1999, as amended at 64 FR 37704, July 13, 1999; 66 FR 17372, Mar. 30, 2001; 68 FR 63741, Nov. 10, 2003]

50 CFR Ch. VI (10–1–05 Edition)

Subpart B—Limited Access

§ 635.16 [Reserved]

Subpart C—Management Measures

§ 635.20 Size limits.

(a) *General.* The CFL will be the sole criterion for determining the size and/or size class of whole (head on) Atlantic tunas for a vessel that has been issued a limited access North Atlantic swordfish permit under § 635.4. The LJFL will be the sole criterion for determining the size of whole (head on) North Atlantic swordfish for a vessel that has not been issued a limited access North Atlantic swordfish permit under § 635.4. If the head or tail of an North Atlantic swordfish has been removed prior to or at the time of landing, the CK or minimum weight standard shall be applied in all cases.

(b) *BFT size classes.* The size class of a BFT found with the head removed shall be determined using pectoral fin curved fork length (PFCFL) multiplied by a conversion factor of 1.35. The CFL, as determined by conversion of the PFCFL, will be the sole criterion for determining the size class of a beheaded BFT. The conversion factor may be adjusted after consideration of additional scientific information and fish measurement data, and will be made effective by filing with the Office of the Federal Register for publication notification of the adjustment.

(c) *BFT, bigeye tuna, and yellowfin tuna.* (1) No person shall take, retain, or possess a BFT, bigeye tuna, or yellowfin tuna in the Atlantic Ocean that is less than 27 inches (69 cm) CFL;

(2) Applying the conversion factor from PFCFL to CFL for a beheaded BFT in § 635.20(b) means that no person shall retain or possess a BFT, with the head removed, that is less than 20 inches (51 cm) PFCFL.

(3) No person shall remove the head of a bigeye tuna or yellowfin tuna if the remaining portion would be less than 27 inches (69 cm) from the fork of the tail to the forward edge of the cut.

(d) *Billfish.* (1) No person shall take, retain or possess a blue marlin taken from its management unit that is less than 99 inches (251 cm), LJFL.

Fishery Conservation and Management

§ 635.21

(2) No person shall take, retain or possess a white marlin taken from its management unit that is less than 66 inches (168 cm), LJFL.

(3) No person shall take, retain or possess shoreward of the outer boundary of the EEZ a sailfish taken from its management unit that is less than 63 inches (160 cm), LJFL.

(e) *Sharks*. All sharks landed under the recreational retention limits specified at §635.22(c) must have the head, tail, and fins attached. All sharks, except Atlantic sharpnose and bonnethead sharks, landed under the recreational retention limits specified at §635.22(c) must be at least 54 inches (137 cm) FL.

(f) *Swordfish*. (1) No person shall take, retain, or possess a north or south Atlantic swordfish taken from its management unit that is less than 29 inches (73 cm), CK, 47 inches (119 cm), LJFL, or 33 lb (15 kg) dressed weight. A swordfish that is damaged by shark bites may be retained only if the remainder of the carcass is at least 29 inches (73 cm) CK, 47 inches (119 cm), LJFL, or 33 lb (15 kg) dw. No person shall import into the United States an Atlantic swordfish weighing less than 33 lb (15 kg) dressed weight, or a part derived from a swordfish that weighs less than 33 lb (15 kg) dressed weight.

(2) Except for a swordfish landed in a Pacific state and remaining in the state of landing, a swordfish, or part thereof, weighing less than 33 lb (15 kg) dressed weight will be deemed to be an Atlantic swordfish harvested by a vessel of the United States and to be in violation of the minimum size requirement of this section unless such swordfish, or part thereof, is accompanied by a swordfish statistical document attesting that the swordfish was lawfully imported. Refer to §300.186 of this title for the requirements related to the swordfish statistical document.

(3) A swordfish, or part thereof, will be monitored for compliance with the minimum size requirement of this section from the time it is landed in, or imported into, the United States up to,

and including, the point of first trans-action in the United States.

[64 FR 29135, May 28, 1999, as amended at 64 FR 37704, July 13, 1999; 66 FR 42804, Aug. 15, 2001; 68 FR 714, Jan. 7, 2003; 68 FR 74785, Dec. 24, 2003; 69 FR 67284, Nov. 17, 2004]

§ 635.21 Gear operation and deployment restrictions.

(a) *All Atlantic HMS fishing gears*. (1) An Atlantic HMS harvested from its management unit that is not retained must be released in a manner that will ensure maximum probability of survival, but without removing the fish from the water.

(2) If a billfish is caught by a hook, the fish must be released by cutting the line near the hook or by using a dehooking device, in either case without removing the fish from the water.

(3) All vessels that have pelagic longline gear on board and that have been issued, or are required to have, a limited access swordfish, shark, or tuna longline category permit for use in the Atlantic Ocean including the Caribbean Sea and the Gulf of Mexico must possess inside the wheelhouse the document provided by NMFS entitled, "Careful Release Protocols for Sea Turtle Release with Minimal Injury," and all vessels with pelagic or bottom longline gear on board must post inside the wheelhouse the sea turtle handling and release guidelines provided by NMFS.

(4) No person may fish for, catch, possess or retain any Atlantic highly migratory species or anchor a fishing vessel, issued a permit or required to be permitted under this part, in the areas designated at §622.34(d) of this chapter.

(b) *General*. No person shall use any gear to fish for Atlantic HMS other than those gears specifically authorized in this part. A vessel using or having on board in the Atlantic Ocean any unauthorized gear may not have on board an Atlantic HMS.

(c) *Pelagic longlines*. For purposes of this part, a vessel is considered to have pelagic longline gear on board when a power-operated longline hauler, a mainline, floats capable of supporting the mainline, and leaders (gangions) with hooks are on board. Removal of any one of these elements constitutes removal of pelagic longline gear. If a

vessel issued a permit under this part is in a closed area designated under paragraph (c)(2) of this section with pelagic longline gear on board, it is a rebuttable presumption that fish on board such vessel were taken with pelagic longline gear in the closed area.

(1) From August 1, 1999, through November 30, 2000, no person may deploy a pelagic longline that is more than 24 nautical miles (44.5 km) in length in the Mid-Atlantic Bight.

(2) If pelagic longline gear is on board a vessel issued a permit under this part, persons aboard that vessel may not fish or deploy any type of fishing gear in:

(i) The Northeastern United States closed area from June 1 through June 30 each calendar year;

(ii) In the Charleston Bump closed area from March 1 through April 30, 2001, and from February 1 through April 30 each calendar year thereafter;

(iii) In the East Florida Coast closed area at any time beginning at 12:01 a.m. on March 1, 2001;

(iv) In the DeSoto Canyon closed area at any time beginning at 12:01 a.m. on November 1, 2000;

(v) In the Northeast Distant closed area at any time, unless persons on-board the vessel comply with the following:

(A) The vessel is limited, at all times, to possessing onboard and/or using only 18/0 or larger circle hooks with an offset not to exceed 10°. The outer diameter of the hook at its widest point must be no smaller than 2.16 inches (55 mm) when measured with the eye of the hook on the vertical axis (y-axis) and perpendicular to the horizontal axis (x-axis), and the distance between the hook point and the shank (*i.e.*, the gap) must be no larger than 1.13 inches (28.8 mm). The allowable offset is measured from the barbed end of the hook, and is relative to the parallel plane of the eyed-end, or shank, of the hook when laid on its side. The only allowable offset circle hooks are those that are offset by the hook manufacturer; and,

(B) The vessel is limited, at all times, to possessing onboard and/or using only whole Atlantic mackerel and/or squid bait; and,

(C) Vessels must possess, inside the wheelhouse, a document provided by NMFS entitled, “Careful Release Protocols for Sea Turtle Release with Minimal Injury,” and must post, inside the wheelhouse, sea turtle handling and release guidelines provided by NMFS; and,

(D) Required sea turtle bycatch mitigation gear, which NMFS has approved under paragraph (c)(5)(iv) of this section, on the initial list of “NMFS-Approved Models For Equipment Needed For The Careful Release of Sea Turtles Caught In Hook And Line Fisheries,” must be carried on board, and must be used in accordance with the handling requirements specified in paragraphs (c)(2)(v)(E) - (G) of this section; and,

(E) Sea turtle bycatch mitigation gear, specified in paragraph (c)(2)(v)(D) of this section, must be used to disengage any hooked or entangled sea turtles that cannot be brought on board, and to facilitate access, safe handling, disentanglement, and hook removal or hook cutting of sea turtles that can be brought on board, where feasible. Sea turtles must be handled, and bycatch mitigation gear must be used, in accordance with the careful release protocols and handling/release guidelines specified in paragraph (c)(2)(v)(C) of this section, and in accordance with the onboard handling and resuscitation requirements specified in § 223.206(d)(1).

(F) *Boated turtles.* When practicable, active and comatose sea turtles must be brought on board, with a minimum of injury, using a dipnet approved on the initial list specified in paragraph (c)(2)(v)(D) of this section. All turtles less than 3 ft (.91 m) carapace length should be boated, if sea conditions permit. A boated turtle should be placed on a standard automobile tire, or cushioned surface, in an upright orientation to immobilize it and facilitate gear removal. Then, it should be determined if the hook can be removed without causing further injury. All externally embedded hooks should be removed, unless hook removal would result in further injury to the turtle. No attempt to remove a hook should be made if the hook has been swallowed and the insertion point is not visible, or if it is determined that removal would result in

further injury. If a hook cannot be removed, as much line as possible should be removed from the turtle using approved monofilament line cutters from the initial list specified in paragraph (c)(2)(v)(D) of this section, and the hook should be cut as close as possible to the insertion point before releasing the turtle using bolt cutters from that list. If a hook can be removed, an effective technique may be to cut off either the barb, or the eye, of the hook using bolt cutters, and then to slide the hook out. When the hook is visible in the front of the mouth, an approved mouth-opener from the initial list specified in paragraph (c)(2)(v)(D) of this section may facilitate opening the turtle's mouth, and an approved gag from that list may facilitate keeping the mouth open. Short-handled dehookers for ingested hooks, long-nose pliers, or needle-nose pliers from the initial list specified in paragraph (c)(2)(v)(D) of this section should be used to remove visible hooks from the mouth that have not been swallowed on boated turtles, as appropriate. As much gear as possible must be removed from the turtle without causing further injury prior to its release. Refer to the careful release protocols and handling/release guidelines required in paragraph (c)(2)(v)(C) of this section, and the handling and resuscitation requirements specified in §223.206(d)(1) of this title, for additional information.

(G) *Non-boated turtles.* If a sea turtle is too large, or hooked in a manner that precludes safe boating without causing further damage or injury to the turtle, sea turtle bycatch mitigation gear, specified in paragraph (c)(2)(v)(D) of this section, must be used to disentangle sea turtles from fishing gear and disengage any hooks, or to clip the line and remove as much line as possible from a hook that cannot be removed, prior to releasing the turtle, in accordance with the protocols specified in paragraph (c)(2)(v)(C) of this section. Non-boated turtles should be brought close to the boat and provided with time to calm down. Then, it must be determined whether or not the hook can be removed without causing further injury. All externally embedded hooks must be removed, unless hook removal would re-

sult in further injury to the turtle. No attempt should be made to remove a hook if it has been swallowed, or if it is determined that removal would result in further injury. If the hook cannot be removed and/or if the animal is entangled, as much line as possible must be removed prior to release, using an approved line cutter from the initial list specified in paragraph (c)(2)(v)(D) of this section. If the hook can be removed, it must be removed using a long-handled dehooker from the initial list specified in paragraph (c)(2)(v)(D) of this section. Without causing further injury, as much gear as possible must be removed from the turtle prior to its release. Refer to the careful release protocols and handling/release guidelines required in paragraph (c)(2)(v)(C) of this section, and the handling and resuscitation requirements specified in §223.206(d)(1) of this title, for additional information.

(3) When a marine mammal or sea turtle is hooked or entangled by pelagic longline gear, the operator of the vessel must immediately release the animal, retrieve the pelagic longline gear, and move at least 1 nm (2 km) from the location of the incident before resuming fishing. Reports of marine mammal entanglements must be submitted to NMFS consistent with regulations in §229.6 of this title.

(4) In the Gulf of Mexico: pelagic longline gear may not be fished or deployed from a vessel issued a permit under this part with live bait affixed to the hooks; and, a person aboard a vessel issued a permit under this part that has pelagic longline gear on board shall not maintain live baitfish in any tank or well on board the vessel and shall not possess live baitfish, and shall not set up or attach an aeration or water circulation device in or to any such tank or well. For the purposes of this section, the Gulf of Mexico includes all waters of the U.S. EEZ west and north of the boundary stipulated at 50 CFR 600.105(c).

(5) The operator of a vessel required to be permitted under this part and that has pelagic longline gear on board must undertake the following sea turtle bycatch mitigation measures:

(i) *Possession and use of required mitigation gear.* Required sea turtle bycatch

mitigation gear, which NMFS has approved under paragraph (c)(5)(iv) of this section as meeting the minimum design standards specified in paragraphs (c)(5)(i)(A) through (c)(5)(i)(L) of this section, must be carried on board, and must be used to disengage any hooked or entangled sea turtles in accordance with the handling requirements specified in paragraph (c)(5)(ii) of this section.

(A) *Long-handled line clipper or cutter.* Line cutters are intended to cut high test monofilament line as close as possible to the hook, and assist in removing line from entangled sea turtles to minimize any remaining gear upon release. NMFS has established minimum design standards for the line cutters. The LaForce line cutter and the Arceneaux line clipper are models that meet these minimum design standards, and may be purchased or fabricated from readily available and low-cost materials. One long-handled line clipper or cutter and a set of replacement blades are required to be onboard. The minimum design standards for line cutters are as follows:

(1) *A protected and secured cutting blade.* The cutting blade(s) must be capable of cutting 2.0–2.1 mm (0.078 in. – 0.083 in.) monofilament line (400-lb test) or polypropylene multistrand material, known as braided or tarred mainline, and must be maintained in working order. The cutting blade must be curved, recessed, contained in a holder, or otherwise designed to facilitate its safe use so that direct contact between the cutting surface and the sea turtle or the user is prevented. The cutting instrument must be securely attached to an extended reach handle and be easily replaceable. One extra set of replacement blades meeting these standards must also be carried on board to replace all cutting surfaces on the line cutter or clipper.

(2) *An extended reach handle.* The line cutter blade must be securely fastened to an extended reach handle or pole with a minimum length equal to, or greater than, 150 percent of the freeboard, or a minimum of 6 feet (1.83 m), whichever is greater. It is recommended, but not required, that the handle break down into sections. There is no restriction on the type of mate-

rial used to construct this handle as long as it is sturdy and facilitates the secure attachment of the cutting blade.

(B) *Long-handled dehooker for ingested hooks.* A long-handled dehooking device is intended to remove ingested hooks from sea turtles that cannot be boated. It should also be used to engage a loose hook when a turtle is entangled but not hooked, and line is being removed. The design must shield the barb of the hook and prevent it from re-engaging during the removal process. One long-handled device to remove ingested hooks is required onboard. The minimum design standards are as follows:

(1) *Hook removal device.* The hook removal device must be constructed of 5/16-inch (7.94 mm) 316 L stainless steel and have a dehooking end no larger than 1 7/8-inches (4.76 cm) outside diameter. The device must securely engage and control the leader while shielding the barb to prevent the hook from re-engaging during removal. It may not have any unprotected terminal points (including blunt ones), as these could cause injury to the esophagus during hook removal. The device must be of a size appropriate to secure the range of hook sizes and styles used in the pelagic longline fishery targeting swordfish and tuna.

(2) *Extended reach handle.* The dehooking end must be securely fastened to an extended reach handle or pole with a minimum length equal to or greater than 150 percent of the freeboard, or a minimum of 6 ft (1.83 m), whichever is greater. It is recommended, but not required, that the handle break down into sections. The handle must be sturdy and strong enough to facilitate the secure attachment of the hook removal device.

(C) *Long-handled dehooker for external hooks.* A long-handled dehooker is required for use on externally-hooked sea turtles that cannot be boated. The long-handled dehooker for ingested hooks described in paragraph (c)(5)(i)(B) of this section would meet this requirement. The minimum design standards are as follows:

(1) *Construction.* A long-handled dehooker must be constructed of 5/16-inch (7.94 mm) 316 L stainless steel rod. A 5-inch (12.7-cm) tube T-handle of 1–

inch (2.54 cm) outside diameter is recommended, but not required. The design should be such that a fish hook can be rotated out, without pulling it out at an angle. The dehooking end must be blunt with all edges rounded. The device must be of a size appropriate to secure the range of hook sizes and styles used in the pelagic longline fishery targeting swordfish and tuna.

(2) *Extended reach handle.* The handle must be a minimum length equal to the freeboard of the vessel or 6 ft (1.83 m), whichever is greater.

(D) *Long-handled device to pull an "inverted V".* This tool is used to pull a "V" in the fishing line when implementing the "inverted V" dehooking technique, as described in the document entitled "Careful Release Protocols for Sea Turtle Release With Minimal Injury," required under paragraph (a)(3) of this section, for disentangling and dehooking entangled sea turtles. One long-handled device to pull an "inverted V" is required onboard. If a 6-ft (1.83 m) J-style dehooker is used to comply with paragraph (c)(5)(i)(C) of this section, it will also satisfy this requirement. Minimum design standards are as follows:

(1) *Hook end.* This device, such as a standard boat hook or gaff, must be constructed of stainless steel or aluminum. A sharp point, such as on a gaff hook, is to be used only for holding the monofilament fishing line and should never contact the sea turtle.

(2) *Extended reach handle.* The handle must have a minimum length equal to the freeboard of the vessel, or 6 ft (1.83 m), whichever is greater. The handle must be sturdy and strong enough to facilitate the secure attachment of the gaff hook.

(E) *Dipnet.* One dipnet is required onboard. Dipnets are to be used to facilitate safe handling of sea turtles by allowing them to be brought onboard for fishing gear removal, without causing further injury to the animal. Turtles must not be brought onboard without the use of a dipnet. The minimum design standards for dipnets are as follows:

(1) *Size of dipnet.* The dipnet must have a sturdy net hoop of at least 31 inches (78.74 cm) inside diameter and a bag depth of at least 38 inches (96.52

cm) to accommodate turtles below 3 ft (0.914 m) carapace length. The bag mesh openings may not exceed 3 inches (7.62 cm) 3 inches (7.62 cm). There must be no sharp edges or burrs on the hoop, or where it is attached to the handle.

(2) *Extended reach handle.* The dipnet hoop must be securely fastened to an extended reach handle or pole with a minimum length equal to, or greater than, 150 percent of the freeboard, or at least 6 ft (1.83 m), whichever is greater. The handle must be made of a rigid material strong enough to facilitate the sturdy attachment of the net hoop and able to support a minimum of 100 lbs (34.1 kg) without breaking or significant bending or distortion. It is recommended, but not required, that the extended reach handle break down into sections.

(F) *Tire.* A minimum of one tire is required for supporting a turtle in an upright orientation while it is onboard, although an assortment of sizes is recommended to accommodate a range of turtle sizes. The required tire must be a standard passenger vehicle tire, and must be free of exposed steel belts.

(G) *Short-handled dehooker for ingested hooks.* One short-handled device for removing ingested hooks is required onboard. This dehooker is designed to remove ingested hooks from boated sea turtles. It can also be used on external hooks or hooks in the front of the mouth. Minimum design standards are as follows:

(1) *Hook removal device.* The hook removal device must be constructed of 1/4-inch (6.35 mm) 316 L stainless steel, and must allow the hook to be secured and the barb shielded without re-engaging during the removal process. It must be no larger than 1 5/16 inch (3.33 cm) outside diameter. It may not have any unprotected terminal points (including blunt ones), as this could cause injury to the esophagus during hook removal. A sliding PVC bite block must be used to protect the beak and facilitate hook removal if the turtle bites down on the dehooking device. The bite block should be constructed of a 3/4 -inch (1.91 cm) inside diameter high impact plastic cylinder (e.g., Schedule 80 PVC) that is 10 inches (25.4 cm) long to allow for 5 inches (12.7 cm) of slide along the shaft. The device

must be of a size appropriate to secure the range of hook sizes and styles used in the pelagic longline fishery targeting swordfish and tuna.

(2) *Handle length.* The handle should be approximately 16 - 24 inches (40.64 cm - 60.69 cm) in length, with approximately a 5-inch (12.7 cm) long tube T-handle of approximately 1 inch (2.54 cm) in diameter.

(H) *Short-handled dehooker for external hooks.* One short-handled dehooker for external hooks is required onboard. The short-handled dehooker for ingested hooks required to comply with paragraph (c)(5)(i)(G) of this section will also satisfy this requirement. Minimum design standards are as follows:

(1) *Hook removal device.* The dehooker must be constructed of 5/16-inch (7.94 cm) 316 L stainless steel, and the design must be such that a hook can be rotated out without pulling it out at an angle. The dehooking end must be blunt, and all edges rounded. The device must be of a size appropriate to secure the range of hook sizes and styles used in the pelagic longline fishery targeting swordfish and tuna.

(2) *Handle length.* The handle should be approximately 16 - 24 inches (40.64 cm - 60.69 cm) long with approximately a 5-inch (12.7 cm) long tube T-handle of approximately 1 inch (2.54 cm) in diameter.

(I) *Long-nose or needle-nose pliers.* One pair of long-nose or needle-nose pliers is required on board. Required long-nose or needle-nose pliers can be used to remove deeply embedded hooks from the turtle's flesh that must be twisted during removal. They can also hold PVC splice couplings, when used as mouth openers, in place. Minimum design standards are as follows:

(1) *General.* They must be approximately 12 inches (30.48 cm) in length, and should be constructed of stainless steel material.

(2) [Reserved]

(J) *Bolt cutters.* One pair of bolt cutters is required on board. Required bolt cutters may be used to cut hooks to facilitate their removal. They should be used to cut off the eye or barb of a hook, so that it can safely be pushed through a sea turtle without causing further injury. They should also be used to cut off as much of the hook as

possible, when the remainder of the hook cannot be removed. Minimum design standards are as follows:

(1) *General.* They must be approximately 17 inches (43.18 cm) in total length, with 4-inch (10.16 cm) long blades that are 2 1/4 inches (5.72 cm) wide, when closed, and with 13-inch (33.02 cm) long handles. Required bolt cutters must be able to cut hard metals, such as stainless or carbon steel hooks, up to 1/4-inch (6.35 mm) diameter.

(2) [Reserved]

(K) *Monofilament line cutters.* One pair of monofilament line cutters is required on board. Required monofilament line cutters must be used to remove fishing line as close to the eye of the hook as possible, if the hook is swallowed or cannot be removed. Minimum design standards are as follows:

(1) *General.* Monofilament line cutters must be approximately 7 1/2 inches (19.05 cm) in length. The blades must be 1 in (4.45 cm) in length and 5/8 in (1.59 cm) wide, when closed, and are recommended to be coated with Teflon (a trademark owned by E.I. DuPont de Nemours and Company Corp.).

(2) [Reserved]

(L) *Mouth openers/mouth gags.* Required mouth openers and mouth gags are used to open sea turtle mouths, and to keep them open when removing ingested hooks from boated turtles. They must allow access to the hook or line without causing further injury to the turtle. Design standards are included in the item descriptions. At least two of the seven different types of mouth openers/gags described below are required:

(1) *A block of hard wood.* Placed in the corner of the jaw, a block of hard wood may be used to gag open a turtle's mouth. A smooth block of hard wood of a type that does not splinter (e.g. maple) with rounded edges should be sanded smooth, if necessary, and soaked in water to soften the wood. The dimensions should be approximately 11 inches (27.94 cm) 1 inch (2.54 cm) 1 inch (2.54 cm). A long-handled, wire shoe brush with a wooden handle, and with the wires removed, is an inexpensive, effective and practical mouth-

opening device that meets these requirements.

(2) *A set of three canine mouth gags.* Canine mouth gags are highly recommended to hold a turtle's mouth open, because the gag locks into an open position to allow for hands-free operation after it is in place. A set of canine mouth gags must include one of each of the following sizes: small (5 inches)(12.7 cm), medium (6 inches)(15.24 cm), and large (7 inches)(17.78 cm). They must be constructed of stainless steel. A 1-inch (4.45 cm) piece of vinyl tubing (3/4-inch (1.91 cm) outside diameter and 5/8-inch (1.59 cm) inside diameter) must be placed over the ends to protect the turtle's beak.

(3) *A set of two sturdy dog chew bones.* Placed in the corner of a turtle's jaw, canine chew bones are used to gag open a sea turtle's mouth. Required canine chews must be constructed of durable nylon, zylene resin, or thermoplastic polymer, and strong enough to withstand biting without splintering. To accommodate a variety of turtle beak sizes, a set must include one large (5 1/2 - 8 inches)(13.97 cm - 20.32 cm) in length, and one small (3 1/2 - 4 1/2 inches)(8.89 cm - 11.43 cm) in length) canine chew bones.

(4) *A set of two rope loops covered with hose.* A set of two rope loops covered with a piece of hose can be used as a mouth opener, and to keep a turtle's mouth open during hook and/or line removal. A required set consists of two 3-foot (0.91 m) lengths of poly braid rope (3/8-inch (9.52 mm) diameter suggested), each covered with an 8-inch (20.32 cm) section of 1/2 inch (1.27 cm) or 3/4 inch (1.91 cm) light-duty garden hose, and each tied into a loop. The upper loop of rope covered with hose is secured on the upper beak to give control with one hand, and the second piece of rope covered with hose is secured on the lower beak to give control with the user's foot.

(5) *A hank of rope.* Placed in the corner of a turtle's jaw, a hank of rope can be used to gag open a sea turtle's mouth. A 6-foot (1.83 m) lanyard of approximately 3/16-inch (4.76 mm) braided nylon rope may be folded to create a hank, or looped bundle, of rope. Any size soft-braided nylon rope is allowed, however it must create a hank of ap-

proximately 2 - 4 inches (5.08 cm - 10.16 cm) in thickness.

(6) *A set of four PVC splice couplings.* PVC splice couplings can be positioned inside a turtle's mouth to allow access to the back of the mouth for hook and line removal. They are to be held in place with the needle-nose pliers. To ensure proper fit and access, a required set must consist of the following Schedule 40 PVC splice coupling sizes: 1 inch (2.54 cm), 1 1/4 inch (3.18 cm), 1 1/2 inch (3.81 cm), and 2 inches (5.08 cm).

(7) *A large avian oral speculum.* A large avian oral speculum provides the ability to hold a turtle's mouth open and to control the head with one hand, while removing a hook with the other hand. The avian oral speculum must be 9-inches (22.86 cm) long, and constructed of 3/16-inch (4.76 mm) wire diameter surgical stainless steel (Type 304). It must be covered with 8 inches (20.32 cm) of clear vinyl tubing (5/16-inch (7.9 mm) outside diameter, 3/16-inch (4.76 mm) inside diameter).

(ii) *Handling and release requirements.* (A) Sea turtle bycatch mitigation gear, as required by paragraphs (c)(5)(i)(A)-(D) of this section, must be used to disengage any hooked or entangled sea turtles that cannot be brought on board. Sea turtle bycatch mitigation gear, as required by paragraphs (c)(5)(i)(E)-(L) of this section, must be used to facilitate access, safe handling, disentanglement, and hook removal or hook cutting of sea turtles that can be brought on board, where feasible. Sea turtles must be handled, and bycatch mitigation gear must be used, in accordance with the careful release protocols and handling/release guidelines specified in paragraph (a)(3) of this section, and in accordance with the on-board handling and resuscitation requirements specified in §223.206(d)(1) of this title.

(B) *Boated turtles.* When practicable, active and comatose sea turtles must be brought on board, with a minimum of injury, using a dipnet as required by paragraph (c)(5)(i)(E) of this section. All turtles less than 3 ft (.91 m) carapace length should be boated, if sea conditions permit.

(I) A boated turtle should be placed on a standard automobile tire, or cushioned surface, in an upright orientation

to immobilize it and facilitate gear removal. Then, it should be determined if the hook can be removed without causing further injury. All externally embedded hooks should be removed, unless hook removal would result in further injury to the turtle. No attempt to remove a hook should be made if it has been swallowed and the insertion point is not visible, or if it is determined that removal would result in further injury. If a hook cannot be removed, as much line as possible should be removed from the turtle using monofilament cutters as required by paragraph (c)(5)(i) of this section, and the hook should be cut as close as possible to the insertion point before releasing the turtle, using boltcutters as required by paragraph (c)(5)(i) of this section. If a hook can be removed, an effective technique may be to cut off either the barb, or the eye, of the hook using bolt cutters, and then to slide the hook out. When the hook is visible in the front of the mouth, a mouth-opener, as required by paragraph (c)(5)(i) of this section, may facilitate opening the turtle's mouth and a gag may facilitate keeping the mouth open. Short-handled dehookers for ingested hooks, long-nose pliers, or needle-nose pliers, as required by paragraph (c)(5)(i) of this section, should be used to remove visible hooks from the mouth that have not been swallowed on boated turtles, as appropriate. As much gear as possible must be removed from the turtle without causing further injury prior to its release. Refer to the careful release protocols and handling/release guidelines required in paragraph (a)(3) of this section, and the handling and resuscitation requirements specified in §223.206(d)(1) of this title, for additional information.

(2) [Reserved]

(C) *Non-boated turtles.* If a sea turtle is too large, or hooked in a manner that precludes safe boating without causing further damage or injury to the turtle, sea turtle bycatch mitigation gear required by paragraphs (c)(5)(i)(A)–(D) of this section must be used to disentangle sea turtles from fishing gear and disengage any hooks, or to clip the line and remove as much line as possible from a hook that cannot be removed, prior to releasing the

turtle, in accordance with the protocols specified in paragraph (a)(3) of this section.

(I) Non-boated turtles should be brought close to the boat and provided with time to calm down. Then, it must be determined whether or not the hook can be removed without causing further injury. All externally embedded hooks must be removed, unless hook removal would result in further injury to the turtle. No attempt should be made to remove a hook if it has been swallowed, or if it is determined that removal would result in further injury. If the hook cannot be removed and/or if the animal is entangled, as much line as possible must be removed prior to release, using a line cutter as required by paragraph (c)(5)(i) of this section. If the hook can be removed, it must be removed using a long-handled dehooker as required by paragraph (c)(5)(i) of this section. Without causing further injury, as much gear as possible must be removed from the turtle prior to its release. Refer to the careful release protocols and handling/release guidelines required in paragraph (a)(3) of this section, and the handling and resuscitation requirements specified in §223.206(d)(1) for additional information.

(2) [Reserved]

(iii) *Gear modifications.* The following measures are required of vessel operators to reduce the incidental capture and mortality of sea turtles:

(A) *Gangion length.* The length of any gangion on vessels that have pelagic longline gear on board and that have been issued, or are required to have, a limited access swordfish, shark, or tuna longline category permit for use in the Atlantic Ocean including the Caribbean Sea and the Gulf of Mexico must be at least 10 percent longer than any floatline length if the total length of any gangion plus the total length of any floatline is less than 100 meters.

(B) *Corrodible hooks.* Vessels that have pelagic longline gear on board and that have been issued, or are required to have, a limited access swordfish, shark, or tuna longline category permit for use in the Atlantic Ocean including the Caribbean Sea and the Gulf of Mexico must only have corrodible hooks on board.

(C) *Hook size, type, and bait.* Vessels fishing outside of the NED closed area, as defined at § 635.2, that have pelagic longline gear on board, and that have been issued, or are required to have, a limited access swordfish, shark, or tuna longline category permit for use in the Atlantic Ocean, including the Caribbean Sea and the Gulf of Mexico, are limited, at all times, to possessing on board and/or using only whole finfish and/or squid bait, and the following types and sizes of fishing hooks:

(1) 18/0 or larger circle hooks with an offset not to exceed 10°; and/or,

(2) 16/0 or larger non-offset circle hooks.

(i) For purposes of paragraphs (c)(5)(iii)(C)(1), and (c)(5)(iii)(C)(2) of this section, the outer diameter of an 18/0 circle hook at its widest point must be no smaller than 2.16 inches (55 mm), and the outer diameter of a 16/0 circle hook at its widest point must be no smaller than 1.74 inches (44.3 mm), when measured with the eye of the hook on the vertical axis (y-axis) and perpendicular to the horizontal axis (x-axis). The distance between the hook point and the shank (*i.e.*, the gap) on an 18/0 circle hook must be no larger than 1.13 inches (28.8 mm), and the gap on a 16/0 circle hook must be no larger than 1.01 inches (25.8 mm). The allowable offset is measured from the barbed end of the hook, and is relative to the parallel plane of the eyed-end, or shank, of the hook when laid on its side. The only allowable offset circle hooks are those that are offset by the hook manufacturer.

(ii) [Reserved]

(iv) *Approval of sea turtle bycatch mitigation gear.* NMFS will file with the Office of the Federal Register for publication an initial list of required sea turtle bycatch mitigation gear that NMFS has approved as meeting the minimum design standards specified under paragraph (c)(5)(i) of this section. Other devices proposed for use as line clippers or cutters or dehookers, as specified under paragraphs (c)(5)(i)(A), (B), (C), (G), (H), and (K) of this section, must be approved as meeting the minimum design standards before being used. NMFS will examine new devices, as they become available, to determine if they meet the minimum design stand-

ards, and will file with the Office of the Federal Register for publication notification of any new devices that are approved as meeting the standards.

(d) *Bottom longlines.* For the purposes of this part, a vessel is considered to have bottom longline gear on board when a power-operated longline hauler, a mainline, weights and/or anchors capable of maintaining contact between the mainline and the ocean bottom, and leaders (gangions) with hooks are on board. Removal of any one of these elements constitutes removal of bottom longline gear. Bottom longline vessels may have a limited number of floats and/or high flyers onboard for the purposes of marking the location of the gear but removal of these floats does not constitute removal of bottom longline gear. If a vessel issued a permit under this part is in a closed area designated under paragraph (d)(1) of this section with bottom longline gear on board, it is a rebuttable presumption that any fish on board such a vessel were taken with bottom longline in the closed area.

(1) Effective January 1, 2005, if bottom longline gear is on board a vessel issued a permit under this part, persons aboard that vessel may not fish or deploy any type of fishing gear in the mid-Atlantic shark closed area from January 1 through July 31 each calendar year.

(2) When a marine mammal, sea turtle, or smalltooth sawfish is hooked or entangled by bottom longline gear, the operator of the vessel must immediately release the animal, retrieve the bottom longline gear, and move at least 1 nmi (2 km) from the location of the incident before resuming fishing. Reports of marine mammal entanglements must be submitted to NMFS consistent with regulations in § 229.6 of this title.

(3) The operator of a vessel required to be permitted under this part and that has bottom longline gear on board must undertake the following bycatch mitigation measures to release sea turtles, prohibited sharks, or smalltooth sawfish, as appropriate.

(i) Possession and use of required mitigation gear. Line clippers meeting minimum design specifications as specified in paragraph (d)(3)(i)(A) of this

section and dipnets meeting minimum standards prescribed in paragraph (d)(3)(i)(B) of this section must be carried on board and must be used to disengage any hooked or entangled sea turtles, prohibited sharks, or smalltooth sawfish, in accordance with the requirements specified in paragraph (d)(3)(ii) of this section.

(A) *Line clippers.* Line clippers are intended to cut fishing line as close as possible to hooked or entangled sea turtles, prohibited sharks, or smalltooth sawfish. NMFS has established minimum design standards for line clippers. The Arceneaux line clipper is a model that meets these minimum design standards and may be fabricated from readily available and low-cost materials (65 FR 16347, March 28, 2000). The minimum design standards for line clippers are as follows:

(1) *A protected cutting blade.* The cutting blade must be curved, recessed, contained in a holder, or otherwise designed to minimize direct contact of the cutting surface with sea turtles, prohibited sharks, smalltooth sawfish, or users of the cutting blade.

(2) *Cutting blade edge.* The blade must be able to cut 2.0–2.1 mm monofilament line and nylon or polypropylene multi-strand material commonly known as braided mainline or tarred mainline.

(3) *An extended reach holder for the cutting blade.* The line clipper must have an extended reach handle or pole of at least 6 ft (1.82 m).

(4) *Secure fastener.* The cutting blade must be securely fastened to the extended reach handle or pole to ensure effective deployment and use.

(B) *Dipnets.* Dipnets are intended to facilitate safe handling of sea turtles and access to sea turtles for purposes of cutting lines in a manner that prevents injury and trauma to sea turtles. The minimum design standards for dipnets are as follows:

(1) *Extended reach handle.* The dipnet must have an extended reach handle of at least 6 ft (1.82 m) of wood or other rigid material able to support a minimum of 100 lb (34.1 kg) without breaking or significant bending or distortion.

(2) *Size of dipnet.* The dipnet must have a net hoop of at least 31 inches (78.74 cm) inside diameter and a bag

depth of at least 38 inches (96.52 cm). The bag mesh openings may not exceed 3 inches × 3 inches (7.62 cm × 7.62 cm).

(ii) *Handling requirements.* (A) The dipnets required by this paragraph should be used to facilitate access and safe handling of sea turtles where feasible. The line clippers must be used to disentangle sea turtles, prohibited sharks, or smalltooth sawfish from fishing gear or to cut fishing line as close as possible to a hook that cannot be removed without causing further injury.

(B) When practicable, active and comatose sea turtles must be brought on board immediately, with a minimum of injury, and handled in accordance with the procedures specified in § 223.206(d)(1) of this title.

(C) If a sea turtle is too large or hooked in a manner that precludes safe boarding without causing further damage or injury to the turtle, line clippers described in paragraph (c)(5)(i)(A) of this section must be used to clip the line and remove as much line as possible prior to releasing the turtle.

(D) If a smalltooth sawfish is caught, the fish should be kept in the water while maintaining water flow over the gills and examined for research tags and the line should be cut as close to the hook as possible.

(iii) Corrodible hooks. Vessels that have bottom longline gear on board and that have been issued, or required to have, a limited access shark permit for use in the Atlantic Ocean, including the Caribbean Sea and the Gulf of Mexico, must only have corrodible hooks on board.

(iv) Possess and use a dehooking device that meets the minimum design standards. The dehooking device must be carried on board and must be used to remove the hook from any hooked sea turtle, prohibited shark, or other animal, as appropriate. The dehooking device should not be used to release smalltooth sawfish. NMFS will file with the Office of the FEDERAL REGISTER for publication the minimum design standards for approved dehooking devices. NMFS may also file with the Office of the FEDERAL REGISTER for publication any additions and/or amendments to the minimum design standards.

(e) *Authorized gear*—(1) *Atlantic tunas*. A person that retains or possesses an Atlantic bluefin tuna may not have on board a vessel or use on board the vessel any gear other than that authorized for the category for which the Atlantic tunas or HMS permit has been issued for such vessel. When fishing for Atlantic tunas other than BFT, fishing gear authorized for any Atlantic Tunas permit category may be used, except that purse seine gear may be used only on board vessels permitted in the Purse Seine category and pelagic longline gear may be used only on board vessels issued an Atlantic Tunas Longline category tuna permit as well as ILAPs or LAPs for both swordfish and sharks. When fishing for BFT, a person must use only the gear types authorized for the Atlantic tunas or HMS permit category of the fishing vessel:

(i) *Angling*. Rod and reel (including downriggers) and handline.
 (ii) *Charter/Headboat*. Rod and reel (including downriggers), bandit gear, and handline.
 (iii) *General*. Rod and reel (including downriggers), handline, harpoon, and bandit gear.

(iv) *Harpoon*. Harpoon.

(v) *Longline*. Longline.

(vi) *Purse Seine*. Purse seine.

(A) *Mesh size*. A purse seine used in directed fishing for BFT must have a mesh size equal to or smaller than 4.5 inches (11.4 cm) in the main body (stretched when wet) and must have at least 24-count thread throughout the net.

(B) *Inspection of purse seine vessels*. Persons that own or operate a purse seine vessel conducting a directed fishery for Atlantic tunas must have their fishing gear inspected for mesh size by an enforcement agent of NMFS prior to commencing fishing for the season in any fishery that may result in the harvest of Atlantic tunas. Such persons must request such inspection at least 24 hours before commencement of the first fishing trip of the season. If NMFS does not inspect the vessel within 24 hours of such notification, the inspection requirement is waived. In addition, at least 24 hours before commencement of offloading any BFT after a fishing trip, such persons must request an inspection of the vessel and

catch by notifying NMFS. If, after notification by the vessel, NMFS does not arrange to inspect the vessel and catch at offloading, the inspection requirement is waived.

(vii) *Trap*. Pound net and fish weir.

(2) *Billfish*. (i) Persons may possess a blue marlin or white marlin in or take a blue marlin or a white marlin from its management unit only if it is harvested by rod and reel. Regardless of how taken, persons may not possess a blue marlin or a white marlin in or take a blue marlin or a white marlin from its management unit on board a vessel using or having on board a pelagic longline.

(ii) Persons may possess or take a sailfish shoreward of the outer boundary of the Atlantic EEZ only if it is harvested by rod and reel. Regardless of how taken, persons may not possess or take a sailfish shoreward of the outer boundary of the Atlantic EEZ on board a vessel using or having on board a pelagic longline.

(3) *Sharks*. (i) No person may possess a shark in the EEZ taken from its management unit without a permit issued under § 635.4. No person issued a shark LAP under § 635.4 may possess a shark by any gear other than rod and reel, handline, bandit gear, longline, or gillnet. No person issued an HMS Angling permit or an HMS Charter/headboat permit under § 635.4 may possess a shark in the EEZ if the shark was taken from its management unit by any gear other than rod and reel or handline, except that persons on a vessel issued both an HMS Charter/headboat permit and a shark LAP may possess sharks taken with rod and reel, handline, bandit gear, longline, or gillnet if the vessel is not engaged in a for-hire fishing trip.

(ii) No person may fish for sharks with a gillnet with a total length of 2.5 km or more. No person may have on board a vessel a gillnet with a total length of 2.5 km or more.

(iii) Provisions on gear deployment for the southeast U.S. shark gillnet fishery to implement the Atlantic Large Whale Take Reduction Plan are set forth in § 229.32(f) of this title.

(iv) While fishing for Atlantic sharks with a gillnet, the gillnet must remain

attached to at least one vessel at one end, except during net checks.

(v) Both the observer and vessel operator are responsible for sighting whales. If a listed whale is taken, the vessel operator must cease fishing operations immediately and contact NOAA Fisheries as required in § 635.5(a)(5).

(vi) Vessel operators are required to conduct net checks every 0.5 to 2 hours to look for and remove any sea turtles, marine mammals, or smalltooth sawfish. Smalltooth sawfish should not be removed from the water while being removed from the net.

(4) *Swordfish*. (i) No person may possess north Atlantic swordfish taken from its management unit by any gear other than handgear or longline, except that such swordfish taken incidentally while fishing with a squid trawl may be retained, subject to restrictions specified in § 635.24(b)(2). No person may possess south Atlantic swordfish taken from its management unit by any gear other than longline.

(ii) An Atlantic swordfish may not be retained or possessed on board a vessel with a gillnet. A swordfish will be deemed to have been harvested by gillnet when it is onboard, or offloaded from a vessel using or having on board a gillnet.

(iii) A person aboard a vessel issued a directed handgear ILAP or LAP for Atlantic swordfish may not fish for swordfish with any gear other than handgear. A swordfish will be deemed to have been harvested by longline when it is on board, or offloaded from a vessel using or having on board longline gear.

(iv) Except for persons aboard a vessel that has been issued a limited access North Atlantic swordfish permit under § 635.4, no person may fish for North Atlantic swordfish with, or possess a North Atlantic swordfish taken by, any gear other than handline or rod and reel.

[64 FR 29135, May 28, 1999, as amended at 64 FR 37704, July 13, 1999; 65 FR 47238, Aug. 1, 2000; 66 FR 8904, Feb. 5, 2001; 66 FR 17372, Mar. 30, 2001; 67 FR 45400, July 9, 2002; 67 FR 47469, July 19, 2002; 68 FR 714, Jan. 7, 2003; 68 FR 74785, Dec. 24, 2003; 69 FR 40754, 40755, July 6, 2004; 69 FR 47797, 47798, Aug. 6, 2004]

§ 635.22 Recreational retention limits.

(a) *General*. Atlantic HMS caught, possessed, retained, or landed under these recreational limits may not be sold or transferred to any person for a commercial purpose. Recreational retention limits apply to a longbill spearfish taken or possessed shoreward of the outer boundary of the Atlantic EEZ, to a shark taken from or possessed in the Atlantic EEZ, to a North Atlantic swordfish taken from or possessed in the Atlantic Ocean, and to bluefin and yellowfin tuna taken from or possessed in the Atlantic Ocean. The operator of a vessel for which a retention limit applies is responsible for the vessel retention limit and for the cumulative retention limit based on the number of persons aboard. Federal recreational retention limits may not be combined with any recreational retention limit applicable in state waters.

(b) *Billfish*. No longbill spearfish from the management unit may be possessed shoreward of the outer boundary of the EEZ.

(c) *Sharks*. One shark from either the large coastal, small coastal, or pelagic group may be retained per vessel per trip, subject to the size limits described in § 635.20(e), and, in addition, one Atlantic sharpnose shark and one bonnethead shark may be retained per person per trip. Regardless of the length of a trip, no more than one Atlantic sharpnose shark and one bonnethead shark per person may be possessed on board a vessel. No prohibited sharks from the management unit, which are listed in table 1(d) of appendix A to this part, may be retained. The recreational retention limit for sharks applies to any person who fishes in any manner, except to a person aboard a vessel who has been issued an Atlantic shark LAP under § 635.4. If an Atlantic shark quota is closed under § 635.28, the recreational retention limit for sharks may be applied to persons aboard a vessel issued an Atlantic shark LAP under § 635.4, only if that vessel has also been issued an HMS Charter/Headboat permit issued under § 635.4 and is engaged in a for-hire fishing trip.

(d) *Yellowfin tuna*. Three yellowfin tunas per person per day may be retained. Regardless of the length of a

trip, no more than three yellowfin tuna per person may be possessed on board a vessel. The recreational retention limit for yellowfin tuna applies to a person who fishes in any manner, except to a person aboard a vessel issued an Atlantic Tunas vessel permit under §635.4. The recreational retention limit for yellowfin tuna applies to persons, including captain and crew, aboard a vessel that has been issued an Atlantic HMS Charter/Headboat permit only when the vessel is engaged in a for-hire trip.

(e) *Bluefin tuna*. Refer to §635.23 for Atlantic bluefin tuna recreational retention limits.

(f) *North Atlantic swordfish*. One North Atlantic swordfish per person up to three per vessel per day may be retained. Regardless of the length of a trip, no more than the daily limit of North Atlantic swordfish may be possessed on board a vessel. The recreational retention limit for North Atlantic swordfish applies to a person who fishes in any manner, except to a person aboard a vessel that has been issued a limited access North Atlantic swordfish permit under §635.4.

[64 FR 29135, May 28, 1999, as amended at 64 FR 37704, July 13, 1999; 66 FR 8904, Feb. 5, 2001; 67 FR 77437, Dec. 18, 2002; 68 FR 714, Jan. 7, 2003; 68 FR 74785, Dec. 24, 2003]

§ 635.23 Retention limits for BFT.

The retention limits in this section are subject to the quotas and closure provisions in §§635.27 and 635.28.

(a) *General category*. (1) No person aboard a vessel that has a General category Atlantic Tunas permit may possess, retain, land, or sell a BFT in the school, large school, or small medium size class.

(2) On an RFD, no person aboard a vessel that has been issued a General category Atlantic Tunas permit may fish for, possess, retain, land, or sell a BFT of any size class, and catch-and-release or tag-and-release fishing for BFT under §635.26 is not authorized from such vessel. On days other than RFDs, and when the General category is open, one large medium or giant BFT may be caught and landed from such vessel per day. NMFS will annually publish a schedule of RFDs in the FEDERAL REGISTER.

(3) Regardless of the length of a trip, no more than a single day's retention limit of large medium or giant BFT may be possessed or retained aboard a vessel that has a General category Atlantic Tunas permit. On days other than RFDs, when the General category is open, no person aboard such vessel may continue to fish, and the vessel must immediately proceed to port once the applicable limit for large medium or giant BFT is retained.

(4) To provide for maximum utilization of the quota for BFT, NMFS may increase or decrease the daily retention limit of large medium and giant BFT over a range from zero (on RFDs) to a maximum of three per vessel. Such increase or decrease will be based on a review of dealer reports, daily landing trends, availability of the species on the fishing grounds, and any other relevant factors. NMFS will adjust the daily retention limit specified in paragraph (a)(2) of this section by filing with the Office of the Federal Register for publication notification of the adjustment. Such adjustment will not be effective until at least 3 calendar days after notification is filed with the Office of the Federal Register for publication, except that previously designated RFDs may be waived effective upon closure of the General category fishery so that persons aboard vessels permitted in the General category may conduct catch-and-release or tag-and-release fishing for BFT under §635.26.

(b) *Angling category*. BFT may be retained and landed under the daily limits and quotas applicable to the Angling category by persons aboard vessels issued an HMS Angling permit as follows:

(1) *Large medium and giant BFT*. (i) No large medium or giant BFT may be retained, possessed, landed, or sold in the Gulf of Mexico, except one per vessel per year may be landed if caught incidentally to fishing for other species.

(ii) One per vessel per year may be retained, possessed, and landed outside the Gulf of Mexico.

(iii) When a large medium or giant BFT has been caught and retained under this paragraph (b)(1), no person aboard the vessel may continue to fish, the vessel must immediately proceed to port, and no such BFT may be sold

or transferred to any person for a commercial purpose.

(2) *School, large school, or small medium BFT.* (i) No school, large school, or small medium BFT may be retained, possessed, landed, or sold in the Gulf of Mexico.

(ii) One school, large school, or small medium BFT per vessel per day may be retained, possessed, or landed outside the Gulf of Mexico. Regardless of the length of a trip, no more than a single day's allowable catch of school, large school, or small medium BFT may be possessed or retained.

(3) *Changes to retention limits.* To provide for maximum utilization of the quota for BFT spread over the longest period of time, NMFS may increase or decrease the retention limit for any size class BFT or change a vessel trip limit to an angler limit and vice versa. Such increase or decrease in retention limit will be based on a review of daily landing trends, availability of the species on the fishing grounds, and any other relevant factors. Such adjustments to the retention limits may be applied separately for persons aboard a specific vessel type, such as private vessels, headboats or charter boats. NMFS will adjust the daily retention limit specified in paragraph (b)(2) of this section by filing with the Office of the Federal Register for publication notification of the adjustment. Such adjustment will not be effective until at least 3 calendar days after notification is filed with the Office of the Federal Register for publication.

(c) *HMS Charter/Headboat.* Persons aboard a vessel issued an HMS Charter/Headboat permit may retain and land BFT under the daily limits and quotas applicable to the Angling category or the General category as follows:

(1) When fishing in the Gulf of Mexico, the restrictions applicable to the Angling category specified in paragraph (b)(1) of this section apply.

(2) When fishing other than in the Gulf of Mexico when the fishery for the General category is closed, the restrictions applicable to the Angling category specified in paragraphs (b)(1) through (b)(3) of this section apply.

(3) When fishing other than in the Gulf of Mexico and when the fishery under the General category has not

been closed under § 635.28, a person aboard a vessel that has been issued an HMS Charter/Headboat permit may fish under either the retention limits applicable to the General category specified in paragraphs (a)(2) and (a)(3) of this section or the retention limits applicable to the Angling category specified in paragraphs (b)(2) and (b)(3) of this section. The size category of the first BFT retained will determine the fishing category applicable to the vessel that day.

(d) *Harpoon category.* Persons aboard a vessel permitted in the Atlantic Tunas Harpoon category may retain, possess, or land an unlimited number of giant BFT per day. An incidental catch of only two large medium BFT per vessel per day may be retained, possessed, or landed.

(e) *Purse Seine category.* Persons aboard a vessel permitted in the Atlantic Tunas Purse Seine category,

(1) May retain, possess, land, or sell large medium BFT in amounts not exceeding 15 percent, by weight, of the total amount of giant BFT landed during that fishing year.

(2) May retain, possess or land BFT smaller than the large medium size class that are taken incidentally when fishing for skipjack tuna or yellowfin tuna in an amount not exceeding 1 percent, by weight, of the skipjack tuna and yellowfin tuna landed on that trip. Landings of BFT smaller than the large medium size class may not be sold and are counted against the Purse Seine category BFT quota allocated to that vessel.

(f) *Longline category.* Persons aboard a vessel permitted in the Atlantic Tunas Longline category may retain, possess, land, and sell large medium and giant BFT taken incidentally when fishing for other species. For vessels fishing North or South of 31°00' N. lat., limits on retention, possession, landing and sale are as follows:

(1) One large medium or giant BFT per vessel per trip may be landed, provided that at least 2,000 lb (907 kg) of species other than BFT are legally caught, retained, and offloaded from the same trip and are recorded on the dealer weighout slip as sold. Two large medium or giant BFT per vessel per trip may be landed, provided that at

Fishery Conservation and Management

§ 635.25

least 6,000 lb (2,727 kg) of species other than BFT are legally caught, retained, and offloaded from the same trip and are recorded on the dealer weighout slip as sold. Three large medium or giant BFT per vessel per trip may be landed, provided that at least 30,000 lb (13,620 kg) of species other than BFT are legally caught, retained, and offloaded from the same trip and are recorded on the dealer weighout slip as sold.

(2) NMFS may increase or decrease the Longline category retention limit of large medium and giant BFT over a range from zero to a maximum of three per trip, or, for a given BFT retention limit, increase or decrease the target catch requirement by 25 percent from the level specified in paragraph (f)(1) of this section. Such increase or decrease in the BFT retention limit or target catch requirement will be based on a review of dealer reports, observer reports, vessel logbooks, landing trends, availability of the species on the fishing grounds, and any other relevant factors, and will consider the likelihood of increasing dead discards of BFT and/or exceeding the incidental landings quota established for the pelagic longline fishery. Such adjustments may be made separately for vessels fishing North or South of 31°00' N. lat. NMFS will adjust the retention limits and target catch requirements specified in paragraph (f)(1) of this section by filing the adjustment with the Office of the Federal Register for publication. In no case shall such adjustment be effective less than 21 calendar days after the adjustment is filed with the Office of the Federal Register for publication.

(3) For pelagic longline vessels fishing in the Northeast Distant closed area, as defined under § 635.2, under the exemption specified at § 635.21(c)(2)(v), all BFT taken incidental to fishing for other species while in the Northeast Distant closed area may be retained up to a maximum of 25 mt for all vessels so authorized, notwithstanding the retention limits and target catch requirements specified in paragraph (f)(1) of this section.

(g) *Trap category.* Persons aboard a vessel permitted in the Atlantic Tunas Trap category may retain, possess,

land, and sell each fishing year only one large medium or giant BFT that is taken incidentally while fishing for other species with a pound net or fish weir. No other Atlantic tunas caught in a pound net or fish weir may be retained.

[64 FR 29135, May 28, 1999, as amended at 65 FR 42887, July 12, 2000; 67 FR 77438, Dec. 18, 2002; 68 FR 32417, May 30, 2003; 68 FR 56788, Oct. 2, 2003; 68 FR 74511, Dec. 24, 2003; 69 FR 40758, July 6, 2004; 70 FR 10900, Mar. 7, 2005]

§ 635.24 Commercial retention limits for sharks and swordfish.

The retention limits in this section are subject to the quotas and closure provisions in §§ 635.27 and 635.28.

(a) *Sharks.* (1) Persons who own or operate a vessel that has been issued a directed ILAP or LAP for shark may retain, possess or land no more than 4,000 lb (1,814 kg), dw, of LCS per trip.

(2) Persons who own or operate a vessel that has been issued an incidental catch ILAP or LAP for sharks may retain, possess or land no more than 5 LCS and 16 SCS and pelagic sharks, combined, per trip.

(b) *Swordfish.* (1) Persons aboard a vessel that has been issued an incidental ILAP or LAP for swordfish may retain, possess, or land no more than two swordfish per trip in or from the Atlantic Ocean north of 5° N. lat.

(2) Persons aboard a vessel in the squid trawl fishery that has been issued an incidental ILAP or LAP for swordfish may retain, possess, or land no more than five swordfish per trip in or from the Atlantic Ocean north of 5° N. lat. A vessel is considered to be in the squid trawl fishery when it has no commercial fishing gear other than trawls on board and when squid constitute not less than 75 percent by weight of the total fish on board or offloaded from the vessel.

§ 635.25 Fishing areas.

(a) *General.* Persons on board fishing vessels subject to the jurisdiction of the United States are authorized to fish for, catch, retain, or land species governed by an international catch sharing agreement implemented under this part only in or from those management areas for which the United States has received an allocation.

§ 635.26

(b) *Exemptions.* Persons and vessels subject to the jurisdiction of the United States intending to fish for regulated species in fishing areas not otherwise authorized under this part, whether for the purposes of scientific research or commercial fishing under a chartering arrangement, must have a permit from NMFS issued under § 635.32.

(c) *Atlantic bluefin tuna.* No person aboard a U.S. fishing vessel shall fish for bluefin tuna in, or possess on board that fishing vessel a bluefin tuna taken from, the Mediterranean Sea.

[67 FR 70026, Nov. 20, 2002]

§ 635.26 Catch and release.

(a) *BFT.* (1) Notwithstanding the other provisions of this part, a person aboard a vessel issued a permit under this part, other than a person aboard a vessel permitted in the General category on a designated RFD, may fish with rod and reel or handline gear for BFT under a catch-and-release or tag-and-release program. When fishing under a tag-and-release program, vessel owner/operators should use tags issued or approved by NMFS. If a BFT is tagged, the tag information, including information on any previously applied tag remaining on the fish, must be reported to NMFS. All BFT caught under the catch-and-release or tag-and-release programs must be returned to the sea immediately with a minimum of injury.

(2) Persons may obtain NMFS-issued conventional tags, reporting cards, and detailed instructions for their use from the NMFS Cooperative Tagging Center. Persons may use a conventional tag obtained from a source other than NMFS to tag BFT, provided the use of such tags is registered each year with the Cooperative Tagging Center and the NMFS program manager has approved the use of a conventional tag from that source. An angler using an alternative source of tags wishing to tag BFT may contact the NMFS Cooperative Tagging Center at the Southeast Fishery Science Center.

(3) An angler registering for the HMS tagging program is required to provide his or her name, address, phone number and, if applicable, the identity of the alternate source of tags.

50 CFR Ch. VI (10–1–05 Edition)

(b) *Billfish.* NMFS is encouraging further catch and release of Atlantic billfish by establishing a recreational catch-and-release fishery management program, consistent with the guidance of § 600.350(c).

(c) *Sharks.* Notwithstanding the other provisions of this part, a person may fish for white sharks (*Carcharodon carcharias*) with rod and reel, provided the person releases such fish to the sea immediately with a minimum of injury, and that such fish may not be removed from the water.

[64 FR 29135, May 28, 1999, as amended at 65 FR 42887, July 12, 2000; 70 FR 10900, Mar. 7, 2005]

§ 635.27 Quotas.

(a) *BFT.* Consistent with ICCAT recommendations, NMFS will subtract any allowance for dead discards from the fishing year's total U.S. quota for BFT that can be caught and allocate the remainder to be retained, possessed, or landed by persons and vessels subject to U.S. jurisdiction. The total landing quota will be divided among the General, Angling, Harpoon, Purse Seine, Longline, and Trap categories. Consistent with these allocations and other applicable restrictions of this part, BFT may be taken by persons aboard vessels issued Atlantic Tunas permits, HMS Angling permits, or HMS Charter/Headboat permits. Allocations of the BFT landings quota will be made according to the following percentages: General—47.1 percent; Angling—19.7 percent, which includes the school BFT held in reserve as described under paragraph (a)(7)(ii) of this section; Harpoon—3.9 percent; Purse Seine—18.6 percent; Longline—8.1 percent; and Trap—0.1 percent. The remaining 2.5 percent of the BFT landings quota will be held in reserve for inseason adjustments, to compensate for overharvest in any category other than the Angling category school BFT subquota or for fishery independent research. NMFS may apportion a landings quota allocated to any category to specified fishing periods or to geographic areas. BFT landings quotas are specified in whole weight.

(1) *General category landings quota.* Prior to each fishing year, NMFS will set the General category effort control

Fishery Conservation and Management

§ 635.27

schedule, including time-period subquotas and restricted-fishing days, through proposed and final specifications published in the FEDERAL REGISTER.

(i) Catches from vessels for which General category Atlantic Tunas permits have been issued and certain catches from vessels for which an HMS Charter/Headboat permit has been issued are counted against the General category landings quota. See § 635.23 (c)(3) regarding landings by vessels with an HMS Charter/Headboat permit that are counted against the General category landings quota. The total amount of large medium and giant BFT that may be caught, retained, possessed, landed, or sold under the General category landings quota is 47.1 percent of the overall U.S. BFT landings quota, less 10 mt which is set aside for an area comprising the waters south and west of a straight line originating at a point on the southern shore of Long Island at 72° 27' W. long. (Shinnecock Inlet) and running SSE 150° true, and north of 38°47' N. lat. as specified in §635.27(a)(1)(iii). This 47.1 percent, less the 10 mt set aside as specified in §635.27(a)(1)(iii), is apportioned as follows:

(A) June 1 through August 31—60 percent;

(B) September 1 through September 30—30 percent; and

(C) October 1 through January 31 - 10 percent.

(ii) NMFS will adjust each period's apportionment based on overharvest or underharvest in the prior period.

(iii) When the coastwide General category fishery has been closed in any quota period under §637.28(a)(1), NMFS may publish notification in the FEDERAL REGISTER to make available all or part of the 10 mt landings quota set aside for an area comprising the waters south and west of a straight line originating at a point on the southern shore of Long Island at 72°27' W. long. (Shinnecock Inlet) and running SSE 150° true, and north of 38°47' N. lat. The daily catch limit for the set-aside area will be one large medium or giant BFT per vessel per day. Upon the effective date of the set-aside fishery, fishing for, retaining, or landing large medium or giant BFT is authorized only within

the set-aside area. Any portion of the set-aside amount not harvested prior to the reopening of the coastwide General category fishery in the subsequent quota period established under paragraph (a)(1)(i) of this section may be carried over for the purpose of renewing the set-aside fishery at a later date.

(2) *Angling category landings quota.* The total amount of BFT that may be caught, retained, possessed, and landed by anglers aboard vessels for which an HMS Angling permit or an HMS Charter/Headboat permit has been issued is 19.7 percent of the overall annual U.S. BFT landings quota. No more than 2.3 percent of the annual Angling category landings quota may be large medium or giant BFT and, over each 4-consecutive-year period, no more than 8 percent of the overall U.S. BFT landings quota may be school BFT. The Angling category landings quota includes the amount of school BFT held in reserve as specified under paragraph (a)(7)(ii) of this section. The size class subquotas for BFT are further subdivided as follows:

(i) Under paragraph (a)(7)(ii) of this section, 52.8 percent of the school BFT Angling category landings quota, after adjustment for the school BFT quota held in reserve, may be caught, retained, possessed, or landed south of 39°18' N. lat., with the remaining quota being available to the fisheries north of the dividing line.

(ii) An amount equal to 52.8 percent of the large school/small medium BFT Angling category quota may be caught, retained, possessed, or landed south of 39°18' N. lat., with the remaining quota being available to the fisheries north of the dividing line.

(iii) An amount equal to 66.7 percent of the large medium and giant BFT Angling category quota may be caught, retained, possessed, or landed south of 39°18' N. lat., with the remaining quota being available to the fisheries north of the dividing line.

(3) *Longline category quota.* The total amount of large medium and giant BFT that may be caught incidentally and retained, possessed, or landed by vessels for which Longline category Atlantic tunas permits have been issued is 8.1 percent of the overall U.S. BFT

quota. In the initial quota specifications issued under paragraph (a) of this section, no more than 60.0 percent of the Longline category quota may be allocated for landing in the area south of 31° 00' N. lat. In addition, 25 mt shall be allocated for incidental catch by pelagic longline vessels fishing in the Northeast Distant closed area, as defined under § 635.2, under the exemption specified at § 635.21(c)(2)(v).

(4) *Purse Seine category quota.* (i) The total amount of large medium and giant BFT that may be caught, retained, possessed, or landed by vessels for which Purse Seine category Atlantic Tunas permits have been issued is 18.6 percent of the overall U.S. BFT landings quota. The directed purse seine fishery for BFT commences on July 15 of each year unless NMFS takes action to delay the season start date. Based on cumulative and projected landings in other commercial fishing categories, and the potential for gear conflicts on the fishing grounds or market impacts due to oversupply, NMFS may delay the BFT purse seine season start date from July 15 to no later than August 15 by filing an adjustment with the Office of the Federal Register for publication. In no case shall such adjustment be filed less than 14 calendar days prior to July 15.

(ii) An owner of a vessel for which a Purse Seine category Atlantic Tunas permit has been issued must apply in writing to NMFS at an address designated by NMFS, for an allocation of BFT from the Purse Seine category quota. The application must be postmarked no later than April 15 for an allocation of the quota that becomes available on June 1.

(iii) On or about May 1, NMFS will make equal allocations of the available size classes of BFT among purse seine vessel permit holders so requesting, adjusted as necessary to account for underharvest or overharvest by each participating vessel or the vessel it replaces from the previous fishing year, consistent with paragraph (a)(9)(i) of this section. Such allocations are freely transferable, in whole or in part, among vessels that have Purse Seine category Atlantic Tunas permits. Any purse seine vessel permit holder intending to land bluefin tuna under an

allocation transferred from another purse seine vessel permit holder must provide written notice of such intent to NMFS, at an address designated by NMFS, 3 days before landing any such bluefin tuna. Such notification must include the transfer date, amount (mt) transferred, and the permit numbers of vessels involved in the transfer. Trip or seasonal catch limits otherwise applicable under § 635.23(e) are not altered by transfers of bluefin tuna allocation. Purse seine vessel permit holders who, through landing and/or transfer, have no remaining bluefin tuna allocation may not use their permitted vessels in any fishery in which Atlantic bluefin tuna might be caught, regardless of whether retained.

(iv) An owner of a vessel for which a Purse Seine category Atlantic Tunas permit has been issued may apply to NMFS to permanently consolidate Purse Seine category vessel permits issued under § 635.4. Upon written approval of consolidation by NMFS, the Purse Seine Category Atlantic Tunas Permit of a transferring vessel will be canceled, and the receiving owner may apply for allocations of BFT commensurate with the number of consolidated permits. An owner of a purse seine vessel whose permit is canceled through consolidation may not use his or her vessel in any purse seine fishery in which BFT might be caught.

(5) *Harpoon category quota.* The total amount of large medium and giant BFT that may be caught, retained, possessed, landed, or sold by vessels for which Harpoon category Atlantic Tunas permits have been issued is 3.9 percent of the overall U.S. BFT quota. The Harpoon category fishery closes on November 15 each year.

(6) *Trap category quota.* The total amount of large medium and giant BFT that may be caught, retained, possessed, or landed by vessels for which Trap category Atlantic Tunas permits have been issued is 0.1 percent of the overall U.S. BFT quota.

(7) *Reserve.* (i) The total amount of BFT that is held in reserve for inseason adjustments and fishery-independent research using quotas or subquotas other than the Angling category school BFT subquota, is 2.5 percent of the overall U.S. BFT quota. Consistent

with paragraph (a)(7)(iii) of this section, NMFS may allocate any portion of this reserve for inseason adjustments to any category quota in the fishery, other than the Angling category school BFT subquota.

(ii) The total amount of school BFT that is held in reserve for inseason adjustments and fishery independent research is 18.5 percent of the total school BFT quota for the Angling category as described under paragraph (a)(2) of this section, which is in addition to the amounts specified in paragraph (a)(7)(i) of this section. Consistent with paragraph (a)(7)(iii) of this section, NMFS may allocate any portion of the school BFT held in reserve for inseason adjustments to the Angling category.

(iii) NMFS will file with the Office of the Federal Register for publication notification of any inseason adjustment. Before making any such adjustment, NMFS will consider the following factors:

(A) The usefulness of information obtained from catches in the particular category for biological sampling and monitoring of the status of the stock.

(B) The catches of the particular category quota to date and the likelihood of closure of that segment of the fishery if no allocation is made.

(C) The projected ability of the vessels fishing under the particular category quota to harvest the additional amount of BFT before the end of the fishing year.

(D) The estimated amounts by which quotas for other gear categories of the fishery might be exceeded.

(E) Effects of the transfer on BFT rebuilding and overfishing.

(F) Effects of the transfer on accomplishing the objectives of the Fishery Management Plan for Atlantic Tunas, Swordfish, and Sharks.

(8) *Inseason adjustments.* Within a fishing year, NMFS may transfer quotas among categories or, as appropriate, subcategories. If it is determined, based on the factors in paragraphs (a)(7)(iii)(A) through (a)(7)(iii)(F) of this section and the probability of exceeding the total quota, that vessels fishing under any category or subcategory quota are not likely to take that quota, NMFS may

transfer inseason any portion of the remaining quota of that fishing category to any other fishing category or to the reserve as specified in paragraphs (a)(7)(i) and (a)(7)(ii) of this section. NMFS will file with the Office of the Federal Register for publication notification of any inseason adjustment.

(9) *Annual adjustments.* (i) If NMFS determines, based on landings statistics and other available information, that a BFT quota in any category or, as appropriate, subcategory has been exceeded or has not been reached, with the exception of the Purse Seine category, NMFS shall subtract the overharvest from, or add the underharvest to, that quota category for the following fishing year, provided that the total of the adjusted category quotas and the Reserve is consistent with a recommendation of ICCAT regarding country quotas, the take of school BFT, and the allowance for dead discards. For the Purse Seine category, if NMFS determines, based on landings statistics and other available information, that a purse seine vessel's allocation, as adjusted, has been exceeded or has not been reached, NMFS shall subtract the overharvest from, or add the underharvest to, that vessel's allocation for the following fishing year.

(ii) NMFS may allocate any quota remaining in the reserve at the end of a fishing year to account for overharvest in any fishing category, provided such allocation is consistent with the criteria specified in paragraph (a)(7)(iii) of this section.

(iii) Regardless of the estimated landings in any year, NMFS may adjust the annual school BFT quota to ensure that the average take of school BFT over each 4-consecutive-year period beginning in the 1999 fishing year does not exceed 8 percent by weight of the total U.S. BFT quota for that period.

(iv) If NMFS determines that the annual dead discard allowance has been exceeded in one fishing year, NMFS shall subtract the amount in excess of the allowance from the amount of BFT that can be landed in the subsequent fishing year by those categories accounting for the dead discards. If NMFS determines that the annual dead discard allowance has not been

reached, NMFS may add one-half of the remainder to the amount of BFT that can be landed in the subsequent fishing year. Such amount may be allocated to individual fishing categories or to the Reserve.

(v) NMFS will file with the Office of the Federal Register for publication notification of the amount subtracted or added and the basis for the quota reductions or increases made pursuant to paragraphs (a)(9)(i) through (a)(9)(iv) of this section.

(b) *Sharks.* (1) *Commercial quotas.* The commercial quotas for sharks specified in paragraphs (b)(1)(i) through (b)(1)(vi) of this section apply to sharks harvested from the management unit, regardless of where harvested. Commercial quotas are specified for each of the management groups of large coastal sharks, small coastal sharks, and pelagic sharks. No prohibited sharks from the management unit, which are listed in table 1(d) of appendix A to this part, may be retained except as authorized under § 635.32.

(i) *Fishing seasons.* The commercial quotas for large coastal sharks, small coastal sharks, and pelagic sharks will be split among three fishing seasons: January 1 through April 30, May 1 through August 31, and September 1 through December 31.

(ii) *Regions.* The commercial quotas for large coastal sharks and small coastal sharks are split between three regions. The regions are: Gulf of Mexico, South Atlantic, and North Atlantic. For the purposes of this section, the Gulf of Mexico region includes all waters of the U.S. EEZ west and north of the boundary stipulated at 50 CFR 600.105(c). The South Atlantic region includes all waters east of the Gulf of Mexico region north to the border between North Carolina and Virginia at roughly 36°30' N. lat., including the waters surrounding the Caribbean. The North Atlantic region includes all waters north of the North Carolina and Virginia border at roughly 36°30' N. lat.

(iii) *Large coastal sharks.* The annual commercial quota for large coastal sharks is 1,017 mt dw, unless adjusted pursuant to paragraph (b)(1)(vi) of this section. This annual quota is split among the regions as follows: 52 percent to the Gulf of Mexico, 41 percent

to the South Atlantic, and 7 percent to the North Atlantic. The length of each fishing season will be determined based on the projected catch rates, available quota, and other relevant factors. Consistent with the Administrative Procedure Act, NMFS will publish in the FEDERAL REGISTER, prior to the beginning of the season, any annual adjustments.

(iv) *Small coastal sharks.* The annual commercial quota for small coastal sharks is 454 mt dw, unless adjusted pursuant to paragraph (b)(1)(vi) of this section. This annual quota is split among the regions as follows: 10 percent to the Gulf of Mexico, 87 percent to the South Atlantic, and 3 percent to the North Atlantic.

(v) *Pelagic sharks.* The annual commercial quotas for pelagic sharks are 92 mt dw for porbeagle sharks, 273 mt dw for blue sharks, and 488 mt dw for pelagic sharks other than porbeagle or blue sharks, unless adjusted pursuant to paragraph (b)(1)(vi) of this section.

(vi) *Annual adjustments.* (A) NMFS will adjust the next year's fishing season quotas for large coastal, small coastal, and pelagic sharks to reflect actual landings during any fishing season in any particular region. For example, a commercial quota underharvest or overharvest in the fishing season in one region that begins January 1 will result in an equivalent increase or decrease in the following year's quota for that region for the fishing season that begins January 1.

(I) NMFS will adjust a region's annual quota based on the following criteria: if a region has an overharvest of 10 percent or greater of its regional annual quota, and any other region or regions has an underharvest of more than 10 percent of their respective quotas, then NMFS may transfer up to 10 percent of the quota from the region or regions with the underharvest to the region with the overharvest. Any overharvest above 10 percent would be counted against that region's quota for the same season of the following year. If the underharvest is less than 10 percent of the quota for any other region or regions, NMFS would not transfer any quota, even if another region or regions had an overharvest in excess of 10 percent.

(2) Other factors NMFS would consider before making a transfer include, but are not limited to, the likelihood of protected species interactions and by-catch rates within a region, historic landings for the region, total landings reported for all regions at the end of their respective seasons, the number of storms during the open season, the size of a region's quotas, the amount of available quota remaining, the projected ability of the vessels fishing in the region from which the quota is proposed to be removed to harvest the remaining quota, and the projected ability of vessels fishing in the region receiving the quota to harvest the additional quota.

(3) Quotas for each region would be further divided equally (33.3 percent/season) among the trimester seasons in the Gulf of Mexico and the South Atlantic regions, and based upon historic landings of 4, 88, and 8 percent for the first, second, and third trimester seasons, respectively, in the North Atlantic region. NMFS would make adjustments to trimester season quotas based on a number of factors including, but not limited to: the historic landings for each trimester season in a particular region, total landings reported for all seasons at the end of their respective seasons, the number of storms during each open season, the size of each seasonal quota, the amount of available quota remaining, and the projected ability of vessels fishing in the season receiving additional quota to harvest the additional quota.

(4) Consistent with the Administrative Procedure Act, NMFS will publish in the FEDERAL REGISTER, prior to the beginning of the season, any annual adjustments.

(B) NMFS will reduce the annual commercial quota for pelagic sharks by the amount that the blue shark quota is exceeded prior to the start of the next fishing season.

(C) Sharks taken and landed from state waters are counted against the fishery quota for the applicable region and time period.

(2) *Public display and research quota.* The annual quota for persons who collect sharks from any of the management groups under a display permit or EFP is 60 mt whole weight (43 mt dw).

All sharks collected under the authority of a display permit or EFP, subject to restrictions at § 635.32, will be counted against this quota.

(c) *Swordfish*—(1) *Categories.* Consistent with ICCAT recommendations, the fishing year's total amount of swordfish that may be caught, retained, possessed, or landed by persons and vessels subject to U.S. jurisdiction is divided into quotas for the North Atlantic swordfish stock and the South Atlantic swordfish stock. The quota for the North Atlantic swordfish stock is further divided into equal semi-annual directed fishery quotas, an annual incidental catch quota for fishermen targeting other species or taking swordfish recreationally, and a reserve category.

(i) *North Atlantic swordfish.* (A) A swordfish from the North Atlantic swordfish stock caught prior to the directed fishery closure by a vessel for which a directed fishery permit, or a handgear permit for swordfish, has been issued is counted against the directed fishery quota. The annual fishery quota, not adjusted for over- or underharvests, is 2,937.6 mt dw for 2004 and 2,937.6 mt dw for 2005. In 2004 and 2005, the annual quota is subdivided into two equal semiannual quotas of 1,468.8 mt dw: one for June 1 through November 30, and the other for December 1 through May 31 of the following year.

(B) A swordfish from the North Atlantic swordfish stock landed by a vessel for which an incidental catch permit for swordfish or an HMS Angling or Charter/Headboat permit has been issued, or caught after the effective date of a closure of the directed fishery from a vessel for which a directed fishery permit or a handgear permit for swordfish has been issued, is counted against the incidental catch quota.

(C) A dead discard allowance of 60.2 mt dw is established for North Atlantic swordfish in 2003, but the allowance is reduced to zero in 2004 and beyond. All swordfish discarded dead from U.S. fishing vessels in 2004 and beyond, regardless of whether such vessels are permitted under this part, shall be counted against the annual directed fishing quota.

(D) A portion of the total allowable catch of North Atlantic swordfish shall be held in reserve for inseason adjustments to fishing categories, to compensate for projected or actual overharvest in any category, for fishery independent research, or for other purposes consistent with management objectives.

(E) In the event of an overharvest of South Atlantic swordfish, up to 150.4 mt dw of swordfish landed between 5 degrees North and 5 degrees South latitude may be applied against the North Atlantic swordfish quota. Otherwise, swordfish landed from this area shall be applied against the South Atlantic swordfish quota. For example, if the South Atlantic swordfish quota were 100 mt dw, and 50 mt dw were landed between 5 degrees North and 5 degrees South latitude, and 75 mt dw were caught south of 5 degrees South latitude, then 25 mt dw of the swordfish caught between 5 degrees North and 5 degrees South latitude would be applied against the North Atlantic swordfish quota. If only 25 mt dw of swordfish were caught between 5 degrees North and 5 degrees South latitude, and 150 mt dw of swordfish were caught south of 5 degrees South latitude, 25 mt dw would be applied against the North Atlantic swordfish quota. The remaining 50 mt dw overharvest would be counted against the following year's South Atlantic swordfish quota.

(ii) *South Atlantic swordfish.* From June 1, 2003, to May 31, 2006, the annual directed fishery quota for the South Atlantic swordfish stock is 75.2 mt dw. Beginning June 1, 2006, the annual directed fishery quota for the South Atlantic swordfish stock is 90.2 mt dw. The entire quota for the South Atlantic swordfish stock is reserved for vessels with pelagic longline gear onboard and for which a directed fishery permit for swordfish has been issued; retention of swordfish caught incidental to other fishing activities or with other fishing gear is prohibited in the Atlantic Ocean south of 5 degrees North latitude.

(2) *Inseason adjustments.* (i) NMFS may adjust the December 1 through May 31 semiannual directed fishery quota or, as applicable, the reserve category, to reflect actual directed fishery

and incidental fishing category catches during the June 1 through November 30 semiannual period.

(ii) If NMFS determines that the annual incidental catch quota will not be taken before the end of the fishing year, the excess quota may be allocated to the directed fishery quota or to the reserve.

(iii) If NMFS determines that it is necessary to close the directed swordfish fishery prior to the scheduled end of a semi-annual fishing season, any estimated overharvest or underharvest of the directed fishery quota for that semi-annual season will be used to adjust the annual incidental catch quota or the reserve as necessary to maintain landings and discards within the required annual limits.

(iv) NMFS will file with the Office of the Federal Register for publication notification of any inseason swordfish quota adjustment and its apportionment to fishing categories or to the reserve made under this paragraph (c)(2) of this section.

(3) *Annual adjustments.* (i) Except for the carryover provisions of paragraphs (c)(3)(ii) and (iii) of this section, NMFS will file with the Office of the Federal Register for publication notification of any adjustment to the annual quota necessary to meet the objectives of the Fishery Management Plan for Atlantic Tunas, Swordfish and Sharks. NMFS will provide at least 30 days opportunity for public comment.

(ii) If consistent with applicable ICCAT recommendations, total landings above or below the specific North Atlantic or South Atlantic swordfish annual quota shall be subtracted from, or added to, the following year's quota for that area. As necessary to meet management objectives, such carryover adjustments may be apportioned to fishing categories and/or to the reserve. Any adjustments to the 12-month directed fishery quota will be apportioned equally between the two semiannual fishing seasons. NMFS will file with the Office of the Federal Register for publication notification of any adjustment or apportionment made under this paragraph (c)(3)(ii).

(iii) The dressed weight equivalent of the amount by which dead discards exceed the allowance specified at paragraph (c)(1)(i)(C) of this section shall be subtracted from the landings quota in the following fishing year or from the reserve category. NMFS will file with the Office of the Federal Register for publication notification of any adjustment made under this paragraph (c)(3)(iii).

[64 FR 29135, May 28, 1999, as amended at 64 FR 58796, Nov. 1, 1999; 65 FR 42887, July 12, 2000; 65 FR 77526, Dec. 12, 2000; 66 FR 8904, Feb. 5, 2001; 66 FR 42805, Aug. 15, 2001; 66 FR 67121, Dec. 28, 2001; 67 FR 70026, Nov. 20, 2002; 67 FR 77438, Dec. 18, 2002; 68 FR 32417, May 30, 2003; 68 FR 56788, Oct. 2, 2003; 68 FR 74511, 74785, Dec. 24, 2003; 69 FR 40758, July 6, 2004; 69 FR 68093, Nov. 23, 2004; 69 FR 69544, Nov. 30, 2004]

§ 635.28 Closures.

(a) *BFT*. (1) When a BFT quota, other than the Purse Seine category quota specified in § 635.27(a)(4), is reached, or is projected to be reached, NMFS will file with the Office of the Federal Register for publication notification of closure. On and after the effective date and time of such notification, for the remainder of the fishing year or for a specified period as indicated in the notice, fishing for, retaining, possessing, or landing BFT under that quota is prohibited until the opening of the subsequent quota period or until such date as specified in the notice.

(2) From the commencement date of the directed BFT purse seine fishery, as provided under § 635.27(a)(4)(i), through December 31, the owner or operator of a vessel that has been allocated a portion of the Purse Seine category quota under § 635.27(a)(4) may fish for BFT. Such vessel may be used to fish for yellowfin, bigeye, albacore, or skipjack tuna at any time, however, landings of BFT taken incidental to fisheries targeting other Atlantic tunas or in any fishery in which BFT might be caught will be deducted from the individual vessel's quota for the following BFT fishing season. Upon reaching its individual vessel allocation of BFT, the vessel may not participate in a directed purse seine fishery for Atlantic tunas or in any fishery in which BFT might be caught for the remainder of the fishing year.

(3) If NMFS determines that variations in seasonal distribution, abundance, or migration patterns of BFT, or the catch rate in one area, precludes anglers in another area from a reasonable opportunity to harvest a portion of the Angling category quota, NMFS may close all or part of the fishery under that category and may reopen it at a later date if NMFS determines that BFT have migrated into the other area. In determining the need for any such interim closure or area closure, NMFS will consider:

(i) The usefulness of information obtained from catches of a particular geographic area of the fishery for biological sampling and for monitoring the status of the stock;

(ii) The current year catches from the particular geographic area relative to the catches recorded for that area during the preceding 4 years;

(iii) The catches from the particular geographic area to date relative to the entire category and the likelihood of closure of that entire category of the fishery if no interim closure or area closure is effected; and

(iv) The projected ability of the entire category to harvest the remaining amount of BFT before the anticipated end of the fishing season.

(b) *Sharks*. (1) The commercial fishery for large coastal sharks will remain open in each region under the fishing seasons and regional quotas, as specified at § 635.27(b)(1). From the effective date and time of a season closure in a particular region until additional quota becomes available, the fishery for large coastal sharks in that particular region is closed.

(2) When the fishing season quota for small coastal sharks or pelagic sharks specified in § 635.27(b)(1) is reached for a particular region, or is projected to be reached, NMFS will file for publication with the Office of the Federal Register, a notice of closure at least 14 days before the effective date. From the effective date and time of the closure until additional quota becomes available, the fishery for the appropriate shark species group in that particular region is closed.

(3) When the fishery for a shark species group in a particular region is

closed, a fishing vessel, issued an Atlantic Shark LAP pursuant to § 635.4, may not possess or sell a shark of that species group in that region, except under the conditions specified in § 635.22 (a) and (c), and a shark dealer in that region, issued a permit pursuant to § 635.4, may not purchase or receive a shark of that species group from a vessel issued an Atlantic Shark LAP, except that a permitted shark dealer or processor may possess sharks that were harvested, off-loaded, and sold, traded, or bartered, prior to the effective date of the regional closure and were held in storage. Under a regional closure for a shark species group, a shark dealer issued a permit pursuant to § 635.4 may, in accordance with state regulations, purchase or receive a shark of that species group if the sharks were harvested, off-loaded, and sold, traded, or bartered from a vessel that fishes only in state waters and that has not been issued a Shark LAP, HMS Angling permit, or HMS Charter/Headboat permit pursuant to § 635.4.

(c) *Swordfish*—(1) *Directed fishery closure*. When the annual or semiannual directed fishery quota specified in § 635.27(c)(1)(i) or (ii) is reached, or is projected to be reached, NMFS will file with the Office of the Federal Register for publication notification of closure at least 14 days before the effective date. From the effective date and time of the closure until additional directed fishery quota becomes available, the directed fishery for the appropriate stock is closed and the following catch limits apply:

(i) When the directed fishery for the North Atlantic swordfish stock is closed,

(A) No more than 15 swordfish per trip may be possessed in or from the Atlantic Ocean north of 5° N. lat. or landed in an Atlantic coastal state on a vessel using or having on board a pelagic longline. However, North Atlantic swordfish legally taken prior to the effective date of the closure may be possessed in the Atlantic Ocean north of 5° N. lat. or landed in an Atlantic coastal state on a vessel with a pelagic longline on board, provided the harvesting vessel does no fishing after the closure in the Atlantic Ocean north of 5° N. lat., and reports positions with a

vessel monitoring system, as specified in § 635.69. Additionally, legally taken swordfish from the South Atlantic swordfish stock may be possessed or landed north of 5° N. lat. provided the harvesting vessel does no fishing on that trip north of 5° N. lat., and reports positions with a vessel monitoring system as specified in § 635.69. NMFS may adjust the incidental catch retention limit by filing with the Office of the Federal Register for publication notification of the change at least 14 days before the effective date. Changes in the incidental catch limits will be based upon the length of the directed fishery closure and the estimated rate of catch by vessels fishing under the incidental catch quota.

(B) No more than 2 swordfish per trip may be possessed in or from the Atlantic Ocean north of 5° N. lat. or landed in an Atlantic coastal state on a vessel that has been issued a handgear permit under § 635.4(f)(1) provided that such swordfish were not taken with a harpoon.

(ii) When the directed fishery for the South Atlantic swordfish stock is closed, swordfish from that stock taken incidental to fishing for other species may not be retained.

(2) *Incidental catch closure*. When the annual incidental catch quota specified in § 635.27(c)(1)(i) is reached, or is projected to be reached, NMFS will file with the Office of the Federal Register for publication notification of closure. From the effective date and time of such notification until an additional incidental catch quota becomes available, no swordfish may be possessed in or from the Atlantic Ocean north of 5° N. lat. or landed in an Atlantic coastal state, and a swordfish in or from the Atlantic Ocean north of 5° N. lat. may not be sold. However, legally taken swordfish from the South Atlantic swordfish stock may be possessed in the Atlantic Ocean north of 5° N. lat. or landed in an Atlantic coastal state on a vessel with a longline, provided the harvesting vessel does not fish on that trip in the Atlantic Ocean north of 5° N. lat. and reports positions with

Fishery Conservation and Management

§ 635.30

a vessel monitoring system, as specified in § 635.69.

[64 FR 29135, May 28, 1999, as amended at 64 FR 37705, July 13, 1999; 66 FR 67121, Dec. 28, 2001; 67 FR 77438, Dec. 18, 2002; 68 FR 63741, Nov. 10, 2003; 68 FR 74511, 74786, Dec. 24, 2003]

§ 635.29 Transfer at sea.

(a) Persons may not transfer an Atlantic tuna, blue marlin, white marlin, or swordfish at sea in the Atlantic Ocean, regardless of where the fish was harvested. However, an owner or operator of a vessel for which a Purse Seine category Atlantic Tunas permit has been issued under § 635.4 may transfer large medium and giant BFT at sea from the net of the catching vessel to another vessel for which a Purse Seine category Atlantic Tunas permit has been issued, provided the amount transferred does not cause the receiving vessel to exceed its currently authorized vessel allocation, including incidental catch limits.

(b) Persons may not transfer a shark or a sailfish at sea shoreward of the outer boundary of the EEZ, regardless of where the shark was harvested, and persons may not transfer at sea a shark or a sailfish taken shoreward of the outer boundary of the EEZ, regardless of where the transfer takes place.

§ 635.30 Possession at sea and landing.

(a) *Atlantic tunas.* Persons that own or operate a fishing vessel that possesses an Atlantic tuna in the Atlantic Ocean or that lands an Atlantic tuna in an Atlantic coastal port must maintain such Atlantic tuna through offloading either in round form or eviscerated with the head and fins removed, provided one pectoral fin and the tail remain attached.

(b) *Billfish.* Any person that possesses a blue marlin or a white marlin taken from its management unit or a sailfish taken shoreward of the outer boundary of the EEZ or lands a blue marlin or a white marlin in an Atlantic coastal port must maintain such billfish with its head, fins, and bill intact through offloading. Persons may eviscerate such billfish, but it must otherwise be maintained whole.

(c) *Shark.* (1) Notwithstanding the regulations issued at part 600, subpart N of this chapter, no person who owns

or operates a vessel issued a Federal Atlantic commercial shark limited access permit shall possess or offload wet shark fins in a quantity that exceeds 5 percent of the dressed weight of the shark carcasses. No person shall possess a shark fin on board a fishing vessel after the vessel's first point of landing. While shark fins are on board and when shark fins are being offloaded, persons issued a Federal Atlantic commercial shark limited access permit are subject to the regulations at part 600, subpart N, of this chapter.

(2) A person who owns or operates a vessel that has been issued a Federal Atlantic commercial shark limited access permit may not fillet a shark at sea. A person may eviscerate and remove the head and fins, but must retain the fins with the dressed carcasses. While on board and when offloaded, wet shark fins may not exceed 5 percent of the dressed weight of the carcasses, in accordance with the regulations at part 600, subpart N, of this chapter.

(3) A person who owns or operates a vessel that has been issued a Federal Atlantic commercial shark limited access permit and who lands shark in an Atlantic coastal port must have all fins and carcasses weighed and recorded on the weighout slips specified in § 635.5(a)(2) and in accordance with regulations at part 600, subpart N, of this chapter. Persons may not possess a shark fin on board a fishing vessel after the vessel's first point of landing. The wet fins may not exceed 5 percent of the dressed weight of the carcasses.

(4) Persons aboard a vessel that does not have a commercial permit for shark must maintain a shark in or from the EEZ intact through landing—the head, tail, or fins may not be removed. The shark may be bled.

(d) *Swordfish.* Persons that own or operate a fishing vessel that possesses a swordfish in the Atlantic Ocean or lands a swordfish in an Atlantic coastal port must maintain such swordfish in round or dressed form through offloading.

[64 FR 29135, May 28, 1999, as amended at 67 FR 6201, Feb. 11, 2002; 69 FR 53362, Sept. 1, 2004]

§ 635.31 Restrictions on sale and purchase.

(a) *Atlantic tunas.* (1) Persons that own or operate a vessel from which an Atlantic tuna is landed or offloaded may sell such Atlantic tuna only if that vessel has a valid HMS Charter/Headboat permit, or a General, Harpoon, Longline, Purse Seine, or Trap category permit for Atlantic Tunas issued under this part. However, no person shall sell a BFT smaller than the large medium size class. Also, no large medium or giant BFT taken by a person aboard a vessel with an Atlantic HMS Charter/Headboat permit fishing in the Gulf of Mexico at any time, or fishing outside the Gulf of Mexico when the fishery under the General category has been closed, shall be sold (see § 635.23(c)). Persons shall sell Atlantic tunas only to a dealer that has a valid permit for purchasing Atlantic tunas issued under this part.

(2) Dealers may purchase Atlantic tunas only from a vessel that has a valid commercial permit for Atlantic tunas issued under this part in the appropriate category.

(3) Dealers or seafood processors may not purchase or sell a BFT smaller than the large medium size class unless it is lawfully imported and is accompanied by a bluefin tuna statistical document, as specified in § 300.185(a) of this title.

(4) A BFT in the possession of a dealer or seafood processor is deemed to be from the Atlantic Ocean. However, a BFT will not be deemed to be from the Atlantic Ocean if—

(i) It was landed in a Pacific state and remains in the state of landing, or

(ii) It is accompanied by a bluefin tuna statistical document, as specified in § 300.185(a) of this title.

(b) *Billfish.* (1) Persons may not sell or purchase a billfish taken from its management unit.

(2) A billfish or a closely related species, namely, black marlin, *Makaira indica*, striped marlin, *Tetrapturus audax*, or shortbill spearfish, *Tetrapturus angustirostris*, or a part thereof, in the possession of a dealer or seafood processor is considered, for purposes of this part, to be a billfish from the Atlantic Ocean management unit. However, a billfish or a closely re-

lated species will not be considered to be from the Atlantic Ocean management unit if—

(i) It was landed in a Pacific state and remains in the state of landing, or

(ii) It is accompanied by a Billfish Certificate of Eligibility (COE) form, obtained from NMFS, or its equivalent that documents that the fish was harvested from other than the Atlantic Ocean management unit.

(A) The Billfish COE required under this section must indicate, in English, the name and homeport of the harvesting vessel, and the date and port of offloading. Only the purchaser of the billfish from the harvesting vessel must complete this information.

(B) The Billfish COE must be signed and dated by each dealer in possession of the product throughout the chain of custody up to but not including the consumer. This signature indicates a declaration that the billfish were not harvested from the management unit.

(C) A Billfish COE may refer to billfish taken from only one harvesting vessel. If a shipment contains billfish taken from more than one vessel, a separate billfish COE must accompany the shipment for each harvesting vessel.

(D) A model Billfish COE can be obtained by contacting the Division Chief. An equivalent form may be used provided it contains all of the information required under this section.

(3) For the purposes of this paragraph, a dealer or seafood processor means any individual, other than a consumer, who engages in any activity, other than fishing, of industry, trade, or commerce, including but not limited to the buying or selling of a regulated species or parts thereof and activities conducted for the purpose of facilitating such buying and selling.

(c) *Shark.* (1) Persons that own or operate a vessel that possesses a shark from the management unit may sell such shark only if the vessel has a valid commercial permit for shark issued under this part. Persons may possess and sell a shark only when the fishery for that species group has not been closed, as specified in § 635.28(b)(3).

(2) Persons that own or operate a vessel for which a valid commercial shark permit has been issued and on which a

shark from the management unit is possessed, may sell such shark only to a dealer that has a valid permit for shark issued under this part.

(3) Regulations governing the harvest, possession, landing, purchase, and sale of shark fins are found at part 600, subpart N, of this chapter and in § 635.30(c).

(4) Only dealers that have a valid permit for shark may purchase a shark from the owner or operator of a fishing vessel. Dealers may purchase a shark only from an owner or operator of a vessel who has a valid commercial permit for shark issued under this part, except that dealers may purchase a shark from an owner or operator of a vessel that does not have a commercial permit for shark if that vessel fishes exclusively in state waters. Dealers may purchase a shark from an owner or operator of fishing vessel that has a permit issued under this part only when the fishery for that species group has not been closed, as specified in § 635.28(b)(3).

(5) A dealer issued a permit under this part may not purchase from an owner or operator of a fishing vessel shark fins that were not harvested in accordance with the regulations found at part 600, subpart N, of this chapter and in § 635.30(c).

(d) *Swordfish.* (1) Persons that own or operate a vessel on which a swordfish in or from the Atlantic Ocean is possessed may sell such swordfish only if the vessel has a valid commercial permit for swordfish issued under this part. Persons may sell such swordfish only to a dealer who has a valid permit for swordfish issued under this part.

(2) Dealers may purchase a swordfish harvested from the Atlantic Ocean only from an owner or operator of a fishing vessel that has a valid commercial permit for swordfish issued under this part.

[64 FR 29135, May 28, 1999, as amended at 67 FR 6201, Feb. 11, 2002; 67 FR 77438, Dec. 18, 2002; 68 FR 715, Jan. 7, 2003; 69 FR 53362, Sept. 1, 2004; 69 FR 67284, Nov. 17, 2004]

§ 635.32 Specifically authorized activities.

(a) *General.* (1) Consistent with the provisions of § 600.745 of this chapter, except as indicated in this section,

NMFS may authorize activities otherwise prohibited by the regulations contained in this part for the conduct of scientific research, the acquisition of information and data, the enhancement of safety at sea, the purpose of collecting animals for public education or display, the investigation of bycatch, economic discard and regulatory discard, or for chartering arrangements.

(2) Activities subject to the provisions of this section include, but are not limited to, scientific research resulting in, or likely to result in, the take, harvest or incidental mortality of Atlantic HMS; exempted fishing and educational activities; programs under which regulated species retained in contravention to otherwise applicable regulations may be donated through approved food bank networks; or chartering arrangements. Such activities must be authorized in writing and are subject to all conditions specified in any letter of acknowledgment, exempted fishing permit, scientific research permit, display permit, or chartering permit issued in response to requests for authorization under this section.

(3) For the purposes of all regulated species covered under this part, NMFS has the sole authority to issue permits, authorizations, and acknowledgments. If a regulated species landed or retained under the authority of this section is subject to a quota, the fish shall be counted against the quota category as specified in the written authorization.

(4) Inspection requirements specified in § 635.5(e) apply to the owner or operator of a fishing vessel that has been issued a exempted fishing permit, scientific research permit, display permit, or chartering permit.

(b) *Scientific research activities.* For the purposes of all species covered under this part regulated under the authority of ATCA, the provisions for research plans under § 600.745(a) and reports under § 600.745(c)(1) of this chapter are mandatory. In such cases of authorized scientific research activities, NMFS shall issue scientific research permits. For scientific research activities involving the capture of Atlantic sharks, research plans and reports are requested; letters of acknowledgment

shall be issued by NMFS as indicated under § 600.745(a) of this chapter.

(c) *Exempted fishing permits.* (1) For activities consistent with the purposes of this section and § 600.745(b)(1) of this chapter, other than scientific research conducted from a scientific research vessel, NMFS may issue exempted fishing permits.

(2) [Reserved]

(d) *Display permits.* (1) For activities consistent with the purposes of this section and § 600.745(b)(1) of this chapter, NMFS may issue display permits.

(2) Notwithstanding the provisions of § 600.745 of this chapter and other provisions of this part, a valid display permit is required to fish for, take, retain, or possess an HMS in or from the Atlantic EEZ for the purposes of public display. A valid display permit must be on board the harvesting vessel, must be available when the fish is landed, must be available when the fish is transported to the display facility, and must be presented for inspection upon request of an authorized officer. A display permit is valid for the specific time, area, gear, and species specified on it. Species landed under a display permit shall be counted against the appropriate quota specified in § 635.27 or as otherwise provided in the display permit.

(3) To be eligible for a display permit, a person must provide all information concerning his or her identification, numbers by species of HMS to be collected, when and where they will be collected, vessel(s) and gear to be used, description of the facility where they will be displayed, and any other information that may be necessary for the issuance or administration of the permit, as requested by NMFS.

(4) Collectors of HMS for public display must notify the local NMFS Office for Law Enforcement at least 24 hours, excluding weekends and holidays, prior to departing on a collection trip, regardless of whether the fishing activity will occur in or outside the EEZ, as to collection plans and location and the number of animals to be collected. In the event that a NMFS agent is not available, a message may be left.

(5) All live HMS collected for public display are required to have either a conventional dart tag or a microchip

Passive Integrated Transponder (PIT) tag applied by the collector at the time of the collection. Both types of tags will be supplied by NMFS. Conventional dart tags will be issued unless PIT tags are specifically requested in the permit application and their use approved by NMFS. Terms and conditions of the permit will address requirements associated with the use of the tags supplied on a case-by-case basis.

(e) *Chartering permits.* (1) For activities consistent with the purposes of this section, § 635.5(a), and § 600.745(b)(1) of this chapter, NMFS may issue chartering permits for record keeping and reporting purposes. An application for a chartering permit must include all information required under § 600.745(b)(2) of this chapter and, in addition, written notification of: the species of fish covered by the chartering arrangement and quota allocated to the Contracting Party of which the chartering foreign entity is a member; duration of the arrangement; measures adopted by the chartering Contracting Party of which the foreign entity is a member to implement ICCAT chartering provisions; copies of fishing licenses, permits, and/or other authorizations issued by the chartering Contracting Party of which the foreign entity is a member for the vessel to fish under the arrangement; a copy of the High Seas Fishing Compliance Act Permit pursuant to 50 CFR 300.10; documentation regarding interactions with protected resources; and documentation regarding the legal establishment of the chartering company. To be considered complete, an application for a chartering permit for a vessel must include all information specified in § 600.745(b)(2) of this chapter and in § 635.32(e) and (f).

(2) Notwithstanding the provisions of § 600.745 of this chapter and other provisions of this part, a valid chartering permit is required to fish for, take, retain, or possess ICCAT-regulated species under chartering arrangements as specified in § 635.5(a)(6). A valid chartering permit must be on board the harvesting vessel, must be available when ICCAT-regulated species are landed, and must be presented for inspection upon request of an authorized

officer. A chartering permit is valid for the duration of the chartering arrangement or until the expiration date specified on the permit, whichever comes first. Vessels issued a chartering permit shall not be authorized to fish under applicable Atlantic Highly Migratory Species quotas or entitlements of the United States until the chartering permit expires or is terminated.

(3) Charter permit holders must submit logbooks and comply with reporting requirements as specified in §635.5. NMFS will provide specific conditions and requirements in the chartering permit, so as to ensure consistency, to the extent possible, with laws of foreign countries, the Fishery Management Plan for Atlantic Tunas, Swordfish, and Sharks, as well as ICCAT recommendations.

(4) Observers may be placed on board vessels issued chartering permits as specified under §635.7.

(5) NMFS will issue a chartering permit only if it determines that the chartering arrangement is in conformance with ICCAT's conservation and management programs.

(6) A vessel shall be authorized to fish under only one chartering arrangement at a time.

(7) All chartering permits are subject to sanctions and denials as indicated under §635.4(a)(6).

(f) *Applications and renewals.* Application procedures shall be as indicated under §600.745(b)(2) of this chapter, except that NMFS may consolidate requests for the purpose of obtaining public comment. In such cases, NMFS may file with the Office of the Federal Register, on an annual or more frequent basis as necessary, notification of previously authorized exempted fishing, scientific research, public display, or chartering activities and to solicit public comment on anticipated EFP, SRP, LOA, public display, or chartering permit requests. Applications for EFP, SRP, public display, or chartering permit renewals are required to include all reports specified in the applicant's previous permit including the year-end report, all delinquent reports for permits issued in prior years, and all other specified information. In situations of delinquent reports, renewal applications will be deemed incomplete

and a permit will not be issued under this section.

(g) *Terms and conditions.* (1) For EFPs, SRPs, and public display permits: Written reports on fishing activities and disposition released under a permit issued under this section, must be submitted to NMFS, within 5 days of return to port. NMFS will provide specific conditions and requirements as needed, consistent with the Fishery Management Plan for Atlantic Tunas, Swordfish and Sharks, in the permit. If an individual issued a Federal permit under this section captures no HMS in any given month, either in or outside the EEZ, a "no-catch" report must be submitted to NMFS within 5 days of the last day of that month.

(2) For chartering permits, written reports of fishing activities must be submitted to NMFS by a date specified, and to an address designated, in the terms and conditions of each chartering permit.

(3) An annual written summary report of all fishing activities and disposition of all fish captured under the permit must be submitted to NMFS for all the permits (EFP, SRP, Display, and Chartering Permits) listed in this section within 30 days after the expiration date of the permit.

[64 FR 29135, May 28, 1999, as amended at 68 FR 63742, Nov. 10, 2003; 68 FR 74786, Dec. 24, 2003; 69 FR 70399, Dec. 6, 2004]

§ 635.33 Archival tags.

(a) *Implantation report.* Any person affixing or implanting an archival tag into a regulated species must obtain written authorization from NMFS pursuant to §635.32. Persons so authorized to conduct archival tag implantation must provide a written report to NMFS at an address designated by NMFS, indicating the type and number of tags, the species and approximate size of the fish as well as any additional information requested in the authorization.

(b) *Landing.* Notwithstanding other provisions of this part, persons may catch, possess, retain, and land an Atlantic HMS in which an archival tag has been implanted or affixed, provided such persons comply with the requirements of paragraph (c) of this section.

(c) *Landing report.* Persons that retain an Atlantic HMS that has an archival tag must contact NMFS, prior to or at the time of landing; furnish all requested information regarding the location and method of capture; and, as instructed, remove the archival tag and return it to NMFS or make the fish available for inspection and recovery of the tag by a NMFS scientist, enforcement agent, or other person designated in writing by NMFS.

(d) *Quota monitoring.* If an Atlantic HMS landed under the authority of paragraph (b) of this section is subject to a quota, the fish will be counted against the applicable quota for the species consistent with the fishing gear and activity which resulted in the catch. In the event such fishing gear or activity is otherwise prohibited under applicable provisions of this part, the fish shall be counted against the reserve quota established for that species.

§ 635.34 Adjustment of management measures.

(a) NMFS may adjust the catch limits for BFT, as specified in § 635.23, and the quotas for BFT, shark, and swordfish, as specified in § 635.27.

(b) In accordance with the framework procedures in the Fishery Management Plan for Atlantic Tunas, Swordfish, and Sharks and the Fishery Management Plan for Atlantic Billfishes, NMFS may establish or modify for species or species groups of Atlantic HMS the following management measures: maximum sustainable yield or optimum yield levels based on the latest stock assessment or updates in the SAFE report; domestic quotas; recreational and commercial retention limits, including target catch requirements; size limits; fishing years or fishing seasons; shark fishing regions or regional quotas; species in the management unit and the specification of the species groups to which they belong; species in the prohibited shark species group; classification system within shark species groups; permitting and reporting requirements; Atlantic tunas Purse Seine category cap on bluefin tuna quota; time/area restrictions; allocations among user groups; gear prohibitions, modifications, or use restric-

tions; effort restrictions; essential fish habitat; and actions to implement ICCAT recommendations, as appropriate.

(c) NMFS may add species to the prohibited shark species group specified in Table 1 of appendix A if, after considering the criteria in paragraphs (c)(1) through (4) of this section, the species is determined to meet at least two of the criteria. Alternatively, NMFS may remove species from the prohibited shark species group and place them in the appropriate shark species group in Table 1 of appendix A if, after considering the criteria in paragraphs (c)(1) through (4) of this section, NMFS determines the species only meets one criterion.

(1) Biological information indicates that the stock warrants protection.

(2) Information indicates that the species is rarely encountered or observed caught in HMS fisheries.

(3) Information indicates that the species is not commonly encountered or observed caught as bycatch in fishing operations for species other than HMS.

(4) The species is difficult to distinguish from other prohibited species.

[64 FR 29135, May 28, 1999, as amended at 68 FR 74788, Dec. 24, 2003]

Subpart D—Restrictions on Imports

§ 635.40 Restrictions to enhance conservation.

(a) *Determinations.* Upon a determination by NMFS that species of fish subject to regulation or under investigation by ICCAT are ineligible for entry into the United States under 16 U.S.C. 971d (c)(4) or (c)(5), NMFS, with the concurrence of the Secretary of State, will file with the Office of the Federal Register for publication a finding to that effect. Effective upon the date of filing of such finding, all shipments of fish in any form of the species found to be ineligible will be denied entry unless, with respect to a particular shipment, it is established by satisfactory proof pursuant to paragraph (b) of this section that the particular shipment of fish is eligible for entry. Entry will not be denied and no such proof will be required for any such shipment that, on the date of filing was in transit to the

Fishery Conservation and Management

§ 635.41

United States on board a vessel operating as a common carrier.

(b) *Proof of admissibility.* (1) For the purposes of paragraph (a) of this section and section 6(c) of ATCA, a shipment of fish in any form of the species under regulation or under investigation by ICCAT offered for entry, directly or indirectly, from a country named in a finding filed with the Office of the Federal Register for publication under paragraph (a) of this section is eligible for entry if the shipment is accompanied by a completed ATCA COE attached to the invoice certifying that the fish in the shipment:

(i) Are not of the species specified in the finding;

(ii) Are of the species named in the finding, but were not taken in the regulatory area; or

(iii) Are of the species named in the finding, but are products of an American fishery and were lawfully taken in conformity with applicable conservation laws and regulations and landed in the country named in the finding solely for transshipment.

(2) If the fish are offered for entry under paragraph (b)(1)(i) or (b)(1)(ii) of this section, the ATCA COE must be executed by a duly authorized official of the country named in the finding and the ATCA COE must be validated by a consular officer or consular agent of the United States. Such validation must be attached to the ATCA COE.

(3) If the fish are offered for entry under paragraph (b)(1)(iii) of this section, the ATCA COE must be executed by a consular officer or consular agent of the United States and be accompanied by the declaration(s) required by 19 CFR 10.79. The "Declaration of Master and Two Members of Crew on Entry of Products of American Fisheries" required by 19 CFR 10.79 must contain a further statement as follows: "We further declare that the said fish were caught by us in full compliance with part 635, title 50, Code of Federal Regulations, and such other conservation laws and regulations as were applicable at the time the fishing operation was in progress."

(c) *Removal of import restrictions.* Upon a determination by NMFS that the conditions no longer exist that warranted the finding under paragraph (a)

of this section, NMFS will remove the import restriction by filing with the Office of the Federal Register for publication notification of removal effective on the date of filing. However, for 1 year from the date of filing every shipment of fish in any form that was subject to the finding under paragraph (a) of this section will continue to be denied entry, unless the shipment is accompanied by a certification executed by an authorized official of the country of export and authenticated by a consular officer or consular agent of the United States certifying that no portion of the shipment is composed of fish taken prior to or during the import restriction.

§ 635.41 Products denied entry.

(a) All shipments of Atlantic bigeye tuna, or its products, in any form, harvested by a vessel under the jurisdiction of Bolivia or Georgia will be denied entry into the United States.

(b) All shipments of tuna or tuna-like species, or their products, in any form, harvested in the ICCAT convention area by a fishing vessel that is required to be listed, but not listed on the ICCAT record of authorized vessels will be denied entry into the United States.

(c) All shipments of tuna or tuna-like species, or their products, in any form, harvested in the ICCAT convention area by a fishing vessel listed on the ICCAT record as engaged in illegal, unreported, and unregulated fishing will be denied entry into the United States.

(d) All shipments of tuna or tuna-like species, placed in cages for farming and/or transshipment, harvested in the ICCAT convention area and caught by a fishing vessel included on the ICCAT list as engaged in illegal, unreported, and unregulated fishing will be denied entry into the United States.

(e) For the purposes of this section, it is a rebuttable presumption that any shipment containing swordfish, bluefin tuna, bigeye tuna, or their products offered for entry into the United States has been harvested by a vessel or vessels of the exporting nation.

[69 FR 70400, Dec. 6, 2004, as amended at 70 FR 28218, May 17, 2005]

Subpart E—International Port Inspection

§ 635.50 Basis and purpose.

The regulations in this subpart implement the ICCAT port inspection scheme. The text of the ICCAT port inspection scheme may be obtained from NMFS.

§ 635.51 Authorized officer.

For the purposes of this subpart, an authorized officer is a person appointed by an ICCAT contracting party to serve as an authorized inspector for ICCAT, and who possesses identification issued by the authorized officer's national government.

§ 635.52 Vessels subject to inspection.

(a) All U.S. fishing vessels or vessels carrying fish species subject to regulation pursuant to a recommendation of ICCAT, and their catch, gear, and relevant documents, including fishing logbooks and cargo manifests, are subject to inspection under this subpart to verify compliance with ICCAT measures by an authorized officer when landing or transshipping tuna or when making a port call at a port of any ICCAT contracting party.

(b) A vessel, or a vessel carrying fish species subject to regulation pursuant to a recommendation of ICCAT, that is registered by any of the ICCAT contracting parties, and the vessel's catch, gear, and relevant documents, including fishing logbooks and cargo manifests, are subject to inspection under this subpart to verify compliance with ICCAT measures when landing or transshipping regulated species or when making a port call in the United States.

(c) The master of a vessel, or a vessel carrying fish species subject to regulation pursuant to a recommendation of ICCAT, must cooperate with an authorized officer during the conduct of an inspection in national and foreign ports. Inspections will be carried out so that the vessel suffers minimum interference and inconvenience, and so that degradation of the quality of catch is avoided.

§ 635.53 Reports.

(a) Apparent violations shall be reported by the authorized officer on a standardized ICCAT form or form produced by the national government which collects the same quality of information. The authorized officer must sign the form in the presence of the master of the vessel, who is entitled to add or have added to the report any observations, and to add his own signature. The authorized officer should note in the vessel's log that the inspection has been made.

(b) Copies of the report form must be sent to the flag state of the vessel and to the ICCAT Secretariat within 10 days. Flag states will consider and act on reports of apparent violations by foreign inspectors on a similar basis as the reports of their national inspectors in accordance with their national legislation. The vessel's flag state will notify ICCAT of actions taken to address the violation.

Subpart F—Enforcement

§ 635.69 Vessel monitoring systems.

(a) *Applicability.* To facilitate enforcement of time-area and fishery closures, an owner or operator of a commercial vessel, permitted to fish for Atlantic HMS under § 635.4 and that fishes with a pelagic or bottom longline or strikenet gear, is required to install a NMFS-approved vessel monitoring system (VMS) unit on board the vessel and operate the VMS unit under the following circumstances:

(1) Whenever the vessel is away from port with pelagic longline gear on board;

(2) As of January 1, 2005, whenever a vessel issued a directed shark LAP, is away from port with bottom longline gear on board, is located between 33°00' N. lat. and 36°30' N. lat., and the mid-Atlantic shark closed area is closed as specified in § 635.21(d)(1); or

(3) As of November 15, 2004, whenever a vessel, issued a directed shark LAP, is away from port with a gillnet on board during the right whale calving season specified in the Atlantic Large Whale Take Reduction Plan in § 229.32(f) of this title.

(4) A vessel is considered to have pelagic longline gear on board, for the purposes of this section, when gear as specified at §635.21(c) is on board. A vessel is considered to have bottom longline gear on board, for the purposes of this section, when gear as specified at §635.21(d) is on board. A vessel is considered to have gillnet gear on board, for the purposes of this section, when gillnet, as defined in §600.10, is on board a vessel that has been issued a shark LAP.

(b) *Hardware specifications.* The VMS hardware must be approved by NMFS and must be able to perform all NMFS required functions. NMFS will file with the Office of the Federal Register for publication notification listing the specifications for approved VMS units. As necessary, NMFS will make additions and/or amendments to the VMS hardware type approval list to account for changes in specifications or new products offered by manufacturers. NMFS will file with the Office of the Federal Register for publication notification listing such additions and/or amendments.

(c) *Communications specifications.* The communications service provider must be approved by NMFS and must be able to provide all NMFS required functions. NMFS will file with the Office of the Federal Register for publication notification listing the specifications for approved VMS communications service providers. As necessary, NMFS will make additions and/or amendments to the VMS communications service providers type approval list to account for changes in specifications or new services offered by communications providers. NMFS will file with the Office of the Federal Register for publication notification listing such additions and/or amendments.

(d) *Installation and service activation.* When installing and activating the NMFS-approved VMS unit, a vessel owner or operator must follow procedures indicated on an installation and activation checklist obtained from NMFS. Re-installation shall require the same checklist. Upon completion of installation, the vessel owner must sign a statement certifying compliance with the installation procedures of the checklist and submit such certification

to NMFS as indicated on the checklist. Vessels fishing prior to submission of the certification will be in violation of the VMS requirement.

(e) *Operation.* Owners or operators of vessels permitted, or required to be permitted, to fish for HMS, that have pelagic or bottom longline gear or gillnet gear on board, and that are required to have a VMS unit installed, as specified in paragraph (a), must activate the VMS to submit automatic position reports beginning 2 hours prior to leaving port and continuing until the vessel returns to port. While at sea, the unit must operate without interruption and no person may interfere with, tamper with, alter, damage, disable, or impede the operation of a VMS, or attempt any of the same. Vessels fishing outside the geographic area of operation of the installed VMS will be in violation of the VMS requirement.

(f) *Interruption.* When the vessel operator is aware that transmission of automatic position reports has been interrupted, or when notified by NMFS that automatic position reports are not being received, the vessel operator must contact NMFS and follow the instructions given. Such instructions may include but are not limited to manually communicating to a location designated by NMFS the vessel's position or returning to port until the VMS is operable.

(g) *Repair and replacement.* After a fishing trip during which interruption of automatic position reports has occurred, the vessel's owner or operator must replace or repair the VMS unit prior to the vessel's next trip. Repair or reinstallation of a VMS unit or installation of a replacement, including change of communications service provider shall be in accordance with the checklist provided by NMFS and require the same certification.

(h) *Access.* As a condition to obtaining a LAP for Atlantic swordfish, sharks, or tunas, all vessel owners or operators using pelagic or bottom longline or gillnet gear, subject to the VMS provisions of this section must allow NMFS, the USCG, and their authorized officers and designees access to the vessel's position data obtained from the VMS at the time of or after

§ 635.70

its transmission to the vendor or receiver, as the case may be.

[64 FR 29135, May 28, 1999, as amended at 64 FR 37705, July 13, 1999; 65 FR 47238, Aug. 1, 2000; 68 FR 45169, Aug. 1, 2003; 68 FR 74788, Dec. 24, 2003; 69 FR 51012, Aug. 17, 2004]

§ 635.70 Penalties.

(a) *General.* See § 600.735 of this chapter.

(b) *Civil procedures for Atlantic tuna.* Because of the perishable nature of Atlantic tuna when it is not chilled or frozen, an authorized officer may cause to be sold, for not less than its reasonable market value, unchilled or unfrozen Atlantic tuna that may be seized and forfeited under ATCA and this part.

§ 635.71 Prohibitions.

In addition to the prohibitions specified in § 600.725 of this chapter, it is unlawful for any person subject to the jurisdiction of the United States to violate any provision of this part, ATCA, the Magnuson-Stevens Act, or any other rules promulgated under ATCA or the Magnuson-Stevens Act.

(a) *General.* It is unlawful for any person or vessel subject to the jurisdiction of the United States to:

(1) Falsify information required on an application for a permit submitted under § 635.4 or § 635.32.

(2) Fish for, catch, possess, retain, or land an Atlantic HMS without the appropriate valid vessel permit, LAP, EFP, SRP, display permit, or chartering permit on board the vessel, as specified in §§ 635.4 and 635.32.

(3) Purchase, receive, or transfer or attempt to purchase, receive, or transfer, for commercial purposes, any Atlantic HMS landed by owners of vessels not permitted to do so under § 635.4, or purchase, receive, or transfer, or attempt to purchase, receive, or transfer, for commercial purposes, any Atlantic HMS without the appropriate valid dealer permit issued under § 635.4, except that this does not apply to a shark harvested from a vessel that has not been issued a permit under this part and that fishes exclusively within the waters under the jurisdiction of any state.

(4) Sell or transfer or attempt to sell or transfer an Atlantic tuna, shark, or

50 CFR Ch. VI (10–1–05 Edition)

swordfish other than to a dealer that has a valid dealer permit issued under § 635.4, except that this does not apply to a shark harvested from a vessel that has not been issued a permit under this part and that fishes exclusively within the waters under the jurisdiction of any state.

(5) Fail to possess and make available for inspection a vessel permit on board the permitted vessel or upon transfer of HMS to a dealer or a dealer permit at the dealer's place of business, or to alter any such permit as specified in § 635.4(a).

(6) Falsify or fail to record, report, or maintain information required to be recorded, reported, or maintained, as specified in §§ 635.5 and 635.32 or in the terms and conditions of a permit issued under § 635.4 or an exempted fishing permit, scientific research permit, display permit, or chartering permit issued under § 635.32.

(7) Fail to allow an authorized agent of NMFS to inspect and copy reports and records, as specified in § 635.5(e) or § 635.32.

(8) Fail to make available for inspection an Atlantic HMS or its area of custody, as specified in § 635.5(g).

(9) Fail to report the catching of any Atlantic HMS to which a conventional tag has been affixed under a tag and release program.

(10) Falsify or fail to display and maintain vessel and gear identification, as specified in § 635.6.

(11) Fail to comply with the requirements for at-sea observer coverage, as specified in § 635.7 and § 600.746.

(12) For any person to assault, resist, oppose, impede, intimidate, interfere with, obstruct, delay, or prevent, by any means, any authorized officer in the conduct of any search, inspection, seizure or lawful investigation made in connection with enforcement of this part.

(13) Interfere with, delay, or prevent by any means, the apprehension of another person, knowing that such person has committed any act prohibited by this part.

(14) Fail to install, activate, repair, or replace a vessel monitoring system prior to leaving port with pelagic longline gear, bottom longline gear, or

Fishery Conservation and Management

§ 635.71

gillnet gear on board the vessel as specified in § 635.69.

(15) Tamper with, or fail to operate and maintain a vessel monitoring system as specified in § 635.69.

(16) Fail to contact NMFS or follow NMFS instructions when automatic position reporting has been interrupted as specified in § 635.69.

(17) Fish for Atlantic tunas or swordfish with a gillnet or possess Atlantic tunas or swordfish on board a vessel with a gillnet on board, as specified in § 635.21 (b), (e)(1), and (e)(4)(ii).

(18) Fail to retrieve fishing gear and move after an interaction with a protected species, as specified in § 635.21 (c)(3) or (d)(2).

(19) Fail to release an Atlantic HMS in the manner specified in § 635.21(a).

(20) Fail to report the retention of an Atlantic HMS that has an archival tag, as specified in § 635.33.

(21) Fail to maintain an Atlantic HMS in the form specified in § 635.30.

(22) Fish for, catch, retain, or possess an Atlantic HMS that is less than its minimum size limit specified in § 635.20.

(23) Fail to comply with the restrictions on use of a pelagic longline, bottom longline, or gillnet as specified in § 635.21 (c), (d), or (e)(3).

(24) Import, or attempt to import, any fish or fish products regulated under this part in a manner contrary to any import requirements or import restrictions specified at § 635.40 or 635.41.

(25) Dispose of fish or parts thereof or other matter in any manner after any communication or signal from an authorized officer, or after the approach of an authorized officer.

(26) Violate the terms and conditions or any provision of a permit issued under §§ 635.4 or 635.32.

(27) Operate a charterboat or headboat without a valid U.S. Coast Guard merchant marine or uninspected passenger vessel license on board the vessel when fishing for or possessing Atlantic HMS as specified at § 635.4(b).

(28) Violate any provision of this part, the Magnuson-Stevens Act, ATCA, or any regulations or permits issued under the Magnuson-Stevens Act or ATCA.

(29) Land, transship, ship, transport, purchase, sell, offer for sale, import,

export, or have in custody, possession, or control:

(i) Any fish that the person knows, or should have known, was taken, retained, possessed, or landed contrary to this part, without regard to the citizenship of the person or registry of the fishing vessel that harvested the fish.

(ii) Any fish of a species regulated pursuant to a recommendation of ICCAT that was harvested, retained, or possessed in a manner contrary to the regulations of another country.

(30) Deploy or fish with any fishing gear from a vessel or anchor a fishing vessel, permitted or required to be permitted under this part, in any closed area as specified at § 635.21.

(31) Deploy or fish with any fishing gear from a vessel with a pelagic longline on board in any closed area during the time periods specified at § 635.21(c)(2).

(32) In the Gulf of Mexico, deploy or fish a pelagic longline with live bait affixed to the hooks or to possess live bait, or set up a well or tank to maintain live bait, aboard a vessel with pelagic longline gear on board as specified at § 635.21(c)(4).

(33) Fish with or deploy any fishing gear from a vessel with pelagic longline gear on board without carrying the required sea turtle bycatch mitigation gear, as specified at § 635.21(c)(5)(i).

(34) Fail to disengage any hooked or entangled sea turtle with the least harm possible to the sea turtle as specified at § 635.21 (c)(5) or (d)(3).

(35) For any person to assault, resist, oppose, impede, intimidate, interfere with, obstruct, delay, or prevent, by any means, NMFS personnel or anyone collecting information for NMFS, under an agreement or contract, relating to the scientific monitoring or management of Atlantic HMS.

(36) Fish with bottom or pelagic longline and shark gillnet gear for HMS without adhering to the gear operation and deployment restrictions required in 50 CFR 635.21.

(37) Fail to report to NMFS, at the number designated by NMFS, the incidental capture of listed whales with shark gillnet gear and sea turtle mortalities associated with pelagic longline gear as required by § 635.5.

§ 635.71

50 CFR Ch. VI (10–1–05 Edition)

(38) Fish for, or possess on board a fishing vessel, species regulated under this part in unauthorized fishing areas as specified in § 635.25.

(39) Deploy or fish with any fishing gear, from a vessel with a bottom longline on board, in any closed area during the time periods specified at § 635.21(d)(1).

(40) Deploy or fish with any fishing gear, from a vessel with bottom longline gear on board, without carrying a dipnet, line clipper, and dehooking device as specified at § 635.21(d)(3).

(41) Fail to immediately notify NMFS upon the termination of a chartering arrangement as specified in § 635.5(a)(6).

(42) Count chartering arrangement catches against quotas other than those defined as the Contracting Party of which the chartering foreign entity is a member as specified in § 635.5(a)(6).

(43) Fail to submit catch information regarding fishing activities conducted under a chartering arrangement with a foreign entity, as specified in § 635.5(a)(6).

(44) Offload chartering arrangement catch in ports other than ports of the chartering Contracting Party of which the foreign entity is a member or offload catch without the direct supervision of the chartering foreign entity as specified in § 635.5(a)(6).

(45) Import or attempt to import tuna or tuna-like species harvested from the ICCAT convention area by a fishing vessel that is not listed in the ICCAT record of authorized vessels as specified in § 635.41(b).

(46) Import or attempt to import tuna or tuna-like species harvested by a fishing vessel on the ICCAT illegal, unreported, and unregulated fishing list as specified in § 635.41(c).

(47) Import or attempt to import tuna or tuna-like species, placed in cages for farming and/or transshipment, harvested in the ICCAT convention area and caught by a fishing vessel included on the ICCAT list as engaged in illegal, unreported, and unregulated fishing as specified in § 635.41(d).

(b) *Atlantic tunas*. It is unlawful for any person or vessel subject to the jurisdiction of the United States to:

(1) Engage in fishing with a vessel that has been issued an Atlantic Tunas or Atlantic HMS permit under § 635.4, unless the vessel travels to and from the area where it will be fishing under its own power and the person operating that vessel brings any BFT under control (secured to the catching vessel and/or brought on board) with no assistance from another vessel, except as shown by the operator that the safety of the vessel or its crew was jeopardized or other circumstances existed that were beyond the control of the operator.

(2) [Reserved]

(3) Fish for, catch, retain, or possess a BFT less than the large medium size class by a person aboard a vessel other than one that has on board a valid HMS Angling or Charter/Headboat permit, or an Atlantic tunas Purse Seine category permit as authorized under § 635.23 (b), (c), and (e)(2).

(4) Fail to inspect a vessel's permit, fail to affix a dealer tag to a large medium or giant BFT, or fail to use such tag as specified in § 635.5(b)(2).

(5) Fail to report a large medium or giant BFT that is not sold, as specified in § 635.5(a)(3).

(6) As an angler, fail to report a BFT, as specified in § 635.5(c)(1) or (3).

(7) Fish for, catch, retain, or possess a BFT with gear not authorized for the category permit issued to the vessel or to have such gear on board when in possession of a BFT, as specified in § 635.21(e)(1).

(8) Fail to request an inspection of a purse seine vessel, as specified in § 635.21(e)(1)(vi)(B).

(9) Fish for or catch BFT in a directed fishery with purse seine nets without an allocation made under § 635.27(a)(4).

(10) Fish for or catch any Atlantic tunas in a directed fishery with purse seine nets if there is no remaining BFT allocation made under § 635.27 (a)(4).

(11) Exceed the recreational catch limit for yellowfin tuna, as specified in § 635.22(d).

(12) Exceed a catch limit for BFT specified for the appropriate permit category, as specified in § 635.23.

Fishery Conservation and Management

§ 635.71

(13) As a vessel with a General category Atlantic tuna permit, fail to immediately cease fishing and immediately return to port after catching a large medium or giant BFT on a commercial fishing day, as specified in § 635.23(a)(3).

(14) As a person aboard a vessel issued an HMS Angling or Charter/Headboat permit, fail to immediately cease fishing and immediately return to port after catching a large medium or giant BFT or fail to report such catch, as specified in § 635.23(b)(1)(iii) and (c)(1) through (c)(3).

(15) As a person aboard a vessel issued an HMS Angling or HMS Charter/Headboat permit, sell, offer for sale, or attempt to sell a large medium or giant BFT retained when fishing under the circumstances specified in § 635.23(b)(1)(iii) and (c)(1) through (c)(3).

(16) Retain a BFT caught under the catch and release program specified in § 635.26.

(17) As a vessel with a Purse Seine category Atlantic tunas permit, catch, possess, retain, or land BFT in excess of its allocation of the Purse Seine category quota, or fish for BFT under that allocation prior to the commencement date of the directed BFT purse seine fishery, as specified in § 635.27(a)(4).

(18) As a vessel with a Purse Seine category Atlantic tunas permit, land BFT smaller than the large medium size class except as specified under § 635.23(e)(2).

(19) Fish for, retain, possess, or land a BFT when the fishery is closed, as specified in § 635.28(a), except as may be authorized for catch and release under § 635.26.

(20) Approach to within 100 yd (91.5 m) of the cork line of a purse seine net used by a vessel fishing for Atlantic tuna, or for a purse seine vessel to approach to within 100 yd (91.5 m) of a vessel actively fishing for Atlantic tuna, except that two vessels that have Purse Seine category Atlantic tuna permits may approach closer to each other.

(21) Transfer at sea an Atlantic tuna, except as may be authorized for the transfer of BFT between purse seine vessels, as specified in § 635.29(a).

(22) As the owner or operator of a purse seine vessel, fail to comply with

the requirements for weighing, measuring, and information collection specified in § 635.30(a)(2).

(23) Fish for, catch, possess, or retain a BFT from the Gulf of Mexico except as specified under § 635.23(f)(1), or if taken incidental to recreational fishing for other species and retained in accordance with § 635.23(b) and (c).

(24) Fail to comply with the restrictions on sale and purchase of an Atlantic tuna, as specified in §§ 635.5(b), 635.23, and 635.31(a).

(25) [Reserved]

(26) For any person to refuse to provide information requested by NMFS personnel or anyone collecting information for NMFS, under an agreement or contract, relating to the scientific monitoring or management of Atlantic tunas.

(27) Possess a large medium or giant BFT, after it has been landed, that does not have a dealer tag affixed to it as specified in § 635.5(b)(2)(ii), unless the BFT is not to be sold and has been reported per the requirements specified in §§ 635.5(a)(3) or 635.5(c).

(28) Participate in any HMS recreational fishing activity aboard a vessel issued an Atlantic Tunas General category permit unless, as specified at § 635.4(c)(2) and (3), the vessel has registered and paid an entry fee to, and is fishing under the rules of, a recreational HMS fishing tournament registered as required under § 635.5(d).

(29) Import a bigeye tuna or bigeye tuna product into the United States from Bolivia or Georgia as specified in § 635.41.

(c) *Billfish*. It is unlawful for any person or vessel subject to the jurisdiction of the United States to:

(1) Retain a billfish on board a vessel with a pelagic longline on board or harvested by gear other than rod and reel, as specified in § 635.21(e)(2).

(2) Transfer a billfish at sea, as specified in § 635.29(a).

(3) Fail to maintain a billfish in the form specified in § 635.30(b).

(4) Sell or purchase a billfish, as specified in § 635.31(b).

(5) Retain on board a vessel a longbill spearfish, or a blue marlin, white marlin or sailfish that is less than the minimum size specified in § 635.20(d).

§ 635.71

50 CFR Ch. VI (10–1–05 Edition)

(6) As an angler, fail to report a billfish, as specified in § 635.5(c)(2) or (3).

(d) *Shark*. It is unlawful for any person or vessel subject to the jurisdiction of the United States to:

(1) Exceed a recreational retention limit for shark, as specified in § 635.22(c).

(2) Exceed a commercial retention limit for shark, as specified in § 635.24(a).

(3) Retain, possess, or land a shark of a species group when the fishery for that species group is closed, as specified in § 635.28(b)(1) and (b)(2).

(4) Sell or purchase a shark of a species group when the fishery for that species group is closed, as specified in § 635.28(b)(3).

(5) Transfer a shark at sea, as specified in § 635.29(b).

(6) Fail to maintain a shark in its proper form, as specified in § 635.30(c)(4).

(7) Sell or purchase shark fins that are disproportionate to the weight of shark carcasses, as specified in § 635.30(c)(2) and (c)(3) and § 600.1204 (e) and (l) of this chapter.

(8) Fail to have shark fins and carcasses weighed and recorded, as specified in § 635.30(c)(3).

(9) Fail to comply with the restrictions on sale and purchase of a shark, as specified in § 635.31(c).

(10) Retain, possess, sell, or purchase a prohibited shark, as specified under § 635.22(c) and § 635.27(b)(1) or fail to disengage any hooked or entangled prohibited shark with the least harm possible to the animal as specified at § 635.21(d)(3).

(11) Falsify information submitted under § 635.16(d)(2) or (d)(4) in support of an application for an ILAP or an appeal of NMFS's denial of an ILAP for shark.

(12) Fish for Atlantic sharks with unauthorized gear or possess Atlantic sharks on board a vessel with unauthorized gear on board as specified in § 635.21(e)(3).

(13) Fish for Atlantic sharks with a gillnet or possess Atlantic sharks on board a vessel with a gillnet on board, except as specified in § 635.21(e)(3).

(e) *Swordfish*. It is unlawful for any person or vessel subject to the jurisdiction of the United States to:

(1) Purchase, barter for, or trade for a swordfish from the north or south Atlantic swordfish stock without a dealer permit as specified in § 635.4(g).

(2) Fail to comply with the restrictions on use of a pelagic longline specified in § 635.21(b) and (c).

(3) When the directed fishery for swordfish is closed, exceed the limits specified in § 635.28(c)(1)(i) and (c)(1)(ii).

(4) When the incidental catch fishery for swordfish is closed, possess, land, sell, or purchase a swordfish, as specified in § 635.28(c)(2).

(5) Transfer at sea a swordfish, as specified in § 635.29(a).

(6) Fail to maintain a swordfish in the form specified in § 635.30(d).

(7) Fail to comply with the restrictions on sale and purchase of a swordfish, as specified in § 635.31(d).

(8) Fish for North Atlantic swordfish from, possess North Atlantic swordfish on board, or land North Atlantic swordfish from a vessel using or having on board gear other than pelagic longline or handgear.

(9) Fish for swordfish from the South Atlantic swordfish stock using any gear other than pelagic longline.

(10) [Reserved]

(11) Falsify information submitted under § 635.16(d)(2) or (d)(4) in support of an application for an ILAP or an appeal of NMFS's denial of an initial limited access permit for swordfish.

(12) [Reserved]

(13) Exceed the incidental catch retention limits specified at § 635.24(b).

(14) Exceed the recreational catch limit for North Atlantic swordfish, as specified in § 635.22(f).

(15) As an angler, fail to report a North Atlantic swordfish, as specified in § 635.5(c)(2) or (3).

[64 FR 29135, May 28, 1999, as amended at 64 FR 37705, July 13, 1999; 65 FR 42887, July 12, 2000; 65 FR 47238, Aug. 1, 2000; 66 FR 17373, Mar. 30, 2001; 66 FR 30653, June 7, 2001; 66 FR 42805, Aug. 15, 2001; 67 FR 6201, Feb. 11, 2002; 67 FR 45401, July 9, 2002; 67 FR 47469, July 19, 2002; 67 FR 70027, Nov. 20, 2002; 67 FR 77439, Dec. 18, 2002; 68 FR 715, Jan. 7, 2003; 68 FR 56788, Oct. 2, 2003; 68 FR 63742, Nov. 10, 2003; 68 FR 74511, 74788, Dec. 24, 2003; 69 FR 40758, July 6, 2004; 69 FR 53362, Sept. 1, 2004; 69 FR 67284, Nov. 17, 2004; 69 FR 70400, Dec. 6, 2004; 70 FR 28219, May 17, 2005]

Fishery Conservation and Management

§ 640.1

APPENDIX A TO PART 635—SPECIES TABLES

TABLE 1 OF APPENDIX A TO PART 635—OCEANIC
SHARKS

A. Large coastal sharks:

1. Ridgeback sharks:

Sandbar, *Carcharhinus plumbeus*
Silky, *Carcharhinus falciformis*
Tiger, *Galeocerdo cuvieri*

2. Non-ridgeback sharks:

Blacktip, *Carcharhinus limbatus*
Bull, *Carcharhinus leucas*
Great hammerhead, *Sphyrna mokarran*
Lemon, *Negaprion brevirostris*
Nurse, *Ginglymostoma cirratum*
Scalloped hammerhead, *Sphyrna lewini*
Smooth hammerhead, *Sphyrna zygaena*
Spinner, *Carcharhinus brevipinna*

B. Small coastal sharks:

Atlantic sharpnose, *Rhizoprionodon
terraenovae*
Blacknose, *Carcharhinus acronotus*
Bonnethead, *Sphyrna tiburo*
Finetooth, *Carcharhinus isodon*

C. Pelagic sharks:

Blue, *Prionace glauca*
Oceanic whitetip, *Carcharhinus longimanus*
Porbeagle, *Lamna nasus*
Shortfin mako, *Isurus oxyrinchus*
Thresher, *Alopias vulpinus*.

D. Prohibited sharks:

Atlantic angel, *Squatina dumerili*
Basking, *Cetorhinus maximus*
Bigeye sand tiger, *Odontaspis noronhai*
Bigeye sixgill, *Hexanchus vitulus*
Bigeye thresher, *Alopias superciliosus*
Bignose, *Carcharhinus altimus*
Caribbean reef, *Carcharhinus perezii*
Caribbean sharpnose, *Rhizoprionodon porosus*
Dusky, *Carcharhinus obscurus*
Galapagos, *Carcharhinus galapagensis*
Longfin mako, *Isurus paucus*
Narrowtooth, *Carcharhinus brachyurus*
Night, *Carcharhinus signatus*
Sand tiger, *Odontaspis taurus*
Sevengill, *Heptranchias perlo*
Sixgill, *Hexanchus griseus*
Smalltail, *Carcharhinus porosus*
Whale, *Rhincodon typus*
White, *Carcharodon carcharias*

TABLE 2 OF APPENDIX A TO PART 635—
DEEPWATER/OTHER SHARK SPECIES

Blotched catshark, *Scyliorhinus meadi*
Broadgill catshark, *Apristurus riveri*
Chain dogfish, *Scyliorhinus retifer*
Deepwater catshark, *Apristurus profundorum*
Dwarf catshark, *Scyliorhinus torrei*
Iceland catshark, *Apristurus laurussoni*

Marbled catshark, *Galeus arae*
Smallfin catshark, *Apristurus parvipinnis*
Bigtooth cookiecutter, *Isistius plutodus*
Blainville's dogfish, *Squalus blainvillei*
Bramble shark, *Echinorhinus brucus*
Broadband dogfish, *Etmopterus gracilispinis*
Caribbean lanternshark, *Etmopterus hillianus*
Cookiecutter shark, *Isistius brasiliensis*
Cuban dogfish, *Squalus cubensis*
Flatnose gulper shark, *Deania profundorum*
Fringefin lanternshark, *Etmopterus schultzi*
Great lanternshark, *Etmopterus princeps*
Green lanternshark, *Etmopterus virens*
Greenland shark, *Somniosus microcephalus*
Gulper shark, *Centrophorus granulosus*
Japanese gulper shark, *Centrophorus acutus*
Kitefin shark, *Dalatias licha*
Lined lanternshark, *Etmopterus bullisi*
Little gulper shark, *Centrophorus uyato*
Portuguese shark, *Cetorhynchus maximus*
Pygmy shark, *Squaliolus laticaudus*
Roughskin spiny dogfish, *Squalus asper*
Smallmouth velvet dogfish, *Scymnodon
obscurus*
Smooth lanternshark, *Etmopterus pusillus*
American sawshark, *Pristiophorus schroederi*
Florida smoothhound, *Mustelus norrisi*
Smooth dogfish, *Mustelus canis*

PART 640—SPINY LOBSTER FISHERY OF THE GULF OF MEXICO AND SOUTH ATLANTIC

Subpart A—General Provisions

- Sec.
640.1 Purpose and scope.
640.2 Definitions.
640.3 Relation to other laws.
640.4 Permits and fees.
640.5 Recordkeeping and reporting. [Re-
served]
640.6 Vessel and gear identification.
640.7 Prohibitions.
640.8 Facilitation of enforcement.
640.9 Penalties.

Subpart B—Management Measures

- 640.20 Seasons.
640.21 Harvest limitations.
640.22 Gear and diving restrictions.
640.23 Bag/possession limits.
640.24 Authorized activities.
640.25 Adjustment of management meas-
ures.
640.26 Tortugas marine reserves.
FIGURE 1 TO PART 640

AUTHORITY: 16 U.S.C. 1801 *et seq.*

Subpart A—General Provisions

§ 640.1 Purpose and scope.

(a) The purpose of this part is to im-
plement the Fishery Management Plan

§ 640.2

50 CFR Ch. VI (10–1–05 Edition)

for the Spiny Lobster Fishery of the Gulf of Mexico and South Atlantic prepared by the South Atlantic and Gulf of Mexico Fishery Management Councils under the Magnuson Act.

(b) This part governs conservation and management of spiny lobster and slipper (Spanish) lobster in the EEZ in the Atlantic Ocean and Gulf of Mexico off the Atlantic and Gulf of Mexico states from the Virginia/North Carolina border south and through the Gulf of Mexico.

(c) An owner or operator of a vessel that has legally harvested spiny lobsters in the waters of a foreign nation and possesses spiny lobsters, or separated tails, in the EEZ incidental to such foreign harvesting is exempt from the requirements of this part 640, provided proof of lawful harvest in the waters of a foreign nation accompanies such lobsters or tails.

[57 FR 56518, Nov. 30, 1992]

§ 640.2 Definitions.

In addition to the definitions in the Magnuson Act and in § 620.2 of this chapter, the terms used in this part have the following meanings:

Bully net means a circular frame attached at right angles to the end of a pole and supporting a conical bag of webbing. The webbing is usually held up by means of a cord which is released when the net is dropped over a lobster.

Carapace length means the measurement of the carapace (head, body, or front section) of a spiny lobster from the anteriormost edge (front) of the groove between the horns directly above the eyes, along the middorsal line (middle of the back), to the rear edge of the top part of the carapace, excluding any translucent membrane.

Commercial fishing means any fishing or fishing activities which result in the harvest of any marine or freshwater organisms, one or more of which (or parts thereof) is sold, traded, or bartered.

Hoop net means a frame, circular or otherwise, supporting a shallow bag of webbing and suspended by a line and bridles. The net is baited and lowered to the ocean bottom, to be raised rapidly at a later time to prevent the escape of lobster.

Live well means a shaded container used for holding live lobsters aboard a

vessel in which aerated seawater is continuously circulated from the sea. Circulation of seawater at a rate that replaces the water at least every 8 minutes meets the requirement for aeration.

Off Florida means the area from the Florida coast to the outer limit of the EEZ between the Georgia/Florida boundary (30°42'45.6"N. latitude) and the Alabama/Florida boundary (87°31'06"W. longitude).

Off the Gulf states, other than Florida means the area from the coast to the outer limit of the EEZ between the Texas/Mexico border to the Alabama/Florida boundary (87°31'06"W. long.).

Off Monroe County, Florida means the area from the Florida coast to the outer limit of the EEZ between a line extending directly east from the Dade/Monroe County, Florida boundary (25°20.4'N. latitude) and a line extending directly west from the Monroe/Collier County, Florida boundary (25°48.0'N. latitude).

Off the southern Atlantic states, other than Florida means the area from the coast to the outer limit of the EEZ between the Virginia/North Carolina boundary (36°34'55" N. lat.) to the Georgia/Florida boundary (30°42'45.6" N. lat.).

Recreational fishing means fishing or fishing activities which result in the harvest of fish, none of which (or parts thereof) is sold, traded, or bartered.

Regional Director means the Director, Southeast Region, NMFS, 9721 Executive Center Drive N., St. Petersburg, FL 33702, telephone 813-570-5301; or a designee.

Slipper (Spanish) lobster means the species *Scyllarides nodifer*.

Spiny lobster means the species *Panulirus argus*.

Tail length means the lengthwise measurement of the entire tail (segmented portion), not including any protruding muscle tissue, of a spiny lobster along the top middorsal line (middle of the back) to the rearmost extremity. The measurement is made with the tail in a flat, straight position with the tip of the tail closed.

Trip means a fishing trip, regardless of number of days' duration, that begins with departure from a dock, berth,

Fishery Conservation and Management

§ 640.4

beach, seawall, or ramp and that terminates with return to a dock, berth, beach, seawall, or ramp.

[47 FR 29203, July 2, 1982, as amended at 52 FR 22659, June 15, 1987; 53 FR 17196, May 16, 1988; 53 FR 24655, June 29, 1988; 53 FR 38294, Sept. 30, 1988; 55 FR 26448, June 28, 1990; 57 FR 56518, Nov. 30, 1992; 58 FR 38979, July 21, 1993; 59 FR 53119, Oct. 21, 1994; 60 FR 41830, Aug. 14, 1995]

§ 640.3 Relation to other laws.

(a) The relation of this part to other laws is set forth in § 620.3 of this chapter and paragraph (b) of this section.

(b) The regulations in this part apply within the boundaries of any national park, monument, or marine sanctuary in the Gulf of Mexico and South Atlantic EEZ.

[47 FR 29203, July 2, 1982, as amended at 52 FR 22659, June 15, 1987; 53 FR 24655, June 29, 1988]

§ 640.4 Permits and fees.

(a) *Applicability*—(1) *Licenses, certificates, and permits*—(i) *EEZ off Florida and spiny lobster landed in Florida*. For a person to sell, trade, or barter, or attempt to sell, trade, or barter, a spiny lobster harvested or possessed in the EEZ off Florida, or harvested in the EEZ other than off Florida and landed from a fishing vessel in Florida, or for a person to be exempt from the daily bag and possession limit specified in § 640.23(b)(1) for such spiny lobster, such person must have the licenses and certificates specified to be a “commercial harvester,” as defined in Rule 46-24.002(2), Florida Administrative Code, in effect as of June 1, 1994. This incorporation by reference was approved by the Director of the Office of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from the Florida Marine Fisheries Commission, 2540 Executive Center Circle West, Suite 106, Tallahassee, FL 32301; telephone: 904-487-0554. Copies may be inspected at the Office of the Regional Director; the Office of Fisheries Conservation and Management, NMFS, 1315 East-West Highway, Silver Spring, MD; or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: [http://](http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html)

www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

(ii) *EEZ other than off Florida*. For a person to sell, trade, or barter, or attempt to sell, trade, or barter, a spiny lobster harvested in the EEZ other than off Florida or for a person to be exempt from the daily bag and possession limit specified in § 640.23(b)(1) for such spiny lobster, a Federal vessel permit must be issued to the harvesting vessel and must be on board. However, see paragraph (a)(1)(i) of this section for the licenses and certificates required for a person to possess or land spiny lobster harvested in the EEZ other than off Florida and subsequently possessed in the EEZ off Florida or landed from a fishing vessel in Florida.

(2) *Tail-separation permits*. For a person to possess aboard a fishing vessel a separated spiny lobster tail in or from the EEZ, a tail-separation permit must be issued to the vessel and must be on board.

(3) *Corporation/partnership-owned vessels*. For a vessel owned by a corporation or partnership to be eligible for a Federal vessel permit specified in paragraph (a)(1)(ii) of this section, the earned income qualification specified in paragraph (b)(2)(vi) of this section must be met by, and the statement required by that paragraph must be submitted by, an officer or shareholder of the corporation, a general partner of the partnership, or the vessel operator.

(4) *Operator-qualified permits*. A vessel permit issued upon the qualification of an operator is valid only when that person is the operator of the vessel.

(b) *Applications for permits*. (1) An application for a Federal vessel and/or tail-separation permit must be submitted and signed by the owner (in the case of a corporation, a qualifying officer or shareholder; in the case of a partnership, a qualifying general partner) or operator of the vessel. The application must be submitted to the Regional Director at least 30 days prior to the date on which the applicant desires to have the permit made effective.

(2) An applicant must provide the following information:

(i) A copy of the vessel's U.S. Coast Guard certificate of documentation or,

if not documented, a copy of its state registration certificate.

(ii) The vessel's name and official number.

(iii) Name, mailing address including zip code, telephone number, social security number, and date of birth of the owner (if the owner is a corporation/partnership, in lieu of the social security number, provide the employer identification number, if one has been assigned by the Internal Revenue Service, and, in lieu of the date of birth, provide the date the corporation/partnership was formed).

(iv) If the owner does not meet the earned income qualification specified in paragraph (b)(2)(vi) of this section and the operator does meet that qualification, the name, mailing address including zip code, telephone number, social security number, and date of birth of the operator.

(v) Information concerning vessel, gear used, fishing areas, and fisheries vessel is used in, as requested by the Regional Director and included on the application form.

(vi) A sworn statement by the applicant for a vessel permit certifying that at least 10 percent of his or her earned income was derived from commercial fishing, that is, sale of the catch, during the calendar year preceding the application.

(vii) Documentation supporting the statement of income, if required under paragraph (b)(3) of this section.

(viii) If a tail-separation permit is desired, a sworn statement by the applicant certifying that his or her fishing activity—

(A) Is routinely conducted in the EEZ on trips of 48 hours or more; and

(B) Necessitates the separation of carapace and tail to maintain a quality product.

(ix) Any other information that may be necessary for the issuance or administration of the permit, as requested by the Regional Director and included on the application form.

(3) The Regional Director may require the applicant to provide documentation supporting the sworn statement under paragraph (b)(2)(vi) of this section before a permit is issued or to substantiate why such permit should not be revoked or otherwise sanctioned

under paragraph (h) of this section. Such required documentation may include copies of appropriate forms and schedules from the applicant's income tax return. Copies of income tax forms and schedules are treated as confidential.

(c) *Change in application information.* The owner or operator of a vessel with a permit must notify the Regional Director within 30 days after any change in the application information specified in paragraph (b) of this section. The permit is void if any change in the information is not reported within 30 days.

(d) *Fees.* A fee is charged for each permit application submitted under paragraph (b) of this section. The amount of the fee is calculated in accordance with the procedures of the NOAA Finance Handbook for determining the administrative costs of each special product or service. The fee may not exceed such costs and is specified with each application form. The appropriate fee must accompany each application.

(e) *Issuance.* (1) The Regional Director will issue a permit at any time to an applicant if the application is complete and the applicant meets the earned income requirement specified in paragraph (b)(2)(vi) of this section. An application is complete when all requested forms, information, and documentation have been received.

(2) Upon receipt of an incomplete application, the Regional Director will notify the applicant of the deficiency. If the applicant fails to correct the deficiency within 30 days of the date of the Regional Director's letter of notification, the application will be considered abandoned.

(f) *Duration.* A permit remains valid for the period specified on it unless the vessel is sold or the permit is revoked, suspended, or modified pursuant to subpart D of 15 CFR part 904.

(g) *Transfer.* A permit issued pursuant to this section is not transferable or assignable. A person purchasing a permitted vessel who desires to conduct activities for which a permit is required must apply for a permit in accordance with the provisions of paragraph (b) of this section. The application must be accompanied by a copy of a signed bill of sale.

(h) *Display.* A permit issued pursuant to this section must be carried on board the vessel, and such vessel must be identified as required by § 640.6. The operator of a vessel must present the permit for inspection upon the request of an authorized officer.

(i) *Sanctions and denials.* A permit issued pursuant to this section may be revoked, suspended, or modified, and a permit application may be denied, in accordance with the procedures governing enforcement-related permit sanctions and denials found at subpart D of 15 CFR part 904.

(j) *Alteration.* A permit that is altered, erased, or mutilated is invalid.

(k) *Replacement.* A replacement permit may be issued. An application for a replacement permit will not be considered a new application. A fee, the amount of which is stated with the application form, must accompany each request for a replacement permit.

[57 FR 56518, Nov. 30, 1992, as amended at 59 FR 53119, Oct. 21, 1994; 60 FR 41830, Aug. 14, 1995; 69 FR 18803, Apr. 9, 2004]

§ 640.5 Recordkeeping and reporting. [Reserved]

§ 640.6 Vessel and gear identification.

(a) *EEZ off Florida.* (1) An owner or operator of a vessel that is used to harvest spiny lobsters by traps in the EEZ off Florida must comply with the vessel and gear identification requirements applicable to the harvesting of spiny lobsters by traps in Florida's waters in sections 370.14(2)(a) and (3) and 370.142(2)(b), Florida Statutes, in effect as of July 1, 1994, and in Rule 46-24.006(3), (4), and (5), Florida Administrative Code, in effect as of June 1, 1994.

(2) An owner or operator of a vessel that is used to harvest spiny lobsters by diving in the EEZ off Florida must comply with the vessel identification requirements applicable to the harvesting of spiny lobsters by diving in Florida's waters in Rule 46-24.006(6), Florida Administrative Code, in effect as of June 1, 1994.

(3) The incorporation by reference in paragraphs (a)(1) and (a)(2) of this section of sections 370.14(2)(a) and (3) and 370.142(2)(b), Florida Statutes, and Rule 46-24.006(3), (4), (5), and (6), Florida Ad-

ministrative Code, was approved by the Director of the Office of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from the Florida Marine Fisheries Commission, 2540 Executive Center Circle West, Suite 106, Tallahassee, FL 32301; telephone: 904-487-0554. Copies may be inspected at the Office of the Regional Director; the Office of Fisheries Conservation and Management, NMFS, 1315 East-West Highway, Silver Spring, MD; or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

(b) *EEZ other than off Florida.* (1) The owner or operator of a vessel that is used to harvest spiny lobsters in the EEZ other than off Florida, must meet the following vessel and gear identification requirements:

(i) The vessel's Florida crawfish license or trap number or, if not licensed by Florida, the vessel's Federal vessel permit number must be permanently and conspicuously displayed horizontally on the uppermost structural portion of the vessel in numbers at least 10 inches (25.4 cm) high so as to be readily identifiable from the air and water;

(ii) If the vessel uses spiny lobster traps in the EEZ, other than off Florida—

(A) The vessel's color code, as assigned by Florida or, if a color code has not been assigned by Florida, as assigned by the Regional Director, must be permanently and conspicuously displayed above the number specified in paragraph (b)(1)(i) of this section so as to be readily identifiable from the air and water, such color code being in the form of a circle at least 20 inches (50.8 cm) in diameter on a background of colors contrasting to those contained in the assigned color code;

(B) A buoy or timed-release buoy of such strength and buoyancy to float must be attached to each spiny lobster trap or at each end of a string of traps;

(C) A buoy used to mark spiny lobster traps must bear the vessel's assigned color code and be of such color,

§ 640.7

50 CFR Ch. VI (10–1–05 Edition)

hue, and brilliancy as to be easily distinguished, seen, and located;

(D) A buoy used to mark spiny lobster traps must bear the vessel's Florida crawfish license or trap number or, if not licensed by Florida, the vessel's Federal vessel permit number in numbers at least 2 inches (5.08 cm) high; and

(E) A spiny lobster trap must bear the vessel's Florida crawfish license or trap number or, if not licensed by Florida, the vessel's Federal vessel permit number permanently and legibly affixed.

(2) A spiny lobster trap in the EEZ, other than off Florida, will be presumed to be the property of the most recently documented owner. Upon the sale or transfer of a spiny lobster trap used in the EEZ, other than off Florida, within 5 days of acquiring ownership, the person acquiring ownership must notify the Florida Division of Law Enforcement of the Department of Environmental Protection, for a trap that bears a Florida crawfish license or trap number, or the Regional Director, for a trap that bears a Federal vessel permit number, as to the number of traps purchased, the vendor, and the crawfish license or trap number, or Federal vessel permit number, currently displayed on the traps, and must request issuance of a crawfish license or trap number, or Federal vessel permit, if the acquiring owner does not possess such license or trap number or permit.

(c) *Unmarked traps and buoys.* An unmarked spiny lobster trap or buoy in the EEZ is illegal gear. Such trap or buoy, and any connecting lines, will be considered unclaimed or abandoned property and may be disposed of in any manner considered appropriate by the Assistant Administrator or an authorized officer. An owner of such trap or buoy remains subject to appropriate civil penalties.

[57 FR 56519, Nov. 30, 1992, as amended at 59 FR 53119, Oct. 21, 1994; 60 FR 41830, Aug. 14, 1995; 69 FR 18803, Apr. 9, 2004]

§ 640.7 Prohibitions.

In addition to the general prohibitions specified in § 620.7 of this chapter, it is unlawful for any person to do any of the following:

(a) Sell, trade, or barter, or attempt to sell, trade, or barter, a spiny lobster in or from the EEZ without a required license, certificate, or permit, as specified in § 640.4(a)(1).

(b) Falsify information specified in § 640.4(b)(2) on an application for a permit.

(c) Fail to display a permit, as specified in § 640.4(h).

(d) Falsify or fail to display and maintain vessel and gear identification, as required by § 640.6 (a) and (b).

(e) Possess a spiny lobster trap in the EEZ at a time not authorized, as specified in § 640.20(b)(3)(i) and (b)(3)(ii).

(f) Possess a spiny lobster in or from the EEZ at a time not authorized, as specified in § 640.20(b)(4).

(g) Fail to return immediately to the water a berried spiny lobster or slipper lobster; strip eggs from or otherwise molest a berried spiny lobster or slipper lobster; or possess a spiny lobster or slipper lobster, or part thereof, from which eggs, swimmerettes, or pleopods have been removed or stripped; as specified in § 640.21(a).

(h) Possess or fail to return immediately to the water unharmed a spiny lobster smaller than the minimum size limits specified in § 640.21 (b)(1) and (b)(3), except as provided in § 640.21(c).

(i) Harvest or attempt to harvest a spiny lobster by diving without having and using in the water a measuring device, or fail to release an undersized spiny lobster in the water, as specified in § 640.21(b)(2).

(j) Possess an undersized spiny lobster for use as an attractant in a trap in quantities or under conditions not authorized in § 640.21(c).

(k) Possess a separated spiny lobster tail, except as specified in § 640.21(d).

(l) Possess a spiny lobster harvested by prohibited gear or methods; or possess on board a fishing vessel any dynamite or similar explosive substance; as specified in § 640.20(b) and § 640.22 (a)(1) and (a)(3).

(m) Use or possess in the EEZ a spiny lobster trap that does not meet the requirements specified in § 640.22(b)(1).

(n) Pull or tend a spiny lobster trap other than during daylight hours, as specified in § 640.22(b)(2).

Fishery Conservation and Management

§ 640.20

(o) Pull or tend another person's spiny lobster trap, except as authorized in § 640.22(b)(3).

(p) Possess spiny lobsters in or from the EEZ in an amount exceeding the daily bag and possession limit specified in § 640.23 (a), (b)(1), or (b)(2) except as authorized in § 640.23(b)(3) and (b)(4).

(q) Possess spiny lobsters aboard a vessel that uses or has on board a net or trawl in an amount exceeding the limits, as specified in § 640.23(b)(4).

(r) Operate a vessel that fishes for or possesses spiny lobster in or from the EEZ with spiny lobster aboard in an amount exceeding the cumulative bag and possession limit, as specified in § 640.23(d).

(s) Transfer or receive at sea spiny lobster in or from the EEZ caught under the bag and possession limits, as specified in § 640.23(e).

(t) Interfere with, obstruct, delay, or prevent by any means an investigation, search, seizure, or disposition of seized property in connection with enforcement of the Magnuson Act.

(u) Make any false statement, oral or written, to an authorized officer concerning the taking, catching, harvesting, landing, purchase, sale, possession, or transfer of a spiny lobster.

(v) Fish for any species or anchor a fishing vessel in a marine reserve as specified in § 640.26.

[57 FR 56520, Nov. 30, 1992, as amended at 58 FR 38979, July 21, 1993; 58 FR 61845, Nov. 23, 1993; 59 FR 53119, Oct. 21, 1994; 60 FR 41831, Aug. 14, 1995; 67 FR 47469, July 19, 2002]

Subpart B—Management Measures

SOURCE: 57 FR 56520, Nov. 30, 1992, unless otherwise noted.

§ 640.20 Seasons.

(a) *EEZ off the southern Atlantic states, other than Florida.* In the EEZ off the southern Atlantic states, other than

Florida, there are no seasonal restrictions on the harvest of spiny lobster or on the possession of traps.

(b) *EEZ off Florida and off the Gulf states, other than Florida.*—(1) *Commercial and recreational fishing season.* The commercial and recreational fishing season for spiny lobster in the EEZ off Florida and the EEZ off the Gulf states, other than Florida, begins on August 6 and ends on March 31.

(2) *Special recreational fishing seasons.*—(i) *EEZ off Florida.* There is a 2-day special recreational fishing season in the EEZ off Florida on the last Wednesday and successive Thursday of July each year during which fishing for spiny lobster is limited to diving or use of a bully net or hoop net. (See § 640.22(a) for general prohibitions on gear and methods.) In the EEZ off Monroe County, Florida, no person may harvest spiny lobster by diving at night, that is, from 1 hour after official sunset to 1 hour before official sunrise, during this 2-day special recreational fishing season.

(ii) *EEZ off the Gulf states, other than Florida.* There is a 2-day special recreational fishing season in the EEZ off the Gulf states, other than Florida, during the last Saturday and successive Sunday of July each year during which fishing for spiny lobster may be conducted by authorized gear and methods other than traps. (See § 640.22(a) for general prohibitions on gear and methods.)

(3) *Possession of traps.* (i) In the EEZ off Florida, the rules and regulations applicable to the possession of spiny lobster traps in Florida's waters in Rule 46-24.005(3), (4), and (5), Florida Administrative Code, in effect as of June 1, 1994, apply in their entirety to the possession of spiny lobster traps in the EEZ off Florida. This incorporation by reference was approved by the Director of the Office of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from the Florida Marine Fisheries Commission, 2540 Executive Center Circle West, Suite 106, Tallahassee, FL 32301; telephone: 904-487-0554. Copies may be inspected at the Office of the Regional Director; the Office of Fisheries Conservation and Management, NMFS, 1315 East-West Highway, Silver

Spring, MD; or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

(ii) In the EEZ off the Gulf states, other than Florida, a spiny lobster trap may be placed in the water prior to the commercial and recreational fishing season, which is specified in paragraph (b)(1) of this section beginning on August 1 and must be removed from the water after such season not later than April 5.

(iii) A spiny lobster trap, buoy, or rope in the EEZ off Florida or in the EEZ off the Gulf states, other than Florida, during periods not authorized in paragraphs (b)(3)(i) and (b)(3)(ii) of this section will be considered unclaimed or abandoned property and may be disposed of in any manner considered appropriate by the Assistant Administrator or an authorized officer. An owner of such trap, buoy, or rope remains subject to appropriate civil penalties.

(4) *Possession of spiny lobsters.* In the EEZ off Florida and the Gulf states, a whole or a part of a spiny lobster subject to these regulations may only be possessed during the commercial and recreational fishing season and the special recreational fishing season specified in § 640.20, unless accompanied by proof of lawful harvest in the waters of a foreign nation. Consistent with the provisions of paragraphs (b)(3)(i) and (ii) of this section, a spiny lobster in a trap in this area will not be deemed to be possessed provided such spiny lobster is returned immediately to the water unharmed when a trap is removed from the water between March 31 and April 15.

(c) *Primacy of seasonal restrictions in the EEZ off Florida.* The seasonal restrictions applicable in the EEZ off Florida apply to all spiny lobsters and traps in the EEZ off Florida, without regard to harvest or use elsewhere, unless accompanied by proof of lawful harvest elsewhere.

[60 FR 41831, Aug. 14, 1995, as amended at 69 FR 18803, Apr. 9, 2004]

§ 640.21 Harvest limitations.

(a) *Berried lobsters.* A berried (egg-bearing) spiny lobster or slipper lobster in or from the EEZ must be returned immediately to the water unharmed. If found in a trap in the EEZ, a berried spiny lobster or slipper lobster may not be retained in the trap. A berried spiny lobster or slipper lobster in or from the EEZ may not be stripped of its eggs or otherwise molested. The possession of a spiny lobster or slipper lobster, or part thereof, in or from the EEZ from which eggs, swimmerettes, or pleopods have been removed or stripped is prohibited.

(b) *Minimum size limits.* (1) Except as provided in paragraph (c) of this section—

(i) No person may possess a spiny lobster in or from the EEZ with a carapace length of 3.0 inches (7.62 cm) or less; and

(ii) A spiny lobster, harvested in the EEZ by means other than diving, with a carapace length of 3.0 inches (7.62 cm) or less must be returned immediately to the water unharmed.

(2) No person may harvest or attempt to harvest a spiny lobster by diving in the EEZ unless he or she possesses, while in the water, a measuring device capable of measuring the carapace length. A spiny lobster captured by a diver must be measured in the water using such measuring device and, if the spiny lobster has a carapace length of 3.0 inches (7.62 cm) or less, it must be released unharmed immediately without removal from the water.

(3) Aboard a vessel authorized under paragraph (d) of this section to possess a separated spiny lobster tail, no person may possess in or from the EEZ a separated spiny lobster tail with a tail length less than 5.5 inches (13.97 cm).

(c) *Undersized attractants.* A live spiny lobster under the minimum size limit specified in paragraph (b)(1) of this section that is harvested in the EEZ by a trap may be retained aboard the harvesting vessel for future use as an attractant in a trap provided it is held in a live well aboard the vessel. No more than fifty undersized spiny lobsters, or one per trap aboard the vessel, whichever is greater, may be retained aboard for use as attractants. The live well must provide a minimum of $\frac{3}{4}$ gallons

Fishery Conservation and Management

§ 640.23

(1.7 liters) of seawater per spiny lobster. An undersized spiny lobster so retained must be released to the water alive and unharmed immediately upon leaving the trap lines and prior to one hour after official sunset each day.

(d) *Tail separation.* The possession aboard a fishing vessel of a separated spiny lobster tail in or from the EEZ is authorized only when the possession is incidental to fishing exclusively in the EEZ on a trip of 48 hours or more and a Federal tail-separation permit specified in § 640.4(a)(2) has been issued to and is on board the vessel.

[57 FR 56520, Nov. 30, 1992, as amended at 59 FR 53119, Oct. 21, 1994]

§ 640.22 Gear and diving restrictions.

(a) *Prohibited gear and methods.* (1) A spiny lobster may not be taken in the EEZ with a spear, hook, or similar device, or gear containing such devices. In the EEZ, the possession of a speared, pierced, or punctured spiny lobster is *prima facie* evidence that prohibited gear was used to take such lobster. Hook, as used in this paragraph (a)(1), does not include a hook in a hook-and-line fishery for species other than spiny lobster; and possession of a spiny lobster that has been speared, pierced, or punctured by such hook is not considered evidence that prohibited gear was used to take the spiny lobster, provided no prohibited gear is on board the vessel.

(2) A spiny lobster may not be taken in a directed fishery by the use of a net or trawl. See § 640.23(d) for the bycatch limits applicable to a vessel that uses or has on board a net or trawl.

(3) Poisons and explosives may not be used to take a spiny lobster or slipper lobster in the EEZ. For the purposes of this paragraph (a)(3), chlorine, bleach, and similar substances, which are used to flush a spiny lobster out of rocks or coral, are poisons. A vessel in the spiny lobster or slipper lobster fishery may not possess on board in the EEZ any dynamite or similar explosive substance.

(b) *Traps.* (1) In the EEZ, a spiny lobster trap may be no larger in dimension than 3 feet by 2 feet by 2 feet (91.4 cm by 61.0 cm by 61.0 cm), or the volume equivalent. A trap constructed of material other than wood must have a

panel constructed of wood, cotton, or other material that will degrade at the same rate as a wooden trap. Such panel must be located in the upper half of the sides or on top of the trap, so that, when removed, there will be an opening in the trap no smaller than the diameter found at the throat or entrance of the trap.

(2) A spiny lobster trap in the EEZ may be pulled or tended during daylight hours only, that is, from 1 hour before official sunrise to 1 hour after official sunset.

(3) A spiny lobster trap in the EEZ may be pulled or tended only by the owner's vessel, or by a vessel for which permission to pull or work traps belonging to another person has been granted—

(i) For traps in the EEZ off Florida, by the Florida Division of Law Enforcement, Department of Environmental Protection, in accordance with the procedures in Rule 46-24.006(7), Florida Administrative Code, in effect as of June 1, 1994. This incorporation by reference was approved by the Director of the Office of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from the Florida Marine Fisheries Commission, 2540 Executive Center Circle West, Suite 106, Tallahassee, FL 32301; telephone: 904-487-0554. Copies may be inspected at the Office of the Regional Director; the Office of Fisheries Conservation and Management, NMFS, 1315 East-West Highway, Silver Spring, MD; or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

(ii) For traps in the EEZ, other than off Florida, by the Regional Director, as may be arranged upon written request.

[57 FR 56520, Nov. 30, 1992, as amended at 58 FR 38980, July 21, 1993; 60 FR 41831, Aug. 14, 1995; 69 FR 18803, Apr. 9, 2004]

§ 640.23 Bag/possession limits.

(a) *EEZ off the southern Atlantic states, other than Florida.* The daily bag or possession limit for spiny lobster in or

§ 640.24

50 CFR Ch. VI (10–1–05 Edition)

from the EEZ off the southern Atlantic states, other than Florida, is two per person for commercial and recreational fishing, year-round.

(b) *EEZ off Florida and off the Gulf states, other than Florida*—(1) *Commercial and recreational fishing season*. Except as specified in paragraphs (b)(3) and (b)(4) of this section, during the commercial and recreational fishing season specified in § 640.20(b)(1), the daily bag or possession limit of spiny lobster in or from the EEZ off Florida and off the Gulf states, other than Florida, is six per person.

(2) *Special recreational fishing seasons*. During the special recreational fishing seasons specified in § 640.20(b)(2), the daily bag or possession limit of spiny lobster—

(i) In or from the EEZ off the Gulf states, other than Florida, is six per person;

(ii) In or from the EEZ off Florida other than off Monroe County, Florida, is twelve per person; and

(iii) In or from the EEZ off Monroe County, Florida, is six per person.

(3) *Exemption from the bag/possession limit*. During the commercial and recreational fishing season specified in § 640.20(b)(1), a person is exempt from the bag and possession limit specified in paragraph (a) of this section, provided—

(i) The harvest of spiny lobsters is by diving, or by the use of a bully net, hoop net, or spiny lobster trap; and

(ii) The vessel from which the person is operating has on board the required licenses, certificates, or permits, as specified in § 640.4(a)(1).

(4) *Harvest by net or trawl*. During the commercial and recreational fishing season specified in § 640.20(b)(1), aboard a vessel with the required licenses, certificates, or permits specified in § 640.4(a)(1) that harvests spiny lobster by net or trawl or has on board a net or trawl, the possession of spiny lobster in or from the EEZ off Florida and off the Gulf states, other than Florida, may not exceed at any time 5 percent, whole weight, of the total whole weight of all fish lawfully in possession on board such vessel. If such vessel lawfully possesses a separated spiny lobster tail, the possession of spiny lobster in or from the EEZ may not exceed at any

time 1.6 percent, by weight of the spiny lobster or parts thereof, of the total whole weight of all fish lawfully in possession on board such vessel. For the purposes of this paragraph (b)(4), the term “net or trawl” does not include a hand-held net, a loading or dip net, a bully net, or a hoop net.

(5) *Diving at night*. The provisions of paragraph (b)(3) of this section notwithstanding, a person who harvests spiny lobster in the EEZ by diving at night, that is, from 1 hour after official sunset to 1 hour before official sunrise, is limited to the bag limit specified in paragraph (b)(1) of this section, whether or not a Federal vessel permit specified in § 640.4(a)(1) has been issued to and is on board the vessel from which the diver is operating.

(c) *Combination of bag/possession limits*. A person who fishes for or possesses spiny lobster in or from the EEZ under a bag or possession limit specified in paragraph (a) or (b) of this section may not combine the bag or possession limits of those paragraphs or combine such bag or possession limit with a bag or possession limit applicable to state waters.

(d) *Responsibility for bag/possession limits*. The operator of a vessel that fishes for or possesses spiny lobster in or from the EEZ is responsible for the cumulative bag or possession limit specified in paragraphs (a) and (b) of this section applicable to that vessel, based on the number of persons aboard.

(e) *Transfer at sea*. A person who fishes for or possesses spiny lobster in or from the EEZ under a bag or possession limit specified in paragraph (a) or (b) of this section may not transfer a spiny lobster at sea from a fishing vessel to any other vessel, and no person may receive at sea such spiny lobster.

[60 FR 41831, Aug. 14, 1995]

§ 640.24 Authorized activities.

The Assistant Administrator may authorize, for the acquisition of information and data, activities otherwise prohibited by the regulations in this part.

[57 FR 56520, Nov. 30, 1992, as amended at 60 FR 41832, Aug. 14, 1995]

§ 640.25 Adjustment of management measures.

In accordance with the framework procedure of the Fishery Management Plan for the Spiny Lobster Fishery of the Gulf of Mexico and South Atlantic, the RA may establish or modify the following items: definitions of essential fish habitat, Essential Fish Habitat-Habitat Areas of Particular Concern, Coral-Habitat Areas of Particular Concern, biomass levels, age-structured analyses, limits on the number of traps fished by each vessel, construction characteristics of traps, specification of gear and vessel identification requirements, specification of allowable or prohibited gear in a directed fishery, specification of bycatch levels in non-directed fisheries, changes to soak or removal periods and requirements for traps, recreational bag and possession limits, changes in fishing seasons, limitations on use, possession, and handling of undersized lobsters, and changes in minimum size.

[65 FR 37296, June 14, 2000]

§ 640.26 Tortugas marine reserves.

The following activities are prohibited within the Tortugas marine reserves: Fishing for any species and anchoring by fishing vessels.

(a) *EEZ portion of Tortugas North.* The area is bounded by rhumb lines connecting the following points: From point A at 24°40'00' N. lat., 83°06'00' W. long. to point B at 24°46'00' N. lat., 83°06'00' W. long. to point C at 24°46'00' N. lat., 83°00'00' W. long.; thence along the line denoting the seaward limit of Florida's waters, as shown on the current edition of NOAA chart 11438, to point A at 24°40'00' N. lat., 83°06'00' W. long.

(b) *Tortugas South.* The area is bounded by rhumb lines connecting, in order, the following points:

Point	North lat.	West long.
A	24°33'00'	83°09'00'
B	24°33'00'	83°05'00'
C	24°18'00'	83°05'00'
D	24°18'00'	83°09'00'
A	24°33'00'	83°09'00'

- 648.200 Specifications.
- 648.201 Management areas.
- 648.202 Total allowable catch (TAC) controls.
- 648.203 Vessel size/horsepower limits.
- 648.204 Herring roe restrictions.
- 648.205 VMS requirements.
- 648.206 Framework provisions.

Subpart L—Management Measures for the Spiny Dogfish Fishery

- 648.230 Catch quotas and other restrictions.
- 648.231 Closures.
- 648.232 Time Restrictions. [Reserved]
- 648.233 Minimum Fish Sizes. [Reserved]
- 648.234 Gear restrictions. [Reserved]
- 648.235 Possession and landing restrictions.
- 648.236 Special Management Zones. [Reserved]
- 648.237 Framework provisions.

Subpart M—Management Measures for the Atlantic Deep-Sea Red Crab Fishery

- 648.260 Specifications.
- 648.261 Framework adjustment process.

- 648.262 Effort-control program for red crab limited access vessels.
- 648.263 Red crab possession and landing restrictions.
- 648.264 Gear requirements/restrictions.

Subpart N—Management Measures for the Tilefish Fishery

- 648.290 Catch quotas and other restrictions.
- 648.291 Closures.
- 648.292 Tilefish trip limits.
- 648.293 Framework specifications.
- 648.294 [Reserved]

Subpart O—Management Measures for the NE Skate Complex Fisheries

- 648.320 Skate FMP review and monitoring.
- 648.321 Framework adjustment process.
- 648.322 Skate possession and landing restrictions.

AUTHORITY: 16 U.S.C. 1801 *et seq.*

SOURCE: 61 FR 34968, July 3, 1996, unless otherwise noted.

EDITORIAL NOTE: Nomenclature changes to part 648 appear at 62 FR 14651, Mar. 27, 1997.

Subpart A—General Provisions

§ 648.1 Purpose and scope.

(a) This part implements the fishery management plans (FMPs) for the Atlantic mackerel, squid, and butterfish fisheries (Atlantic Mackerel, Squid, and Butterfish FMP); Atlantic salmon (Atlantic Salmon FMP); the Atlantic sea scallop fishery (Scallop FMP); the Atlantic surf clam and ocean quahog fisheries (Atlantic Surf Clam and Ocean Quahog FMP); the NE multispecies and monkfish fisheries ((NE Multispecies FMP) and (Monkfish FMP)); the summer flounder, scup, and black sea bass fisheries (Summer Flounder, Scup, and Black Sea Bass FMP); the Atlantic bluefish fishery (Atlantic Bluefish FMP); the Atlantic herring fishery (Atlantic Herring FMP); the spiny dogfish fishery (Spiny Dogfish FMP); the Atlantic deep-sea red crab fishery (Deep-Sea Red Crab FMP); the tilefish fishery (Tilefish FMP); and the NE skate complex fisheries (Skate FMP). These FMPs and the regulations in this part govern the conservation and management of the above named fisheries of the Northeastern United States.

(b) This part governs domestic fishing only. Foreign fishing is governed

§ 648.2

50 CFR Ch. VI (10–1–05 Edition)

under subpart F of part 600 of this chapter.

[61 FR 34968, July 3, 1996, as amended at 61 FR 43424, Aug. 23, 1996; 62 FR 13299, Mar. 20, 1997; 65 FR 1568, Jan. 11, 2000; 65 FR 77464, Dec. 11, 2000; 66 FR 49192, Sept. 26, 2001; 67 FR 63229, Oct. 10, 2002; 68 FR 49699, Aug. 19, 2003]

§ 648.2 Definitions.

In addition to the definitions in the Magnuson Act and in § 600.10 of this chapter, the terms used in this part have the following meanings:

Alewife means *Alosa pseudoharengus*.

American lobster or *lobster* means *Homarus americanus*.

American shad means *Alosa sapidissima*.

Atlantic butterfish or *butterfish* means *Peprilus triacanthus*.

Atlantic croaker means *Micropogonias undulatus*.

Atlantic deep-sea red crab (red crab) means *Chaceon quinque-dens*.

Atlantic herring means *Clupea harengus*.

Atlantic herring carrier means a fishing vessel with an Atlantic herring permit that does not have any gear on board capable of catching or processing herring and that has on board a letter of authorization from the Regional Administrator to transport herring caught by another fishing vessel.

Atlantic herring dealer means:

(1) Any person who purchases or receives for a commercial purpose other than solely for transport or pumping operations any herring from a vessel issued a Federal Atlantic herring permit, whether offloaded directly from the vessel or from a shore-based pump, for any purpose other than for the purchaser's own use as bait; or

(2) Any person owning or operating a processing vessel that receives any Atlantic herring from a vessel issued a Federal Atlantic herring permit whether at sea or in port.

Atlantic herring processor means a person who receives unprocessed Atlantic herring from a fishing vessel issued a Federal Atlantic herring permit or from an Atlantic herring dealer for the purposes of processing; or the owner or operator of a fishing vessel that processes Atlantic herring; or an Atlantic herring dealer who purchases Atlantic herring from a fishing vessel with a

Federal Atlantic herring permit for resale as bait.

Atlantic mackerel or *mackerel* means *Scomber scombrus*.

Atlantic Mackerel, Squid, and Butterfish Monitoring Committee means the committee made up of staff representatives of the MAFMC and the NEFMC, and the Northeast Regional Office and NEFSC of NMFS. The MAFMC Executive Director or a designee chairs the Committee.

Atlantic salmon means *Salmo salar*.

Atlantic sea scallop or *scallop* means *Placopecten magellanicus*, throughout its range.

Beam trawl means gear, consisting of a twine bag attached to a beam attached to a towing wire, designed so that the beam does not contact the bottom. The beam is constructed with sinkers or shoes on either side that support the beam above the bottom or any other modification so that the beam does not contact the bottom. The beam trawl is designed to slide along the bottom rather than dredge the bottom.

Black sea bass means *Centropristis striata*.

Black Sea Bass Monitoring Committee means a committee made up of staff representatives of the Mid-Atlantic, New England, and South Atlantic Fishery Management Councils, the Northeast Regional Office of NMFS, the Northeast Fisheries Science Center, and Commission representatives. The Council Executive Director or his designee chairs the Committee.

Black sea bass pot or *black sea bass trap* means any such gear used in catching and retaining black sea bass.

Blowfish (puffer) means any species in the family Tetraodontidae.

Bluefish means *Pomotomus saltatrix*.

Bluefish Monitoring Committee means a committee made up of staff representatives of the Mid-Atlantic Fishery Management Council, the New England Fishery Management Council, and South Atlantic Fishery Management Council, the NMFS Northeast Regional Office, the NMFS Northeast Fisheries Science Center, and the Commission. The Mid-Atlantic Fishery Management Council's Executive Director or a designee chairs the committee.

Bonito means *Sarda sarda*.

Border transfer (BT) means the amount of herring specified pursuant to § 648.200 that may be transferred to a Canadian transport vessel that is permitted under the provisions of Pub. L. 104-297, section 105(e).

Bottom-tending mobile gear, with respect to the NE multispecies fishery, means gear in contact with the ocean bottom, and towed from a vessel, which is moved through the water during fishing in order to capture fish, and includes otter trawls, beam trawls, hydraulic dredges, non-hydraulic dredges, and seines (with the exception of a purse seine).

Brush-sweep trawl gear means trawl gear consisting of alternating roller discs and bristle brushes that are strung along cables, chains, or footropes, and aligned together to form the sweep of the trawl net, designed to allow the trawl sweep to maintain contact with the ocean floor, or any modification to trawl gear that is substantially similar in design or effect.

Bushel (bu) means a standard unit of volumetric measurement deemed to hold 1.88 ft³ (53.24 L) of surfclams or ocean quahogs in shell, or 1.24 ft³ (35.24 L) of in-shell Atlantic sea scallops.

Cage means a container with a standard unit of volumetric measurement containing 60 ft³ (1,700 L). The outside dimensions of a standard cage generally are 3 ft (91 cm) wide, 4 ft (122 cm) long, and 5 ft (152 cm) high.

Category 1 herring vessel means a vessel issued a permit to fish for Atlantic herring that is required to have an operable VMS unit installed on board pursuant to § 648.205(b).

Chafing gear or *cookies*, with respect to the scallop fishery, means steel, rubberized or other types of donut rings, disks, washers, twine, or other material attached to or between the steel rings of a sea scallop dredge.

Charter or *party boat* means any vessel that carries passengers for hire to engage in recreational fishing and, with respect to multispecies, that is not fishing under a DAS.

Circle hook, with respect to the NE multispecies fishery, means a fishing hook with the point turned perpendicularly back to the shank, or an offset circle hook where the barbed end of the hook is displaced relative to the par-

allel plane of the eyed-end, or shank, of the hook when laid on its side.

Combination vessel means a vessel that has fished in any one calendar year with scallop dredge gear and otter trawl gear during the period 1988 through 1990, and that is eligible for an allocation of individual DAS under the NE Multispecies FMP and has applied for or been issued a limited access scallop permit.

Commercial fishing or *fishing commercially* means fishing that is intended to, or results in, the barter, trade, transfer, or sale of fish.

Commission means the Atlantic States Marine Fisheries Commission.

Conger eel means *Conger oceanicus*.

Council means the New England Fishery Management Council (NEFMC) for the Atlantic herring, Atlantic sea scallop, Atlantic deep-sea red crab, NE multispecies, monkfish, and NE skate fisheries; or the Mid-Atlantic Fishery Management Council (MAFMC) for the Atlantic mackerel, squid, and butterfish; Atlantic surf clam and ocean quahog; summer flounder, scup, and black sea bass; spiny dogfish; Atlantic bluefish; and tilefish fisheries.

Councils with respect to the monkfish fishery and spiny dogfish fishery means the New England Fishery Management Council (NEFMC) and the Mid-Atlantic Fishery Management Council (MAFMC).

Cunner means *Tautoglabrus adspersus*.

DAS flip, with respect to the NE multispecies fishery, means ending fishing under a Regular B DAS and beginning fishing under a Category A DAS.

DAS Lease, with respect to the NE multispecies limited access fishery, means the transfer of the use of DAS from one limited access NE multispecies vessel to another limited access NE multispecies vessel for a period not to exceed a single fishing year.

DAS Lessee, with respect to the NE multispecies limited access fishery, means the NE multispecies limited access vessel owner and/or the associated vessel that acquires the use of DAS from another NE multispecies limited access vessel.

DAS Lessor, with respect to the NE multispecies limited access fishery,

means the NE multispecies limited access vessel owner and/or the associated vessel that transfers the use of DAS to another NE multispecies limited access vessel.

Day(s)-at-Sea (DAS), with respect to the NE multispecies and monkfish fisheries (except as described in § 648.82(k)(1)(iv)), Atlantic sea scallop fishery, and Atlantic deep-sea red crab fishery, means the 24-hour period of time or any part thereof during which a fishing vessel is absent from port to fish for, possess, or land, or fishes for, possesses or lands, regulated species, monkfish, scallops, or red crabs. With respect to the red crab fishery, any portion of a calendar day in which a vessel is declared into the red crab DAS fishery, shall count as a full DAS.

Dealer means any person who receives, for a commercial purpose (other than solely for transport on land), from the owner or operator of a vessel issued a valid permit under this part, any species of fish, the harvest of which is managed by this part, unless otherwise exempted in this part.

Dealer code means a confidential five-digit number assigned to each dealer required to submit purchases using the IVR system for the purpose of maintaining the integrity of the data reported through the IVR system.

De-hooker, with respect to the NE multispecies hook gear fishery, means the fairlead rollers when used in a manner that extracts fish hooks from caught fish, also known as “crucifiers.”

Dredge or *dredge gear*, with respect to the scallop fishery, means gear consisting of a mouth frame attached to a holding bag constructed of metal rings, or any other modification to this design, that can be or is used in the harvest of scallops.

Dredge bottom, with respect to scallops, means the rings and links found between the bail of the dredge and the club stick, which, when fishing, would be in contact with the sea bed. This includes the triangular shaped portions of the ring bag commonly known as “diamonds.”

Dredge top, with respect to the scallop fishery, means the mesh panel in the top of a dredge and immediately adjacent rings and links found between

the bail of the dredge, the club stick, and the two side panels. The bail of the dredge is the rigid structure of the forward portion of the dredge that connects to the warp and holds the dredge open. The club stick is the rigid bar at the tail of the dredge bag that is attached to the rings.

Dredge vessel, with respect to the scallop fishery, means any fishing vessel that is equipped for fishing using dredge gear and that is capable of catching scallops.

Exempted gear, with respect to the NE multispecies fishery, means gear that is deemed to be not capable of catching NE multispecies and includes: Pelagic hook and line, pelagic longline, spears, rakes, diving gear, cast nets, tongs, harpoons, weirs, dipnets, stop nets, pound nets, pelagic gillnets, pots and traps, purse seines, shrimp trawls (with a properly configured grate as defined under this part), surf clam and ocean quahog dredges, and midwater trawls.

Fishing trip or *trip* means a period of time during which fishing is conducted, beginning when the vessel leaves port and ending when the vessel returns to port.

Fishing year means:

(1) For the Atlantic sea scallop and Atlantic deep-sea red crab fisheries, from March 1 through the last day of February of the following year.

(2) For the NE multispecies, monkfish and skate fisheries, from May 1 through April 30 of the following year.

(3) For the tilefish fishery, from November 1 through October 31 of the following year.

(4) For all other fisheries in this part, from January 1 through December 31.

Flatfish gillnets means gillnets that are either constructed with no floats on the float line, or that are constructed with floats on the float line and that have tie-down twine between the float line and the lead line not more than 48 inches (18.90 cm) in length and spaced not more than 15 feet (4.57 m) apart.

FMP means fishery management plan.

Fourspot flounder means *Paralichthys oblongus*.

Full-processing (fully process or fully processed), with respect to the Atlantic

deep-sea red crab fishery, means any activity that removes meat from any part of a red crab.

Gillnet gear capable of catching multi-species means all gillnet gear except pelagic gillnet gear specified at § 648.81(g)(2)(ii) and pelagic gillnet gear that is designed to fish for and is used to fish for or catch tunas, swordfish, and sharks.

Gross registered tonnage (GRT) means the gross registered tonnage specified on the USCG documentation for a vessel.

Hagfish means *Myxine glutinosa*.

Hail Weight means a good-faith estimate in pounds (or count of individual fish, if a party or charter vessel), by species, of all species, or parts of species, such as monkfish livers, landed or discarded for each trip.

Handgear, with respect to the NE multispecies fishery, means handline gear, rod and reel gear, and tub-trawl gear.

Handline or *handline gear* means fishing gear that is released by hand and consists of one main line to which is attached no more than two leaders for a total of no more than three hooks. Handlines are retrieved only by hand, not by mechanical means.

Harbor porpoise means *Phocoena phocoena*.

Harbor Porpoise Review Team (HPRT) means a team of scientific and technical experts appointed by the NEFMC to review, analyze, and propose harbor porpoise take mitigation alternatives.

Herring means Atlantic herring, *Clupea harengus*, or blueback herring, *Alosa aestivalis*.

Hickory shad means *Alosa mediocris*.

Hook gear means fishing gear that is comprised of a hook or hooks attached to a line and includes, but is not limited to, longline, setline, jigs, troll line, rod and reel, and line trawl.

Illex means *Illex illecebrosus* (short-finned or summer squid).

Incidental Total Allowable Catch (TAC), with respect to the NE multispecies fishery, means the total amount of catch (both kept and discarded) of a regulated groundfish stock of concern that can be taken by vessels fishing under Category B DAS.

Inshore exempted species means the following species:

Bay scallop—*Aequipecten irradians*.

Blood arc clam—*Anadara ovalis*.

Blood worm—*Glycera dibranchiata*.

Blue crab—*Callinectes similis* and *Callinectes sapidus*.

Blue mussel—*Mytilus edulis*.

Green crab—*Carcinus maenas*.

Hermit crab—*Clibanarius vittatus*, *Pagurus pollicaris* and *Pagurus longicarpus*.

Japanese shore crab—*Hemigrapsus sanguineus*.

Oyster—*Crassostrea virginica* and *Ostrea edulis*.

Quahog—*Mercenaria mercenaria*.

Razor clam—*Ensis directus*.

Sand worm—*Nereis virens*.

Soft clam—*Mya arenaria*.

Spider crab—*Libinia emarginata*.

IVR System means the Interactive Voice Response reporting system established by the Regional Administrator for the purpose of monitoring harvest levels for certain species.

John Dory means *Zenopsis conchifera*.

JVPT, with respect to the Atlantic herring fishery, means the specification of the total amount of herring available for joint venture processing by foreign vessels in the EEZ and state waters.

Land means to begin offloading fish, to offload fish, or to enter port with fish.

Liner means a piece of mesh or any other material rigged inside or outside the main or outer net or dredge that restricts the mesh or ring size or otherwise reduces escapement.

Link, with respect to the sea scallop fishery, means the material, usually made of a $\frac{3}{16}$ -inch (10-mm) or $\frac{1}{8}$ -inch (11-mm) diameter metal rod, that joins two adjacent rings within the ring bag of a dredge.

Little tunny means *Euthynnus alletteratus*.

Loligo means *Loligo pealei* (long-finned or bone squid).

Longhorn sculpin means *Myoxocephalus octodecimspinosus*.

Longline gear means fishing gear that is or is designed to be set horizontally, either anchored, floating, or attached to a vessel, and that consists of a main or ground line with three or more gangions and hooks.

Maine bushel means a standard unit of volumetric measurement equal to 1.2445 cubic feet (35.24 L) of ocean quahogs in the shell.

Maine mahogany quahog zone means the area bounded on the east by the

U.S.-Canada maritime boundary, on the south by a straight line at 43°50' N. latitude, and on the north and west by the shoreline of Maine.

Menhaden means Atlantic menhaden, *Brevoortia tyrannus*.

Midwater trawl gear means trawl gear that is designed to fish for, is capable of fishing for, or is being used to fish for pelagic species, no portion of which is designed to be or is operated in contact with the bottom at any time.

Mobile gear means trawls, beam trawls, and dredges that are designed to maneuver with that vessel.

Monkfish, also known as *anglerfish* or *goosefish*, means *Lophius americanus*.

Monkfish gillnets means gillnet gear with mesh size no smaller than 10-inches (25.4 cm) diamond mesh that is designed and used to fish for and catch monkfish while fishing under a monkfish DAS.

Monkfish Monitoring Committee means a team of scientific and technical staff appointed by the NEFMC and MAFMC to review, analyze, and recommend adjustments to the management measures. The team consists of staff from the NEFMC and the MAFMC, NMFS Northeast Regional Office, NEFSC, the USCG, two fishing industry representatives selected by their respective Council chairman (one from each management area with at least one of the two representing either the Atlantic sea scallop or northeast multispecies fishery), and staff from affected coastal states, appointed by the Atlantic States Marine Fisheries Commission. The Chair is elected by the Committee from within its ranks, subject to the approval of the Chairs of the NEFMC and MAFMC.

Mullet means any species in the family Mugilidae.

Multispecies frames, also known as multispecies racks, means the remains of the multispecies finfish after it has been filleted or processed, not including the fillet.

Multispecies Monitoring Committee means a team of scientific and technical staff appointed by the NEFMC to review, analyze, and recommend adjustments to the measurement measures. The team consists of staff from the NEFMC and the MAFMC, NMFS Northeast Region Office, NEFSC, the

USCG, an industry representative, and no more than two representatives, appointed by the Commission, from affected states.

NAFO means Northwest Atlantic Fisheries Organization.

NAFO Convention Area means the waters of the Northwest Atlantic Ocean north of 35°00' N. lat. and west of a line extending due north from 35°00' N. lat. and 42°00' W. long. to 59°00' N. lat., thence due west to 44°00' W. long., and thence due north to the coast of Greenland and the waters of the Gulf of St. Lawrence, Davis Strait and Baffin Bay south of 78°10' N. lat.

NAFO Regulatory Area means the part of the NAFO Convention Area which lies beyond the 200-mile zone of the coastal states.

NEFSC means the Northeast Fisheries Science Center, NMFS.

NE Skate Complex (skates) means *Leucoraja ocellata* (winter skate); *Dipturus laevis* (barndoor skate); *Amblyraja radiata* (thorny skate); *Malacoraja senta* (smooth skate); *Leucoraja erinacea* (little skate); *Raja eglanteria* (clearnose skate); and *Leucoraja garmani* (rosette skate).

Net tonnage (NT) means the net tonnage specified on the USCG documentation for a vessel.

Non-exempt gillnet fishery means a fishery which uses gillnet gear capable of catching multispecies.

Non-exempt species means species of fish not included under the GOM, GB and SNE Regulated Mesh Area exempted fisheries, as specified in § 648.80(a)(5); (a)(6); (a)(9) through (14); (b)(3)(i) and (ii); (b)(5) through (8); and (d), (e), (h), and (i).

Northeast (NE) multispecies or *multispecies* means the following species:

American plaice—*Hippoglossoides platessoides*.
Atlantic cod—*Gadus morhua*.
Atlantic halibut—*Hippoglossus hippoglossus*.
Haddock—*Melanogrammus aeglefinus*.
Ocean Pout—*Macrozoarces americanus*.
Offshore Hake—*Merluccius albidus*.
Pollock—*Pollachius virens*.
Redfish—*Sebastes fasciatus*.
Red hake—*Urophycis chuss*.
Silver hake (whiting)—*Merluccius bilinearis*.
White hake—*Urophycis tenuis*.
Windowpane flounder—*Scophthalmus aquosus*.
Winter flounder—*Pleuronectes americanus*.
Witch flounder—*Glyptocephalus cynoglossus*.
Yellowtail flounder—*Pleuronectes ferruginea*.

Fishery Conservation and Management

§ 648.2

Northern shrimp means *Pandalus borealis*.

Ocean quahog means the species *Arctica islandica*.

Offload or *offloading* means to begin to remove, to remove, to pass over the rail, or otherwise take away fish from any vessel. For purposes of the surf clam and ocean quahog fishery, it means to separate physically a cage from a vessel, such as by removing the sling or wire used to remove the cage from the harvesting vessel.

Open areas, with respect to the Atlantic sea scallop fishery, means any area that is not subject to restrictions of the Sea Scallop Access Areas specified in §§648.59 and 648.60, Rotational Closed Areas specified in §648.58, or EFH Closed Areas specified in §648.61.

Operator means the master, captain, or other individual on board a fishing vessel, who is in charge of that vessel's operations.

Out of the monkfish fishery means the period of time during which a vessel is not fishing for monkfish under the monkfish DAS program.

Out of the multispecies fishery means the period of time during which a vessel is not fishing for regulated species under the NE multispecies DAS program.

Pair trawl or *pair trawling* means to tow a single net between two vessels.

Parlor trap/pot means any structure or other device, other than a net, with more than one compartment inside designed to impede escape of lobsters or crabs from the device or structure, which is placed, or designed to be placed, on the ocean bottom and is designed for, or is capable of, catching lobsters and/or red crabs.

Pelagic hook and line gear means handline or rod and reel gear that is designed to fish for, or that is being used to fish for, pelagic species, no portion of which is designed to be or is operated in contact with the bottom at any time.

Pelagic longline gear means fishing gear that is not fixed, nor designed to be fixed, nor anchored to the bottom and that consists of monofilament main line (as opposed to a cable main line) to which gangions are attached.

Personal use, with respect to the surf clam or ocean quahog fishery, means

harvest of surf clams or ocean quahogs for use as bait, for human consumption, or for other purposes (not including sale or barter) in amounts not to exceed 2 bu (106.48 L) per person per fishing trip.

Person who receives bluefish for commercial purposes means any person (excluding representatives of governmental agencies) engaged in the sale, barter, or trade of bluefish received from a fisherman, or one who transports bluefish from a fisherman.

Postmark means independently verifiable evidence of date of mailing, such as U.S. Postal Service postmark, United Parcel Service (U.P.S.) or other private carrier postmark, certified mail receipt, overnight mail receipt, or receipt received upon hand delivery to an authorized representative of NMFS.

Prior to leaving port, with respect to the call-in notification system for NE multispecies, and the call-in notification system for monkfish vessels that are fishing under the limited access monkfish Category C, D, F, G, or H permit provisions that are also fishing under a NE multispecies DAS, means no more than 1 hour prior to the time a vessel leaves the last dock or mooring in port from which that vessel departs to engage in fishing, including the transport of fish to another port. With respect to the call-in notification system for monkfish vessels that are fishing under the limited access monkfish Category A or B permit provisions, it means prior to the last dock or mooring in port from which a vessel departs to engage in fishing, including the transport of fish to another port.

Private recreational fishing vessel, with respect to the NE multispecies fishery, means a vessel engaged in recreational fishing that has not been issued a Federal NE multispecies permit, does not sell fish, and does not take passengers for hire.

Processing, or to process, with respect to the Atlantic herring fishery, means the preparation of Atlantic herring to render it suitable for human consumption, bait, commercial uses, industrial uses, or long-term storage, including but not limited to cooking, canning, roe extraction, smoking, salting, drying, freezing, or rendering into meat or oil.

Processor, with respect to the Atlantic surf clam and ocean quahog fisheries, means a person who receives surf clams or ocean quahogs for a commercial purpose and removes them from a cage.

Purse seine gear means an encircling net with floats on the top edge, weights and a purse line on the bottom edge, and associated gear, or any net designed to be, or capable of being, used in such fashion.

Quota-managed species means any species of finfish managed under this part by an annual or seasonal quota, by annual target or actual TAC, or by DAH limits.

Recreational fishing means fishing that is not intended to, nor results in the barter, trade, or sale of fish.

Recreational fishing vessel, with respect to the scup fishery, means any vessel from which no fishing other than recreational fishing is conducted. Charter and party boats are considered recreational fishing vessels for purposes of the scup minimum size requirement.

Red Crab Management Unit means an area of the Atlantic Ocean from 35° 15.3' N. Lat., the approximate latitude of Cape Hatteras Light, NC, northward to the U.S.-Canada border, extending eastward from the shore to the outer boundary of the exclusive economic zone and northward to the U.S.-Canada border in which the United States exercises exclusive jurisdiction over all Atlantic deep-sea red crab fished for, possessed, caught, or retained in or from such area.

Red crab trap/pot means any structure or other device, other than a net or parlor trap/pot, that is placed, or designed to be placed, on the ocean bottom and is designed for, or is capable of, catching red crabs.

Regional Administrator means the Administrator, Northeast Region, NMFS, or a designee.

Regulated fishery means any fishery of the United States which is regulated under the Magnuson-Stevens Act.

Regulated species means the subset of NE multispecies that includes Atlantic cod, witch flounder, American plaice, yellowtail flounder, haddock, pollock, winter flounder, windowpane flounder, redfish, and white hake.

Reporting month means the period of time beginning at 0001 hours local time

on the first day of each calendar month and ending at 2400 hours local time on the last day of each calendar month.

Reporting week means the period of time beginning at 0001 local time on Sunday and ending at 2400 hours local time the following Saturday.

Re-rig or *re-rigged* means physical alteration of the vessel or its gear in order to transform the vessel into one capable of fishing commercially for a species in the applicable fishery.

Rigged hooks means hooks that are baited, or only need to be baited, in order to be fished. Unsecured, unbaited hooks and gangions are not considered to be rigged.

Rockhopper and roller gear means trawl gear configured with disks, rollers, or other similar shaped devices that are attached to the bottom belly of the trawl, contact the sea bottom, and that are designed to raise the bottom panel of the trawl off the ocean bottom so as to enable the gear to be fished on hard bottom.

Rod and reel means a hand-held (including rod holder) fishing rod with a manually operated reel attached.

Rotational Closed Area, with respect to the Atlantic sea scallop fishery, means an area that is closed only to scallop fishing for a period defined in § 648.58.

Roundfish gillnets means gillnets that are constructed with floats on the float line and that have no tie-down twine between the float line and the lead line.

Runaround gillnet or encircling gillnet means a rectangular net placed upright in the water column in a circular fashion with an opening equal to or less than 1/4 the length of the net or with an opening greater than 1/4 the length of the net, if the opening is obstructed in any fashion.

Scallop dredge vessel means any fishing vessel, other than a combination vessel, that uses or is equipped to use scallop dredge gear.

Scup means *Stenotomus chrysops*.

Scup Monitoring Committee means a committee made up of staff representative of the MAFMC, NEFMC, South Atlantic Fishery Management Council, the NMFS Northeast Regional Office, the NEFSC, and the Commission. The

Fishery Conservation and Management

§ 648.2

MAFMC Executive Director or a designee chairs the committee.

Scup pot or trap means a pot or trap used in catching and retaining scup.

Sea Scallop Access Area, with respect to the Atlantic sea scallop fishery, means an area that has been designated under the Atlantic Sea Scallop Fishery Management Plan as an area with area-specific management measures that are designed to control fishing effort and mortality on only the portion of the scallop resource within the specified Sea Scallop Access Area. Such measures are not applicable in Open Areas defined above.

Sea Scallop Plan Development Team (PDT) means a team of technical experts appointed by the NEFMC.

Sea raven means *Hemitripteris americanus*.

Searobin means any species of the family Triglidae.

Sector, with respect to the NE multispecies fishery, means a group of vessels that have voluntarily signed a contract and agree to certain fishing restrictions, and that have been allocated a portion of the TAC of a species, or an allocation of DAS.

Shucking or to shuck means opening or to open a scallop, surf clam, or ocean quahog and removing the meat or the adductor muscle from the shell.

Shucking machine means any mechanical device that automatically removes the meat or the adductor muscle from a scallop, surf clam, or ocean quahog shell.

Sink gillnet or bottom-tending gillnet means any gillnet, anchored or otherwise, that is designed to be, or is fished on or near, the bottom in the lower third of the water column.

Skate means members of the Family Rajidae, including: *Leucoraja ocellata* (winter skate); *Dipturus laevis* (barndoor skate); *Amblyraja radiata* (thorny skate); *Malacoraja senta* (smooth skate); *Leucoraja erinacea* (little skate); *Raja eglanteria* (clearnose skate); and *Leucoraja garmani* (rosette skate).

Skate Management Unit means an area of the Atlantic Ocean from 35° 15.3' N. lat., the approximate latitude of Cape Hatteras Light, NC, northward to the U.S.-Canada border, extending eastward from the shore to the outer boundary of the EEZ and northward to

the U.S.-Canada border in which the United States exercises exclusive jurisdiction over all skates fished for, possessed, caught, or retained in or from such area.

Small-mesh multispecies means the subset of Northeast multispecies that includes silver hake, offshore hake, and red hake.

Smooth dogfish means *Mustelus canis*.

Sorting machine, with respect to the Atlantic sea scallop fishery, means any mechanical device that automatically sorts whole scallops by shell height, size, or other physical characteristics.

Spiny dogfish means *Squalus acanthias*.

Spiny Dogfish Monitoring Committee means a committee made up of staff representatives of the MAFMC, NEFMC, the NMFS Northeast Regional Office, the Northeast Fisheries Science Center, and the states, as well as two ex-officio industry members (one from each Council jurisdiction). The MAFMC Executive Director or a designee chairs the committee.

Spot means *Leiostomus xanthurus*.

Square mesh, with respect to the NE multispecies fishery, means mesh in which the horizontal bars of the mesh run perpendicular to the long axis of the net so when the net is placed under a strain the mesh remains open to a square-like shape. Square mesh can be formed by hanging diamond mesh "on the square," if the resulting mesh conforms with the above description of square mesh.

Squid means *Loligo pealei* or *Illex illecebrosus*.

Standard tote means a box typically constructed of plastic, designed to hold 100 lb (45.3 kg) of fish plus ice, and that has a liquid capacity of 70 L, or a volume of not more than 4,320 cubic in (2.5 cubic ft or 70.79 cubic cm).

Static gear, with respect to the NE multispecies fishery, means stationary gear, usually left for a period of time in one place, that depends on fish moving to the gear, and includes gillnets, longlines, handgear, traps, and pots.

Stock of concern, with respect to the NE multispecies fishery, means a stock that is in an overfished condition, or that is subject to overfishing.

Stocks targeted by the default measures, with respect to the NE multispecies

fishery, are: American plaice, and SNE/MA yellowtail flounder for the 2006 fishing year; and American plaice, GB cod, GOM cod, CC/GOM yellowtail flounder, SNE/MA yellowtail flounder, white hake and SNE/MA winter flounder for the 2009 fishing year.

Sub-lease, with respect to the NE multispecies fishery, means the leasing of DAS that have already been leased to another vessel.

Substantially similar harvesting capacity means the same or less GRT and vessel length.

Summer flounder means *Paralichthys dentatus*.

Summer Flounder Monitoring Committee means a committee made up of staff representatives of the MAFMC, NEFMC, and SAFMC, the NMFS Northeast Regional Office, the NEFSC, the Southeast Science Center, and the Commission. The MAFMC Executive Director or a designee chairs the committee.

Surf clams means Atlantic surf clams of the species *Spisula solidissima*.

Swordfish means *Xiphias gladius*.

Target total allowable catch (TAC) means the annual domestic harvest targets for regulated species.

Tautog (blackfish) means *Tautoga onitis*.

Tied up to the dock or *tying up at a dock* means tied up at a dock, on a mooring, or elsewhere in a harbor.

Tilefish means *Lopholatilus chamaeleonticeps*.

Tilefish FMP Monitoring Committee means a committee made up of staff representatives of the MAFMC, the NMFS Northeast Regional Office, the Northeast Fisheries Science Center, up to three state representatives (the New England states having one representative and the Mid-Atlantic states having a maximum of two representatives) and one non-voting industry member. The MAFMC Executive Director or his designee chairs the committee.

Tilefish Management Unit means an area of the Atlantic Ocean from the latitude of the VA and NC border (36°33.36' N. Lat.), extending eastward from the shore to the outer boundary of the exclusive economic zone and northward to the United States-Canada border in which the United States exercises exclusive jurisdiction over all

golden tilefish (*Lopholatilus chamaeleonticeps*) fished for, possessed, caught or retained in or from such area.

Total Length (TL) means the straight-line distance from the tip of the snout to the end of the tail (caudal fin) while the fish is lying on its side.

Transboundary Management Guidance Committee (TMGC), with respect to the NE multispecies fishery, means the technical sub-committee that provides non-binding guidance to the U.S./Canada Steering Committee, comprised of government and industry representatives from U.S. and Canada.

Transboundary Resource Advisory Committee (TRAC), with respect to the NE multispecies fishery, means a committee consisting of scientific staff from NMFS and Canada's Department of Fisheries and Oceans that jointly assess the status of the shared U.S./Canada stocks of cod, haddock, and yellowtail flounder.

Transfer means to begin to remove, to remove, to pass over the rail, or to otherwise take away fish from any vessel and move them to another vessel.

Trawl means gear consisting of a net that is towed, including but not limited to beam trawls, pair trawls, otter trawls, and Danish and Scottish seine gear.

Trawl sweep means the total length of the footrope on a trawl net that is directly attached to the webbing of a net.

Trip Identifier means the complete serial number of the vessel logbook page completed for that trip.

Tub-trawl, with respect to the NE multispecies fishery, means gear designed to be set horizontally on the bottom, with an anchored mainline to which are attached three or more gangions and hooks. Tub-trawls are retrieved only by hand, not by mechanical means.

Tuna purse seine gear, with respect to the NE multispecies fishery, means encircling gear designed and utilized to harvest pelagic tuna.

Under construction means that the keel had been laid or the vessel was under written agreement for construction or the vessel was under written contract for purchase.

Fishery Conservation and Management

§ 648.4

Upon returning to port, means, for purposes of the call-in notification system for the NE multispecies and monkfish fisheries, upon first tying up at a dock at the end of a fishing trip.

U.S. at-sea processing (USAP), with respect to the Atlantic herring fishery, means the specification, pursuant to § 648.200, of the amount of herring available for processing by U.S. vessels issued an Atlantic herring processing permit as described in § 648.4(a)(10)(ii).

U.S./Canada Steering Committee, with respect to the NE multispecies fishery, means the joint U.S./Canada committee consisting of staff from NMFS and Canada's Department of Fisheries and Oceans that has overall responsibility for the U.S./Canada Resource Sharing Understanding.

Used DAS baseline, with respect to the NE multispecies fishery, means the number of DAS that represent the historic level of DAS use associated with a particular limited access permit, as described in § 648.82(1).

Vessel length means the length specified on the USCG documentation for a vessel or on the state registration for a vessel not required to be documented under title 46 U.S.C., if the state length is verified by an authorized officer or NMFS official.

Vessel Monitoring System (VMS) means a vessel monitoring system or VMS unit as set forth in § 648.9 and approved by NMFS for use on Atlantic sea scallop, NE multispecies, monkfish, and Atlantic herring vessels, as required by this part.

VMS unit means a device installed on board a vessel used for vessel monitoring and transmitting the vessel's position as required by this part.

Weakfish means *Cynoscion regalis*.

Whiting means *Merluccius bilinearis*.

Whiting Monitoring Committee (WMC) means a team appointed by the NEFMC to review, analyze, and recommend adjustments to the management measures addressing small-mesh multispecies. The team consists of staff from the NEFMC and MAFMC, NMFS Northeast Regional Office, the NEFSC, the USCG, at least one industry representative from each geographical area (northern New England, southern New England, and the Mid-Atlantic), and no more than two representatives, ap-

pointed by the Commission, from affected states.

[61 FR 34968, July 3, 1996]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 648.2, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and on GPO Access.

§ 648.3 Relation to other laws.

(a) The relation of this part to other laws is set forth in § 600.705.

(b) Nothing in these regulations supersedes more restrictive state management measures for any of the species referenced in § 648.1 and, for Atlantic salmon, more restrictive local management measures.

§ 648.4 Vessel permits.

(a) *Fishery specific permit information.*

(1) *NE multispecies vessels.* Except for vessels that have been issued a valid High Seas Fishing Compliance permit, have declared their intent to fish, and fish exclusively in the NAFO Regulatory Area as provided in § 648.17, any vessel of the United States, including a charter or party boat, must have been issued and have on board a valid multispecies permit to fish for, possess, or land multispecies finfish in or from the EEZ. Multispecies frames used as, or to be used as, bait on a vessel fishing exclusively with pot gear are deemed not to be multispecies finfish for purposes of this part provided that there is a receipt for the purchase of those frames on board the vessel.

(i) *Limited access multispecies permits—*

(A) *Eligibility.* To be eligible to apply for a limited access NE multispecies permit, as specified in § 648.82, a vessel must have been issued a limited access NE multispecies permit for the preceding year, be replacing a vessel that was issued a limited access NE multispecies permit for the preceding year, or be replacing a vessel that was issued a confirmation of permit history; unless otherwise specified in this paragraph (a)(1)(i)(A). For the fishing year beginning May 1, 2004, a vessel may apply for a limited access Handgear A permit described in § 648.82(b)(6), if it meets the criteria described under paragraphs (a)(1)(i)(A)(1) and (2) of this section.

(1) The vessel must have been previously issued a valid NE multispecies open access Handgear permit during at least 1 fishing year during the fishing years 1997 through 2002; and

(2) The vessel must have landed and reported to NMFS at least 500 lb (226.8 kg) of cod, haddock, or pollock, when fishing under the open access Handgear permit in at least 1 of the fishing years from 1997 through 2002, as indicated by NMFS dealer records (live weight), submitted to NMFS prior to January 29, 2004.

(3) *Application/renewal restrictions.* The vessel owner must submit a complete application for an initial limited access handgear permit before May 1, 2005. For fishing years beyond the 2004 fishing year, the provisions of paragraph (a)(1)(i)(B) of this section apply.

(B) *Application/renewal restrictions.* All limited access permits established under this section must be issued on an annual basis by the last day of the fishing year for which the permit is required, unless a Confirmation of Permit History (CPH) has been issued as specified in paragraph (a)(1)(i)(J) of this section. Application for such permits must be received no later than 30 days before the last day of the fishing year. Failure to renew a limited access permit in any fishing year bars the renewal of the permit in subsequent years.

(C) *Qualification restriction.* Unless the Regional Administrator determines otherwise, no more than one vessel may qualify, at any one time, for a limited access permit or CPH based on that or another vessel's fishing and permit history. If more than one vessel owner claims eligibility for a limited access permit or CPH, based on one vessel's fishing and permit history, the Regional Administrator will determine who is entitled to qualify for the permit or CPH and any DAS allocation according to paragraph (a)(1)(i)(D) of this section.

(D) *Change in ownership.* The fishing and permit history of a vessel is presumed to transfer with the vessel whenever it is bought, sold, or otherwise transferred, unless there is a written agreement, signed by the transferor/seller and transferee/buyer, or other credible written evidence,

verifying that the transferor/seller is retaining the vessel's fishing and permit history for purposes of replacing the vessel.

(E) *Replacement vessels.* With the exception of vessels that have obtained a limited access Handgear A permit described in §648.82(b)(6), to be eligible for a limited access permit under this section, the replacement vessel must meet the following criteria and any other applicable criteria under paragraph (a)(1)(i)(F) of this section:

(1) The replacement vessel's horsepower may not exceed by more than 20 percent the horsepower of the vessel's baseline specifications, as applicable.

(2) The replacement vessel's length, GRT, and NT may not exceed by more than 10 percent the length, GRT, and NT of the vessel's baseline specifications, as applicable.

(F) *Upgraded vessel.* A vessel may be upgraded, whether through refitting or replacement, and be eligible to retain or renew a limited access permit, only if the upgrade complies with the following:

(1) The vessel's horsepower may be increased only once, whether through refitting or replacement. Such an increase may not exceed 20 percent of the horsepower of the vessel's baseline specifications, as applicable.

(2) The vessel's length, GRT, and NT may be increased only once, whether through refitting or replacement. Any increase in any of these three specifications of vessel size may not exceed 10 percent of the vessel's baseline specifications, as applicable. If any of these three specifications is increased, any increase in the other two must be performed at the same time. This type of upgrade may be done separately from an engine horsepower upgrade.

(G) *Consolidation restriction.* Except as provided for in the NE Multispecies DAS Leasing Program, as specified in §648.82(k), and the NE Multispecies DAS Transfer Program as specified in §648.82(l), limited access permits and DAS allocations may not be combined or consolidated.

(H) *Vessel baseline specifications.* The vessel baseline specifications in this section are the respective specifications (length, GRT, NT, horsepower) of the vessel that was initially issued a

limited access permit as of the date the initial vessel applied for such permit.

(I) *Limited access permit restrictions.* (1) A vessel may be issued a limited access NE multispecies permit in only one category during a fishing year. Vessels may not change limited access NE multispecies permit categories during the fishing year, except as provided in paragraph (a)(1)(i)(I)(2) of this section. A vessel issued a limited access NE multispecies Hook-gear permit or a limited access Handgear A permit may not change its limited access permit category at any time.

(2) The owner of a vessel issued a limited access multispecies permit may request a change in permit category, unless otherwise restricted by paragraph (a)(1)(i)(I)(1) of this section. The owner of a limited access multispecies vessel eligible to request a change in permit category must elect a category upon the vessel's permit application and will have one opportunity to request a change in permit category by submitting an application to the Regional Administrator within 45 days of the effective date of the vessel's permit. If such a request is not received within 45 days, the vessel owner may not request a change in permit category and the vessel permit category will remain unchanged for the duration of the fishing year. A vessel may not fish in more than one multispecies permit category during a fishing year.

(3) With the exception of combination vessels, sea scallop dredge vessels are not eligible for limited access multispecies permits.

(J) *Confirmation of permit history.* Notwithstanding any other provisions of this part, a person who does not currently own a fishing vessel, but who has owned a qualifying vessel that has sunk, been destroyed, or transferred to another person, must apply for and receive a CPH if the fishing and permit history of such vessel has been retained lawfully by the applicant. To be eligible to obtain a CPH, the applicant must show that the qualifying vessel meets the eligibility requirements, as applicable, in this part. Issuance of a valid CPH preserves the eligibility of the applicant to apply for a limited access permit for a replacement vessel based on the qualifying vessel's fishing

and permit history at a subsequent time, subject to the replacement provisions specified in this section. If fishing privileges have been assigned or allocated previously under this part, based on the qualifying vessel's fishing and permit history, the CPH also preserves such fishing privileges. A CPH must be applied for in order for the applicant to preserve the fishing rights and limited access eligibility of the qualifying vessel. An application for a CPH must be received by the Regional Administrator no later than 30 days prior to the end of the first full fishing year in which a vessel permit cannot be issued. Failure to do so is considered abandonment of the permit as described in paragraph (a)(1)(i)(K) of this section. A CPH issued under this part will remain valid until the fishing and permit history preserved by the CPH is used to qualify a replacement vessel for a limited access permit. Any decision regarding the issuance of a CPH for a qualifying vessel that has applied for or been issued previously a limited access permit is a final agency action subject to judicial review under 5 U.S.C. 704. Information requirements for the CPH application are the same as those for a limited access permit. Any request for information about the vessel on the CPH application form refers to the qualifying vessel that has been sunk, destroyed, or transferred. Vessel permit applicants who have been issued a CPH and who wish to obtain a vessel permit for a replacement vessel based upon the previous vessel history may do so pursuant to paragraph (a)(1)(i)(E) of this section.

(K) *Abandonment or voluntary relinquishment of permit history.* If a vessel's limited access permit history for a particular fishery is voluntarily relinquished to the Regional Administrator or abandoned through failure to renew or otherwise, no limited access permit for that fishery may be reissued or renewed based on that vessel's history or to any other vessel relying on that vessel's history.

(L) *Restriction on permit splitting.* A limited access permit issued pursuant to this section may not be issued to a vessel or its replacement or remain valid, if the vessel's permit or fishing

§ 648.4

50 CFR Ch. VI (10–1–05 Edition)

history has been used to qualify another vessel for another Federal fishery.

(M) *Appeal of denial of permit—(1) Eligibility.* Any applicant eligible to apply for a limited access multispecies Handgear A permit who is denied such permit may appeal the denial to the Regional Administrator within 30 days of the notice of denial. Any such appeal must be based on the grounds that the information used by the Regional Administrator was based on incorrect data, must be in writing, and must state the grounds for the appeal.

(2) *Appeal review.* The Regional Administrator will appoint a designee who will make the initial decision on the appeal. The appellant may request a review of the initial decision by the Regional Administrator by so requesting in writing within 30 days of the notice of the initial decision. If the appellant does not request a review of the initial decision within 30 days, the initial decision is the final administrative action of the Department of Commerce. Such review will be conducted by a hearing officer appointed by the Regional Administrator. The hearing officer shall make findings and a recommendation to the Regional Administrator, which shall be advisory only. Upon receiving the findings and the recommendation, the Regional Administrator will issue a final decision on the appeal. The Regional Administrator's decision is the final administrative action of the Department of Commerce.

(3) *Status of vessels pending appeal.* A vessel denied a limited access Handgear A multispecies permit may fish under the limited access multispecies Handgear A category, provided that the denial has been appealed, the appeal is pending, and the vessel has on board a letter from the Regional Administrator authorizing the vessel to fish under the limited access category. The Regional Administrator will issue such a letter for the pendency of any appeal. Any such decision is the final administrative action of the Department of Commerce on allowable fishing activity, pending a final decision on the appeal. The letter of authorization must be carried on board the vessel. If the appeal is finally denied, the Re-

gional Administrator shall send a notice of final denial to the vessel owner; the authorizing letter becomes invalid 5 days after receipt of the notice of denial.

(ii) *Open access permits.* A vessel of the United States that has not been issued and is not eligible to be issued a limited access multispecies permit is eligible for and may be issued an "open access multispecies", "handgear", or "charter/party" permit, and may fish for, possess on board, and land multispecies finfish subject to the restrictions in § 648.88. A vessel that has been issued a valid limited access scallop permit, but that has not been issued a limited access multispecies permit, is eligible for and may be issued an open access scallop multispecies possession limit permit and may fish for, possess on board, and land multispecies finfish subject to the restrictions in § 648.88. The owner of a vessel issued an open access permit may request a different open access permit category by submitting an application to the Regional Administrator at any time.

(2) *Atlantic sea scallop vessels—* Any vessel of the United States that fishes for, possesses, or lands Atlantic sea scallops in quantities greater than 40 lb (18.14 kg) shucked, or 5 bu (176.2 L) of in-shell scallops per trip, except vessels that fish exclusively in state waters for scallops, must have been issued and carry on board a valid scallop permit.

(i) *Limited access scallop permits.* Any vessel of the United States that possesses or lands more than 400 lb (181.44 kg) of shucked, or the equivalent amount of in-shell scallops (50 bu (176.2 L)) per trip, except vessels that fish exclusively in state waters for scallops, must have been issued and carry on board a valid limited access scallop permit.

(A) *Eligibility.* To be eligible to apply for a limited access scallop permit, a vessel must have been issued a limited access scallop permit for the preceding year, be replacing a vessel that was issued a limited access scallop permit for the preceding year, or be replacing a vessel that was issued a confirmation of permit history.

(B) *Application/renewal restrictions.* See paragraph (a)(1)(i)(B) of this section.

(C) *Qualification restriction.* See paragraph (a)(1)(i)(C) of this section.

(D) *Change in ownership.* See paragraph (a)(1)(i)(D) of this section.

(E) *Replacement vessels.* See paragraph (a)(1)(i)(E) of this section.

(F) *Upgraded vessel.* See paragraph (a)(1)(i)(F) of this section.

(G) *Consolidation restriction.* See paragraph (a)(1)(i)(G) of this section.

(H) *Vessel baseline specifications.* See paragraph (a)(1)(i)(H) of this section.

(I) *Limited access permit restrictions.* A vessel may be issued a limited access scallop permit in only one category during a fishing year. The owner of a vessel issued a limited access scallop permit must elect a permit category upon the vessels permit application and will have one opportunity to request a change in permit category by submitting an application to the Regional Administrator within 45 days of the effective date of the vessel's permit. After this date, the vessel must remain in that permit category for the duration of the fishing year. Any DAS that a vessel uses prior to a change in permit category will be counted against its allocation received under any subsequent permit category.

(J) *Confirmation of Permit History.* See paragraph (a)(1)(i)(J) of this section.

(K) *Abandonment or voluntary relinquishment of permits.* See paragraph (a)(1)(i)(K) of this section.

(L) *Restriction on permit splitting.* See paragraph (a)(1)(i)(L) of this section.

(M) *Percentage ownership restrictions.* (I) For any vessel acquired after March 1, 1994, a vessel owner is not eligible to be issued a limited access scallop permit for the vessel if the issuance of the permit will result in the vessel owner, or in any other person who is a shareholder or partner of the vessel owner, having an ownership interest in limited access scallop vessels in excess of 5 percent of the number of all limited access scallop vessels at the time of permit application.

(2) Vessel owners who were initially issued a 1994 limited access scallop permit or were issued or renewed a limited access scallop permit for a vessel in 1995 and thereafter, in compliance with the ownership restrictions in paragraph (a)(2)(i)(M)(I) of this section, are eligible to renew such permits(s), re-

gardless of whether the renewal of the permits will result in the 5- percent ownership restriction being exceeded.

(3) Having an ownership interest includes, but is not limited to, persons who are shareholders in a vessel owned by a corporation, who are partners (general or limited) to a vessel owner, or who, in any way, partly own a vessel.

(ii) *General scallop permit.* Any vessel of the United States that is not in possession of a limited access scallop permit, and that possesses, or lands per trip, more than 40 lb (18.14 kg) and less than or including 400 lb (181.44 kg) of shucked meats, or the equivalent amount of in-shell scallops (5 and 50 bu (176.2 L and 176.2 L), respectively), except vessels that fish exclusively in state waters for scallops, must carry on board a valid general scallop permit.

(3) *Summer flounder vessels.* Any vessel of the United States that fishes for or retains summer flounder in the EEZ must have been issued and carry on board a valid summer flounder permit, except for vessels other than party or charter vessels that observe the possession limit set forth in §648.105.

(i) *Moratorium permits—(A) Eligibility.* To be eligible to apply for a moratorium permit to fish for and retain summer flounder in excess of the possession limit in §648.105 in the EEZ, a vessel must have been issued a summer flounder moratorium permit for the preceding year, be replacing a vessel that was issued a moratorium permit for the preceding year, or be replacing a vessel that was issued a confirmation of permit history.

(B) *Application/renewal restriction.* See paragraph (a)(1)(i)(B) of this section.

(C) *Qualification restriction.* See paragraph (a)(1)(i)(C) of this section.

(D) *Change in ownership.* See paragraph (a)(1)(i)(D) of this section.

(E) *Replacement vessels.* See paragraph (a)(1)(i)(E) of this section.

(F) *Upgraded vessel.* See paragraph (a)(1)(i)(F) of this section.

(G) *Consolidation restriction.* See paragraph (a)(1)(i)(G) of this section.

(H) *Vessel baseline specifications.* The vessel baseline specifications in this section are the respective specifications (length, GRT, NT, horsepower) of

the vessel as of March 22, 1999, unless the vessel is in the process of construction or rerigging or under agreement or written contract for construction or rerigging, as of the effective baseline specification date in which case the baseline specifications will be established no later than February 19, 2000.

(I) [Reserved]

(J) *Confirmation of permit history.* See paragraph (a)(1)(i)(J) of this section.

(K) *Abandonment or voluntary relinquishment of permits.* See paragraph (a)(1)(i)(K) of this section.

(L) *Restriction on permit splitting.* See paragraph (a)(1)(i)(L) of this section.

(ii) *Party and charter boat permits.* Any party or charter boat is eligible for a permit to fish for summer flounder, other than a summer flounder moratorium permit, if it is carrying passengers for hire. Such vessel must observe the possession limits specified in § 648.105.

(iii) *Exemption permits.* Owners of summer flounder vessels seeking an exemption from the minimum mesh requirement under the provisions of § 648.104(b)(1) must request a letter of authorization (LOA) from the Regional Administrator. Vessels must be enrolled in the exemption program for a minimum of 7 days. The Regional Administrator may impose temporary additional procedural requirements by publishing a notification in the FEDERAL REGISTER. If a summer flounder charter or party requirement of this part differs from a summer flounder charter or party management measure required by a state, any vessel owners or operators fishing under the terms of a summer flounder charter/party vessel permit in the EEZ for summer flounder must comply with the more restrictive requirement while fishing in state waters, unless otherwise authorized under § 648.107.

(4) *Surf clam and ocean quahog vessels.* Any vessel of the United States that fishes for surf clams or ocean quahogs, except vessels taking surf clams and ocean quahogs for personal use or fishing exclusively within state waters, must have been issued and carry on board a valid surf clam or ocean quahog permit, respectively.

(i) *Maine mahogany quahog permit.* (A) A vessel is eligible for a Maine mahog-

any quahog permit to fish for ocean quahogs in the Maine mahogany quahog zone if it meets the following eligibility criteria in paragraphs (a)(1) and (a)(2) of this section, and an application for a Maine mahogany quahog permit is submitted by May 19, 1999. After May 19, 1999, to be eligible to apply for a Maine mahogany quahog permit, a vessel must have been issued a Maine mahogany quahog permit for the preceding year, be replacing a vessel that was issued a Maine mahogany quahog permit for the preceding year, or be replacing a vessel that was issued a confirmation of permit history.

(1) The vessel was issued a Federal Maine Mahogany Quahog Experimental Permit during one of the experimental fisheries authorized by the Regional Administrator between September 30, 1990, and September 30, 1997; and,

(2) The vessel landed at least one Maine bushel of ocean quahogs from the Maine mahogany quahog zone as documented by fishing or shellfish logs submitted to the Regional Administrator prior to January 1, 1998.

(B) *Application/renewal restriction.* See paragraph (a)(1)(i)(B) of this section.

(C) *Qualification restriction.* See paragraph (a)(1)(i)(C) of this section.

(D) *Change in ownership.* See paragraph (a)(1)(i)(D) of this section.

(E) *Replacement vessels.* See paragraph (a)(1)(i)(E) of this section.

(F) *Upgraded vessel.* See paragraph (a)(1)(i)(F) of this section.

(G) *Consolidation restriction.* See paragraph (a)(1)(i)(G) of this section.

(H) *Vessel baseline specifications.* See paragraph (a)(3)(i)(H) of this section.

(I) [Reserved]

(J) *Confirmation of permit history.* See paragraph (a)(1)(i)(J) of this section.

(K) *Abandonment or voluntary relinquishment of permits.* See paragraph (a)(1)(i)(K) of this section.

(L) *Restriction on permit splitting.* See paragraph (a)(1)(i)(L) of this section.

(M) *Appeal of denial of a permit.* (1) Any applicant denied a Maine mahogany quahog permit may appeal to the Regional Administrator within 30 days of the notice of denial. Any such appeal shall be in writing. The only ground for appeal is that the Regional Administrator's designee erred in concluding

that the vessel did not meet the criteria in paragraph (a)(4)(i)(A) of this section. The appeal must set forth the basis for the applicant's belief that the decision of the Regional Administrator's designee was made in error.

(2) The appeal may be presented, at the option of the applicant, at a hearing before an officer appointed by the Regional Administrator.

(3) The hearing officer shall make a recommendation to the Regional Administrator.

(4) The Regional Administrator will make a final decision based on the criteria in paragraph (a)(4)(i)(A) of this section and on the available record, including any relevant documentation submitted by the applicant and, if a hearing is held, the recommendation of the hearing officer. The decision on the appeal by the Regional Administrator is the final decision of the Department of Commerce.

(ii) [Reserved]

(5) *Mackerel, squid, and butterfly vessels.* Any vessel of the United States, including party and charter vessels, must have been issued and carry on board a valid vessel permit to fish for, possess, or land Atlantic mackerel, squid, or butterfly in or from the EEZ.

(i) *Loligo squid/butterfish and Illex squid moratorium permits (Illex squid moratorium is in effect until July 1, 2009)*—(A) *Eligibility.* To be eligible to apply for a moratorium permit to fish for and retain *Loligo* squid, butterfly, or *Illex* squid in excess of the incidental catch allowance in paragraph (a)(5)(ii) of this section in the EEZ, a vessel must have been issued a *Loligo* squid and butterfly moratorium permit or *Illex* squid moratorium permit, as applicable, for the preceding year, be replacing a vessel that was issued a moratorium permit for the preceding year, or be replacing a vessel that was issued a confirmation of permit history.

(B) *Application/renewal restriction.* See paragraph (a)(1)(i)(B) of this section.

(C) *Qualification restriction.* See paragraph (a)(1)(i)(C) of this section.

(D) *Change in ownership.* See paragraph (a)(1)(i)(D) of this section.

(E) *Replacement vessels.* See paragraph (a)(1)(i)(E) of this section.

(F) *Upgraded vessel.* See paragraph (a)(1)(i)(F) of this section.

(G) *Consolidation restriction.* See paragraph (a)(1)(i)(G) of this section.

(H) *Vessel baseline specifications.* See paragraph (a)(3)(i)(H) of this section.

(I) [Reserved]

(J) *Confirmation of permit history.* See paragraph (a)(1)(i)(J) of this section.

(K) *Abandonment or voluntary relinquishment of permits.* See paragraph (a)(1)(i)(K) of this section.

(L) *Restriction on permit splitting.* See paragraph (a)(1)(i)(L) of this section.

(ii) *Squid/butterfish incidental catch permit.* Any vessel of the United States may obtain a permit to fish for or retain up to 2,500 lb (1.13 mt) of *Loligo* squid or butterfly, or up to 10,000 lb (4.54 mt) of *Illex* squid, as an incidental catch in another directed fishery. The incidental catch allowance may be revised by the Regional Administrator based upon a recommendation by the Council following the procedure set forth in § 648.21.

(iii) *Atlantic mackerel permit.* Any vessel of the United States may obtain a permit to fish for or retain Atlantic mackerel in or from the EEZ, except for vessels that exceed either 165 feet in length overall (LOA) and 750 gross registered tons, or a shaft horsepower of 3000 shp. Vessels that exceed the size or horsepower restrictions may seek to obtain an at-sea processing permit specified under § 648.6(a)(2).

(iv) *Party and charter boat permits.* The owner of any party or charter boat must obtain a permit to fish for or retain in or from the EEZ mackerel, squid, or butterfly while carrying passengers for hire.

(6) *Scup vessels.* Beginning on January 1, 1997, and subject to the eligibility requirements specified in paragraphs (a)(6)(i) and (a)(6)(ii) of this section, the owner of a vessel of the United States, including a party or charter vessel, must obtain a permit issued under this part to fish for or retain scup for sale, barter or trade, in or from the EEZ north of 35°15.3' N. lat. Any vessel, other than a party or charter boat, that observes the possession limit restrictions established pursuant to, and the prohibition on sale specified in, § 648.125 is exempt from the permit requirement.

(i) *Moratorium permit*—(A) *Eligibility*. To be eligible to apply for a moratorium permit to fish for and retain scup, a vessel must have been issued a scup moratorium permit for the preceding year, be replacing a vessel that was issued a scup moratorium permit for the preceding year, or be replacing a vessel that was issued a confirmation of permit history.

(B) *Application/renewal restriction*. See paragraph (a)(1)(i)(B) of this section.

(C) *Qualification restriction*. See paragraph (a)(1)(i)(C) of this section.

(D) *Change in ownership*. See paragraph (a)(1)(i)(D) of this section.

(E) *Replacement vessels*. See paragraph (a)(1)(i)(E) of this section.

(F) *Upgraded vessel*. See paragraph (a)(1)(i)(F) of this section.

(G) *Consolidation restriction*. See paragraph (a)(1)(i)(G) of this section.

(H) *Vessel baseline specifications*. See paragraph (a)(3)(i)(H) of this section.

(I) [Reserved]

(J) *Confirmation of permit history*. See paragraph (a)(1)(i)(J) of this section.

(K) *Abandonment or voluntary relinquishment of permits*. See paragraph (a)(1)(i)(K) of this section.

(L) *Restriction on permit splitting*. See paragraph (a)(1)(i)(L) of this section.

(ii) *Party and charter boat permit*. Any party or charter boat is eligible for a permit to fish for scup, other than a scup moratorium permit, if it is carrying passengers for hire. Such vessel must observe the possession limits established pursuant to, and the prohibitions on sale specified in, § 648.125.

(7) *Black sea bass vessels*. Beginning June 1, 1997, any vessel of the United States that fishes for or retains black sea bass in or from the EEZ north of 35°15.3' N. lat., the latitude of Cape Hatteras Light, NC, must have been issued and carry on board a valid black sea bass moratorium permit, except for vessels other than party or charter vessels that observe the possession limit established pursuant to § 648.145.

(i) *Moratorium permits*—(A) *Eligibility*. To be eligible to apply for a moratorium permit to fish for and retain black sea bass in excess of the possession limit established pursuant to § 648.145 in the EEZ north of 35°15.3' N. Lat., the latitude of Cape Hatteras Light, NC, a vessel must have been

issued a black sea bass moratorium permit for the preceding year, be replacing a vessel that was issued a black sea bass moratorium permit for the preceding year, or be replacing a vessel that was issued a confirmation of permit history.

(B) *Application/renewal restrictions*. See paragraph (a)(1)(i)(B) of this section.

(C) *Qualification restriction*. See paragraph (a)(1)(i)(C) of this section.

(D) *Change in ownership*. See paragraph (a)(1)(i)(D) of this section.

(E) *Replacement vessels*. See paragraph (a)(1)(i)(E) of this section.

(F) *Upgraded vessel*. See paragraph (a)(1)(i)(F) of this section.

(G) *Consolidation restriction*. See paragraph (a)(1)(i)(G) of this section.

(H) *Vessel baseline specifications*. See paragraph (a)(3)(i)(H) of this section.

(I) [Reserved]

(J) *Confirmation of permit history*. See paragraph (a)(1)(i)(J) of this section.

(K) *Abandonment or voluntary relinquishment of permits*. See paragraph (a)(1)(i)(K) of this section.

(L) *Restriction on permit splitting*. See paragraph (a)(1)(i)(L) of this section.

(ii) *Party and charter boat permit*. The owner of any party or charter boat must obtain a permit to fish for or retain black sea bass in or from U.S. waters of the western Atlantic Ocean from 35°15.3' N. lat., the latitude of Cape Hatteras Light, NC, northward to the U.S.-Canada border, while carrying passengers for hire.

(8) *Atlantic bluefish vessels*. (i) *Commercial*. Any vessel of the United States including party and charter boats not carrying passengers for hire, that fishes for, possesses, or lands Atlantic bluefish in or from the EEZ in excess of the recreational possession limit specified at § 648.164 must have been issued and carry on board a valid commercial bluefish vessel permit.

(ii) *Party and charter vessels*. Any party or charter boat must have been issued and carry on board a valid party or charter boat permit to fish for, possess, or land Atlantic bluefish in or from the EEZ if it is carrying passengers for hire. Persons on board such vessel must observe the possession limits established pursuant to § 648.164, and

the prohibitions on sale specified in § 648.14(w).

(9) *Monkfish vessels.* Any vessel of the United States, including a charter or party boat, must have been issued and have on board a valid monkfish permit to fish for, possess, or land any monkfish in or from the EEZ.

(i) *Limited access monkfish permits.* (A) *Eligibility.* A vessel may be issued a limited access monkfish permit if it meets any of the following limited access monkfish permits criteria:

(1) *Category A permit (vessels without multispecies or scallop limited access permits).* The vessel landed $\geq 50,000$ lb (22,680 kg) tail-weight or 166,000 lb (75,297.6 kg) whole weight of monkfish between February 28, 1991, and February 27, 1995;

(2) *Category B permit (vessels less than 51 gross registered tonnage (GRT) without multispecies or scallop limited access permits that do not qualify for a Category A permit).* The vessel landed $\geq 7,500$ lb (3,402 kg) tail-weight or 24,900 lb (11,294.6 kg) whole weight of monkfish between February 28, 1991, and February 27, 1995;

(3) *Category C permit (vessels with multispecies or scallop limited access permits).* The vessel landed $\geq 50,000$ lb (22,680 kg) tail-weight or 166,000 lb (75,297.6 kg) whole weight of monkfish between February 28, 1991, and February 27, 1995; or

(4) *Category D permit (all vessels with multispecies limited access permits and vessels less than 51 GRT with scallop limited access permits that do not qualify for a Category C permit).* The vessel landed $\geq 7,500$ lb (3,402 kg) tail-weight or 24,900 lb (11,294.6 kg) whole weight of monkfish between February 28, 1991, and February 27, 1995.

(5) *Category F permit (vessels electing to participate in the Offshore Fishery Program).* To fish in the Offshore Fishery Program, as described under § 648.95, vessels must apply for and be issued a Category F permit and fish under this permit category for the entire fishing year. The owner of a vessel, or authorized representative, may change the vessel's limited access monkfish permit category within 45 days of the effective date of the vessel's permit, provided the vessel has not fished under the monkfish DAS program during that fishing year. If such a request is not received within 45 days, the vessel owner

may not request a change in permit category and the vessel's permit category will remain unchanged for the duration of the fishing year.

(6) *Category G permit (vessels restricted to fishing south of 38°20' N. lat. as described in § 648.92(b)(9) that do not qualify for a monkfish limited access Category A, B, C, or D permit).* The vessel landed at least 50,000 lb (22,680 kg) tail weight or 166,000 lb (75,296 kg) whole weight of monkfish in the area south of 38°00' N. lat. during the period March 15 through June 15 in the years 1995 to 1998.

(7) *Category H permit (vessels restricted to fishing south of 38°20' N. lat. as described in § 648.92(b)(9) that do not qualify for a monkfish limited access Category A, B, C, D, or G permit).* The vessel landed at least 7,500 lb (3,402 kg) tail weight or 24,900 lb (11,294 kg) whole weight of monkfish in the area south of 38°00' N. lat. during the period March 15 through June 15 in the years 1995 to 1998.

(B) *Application/renewal restrictions.* No one may apply for an initial limited access monkfish permit for a vessel after November 7, 2000, unless otherwise allowed in this paragraph (a)(9)(i)(B). Vessels applying for an initial limited access Category G or H permit, as described in paragraphs (a)(9)(i)(A)(6) and (7) of this section, must do so on or before April 30, 2006.

(C) *Qualification restrictions.* (1) See paragraph (a)(1)(i)(C) of this section.

(2) *Vessels under agreement for construction or under reconstruction.* A vessel may be issued a limited access monkfish permit if the vessel was under written agreement for construction or reconstruction between February 28, 1994, and February 27, 1995, and such vessel meets any of the qualification criteria regarding amount of landings as stated in paragraph (a)(9)(i)(A) of this section between February 28, 1991, and February 27, 1996.

(D) *Change in ownership.* (1) See paragraph (a)(1)(i)(D) of this section.

(2) A vessel may be issued a limited access monkfish permit if it was under written agreement for purchase as of February 27, 1995 and meets any of the qualification criteria regarding

amount of landings as stated in paragraph (a)(9)(i)(A) of this section between February 28, 1991, and February 27, 1996.

(E) *Replacement vessels.* (1) See paragraph (a)(1)(i)(E) of this section.

(2) A vessel ≥51 GRT that lawfully replaced a vessel <51 GRT between February 27, 1995, and October 7, 1999, that meets the qualification criteria set forth in paragraph (a)(9)(i)(A) of this section, but exceeds the 51 GRT vessel size qualification criteria as stated in paragraph (a)(9)(i)(A)(2) or (4) of this section, may qualify for and fish under the permit category for which the replaced vessel qualified.

(3) A vessel that replaced a vessel that fished for and landed monkfish between February 28, 1991, and February 27, 1995, may use the replaced vessel's history in lieu of or in addition to such vessel's fishing history to meet the qualification criteria set forth in paragraph (a)(9)(i)(A)(1), (2), (3), or (4) of this section, unless the owner of the replaced vessel retained the vessel's permit or fishing history, or such vessel no longer exists and was replaced by another vessel according to the provisions in paragraph (a)(1)(i)(D) of this section.

(4) A vessel that replaced a vessel that fished for and landed monkfish between March 15 through June 15 in the years 1995 through 1998, may use the replaced vessel's history in lieu of, or in addition to, such vessel's fishing history to meet the qualification criteria set forth in paragraphs (a)(9)(i)(A)(6) and (7) of this section, unless the owner of the replaced vessel retained the vessel's permit or fishing history, or such vessel no longer exists and was replaced by another vessel according to the provision of paragraph (a)(1)(i)(D) of this section.

(F) *Upgraded vessel.* (1) See paragraph (a)(1)(i)(F) of this section.

(2) A vessel ≥51 GRT that upgraded from a vessel size <51 GRT between February 27, 1995, and October 7, 1999, that meets any of the qualification criteria set forth in paragraph (a)(9)(i)(A) of this section, but exceeds the 51 GRT vessel size qualification criteria as stated in paragraphs (a)(9)(i)(A)(2) and (4) of this section, may qualify for and

fish under the permit category of the smaller vessel.

(G) *Consolidation restriction.* See paragraph (a)(1)(i)(G) of this section.

(H) *Vessel baseline specification.* See paragraph (a)(1)(i)(H) of this section.

(I) [Reserved]

(J) *Confirmation of permit history.* See paragraph (a)(1)(i)(J) of this section.

(K) *Abandonment or voluntary relinquishment of permits.* See paragraph (a)(1)(i)(K) of this section.

(L) *Restriction on permit splitting.* A limited access monkfish permit may not be issued to a vessel or to its replacement, or remain valid, if the vessel's permit or fishing history has been used to qualify another vessel for another Federal fishery.

(M) *Notification of eligibility for Category G and H permits.* (1) NMFS will attempt to notify all owners of vessels for which NMFS has credible evidence available to inform them that they meet the qualification criteria described in paragraph (a)(9)(i)(A)(6) or (7) of this section and that they qualify for a limited access monkfish Category G or H permit. Vessel owners that pre-qualify for a Category G or H permit must apply for the limited access permit for which they pre-qualified on or before April 30, 2006, to meet the qualification requirements.

(2) If a vessel owner has not been notified that the vessel is eligible to be issued a limited access monkfish Category G or H permit, and the vessel owner believes that there is credible evidence that the vessel does qualify under the pertinent criteria, the vessel owner may apply for a limited access monkfish Category G or H permit on or before April 30, 2006, by submitting written evidence that the vessel meets the qualification requirements described in paragraph (a)(9)(i)(A)(6) or (7) of this section.

(N) *Appeal of denial of permit.* (1) An applicant denied a limited access monkfish Category G or H permit may appeal to the Regional Administrator within 30 days of the notice of denial. Any such appeal shall be in writing. The only ground for appeal is that the Regional Administrator erred in concluding that the vessel did not meet the criteria described in paragraph (a)(9)(i)(A)(6) or (7) of this section. The

appeal shall set forth the applicant's belief that the Regional Administrator made an error.

(2) The appeal may be presented, at the option of the applicant, at a hearing before an officer appointed by the Regional Administrator. The hearing officer shall make a recommendation to the Regional Administrator. The Regional Administrator's decision on the appeal is the final decision of the Department of Commerce.

(3) *Status of vessels pending appeal.* (i) A vessel denied a limited access monkfish Category G or H permit may fish under the monkfish DAS program, provided that the denial has been appealed, the appeal is pending, and the vessel has on board a letter from the Regional Administrator authorizing the vessel to fish under the monkfish DAS program. The letter of authorization must be carried on board the vessel. A vessel with such a letter of authorization shall not exceed the annual allocation of monkfish DAS as specified in § 648.92(b)(1) and must report the use of monkfish DAS according to the provisions of § 648.10(b) or (c), whichever applies. If the appeal is finally denied, the Regional Administrator shall send a notice of final denial to the vessel owner; the letter authorizing temporary participation in the monkfish fishery shall become invalid 5 days after receipt of the notice of denial, but no later than 10 days from the date of the denial letter. If the appeal is approved, any DAS used during pendency of the appeal shall be deducted from the vessel's annual allocation of monkfish DAS for that fishing year.

(ii) *Monkfish incidental catch vessels (Category E).* A vessel of the United States that is subject to these regulations and that has not been issued a limited access monkfish permit under paragraph (a)(9)(i)(A) of this section, is eligible for and may be issued a monkfish incidental catch (Category E) permit to fish for, possess, or land monkfish subject to the restrictions in § 648.94(c).

(ii) [Reserved]

(10) *Atlantic herring vessels—(i) Atlantic herring permit.*

(A) Except as provided herein, any vessel of the United States must have been issued and have on board a valid

Atlantic herring permit to fish for, catch, possess, transport, land, or process Atlantic herring in or from the EEZ. This requirement does not apply to the following:

(1) A vessel that possesses herring solely for its own use as bait, providing the vessel does not have purse seine, mid-water trawl, pelagic gillnet, sink gillnet, or bottom trawl gear on board; or

(2) A skiff or other similar craft used exclusively to deploy the net in a purse seine operation during a fishing trip of a vessel that is duly permitted under this part.

(B) *Eligibility.* A vessel of the United States is eligible for and may be issued an Atlantic herring permit to fish for, catch, take, harvest, and possess Atlantic herring in or from the EEZ unless the vessel is ≥ 165 feet (50.3 m) in length overall (LOA), or > 750 GRT (680.4 mt), or the vessel's total main propulsion machinery is $> 3,000$ horsepower.

(ii) Atlantic herring processing permit. A vessel of the United States that is > 165 feet (50.3 m) LOA, or > 750 GRT (680.4 mt) is eligible to obtain an Atlantic herring processing permit to receive and process Atlantic herring subject to the U.S. at-sea processing (USAP) allocation published by the Regional Administrator pursuant to § 648.200. Such vessel may not receive or process Atlantic herring caught in or from the EEZ unless the vessel has been issued and has on board an Atlantic herring processing permit.

(iii) *Atlantic herring carrier vessels—letter of authorization.* An Atlantic herring carrier vessel permitted under paragraph (a)(10)(i)(A) of this section must have been issued and have on board the vessel a letter of authorization to transport Atlantic herring caught by another permitted fishing vessel. The letter of authorization exempts such vessel from the VMS and IVR reporting requirements as specified in subpart K, except as otherwise required by this part. An Atlantic herring carrier vessel may request and obtain a letter of authorization from the Regional Administrator.

(iv) *Change in ownership.* See paragraph (a)(1)(i)(D) of this section.

(11) *Spiny dogfish vessels.* Any vessel of the United States that commercially fishes for, possesses, or lands spiny dogfish in or from the EEZ must have been issued and carry on board a valid commercial spiny dogfish vessel permit.

(12) *Tilefish vessels.* Any vessel of the United States must have been issued and carry on board a valid tilefish vessel permit to fish for, possess, or land tilefish in or from the tilefish management unit.

(i) *Limited access tilefish permits—(A) Eligibility.* A vessel may be issued a limited access tilefish permit if it meets any of the following limited access tilefish permit criteria, provided that the vessel landed the specified amounts of tilefish to meet such criteria within the tilefish management unit:

(1) *Full-time tier 1 category.* The vessel landed at least 250,000 lb (113,430 kg) of tilefish per year for any 3 years between 1993 and 1998, at least 1 lb (2.20 kg) of which was landed prior to June 15, 1993.

(2) *Full-time tier 2 category.* The vessel landed at least 30,000 lb (13,612 kg) per year for any of 3 years between 1993 and 1998, at least 1 lb (2.20 kg) of which was landed prior to June 15, 1993.

(3) *Part-time category.* The vessel landed 10,000 lb (4,537 kg) of tilefish in any 1 year between 1988 and 1993 and 10,000 lb (4,537 kg) in any 1 year between 1994 and 1998, or landed 28,000 lb (12,904 kg) of tilefish in any 1 year between 1984 and 1993, at least 1 lb (2.20 kg) of which was landed prior to June 15, 1993.

(B) *Application/renewal restriction—(1) Initial application.* A vessel owner must apply for an initial limited access tilefish permit before November 1, 2002, one year from the effective date of the regulations.

(2) For fishing years beyond the initial application year, the provisions of paragraph (a)(1)(i)(B) of this section apply.

(C) *Qualification restrictions.* The provisions of paragraph (a)(1)(i)(C) of this section apply.

(D) *Change in ownership.* The provisions of paragraph (a)(1)(i)(D) of this section apply.

(E) *Replacement vessels.* The provisions of paragraph (a)(1)(i)(E) of this section apply.

(F) *Upgraded vessel.* The provisions of paragraph (a)(1)(i)(F) of this section apply.

(G) *Consolidation restriction.* The provisions of paragraph (a)(1)(i)(G) of this section apply.

(H) *Vessel baseline specifications.* The provisions of paragraph (a)(1)(i)(H) of this section apply.

(I) *Limited access permit restrictions. (1)* A vessel may be issued a limited access tilefish permit for only one category during a fishing year.

(2) A vessel issued a limited access tilefish permit may not be issued an incidental catch tilefish permit during a fishing year.

(J) *Confirmation of permit history.* The provisions of paragraph (a)(1)(i)(J) of this section apply.

(K) *Abandonment or voluntary relinquishment of permits.* The provisions of paragraph (a)(1)(i)(K) of this section apply.

(L) *Restriction on permit splitting.* The provisions of paragraph (a)(1)(i)(L) of this section apply.

(M) *Appeal of denial of a permit. (1)* Any applicant denied a tilefish limited access permit may appeal to the Regional Administrator within 30 days of the notice of denial. Any such appeal shall be in writing. The only ground for appeal is that the Regional Administrator erred in concluding that the vessel did not meet the criteria in paragraphs (a)(12)(i)(A)(1), (2), or (3) of this section. The appeal must set forth the basis for the applicant's belief that the decision of the Regional Administrator was made in error.

(2) The appeal may be presented, at the option of the applicant, at a hearing before an officer appointed by the Regional Administrator. The hearing officer shall make a recommendation to the Regional Administrator. The decision on the appeal by the Regional Administrator is the final decision of the Department of Commerce.

(3) *Status of vessels pending appeal.* A vessel denied a limited access tilefish permit may fish, provided that the denial has been appealed, the appeal is pending, and the vessel has on board a letter from the Regional Administrator authorizing the vessel to fish. The Regional Administrator will issue such a letter for the pendency of any appeal.

The decision on the appeal is the final administrative action of the Department of Commerce. The letter of authorization must be carried on board the vessel. If the appeal is finally denied, the Regional Administrator shall send a notice of final denial to the vessel owner; the authorizing letter shall become invalid 5 days after receipt of the notice of denial.

(ii) *Tilefish incidental catch permit.* A vessel of the United States that is subject to these regulations and that has not been issued a limited access tilefish permit is eligible for and may be issued a tilefish incidental catch permit to possess or land tilefish in or from the tilefish management unit. Such vessel is subject to the restrictions in § 648.292.

(13) *Red Crab vessels.* Any vessel of the United States must have been issued and have on board a valid red crab vessel permit to fish for, catch, possess, transport, land, sell, trade, or barter, any red crab or red crab part in or from the EEZ portion of the Red Crab Management Unit.

(i) *Limited access red crab permit—(A) Eligibility.* A vessel, or its replacement, may be issued a limited access red crab permit if the vessel's total landings averaged greater than 250,000 lb (113,400 kg) of red crab per year for the 3 years beginning March 1, 1997, through February 29, 2000. To calculate the average value per year, the total landings of whole red crab, or its equivalent by weight, between March 1, 1997, and February 29, 2000, inclusive, shall be divided by 3. If the quotient is greater than 250,000 lb (113,400 kg), the vessel meets the landings criteria. For example, if a vessel caught greater than 750,000 lb (340,200 kg) in the 3-year qualifying time span—even if it fished just 2 of those 3 years—the average per year would be greater than 250,000 lb (113,400 kg).

(B) *Application/renewal restriction—(1) Initial application for 2002.* A vessel owner must apply for an initial limited access red crab permit before April 8, 2003. No vessel owner may apply for an initial limited access red crab permit after this date.

(2) *Fishing years 2003 and beyond.* (i) For fishing years beyond the initial

year, the provisions of paragraph (a)(1)(i)(B) of this section apply.

(ii) A limited-access permit holder may choose to declare out of the red crab fishery for the next fishing year by submitting a binding declaration on a form supplied by the Regional Administrator, which must be received by NMFS at least 180 days before the last day of the current fishing year. NMFS will presume that a vessel intends to fish during the next fishing year unless such binding declaration is received at least 180 days before the last day of the current fishing year. Any limited-access permit holder who has submitted a binding declaration must submit either a new binding declaration or a renewal application for the year after which they were declared out of the fishery.

(C) *Qualification restrictions.* The provisions of paragraph (a)(1)(i)(C) of this section apply.

(D) *Change in ownership.* The provisions of paragraph (a)(1)(i)(D) of this section apply.

(E) *Replacement vessels.* (1) To be eligible for a limited access permit under this section, the replacement vessel's length, GRT, and NT may not exceed by greater than 10 percent the length, GRT, and NT of the vessel's baseline specifications. The replacement vessel must also meet any other applicable criteria under paragraph (a)(13)(i)(F) of this section.

(2) A vessel that lawfully replaced a vessel that meets the qualification criteria set forth in paragraph (a)(13)(i)(A) of this section may qualify for and fish under the permit category for which the replaced vessel qualified.

(3) A vessel that replaced a vessel that fished for and landed red crab between March 1, 1997, and February 29, 2000, may use the replaced vessel's history in lieu of or in addition to such vessel's fishing history to meet the qualification criteria set forth in paragraph (a)(13)(i)(A) of this section, unless the owner of the replaced vessel retained the vessel's permit or fishing history, or such vessel no longer exists and was replaced by another vessel according to the provisions in paragraph (a)(1)(i)(D) of this section.

(F) *Upgraded vessel.* A vessel may be upgraded, whether through refitting or replacement, and be eligible to retain

or renew a limited access permit, provided that the vessel's length, GRT, and NT is increased no more than once. Any increase in any of the aforementioned specifications of vessel size may not exceed 10 percent of the vessel's baseline specifications, as applicable. If any increase in any of the aforementioned specifications of vessel size occurs, any increase in the other specifications must be performed at the same time.

(G) *Consolidation restriction.* The provisions of paragraph (a)(1)(i)(G) of this section apply.

(H) *Vessel baseline specifications.* The vessel baseline specifications in this section are the respective specifications (length, GRT, and NT) of the vessel indicated on the vessel's initial limited access permit as of the date the initial vessel applies for such permit.

(I) *Limited access permit restrictions.* A vessel issued a limited access red crab permit may not be issued a red crab incidental catch permit during the same fishing year.

(J) *Confirmation of permit history (CPH).* Notwithstanding any other provisions of this part, a person who does not currently own a fishing vessel, but who has owned a qualifying vessel that has sunk, been destroyed, or transferred to another person and has not been replaced, must apply for and receive a CPH that confirms the fishing and permit history of such vessel has been retained lawfully by the applicant. To be eligible to obtain a CPH, the applicant must show that the qualifying vessel met the eligibility requirements, as applicable, in this part. Issuance of a valid CPH preserves the eligibility of the applicant to apply for a limited access permit for a replacement vessel based on the qualifying vessel's fishing and permit history at a subsequent time, subject to the replacement provisions specified in this section. If fishing privileges have been assigned or allocated previously under this part, based on the qualifying vessel's fishing and permit history, the CPH preserves such fishing privileges. A CPH must be applied for in order for the applicant to preserve the fishing rights and limited access eligibility of the qualifying vessel. An application for a CPH must be received by the Re-

gional Administrator no later than 30 days prior to the end of the first full fishing year in which a vessel permit cannot be issued. Failure to do so is considered abandonment of the permit as described in paragraph (a)(1)(i)(K) of this section. A CPH issued under this part will remain valid until the fishing and permit history preserved by the CPH is used to qualify a replacement vessel for a limited access permit. Any decision regarding the issuance of a CPH for a qualifying vessel that has applied for or been issued previously a limited access permit is a final agency action subject to judicial review under 5 U.S.C. 704. Information requirements for the CPH application are the same as those for a limited access permit. Any request for information about the vessel on the CPH application form refers to the qualifying vessel that has been sunk, destroyed, or transferred. Vessel permit applicants who have been issued a CPH and who wish to obtain a vessel permit for a replacement vessel based upon the previous vessel history may do so pursuant to paragraph (a)(13)(i)(E) of this section.

(K) *Abandonment or voluntary relinquishment of permits.* The provisions of paragraph (a)(1)(i)(K) of this section apply.

(L) *Restriction on permit splitting.* The provisions of paragraph (a)(1)(i)(L) of this section apply.

(M) *Notification of eligibility for 2002.* (1) NMFS will attempt to notify all owners of vessels for which NMFS has credible evidence that they meet the qualification criteria described in paragraph (a)(13)(i)(A) of this section and that they qualify for a limited access red crab permit. Vessel owners must still apply by April 8, 2003 to complete the qualification requirements.

(2) If the vessel owner has not been notified that the vessel is eligible to be issued a limited access red crab permit, and the vessel owner believes that there is credible evidence that the vessel does qualify under the pertinent criteria, the vessel owner may apply for a limited access red crab permit by April 8, 2003 by submitting evidence that the vessel meets the requirements described in paragraph (a)(13)(i)(A) of this section.

(N) *Appeal of denial of a permit.* (1) Any applicant denied a limited access red crab permit may appeal to the Regional Administrator within 30 days of the notice of denial. Any such appeal shall be in writing. The only ground for appeal is that the Regional Administrator erred in concluding that the vessel did not meet the criteria in paragraph (a)(13)(i)(A) of this section. The appeal must set forth in writing the basis for the applicant's belief that the decision of the Regional Administrator was made in error.

(2) The appeal may be presented, at the option of the applicant, at a hearing before an officer appointed by the Regional Administrator. The hearing officer shall make a recommendation to the Regional Administrator. The decision on the appeal by the Regional Administrator is the final decision of the Department of Commerce.

(3) *Status of vessels pending appeal.* A vessel denied a limited access red crab permit may fish for and land red crab as if a limited access permit had been issued, provided that the denial has been appealed, the appeal is pending, the vessel owner has presented prima facie evidence that the decision was made in error, and the vessel has on board a letter from the Regional Administrator authorizing the vessel to fish. During the appeal, the vessel may only land up to 75,000 lb (34,019 kg) of red crab per trip. The Regional Administrator will issue such a letter for the pendency of any appeal. The decision on the appeal is the final administrative action of the Department of Commerce. The letter of authorization must be carried on board the vessel. If the appeal is finally denied, the Regional Administrator shall send a notice of final denial to the vessel owner; the authorizing letter shall become invalid 5 days after receipt of the notice of denial.

(ii) *Red crab incidental catch permit.* A vessel of the United States that is subject to these regulations and that has not been issued a red crab limited access permit is eligible for and may be issued a red crab incidental catch permit to catch, possess, transport, land, sell, trade, barter, up to 500 lb (226.8 kg) of red crab, or its equivalent as specified at § 648.263(a)(2)(i) and (ii), per fish-

ing trip in or from the Red Crab Management Unit. Such vessel is subject to the restrictions in § 648.263(b).

(14) *Skate vessels.* Any vessel of the United States must have been issued and have on board a valid skate vessel permit to fish for, possess, transport, sell, or land skates in or from the EEZ portion of the Skate Management Unit.

(b) *Permit conditions.* Any person who applies for a fishing permit under this section must agree, as a condition of the permit, that the vessel and the vessel's fishing activity, catch, and pertinent gear (without regard to whether such fishing occurs in the EEZ or landward of the EEZ; and without regard to where such fish or gear are possessed, taken, or landed), are subject to all requirements of this part, unless exempted from such requirements under this part. All such fishing activities, catch, and gear will remain subject to all applicable state requirements. Except as otherwise provided in this part, if a requirement of this part and a management measure required by a state or local law differ, any vessel owner permitted to fish in the EEZ for any species except tilefish managed under this part must comply with the more restrictive requirement. Except as otherwise provided in this part, if a requirement of this part and a management measure required by a state or local law differ, any vessel owner permitted to fish in the tilefish management unit for tilefish managed under this part must comply with the more restrictive requirement. Owners and operators of vessels fishing under the terms of a summer flounder moratorium, scup moratorium, or black sea bass moratorium, or a spiny dogfish, or bluefish, commercial vessel permit must also agree not to land summer flounder, scup, black sea bass, spiny dogfish, or bluefish, respectively, in any state after NMFS has published a notification in the FEDERAL REGISTER stating that the commercial quota for that state or period has been harvested and that no commercial quota is available for the respective species. A state not receiving an allocation of summer flounder, scup, black sea bass, or bluefish, either directly or through a coast-wide allocation, is deemed to have no commercial quota available. Owners

and operators of vessels fishing under the terms of the tilefish limited access permit must agree not to land tilefish after NMFS has published a notification in the FEDERAL REGISTER stating that the quota for the tilefish limited access category under which a vessel is fishing has been harvested. Owners or operators fishing for surfclams and ocean quahogs within waters under the jurisdiction of any state that requires cage tags are not subject to any conflicting Federal minimum size or tagging requirements. If a surfclam and ocean quahog requirement of this part differs from a surfclam and ocean quahog management measure required by a state that does not require cage tagging, any vessel owners or operators permitted to fish in the EEZ for surfclams and ocean quahogs must comply with the more restrictive requirement while fishing in state waters. However, surrender of a surfclam and ocean quahog vessel permit by the owner by certified mail addressed to the Regional Administrator allows an individual to comply with the less restrictive state minimum size requirement, as long as fishing is conducted exclusively within state waters.

(c) *Permit applications*—(1) *General*. Applicants for a permit under this section must submit a completed application on an appropriate form obtained from the Regional Administrator. The application must be signed and submitted to the Regional Administrator at least 30 days before the date on which the applicant desires to have the permit made effective. The Regional Administrator will notify the applicant of any deficiency in the application pursuant to this section. Vessel owners who are eligible to apply for limited access or moratorium permits under this part shall provide information with the application sufficient for the Regional Administrator to determine whether the vessel meets the applicable eligibility requirements specified in this section.

(2) *Vessel permit information requirements*. (i) An application for a permit issued under this section, in addition to the information specified in paragraph (c)(1) of this section, also must contain at least the following information, and any other information re-

quired by the Regional Administrator: Vessel name, owner name or name of the owner's authorized representative, mailing address, and telephone number; USCG documentation number and a copy of the vessel's current USCG documentation or, for a vessel not required to be documented under title 46 U.S.C., the vessel's state registration number and a copy of the current state registration; a copy of the vessel's current party/charter boat license (if applicable), home port and principal port of landing, length overall, GRT, NT, engine horsepower, year the vessel was built, type of construction, type of propulsion, approximate fish hold capacity, type of fishing gear used by the vessel, number of crew, number of party or charter passengers licensed to be carried (if applicable), permit category, if the owner is a corporation, a copy of the current Certificate of Incorporation or other corporate papers showing the date of incorporation and the names of the current officers of the corporation, and the names and addresses of all shareholders owning 25 percent or more of the corporation's shares; if the owner is a partnership, a copy of the current Partnership Agreement and the names and addresses of all partners; if there is more than one owner, the names of all owners having a 25-percent interest or more; and permit number of any current or, if expired, previous Federal fishery permit issued to the vessel.

(ii) An application for an initial limited access multispecies hook-gear permit must also contain the following information:

(A) If the engine horsepower was changed or a contract to change the engine horsepower had been entered into prior to July 1, 1996, such that it is different from that stated in the vessel's most recent application for a Federal fisheries permit before July 1, 1996, sufficient documentation to ascertain the different engine horsepower. However, the engine replacement must be completed within 1 year of the date on which the contract was signed.

(B) If the length, GRT, or NT was changed or a contract to change the length, GRT, or NT had been entered into prior to July 1, 1996, such that it

is different from that stated in the vessel's most recent application for a Federal fisheries permit, sufficient documentation to ascertain the different length, GRT, or NT. However, the upgrade must be completed within 1 year from the date on which the contract was signed.

(iii) An application for a limited access NE multispecies permit must also contain the following information:

(A) For vessels fishing for NE multispecies with gillnet gear, with the exception of vessels fishing under the Small Vessel permit category, an annual declaration as either a Day or Trip gillnet vessel designation as described in § 648.82(k). A vessel owner electing a Day or Trip gillnet designation must indicate the number of gillnet tags that he/she is requesting, and must include a check for the cost of the tags. A permit holder letter will be sent to the owner of each eligible gillnet vessel, informing him/her of the costs associated with this tagging requirement and providing directions for obtaining tags. Once a vessel owner has elected this designation, he/she may not change the designation or fish under the other gillnet category for the remainder of the fishing year. Incomplete applications, as described in paragraph (e) of this section, will be considered incomplete for the purpose of obtaining authorization to fish in the NE multispecies gillnet fishery and will be processed without a gillnet authorization.

(B) [Reserved]

(iv) An application for a limited access scallop permit must also contain the following information:

(A) For every person named by applicants for limited access scallop permits pursuant to paragraph (c)(2)(i) of this section, the names of all other vessels in which that person has an ownership interest and for which a limited access scallop permit has been issued or applied for.

(B) If applying for full-time or part-time limited access scallop permit, or if opting to use a VMS unit, though not required, a copy of the vendor installation receipt from a NMFS-approved VMS vendor as described in § 648.9.

(C) If applying to fish under the small dredge program set forth under

§ 648.51(e), an annual declaration into the program.

(v) An application for a surf clam and ocean quahog permit must also contain the pump horsepower.

(vi) An application for an Atlantic herring permit must also contain the following information:

(A) If the vessel operator caught > 500 mt of Atlantic herring in the previous fishing year, a statement so stating;

(B) If the vessel operator intends to catch > 500 mt of Atlantic herring in the current fishing year, a statement so stating;

(C) If the vessel operator either caught > 500 mt of Atlantic herring in the previous fishing year, or intends to catch > 500 mt of Atlantic herring in the current fishing year, a copy of a vendor installation receipt from a NMFS-approved VMS vendor, as described in § 648.9, must also be provided:

(1) From January 10, 2001, through March 12, 2001, not later than March 12, 2001;

(2) After March 12, 2001, with the application.

(d) *Fees.* The Regional Administrator may charge a fee to recover administrative expenses of issuing a permit required under this section. The amount of the fee is calculated in accordance with the procedures of the NOAA Finance Handbook, available from the Regional Administrator, for determining administrative costs of each special product or service. The fee may not exceed such costs and is specified with each application form. The appropriate fee must accompany each application; if it does not, the application will be considered incomplete for purposes of paragraph (e) of this section. Any fee paid by an insufficiently funded commercial instrument shall render any permit issued on the basis thereof null and void.

(e) *Issuance.* (1) Except as provided in subpart D of 15 CFR part 904, the Regional Administrator shall issue a permit within 30 days of receipt of the application, unless the application is deemed incomplete for the following reasons:

(i) The applicant has failed to submit a complete application. An application is complete when all requested forms, information, documentation, and fees,

§ 648.4

50 CFR Ch. VI (10–1–05 Edition)

if applicable, have been received and the applicant has submitted all applicable reports specified in § 648.7;

(ii) The application was not received by the Regional Administrator by the applicable deadline set forth in this section;

(iii) The applicant and applicant's vessel failed to meet all applicable eligibility requirements set forth in this section;

(iv) The applicant applying for a limited access multispecies combination vessel or individual DAS permit, a full-time or part-time limited access scallop permit, or electing to use a VMS, has failed to meet all of the VMS requirements specified in §§ 648.9 and 648.10; or

(v) The applicant has failed to meet any other application requirements stated in this part.

(2) *Incomplete applications.* Upon receipt of an incomplete or improperly executed application for any permit under this part, the Regional Administrator shall notify the applicant of the deficiency in the application. If the applicant fails to correct the deficiency within 30 days following the date of notification, the application will be considered abandoned.

(f) *Change in permit information.* Any change in the information specified in paragraphs (c)(2) or (c)(3) of this section must be submitted by the applicant in writing to the Regional Administrator within 15 days of the change, or the permit is void.

(g) *Expiration.* A permit expires upon the renewal date specified in the permit.

(h) *Duration.* A permit will continue in effect unless it is revoked, suspended, or modified under 15 CFR part 904, or otherwise expires, or ownership changes, or the applicant has failed to report any change in the information on the permit application to the Regional Administrator as specified in paragraph (f) of this section. However, the Regional Administrator may authorize the continuation of a permit if the new owner so requests. Applications for permit continuations must be addressed to the Regional Administrator.

(i) *Alteration.* Any permit that has been altered, erased, or mutilated is invalid.

(j) *Reissuance.* A permit may be reissued by the Regional Administrator when requested in writing, stating the need for reissuance, the name of the vessel (if applicable), and the fishing permit number assigned. An application for the reissuance of a permit will not be considered a new application. The fee for a reissued permit shall be the same as for an initial permit.

(k) *Transfer.* A permit issued under this part is not transferable or assignable. A permit will be valid only for the fishing vessel, owner and/or person for which it is issued.

(l) *Display.* A vessel permit must be carried, at all times, on board the vessel for which it is issued and shall be subject to inspection upon request by any authorized officer. A person issued a permit under this section must be able to present the permit for inspection when requested by an authorized officer. Permits must be maintained in legible condition.

(m) *Sanctions.* The Assistant Administrator may suspend, revoke, or modify, any permit issued or sought under this section. Procedures governing enforcement-related permit sanctions or denials are found at subpart D of 15 CFR part 904.

[61 FR 34968, July 3, 1996]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 648.4, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and on GPO Access.

EFFECTIVE DATE NOTE 1: At 70 FR 13409, Mar. 21, 2005, § 648.4 was amended by revising the introductory heading of paragraph (a)(5)(i), effective Apr. 20, 2005 through Dec. 31, 2005.

EFFECTIVE DATE NOTE 2: At 70 FR 48866, Aug. 22, 2005, § 648.4 was amended by revising paragraph (a)(2)(ii), effective Oct. 21, 2005. For the convenience of the user, the revised text follows:

§ 648.4 Vessel permits.

(a) * * *

(2) * * *

(ii) *General scallop permit.* Any vessel of the United States that is not in possession of a limited access scallop permit, and that possesses, or lands per trip, 400 lb (181.44 kg) of shucked meats, or 50 bu (17.62 hL) of in-shell

Fishery Conservation and Management

§ 648.5

scallops, or less, except vessels that fish exclusively in state waters for scallops, must comply with one of the permit requirements described in paragraphs (a)(2)(i)(A) or (B) of this section, unless otherwise exempted under paragraph (a)(2)(i)(C) of this section, and must comply with the application procedures specified in paragraphs (a)(2)(i)(D) and (E) of this section.

(A) *Non-VMS general scallop permit.* To possess or land up to, but not more than 40 lb (18.14 kg) of shucked or 5 bu (176.2 L) in-shell scallops per trip that are sold or are intended to be sold, a vessel must apply for and be issued a non-VMS general scallop permit. A vessel issued a non-VMS general scallop permit may not possess or land more than 40 lb (18.14 kg) of shucked or 5 bu (176.2 L) of in-shell scallops at any time.

(B) *VMS general scallop permit.* To possess or land more than 40 lb (18.14 kg) of shucked or 5 bu (176.2 L) of in-shell scallops, up to 400 lb (181.44 kg) of shucked meats, or 50 bu (17.62 hL) of in-shell scallops, a vessel must apply for and be issued a VMS general scallop permit. Issuance of a VMS general scallop permit requires the vessel owner to submit a copy of the vendor installation receipt from a NMFS-approved VMS vendor as described in § 648.9.

(C) *Vessels without general scallop permits.* No scallop permit is required for a vessel that possess or lands up to 40 lb (18.14 kg) of shucked or 5 bu (176.2 L) per trip, provided such scallops are not, or are not intended to be, sold, traded, or bartered.

(D) *General scallop permit category designation.* The owner of a vessel issued a general scallop permit for the 2005 fishing year is required to complete and submit an application to the Regional Administrator for the appropriate permit designation as specified in paragraphs (a)(2)(i)(A) and (B) of this section by September 21, 2005. Vessels shall be issued the appropriate permit category by October 21, 2005 based on the application submitted by the vessel owner. Initial general scallop permit category designations are effective October 21, 2005. A vessel owner who fails to submit a copy of the vendor installation receipt from a NMFS-approved VMS vendor as described in 648.9 by October 21, 2005, shall automatically be issued the non-VMS general scallop permit. If no application is received by October 21, 2005 for vessels previously issued a general scallop permit for the 2005 fishing year, such vessels shall be reissued non-VMS general scallop permits. Vessel owners may request a change in permit category for their general category vessel no later than 45 days from October 21, 2005.

(E) *General scallop permit restrictions.* A vessel may be issued a general scallop permit in only one category during a fishing year. The owner of a vessel issued a general scallop permit must elect a permit category upon

the vessel's permit application and shall have one opportunity to request a change in permit category by submitting an application to the Regional Administrator within 45 days of the effective date of the vessel's permit. After that date, the vessel must remain in that permit category for the duration of the fishing year.

* * * * *

§ 648.5 Operator permits.

(a) *General.* Any operator of a vessel fishing for or possessing: Atlantic sea scallops in excess of 40 lb (18.1 kg); NE multispecies, spiny dogfish, monkfish, Atlantic herring, Atlantic surfclam, ocean quahog, Atlantic mackerel, squid, butterfly, scup, black sea bass, or Atlantic bluefish, harvested in or from the EEZ; tilefish harvested in or from the EEZ portion of the Tilefish Management Unit; skates harvested in or from the EEZ portion of the Skate Management Unit; or Atlantic deep-sea red crab harvested in or from the EEZ portion of the Red Crab Management Unit, issued a permit, including carrier and processing permits, for these species under this part, must have been issued under this section, and carry on board, a valid operator permit. An operator's permit issued pursuant to part 622 or part 697 of this chapter satisfies the permitting requirement of this section. This requirement does not apply to operators of recreational vessels.

(b) *Operator permit application.* Applicants for a permit under this section must submit a completed application on an appropriate form provided by the Regional Administrator. The application must be signed by the applicant and submitted to the Regional Administrator at least 30 days before the date upon which the applicant desires to have the permit made effective. The Regional Administrator will notify the applicant of any deficiency in the application, pursuant to this section.

(c) *Condition.* Vessel operators who apply for an operator's permit under this section must agree as a condition of this permit that the operator and vessel's fishing, catch, crew size, and pertinent gear (without regard to whether such fishing occurs in the EEZ or landward of the EEZ, and without regard to where such fish or gear are possessed, taken, or landed) are subject

§ 648.6

to all requirements of this part while fishing in the EEZ or on board a vessel for which a permit is issued under § 648.4, unless exempted from such requirements under § 648.12. The vessel and all such fishing, catch, and gear will remain subject to all applicable state or local requirements. Further, such operators must agree, as a condition of this permit, that, if the permit is suspended or revoked pursuant to 15 CFR part 904, the operator cannot be aboard any fishing vessel issued a Federal fisheries permit or any vessel subject to Federal fishing regulations while the vessel is at sea or engaged in offloading. If a requirement of this part and a management measure required by state or local law differ, any operator issued a permit under this part must comply with the more restrictive requirement.

(d) *Information requirements.* An applicant must provide at least all the following information and any other information required by the Regional Administrator: Name, mailing address, and telephone number; date of birth; hair color; eye color; height; weight; and signature of the applicant. The applicant must also provide two recent (no more than 1 year old), color, passport-size photographs.

(e) *Fees.* Same as § 648.4(d).

(f) *Issuance.* Except as provided in subpart D of 15 CFR part 904, the Regional Administrator shall issue an operator's permit within 30 days of receipt of a completed application, if the criteria specified herein are met. Upon receipt of an incomplete or improperly executed application, the Regional Administrator will notify the applicant of the deficiency in the application. If the applicant fails to correct the deficiency within 30 days following the date of notification, the application will be considered abandoned.

(g) *Expiration.* Same as § 648.4(g).

(h) *Duration.* A permit is valid until it is revoked, suspended or modified under 15 CFR part 904, or otherwise expires, or the applicant has failed to report a change in the information on the permit application to the Regional Administrator as specified in paragraph (k) of this section.

(i) *Reissuance.* Reissued permits, for otherwise valid permits, may be issued

50 CFR Ch. VI (10–1–05 Edition)

by the Regional Administrator when requested in writing by the applicant, stating the need for reissuance and the Federal operator permit number assigned. An applicant for a reissued permit must also provide two recent, color, passport-size photos of the applicant. An application for a reissued permit will not be considered a new application. An appropriate fee may be charged.

(j) *Transfer.* Permits issued under this part are not transferable or assignable. A permit is valid only for the person to whom it is issued.

(k) *Change in permit application information.* Notice of a change in the permit holder's name, address, or telephone number must be submitted in writing to, and received by, the Regional Administrator within 15 days of the change in information. If written notice of the change in information is not received by the Regional Administrator within 15 days, the permit is void.

(l) *Alteration.* Same as § 648.4(i).

(m) *Display.* Any permit issued under this part must be maintained in legible condition and displayed for inspection upon request by any authorized officer or NMFS official.

(n) *Sanctions.* Vessel operators with suspended or revoked permits may not be aboard a federally permitted fishing vessel in any capacity while the vessel is at sea or engaged in offloading. Procedures governing enforcement related permit sanctions and denials are found at subpart D of 15 CFR part 904.

(o) *Vessel owner responsibility.* Vessel owners are responsible for ensuring that their vessels are operated by an individual with a valid operator's permit issued under this section.

[61 FR 34968, July 3, 1996, as amended at 61 FR 43425, Aug. 23, 1996; 61 FR 58465, Nov. 15, 1996; 64 FR 57593, Oct. 26, 1999; 64 FR 66587, Nov. 29, 1999; 65 FR 45851, July 26, 2000; 65 FR 77465, Dec. 11, 2000; 66 FR 49143, Sept. 26, 2001; 67 FR 63231, Oct. 10, 2002; 68 FR 49699, Aug. 19, 2003; 69 FR 62821, Oct. 28, 2004; 70 FR 21982, Apr. 28, 2005]

§ 648.6 Dealer/processor permits.

(a) *General.* (1) All dealers of NE multispecies, monkfish, skates, Atlantic herring, Atlantic sea scallop, Atlantic deep-sea red crab, spiny dogfish,

Fishery Conservation and Management

§ 648.6

summer flounder, Atlantic surf clam, ocean quahog, Atlantic mackerel, squid, butterfish, scup, bluefish, tilefish, and black sea bass; Atlantic surf clam and ocean quahog processors; and Atlantic herring processors or dealers, as described in §648.2; must have been issued under this section, and have in their possession, a valid permit or permits for these species. A person who meets the requirements of both the dealer and processor definitions of any of the aforementioned species' fishery regulations may need to obtain both a dealer and a processor permit, consistent with the requirements of that particular species' fishery regulations. Persons aboard vessels receiving small-mesh multispecies, skates, and/or Atlantic herring at sea for their own use exclusively as bait are deemed not to be dealers, and are not required to possess a valid dealer permit under this section, for purposes of receiving such small-mesh multispecies, skates, and/or Atlantic herring, provided the vessel complies with the provisions of §648.13. Persons aboard vessels receiving transfers of scup at sea from other vessels are deemed not to be dealers, and are not required to possess a valid dealer permit under this section, for purposes of receiving scup, provided the vessel complies with §648.13(i)(2).

(2) *At-sea processors.* Notwithstanding the provisions of §648.4(a)(5), any vessel of the United States must have been issued and carry on board a valid at-sea processor permit issued under this section to receive over the side, possess and process Atlantic mackerel harvested in or from the EEZ by a lawfully permitted vessel of the United States.

(b) *Dealer/processor permit applications.* Same as §648.5(b).

(c) *Information requirements.* Applications must contain at least the following information, as applicable, and any other information required by the Regional Administrator: Company name, place(s) of business (principal place of business if applying for a surf clam and ocean quahog permit), mailing address(es) and telephone number(s), owner's name, dealer permit number (if a renewal), name and signature of the person responsible for the truth and accuracy of the application,

a copy of the certificate of incorporation if the business is a corporation, and a copy of the partnership agreement and the names and addresses of all partners, if the business is a partnership, name of at-sea processor vessel, and current vessel documentation papers.

(d) *Fees.* Same as §648.4(d).

(e) *Issuance.* Except as provided in subpart D of 15 CFR part 904, the Regional Administrator will issue a permit at any time during the fishing year to an applicant, unless the applicant fails to submit a completed application. An application is complete when all requested forms, information, and documentation have been received and the applicant has submitted all applicable reports specified in §648.7 during the 12 months immediately preceding the application. Upon receipt of an incomplete or improperly executed application, the Regional Administrator will notify the applicant of the deficiency in the application. If the applicant fails to correct the deficiency within 30 days following the date of notification, the application will be considered abandoned.

(f) *Expiration.* Same as §648.4(g).

(g) *Duration.* A permit is valid until it is revoked, suspended, or modified under 15 CFR part 904, or otherwise expires, or ownership changes, or the applicant has failed to report any change in the information on the permit application to the Regional Administrator as required by paragraph (j) of this section.

(h) *Reissuance.* Reissued permits, for otherwise valid permits, may be issued by the Regional Administrator when requested in writing by the applicant, stating the need for reissuance and the Federal dealer permit number assigned. An application for a reissued permit will not be considered a new application. An appropriate fee may be charged.

(i) *Transfer.* Permits issued under this part are not transferable or assignable. A permit is valid only for the person to whom, or other business entity to which, it is issued.

(j) *Change in application information.* Same as §648.5(k).

(k) *Alteration.* Same as §648.4(i).

(l) *Display.* Same as §648.5(m).

§ 648.7

50 CFR Ch. VI (10–1–05 Edition)

(m) *Federal versus state requirements.* If a requirement of this part differs from a fisheries management measure required by state law, any dealer issued a Federal dealer permit must comply with the more restrictive requirement.

(n) *Sanctions.* Same as § 648.4(m).

[61 FR 34968, July 3, 1996, as amended at 61 FR 43425, Aug. 23, 1996; 61 FR 58465, Nov. 15, 1996; 64 FR 57593, Oct. 26, 1999; 65 FR 45851, July 26, 2000; 65 FR 77465, Dec. 11, 2000; 66 FR 49144, Sept. 26, 2001; 68 FR 49699, Aug. 19, 2003; 69 FR 4864, Feb. 2, 2004; 69 FR 16178, Mar. 29, 2004; 69 FR 30841, June 1, 2004]

§ 648.7 Recordkeeping and reporting requirements.

(a) *Dealers*—(1) *Detailed report.* Federally permitted dealers must submit to the Regional Administrator or to the official designee a detailed report of all fish purchased or received for commercial purposes, other than solely for transport on land, within the time periods specified in paragraph (f) of this section, by one of the available electronic reporting mechanisms approved by NMFS, unless otherwise directed by the Regional Administrator. The following information, and any other information required by the Regional Administrator, must be provided in each report:

(i) *Required information.* All dealers issued a dealer permit under this part must provide: Dealer name; dealer permit number; name and permit number or name and hull number (USCG documentation number or state registration number, whichever is applicable) of vessel(s) from which fish are purchased or received; trip identifier for each trip from which fish are purchased or received from a commercial fishing vessel permitted under this part; date(s) of purchases and receipts; units of measure and amount by species (by market category, if applicable); price per unit by species (by market category, if applicable) or total value by species (by market category, if applicable); port landed; cage tag numbers for surfclams and ocean quahogs, if applicable; disposition of the seafood product; and any other information deemed necessary by the Regional Administrator. If no fish are purchased or received during a reporting week, a report so stating must be submitted.

(ii) *Exceptions.* The following exceptions apply to reporting requirements for dealers permitted under this part:

(A) Inshore Exempted Species, as defined in § 648.2, are not required to be reported under this part;

(B) When purchasing or receiving fish from a vessel landing in a port located outside of the Northeast Region (Maine, New Hampshire, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Pennsylvania, Maryland, Delaware, Virginia and North Carolina), only purchases or receipts of species managed by the Northeast Region under this part, and American lobster, managed under part 697 of this chapter, must be reported. Other reporting requirements may apply to those species not managed by the Northeast Region, which are not affected by this provision; and

(C) Dealers issued a permit for Atlantic bluefin tuna under part 635 of this chapter are not required to report their purchases or receipts of Atlantic bluefin tuna under this part. Other reporting requirements, as specified in § 635.5 of this chapter, apply to the receipt of Atlantic bluefin tuna.

(iii) *Dealer reporting requirements for skates.* In addition to the requirements under paragraph (a)(1)(i) of this section, dealers shall report the species of skates received. Species of skates shall be identified according to the following categories: Winter skate, little skate, little/winter skate, barndoor skate, smooth skate, thorny skate, clearnose skate, rosette skate, and unclassified skate. NMFS will provide dealers with a skate species identification guide.

(2) *System requirements.* All persons required to submit reports under paragraph (a)(1) of this section are required to have the capability to transmit data via the Internet. To ensure compatibility with the reporting system and database, dealers are required to utilize a personal computer, in working condition, that meets the minimum specifications identified by NMFS. The affected public will be notified of the minimum specifications via a letter to all Federal dealer permit holders.

(3) *Annual report.* All persons issued a permit under this part are required to submit the following information on an

annual basis, on forms supplied by the Regional Administrator:

(i) All dealers and processors issued a permit under this part must complete all sections of the Annual Processed Products Report for all species that were processed during the previous year. Reports must be submitted to the address supplied by the Regional Administrator.

(ii) Surfclam and ocean quahog processors and dealers whose plant processing capacities change more than 10 percent during any year shall notify the Regional Administrator in writing within 10 days after the change.

(iii) Atlantic herring processors, including processing vessels, must complete and submit all sections of the Annual Processed Products Report.

(b) *Vessel owners or operators*—(1) *Fishing Vessel Trip Reports*—(i) The owner or operator of any vessel issued a valid permit under this part must maintain on board the vessel, and submit, an accurate fishing log report for each fishing trip, regardless of species fished for or taken, on forms supplied by or approved by the Regional Administrator. If authorized in writing by the Regional Administrator, a vessel owner or operator may submit reports electronically, for example by using a VMS or other media. With the exception of those vessel owners or operators fishing under a surfclam or ocean quahog permit, at least the following information and any other information required by the Regional Administrator must be provided: Vessel name; USCG documentation number (or state registration number, if undocumented); permit number; date/time sailed; date/time landed; trip type; number of crew; number of anglers (if a charter or party boat); gear fished; quantity and size of gear; mesh/ring size; chart area fished; average depth; latitude/longitude (or loran station and bearings); total hauls per area fished; average tow time duration; hail weight, in pounds (or count of individual fish, if a party or charter vessel), by species, of all species, or parts of species, such as monkfish livers, landed or discarded; and, in the case of skate discards, “small” (i.e., less than 23 inches (58.42 cm), total length) or “large” (i.e., 23 inches (58.42 cm) or greater, total length) skates;

dealer permit number; dealer name; date sold, port and state landed; and vessel operator’s name, signature, and operator’s permit number (if applicable).

(ii) *Surf clam and ocean quahog vessel owners and operators*. The owner or operator of any vessel conducting any surf clam and ocean quahog fishing operations, except those conducted exclusively in waters of a state that requires cage tags or when he/she has surrendered the surf clam and ocean quahog fishing vessel permit, shall maintain, on board the vessel, an accurate daily fishing log for each fishing trip, on forms supplied by the Regional Administrator, showing at least: Name and permit number of the vessel, total amount in bushels of each species taken, date(s) caught, time at sea, duration of fishing time, locality fished, crew size, crew share by percentage, landing port, date sold, price per bushel, buyer, tag numbers from cages used, quantity of surf clams and ocean quahogs discarded, and allocation permit number.

(iii) *Vessel reporting requirements for skates*. In addition to the requirements under paragraph (b)(1)(i) of this section, the owner or operator of any vessel issued a skate permit shall report the species of all skates landed. Species of skates shall be identified according to the following categories: Winter skate, little skate, little/winter skate, barndoor skate, smooth skate, thorny skate, clearnose skate, rosette skate, and unclassified skate. Discards of skates shall be reported according to two size classes, large skates (greater than or equal to 23 inches (58.42 cm) in total length) and small skates (less than 23 inches (58.42 cm) in total length). All other vessel reporting requirements remain unchanged. NOAA Fisheries will provide vessel owners or operators that intend to land skates with a skate identification guide to assist in this data collection program.

(2) *IVR system reports*—(i) *Atlantic herring owners or operators*. The owner or operator of a vessel described here must report catches (retained and discarded) of herring each week to an IVR system. The report shall include at least the following information, and any other information required by the

Regional Administrator: Vessel identification, reporting week in which species are caught, pounds retained, pounds discarded, management area fished, and pounds of herring caught in each management area for the previous week. Weekly Atlantic herring catch reports must be submitted via the IVR system by midnight, Eastern Time, each Tuesday for the previous week. Reports are required even if herring caught during the week has not yet been landed. This report does not exempt the owner or operator from other applicable reporting requirements of § 648.7.

(A) The owner or operator of any vessel issued a permit for Atlantic herring subject to the requirements specified by § 648.4(c)(2)(vi)(C) that is required by § 648.205 to have a VMS unit on board must submit an Atlantic herring catch report via the IVR system each week (including weeks when no herring is caught), unless exempted from this requirement by the Regional Administrator.

(B) An owner or operator of any vessel issued a permit for Atlantic herring that is not required by § 648.205 to have a VMS unit on board and that catches $\geq 2,000$ lb (907.2 kg) of Atlantic herring on any trip in a week must submit an Atlantic herring catch report via the IVR system for that week as required by the Regional Administrator.

(C) An owner or operator of any vessel that catches $\geq 2,000$ lb (907.2 kg) of Atlantic herring, some or all of which is caught in or from the EEZ, on any trip in a week, must submit an Atlantic herring catch report via the IVR system for that week as required by the Regional Administrator.

(D) Atlantic herring IVR reports are not required from Atlantic herring carrier vessels.

(ii) *Tilefish vessel owners or operators.* The owner or operator of any vessel issued a limited access permit for tilefish must submit a tilefish catch report via the IVR system within 24 hours after returning to port and off-loading as required by the Regional Administrator. The report shall include at least the following information, and any other information required by the Regional Administrator: Vessel identification, trip during which species are

caught, and pounds landed. IVR reporting does not exempt the owner or operator from other applicable reporting requirements of this section.

(iii) *Red crab vessel owners and operators.* The owner or operator of any vessel issued a limited access permit for red crab must submit a red crab catch report via the IVR system within 24 hours after returning to port and off-loading as required by the Regional Administrator. The report shall include at least the following information, and any other information required by the Regional Administrator: Vessel identification, DAS confirmation number, trip during which species are caught, date landed, condition (whole, half sections with gills, half sections without gills), and pounds landed. IVR reporting does not exempt the owner or operator from other applicable reporting requirements of this section.

(c) *When to fill out a log report.* Log reports required by paragraph (b)(1)(i) of this section must be filled out with all required information, except for information not yet ascertainable, prior to entering port with fish. Information that may be considered unascertainable prior to entering port with fish includes dealer name, dealer permit number, and date sold. Log reports must be completed as soon as the information becomes available. Log reports required by paragraph (b)(1)(ii) of this section must be filled out before landing any surfclams or ocean quahogs.

(d) *Inspection.* All persons required to submit reports under this section, upon the request of an authorized officer, or by an employee of NMFS designated by the Regional Administrator to make such inspections, must make immediately available for inspection copies of the required reports and the records upon which the reports are or will be based. At any time during or after a trip, vessel owners and operators must make immediately available for inspection the fishing log reports currently in use, or to be submitted.

(e) *Record retention.* Records upon which trip-level reports are based must be retained and be available for immediate review for a total of 3 years after the date of the last entry on the report. Dealers must retain the required

Fishery Conservation and Management

§ 648.8

records at their principal place of business. Copies of fishing log reports must be kept on board the vessel and available for review for at least 1 year and must be retained for a total of 3 years after the date of the last entry on the log.

(f) *Submitting reports*—(1) *Dealer or processor reports.* (i) Detailed reports required by paragraph (a)(1)(i) of this section must be received by midnight of the first Tuesday following the end of the reporting week. If no fish are purchased or received during a reporting week, the report so stating required under paragraph (a)(1)(i) of this section must be received by midnight of the first Tuesday following the end of the reporting week.

(ii) [Reserved]

(iii) Dealers who want to make corrections to their trip-level reports via the electronic editing features may do so for up to 3 business days following submission of the initial report. If a correction is needed more than 3 business days following the submission of the initial trip-level report, the dealer must contact NMFS directly to request an extension of time to make the correction.

(iv) Through April 30, 2005, to accommodate the potential lag in availability of some required data, the trip identifier, price and disposition information required under paragraph (a)(1) may be submitted after the detailed weekly report, but must be received within 16 days of the end of the reporting week or the end of the calendar month, whichever is later. Dealers will be able to access and update previously submitted trip identifier, price, and disposition data.

(v) Effective May 1, 2005, the trip identifier required under paragraph (a)(1) of this section must be submitted with the detailed report, as required under paragraphs (f)(1)(i) of this section. Price and disposition information may be submitted after the initial detailed report, but must be received within 16 days of the end of the reporting week.

(vi) Annual reports for a calendar year must be postmarked or received by February 10 of the following year. Contact the Regional Administrator

(see Table 1 to § 600.502) for the address of NMFS Statistics.

(2) *Fishing vessel log reports.* (i) Fishing vessel log reports, required by paragraph (b)(1)(i) of this section, must be postmarked or received within 15 days after the end of the reporting month. Each owner will be sent forms and instructions, including the address to which reports are to be submitted, shortly after receipt of a Federal fisheries permit. If no fishing trip is made during a month, a report stating so must be submitted.

(ii) Surfclam and ocean quahog log reports, required by paragraph (b)(1)(ii) of this section, must be postmarked or received within 3 days after the end of each reporting week.

(3) *At-sea purchasers and processors.* With the exception of the owner or operator of an Atlantic herring carrier vessel, the owner or operator of an at-sea purchaser or processor that purchases or processes any Atlantic herring, Atlantic mackerel, squid, butterfish, scup, or black sea bass at sea for landing at any port of the United States must submit information identical to that required by paragraph (a)(1) of this section and provide those reports to the Regional Administrator or designee by the same mechanism and on the same frequency basis.

(g) *Additional data and sampling.* Federally permitted dealers must allow access to their premises and make available to an official designee of the Regional Administrator any fish purchased from vessels for the collection of biological data. Such data include, but are not limited to, length measurements of fish and the collection of age structures such as otoliths or scales.

[61 FR 34968, July 3, 1996, as amended at 61 FR 43425, Aug. 23, 1996; 61 FR 58465, Nov. 15, 1996; 62 FR 14646, Mar. 27, 1997; 63 FR 52640, Oct. 1, 1998; 63 FR 58329, Oct. 30, 1998; 64 FR 57593, Oct. 26, 1999; 65 FR 1569, Jan. 11, 2000; 65 FR 45851, July 26, 2000; 65 FR 60895, Oct. 13, 2000; 65 FR 77465, Dec. 11, 2000; 66 FR 49144, Sept. 26, 2001; 67 FR 3444, Jan. 24, 2002; 67 FR 63231, Oct. 10, 2002; 68 FR 49699, Aug. 19, 2003; 69 FR 13495, Mar. 23, 2004; 70 FR 21982, Apr. 28, 2005]

§ 648.8 Vessel identification.

(a) *Vessel name and official number.* Each fishing vessel subject to this part

and over 25 ft (7.6 m) in registered length must:

(1) Affix permanently its name on the port and starboard sides of the bow and, if possible, on its stern.

(2) Display its official number on the port and starboard sides of the deckhouse or hull, and on an appropriate weather deck so as to be clearly visible from enforcement vessels and aircraft. The official number is the USCG documentation number or the vessel's state registration number for vessels not required to be documented under title 46 U.S.C.

(b) *Numerals.* Except as provided in paragraph (d) of this section, the official number must be displayed in block arabic numerals in contrasting color at least 18 inches (45.7 cm) in height for fishing vessels over 65 ft (19.8 m) in registered length, and at least 10 inches (25.4 cm) in height for all other vessels over 25 ft (7.6 m) in registered length. The registered length of a vessel, for purposes of this section, is that registered length set forth in USCG or state records.

(c) *Duties of owner.* The owner of each vessel subject to this part shall ensure that—

(1) The vessel's name and official number are kept clearly legible and in good repair.

(2) No part of the vessel, its rigging, its fishing gear, or any other object obstructs the view of the official number from any enforcement vessel or aircraft.

(d) *Non-permanent marking.* Vessels carrying recreational fishing parties on a per capita basis or by charter must use markings that meet the above requirements, except for the requirement that they be affixed permanently to the vessel. The non-permanent markings must be displayed in conformity with the above requirements.

(e) *New Jersey surf clam or ocean quahog vessels.* Instead of complying with paragraph (a) of this section, surf clam or ocean quahog vessels licensed under New Jersey law may use the appropriate vessel identification markings established by that state.

§ 648.9 VMS requirements.

(a) *Approval.* The Regional Administrator will annually approve VMSs

that meet the minimum performance criteria specified in paragraph (b) of this section. Any changes to the performance criteria will be published annually in the FEDERAL REGISTER and a list of approved VMSs will be published in the FEDERAL REGISTER upon addition or deletion of a VMS from the list. In the event that a VMS is deleted from the list, vessel owners that purchased a VMS unit that is part of that VMS prior to publication of the revised list will be considered to be in compliance with the requirement to have an approved unit, unless otherwise notified by the Regional Administrator.

(b) *Minimum VMS performance criteria.* The basic required features of the VMS are as follows:

(1) The VMS shall be tamper proof, i.e., shall not permit the input of false positions; furthermore, if a system uses satellites to determine position, satellite selection should be automatic to provide an optimal fix and should not be capable of being manually overridden by any person aboard a fishing vessel or by the vessel owner.

(2) The VMS shall be fully automatic and operational at all times, regardless of weather and environmental conditions, unless exempted under paragraph (c)(2) of this section.

(3) The VMS shall be capable of tracking vessels in all U.S. waters in the Atlantic Ocean from the shoreline of each coastal state to a line 215 nm offshore and shall provide position accuracy to within 400 m (1,300 ft).

(4) The VMS shall be capable of transmitting and storing information including vessel identification, date, time, and latitude/longitude.

(5) The VMS shall provide accurate hourly position transmissions every day of the year unless otherwise required under paragraph (c)(1)(ii) of this section, or unless exempted under paragraph (c)(2) of this section. In addition, the VMS shall allow polling of individual vessels or any set of vessels at any time, and receive position reports in real time. For the purposes of this specification, "real time" shall constitute data that reflect a delay of 15 minutes or less between the displayed information and the vessel's actual position.

(6) The VMS shall be capable of providing network message communications between the vessel and shore. The VMS shall allow NMFS to initiate communications or data transfer at any time.

(7) The VMS vendor shall be capable of transmitting position data to a NMFS-designated computer system via a modem at a minimum speed of 9600 baud. Transmission shall be in a file format acceptable to NMFS.

(8) The VMS shall be capable of providing vessel locations relative to international boundaries and fishery management areas.

(9) The VMS vendor shall be capable of archiving vessel position histories for a minimum of 1 year and providing transmission to NMFS of specified portions of archived data in response to NMFS requests and in a variety of media (tape, floppy, etc.).

(c) *Operating requirements for all vessels.* (1) Except as provided in paragraph §648.95(e)(4) and paragraph (c)(2) of this section, or unless otherwise required by §648.60(f) or paragraph (c)(1)(ii) of this section, all required VMS units must transmit a signal indicating the vessel's accurate position, as specified under paragraph (c)(1)(i) of this section.

(i) At least every hour, 24 hours a day, throughout the year.

(ii) NMFS may initiate at its discretion, the transmission of a signal indicating the vessel's accurate position, at least twice per hour, 24 hours a day, for all NE multispecies DAS vessels that elect to fish with a VMS specified in §648.10(b) or that are required to fish with a VMS as specified in §648.85(a), for each groundfish DAS trip that the vessel has elected to fish in the U.S./Canada Management Areas, and as specified in §648.85(b) for each groundfish trip that the vessel has elected to fish in either the CA II Yellowtail Flounder SAP, the CA I Hook Gear Haddock SAP, the Regular B DAS Pilot Program, or the Eastern U.S./Canada Haddock SAP Pilot Program.

(2) *Power down exemption.* (i) Any vessel required to transmit the vessel's location at all times, as required in paragraph (c)(1) of this section, is exempt from this requirement if it meets one

or more of the following conditions and requirements:

(A) The vessel will be continuously out of the water for more than 72 consecutive hours, the vessel signs out of the VMS program by obtaining a valid letter of exemption pursuant to paragraph (c)(2)(ii) of this section, and the vessel complies with all conditions and requirements of said letter;

(B) For vessels fishing with a valid NE multispecies limited access permit, the vessel owner signs out of the VMS program for a minimum period of 1 calendar month by obtaining a valid letter of exemption pursuant to paragraph (c)(2)(ii) of this section, the vessel does not engage in any fisheries until the VMS unit is turned back on, and the vessel complies with all conditions and requirements of said letter; or

(C) The vessel has been issued an Atlantic herring permit, and is in port, unless required by other permit requirements for other fisheries to transmit the vessel's location at all times.

(ii) *Letter of exemption—(A) Application.* A vessel owner may apply for a letter of exemption from the VMS transmitting requirements specified in paragraph (c)(1) of this section for his/her vessel by sending a written request to the Regional Administrator and providing the following: The location of the vessel during the time an exemption is sought; and the exact time period for which an exemption is needed (i.e., the time the VMS signal will be turned off and turned on again); and, in the case of a vessel meeting the conditions of paragraph (c)(2)(i)(A) of this section, sufficient information to determine that the vessel will be out of the water for more than 72 continuous hours. The letter of exemption must be on board the vessel at all times, and the vessel may not turn off the VMS signal until the letter of exemption has been received.

(B) *Issuance.* Upon receipt of an application, the Regional Administrator may issue a letter of exemption to the vessel if it is determined that the vessel owner provided sufficient information as required under paragraph (c)(2) of this section, and that the issuance of the letter of exemption will not jeopardize accurate monitoring of the vessel's DAS. Upon written request, the

§ 648.10

Regional Administrator may change the time period for which the exemption is granted.

(d) *Presumption.* If a VMS unit fails to transmit an hourly signal of a vessel's position, the vessel shall be deemed to have incurred a DAS, or fraction thereof, for as long as the unit fails to transmit a signal, unless a preponderance of evidence shows that the failure to transmit was due to an unavoidable malfunction or disruption of the transmission that occurred while the vessel was declared out of the scallop fishery or NE multispecies or monkfish fishery, as applicable, or was not at sea.

(e) *Replacement.* Should a VMS unit require replacement, a vessel owner must submit documentation to the Regional Administrator, within 3 days of installation and prior to the vessel's next trip, verifying that the new VMS unit is an operational, approved system as described under paragraph (a) of this section.

(f) *Access.* As a condition to obtaining a limited access scallop or multispecies permit, or an Atlantic herring permit, all vessel owners must allow NMFS, the USCG, and their authorized officers or designees access to the vessel's DAS data, if applicable, and location data obtained from its VMS unit, if required, at the time of or after its transmission to the vendor or receiver, as the case may be.

(g) *Tampering.* Tampering with a VMS, a VMS unit, or a VMS signal, is prohibited. Tampering includes any activity that is likely to affect the unit's ability to operate properly, signal, or accuracy of computing the vessel's position fix.

[61 FR 34968, July 3, 1996, as amended at 62 FR 14646, Mar. 27, 1997; 63 FR 58329, Oct. 30, 1998; 64 FR 54745, Oct. 7, 1999; 65 FR 77466, Dec. 11, 2000; 69 FR 22946, Apr. 27, 2004; 69 FR 67796, Nov. 19, 2004; 70 FR 21941, Apr. 28, 2005]

EFFECTIVE DATE NOTE: At 70 FR 48867, Aug. 22, 2005, § 648.9 was amended by revising para-

50 CFR Ch. VI (10–1–05 Edition)

graph (c)(1) introductory text, and adding paragraphs (c)(1)(iii) and (c)(2)(i)(D), effective Oct. 21, 2005. For the convenience of the user, the revised text follows:

§ 648.9 VMS requirements.

* * * * *

(c) * * *

(1) Except as provided in paragraph (c)(2) of this section, or unless otherwise required by paragraph (c)(1)(ii) or (iii) of this section, all required VMS units must transmit a signal indicating the vessel's accurate position, as specified under paragraph (c)(1)(i) of this section.

* * * * *

(iii) At least twice per hour, 24 hours a day, throughout the year, for vessels issued a general scallop permit and subject to the requirements of § 648.4(a)(2)(ii)(C), or a limited access scallop permit.

* * * * *

(2) * * *

(i) * * *

(D) The vessel has been issued a general scallop permit and is required to operate VMS as specified in § 648.10(b)(1)(iv), is not in possession of any scallops onboard the vessel, is tied to a permanent dock or mooring, and the vessel operator has notified NMFS through VMS that the VMS will be powered down, unless required by other permit requirements for other fisheries to transmit the vessel's location at all times. Such a vessel must repower the VMS prior to moving from the fixed dock or mooring.

* * * * *

§ 648.10 DAS notification requirements.

(a) *VMS Demarcation Line.* The VMS Demarcation Line is defined by straight lines connecting the following coordinates in the order stated (a copy of a map showing the line is available from the Regional Administrator upon request):

VMS DEMARCATION LINE

Description	N. Lat.	W. Long.
1. Northern terminus point (Canada landmass)	45°03'	66°47'
2. A point east of West Quoddy Head Light	44°48.9'	66°56.1'
3. A point east of Little River Light	44°39.0'	67°10.5'
4. Whistle Buoy "8BI" (SSE of Baker Island)	44°13.6'	68°10.8'
5. Isle au Haut Light	44°03.9'	68°39.1'
6. Pemaquid Point Light	43°50.2'	69°30.4'
7. A point west of Halfway Rock	43°38.0'	70°05.0'

(b) *VMS Notification.* (1) The following vessels must have installed on board an operational VMS unit that meets the minimum performance criteria specified in §648.9(b), or as modified pursuant to §648.9(a):

(i) A scallop vessel issued a Full-time or Part-time limited access scallop permit;

(ii) A scallop vessel issued an Occasional limited access permit when fishing under the Sea Scallop Area Access Program specified under §648.60;

(iii) A scallop vessel fishing under the Small Dredge program specified in §648.51(e);

(iv) A scallop vessel issued a general category scallop permit when fishing under the Sea Scallop Area Access Program specified under §648.60 and in the

Sea Scallop Access Areas described in §648.59(b) through (d);

(v) A vessel issued a limited access NE multispecies, monkfish, Occasional scallop, or Combination permit, whose owner elects to provide the notifications required by this paragraph (b), unless otherwise authorized or required by the Regional Administrator under paragraph (d) of this section;

(vi) A vessel issued a limited access NE multispecies permit electing to fish under the U.S./Canada Resource Sharing Understanding, as specified in §648.85(a);

(vii) A vessel electing to fish under the Regular B DAS Pilot Program, as specified in §648.85(b)(6);

(viii) A vessel electing to fish in the Closed Area I Hook Gear Haddock SAP, as specified in § 648.85(b)(7); and

(ix) A limited access monkfish vessel electing to fish in the Offshore Fishery Program in the SFMA, as provided in § 648.95.

(2) The owner of such a vessel specified in paragraph (b)(1) of this section must provide documentation to the Regional Administrator at the time of application for a limited access permit that the vessel has an operational VMS unit installed on board that meets those criteria, unless otherwise allowed under this paragraph (b). If a vessel has already been issued a limited access permit without the owner providing such documentation, the Regional Administrator shall allow at least 30 days for the vessel to install an operational VMS unit that meets the criteria and for the owner to provide documentation of such installation to the Regional Administrator. A vessel that is required to, or whose owner has elected to, use a VMS unit is subject to the following requirements and presumptions:

(i) A vessel that has crossed the VMS Demarcation Line specified under paragraph (a) of this section is deemed to be fishing under the DAS program, unless the vessel's owner or authorized representative declares the vessel out of the scallop, NE multispecies, or monkfish fishery, as applicable, for a specific time period by notifying the Regional Administrator through the VMS prior to the vessel leaving port, or unless the vessel's owner or authorized representative declares the vessel will be fishing in the Eastern U.S./Canada Area as described in § 648.85(a)(3)(ii) under the provisions of that program.

(ii) Notification that the vessel is not under the DAS program must be received prior to the vessel leaving port. A vessel may not change its status after the vessel leaves port or before it returns to port on any fishing trip.

(iii) DAS for a vessel that is under the VMS notification requirements of this paragraph (b), with the exception of vessels that have elected to fish in the Eastern U.S./Canada Area, pursuant to § 648.85(a), begin with the first location signal received showing that the vessel crossed the VMS Demarcation Line after leaving port. DAS end

with the first location signal received showing that the vessel crossed the VMS Demarcation Line upon its return to port. For those vessels that have elected to fish in the Eastern U.S./Canada Area pursuant to § 648.85(a)(2)(i), the requirements of this paragraph (b) begin with the first 30-minute location signal received showing that the vessel crossed into the Eastern U.S./Canada Area and end with the first location signal received showing that the vessel crossed out of the Eastern U.S./Canada Area upon beginning its return trip to port.

(iv) If the VMS is not available or not functional, and if authorized by the Regional Administrator, a vessel owner must provide the notifications required by paragraphs (b)(2)(i), (ii), and (iii) of this section by using the call-in notification system described under paragraph (c) of this section, instead of using the VMS specified in this paragraph (b).

(3)(i) A vessel issued a limited access NE multispecies, monkfish, occasional scallop, or Combination permit must use the call-in system specified in paragraph (c) of this section, unless the owner of such vessel has elected to do one or more of the following activities:

(A) Provide the notifications required by this paragraph (b), through VMS as specified under paragraph (b)(3)(iii) of this section; or

(B) Fish in the Eastern U.S./Canada Area or Western U.S./Canada Area as described in § 648.85(a)(2)(i); or

(C) Fish under the Regular B DAS Pilot Program specified at § 648.85(a)(6); or

(D) Fish in the CA I Hook Gear Haddock SAP specified in § 648.85(a)(7).

(ii) Unless otherwise required by paragraph (b)(1)(v) of this section, upon recommendation by the Council, the Regional Administrator may require, by notification through a letter to affected permit holders, notification in the FEDERAL REGISTER, or other appropriate means, that a NE multispecies vessel issued an Individual DAS or Combination Vessel permit install on board an operational VMS unit that meets the minimum performance criteria specified in § 648.9(b), or as modified as provided under § 648.9(a). An owner of such a vessel must provide

documentation to the Regional Administrator that the vessel has installed on board an operational VMS unit that meets those criteria. If a vessel has already been issued a permit without the owner providing such documentation, the Regional Administrator shall allow at least 30 days for the vessel to install an operational VMS unit that meets the criteria and for the owner to provide documentation of such installation to the Regional Administrator. A vessel that is required to use a VMS shall be subject to the requirements and presumptions described under paragraphs (b)(2)(i) through (v) of this section.

(iii) A vessel issued a limited access NE multispecies, monkfish, Occasional scallop, or Combination permit may be authorized by the Regional Administrator to provide the notifications required by this paragraph (b) using the VMS specified in this paragraph (b). The owner of such vessel becomes authorized by providing documentation to the Regional Administrator at the time of application for an Individual or Combination vessel limited access NE multispecies permit that the vessel has installed on board an operational VMS unit that meets the minimum performance criteria specified in § 648.9(b), or as modified as provided under § 648.9(a). Vessels that are authorized to use the VMS in lieu of the call-in requirement for DAS notification shall be subject to the requirements and presumptions described under paragraphs (b)(2)(i) through (v) of this section. Those who elect to use the VMS do not need to call in DAS as specified in paragraph (c) of this section. Vessels that do call in are exempt from the prohibition specified in § 648.14(c)(2).

(4) Atlantic Sea Scallop Vessel VMS Notification Requirements. To facilitate the deployment of at-sea observers, all sea scallop vessels issued limited access permits are required to comply with the additional VMS notification requirements specified in § 648.60(c)(2)(ii), except that scallop vessels issued Occasional scallop permits and not participating in the Area Access Program specified in § 648.60 may provide the specified information to the Regional Administrator by calling the Regional Administrator.

(c) *Call-in notification.* Owners of vessels issued limited access NE multispecies, monkfish or red crab permits who are participating in a DAS program and who are not required to provide notification using a VMS, and scallop vessels qualifying for a DAS allocation under the Occasional category and who have not elected to fish under the VMS notification requirements of paragraph (b) of this section, are subject to the following requirements:

(1) Less than 1 hour prior to leaving port, for vessels issued a limited access NE multispecies DAS permit or, for vessels issued a limited access NE multispecies DAS permit and a limited access monkfish permit (Category C, D, F, G, or H), unless otherwise specified in this paragraph (c)(1), and, prior to leaving port for vessels issued a limited access monkfish Category A or B permit, the vessel owner or authorized representative must notify the Regional Administrator that the vessel will be participating in the DAS program by calling the Regional Administrator and providing the following information: Owner and caller name and phone number; vessel name and permit number; type of trip to be taken; port of departure; and that the vessel is beginning a trip. A DAS begins once the call has been received and a confirmation number is given by the Regional Administrator, or when a vessel leaves port, whichever occurs first, unless otherwise specified in paragraph (b)(2)(iii) of this section. Vessels issued a limited access monkfish Category C, D, F, G, or H permit that are allowed to fish as a Category A or B vessel in accordance with the provisions of § 648.92(b)(2)(i), are subject to the call-in notification requirements for limited access monkfish Category A or B vessels specified under this paragraph (c)(1) for those monkfish DAS where there is not a concurrent NE multispecies DAS.

(2) The vessel's confirmation numbers for the current and immediately prior NE multispecies, monkfish or red crab fishing trip must be maintained on board the vessel and provided to an authorized officer upon request.

(3) At the end of a vessel's trip, upon its return to port, the vessel owner or owner's representative must call the

Regional Administrator and notify him/her that the trip has ended by providing the following information: Owner and caller name and phone number, vessel name, permit number, port of landing, and that the vessel has ended its trip. A DAS ends when the call has been received and confirmation has been given by the Regional Administrator, unless otherwise specified in paragraph (b)(2)(iii) of this section.

(4) The Regional Administrator will furnish a phone number for DAS notification call-ins upon request.

(5) Any vessel that possesses or lands per trip more than 400 lb (181 kg) of scallops, and any vessel issued a limited access NE multispecies permit subject to the NE multispecies DAS program and call-in requirement that possesses or lands regulated species, except as provided in §§ 648.17 and 648.89, any vessel issued a limited access monkfish permit subject to the monkfish DAS program and call-in requirement that possesses or lands monkfish above the incidental catch trip limits specified in § 648.94(c), and any vessel issued a limited access red crab permit subject to the red crab DAS program and call-in requirement that possesses or lands red crab above the incidental catch trip limits specified in § 648.263(b)(1), shall be deemed in its respective DAS program for purposes of counting DAS, regardless of whether the vessel's owner or authorized representative provided adequate notification as required by paragraph (c) of this section.

(d) *Temporary authorization for use of the call-in system.* The Regional Administrator may authorize or require, on a temporary basis, the use of the call-in system of notification specified in paragraph (c) of this section, instead of use of the VMS. If use of the call-in system is authorized or required, the Regional Administrator shall notify affected permit holders through a letter, notification in the FEDERAL REGISTER, or other appropriate means. A multispecies vessel issued an Individual DAS or Combination Vessel (regarding the multispecies fishery) permit are authorized to use the call-in system of notification specified in paragraph (c) of this section, unless otherwise noti-

fied as specified in paragraph (b)(2) of this section.

(e) *Scallop vessels fishing under exemptions.* Vessels fishing under the exemptions provided by § 648.54 (a) and/or (b)(1) must notify the Regional Administrator by VMS notification or by call-in notification as follows:

(1) *VMS notification.* (i) Notify the Regional Administrator, via their VMS, prior to the vessel's first trip under the state waters exemption program, that the vessel will be fishing exclusively in state waters; and

(ii) Notify the Regional Administrator, via their VMS, prior to the vessel's first planned trip in the EEZ, that the vessel is to resume fishing under the vessel's DAS allocation.

(2) *Call-in notification.* (i) Notify the Regional Administrator by calling the Regional Administrator and providing the following information at least 7 days prior to fishing under the exemption: Owner and caller name and address, vessel name and permit number, and beginning and ending dates of the exemption period.

(ii) Remain under the exemption for a minimum of 7 days.

(iii) If, under the exemption for a minimum of 7 days and wishing to withdraw earlier than the designated end of the exemption period, notify the Regional Administrator of early withdrawal from the program by calling the Regional Administrator, providing the vessel's name and permit number and the name and phone number of the caller, and stating that the vessel is withdrawing from the exemption. The vessel may not leave port to fish in the EEZ until 48 hours after notification of early withdrawal is received by the Regional Administrator.

(iv) The Regional Administrator will furnish a phone number for call-ins upon request.

(f) *Additional NE multispecies call-in requirements—(1) Spawning season call-in.* With the exception of vessels issued a valid Small Vessel category permit, or the Handgear A permit category, vessels subject to the spawning season restriction described in § 648.82 must notify the Regional Administrator of the commencement date of their 20-day period out of the NE multispecies fishery through either the VMS system or

Fishery Conservation and Management

§ 648.11

by calling and providing the following information: Vessel name and permit number, owner and caller name and phone number, and the commencement date of the 20-day period.

(2) *Gillnet call-in*. Vessels subject to the gillnet restriction described in § 648.82(j)(1)(ii) must notify the Regional Administrator of the commencement date of their time out of the NE multispecies gillnet fishery using the procedure described in paragraph (f)(1) of this section.

§ 648.11 At-sea sea sampler/observer coverage.

(a) The Regional Administrator may request any vessel holding a permit for Atlantic sea scallops, NE multispecies, monkfish, skates, Atlantic mackerel, squid, butterfish, scup, black sea bass, bluefish, spiny dogfish, Atlantic herring, tilefish, or Atlantic deep-sea red crab; or a moratorium permit for summer flounder; to carry a NMFS-approved sea sampler/observer.

(b) If requested by the Regional Administrator to carry an observer or sea sampler, it is the responsibility of the vessel owner to arrange for and facilitate observer or sea sampler placement. Owners of vessels selected for sea sampler/observer coverage must notify the appropriate Regional or Science and Research Director, as specified by the Regional Administrator, before commencing any fishing trip that may result in the harvest of resources of the respective fishery. Notification procedures will be specified in selection letters to vessel owners.

(c) The Regional Administrator may waive the requirement to carry a sea sampler or observer if the facilities on a vessel for housing the observer or sea sampler, or for carrying out observer or sea sampler functions, are so inadequate or unsafe that the health or safety of the observer or sea sampler, or the safe operation of the vessel, would be jeopardized.

(d) An owner or operator of a vessel on which a NMFS-approved sea sampler/observer is embarked must:

(1) Provide accommodations and food that are equivalent to those provided to the crew.

(2) Allow the sea sampler/observer access to and use of the vessel's communications equipment and personnel upon request for the transmission and receipt of messages related to the sea sampler's/observer's duties.

(3) Provide true vessel locations, by latitude and longitude or loran coordinates, as requested by the observer/sea

§ 648.12

sampler, and allow the sea sampler/observer access to and use of the vessel's navigation equipment and personnel upon request to determine the vessel's position.

(4) Notify the sea sampler/observer in a timely fashion of when fishing operations are to begin and end.

(5) Allow for the embarking and debarking of the sea sampler/observer, as specified by the Regional Administrator, ensuring that transfers of observers/sea samplers at sea are accomplished in a safe manner, via small boat or raft, during daylight hours as weather and sea conditions allow, and with the agreement of the sea samplers/observers involved.

(6) Allow the sea sampler/observer free and unobstructed access to the vessel's bridge, working decks, holding bins, weight scales, holds, and any other space used to hold, process, weigh, or store fish.

(7) Allow the sea sampler/observer to inspect and copy any the vessel's log, communications log, and records associated with the catch and distribution of fish for that trip.

(e) The owner or operator of a vessel issued a summer flounder moratorium permit, a scup moratorium permit, a black sea bass moratorium permit, a bluefish permit, a spiny dogfish permit, an Atlantic herring permit, an Atlantic deep-sea red crab permit, a skate permit, or a tilefish permit, if requested by the sea sampler/observer, also must:

(1) Notify the sea sampler/observer of any sea turtles, marine mammals, summer flounder, scup, black sea bass, bluefish, spiny dogfish, Atlantic herring, Atlantic deep-sea red crab, tilefish, skates (including discards) or other specimens taken by the vessel.

(2) Provide the sea sampler/observer with sea turtles, marine mammals, summer flounder, scup, black sea bass, bluefish, spiny dogfish, Atlantic herring, Atlantic deep-sea red crab, skates, tilefish, or other specimens taken by the vessel.

(f) NMFS may accept observer coverage funded by outside sources if:

(1) All coverage conducted by such observers is determined by NMFS to be in compliance with NMFS' observer guidelines and procedures.

50 CFR Ch. VI (10–1–05 Edition)

(2) The owner or operator of the vessel complies with all other provisions of this part.

(3) The observer is approved by the Regional Administrator.

[61 FR 34968, July 3, 1996, as amended at 61 FR 43425, Aug. 23, 1996; 61 FR 58465, Nov. 15, 1996; 65 FR 1569, Jan. 11, 2000; 65 FR 45852, July 26, 2000; 65 FR 77466, Dec. 11, 2000; 66 FR 49144, Sept. 26, 2001; 68 FR 49700, Aug. 19, 2003]

§ 648.12 Experimental fishing.

The Regional Administrator may exempt any person or vessel from the requirements of subparts A (General provisions), B (Atlantic mackerel, squid, and butterfish), D (Atlantic sea scallop), E (Atlantic surf clam and ocean quahog), F (NE multispecies and monkfish), G (summer flounder), H (scup), I (black sea bass), J (Atlantic bluefish), K (Atlantic herring), L (spiny dogfish), M (Atlantic deep-sea red crab), N (tilefish), and O (skates) of this part for the conduct of experimental fishing beneficial to the management of the resources or fishery managed under that subpart. The Regional Administrator shall consult with the Executive Director of the MAFMC regarding such exemptions for the Atlantic mackerel, squid, butterfish, summer flounder, scup, black sea bass, spiny dogfish, bluefish, and tilefish fisheries.

(a) The Regional Administrator may not grant such an exemption unless he/she determines that the purpose, design, and administration of the exemption is consistent with the management objectives of the respective FMP, the provisions of the Magnuson-Stevens Act, and other applicable law, and that granting the exemption will not:

(1) Have a detrimental effect on the respective resources and fishery;

(2) Cause any quota to be exceeded; or

(3) Create significant enforcement problems.

(b) Each vessel participating in any exempted experimental fishing activity is subject to all provisions of the respective FMP, except those necessarily relating to the purpose and nature of the exemption. The exemption will be specified in a letter issued by the Regional Administrator to each vessel participating in the exempted activity.

This letter must be carried on board the vessel seeking the benefit of such exemption.

(c) Experimental fishing for surf clams or ocean quahogs will not require an allocation permit.

[61 FR 58466, Nov. 15, 1996, as amended at 62 FR 37156, July 11, 1997; 65 FR 45852, July 26, 2000; 65 FR 77466, Dec. 11, 2000; 66 FR 49144, Sept. 26, 2001; 68 FR 49700, Aug. 19, 2003]

§ 648.13 Transfers at sea.

(a) Only vessels issued a *Loligo* and butterfish moratorium or *Illex* moratorium permit under § 648.4(a)(5) and vessels issued a mackerel or squid/butterfish incidental catch permit and authorized in writing by the Regional Administrator to do so, may transfer or attempt to transfer *Loligo*, *Illex*, or butterfish from one vessel to another vessel.

(b)(1) Except as provided in paragraph (b)(2) of this section, vessels issued a multispecies permit under § 648.4(a)(1) or a scallop permit under § 648.4(a)(2) are prohibited from transferring or attempting to transfer any fish from one vessel to another vessel, except that vessels issued a Federal multispecies permit under § 648.4(a)(1) and specifically authorized in writing by the Regional Administrator to do so, may transfer species other than regulated species from one vessel to another vessel.

(2) Vessels issued a Federal multispecies permit under § 648.4(a)(1) may transfer from one vessel to another, for use as bait, up to 500 lb (226.8 kg) of silver hake and unlimited amounts of red hake, per trip, provided:

(i) The transferring vessel possesses a Federal multispecies permit as specified under § 648.4(a)(1);

(ii) The transferring vessel has a letter of authorization issued by the Regional Administrator on board; and

(iii) The receiving vessel possesses a written receipt for any small-mesh multispecies purchased at sea.

(c) All persons are prohibited from transferring or attempting to transfer NE multispecies or scallops from one vessel to another vessel, except in accordance with paragraph (b) of this section.

(d) All persons are prohibited from transferring or attempting to transfer

at sea summer flounder from one vessel to another vessel.

(e) Vessels issued a letter of authorization from the Regional Administrator to transfer small-mesh multispecies at sea for use as bait will automatically have 500 lb (226.8 kg) deducted from the vessel's combined silver hake and offshore hake possession limit, as specified under § 648.86(c), for every trip during the participation period specified on the letter of authorization, regardless of whether a transfer of small-mesh multispecies at sea occurred or whether the actual amount that was transferred was less than 500 lb (226.8 kg). This deduction shall be noted on the transferring vessel's letter of authorization from the Regional Administrator.

(f) *Atlantic herring*. Except for a person who purchases and/or receives Atlantic herring at sea for his own personal use as bait and who does not have purse seine, mid-water trawl, pelagic gillnet, sink gillnet, or bottom trawl gear on board, any person or vessel is prohibited from transferring, receiving, or attempting to transfer or receive any Atlantic herring taken from the EEZ, and any vessel issued an Atlantic herring permit is prohibited from transferring, receiving, or attempting to transfer or receive, Atlantic herring, unless the person or vessel complies with the following:

(1) The transferring and receiving vessels have been issued valid Atlantic herring permits and/or other applicable authorization, such as a letter of authorization from the Regional Administrator, to transfer or receive herring.

(2) The vessel does not transfer to a U.S. vessel, and a U.S. vessel does not receive, > 2,000 lb (907.2 kg) of herring per day in or from a management area closed to directed fishing for Atlantic herring.

(3) The vessel does not transfer herring in or from an area closed to directed fishing for Atlantic herring to an IWP or Joint Venture vessel.

(4) The vessel does not transfer Atlantic herring to a Canadian transshipment vessel that is permitted in accordance with Pub. L. 104-297 after the amount of herring transshipped equals the amount of the BT specified pursuant to § 648.200.

§ 648.14

50 CFR Ch. VI (10–1–05 Edition)

(g) All persons are prohibited from transferring at sea, either directly or indirectly, or attempting to transfer at sea to any vessel, any red crab or red crab parts, taken in or from the EEZ portion of the Red Crab Management Unit.

(h) *Skates*. (1) Except as provided in paragraph (h)(2) of this section, all persons or vessels issued a Federal skate permit are prohibited from transferring, or attempting to transfer, at sea any skates to any vessel, and all persons or vessels are prohibited from transferring, or attempting to transfer, at sea to any vessel any skates while in the EEZ, or skates taken in or from the EEZ portion of the Skate Management Unit.

(2) Vessels and vessel owners or operators issued Federal skate permits under § 648.4(a)(14) may transfer at sea skates taken in or from the EEZ portion of the Skate Management Unit provided:

(i) The transferring vessel possesses on board a letter of authorization issued by the Regional Administrator as specified under § 648.322(b);

(ii) The vessel and vessel owner or operator comply with the requirements specified at § 648.322(b);

(iii) The transferring vessel maintains a record of the quantity of skates transferred according to the requirements at § 648.7; and

(iv) The transferring vessel provides the receiving vessel documentation showing the date and the amount of skates transferred, whether or not a monetary exchange is involved in the transfer, and the transferring vessel maintains onboard, for a minimum of 1 year from the date of the transfer, a copy of said documentation.

(i) *Scup*. (1) Except as provided in paragraph (i)(2) of this section, all persons or vessels issued a Federal scup permit are prohibited from transferring, or attempting to transfer, at sea any scup to any vessel, and all persons or vessels are prohibited from transferring, or attempting to transfer, at sea to any vessel any scup while in the EEZ, or any scup taken in or from the EEZ portion of the Scup Management Unit.

(2) The owner or operator of a vessel issued a Federal scup permit under

§ 648.4(a)(6)(i)(A) may transfer at sea scup taken in or from the EEZ portion of the Scup Management Unit, provided:

(i) The transfer occurs between two vessels with Federal scup permits;

(ii) The transfer occurs seaward of a boundary line that begins at 40°50' N. lat., 70°00' W. long., and runs south to connect points at 40°15' N. lat., 73°30' W. long.; 37°50' N. lat., 75°00' W. long.; and 35°30' N. lat., 75°00' W. long.;

(iii) The donating and receiving vessels possess gear that meets the requirements at § 648.123(a)(2), (3), and (4) for commercial scup fishing gear;

(iv) The transfer occurs in the Winter I or Winter II periods of the scup fishing year;

(v) There is only one transfer per fishing trip for the donor vessel;

(vi) The donor vessel removes only enough scup from the net to attain the scup possession limit;

(vii) After removal of scup from the net by the donor vessel, the entire codend, with all its contents, is transferred to the receiving vessel;

(viii) Only scup in an amount not to exceed the possession limit are retained by the receiving vessel;

(ix) While fishing for scup, all other nets are stored in accordance with § 648.23(b)(1); and

(x) The donating and receiving vessels report the transfer amount on the vessel trip report for each vessel.

[61 FR 34968, July 3, 1996, as amended at 62 FR 28642, May 27, 1997; 62 FR 63875, Dec. 3, 1997; 65 FR 16774, Mar. 29, 2000; 65 FR 77466, Dec. 11, 2000; 67 FR 63232, Oct. 10, 2002; 68 FR 22336, Apr. 28, 2003; 68 FR 49700, Aug. 19, 2003; 69 FR 16178, Mar. 29, 2004]

§ 648.14 Prohibitions.

(a) In addition to the general prohibitions specified in § 600.725 of this chapter, it is unlawful for any person to do any of the following:

(1) Fail to report to the Regional Administrator within 15 days any change in the information contained in an applicable vessel, operator, or dealer/processor permit application.

(2) Falsify or fail to affix and maintain vessel markings as required by § 648.8.

(3) Make any false statement in connection with an application, declaration, or report under this part.

(4) Fail to comply in an accurate and timely fashion with the log report, reporting, record retention, inspection, and other requirements of §648.7, or submit or maintain false information in records and reports required to be kept or filed under §648.7.

(5) Alter, erase, or mutilate any permit issued under this part.

(6) Alter, erase, mutilate, duplicate or cause to be duplicated, or steal any cage tag issued under this part.

(7) Tamper with, damage, destroy, alter, or in any way distort, render useless, inoperative, ineffective, or inaccurate the VMS, VMS unit, or VMS signal required to be installed on or transmitted by vessel owners or operators required to use a VMS by this part.

(8) Assault, resist, oppose, impede, harass, intimidate, or interfere with or bar by command, impediment, threat, or coercion any NMFS-approved observer or sea sampler aboard a vessel conducting his or her duties aboard a vessel, or any authorized officer conducting any search, inspection, investigation, or seizure in connection with enforcement of this part, or any official designee of the Regional Administrator conducting his or her duties, including those duties authorized in §648.7(g).

(9) Refuse to carry an observer or sea sampler if requested to do so by the Regional Administrator.

(10) To refuse reasonable assistance to either a NMFS-approved observer or sea sampler conducting his or her duties aboard a vessel.

(11) Fish for surf clams or ocean quahogs in any area closed to surf clam or ocean quahog fishing.

(12) Fish for, take, catch, harvest or land any species of fish regulated by this part in or from the EEZ, unless the vessel has a valid and appropriate permit issued under this part and the permit is on board the vessel and has not been surrendered, revoked, or suspended.

(13) Purchase, possess or receive for a commercial purpose, or attempt to purchase possess or receive for a commercial purpose, any species regulated

under this part unless in possession of a valid dealer permit issued under this part, except that this prohibition does not apply to species that are purchased or received from a vessel not issued a permit under this part that fished exclusively in state waters, or unless otherwise specified in §648.17.

(14) Produce, or cause to be produced, cage tags required under this part without written authorization from the Regional Administrator.

(15) Tag a cage with a tag that has been rendered null and void or with a tag that has been previously used.

(16) Tag a cage of surf clams with an ocean quahog cage tag or tag a cage of ocean quahogs with a surf clam cage tag.

(17) Possess, import, export, transfer, land, have custody or control of any species of fish regulated pursuant to this part that do not meet the minimum size provisions in this part, unless such species were harvested exclusively within state waters by a vessel not issued a permit under this part or whose permit has been surrendered in accordance with applicable regulations.

(18) Possess an empty cage to which a cage tag required by §648.75 is affixed or possess any cage that does not contain surf clams or ocean quahogs and to which a cage tag required by §648.75 is affixed.

(19) Land or possess, after offloading, any cage holding surf clams or ocean quahogs without a cage tag or tags required by §648.75, unless the person can demonstrate the inapplicability of the presumptions set forth in §648.75(h).

(20) Sell null and void tags.

(21) Shuck surf clams or ocean quahogs harvested in or from the EEZ at sea, unless permitted by the Regional Administrator under the terms of §648.74.

(22) Receive for a commercial purpose other than transport, surf clams or ocean quahogs harvested in or from the EEZ, whether or not they are landed under an allocation under §648.70, unless issued a dealer/processor permit under this part.

(23) Land unshucked surf clams or ocean quahogs harvested in or from the EEZ outside the Maine mahogany quahog zone in containers other than

§ 648.14

cages from vessels capable of carrying cages.

(24) Land unshucked surf clams and ocean quahogs harvested in or from the EEZ within the Maine mahogany quahog zone in containers other than cages from vessels capable of carrying cages unless, with respect to ocean quahogs, the vessel has been issued a Maine mahogany quahog permit under this part and is not fishing for an individual allocation of quahogs under § 648.70.

(25) Fail to comply with any of the notification requirements specified in § 648.15(b).

(26) Fish for, retain, or land both surf clams and ocean quahogs in or from the EEZ on the same trip.

(27) Fish for, retain, or land ocean quahogs in or from the EEZ on a trip designated as a surf clam fishing trip under § 648.15(b), or fish for, retain, or land surf clams in or from the EEZ on a trip designated as an ocean quahog fishing trip under § 648.15(b).

(28) Fail to offload any surf clams or ocean quahogs harvested in the EEZ from a trip discontinued pursuant to § 648.15(b) prior to commencing fishing operations in waters under the jurisdiction of any state.

(29) Land or possess any surf clams or ocean quahogs harvested in or from the EEZ in excess of, or without, an individual allocation.

(30) Transfer any surf clams or ocean quahogs harvested in or from the EEZ to any person for a commercial purpose, other than transport, without a surf clam or ocean quahog processor or dealer permit.

(31) Fish for, possess, or land NE multispecies, unless:

(i) The NE multispecies are being fished for or were harvested in or from the EEZ by a vessel holding a valid multispecies permit under this part, or a letter under § 648.4(a)(1), and the operator on board such vessel has been issued an operator's permit and has a valid permit on board the vessel;

(ii) The NE multispecies were harvested by a vessel not issued a multispecies permit that fishes for NE multispecies exclusively in state waters;

50 CFR Ch. VI (10–1–05 Edition)

(iii) The NE multispecies were harvested in or from the EEZ by a recreational fishing vessel; or

(iv) Unless otherwise specified in § 648.17.

(32) Land, offload, remove, or otherwise transfer, or attempt to land, offload, remove or otherwise transfer multispecies from one vessel to another vessel, unless both vessels have not been issued multispecies permits and both fish exclusively in state waters, or unless authorized in writing by the Regional Administrator.

(33) Sell, barter, trade, or otherwise transfer; or attempt to sell, barter, trade, or otherwise transfer for a commercial purpose any NE multispecies from a trip, unless the vessel is holding a multispecies permit, or a letter under § 648.4(a)(1), and is not fishing under the charter/party vessel restrictions specified in § 648.89, or unless the NE multispecies were harvested by a vessel without a multispecies permit that fishes for NE multispecies exclusively in state waters, or unless otherwise specified in § 648.17.

(34) Operate or act as an operator of a vessel fishing for or possessing NE multispecies in or from the EEZ, or holding a multispecies permit without having been issued and possessing a valid operator's permit.

(35) Fish with, use, or have on board, within the areas described in § 648.80(a)(1) and (2), nets with mesh size smaller than the minimum mesh size specified in § 648.80(a)(3) and (4), except as provided in § 648.80(a)(5) through (8), (a)(9), (a)(10), (a)(15), (d), (e), and (i), unless the vessel has not been issued a NE multispecies permit and fishes for NE multispecies exclusively in state waters, or unless otherwise specified in § 648.17.

(36) Fish with, use, or have available for immediate use within the area described in § 648.80(b)(1), nets of mesh size smaller than the minimum size specified in § 648.80(b)(2), except as provided in § 648.80(b)(3), (b)(9), (d), (e), and (i), or unless the vessel has not been issued a multispecies permit and fishes for multispecies exclusively in state waters, or unless otherwise specified in § 648.17.

(37) Fish with, use, or have available for immediate use within the area described in § 648.80(c)(1), nets of mesh size smaller than the minimum mesh size specified in § 648.80(c)(2), except as provided in § 648.80(c)(3), (d), (e), and (i), or unless the vessel has not been issued a multispecies permit and fishes for NE multispecies exclusively in state waters, or unless otherwise specified in § 648.17.

(38) Enter or be in the area described in § 648.81(a)(1) on a fishing vessel, except as provided in § 648.81(a)(2) and (d).

(39) Enter or be in the area described in § 648.81(b)(1) on a fishing vessel, except as provided in § 648.81(b)(2) and (b)(2)(i).

(40) Enter or be in the area described in § 648.81(c)(1) on a fishing vessel, except as allowed under § 648.81(c)(2) and (i).

(41) Fail to comply with the gear-marking requirements of § 648.84.

(42) Fish within the areas described in § 648.80(a)(6) with nets of mesh smaller than the minimum size specified in § 648.80(a)(3) or (4).

(43) Violate any of the provisions of § 648.80, including paragraphs (a)(5), the small-mesh northern shrimp fishery exemption area; (a)(6), the Cultivator Shoal whiting fishery exemption area; (a)(9), Small-mesh Area 1/Small-mesh Area 2; (a)(10), the Nantucket Shoals dogfish fishery exemption area; (a)(12), the Nantucket Shoals mussel and sea urchin dredge exemption area; (a)(13), the GOM/GB monkfish gillnet exemption area; (a)(14), the GOM/GB dogfish gillnet exemption area; (a)(15), the Raised Footrope Trawl Exempted Whiting Fishery; (b)(3), exemptions (small mesh); (b)(5), the SNE monkfish and skate trawl exemption area; (b)(6), the SNE monkfish and skate gillnet exemption area; (b)(8), the SNE mussel and sea urchin dredge exemption area; (b)(9), the SNE little tunny gillnet exemption area; and (b)(11), the SNE Scallop Dredge Exemption Area. Each violation of any provision in § 648.80 constitutes a separate violation.

(44) Fish for, land, or possess NE multispecies harvested by means of pair trawling or with pair trawl gear, except under the provisions of § 648.80(d), or unless the vessels that engaged in pair trawling have not been

issued multispecies permits and fish for NE multispecies exclusively in state waters.

(45) Fish for, harvest, possess, or land in or from the EEZ northern shrimp, unless such shrimp were fished for or harvested by a vessel meeting the requirements specified in § 648.80(a)(5).

(46) Violate any terms of a letter authorizing experimental fishing pursuant to § 648.12 or fail to keep such letter on board the vessel during the period of the experiment.

(47) Fish for the species specified in § 648.80(d) or (e) with a net of mesh size smaller than the applicable mesh size specified in § 648.80(a)(3) or (4), (b)(2), or (c)(2), or possess or land such species, unless the vessel is in compliance with the requirements specified in § 648.80(d) or (e), or unless the vessel has not been issued a NE multispecies permit and fishes for NE multispecies exclusively in state waters, or unless otherwise specified in § 648.17.

(48) Violate any provision of the open access permit restrictions as provided in § 648.88.

(49) Violate any of the possession or landing restrictions on fishing with scallop dredge gear specified in §§ 648.80(h) and 648.94.

(50) Violate any provision of the state waters winter flounder exemption program as provided in § 648.80(i).

(51) Obstruct or constrict a net as described in § 648.80(g) (1) or (2).

(52) Enter, be on a fishing vessel in, or fail to remove gear from the EEZ portion of the areas described in § 648.81(d)(1) through (g)(1), except as provided in § 648.81(d)(2), (e)(2), (f)(2), (g)(2), and (i).

(53) Possess, land, or fish for regulated species, except winter flounder as provided for in accordance with § 648.80(i) and from or within the areas described in § 648.80(i), while in possession of scallop dredge gear on a vessel not fishing under the scallop DAS program as described in § 648.53, or fishing under a general scallop permit, unless the vessel and the dredge gear conform with the stowage requirements of § 648.51 (a)(2)(ii) and (e)(2), or unless the vessel has not been issued a multispecies permit and fishes for NE multispecies exclusively in state waters.

(54) Possess or land fish caught with nets of mesh smaller than the minimum size specified in § 648.51, or with scallop dredge gear on a vessel not fishing under the scallop DAS program described in § 648.54 of this chapter, or fishing under a general scallop permit, unless said fish are caught, possessed or landed in accordance with §§ 648.80 and 648.86, or unless the vessel has not been issued a multispecies permit and fishes for NE multispecies exclusively in state waters.

(55) Purchase, possess, or receive as a dealer, or in the capacity of a dealer, regulated species in excess of the possession limits specified in § 648.85 or § 648.86 applicable to a vessel issued a NE multispecies permit, unless otherwise specified in § 648.17.

(56) Possess, or land per trip, scallops in excess of 40 lb (18.14 kg) of shucked, or 5 bu (176.2 L) of in-shell scallops, unless:

(i) The scallops were harvested by a vessel that has been issued and carries on board a general or limited access scallop permit; or

(ii) The scallops were harvested by a vessel that has not been issued a scallop permit and fishes for scallops exclusively in state waters.

(57) Fish for or land per trip, or possess at any time prior to a transfer to another person for a commercial purpose, other than solely for transport, in excess of 400 lb (181.4 kg) shucked, or 50 bu (17.6 hl) in-shell scallops, unless:

(i) The scallops were harvested by a vessel that has been issued and carries on board a limited access scallop permit and is fishing under scallop DAS; or

(ii) The scallops were harvested by a vessel that has not been issued a scallop permit and fishes for scallops exclusively in state waters.

(iii) The scallops were harvested by a vessel that has been issued and carries on board a limited access or General Category scallop permit and the vessel is fishing under the provisions of the state waters exemption program specified in § 648.54.

(58) Fish for, possess, or land per trip, scallops in excess of 40 lb (18.14 kg) of shucked, or 5 bu (176.2 L) of in-shell scallops, unless:

(i) The scallops were harvested by a vessel with an operator on board who has been issued an operator's permit and the permit is on board the vessel and is valid; or

(ii) The scallops were harvested by a vessel that has not been issued a scallop permit and fishes for scallops exclusively in state waters.

(59) Have a shucking or sorting machine on board a vessel that shucks scallops at sea, while in possession of more than 400 lb (181.44 kg) of shucked scallops, unless that vessel has not been issued a scallop permit and fishes exclusively in state waters.

(60) Land, offload, remove, or otherwise transfer, or attempt to land, offload, remove or otherwise transfer, scallops from one vessel to another, unless that vessel has not been issued a scallop permit and fishes exclusively in state waters.

(61) Sell, barter or trade, or otherwise transfer, or attempt to sell, barter or trade, or otherwise transfer, for a commercial purpose, any scallops from a trip whose catch is 40 lb (18.14 kg) of shucked scallops or less, or 5 bu (176.1 L) of in-shell scallops, unless the vessel has been issued a valid general or limited access scallop permit, or the scallops were harvested by a vessel that has not been issued a scallop permit and fishes for scallops exclusively in state waters.

(62) Purchase, possess, or receive for a commercial purpose, or attempt to purchase, possess, or receive for a commercial purpose, in the capacity of a dealer, scallops taken from a fishing vessel that were harvested in or from the EEZ, unless issued, and in possession of, a valid scallop dealer's permit.

(63) Purchase, possess, or receive for commercial purposes, or attempt to purchase or receive for commercial purposes, scallops caught by a vessel other than one issued a valid limited access or general scallop permit unless the scallops were harvested by a vessel that has not been issued a scallop permit and fishes for scallops exclusively in state waters.

(64) Operate or act as an operator of a vessel fishing for or possessing any species of fish regulated by this part in or from the EEZ, or issued a permit pursuant to this part, without having

Fishery Conservation and Management

§ 648.14

been issued and possessing a valid operator's permit.

(65) Possess in or harvest from the EEZ summer flounder, either in excess of the possession limit specified in § 648.105, or before or after the time period specified in § 648.102, unless the vessel was issued a summer flounder moratorium permit and the moratorium permit is on board the vessel and has not been surrendered, revoked, or suspended.

(66) Possess nets or netting with mesh not meeting the minimum mesh requirement of § 648.104 if the person possesses summer flounder harvested in or from the EEZ in excess of the threshold limit of § 648.105(a).

(67) Purchase or otherwise receive, except for transport, summer flounder from the owner or operator of a vessel issued a summer flounder moratorium permit, unless in possession of a valid summer flounder dealer permit.

(68) Purchase or otherwise receive for commercial purposes summer flounder caught by other than a vessel with a summer flounder moratorium permit not subject to the possession limit of § 648.105.

(69) Purchase or otherwise receive for a commercial purpose summer flounder landed in a state after the effective date published in the FEDERAL REGISTER notifying permit holders that commercial quota is no longer available in that state.

(70) Fail to comply with any sea turtle conservation measure specified in § 648.106, including any sea turtle conservation measure implemented by notification in the FEDERAL REGISTER in accordance with § 648.106(d).

(71) Use any vessel of the United States for taking, catching, harvesting, fishing for, or landing any Atlantic salmon taken from or in the EEZ.

(72) Transfer, directly or indirectly, or attempt to transfer to any vessel any Atlantic salmon taken in or from the EEZ.

(73) Take, retain, possess, or land more mackerel, squid or butterflyfish than specified under a notification issued under § 648.22.

(74) Possess nets or netting with mesh not meeting the minimum size requirements of § 648.23, and not stowed in accordance with the requirements of

§ 648.23, if in possession of *Loligo* or butterflyfish harvested in or from the EEZ.

(75) Transfer *Loligo*, *Illex*, or butterflyfish within the EEZ, unless the vessels participating in the transfer have been issued a valid *Loligo* and butterflyfish or *Illex* moratorium permit and are transferring the species for which the vessels are permitted or have a valid squid/butterflyfish incidental catch permit and a letter of authorization from the Regional Administrator.

(76) Purchase, possess or receive for a commercial purpose, or attempt to purchase, possess, or receive for a commercial purpose, in the capacity of a dealer, except for transport on land, mackerel, squid, and butterflyfish taken from a fishing vessel unless issued, and in possession of a valid mackerel, squid, and butterflyfish fishery dealer permit.

(77) Purchase or otherwise receive for a commercial purpose, mackerel, squid, and butterflyfish caught by other than a vessel issued a mackerel, squid, and butterflyfish permit, unless the vessel has not been issued a permit under this part and fishes exclusively within the waters under the jurisdiction of any state.

(78) [Reserved]

(79) Violate any other provision of this part, the Magnuson Act, or any regulation, notice, or permit issued under the Magnuson Act.

(80) Possess scup in or harvested from the EEZ north of 35°15.3' N. lat. in an area closed, or before or after a season established pursuant to § 648.122, or in excess of the possession limit established pursuant to § 648.125.

(81) To purchase or otherwise receive for a commercial purpose scup harvested from the EEZ north of 35°15.3' N. lat., or from a vessel issued a scup moratorium permit after the effective date of the notification published in the FEDERAL REGISTER stating that the commercial quota has been harvested.

(82) Land scup harvested in or from the EEZ north of 35°15.3' N. lat. after the effective date of the notification published in the FEDERAL REGISTER stating that the commercial quota has been harvested.

(83) Possess scup harvested in or from the EEZ north of 35°15.3' N. lat. that do

§ 648.14

50 CFR Ch. VI (10–1–05 Edition)

not meet the minimum fish size specified in § 648.124.

(84) Fish for, catch, possess, or retain scup in or from the EEZ north of 35°15.3' N. lat. in excess of the amount specified in § 648.123 (500 lb (226.8 kg) or more from November 1– April 30, or 100 lb (45.4 kg) or more from May 1–October 31), unless the vessel meets the gear restrictions in § 648.123.

(85) Fish for, catch, or retain scup in or from the EEZ north of 35°15.3' N. lat. for sale, barter, or trade, after January 1, 1997, unless the vessel has been issued a valid moratorium permit pursuant to § 648.4(a)(6).

(86) Sell or transfer scup harvested in or from the EEZ north of 35°15.3' N. lat. after January 1, 1997, unless the vessel has been issued a valid moratorium permit pursuant to § 648.4(a)(6).

(87) Fish for, catch, or retain scup in or from the EEZ north of 35°15.3' N. lat. on board a party or charter boat after January 1, 1997, unless the vessel has been issued a valid party or charter boat permit pursuant to § 648.4(a)(6)(ii).

(88) Fish with or possess scup pots or traps in the EEZ north of 35°15.3' N. lat. that have a rectangular escape vent, any side of which is less than 2.25 inches (5.7 cm) in length.

(89) Fish for, catch, and retain, or land scup in or from the EEZ north of 35°15.3' N. lat. in excess of the landing limit established pursuant to § 648.120(b)(3) and (b)(4).

(90) Use, set, haul back, fish with, possess on board a vessel, unless stowed in accordance with § 648.23(b), or fail to remove, sink gillnet gear and other gillnet gear capable of catching NE multispecies, with the exception of single pelagic gillnets (as described in § 648.81(f)(2)(ii)), in the areas and for the times specified in § 648.80(g)(6)(i) and (ii), except as provided in §§ 648.80(g)(6)(i) and (ii) and 648.81(f)(2)(ii), or unless otherwise authorized in writing by the Regional Administrator.

(91) Possess in or harvest from the EEZ from 35°15.3' N. lat., the latitude of Cape Hatteras Light, NC, northward to the U.S.-Canada border, black sea bass either in excess of the possession limit established pursuant to § 648.145 or before or after the time period established pursuant to § 648.142, unless the

person is operating a vessel issued a moratorium permit under § 648.4 and the moratorium permit is on board the vessel and has not been surrendered, revoked, or suspended;

(92) Fish for, catch, possess, land, or retain black sea bass in or from the EEZ north of 35°15.3' N. lat. (the latitude of Cape Hatteras Light, NC, to the U.S.-Canadian border) in excess of the amount specified in § 648.144(a)(1)(i) (i.e., 500 lb (226.8 kg) from January 1 through March 31, or 100 lb (45.4 kg) from April 1 through December 31), unless the vessel meets the gear restrictions of § 648.144(a).

(93) Purchase or otherwise receive for commercial purposes black sea bass caught in the EEZ from 35°15.3' N. lat., the latitude of Cape Hatteras Light, North Carolina, northward to the U.S.-Canada border, by other than a vessel with a moratorium permit not subject to the possession limit established pursuant to § 648.145 unless the vessel has not been issued a permit under this part and is fishing exclusively within the waters under the jurisdiction of any state.

(94) Possess or use rollers used in roller rig or rock hopper trawl gear that do not meet the minimum size requirement of § 648.144 if the person possesses black sea bass harvested in or from the EEZ from 35°15.3' N. lat., the latitude of Cape Hatteras Light, NC, northward to the U.S.-Canada border.

(95) Possess or use pot and trap gear not meeting the requirements of § 648.144 if the person possesses black sea bass harvested in or from the EEZ from 35°15.3' N. lat., the latitude of Cape Hatteras Light, NC, northward to the U.S.-Canada border.

(96) Purchase or otherwise receive for commercial purposes black sea bass landed for sale by a moratorium vessel in any state, or part thereof, north of 35°15.3' N. lat., after the effective date of the notification published in the FEDERAL REGISTER stating that the commercial annual quota has been harvested and the EEZ is closed to the harvest of black sea bass.

(97) Fail to comply with any of the provisions specified in § 648.56.

(98) Fish, or be in the areas described in § 648.81(j)(1), (k)(1), (l)(1), and (m)(1) on a fishing vessel with mobile gear

Fishery Conservation and Management

§ 648.14

during the time periods specified in § 648.81(j)(2), (k)(2), (l)(2), and (m)(2), except as provided in § 648.81(j)(2), (k)(2), (l)(2), and (m)(2).

(99) Fish, or be in the areas described in § 648.81(j)(1), (k)(1), and (l)(1) on a fishing vessel with lobster pot gear during the time periods specified in § 648.81(j)(2), (k)(2), and (l)(2).

(100) Deploy in or fail to remove lobster pot gear from the areas described in § 648.81(j)(1), (k)(1), and (l)(1), during the time periods specified in § 648.81(j)(2), (k)(2), and (l)(2).

(101) Enter, fail to remove gear from, or be in the areas described in § 648.81(g)(1) through (i)(1) during the time period specified, except as provided in § 648.81(d), (g)(2), (h)(2), and (i)(2).

(102) Enter or fish in the Gulf of Maine, Georges Bank, and Southern New England Regulated Mesh Areas, except as provided in §§ 648.80(a)(3)(vi) and (b)(2)(vi), and for purposes of transiting, provided that all gear (other than exempted gear) is stowed in accordance with § 648.23(b).

(103) Sell, barter, trade, or transfer, or attempt to sell, barter, trade, or transfer, other than solely for transport, any Atlantic herring, multispecies, or monkfish, unless the dealer or transferee has a valid dealer permit issued under § 648.6. A person who purchases and/or receives Atlantic herring at sea for his own personal use as bait, and does not have purse seine, mid-water trawl, pelagic gillnet, sink gillnet, or bottom trawl gear on board, is exempt from the requirement to possess an Atlantic herring dealer permit.

(104) Fish for, harvest, possess, or land regulated species in or from the closed areas specified in § 648.81(a) through (f), unless otherwise specified in § 648.81(c)(2)(iii), (f)(2)(i), (f)(2)(iii), or as authorized under § 648.85.

(105) Offload unshucked surf clams or ocean quahogs harvested in or from the EEZ outside the Maine mahogany quahog zone from vessels not capable of carrying cages, other than directly into cages.

(106) Offload unshucked surf clams harvested in or from the EEZ within the Maine mahogany quahog zone from vessels not capable of carrying cages, other than directly into cages.

(107) Offload unshucked ocean quahogs harvested in or from the EEZ within the Maine mahogany quahog zone from vessels not capable of carrying cages, other than directly into cages, unless the vessel has been issued a Maine mahogany quahog permit under this part and is not fishing for an individual allocation of quahogs under § 648.70.

(108) Purchase, receive for a commercial purpose other than transport to a testing facility, or process, or attempt to purchase, receive for commercial purpose other than transport to a testing facility, or process, outside Maine, ocean quahogs harvested in or from the EEZ within the Maine mahogany quahog zone, except at a facility participating in an overall food safety program, operated by the official state agency having jurisdiction, that utilizes food safety-based procedures including sampling and analyzing for PSP toxin consistent with procedures used by the State of Maine for such purpose.

(109) Land or possess ocean quahogs harvested in or from the EEZ within the Maine mahogany quahog zone after the effective date published in the FEDERAL REGISTER notifying participants that Maine mahogany quahog quota is no longer available, unless the vessel is fishing for an individual allocation of ocean quahogs under § 648.70.

(110) Fish for sea scallops in, or possess or land sea scallops from, the areas specified in §§ 648.58 and 648.61.

(111) Transit or be in the areas described in §§ 648.58 and 648.61 in possession of scallops, except when all fishing gear is unavailable for immediate use as defined in § 648.23(b), unless there is a compelling safety reason to be in such areas.

(112) Fish for, harvest, possess, or land in or from the EEZ, when fishing with trawl gear, any of the exempted species specified in § 648.80(a)(9)(i), unless such species were fished for or harvested by a vessel meeting the requirements specified in § 648.80(a)(5)(ii) or (a)(9)(ii).

(113) Land ocean quahogs outside Maine that are harvested in or from the EEZ within the Maine mahogany

quahog zone, except at a facility participating in an overall food safety program, operated by the official state agency having jurisdiction, that utilizes food safety-based procedures including sampling and analyzing for PSP toxin consistent with procedures used by the State of Maine for such purpose.

(114) Fish for, possess, or land species regulated under this part with or from a vessel that is issued a limited access permit under §§ 648.4(a)(1)(i), 648.4(a)(2)(i), 648.4(a)(3)(i), 648.4(a)(4)(i), 648.4(a)(5)(i), 648.4(a)(6)(i), or 648.4(a)(7)(i), and that has had the horsepower of such vessel or its replacement upgraded or increased in excess of the limitations specified in § 648.4(a)(1)(i)(E) and (F).

(115) Fish for, possess, or land species regulated under this part with or from a vessel issued a limited access permit under §§ 648.4(a)(1)(i), 648.4(a)(2)(i), 648.4(a)(3)(i), 648.4(a)(4)(i), 648.4(a)(5)(i), 648.4(a)(6)(i), or 648.4(a)(7)(i), that has had the length, GRT, or NT of such vessel or its replacement upgraded or increased in excess of the limitations specified in § 648.4(a)(1)(i)(E) and (F).

(116) Fish for, harvest, possess, or land any species of fish in or from the GOM/GB Inshore Restricted Roller Gear Area described in § 648.80(a)(3)(vii) with trawl gear where the diameter of any part of the trawl footrope, including discs, rollers or rockhoppers, is greater than 12 inches (30.5 cm).

(117) Fish for, land, or possess NE multispecies harvested with brush-sweep trawl gear unless the vessel has not been issued a multispecies permit and fishes for NE multispecies exclusively in state waters.

(118) Possess brush-sweep trawl gear while in possession of NE multispecies, unless the vessel has not been issued a multispecies permit and fishes for NE multispecies exclusively in state waters.

(119) Purchase or otherwise receive, except for transport, spiny dogfish from any person on board a vessel issued a spiny dogfish permit, unless the purchaser/receiver is in possession of a valid spiny dogfish dealer permit.

(120) Purchase or otherwise receive for a commercial purpose spiny dogfish landed by a federally permitted vessel

in any state, from Maine to Florida, after the effective date of notification published in the FEDERAL REGISTER stating that the semi-annual quota has been harvested and the EEZ is closed to the harvest of spiny dogfish.

(121) Enter, be on a fishing vessel in, or fail to remove gear from, the EEZ portion of the areas described in § 648.81(n) during the time periods specified, except as provided in § 648.81(d) and (n)(2).

(122) Fish for, catch, possess, retain or land *Loligo* squid, silver hake, or black sea bass in or from the areas and during the time periods described in § 648.122(a) or (b) while in possession of any trawl nets or netting that do not meet the minimum mesh restrictions or that are obstructed or constricted as specified in §§ 648.122 and 648.123(a), unless the nets or netting are stowed in accordance with § 648.123(b).

(123) Fish for, land, or possess NE multispecies harvested with the use of de-hookers (“crucifiers”) with less than 6-inch (15.2-cm) spacing between the fairlead rollers unless the vessel has not been issued a multispecies permit and fishes for NE multispecies exclusively in state waters.

(124) Possess or use de-hookers (“crucifiers”) with less than 6-inch (15.2-cm) spacing between the fairlead rollers while in possession of NE multispecies, unless the vessel has not been issued a multispecies permit and fishes for NE multispecies exclusively in state waters.

(125) For vessels issued a limited access NE multispecies permit, or those issued a limited access NE multispecies permit and a limited access monkfish permit (Category C, D, F, G, or H), but are not fishing under the limited access monkfish Category A or B provisions as allowed under § 648.92(b)(2), call into the DAS program prior to 1 hour before leaving port.

(126) Call in DAS in excess of that allocated, leased, or permanently transferred, in accordance with the restrictions and conditions of § 648.82.

(127) [Reserved]

(128) Fish for, harvest, possess or land any regulated NE multispecies from the areas specified in § 648.85(a)(1), unless in compliance with the restrictions and conditions specified in § 648.85(a)(3).

Fishery Conservation and Management

§ 648.14

(129) Enter or fish in the Western U.S./Canada Area or Eastern U.S./Canada Area specified in § 648.85(a)(1), unless declared into the area in accordance with § 648.85(a)(3)(ii).

(130) If declared into one of the areas specified in § 648.85(a)(1), fish during that same trip outside of the declared area, unless in compliance with the restrictions specified under § 648.85(a)(3)(ii)(B).

(131) If the vessel has been issued a limited access NE multispecies DAS permit, and is in the area specified in § 648.85(a), fail to comply with the VMS requirements in § 648.85(a)(3)(i).

(132) If fishing with trawl gear under a NE multispecies DAS in the Eastern U.S./Canada Area defined in § 648.85(a)(1)(ii), fail to fish with a haddock separator trawl or a flounder trawl net, as specified in § 648.85(a)(3)(iii).

(133) If fishing under a NE multispecies DAS in the Western U.S./Canada Area or Eastern U.S./Canada Area specified in § 648.85(a)(1), exceed the trip limits specified in § 648.85(a)(3)(iv), unless further restricted under § 648.85(b).

(134) If fishing under a NE multispecies DAS, enter or fish in the Eastern U.S./Canada Area specified in § 648.85(a)(1), if the area is closed as described in § 648.85(a)(3)(iv)(E), unless fishing in the Closed Area II Yellowtail Flounder SAP specified in § 648.85(b)(3).

(135) If fishing under a NE multispecies DAS in the Western U.S./Canada Area or Eastern U.S./Canada Area specified in § 648.85(a)(1), fail to report landings in accordance with § 648.85(a)(3)(v).

(136) If fishing under the Closed Area II Yellowtail Flounder SAP, fish for, harvest, possess or land any regulated NE multispecies from the area specified in § 648.85(b)(3)(ii), unless in compliance with the restrictions and conditions specified in §§ 648.85(b)(3)(i) through (xi).

(137) Enter or fish in Closed Area II as specified in § 648.81(b), unless declared into the area in accordance with § 648.85(b)(3)(v).

(138) Enter or fish in Closed Area II under the Closed Area II Yellowtail Flounder SAP outside of the season specified in § 648.85(b)(3)(iii).

(139) If fishing in the Closed Area II Yellowtail Flounder SAP specified in

§ 648.85(b)(3), exceed the number of trips specified under § 648.85(b)(3)(vi) or (vii).

(140) If fishing in the Closed Area II Yellowtail Flounder SAP specified in § 648.85(b)(3), exceed the trip limits specified in § 648.85(b)(3)(viii).

(141) If declared into the areas specified in § 648.85(b), enter or exit the declared areas more than once per trip.

(142) If the vessel has been issued a limited access NE multispecies DAS permit and is in the area specified in § 648.85(b)(8)(ii), fail to comply with the VMS requirements in § 648.85(b)(8)(v)(B).

(143) If fishing under a NE multispecies DAS, enter or fish in the Eastern U.S./Canada Haddock SAP Pilot Program Area specified in § 648.85(b)(8)(ii), unless declared into the area in accordance with § 648.85(b)(8)(v)(D).

(144) Enter or fish in the Eastern U.S./Canada Haddock SAP Pilot Program outside of the season specified in § 648.85(b)(8)(iv).

(145) If fishing under a NE multispecies DAS in the Eastern U.S./Canada Haddock SAP Pilot Program, exceed the possession limits specified in § 648.85(b)(8)(v)(H).

(146) If fishing under the Eastern U.S./Canada Haddock SAP Pilot Program, fish for, harvest, possess or land any regulated NE multispecies from the area specified in § 648.85(b)(8)(ii), unless in compliance with the restrictions and conditions specified in § 648.85(b)(8)(v)(A) through (G).

(147) If fishing under a NE multispecies DAS in the Eastern U.S./Canada Area specified in § 648.85(a)(1), both outside and inside of the areas specified for a SAP under § 648.85(b)(3) and (8), fail to abide by the DAS and possession restrictions under § 648.85(b)(8)(v)(A)(2) through (4).

(148) If fishing under a NE multispecies DAS in the Eastern U.S./Canada Haddock SAP Area specified in § 648.85(b)(8)(ii), during the season specified in § 648.85(b)(8)(iv), fail to comply with the restrictions specified in § 648.85(b)(8)(v).

(149) If fishing under a NE multispecies DAS in the Eastern U.S./Canada Area specified in § 648.85(a)(1)(ii), and not in a SAP specified in § 648.85(b) on the same trip, fail to comply with the requirements specified in § 648.85(a)(3).

(150) If fishing under a NE multispecies DAS in the Eastern U.S./Canada Area specified in § 648.85(a)(1)(ii), and in one of the SAPs specified in § 648.85(b)(3) or (8), fail to comply with the no discard and DAS flip provisions specified in § 648.85(b)(8)(v)(I) or the minimum Category A DAS requirement specified in § 648.85(b)(8)(v)(J).

(151) If fishing in the Eastern U.S./Canada Haddock SAP Pilot Program specified in § 648.85(b)(8), fail to comply with the reporting requirements specified in § 648.85(b)(8)(v)(G).

(152) If fishing under the Eastern U.S./Canada Haddock SAP Pilot Program specified in § 648.85(b)(8), fail to comply with the observer notification requirements specified in § 648.85(b)(8)(v)(C).

(153) If fishing under the SNE/MA Winter Flounder SAP, described in § 648.85(b)(6), fail to comply with the restrictions and conditions under § 648.85(b)(6)(i) through (iv).

(154) If fishing under an approved Sector, as authorized under § 648.87, fail to abide by the restrictions specified in § 648.87(b)(1).

(155) If fishing under an approved Sector, as authorized under § 648.87, fail to remain in the sector for the remainder of the fishing year as required under § 648.87(b)(1).

(156) If fishing under the Georges Bank (GB) Cod Hook Sector, as authorized under § 648.87, fish in the NE multispecies DAS program in a given fishing year, or if fishing under a NE multispecies DAS, fish under the GB Cod Hook Sector in a given fishing year, unless as otherwise provided under § 648.87(b)(1)(xii).

(157) If a vessel has agreed to participate in a Sector, fail to remain in the Sector for the entire fishing year, as required under § 648.87(b)(1)(xi).

(158) If a vessel is removed from a Sector for violation of the Sector rules, fish under the NE Multispecies regulations for non-Sector vessels.

(159) If fishing under the GB Cod Hook Sector, fish with gear other than jigs, demersal longline, or handgear.

(160) Land or possess on board a vessel, more than the possession or landing limits specified in § 648.88(a)(1), if fishing under an open access Handgear permit.

(161) Possess on board gear other than that specified under § 648.88(a)(2)(i), or fish with hooks greater than the number specified under § 648.88(a)(2)(iii), if fishing under an open access Handgear permit.

(162) Fish for, possess, or land regulated multispecies from March 1 to March 20, if issued an open access Handgear permit.

(163) Sell or transfer to another person for a commercial purpose, other than solely for transport, any NE multispecies harvested from the EEZ by a vessel issued a Federal NE multispecies permit, unless the transferee has a valid NE multispecies dealer permit.

(164) Sell or transfer to another person for a commercial purpose, other than solely for transport, any Atlantic sea scallops harvested from the EEZ by a vessel issued a Federal Atlantic sea scallop permit, unless the transferee has a valid Atlantic sea scallop dealer permit.

(165) If a vessel is fishing under a Category B DAS in the Closed Area II Yellowtail Flounder SAP specified in § 648.85(b)(3), the Regular B DAS Pilot Program specified in § 648.85(b)(6), or the Eastern U.S./Canada Haddock SAP Pilot Program specified in § 648.85(b)(8), remove any fish caught with any gear, including dumping the contents of a net, except on board the vessel.

(166) [Reserved]

(167) Fail to comply with requirements for herring processors/dealers that handle individual fish to separate out and retain all haddock offloaded from a Category 1 herring vessel, and to retain such catch for at least 12 hours with the vessel that landed the haddock clearly identified by name.

(168) Sell, purchase, receive, trade, barter, or transfer, or attempt to sell, purchase, receive, trade, barter, or transfer to another person any haddock separated out from a herring catch offloaded from a Category 1 herring vessel.

(169) Sell, purchase, receive, trade, barter, or transfer haddock, or attempt to sell, purchase, receive, trade, barter, or transfer haddock for, or intended for, human consumption landed by a Category 1 herring vessel as defined in § 648.2.

(b) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraph (a) of this section, it is unlawful for any owner or operator of a vessel holding a valid multispecies permit, or any person issued an operator's permit or issued a letter under § 648.4(a)(1)(i)(M)(3), to do any of the following:

(1) Land, or possess on board a vessel, more than the possession or landing limits specified in § 648.86 (a), (b), (c), (d), (g), and (h), or to violate any of the other provisions of § 648.86, unless otherwise specified in § 648.17.

(2) [Reserved]

(3) While fishing in the areas specified in § 648.86(g)(1)(i) or (g)(2)(i), with a NE multispecies Handgear A permit, or under the NE multispecies DAS program, or under the limited access monkfish Category C or D permit provisions, possess yellowtail flounder in excess of the limits specified under § 648.86(g)(1)(ii) or (g)(2)(ii), respectively, unless fishing under the recreational or charter/party regulations, or transiting in accordance with § 648.23(b).

(4) If fishing in the areas specified in § 648.86(g)(1)(i) or (g)(2)(i), with a NE multispecies Handgear A permit, or under the NE multispecies DAS program, or under the limited access monkfish Category C or D permit provisions, fail to comply with the requirements specified in § 648.81(g)(1)(ii) or (g)(2)(ii), respectively.

(c) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraphs (a) and (b) of this section, it is unlawful for any owner or operator of a vessel issued a valid limited access multispecies permit or a letter under § 648.4(a)(1)(i)(M)(3), unless otherwise specified in § 648.17, to do any of the following:

(1) Fish for, possess at any time during a trip, or land per trip more than the possession limit of NE multispecies specified in § 648.86(d) after using up the vessel's annual DAS allocation or when not participating in the DAS program pursuant to § 648.82, unless otherwise exempted under § 648.82(b)(5) or § 648.89.

(2) For purposes of DAS notification, if required or electing to have a VMS unit under § 648.10:

(i) Fail to have a certified, operational, and functioning VMS unit that meets the specifications of § 648.9 on board the vessel at all times.

(ii) Fail to comply with the notification, replacement, or any other requirements regarding VMS usage as specified in § 648.10(b).

(3) Combine, transfer, or consolidate DAS allocations, except as provided for under the DAS Leasing Program or the DAS Transfer Program, as specified under § 648.82(k) and (l), respectively.

(4) Fish for, possess, or land NE multispecies with or from a vessel that has had the horsepower of such vessel or its replacement upgraded or increased in excess of the limitations specified in § 648.4(a)(1)(i) (E) and (F).

(5) Fish for, possess, or land NE multispecies with or from a vessel that has had the length, GRT, or NT of such vessel or its replacement increased or upgraded in excess of limitations specified in § 648.4(a)(1)(i) (E) and (F).

(6) Fail to comply with any provision of the DAS notification program as specified in § 648.10.

(7) Possess or land per trip more than the possession or landing limits specified under § 648.86(a), (b), (c), (d), (g), and (h), and under § 648.82(b)(5) or (6), if the vessel has been issued a limited access NE multispecies permit.

(8) Fail to comply with the restrictions on fishing and gear specified in § 648.80(a)(3)(v), (a)(4)(v), (b)(2)(v), and (c)(2)(iv) if the vessel has been issued a limited access NE multispecies permit and fishes with hook-gear in areas specified in § 648.80(a), (b), or (c), unless allowed under § 648.85(b)(7)(iv)(F).

(9) Fail to declare, and be, out of the NE multispecies DAS program as required by § 648.82(g), using the procedure described under § 648.82(h), as applicable.

(10) Enter, fail to remove sink gillnet gear or gillnet gear capable of catching NE multispecies from, or be in the areas, and for the times, described in § 648.80(g)(6)(i) and (ii), except as provided in §§ 648.80(g)(6)(i) and 648.81(i).

(11) If the vessel has been issued a limited access NE multispecies permit and fishes under a NE multispecies DAS, fail to comply with gillnet requirements and restrictions specified in § 648.82(j).

§ 648.14

50 CFR Ch. VI (10–1–05 Edition)

(12) If the vessel has been issued a limited access Day gillnet category designation, fail to comply with the restriction and requirements specified in § 648.82(j)(1).

(13) If the vessel has been issued a limited access Trip gillnet category designation, fail to comply with the restrictions and requirements specified in § 648.82(j)(2).

(14) If the vessel has been issued a limited access NE multispecies permit and fishes under a NE multispecies DAS with gillnet gear, fail to comply with gillnet tagging requirements specified in §§ 648.80(a)(3)(iv)(B)(4), (a)(3)(iv)(C), (a)(4)(iv)(B)(3), (b)(2)(iv)(B)(3), and (c)(2)(v)(B)(3), or fail to produce, or cause to be produced, gillnet tags when requested by an authorized officer.

(15) Produce, or cause to be produced, gillnet tags under § 648.80(a)(3)(iv)(C), without the written confirmation from the Regional Administrator described in § 648.80(a)(3)(iv)(C).

(16) Tag a gillnet or use a gillnet tag that has been reported lost, missing, destroyed, or issued to another vessel.

(17) Sell, transfer, or give away gillnet tags that have been reported lost, missing, destroyed, or issued to another vessel.

(18) [Reserved]

(19) Fail to comply with the exemption specifications as described in § 648.86(b)(4).

(20) [Reserved]

(21) Fail to declare, and be, out of the non-exempt gillnet fishery as required by § 648.82(j)(1)(ii), using the procedure specified in § 648.82(h).

(22) Fail to comply with the exemption specifications as described in § 648.17.

(23) [Reserved]

(24) Enter port, while on a NE multispecies DAS trip, in possession of more than the allowable limit of cod specified in § 648.86(b)(1)(i), unless the vessel is fishing under the cod exemption specified in § 648.86(b)(4).

(25) Fail to remain in port for the appropriate time specified in § 648.86(b)(1)(ii)(A), except for transiting purposes, provided the vessel complies with § 648.86(b)(3).

(26) Enter port, while on a NE multispecies DAS trip, in possession of more

than the allowable limit of cod specified in § 648.86(b)(2)(ii) or (iii).

(27) Possess or land per trip more than the possession or landing limit specified under § 648.86(c).

(28) Participate in the DAS program pursuant to § 648.82 when carrying passengers for hire on board the vessel during any portion of a fishing trip.

(29) Enter, be on a fishing vessel in, or fail to remove gear from the areas described in § 648.81(d)(1), (e)(1), (f)(1), and (g)(1) during the time periods specified, except as provided in § 648.81(d)(2), (e)(2), (f)(2), (g)(2), and (i).

(30) If fishing with bottom tending mobile gear, fish in, enter, be on a fishing vessel in, the Essential Fish Habitat (EFH) Closure Areas described in § 648.81(h)(1)(i) through (vi).

(31) If the vessel has been issued a Charter/party permit or is fishing under charter/party regulations, fail to comply with the requirements specified in § 648.81(f)(2)(iii) when fishing in the areas described in § 648.81(d)(1) through (f)(1) during the time periods specified in those sections.

(32) [Reserved]

(33) Fail to remain in port for the appropriate time specified in § 648.86(b)(2)(iii)(A), except for transiting purposes, provided the vessel complies with § 648.86(b)(3).

(34) Lease NE multispecies DAS or use leased DAS that have not been approved for leasing by the Regional Administrator as specified in § 648.82(k).

(35) Provide false information on the application for NE multispecies DAS leasing, as required under § 648.82(k)(3).

(36) Act as lessor or lessee of a NE multispecies Category B DAS, or Category C DAS.

(37) Act as lessor or lessee of NE multispecies DAS, if the vessels are not in accordance with the size restrictions specified in § 648.82(k)(4)(ix).

(38) Sub-lease NE multispecies DAS.

(39) Lease more than the maximum number of DAS allowable under § 648.82(k)(4)(iv).

(40) Lease NE multispecies DAS to a vessel that does not have a valid limited access multispecies permit.

(41) Lease NE multispecies DAS associated with a Confirmation of Permit History.

Fishery Conservation and Management

§ 648.14

(42) Lease NE multispecies DAS if the number of unused allocated DAS is less than the number of DAS requested to be leased.

(43) Lease NE multispecies DAS in excess of the duration specified in § 648.82(k)(4)(viii).

(44) Transfer NE multispecies DAS or use transferred DAS that have not been approved for transfer by the Regional Administrator as specified under § 648.82(l).

(45) Provide false information on the application for NE multispecies DAS Transfer, as required under § 648.82(l)(2).

(46) Permanently transfer only a portion of a vessels total allocation of DAS.

(47) Permanently transfer NE multispecies DAS between vessels, if such vessels are not in accordance with the size restrictions specified in § 648.82(l)(1)(ii).

(48) If permanently transferring NE multispecies DAS to another vessel, fail to forfeit all state and Federal fishing permits, or fish in any state or Federal commercial fishery indefinitely.

(49) If fishing under the cod trip limit specified in § 648.86(b)(2)(ii), fail to obtain an annual declaration, or fish north of the exemption line specified in § 648.86(b)(4).

(50) Discard legal-sized regulated multispecies while fishing under a Regular B DAS in the Regular B DAS Pilot Program, as described in § 648.85(b)(6).

(51) If fishing under a Regular B DAS in the Regular B DAS Pilot Program, fail to comply with the DAS flip requirements of § 648.85(b)(6)(iv)(E) if the vessel harvests and brings on board more than the landing limit for a groundfish stock of concern specified in § 648.85(b)(6)(iv)(D).

(52) If fishing in the Regular B DAS Pilot Program, fail to comply with the restriction on DAS use as specified in § 648.82(d)(2)(i)(A).

(53) If fishing in the Eastern U.S./Canada Haddock SAP Pilot Area, and other portions of the Eastern U.S./Canada Area on the same trip, fail to comply with the restrictions in § 648.85(b)(8)(v)(A).

(54) If fishing in the Eastern U.S./Canada Haddock SAP Pilot Area, discard legal-sized cod while fishing under

a Category B DAS, as described in § 648.85(b)(8)(v)(I).

(55) If fishing in the Eastern U.S./Canada Haddock SAP Pilot Area under a Category B DAS, fail to comply with the DAS flip requirements of § 648.85(b)(8)(v)(I), if the vessel possesses more than the landing limit for cod specified in § 648.85(b)(8)(v)(F).

(56) If fishing in the Eastern U.S./Canada Haddock SAP Pilot Area under a Category B DAS, fail to have the minimum number of Category A DAS available as required under § 648.85(b)(8)(v)(J).

(57) If fishing in the Regular B DAS Pilot Program specified in § 648.85(b)(6), fail to comply with the requirements and restrictions specified in § 648.85(b)(6)(iv)(A) through (F), and (I).

(58) If fishing in the Regular B DAS Pilot Program specified in § 648.85(b)(6), fail to comply with the VMS requirement specified in § 648.85(b)(6)(iv)(A).

(59) If fishing in the Regular B DAS Pilot Program specified in § 648.85(b)(6), fail to comply with the observer notification requirement specified in § 648.85(b)(6)(iv)(B).

(60) If fishing in the Regular B DAS Pilot Program specified in § 648.85(b)(6), fail to comply with the VMS declaration requirement specified in § 648.85(b)(6)(iv)(C).

(61) If fishing in the Regular B DAS Pilot Program specified in § 648.85(b)(6), fail to comply with the landing limits specified in § 648.85(b)(6)(iv)(D).

(62) If fishing in the Regular B DAS Pilot Program specified in § 648.85(b)(6), fail to comply with the no discard and DAS flip requirements specified in § 648.85(b)(6)(iv)(E).

(63) If fishing in the Regular B DAS Pilot Program specified in § 648.85(b)(6), fail to comply with the minimum Category A DAS and Category B DAS accrual requirements specified in § 648.85(b)(6)(iv)(F).

(64) Use a Regular B DAS in the Regular B DAS Pilot Program specified in § 648.85(b)(6), if the program has been closed as specified in § 648.85(b)(6)(iv)(H) or (b)(6)(vi).

(65) If fishing in the Regular B DAS Pilot Program specified in § 648.85(b)(6), use a Regular B DAS in a stock area that has been closed, as specified in § 648.85(b)(6)(iv)(G).

§ 648.14

50 CFR Ch. VI (10–1–05 Edition)

(66) If fishing in the Regular B DAS Pilot Program specified in § 648.85(b)(6), fail to comply with the reporting requirements specified in § 648.85(b)(6)(iv)(I).

(67) If fishing in the CA I Hook Gear Haddock SAP specified in § 648.85(b)(7), fail to comply with the requirements and conditions specified in § 648.85(b)(7)(iv)(A) through (H).

(68) If fishing in the CA I Hook Gear Haddock Access Area specified in § 648.85(b)(7)(ii), fail to comply with the requirements and conditions specified in § 648.85(b)(7)(i) and (b)(7)(iv)(A) through (H).

(69) Fish in the CA I Hook Gear Haddock SAP specified in § 648.85(b)(7), outside of the season specified in § 648.85(b)(7)(iii).

(70) If fishing in the CA I Hook Gear Haddock SAP specified in § 648.85(b)(7), fail to comply with the DAS use restrictions specified in § 648.85(b)(7)(iv)(A).

(71) If fishing in the CA I Hook Gear Haddock SAP specified in § 648.85(b)(7), fail to comply with the VMS requirements specified in § 648.85(b)(7)(iv)(B).

(72) If fishing in the CA I Hook Gear Haddock SAP specified in § 648.85(b)(7), fail to comply with the observer notification requirements specified in § 648.85(b)(7)(iv)(C).

(73) If fishing in the CA I Hook Gear Haddock SAP specified in § 648.85(b)(7), fail to comply with the VMS declaration requirement specified in § 648.85(b)(7)(iv)(E).

(74) If fishing in the CA I Hook Gear Haddock SAP specified in § 648.85(b)(7), fail to comply with the gear restrictions specified in § 648.85(b)(7)(iv)(F).

(75) If fishing in the CA I Hook Gear Haddock SAP specified in § 648.85(b)(7), fail to comply with the landing limits specified in § 648.85(b)(7)(iv)(G).

(76) If fishing in the CA I Hook Gear Haddock SAP specified in § 648.85(b)(7), fail to comply with the reporting requirement specified in § 648.85(b)(7)(iv)(H).

(77) Fish in the CA I Hook Gear Haddock Access Area specified in § 648.85(b)(7)(ii), if that area is closed as specified in § 648.85(b)(7)(iv)(K) or (b)(7)(v).

(78) Fish in the U.S./Canada Haddock SAP Pilot Program specified in

§ 648.85(b)(8), if the SAP Pilot Program is closed as specified in § 648.85(b)(8)(v)(K) or (L).

(79) If fishing in the Closed Area II Yellowtail Flounder SAP specified in § 48.85(b)(3), fail to comply with the no discard and DAS flip provision specified under § 648.85(b)(3)(xi).

(80) Provide false information on the application to downgrade the DAS Leasing Program baseline, as required under § 648.82(k)(4)(xi).

(d) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraphs (a), (b), and (c) of this section, it is unlawful for any person owning or operating a vessel issued an open access multispecies handgear permit to do any of the following, unless otherwise specified in § 648.17:

(1) Possess, at any time during a trip, or land per trip, more than the possession limit of NE multispecies specified in § 648.88(a), unless the vessel is a charter or party vessel fishing under the charter/party restrictions specified in § 648.89.

(2) Use or possess on board, gear capable of harvesting NE multispecies, other than rod and reel, or handline gear, or tub-trawls, while in possession of, or fishing for, NE multispecies.

(3) Possess or land NE multispecies during the time period specified in § 648.88(a)(2).

(4) Violate any provision of the open access handgear permit restrictions as provided in § 648.88(a).

(e) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraphs (a) through (d) of this section, it is unlawful for any person owning or operating a vessel issued a scallop multispecies possession limit permit to possess or land more than the possession limit of NE multispecies specified in § 648.88(c), or to possess or land regulated species when not fishing under a scallop DAS, unless otherwise specified in § 648.17.

(f) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraph (a) of this section, it is unlawful for any person owning or operating a vessel issued a limited access scallop permit or a general scallop permit under § 648.4(a)(2) to land, or possess at or after landing, in-shell

Fishery Conservation and Management

§ 648.14

scallops smaller than the minimum shell height specified in § 648.50(a).

(g) In addition to the general prohibitions specified in § 600.725 of this chapter and the prohibitions specified in paragraphs (a) through (f) of this section, it is unlawful for the owner or operator of a charter or party boat issued a multispecies permit, or of a recreational vessel, as applicable, unless otherwise specified in § 648.17, to:

(1) Fish with gear in violation of the restrictions specified in § 648.89(a).

(2) Possess cod, haddock, and Atlantic halibut in excess of the possession limits specified in § 648.89(c).

(3) Sell, trade, barter, or otherwise transfer, or attempt to sell, trade, barter or otherwise transfer, NE multispecies for a commercial purpose as specified in § 648.89(d).

(h) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraphs (a) and (g) of this section, it is unlawful for any person owning or operating a vessel issued a limited access scallop permit under § 648.4(a)(2) to do any of the following:

(1) Possess, or land per trip, more than 400 lb (181.44 kg) of shucked, or 50 bu (17.62 hl) of in-shell scallops after using up the vessel's annual DAS allocation or when not participating under the DAS program pursuant to § 648.10, unless exempted from DAS allocations as provided in § 648.54.

(2) Land scallops on more than one trip per calendar day after using up the vessel's annual DAS allocation or when not participating under the DAS program pursuant to § 648.10, unless exempted from DAS allocations as provided in § 648.55.

(3) Fail to have an approved, operational, and functioning VMS unit that meets the specifications of § 648.9 on board the vessel at all times, unless the vessel is not subject to the VMS requirements specified in § 648.10.

(4) If the vessel is not subject to VMS requirements specified in § 648.10(a), fail to comply with the requirements of the call-in system specified in § 648.10(b).

(5) Combine, transfer, or consolidate DAS allocations, except as allowed for one-for-one area access trip exchanges as specified in § 648.60(a)(3)(iv).

(6) Have an ownership interest in more than 5 percent of the total number of vessels issued limited access scallop permits, except as provided in § 648.4(a)(2)(i)(H).

(7) Fish for, possess, or land scallops with or from a vessel that has had the horsepower of such vessel or its replacement upgraded or increased in excess of the limitations specified in § 648.4(a)(2)(i) (E) or (F).

(8) Fish for, possess, or land scallops with or from a vessel that has had the length, GRT, or NT of such vessel or its replacement increased or upgraded in excess of limitations specified in § 648.4(a)(2)(i) (E) or (F).

(9) Possess more than 40 lb (18.14 kg) of shucked, or 5 bu (176.2 l) of in-shell scallops, or participate in the DAS allocation program, while in the possession of trawl nets that have a maximum sweep exceeding 144 ft (43.9 m), as measured by the total length of the footrope that is directly attached to the webbing of the net, except as specified in § 648.51(a)(1).

(10) Fish under the DAS allocation program with, or have available for immediate use, trawl nets of mesh smaller than the minimum size specified in § 648.51(a)(2).

(11) Fish under the DAS allocation program with trawl nets that use chafing gear or other means or devices that do not meet the requirements of § 648.51(a)(3).

(12) Possess or use dredge gear that does not comply with any of the provisions and specifications in § 648.51(a) or (b).

(13) Participate in the DAS allocation program with more persons on board the vessel than the number specified in § 648.51(c), including the operator, when the vessel is not docked or moored in port, unless otherwise authorized by the Regional Administrator.

(14) Fish under the small dredge program specified in § 648.51(e), with, or while in possession of, a dredge that exceeds 10.5 ft (3.2 m) in overall width, as measured at the widest point in the bail of the dredge.

(15) Fish under the small dredge program specified in § 648.51(e) with more than five persons on board the vessel,

§ 648.14

including the operator, unless otherwise authorized by the Regional Administrator.

(16) Have a shucking or sorting machine on board a vessel that shucks scallops at sea while fishing under the DAS allocation program, unless otherwise authorized by the Regional Administrator.

(17) Refuse or fail to carry an observer after being requested to carry an observer by the Regional Administrator.

(18) Fail to provide an observer with required food, accommodations, access, and assistance, as specified in § 648.11.

(19) Fail to comply with any requirement for declaring in and out of the DAS allocation program specified in § 648.10.

(20) Fail to comply with any requirement for participating in the DAS Exemption Program specified in § 648.54.

(21) Fish with, possess on board, or land scallops while in possession of trawl nets, when fishing for scallops under the DAS allocation program, unless exempted as provided for in § 648.51(f).

(22) Fail to comply with the restriction on twine top described in § 648.51(b)(4)(iv).

(23) Fail to comply with any of the provisions and specifications of § 648.60.

(24) Possess or land more than 50 bu (17.62 hl) of in-shell scallops, as specified in § 648.52(d), once inside the VMS Demarcation Line by a vessel that, at any time during the trip, fished in or transited any area south of 42°20' N. lat., except as provided in § 648.54.

(25) Fish with, possess on board, or land scallops while in possession of trawl nets, when fishing for scallops under the DAS allocation program, unless exempted as provided for in § 648.51(f).

(26) Fail to comply with the restriction on twine top described in § 648.51(b)(4)(iv).

(27) Enter or be in the areas described in § 648.57 when fishing with scallop dredge gear under the Sea Scallop Area Access Program specified in § 648.58, with a net, net material, or any other material on the top half of the dredge with mesh size smaller than that specified in § 648.58(c)(7).

50 CFR Ch. VI (10–1–05 Edition)

(28) Fail to comply with any of the provisions and specifications of § 648.58.

(29) Possess or land per trip more than 50 bu (17.62 hectoliters (hl)) of in-shell scallops, as specified in § 648.52(d), once inside the VMS Demarcation Line by a vessel that, at any time during the trip, fished in or transited any area south of 42°20' N. Latitude, except as provided in § 648.54.

(30)–(31) [Reserved]

(32) Except as allowed in § 648.52(e), land in-shell scallops in or from the areas described in § 648.57 when fishing under a scallop DAS but not declared into the Sea Scallop Area Access Program or when fishing outside of the scallop DAS program.

(33) Except as allowed in § 648.52(e), possess in-shell scallops in the areas described in § 648.57 when fishing under a scallop DAS but not declared into the Sea Scallop Area Access Program or when fishing outside of the scallop DAS program, unless the vessel's fishing gear is unavailable for immediate use as defined in § 648.23(b), or, there is a compelling safety reason to be in such areas without all such gear being unavailable for immediate use.

(34) Declare and initiate a trip into the areas specified in § 648.59(b) through (d) after the effective date of the notification published in the FEDERAL REGISTER stating that the yellowtail flounder TAC has been harvested as specified in § 648.85(c).

(35) Retain yellowtail flounder in the areas specified in § 648.59(b) through (d) after the effective date of the notification published in the FEDERAL REGISTER stating that the yellowtail flounder TAC has been harvested as specified in § 648.85(c).

(i) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraphs (a), (f), and (g) of this section, it is unlawful for any person owning or operating a vessel issued a general scallop permit to do any of the following:

(1) Fish for or land per trip, or possess at any time, in excess of 400 lb (181.4 kg) of shucked or 50 bu (17.6 hl) of in-shell scallops.

(2) Fish for, possess, or land scallops on more than one trip per calendar day.

Fishery Conservation and Management

§ 648.14

(3) Possess or use dredge gear that does not comply with any of the provisions or specification in § 648.51(a) or (b).

(4) Refuse, or fail, to carry an observer after being requested to carry an observer by the Regional Administrator.

(5) Fail to provide an observer with required food, accommodations, access, and assistance, as specified in § 648.11.

(6) Fail to comply with the VMS requirements specified in §§ 648.10 and 648.60.

(7) Fail to comply with the requirements specified in § 648.60.

(8) Declare and initiate a trip into the areas specified in § 648.59(b) through (d) after the effective date of the notification published in the FEDERAL REGISTER stating that the general category scallop TAC has been harvested as specified in § 648.60.

(9) Declare and initiate a trip into the areas specified in § 648.59(b) through (d) after the effective date of the notification published in the FEDERAL REGISTER stating that the number of general category trips have been taken as specified in § 648.60.

(10) Declare or initiate a trip into areas specified in § 648.59(b) through (d) after the effective date of the notification published in the FEDERAL REGISTER stating that the yellowtail flounder TAC has been harvested as specified in § 648.85(c).

(j) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraph (a) of this section, unless participating in a research activity as described in § 648.100(f), it is unlawful for any person owning or operating a vessel issued a summer flounder permit (including a moratorium permit) to do any of the following:

(1) Possess 100 lb or more (45.4 kg or more) of summer flounder between May 1 and October 31, or 200 lb or more (90.7 kg or more) of summer flounder between November 1 and April 30, unless the vessel meets the minimum mesh size requirement specified in § 648.104(a), or is fishing in the exempted area with an exemption permit as specified in § 648.104(b)(1), or holds an exemption permit and is in transit from the exemption area with nets properly stowed as specified in

§ 648.104(f), or is fishing with exempted gear specified in § 648.104(b)(2).

(2) Possess summer flounder in other than a box specified in § 648.105(d) if fishing with nets having mesh that does not meet the minimum mesh-size requirement specified in § 648.104(a), unless the vessel is fishing pursuant to the exemptions specified in § 648.104(b).

(3) Land summer flounder for sale in a state after the effective date of the notification in the FEDERAL REGISTER notifying permit holders that commercial quota is no longer available in that state.

(4) Fish with or possess nets or netting that do not meet the minimum mesh requirement, or that are modified, obstructed or constricted, if subject to the minimum mesh requirement specified in § 648.104, unless the nets or netting are stowed in accordance with § 648.104(f).

(5) Fish with or possess nets or netting that do not meet the minimum mesh requirement, or that are modified, obstructed or constricted, if fishing with an exempted net described in § 648.104, unless the nets or netting are stowed in accordance with § 648.104(f).

(6) Fish west or south, as appropriate, of the line specified in § 648.104(b)(1) if exempted from the minimum mesh requirement specified in § 648.104 by a summer flounder exemption permit.

(7) Sell or transfer to another person for a commercial purpose, other than transport, any summer flounder, unless the transferee has a valid summer flounder dealer permit.

(8) Carry passengers for hire, or carry more than three crew members for a charter boat or five crew members for a party boat, while fishing commercially pursuant to a summer flounder moratorium permit.

(9) Offload, remove, or otherwise transfer, or attempt to offload, remove or otherwise transfer summer flounder from one vessel to another, unless that vessel has not been issued a summer flounder permit and fishes exclusively in state waters.

(k) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraph (a) of this section, unless participating in a research activity as described in § 648.120(e), it is

§ 648.14

unlawful for any person owning or operating a vessel issued a scup permit (including a moratorium permit) to do any of the following:

(1) Possess scup in excess of the threshold amount specified in § 648.123, unless the vessel meets the minimum mesh-size restrictions specified in § 648.123.

(2) Fail to keep scup separate from other species if fishing with nets having mesh that does not meet the minimum mesh-size restrictions specified in § 648.123(a).

(3) Land scup for sale after the effective date of the notification published in the FEDERAL REGISTER stating that the commercial quota has been harvested.

(4) Possess nets or netting that do not meet the minimum mesh restrictions or that are modified, obstructed or constricted, if subject to the minimum mesh requirements specified in § 648.123(a), unless the nets or netting are stowed in accordance with § 648.23(b).

(5) Fish with nets or netting that do not meet the minimum mesh restriction or that are modified, obstructed or constricted while in possession of scup in excess of the threshold amount specified in § 648.123.

(6) As of January 1, 1997, sell or transfer to another person for a commercial purpose, other than transport on land, any scup, unless the transferee has a dealer permit issued under § 648.6.

(7) Carry passengers for hire, or carry more than three crew members for a charter boat or five crew members for a party boat, while fishing for scup under the terms of a moratorium permit issued pursuant to § 648.4(a)(6).

(8) Use a scup pot or trap that does not have the hinges and fasteners made of degradable materials as specified in § 648.123.

(9) Use a scup trap or pot that does not have a minimum escape vent of the size specified in § 648.123.

(10) Use roller rig trawl gear equipped with rollers greater than the size specified in § 648.123.

(11) Possess scup in, or harvested from, the EEZ in an area closed, or before or after a season established pursuant to § 648.122.

50 CFR Ch. VI (10–1–05 Edition)

(12) Use a scup trap or pot that is not marked in accordance with § 648.123(b)(3).

(13) Transfer scup at sea, or attempt to transfer at sea to any vessel, any scup taken from the EEZ, unless in compliance with the provisions of § 648.13(i).

(1) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraph (a) of this section, unless participating in a research activity as described in § 648.120(e), it is unlawful for the owner or operator of a party or charter boat issued a scup permit (including a moratorium permit), when the boat is carrying passengers for hire or carrying more than three crew members if a charter boat or more than five members if a party boat to:

(1) Possess scup in excess of the possession limit established pursuant to § 648.125.

(2) Fish for scup other than during a season established pursuant to § 648.122.

(3) Sell scup or transfer scup to another person for a commercial purpose.

(4) Possess scup that do not meet the minimum fish size specified in § 648.124(b).

(m) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraph (a) of this section, unless participating in a research activity as described in § 648.100(f), it is unlawful for the owner and operator of a party or charter boat issued a summer flounder permit (including a moratorium permit), when the boat is carrying passengers for hire or carrying more than three crew members if a charter boat or more than five members if a party boat, to:

(1) Possess summer flounder in excess of the possession limit established pursuant to § 648.105.

(2) Fish for summer flounder other than during a season specified pursuant to § 648.102.

(3) Sell or transfer summer flounder to another person for a commercial purpose.

(n) It is unlawful to violate any terms of a letter authorizing experimental fishing pursuant to § 648.12 or to fail to keep such letter aboard the vessel during the time period of the experimental fishing.

(o) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraph (a) of this section, it is unlawful for any person owning or operating a vessel issued a surf clam and ocean quahog permit or issued a surf clam and ocean quahog allocation permit under § 648.70, to land or possess any surf clams or ocean quahogs in excess of, or without, an individual allocation, or to transfer any surf clams or ocean quahogs to any person for a commercial purpose other than transport, unless that person has a surf clam and ocean quahog processor/dealer permit.

(p) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraph (a) of this section, unless participating in a research activity as described in § 648.21(g), it is unlawful for any person owning or operating a vessel issued a valid mackerel, squid, and butterfish fishery permit, or issued an operator's permit, to do any of the following:

(1) Possess more than the incidental catch allowance of *Loligo* or butterfish, unless issued a *Loligo* squid and butterfish fishery moratorium permit.

(2) Possess more than the incidental catch allowance of *Illex* squid unless issued an *Illex* squid moratorium permit.

(3) Take, retain, possess, or land mackerel, squid or butterfish in excess of a possession allowance specified under § 648.22.

(4) Take, retain, possess, or land mackerel, squid or butterfish after a total closure specified under § 648.22.

(5) Fish with or possess nets or netting that do not meet the minimum mesh requirements for *Loligo* or butterfish specified in § 648.23(a), or that are modified, obstructed, or constricted, if subject to the minimum mesh requirements, unless the nets or netting are stowed in accordance with § 648.23(b) or the vessel is fishing under an exemption specified in § 648.23(a).

(6) Transfer squid or butterfish at sea to another vessel unless that other vessel has been issued a valid *Loligo* and butterfish or *Illex* moratorium permit and are transferring the species for which the vessel is permitted or a valid squid/butterfish incidental catch permit and a letter of authorization by the Regional Administrator.

(7) Fail to comply with any measures implemented pursuant to § 648.21.

(8) Carry passengers for hire while fishing commercially under a mackerel, squid, and butterfish fishery permit.

(9) Fail to carry on board a letter of authorization, if fishing in an experimental fishery pursuant to § 648.12.

(10) Fish for, retain, or possess Atlantic mackerel in or from the EEZ with a vessel that exceeds either 165 ft (50.3 m) in length overall and 750 GRT, or a shaft horsepower of 3000 shp, except for the retention and possession of Atlantic mackerel for processing by a vessel holding a valid at-sea processor permit pursuant to § 648.6(a)(2).

(11) Possess 5,000 lb (2.27 mt) or more of butterfish unless the vessel meets the minimum mesh size requirement specified in § 648.23(a)(2).

(q) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraph (a) of this section, unless participating in a research activity as described in § 648.21(g), it is unlawful for the owner and operator of a party or charter boat issued a mackerel, squid, and butterfish fishery permit (including a moratorium permit), when the boat is carrying passengers for hire, to do any of the following:

(1) Violate any recreational fishing measures established pursuant to § 648.21(d).

(2) Sell or transfer mackerel, squid, or butterfish to another person for a commercial purpose.

(r) [Reserved]

(s) Any person possessing or landing per trip, scallops in excess of 40 lb (18.1 kg) of shucked, or 5 bu (176.1 L) of in-shell scallops, at or prior to the time when those scallops are received or possessed by a dealer, is subject to all of the scallop prohibitions specified in this section, unless the scallops were harvested by a vessel without a scallop permit that fishes for scallops exclusively in state waters.

(t) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraphs (a) through (h) of this section, it is unlawful for any owner or operator of a vessel issued a valid open access multispecies permit to possess or land any regulated species as defined in § 648.2, or to violate any

§ 648.14

50 CFR Ch. VI (10–1–05 Edition)

applicable provisions of § 648.88, unless otherwise specified in § 648.17.

(u) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraph (a) of this section, unless participating in a research activity as described in § 648.140(e), it is unlawful for any person owning or operating a vessel issued a black sea bass permit (including a moratorium permit) to do any of the following:

(1) Fish for, catch, possess, land, or retain black sea bass in excess of the amount specified in § 648.144(a)(1)(i) (i.e. 500 lb (226.8 kg) from January 1 through March 31, or 100 lb (45.4 kg) from April 1 through December 31), unless the vessel meets the minimum mesh requirement specified in § 648.144 (a).

(2) Possess black sea bass in other than a box specified in § 648.145(d) if fishing with nets having mesh that does not meet the minimum mesh-size requirement specified in § 648.144 (a).

(3) Land black sea bass for sale in any state, or part thereof, north of 35°15.3' N. lat. after the effective date of the notification published in the FEDERAL REGISTER stating that the commercial annual quota has been harvested and the EEZ is closed to the harvest of black sea bass.

(4) Fish with or possess nets or netting that do not meet the minimum mesh requirement, or that are modified, obstructed or constricted, if subject to the minimum mesh requirement specified in § 648.144, unless the nets or netting are stowed in accordance with § 648.23(b).

(5) Fish with or possess rollers used in roller rig or rock hopper trawl gear that do not meet the requirements specified in § 648.144(a)(5).

(6) Fish with or possess pots or traps that do not meet the requirements specified in § 648.144(b).

(7) Sell or transfer to another person for a commercial purpose, other than transport on land, any black sea bass, unless the transferee has a valid black sea bass dealer permit.

(8) Carry passengers for hire, or carry more than three crew members for a charter boat or five crew members for a party boat, while fishing commercially pursuant to a black sea bass moratorium permit.

(9) Possess, retain, or land black sea bass harvested in or from the EEZ in excess of the commercial possession limit established at § 648.140.

(10) Land black sea bass for sale in any state south of North Carolina.

(11) Possess black sea bass after the effective date of the notification published in the FEDERAL REGISTER stating that the commercial annual quota has been harvested and the EEZ is closed to the harvest of black sea bass, unless the vessel has been issued a Southeast Region Snapper/Grouper Permit and fishes for and possess black sea bass south of 35°15.3' N. lat.

(v) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraph (a) of this section, unless participating in a research activity as described in § 648.140(e), it is unlawful for the owner and operator of a party or charter boat issued a black sea bass permit (including a moratorium permit), when the boat is carrying passengers for hire or carrying more than three crew members if a charter boat or more than five members if a party boat, to:

(1) Possess black sea bass in excess of the possession limit established pursuant to § 648.145.

(2) Fish for black sea bass other than during a season specified pursuant to § 648.142.

(3) Sell black sea bass or transfer black sea bass to another person for a commercial purpose.

(w) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraph (a) of this section, unless participating in a research activity as described in § 648.160(h), it is unlawful for any person to do any of the following:

(1) Possess in or harvest from the EEZ, Atlantic bluefish, in excess of the daily possession limit found at § 648.164, unless the vessel is issued a valid Atlantic bluefish vessel permit under § 648.4(a)(8)(i) and the permit is on board the vessel and has not been surrendered, revoked, or suspended.

(2) Purchase, possess or receive for a commercial purpose, or attempt to purchase, possess, or receive for a commercial purpose, in the capacity of a dealer, except solely for transport on land, Atlantic bluefish taken from a

fishing vessel that were harvested in or from the EEZ unless issued, and in possession of, a valid Atlantic bluefish fishery dealer permit issued under § 648.6(a).

(3) Sell, barter, trade or transfer, or attempt to sell, barter, trade or otherwise transfer, other than for transport, Atlantic bluefish that were harvested in or from the EEZ, unless the vessel has been issued a valid bluefish permit under § 648.4(a)(8)(i).

(4) Land Atlantic bluefish for sale in a state after the effective date of the notification in the FEDERAL REGISTER, pursuant to § 648.161(b), which notifies permit holders that the commercial quota is no longer available in that state.

(5) Carry passengers for hire, or carry more than three crew members for a charter boat or five crew members for a party boat, while fishing commercially pursuant to an Atlantic bluefish permit issued under § 648.4(a)(8).

(6) Land Atlantic bluefish for sale after the effective date of the notification in the FEDERAL REGISTER pursuant to § 648.161(a), which notifies permit holders that the Atlantic bluefish fishery is closed.

(7) To purchase or otherwise receive for a commercial purpose bluefish harvested from the EEZ after the effective date of the notification published in the FEDERAL REGISTER stating that the commercial quota has been harvested.

(8) To purchase or otherwise receive for a commercial purpose bluefish harvested by a federally permitted vessel after the effective date of the notification published in the FEDERAL REGISTER stating that the commercial quota has been harvested.

(x) For purposes of this section, the following presumptions apply:

(1) *Surf clams and ocean quahogs.* (i) Possession of surf clams or ocean quahogs on the deck of any fishing vessel in closed areas, or the presence of any part of a vessel's gear in the water in closed areas, or the presence of any part of a vessel's gear in the water more than 12 hours after an announcement closing the entire fishery becomes effective, is prima facie evidence that such vessel was fishing in violation of the provisions of the Magnuson Act and these regulations.

(ii) Surf clams or ocean quahogs landed from a trip for which notification was provided under § 648.15(b) or § 648.70(b) are deemed to have been harvested in the EEZ and count against the individual's annual allocation unless the vessel has a valid Maine mahogany quahog permit issued pursuant to § 648.4(a)(4)(i) and is not fishing for an individual allocation under § 648.70.

(iii) Surf clams or ocean quahogs found in cages without a valid state tag are deemed to have been harvested in the EEZ and are deemed to be part of an individual's allocation, unless the vessel has a valid Maine mahogany quahog permit issued pursuant to § 648.4(a)(4)(i) and is not fishing for an individual allocation under § 648.70; or, unless the preponderance of available evidence demonstrates that he/she has surrendered his/her surf clam and ocean quahog permit issued under § 648.4 and he/she conducted fishing operations exclusively within waters under the jurisdiction of any state. Surf clams and ocean quahogs in cages with a Federal tag or tags, issued and still valid pursuant to this section, affixed thereto are deemed to have been harvested by the individual allocation holder to whom the tags were issued or transferred under § 648.70) or § 648.75(b).

(2) *Scallops.* Scallops that are possessed or landed at or prior to the time when the scallops are received by a dealer, or scallops that are possessed by a dealer, are deemed to be harvested from the EEZ, unless the preponderance of all submitted evidence demonstrates that such scallops were harvested by a vessel without a scallop permit and fishing exclusively for scallops in state waters.

(3) *Summer flounder.* All summer flounder retained or possessed on a vessel issued a permit under § 648.4 are deemed to have been harvested in the EEZ.

(4) *NE multispecies.* (i) Regulated species possessed for sale that do not meet the minimum sizes specified in § 648.83 for sale are deemed to have been taken or imported in violation of these regulations, unless the preponderance of all submitted evidence demonstrates that such fish were harvested by a vessel not issued a permit under this part and fishing exclusively within state waters,

§ 648.14

or by a vessel that fished exclusively in the NAFO Regulatory Area. This presumption does not apply to fish being sorted on deck.

(ii) Regulated species possessed for sale that do not meet the minimum sizes specified in § 648.83 for sale are deemed taken from the EEZ or imported in violation of these regulations, unless the preponderance of all submitted evidence demonstrates that such fish were harvested by a vessel not issued a permit under this part and fishing exclusively within state waters, or by a vessel that fished exclusively in the NAFO Regulatory Area. This presumption does not apply to fish being sorted on deck.

(iii) All small-mesh multispecies retained or possessed on a vessel issued any permit under § 648.4 are deemed to have been harvested from the EEZ.

(5) *Mackerel, squid, and butterfish.* All mackerel and butterfish possessed on board a party or charter boat issued a mackerel, squid, and butterfish fishery permit are deemed to have been harvested from the EEZ.

(6) *Scup.* All scup retained or possessed on a vessel issued a permit under § 648.4 are deemed to have been harvested in the EEZ.

(7) *Black sea bass.* All black sea bass retained or possessed on a vessel issued a permit under § 648.4 are deemed to have been harvested in the EEZ, unless the vessel also has been issued a Southeast Region Snapper/Grouper permit and fishes for, retains, or possesses black sea bass south of 35°15.3' N. lat.

(8) *Monkfish.* All monkfish retained or possessed on a vessel issued any permit under § 648.4 are deemed to have been harvested from the EEZ, unless the preponderance of evidence demonstrates that such fish were harvested by a vessel that fished exclusively in the NAFO Regulatory Area, as authorized under § 648.17.

(9) All bluefish possessed on board a party or charter vessel issued a permit under § 648.4(a)(8)(ii) are deemed to have been harvested from the EEZ.

(10) *Atlantic herring.* All Atlantic herring retained or possessed on a vessel issued any permit under § 648.4 are deemed to have been harvested from the EEZ, unless the preponderance of all submitted evidence demonstrates

50 CFR Ch. VI (10–1–05 Edition)

that such Atlantic herring were harvested by a vessel fishing exclusively in state waters.

(11) *Tilefish.* All tilefish retained or possessed on a vessel issued any permit under § 648.4 are deemed to have been harvested in or from the tilefish management unit, unless the preponderance of all submitted evidence demonstrates that such tilefish were harvested by a vessel fishing exclusively in state waters.

(12) *Red crab.* All red crab retained or possessed on a vessel issued any permit under § 648.4 are deemed to have been harvested in or from the Red Crab Management Unit, unless the preponderance of all submitted evidence demonstrates that such red crab were harvested by a vessel fishing exclusively outside of the Red Crab Management Unit or in state waters.

(13) *Skates.* All skates retained or possessed on a vessel are deemed to have been harvested in or from the Skate Management Unit, unless the preponderance of all submitted evidence demonstrates that such skates were harvested by a vessel, that has not been issued a Federal skate permit, fishing exclusively outside of the EEZ portion of the Skate Management Unit or only in state waters.

(y) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraph (a) of this section, it is unlawful for any person owning or operating a vessel that engages in fishing for monkfish to do any of the following, unless otherwise fishing in accordance with, and exempted under, the provisions of § 648.17:

(1) Fish for, possess, retain or land monkfish, unless:

(i) The monkfish are being fished for, or were harvested, in or from the EEZ by a vessel issued a valid monkfish permit under § 648.4(a)(9); or

(ii) The monkfish were harvested by a vessel not issued a Federal monkfish permit that fishes for or possesses monkfish exclusively in state waters; or

(iii) The monkfish were harvested in or from the EEZ by a vessel not issued a Federal monkfish permit that engaged in recreational fishing; or

Fishery Conservation and Management

§ 648.14

(iv) The monkfish were harvested from the NAFO Regulatory Area in accordance with the provisions specified under § 648.17.

(2) Land, offload, or otherwise transfer, or attempt to land, offload, or otherwise transfer, monkfish from one vessel to another vessel, unless each vessel has not been issued a monkfish permit and fishes exclusively in state waters.

(3) Sell, barter, trade, or otherwise transfer, or attempt to sell, barter, trade, or otherwise transfer for a commercial purpose, any monkfish without having been issued a valid monkfish vessel permit, unless the vessel fishes for monkfish exclusively in state waters, or exclusively in the NAFO Regulatory Area in accordance with the provisions specified under § 648.17.

(4) Operate or act as an operator of a vessel fishing for, possessing, retaining, or landing monkfish in or from the EEZ without having been issued and possessing a valid operator permit pursuant to § 648.5, and this permit is on-board the vessel.

(5) Fish with, use, or have on board, while fishing under a monkfish DAS within the Northern Fishery Management Area or Southern Fishery Management Area as described in § 648.91(a) and (b), nets with mesh size smaller than the minimum mesh size specified in § 648.91(c).

(6) Violate any provision of the monkfish incidental catch permit restrictions as provided in §§ 648.4(a)(9)(ii) or 648.94(c).

(7) Fail to comply with the area restrictions applicable to limited access Category G and H vessels specified under § 648.92(b)(9).

(8) Purchase, possess, or receive as a dealer, or in the capacity of a dealer, monkfish in excess of the possession or trip limits specified in § 648.94 as is applicable to a vessel issued a monkfish limited access or incidental catch permit.

(9) Fail to comply with the monkfish size limit restrictions of § 648.93 when issued a valid monkfish permit under § 648.4(a)(9).

(10) Fail to comply with the monkfish possession limits and landing restrictions, specified under § 648.94 when

issued a valid monkfish permit under § 648.4(a)(9).

(11) Fail to comply with the monkfish DAS provisions specified at § 648.92 when issued a valid limited access monkfish permit, and fishing for, possessing, or landing monkfish in excess of the incidental catch limits specified at § 648.94 (c).

(12) If carrying a VMS unit under § 648.10:

(i) Fail to have a certified, operational, and functioning VMS unit that meets the specifications of § 648.9 on board the vessel at all times.

(ii) Fail to comply with the notification, replacement, or any other requirements regarding VMS usage as specified in § 648.10.

(13) Combine, transfer, or consolidate monkfish DAS allocations.

(14) Fish for, possess, or land monkfish with or from a vessel that has had the horsepower of such vessel or its replacement upgraded or increased in excess of the limitations specified in § 648.4(a)(9)(i)(E) and (F).

(15) Fish for, possess, or land monkfish with or from a vessel that has had the length, GRT, or NT of such vessel or its replacement upgraded or increased in excess of the limitations specified in § 648.4(a)(9)(i)(E) and (F).

(16) Fail to comply with any provision of the DAS notification program as specified in § 648.10.

(17) If the vessel has been issued a valid limited access monkfish permit, and fishes under a monkfish DAS, fail to comply with gillnet requirements and restrictions specified in § 648.92(b)(8).

(18) Fail to produce gillnet tags when requested by an authorized officer.

(19) Tagging a gillnet with or otherwise using or possessing a gillnet tag that has been reported lost, missing, destroyed, or issued to another vessel, or using or possessing a false gillnet tag.

(20) Selling, transferring, or giving away gillnet tags that have been reported lost, missing, destroyed, or issued to another vessel.

(21) Fail to comply with the area declaration requirements specified at §§ 648.93(b)(2) and 648.94(f) when fishing under a scallop, NE multispecies, or monkfish DAS exclusively in the

NFMA under the less restrictive monkfish possession limits of that area.

(z) *Small-mesh multispecies.* (1) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraph (a) of this section, and subject to paragraph (a)(32) of this section, it is unlawful for any person owning or operating a vessel issued a valid Federal multispecies permit to land, offload, or otherwise transfer, or attempt to land, offload, or otherwise transfer, small-mesh multispecies from one vessel to another in excess of the limits specified in § 648.13.

(2) [Reserved]

(aa) In addition to the general prohibitions specified in § 600.725 of this chapter, it is unlawful for any person owning or operating a vessel issued a valid spiny dogfish permit or issued an operator's permit to do any of the following:

(1) Sell, barter, trade or transfer, or attempt to sell, barter, trade or otherwise transfer, other than for transport, spiny dogfish, unless the dealer or transferee has a dealer permit issued under § 648.6(a).

(2) Fish for or possess spiny dogfish harvested in or from the EEZ after the effective date of the notification published in the FEDERAL REGISTER stating that the semi-annual quota has been harvested and that the EEZ is closed to the harvest of spiny dogfish.

(3) Land spiny dogfish for a commercial purpose after the effective date of the notification published in the FEDERAL REGISTER stating that the semi-annual quota has been harvested and that the EEZ is closed to the harvest of spiny dogfish.

(4) Violate any of the provisions prohibiting finning in §§ 600.1203 and 600.1204, part 600, subpart N that are applicable to the dogfish fishery.

(5)–(6) [Reserved]

(7) Possess more than the possession limit of spiny dogfish specified under § 648.235. The possession limit is the maximum amount that may be landed in any 1 calendar day.

(bb) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraph (a) of this section, it is unlawful for any person to do any of the following:

(1) Fish for, possess, retain or land Atlantic herring, unless:

(i) The Atlantic herring are being fished for or were harvested in or from the EEZ by a vessel holding a valid Atlantic herring permit under this part, and the operator on board such vessel has been issued an operator permit that is on board the vessel; or

(ii) The Atlantic herring were harvested by a vessel not issued an Atlantic herring permit that was fishing exclusively in state waters; or

(iii) The Atlantic herring were harvested in or from the EEZ by a vessel engaged in recreational fishing; or

(iv) Unless otherwise specified in accordance with § 648.17.

(2) Operate, or act as an operator of, a vessel with an Atlantic herring permit, or a vessel fishing for or possessing Atlantic herring in or from the EEZ, unless the operator has been issued, and is in possession of, a valid operator permit.

(3) Purchase, possess, receive, or attempt to purchase, possess, or receive, as a dealer, or in the capacity of a dealer, Atlantic herring that were harvested in or from the EEZ, without having been issued, and in possession of, a valid Atlantic herring dealer permit.

(4) Purchase, possess, receive, or attempt to purchase, possess, or receive, as a processor, or in the capacity of a processor, Atlantic herring from a fishing vessel with an Atlantic herring permit or from a dealer with an Atlantic herring dealer permit, without having been issued, and in possession of, a valid Atlantic herring processor permit.

(5) Sell, barter, trade, or otherwise transfer, or attempt to sell, barter, trade, or otherwise transfer, for a commercial purpose, any Atlantic herring, unless the vessel has been issued an Atlantic herring permit, or unless the Atlantic herring were harvested by a vessel without an Atlantic herring permit that fished exclusively in state waters.

(6) Purchase, possess, or receive, for a commercial purpose, or attempt to purchase, possess or receive, for a commercial purpose, Atlantic herring caught by a vessel without an Atlantic herring permit, unless the Atlantic herring were harvested by a vessel

Fishery Conservation and Management

§ 648.14

without an Atlantic herring permit that fished exclusively in state waters.

(7) Possess, transfer, receive, or sell, or attempt to transfer, receive, or sell > 2,000 lb (907.2 kg) of Atlantic herring per trip, or land, or attempt to land > 2,000 lb (907.2 kg) of Atlantic herring per day in or from an area of the EEZ subject to restrictions pursuant to § 648.202(a).

(8) Possess, transfer, receive, or sell, or attempt to transfer, receive, or sell > 2,000 lb (907.2 kg) of Atlantic herring per trip, or land, or attempt to land > 2,000 lb (907.2 kg) of Atlantic herring per day in or from state waters subject to restrictions pursuant to § 648.202(a), if the vessel has been issued a valid Atlantic herring permit.

(9) Transfer or attempt to transfer Atlantic herring to a Canadian transshipment vessel that is permitted in accordance with Pub. L. 104-297 after the amount of herring transshipped equals the amount of the BT specified pursuant to § 648.200.

(10) Transit an area of the EEZ that is subject to a closure to directed fishing for Atlantic herring or restrictions pursuant to § 648.202(a) with > 2,000 lb (907.2 kg) of herring on board, unless all fishing gear is stowed as specified by § 648.23(b).

(11) Catch, take, or harvest Atlantic herring in or from the EEZ with a U.S. vessel that exceeds the size limits specified in § 648.203.

(12) Process Atlantic herring caught in or from the EEZ in excess of the specification of USAP with a U.S. vessel that exceeds the size limits specified in § 648.203(b).

(13) Discard herring carcasses in the EEZ, or at sea if a federally-permitted vessel, after removing the roe.

(14) Catch, take, or harvest Atlantic herring in or from the EEZ for roe in excess of any allowed limit that may be established pursuant to § 648.204(b).

(15) Catch, take, or harvest Atlantic herring in or from the EEZ, unless equipped with an operable VMS unit if a vessel caught > 500 mt of Atlantic herring in the previous fishing year, or intends to catch > 500 mt of Atlantic herring in the current fishing year, as required by § 648.205(a).

(16) Catch, take, or harvest > 500 mt of Atlantic herring in or from the EEZ

during the fishing year, unless equipped with an operable VMS unit as required by § 648.205(a).

(17) Receive Atlantic herring in or from the EEZ solely for transport, unless issued a letter of authorization from the Regional Administrator.

(18) Fail to comply with any of the requirements of a letter of authorization from the Regional Administrator.

(19) If the vessel has been issued a Category 1 herring permit and is fishing for herring in the GOM/GB Exemption Area specified in § 648.80(a)(17), fail to notify NMFS at least 72 hours prior to departing on a trip for the purposes of observer deployment.

(20) If the vessel has been issued a Category 1 herring permit and is fishing for herring in the GOM/GB Exemption Area specified in § 648.80(a)(17), fail to notify the NMFS Office of Law Enforcement of the time and date of landing via VMS at least 12 hours prior to landing or crossing the VMS demarcation line on its return trip to port if issued an observer waiver pursuant to § 648.80(d)(7) or (e)(6).

(21) If the vessel is a Category 1 herring vessel and is fishing for herring in the GOM and GB Exemption Area as specified in § 648.80(a)(17), fail to notify the NMFS Office of Law Enforcement of the time and date of landing via VMS 12 hours prior to crossing the VMS demarcation line on its return trip to port, or, for vessels that have not fished seaward of the VMS demarcation line, at least 12 hours prior to landing. Or, if a fishing trip is less than 12 hours in length, fail to notify NMFS Office of Law Enforcement through VMS of the time and place of off-loading at least 6 hours prior to crossing the VMS demarcation line on its return trip to port, or, for vessels that have not fished seaward of the VMS demarcation line, at least 6 hours prior to landing.

(22) Possess, transfer, receive, sell, purchase, trade, or barter, or attempt to transfer, receive, purchase, trade, or barter, or sell more than 2,000 lb (907.2 kg) of Atlantic herring per trip from the GB haddock stock area defined in § 648.86(b)(6)(v)(B) following the effective date of any closure enacted pursuant to § 648.86(a)(3).

§ 648.14

50 CFR Ch. VI (10–1–05 Edition)

(cc) In addition to the general prohibitions specified in §600.725 of this chapter, unless participating in a research activity as described in §648.290(e), it is unlawful for any person owning or operating a vessel to do any of the following:

(1) Fish for, possess, retain or land tilefish, unless:

(i) The tilefish are being fished for or were harvested in or from the tilefish management unit by a vessel holding a valid tilefish permit under this part, and the operator on board such vessel has been issued an operator permit that is on board the vessel; or

(ii) The tilefish were harvested by a vessel not issued a tilefish permit that was fishing exclusively in state waters; or

(iii) The tilefish were harvested in or from the tilefish management unit by a vessel engaged in recreational fishing.

(2) Operate, or act as an operator of, a vessel with a tilefish permit, or a vessel fishing for or possessing tilefish in or from the tilefish management unit, unless the operator has been issued, and is in possession of, a valid operator permit.

(3) Purchase, possess, receive, or attempt to purchase, possess, or receive, as a dealer, or in the capacity of a dealer, tilefish that were harvested in or from the tilefish management unit, without having been issued, and in possession of, a valid tilefish dealer permit.

(4) Sell, barter, trade, or otherwise transfer, or attempt to sell, barter, trade, or otherwise transfer, for a commercial purpose, any tilefish, unless the vessel has been issued a tilefish permit, or unless the tilefish were harvested by a vessel without a tilefish permit that fished exclusively in state waters.

(5) Purchase, possess, or receive, for a commercial purpose, or attempt to purchase, possess, or receive, for a commercial purpose, tilefish caught by a vessel without a tilefish permit, unless the tilefish were harvested by a vessel without a tilefish permit that fished exclusively in state waters.

(6) [Reserved]

(7) Possess tilefish harvested in or from the tilefish management unit in excess of the trip limit, pursuant to

§648.292, unless issued a limited access tilefish permit.

(8) Land tilefish harvested in or from the tilefish management unit for sale after the effective date of the notification in the FEDERAL REGISTER, pursuant to §648.291, which notifies permit holders in a limited access category that the quota for that category is no longer available.

(9) Land tilefish in or from the tilefish management unit, in excess of the trip limit pursuant to §648.292, unless the vessel holds a valid limited access tilefish permit.

(dd) In addition to the general prohibitions specified in §600.725 of this chapter and in paragraph (a) of this section, it is unlawful for any person to do any of the following:

(1) Catch, possess, transport, land, sell, trade, or barter, any red crab or red crab parts in or from the EEZ portion of the Red Crab Management Unit, unless in possession of a valid limited access red crab vessel permit or red crab incidental catch permit issued by the Regional Administrator under this subpart.

(2) Land, or possess on board a vessel, greater than the possession or landing limits specified in §648.263.

(3) Fail to comply with the record-keeping and reporting requirements of §648.7.

(4) Transfer at sea, either directly or indirectly, or attempt to transfer at sea to any vessel, any red crab or red crab parts, taken in or from the EEZ portion of the Red Crab Management Unit.

(5) Purchase, possess, or receive greater than 500 lb (226.8 kg) of whole red crab, or its equivalent in weight as specified at §648.263(a)(2)(i) and (ii), caught in the EEZ portion of the Red Crab Management Unit by a vessel that has not been issued a valid limited access red crab permit under this subpart.

(6) Purchase, possess, or receive up to 500 lb (226.8 kg) of whole red crab, or its equivalent in weight as specified at §648.263(a)(2)(i) and (ii), caught in the EEZ portion of the Red Crab Management Unit by a vessel that has not been issued a valid limited access red crab permit or red crab incidental catch permit under this subpart.

Fishery Conservation and Management

§ 648.14

(7) Fish for, catch, possess, transport, land, sell, trade, or barter, greater than 500 lb (226.8 kg) of whole red crab, or its equivalent in weight as specified at § 648.263(a)(2)(i) and (ii), per fishing trip, in or from the Red Crab Management Unit, unless in possession of a valid limited access red crab vessel permit issued by the Regional Administrator under this subpart and fishing under a red crab DAS.

(8) Fail to comply with the provisions of the DAS notification program specified in §§ 648.262(b)(5) and 648.10, if the vessel has been issued a valid limited access red crab permit.

(9) Fish for, catch, possess, transport, land, sell, trade, or barter, in the Red Crab Management Unit under a red crab DAS if the vessel has declared out of the fishery prior to the start of the fishing year.

(10) Fish for, catch, possess, transport, land, sell, trade, or barter, red crab in excess of landing limits specified in § 648.263.

(11) Possess, deploy, fish with, haul, harvest red crab from, or carry on board a vessel in excess of the trap/pot and/or string limit specified at § 648.264(a)(2) when fishing under a red crab DAS.

(12) Retain, possess, or land female red crabs in excess of one standard U.S. fish tote if the vessel has been issued a valid limited access red crab permit and is fishing under a red crab DAS.

(13) Retain, possess, or land red crab claws and legs separate from crab bodies in excess of one standard U.S. fish tote if the vessel has been issued a valid limited access red crab permit and is fishing under a red crab DAS.

(14) Retain, possess, or land any red crab claws and legs separate from crab bodies if the vessel has not been issued a valid limited access red crab permit or has been issued a valid limited access red crab permit and is not fishing under a red crab DAS.

(15) Retain, possess, or land in excess of two claws and eight legs per crab if the vessel has been issued a valid red crab incidental catch permit or has been issued a valid limited access red crab permit and is not fishing under a red crab DAS.

(16) Fully process red crabs at sea, i.e., any activity that removes meat

from any part of a red crab, unless a preponderance of the evidence shows that the vessel fished exclusively in state waters and has not been issued a valid federal permit.

(17) Fail to comply with any gear marking requirement specified at § 648.264(a)(5).

(18) Possess, fish, or deploy parlor traps/pots if the vessel has been issued a valid limited access red crab permit and is fishing under a red crab DAS.

(19) Possess, fish, or deploy red crab traps/pots larger than the maximum size specified at § 648.263(a)(4), if the vessel has been issued a valid limited access red crab permit and is fishing under a red crab DAS.

(ee) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraph (a) of this section, it is unlawful for any person to fish for, possess, or land skates in or from the EEZ portion of the Skate Management Unit, unless in possession of a valid Federal skate vessel permit or onboard a federally permitted lobster vessel (i.e., transfer at sea recipient) while in possession of whole skates as bait only less than the maximum size specified at § 648.322(b)(2) and in accordance with § 648.322(c).

(ff) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraph (a) of this section, it is unlawful for any owner or operator of a vessel holding a valid Federal skate permit to do any of the following:

(1) Fail to comply with the conditions of the skate wing possession and landing limits for winter skates specified at § 648.322, unless holding a letter of authorization to fish for and land skates as bait only at § 648.322(b).

(2) Fail to comply with the record-keeping and reporting requirements of § 648.7(a)(1)(iii) and (b)(1)(iii).

(3) Transfer at sea or attempt to transfer at sea to any vessel, any skates taken in or from the EEZ portion of the Skate Management Unit, unless in compliance with the provisions of §§ 648.13(b) and 648.322(b).

(4) Purchase, possess, trade, barter or receive skates caught in the EEZ portion of the Skate Management Unit by a vessel that has not been issued a

§ 648.14

valid Federal skate permit under this part.

(5) Fail to comply with the provisions of the DAS notification program specified in §§ 648.53, 648.82, and 648.92, for the Atlantic sea scallop, NE multispecies, and monkfish fisheries, respectively, when issued a valid skate permit and fishing under the skate wing possession limits at § 648.322.

(6) Fish for, catch, possess, transport, land, sell, trade, or barter whole skates and skate wings in excess of the possession limits specified at § 648.322.

(7) Fail to comply with the restrictions under the SNE Trawl and Gillnet Exemption areas for the NE skate fisheries at §§ 648.80(b)(5)(i)(B) and 648.80(b)(6)(i)(B).

(gg) In addition to the general prohibitions specified in § 600.725 of this chapter and in paragraph (a) of this section, it is unlawful for any owner or operator of a vessel holding a valid Federal permit to do any of the following:

(1) Retain, possess, or land barndoor or thorny skates taken in or from the EEZ portion of the Skate Management Unit specified at § 648.2.

(2) Retain, possess, or land smooth skates taken in or from the GOM RMA described at § 648.80(a)(1)(i).

EFFECTIVE DATE NOTE 5: At 70 FR 54306, Sept. 14, 2005, § 648.14 was amended by revising paragraphs (a)(143), (a)(148), (c)(67), (c)(68), (c)(70), and (c)(73) through (c)(77), effective Oct. 14, 2005. For the convenience of the user, the revised text follows:

§ 648.14 Prohibitions.

(a) * * *

(143) If fishing under a NE multispecies DAS, fish in the Eastern U.S./Canada Haddock SAP Pilot Program specified in § 648.85(b)(8), unless declared into the program in accordance with § 648.85(b)(8)(v)(D).

* * * * *

(148) If fishing under a NE multispecies DAS in the Eastern U.S./Canada Haddock SAP Pilot Program specified in § 648.85(b)(8), in the area specified in § 648.85(b)(8)(ii), during the season specified in § 648.85(b)(8)(iv), fail to comply with the restrictions specified in § 648.85(b)(8)(v).

* * * * *

(c) * * *

(67) If fishing in the CA I Hook Gear Haddock SAP specified in § 648.85(b)(7), fail to comply with the requirements and conditions specified in § 648.85(b)(7)(iv), and (b)(7)(v) or (b)(7)(vi), whichever is applicable.

(68) If fishing in the CA I Hook Gear Haddock Access Area specified in § 648.85(b)(7)(ii), fail to comply with the requirements and conditions specified in § 648.85(b)(7)(iv), and (b)(7)(v) or (b)(7)(vi), whichever is applicable.

* * * * *

(70) If fishing in the CA I Hook Gear Haddock SAP specified in § 648.85(b)(7), fail to

Fishery Conservation and Management

§ 648.15

comply with the DAS use restrictions specified in § 648.85(b)(7)(iv)(A), and (b)(7)(v)(A) or (b)(7)(vi)(A), whichever is applicable.

* * * * *

(73) If fishing in the CA I Hook Gear Haddock SAP specified in § 648.85(b)(7), fail to comply with the VMS declaration requirement specified in § 648.85(b)(7)(iv)(D).

(74) If fishing in the CA I Hook Gear Haddock SAP specified in § 648.85(b)(7), fail to comply with the gear restrictions specified in § 648.85(b)(7)(iv)(E), and (b)(7)(v)(B) or (b)(7)(vi)(B), whichever is applicable.

(75) If fishing in the CA I Hook Gear Haddock SAP specified in § 648.85(b)(7), fail to comply with the landing limits specified in § 648.85(b)(7)(iv)(H), and (b)(7)(v)(C) or (b)(7)(vi)(C), whichever is applicable.

(76) If fishing in the CA I Hook Gear Haddock SAP specified in § 648.85(b)(7), fail to comply with the reporting requirement specified in § 648.85(b)(7)(v)(D) or (b)(7)(vi)(D), whichever is applicable.

(77) Fish in the CA I Hook Gear Haddock Access Area specified in § 648.85(b)(7)(ii), if that area is closed as specified in § 648.85(b)(7)(iv)(I) or (b)(7)(vi)(F).

* * * * *

§ 648.15 Facilitation of enforcement.

(a) *General.* See § 600.504 of this chapter.

(b) *Special notification requirements applicable to surf clam and ocean quahog vessel owners and operators.* (1) Vessel owners or operators are required to call the NMFS Office of Law Enforcement nearest to the point of offloading (contact the Regional Administrator for locations and phone numbers) and accurately provide the following information prior to the departure of their vessel from the dock to fish for surf clams or ocean quahogs in the EEZ: Name of the vessel; NMFS permit number assigned to the vessel; expected date and time of departure from port; whether the trip will be directed on surf clams or ocean quahogs; expected date, time, and location of landing; and name of the individual providing notice.

(2) Owners or operators that have given notification of a fishing trip under this paragraph (b) who decide to cancel or postpone the trip prior to departure must immediately provide notice of cancellation by telephone to the Office of Law Enforcement to which the original notification was provided.

A separate notification shall be provided for the next fishing trip. Owners or operators that discontinue a fishing trip in the EEZ must immediately provide notice of discontinuance by telephone to the Office of Law Enforcement to which the original notification was provided. The owner or operator providing notice of discontinuance shall advise of any changes in landing time or port of landing. The owner or operator discontinuing a fishing trip in the EEZ must return to port and offload any surf clams or ocean quahogs prior to commencing fishing operations in the waters under the jurisdiction of any state.

(3) The vessel permits, the vessel, its gear, and catch shall be subject to inspection upon request by an authorized officer.

(4) *Suspension of notification requirements.* The Regional Administrator may suspend notification requirements for vessels fishing under a Maine mahogany quahog permit issued pursuant to § 648.4(a)(4)(i) if he determines that such notification is not necessary to enforce effectively the management measures in the Maine mahogany quahog zone. The Regional Administrator may rescind such suspension if he concludes that the original determination is no longer valid. A suspension or rescission of suspension of the notification requirements by the Regional Administrator shall be published in the FEDERAL REGISTER.

(c) *Radio hails.* Permit holders, while underway, must be alert for communication conveying enforcement instructions and immediately answer via VHF-FM radio, channel 16 when hailed by an authorized officer. Vessels not required to have VHF-FM radios by the Coast Guard are exempt from this requirement.

(d) *Retention of haddock by herring dealers and processors.* (1) Federally permitted herring dealers and processors, including at-sea processors, that receive herring from Category 1 herring vessels, and that cull or separate out from the herring catch all fish other than herring in the course of normal operations, must separate out and retain all haddock offloaded from a Category 1 herring vessel. Such haddock may not be sold, purchased, received,

§ 648.16

traded, bartered, or transferred, and must be retained for at least 12 hours with the vessel that landed the haddock clearly identified, and law enforcement officials must be given access to inspect the haddock.

(2) All haddock separated out and retained is subject to reporting requirements specified at § 648.7.

[61 FR 34968, July 3, 1996, as amended at 62 FR 14648, Mar. 27, 1997; 63 FR 27485, May 19, 1998]

EFFECTIVE DATE NOTE: At 70 FR 34059, June 13, 2005, § 648.15 was amended by adding paragraph (d), effective June 13, 2005 through Dec. 10, 2005.

§ 648.16 Penalties.

See § 600.735.

§ 648.17 Exemptions for vessels fishing in the NAFO Regulatory Area.

(a) *Fisheries included under exemption*—(1) *NE multispecies*. A vessel issued a valid High Seas Fishing Compliance Permit under part 300 of this title and that complies with the requirements specified in paragraph (b) of this section, is exempt from NE multispecies permit, mesh size, effort-control, and possession limit restrictions, specified in §§ 648.4, 648.80, 648.82 and 648.86, respectively, while transiting the EEZ with NE multispecies on board the vessel, or landing NE multispecies in U.S. ports that were caught while fishing in the NAFO Regulatory Area.

(2) *Monkfish*. A vessel issued a valid High Seas Fishing Compliance Permit under part 300 of this title and that complies with the requirements specified in paragraph (b) of this section is exempt from monkfish permit, mesh size, effort-control, and possession limit restrictions, specified in §§ 648.4, 648.91, 648.92 and 648.94, respectively, while transiting the EEZ with monkfish on board the vessel, or landing monkfish in U.S. ports that were caught while fishing in the NAFO Regulatory Area.

(b) *General requirements*. (1) The vessel operator has a valid letter of authorization issued by the Regional Administrator on board the vessel;

(2) For the duration of the trip, the vessel fishes, except for transiting purposes, exclusively in the NAFO Regulatory Area and does not harvest fish

50 CFR Ch. VI (10–1–05 Edition)

in, or possess fish harvested in, or from, the EEZ;

(3) When transiting the EEZ, all gear is properly stowed in accordance with one of the applicable methods specified in § 648.23(b); and

(4) The vessel operator complies with the High Seas Fishing Compliance Permit and all NAFO conservation and enforcement measures while fishing in the NAFO Regulatory Area.

[70 FR 21942, Apr. 28, 2005]

Subpart B—Management Measures for the Atlantic Mackerel, Squid, and Butterfish Fisheries

§ 648.20 Maximum optimum yield (OYs).

The OYs specified pursuant to § 648.21 during a fishing year may not exceed the following amounts:

(a) Mackerel—that quantity of mackerel that is less than or equal to the allowable biological catch (ABC) in U.S. waters specified pursuant to § 648.21.

(b) *Loligo*—the catch associated with a fishing mortality rate of F_{max} .

(c) *Illex*—catch associated with a fishing mortality rate of F_{MSY} .

(d) Butterfish—the catch associated with a fishing mortality rate of F_{MSY} .

[61 FR 34968, July 3, 1996, as amended at 62 FR 8637, Feb. 26, 1997; 64 FR 57593, Oct. 26, 1999]

§ 648.21 Procedures for determining initial annual amounts.

(a) *Initial recommended annual specifications*. The Atlantic Mackerel, Squid, and Butterfish Monitoring Committee (Monitoring Committee) shall meet annually to develop and recommend the following specifications for consideration by the Mackerel, Squid, and Butterfish Committee of the MAFMC:

(1) Initial OY (IOY), including research quota (RQ), domestic annual harvest (DAH), and domestic annual processing (DAP) for *Illex* squid;

(2) IOY, including RQ, DAH, DAP, and bycatch level of the total allowable level of foreign fishing (TALFF), if any, for butterfish; and

(3) IOY, including RQ, DAH, DAP, joint venture processing (JVP), if any, and TALFF, if any, for mackerel. The

Monitoring Committee may also recommend that certain ratios of TALFF, if any, for mackerel to purchases of domestic harvested fish and/or domestic processed fish be established in relation to the initial annual amounts.

(4) Initial OY (IOY), including research quota (RQ), domestic annual harvest (DAH), and domestic annual processing (DAP) for *Loligo* squid, which, subject to annual review, may be specified for a period of up to 3 years;

(5) Inseason adjustment, upward or downward, to the specifications for *Loligo* squid as specified in paragraph (e) of this section.

(b) *Guidelines.* As the basis for its recommendations under paragraph (a) of this section, the Monitoring Committee shall review available data pertaining to: Commercial, recreational, and research project landings; discards; current estimates of fishing mortality; stock status; the most recent estimates of recruitment; virtual population analysis results; levels of non-compliance by harvesters or individual states; impact of size/mesh regulations; results of a survey of domestic processors and joint venture operators of estimated mackerel processing capacity and intent to use that capacity; results of a survey of fishermen's trade associations of estimated mackerel harvesting capacity and intent to use that capacity; and any other relevant information. The specifications recommended pursuant to paragraph (a) of this section must be consistent with the following:

(1) *Squid.* (i) The ABC for any fishing year must be either the maximum OY specified in § 648.20, or a lower amount, if stock assessments indicate that the potential yield is less than the maximum OY.

(ii) IOY is a modification of ABC based on social and economic factors. The IOY is composed of a RQ and DAH. RQ will be based on requests for research quota as described in paragraph (g) of this section. DAH will be set after deduction for RQ, if applicable.

(2) *Mackerel.* (i) Mackerel ABC must be calculated using the formula $ABC = T - C$, where C is the estimated catch of mackerel in Canadian waters for the upcoming fishing year and T is the

catch associated with a fishing mortality rate that is equal to F_{target} ($F = 0.25$) at an 890,000 mt spawning stock biomass (or greater) and decreases linearly to zero at a 450,000 mt spawning stock biomass ($\frac{1}{2} B_{\text{MSY}}$) or below.

(ii) IOY is a modification of ABC, based on social and economic factors, and must be less than or equal to ABC.

(iii) IOY is composed of RQ, DAH and TALFF. RQ will be based on requests for research quota as described in paragraph (g) of this section. DAH, DAP, and JVP will be set after deduction for RQ, if applicable, and must be projected by reviewing data from sources specified in paragraph (a) of this section and other relevant data, including past domestic landings, projected amounts of mackerel necessary for domestic processing and for joint ventures during the fishing year, projected recreational landings, and other data pertinent for such a projection. The JVP component of DAH is the portion of DAH that domestic processors either cannot or will not use. In addition, IOY is based on the criteria set forth in the Magnuson-Stevens Act, specifically section 201(e), and on the following economic factors:

(A) Total world export potential of mackerel producing countries.

(B) Total world import demand of mackerel consuming countries.

(C) U.S. export potential based on expected U.S. harvests, expected U.S. consumption, relative prices, exchange rates, and foreign trade barriers.

(D) Increased/decreased revenues to the United States from foreign fees.

(E) Increased/decreased revenues to U.S. harvesters (with/without joint ventures).

(F) Increased/decreased revenues to U.S. processors and exporters.

(G) Increases/decreases in U.S. harvesting productivity due to decreases/increases in foreign harvest.

(H) Increases/decreases in U.S. processing productivity.

(I) Potential impact of increased/decreased TALFF on foreign purchases of U.S. products and services and U.S.-caught fish, changes in trade barriers, technology transfer, and other considerations.

(3) *Butterfish.* (i) If the Monitoring Committee's review indicates that the

stock cannot support a level of harvest equal to the maximum OY, the Monitoring Committee shall recommend establishing an ABC less than the maximum OY for the fishing year. This level represents the modification of maximum OY to reflect biological and ecological factors. If the stock is able to support a harvest level equivalent to the maximum OY, the ABC must be set at that level.

(ii) IOY is a modification of ABC based on social and economic factors. The IOY is composed of a RQ, DAH, and bycatch TALFF that is equal to 0.08 percent of the allocated portion of the mackerel TALFF. RQ will be based on requests for research quota as described in paragraph (g) of this section. DAH and bycatch TALFF will be set after deduction for RQ, if applicable.

(c) *Recommended measures.* Based on the review of the data described in paragraph (a) of this section and requests for research quota as described in paragraph (g) of this section, the Monitoring Committee will recommend to the Squid, Mackerel, and Butterfish Committee the measures from the following list that it determines are necessary to ensure that the specifications are not exceeded:

(1) Research quotas set from a range of 0 to 3 percent of IOY.

(2) Commercial quotas, set after reductions for research quotas.

(3) The amount of *Loligo* and butterfish that may be retained, possessed and landed by vessels issued the incidental catch permit specified in § 648.4(a)(5).

(4) Commercial minimum fish sizes.

(5) Commercial trip limits.

(6) Commercial seasonal quotas/closures for *Loligo* and *Illex*.

(7) Minimum mesh sizes.

(8) Commercial gear restrictions.

(9) Recreational harvest limit, set after reductions for research quotas.

(10) Recreational minimum fish size.

(11) Recreational possession limits.

(12) Recreational season.

(d) *Annual fishing measures.* (1) The Squid, Mackerel, and Butterfish Committee will review the recommendations of the Monitoring Committee. Based on these recommendations and any public comment received thereon, the Squid, Mackerel, and Butterfish

Committee must recommend to the MAFMC appropriate specifications and any measures necessary to assure that the specifications will not be exceeded. The MAFMC will review these recommendations and, based on the recommendations and any public comment received thereon, must recommend to the Regional Administrator appropriate specifications and any measures necessary to assure that the specifications will not be exceeded. The MAFMC's recommendations must include supporting documentation, as appropriate, concerning the environmental, economic, and social impacts of the recommendations. The Regional Administrator will review the recommendations and will publish notification in the FEDERAL REGISTER proposing specifications and any measures necessary to assure that the specifications will not be exceeded and providing a 30-day public comment period. If the proposed specifications differ from those recommended by the MAFMC, the reasons for any differences must be clearly stated and the revised specifications must satisfy the criteria set forth in this section. The MAFMC's recommendations will be available for inspection at the office of the Regional Administrator during the public comment period. If the annual specifications for squid, mackerel, and butterfish are not published in the FEDERAL REGISTER prior to the start of the fishing year, the previous year's annual specifications, excluding specifications of TALFF, will remain in effect. The previous year's specifications will be superceded as of the effective date of the final rule implementing the current year's annual specifications.

(2) The Assistant Administrator will make a final determination concerning the specifications for each species and any measures necessary to assure that the specifications contained in the FEDERAL REGISTER notification will not be exceeded. After the Assistant Administrator considers all relevant data and any public comments, notification of the final specifications and any measures necessary to assure that the specifications will not be exceeded and responses to the public comments will be published in the FEDERAL REGISTER. If the final specification

Fishery Conservation and Management

§ 648.21

amounts differ from those recommended by the MAFMC, the reason(s) for the difference(s) must be clearly stated and the revised specifications must be consistent with the criteria set forth in paragraph (b) of this section.

(e) *Inseason adjustments.* The specifications established pursuant to this section may be adjusted by the Regional Administrator, in consultation with the MAFMC, during the fishing year by publishing notification in the Federal Register stating the reasons for such an action and providing a 30-day public comment period.

(f) *Distribution of annual Loligo squid commercial quota.* (1) Beginning January 1, 2001, a commercial quota will be allocated annually for *Loligo* squid into quarterly periods, based on the following percentages:

Quarter	Percent
I—January-March	33.23
II—April-June	17.61
III—July-September	17.30
IV—October-December	31.86

(2) Beginning January 1, 2001, any overages of commercial quota landed from Quarter I will be subtracted from Quarter III and any overages of commercial quota landed from Quarter II will be subtracted from Quarter IV.

(3) Beginning January 1, 2003, if commercial landings in Quarter I are determined to be less than 80 percent of the Quarter I quota allocation, any remaining Quarter I quota that is less than 80 percent will be reallocated to Quarter III (e.g., if the Quarter I quota was 100,000 lb (220,462 kg) and 50,000 lb (110,231 kg) was landed, then the remaining Quarter I quota, up to 80 percent, or 30,000 lb (66,139 kg), would be reallocated to Quarter III. A balance of 20 percent, or 20,000 lb (44,092 kg), would remain in Quarter I).

(g) *Research quota.* Prior to the Council's quota-setting meetings:

(1) NMFS will publish a Request for Proposals (RFP) in the FEDERAL REGISTER, consistent with procedures and requirements established by the NOAA Grants Office, to solicit proposals from industry for the upcoming fishing year, based on research priorities identified by the Council.

(2) NMFS will convene a review panel including the Council's Comprehensive Management Committee, as well as technical experts, to review proposals submitted in response to the RFP.

(i) Each panel member will recommend which research proposals should be authorized to utilize research quota, based on the selection criteria described in the RFP.

(ii) The Regional Administrator and the NOAA Grants Office will consider each panel member's recommendation, provide final approval of the projects and exempt selected vessel(s) from regulations specified in each of the respective FMPs through written notification to the project proponent.

(3) The grant awards approved under the RFPs will be for the upcoming fishing year. Proposals to fund research that would start prior to, or that would end after the fishing year, will not be eligible for consideration. All research and/or compensation trips will have to be completed within the fishing year for which the research grant was awarded.

(4) Research projects will be conducted in accordance with provisions approved and provided in an Exempted Fishing Permit (EFP) issued by the Regional Administrator.

(5) If a proposal is disapproved by the Regional Administrator or the NOAA Grants Office, or if the Regional Administrator determines that the allocated research quota cannot be utilized by a project, the Regional Administrator shall reallocate the unallocated or unused amount of research quota to the respective commercial and recreational fisheries by publication of a notice in the FEDERAL REGISTER in compliance with the Administrative Procedure Act, provided:

(i) The reallocation of the unallocated or unused amount of research quota is in accord with National Standard 1, and can be available for harvest before the end of the fishing year for which the research quota is specified; and

(ii) Any reallocation of unallocated or unused research quota shall be consistent with the proportional division of quota between the commercial and recreational fisheries in the relevant FMP and allocated to the remaining

§ 648.22

50 CFR Ch. VI (10–1–05 Edition)

quota periods for the fishing year proportionally.

(6) Vessels participating in approved research projects may be exempted from certain management measures by the Regional Administrator, provided that one of the following analyses of the impacts associated with the exemptions is provided:

(i) The analysis of the impacts of the requested exemptions is included as part of the annual quota specification packages submitted by the Council; or

(ii) For proposals that require exemptions that extend beyond the scope of the analysis provided by the Council, applicants may be required to provide additional analysis of impacts of the exemptions before issuance of an EFP will be considered, as specified in the EFP regulations at § 648.745(b).

[61 FR 34968, July 3, 1996, as amended at 62 FR 8637, Feb. 26, 1997; 64 FR 57593, Oct. 26, 1999; 65 FR 16345, Mar. 28, 2000; 65 FR 55927, Sept. 15, 2000; 66 FR 13028, Mar. 2, 2001; 66 FR 35566, July 6, 2001; 66 FR 42159, Aug. 10, 2001; 67 FR 3627, Jan. 25, 2002; 67 FR 44394, July 2, 2002; 68 FR 60, Jan. 2, 2003; 69 FR 16178, Mar. 29, 2004]

EFFECTIVE DATE NOTE: At 70 FR 13409, Mar. 21, 2005, § 648.21 was amended by revising paragraph (d), effective Apr. 20, 2005 through Dec. 31, 2005.

§ 648.22 Closure of the fishery.

(a) *General.* NMFS shall close the directed mackerel fishery in the EEZ when U.S. fishermen have harvested 80 percent of the DAH of that fishery if such closure is necessary to prevent the DAH from being exceeded. The closure shall remain in effect for the remainder of the fishing year, with incidental catches allowed as specified in paragraph (c) of this section, until the entire DAH is attained. When the Regional Administrator projects that DAH will be attained for mackerel, NMFS will close the mackerel fishery in the EEZ, and the incidental catches specified for mackerel in paragraph (c) of this section will be prohibited. NMFS will close the directed fishery in the EEZ for *Loligo* when 80 percent is harvested in Quarters I, II and III, and when 95 percent of the total annual DAH has been harvested. The closure of the directed fishery will be in effect for the remainder of the fishing year, with

incidental catches allowed as specified in paragraph (c) of this section. NMFS will close the directed fishery in the EEZ for *Illex* or butterfish when 95 percent of the DAH has been harvested. The closure of the directed fishery will be in effect for the remainder of the fishing year, with incidental catches allowed as specified in paragraph (c) of this section.

(b) *Notification.* Upon determining that a closure is necessary, the Assistant Administrator will notify, in advance of the closure, the Executive Directors of the MAFMC, NEFMC, and SAFMC; mail notification of the closure to all holders of mackerel, squid, and butterfish fishery permits at least 72 hours before the effective date of the closure; provide adequate notice of the closure to recreational participants in the fishery; and publish notification of closure in the FEDERAL REGISTER.

(c) *Incidental catches.* During the closure of the directed fishery for mackerel, the possession limit for mackerel is 10 percent by weight of the total amount of fish on board. During a period of closure of the directed fishery for *Loligo*, *Illex*, or butterfish, the possession limit for *Loligo* and butterfish is 2,500 lb (1.13 mt) each, and the possession limit for *Illex* is 10,000 lb (4.54 mt). Vessels may not land more than these limits during any single calendar day, which is defined as the 24-hour period beginning at 0001 hours and ending at 2400 hours.

[61 FR 34968, July 3, 1996, as amended at 62 FR 8637, Feb. 26, 1997; 65 FR 16345, Mar. 28, 2000; 65 FR 81765, Dec. 27, 2000; 66 FR 13028, Mar. 2, 2001; 69 FR 4864, Feb. 2, 2004]

§ 648.23 Gear restrictions.

(a) *Mesh restrictions and exemptions.*

(1) Vessels subject to the mesh restrictions outlined in this paragraph (a) may not have available for immediate use any net, or any piece of net, with a mesh size smaller than that required.

(2) Owners or operators of otter trawl vessels possessing 5,000 lb (2.27 mt) or more of butterfish harvested in or from the EEZ may only fish with nets having a minimum codend mesh of 3 inches (76 mm) diamond mesh, inside stretch measure, applied throughout the codend for at least 100 continuous meshes forward of the terminus of the

Fishery Conservation and Management

§ 648.23

net, or for codends with less than 100 meshes, the minimum mesh size codend shall be a minimum of one-third of the net measured from the terminus of the codend to the head rope.

(3) Owners or operators of otter trawl vessels possessing *Loligo* harvested in or from the EEZ may only fish with nets having a minimum mesh size of 1 7/8 inches (48 mm) diamond mesh, inside stretch measure, applied throughout the codend for at least 150 continuous meshes forward of the terminus of the net, or for codends with less than 150 meshes, the minimum mesh size codend shall be a minimum of one-third of the net measured from the terminus of the codend to the head rope, unless they are fishing during the months of June, July, August, and September for *Illex* seaward of the following coordinates (copies of a map depicting this area are available from the Regional Administrator upon request):

Point	N. Lat.	W. Long.
M1	43°58.0'	67°22.0'
M2	43°50.0'	68°35.0'
M3	43°30.0'	69°40.0'

M23	35°45.0'	74°53.0'
M24	35°28.0'	74°52.0'

Vessels fishing under this exemption may not have available for immediate use, as defined in paragraph (b) of this section, any net, or any piece of net, with a mesh size less than 1 7/8 inches (48 mm) diamond mesh or any net, or any piece of net, with mesh that is rigged in a manner that is prohibited by paragraph (c) and (d) of this section, when the vessel is landward of the specified coordinates.

(b) Definition of "not available for immediate use." Gear that is shown

not to have been in recent use and that is stowed in conformance with one of the following methods is considered to be not available for immediate use:

(1) *Nets.* (i) *Below deck stowage.* (A) It is stored below the main working deck from which it is deployed and retrieved;

(B) The towing wires, including the leg wires, are detached from the net; and

(C) It is fan-folded (flaked) and bound around its circumference.

(ii) *On-deck stowage.* (A) It is fan-folded (flaked) and bound around its circumference;

(B) It is securely fastened to the deck or rail of the vessel; and

(C) The towing wires, including the leg wires, are detached from the net.

(iii) *On-reel stowage.* (A) The net is on a reel, its entire surface is covered with canvas or other similar opaque material, and the canvas or other material is securely bound;

(B) The towing wires are detached from the net; and

(C) The codend is removed and stored below deck.

(iv) *On-reel stowage for vessels transiting the Gulf of Maine Rolling Closure Areas, the Georges Bank Seasonal Area Closure, and the Conditional Gulf of Maine Rolling Closure Area.* (A) The net is on a reel, its entire surface is covered with canvas or other similar opaque material, and the canvas or other material is securely bound;

(B) The towing wires are detached from the doors; and

(C) No containment rope, codend tripping device, or other mechanism to close off the codend is attached to the codend.

(2) *Scallop dredges.* (i) The towing wire is detached from the scallop dredge, the towing wire is completely reeled up onto the winch, the dredge is secured and the dredge or the winch is covered so that it is rendered unuseable for fishing; or

(ii) The towing wire is detached from the dredge and attached to a bright-colored poly ball no less than 24 inches (60.9 cm) in diameter, with the towing wire left in its normal operating position (through the various blocks) and either is wound back to the first block (in the gallows) or is suspended at the

§ 648.24

end of the lifting block where its retrieval does not present a hazard to the crew and where it is readily visible from above.

(3) *Hook gear (other than pelagic)*. All anchors and buoys are secured and all hook gear, including jigging machines, is covered.

(4) *Sink gillnet gear*. All nets are covered with canvas or other similar material and lashed or otherwise securely fastened to the deck or rail, and all buoys larger than 6 inches (15.24 cm) in diameter, high flyers, and anchors are disconnected.

(5) *Other methods of stowage*. Any other method of stowage authorized in writing by the Regional Administrator and subsequently published in the FEDERAL REGISTER.

(c) *Mesh obstruction or constriction*. The owner or operator of a fishing vessel shall not use any mesh construction, mesh configuration or other means that effectively decreases the mesh size below the minimum mesh size, except that a liner may be used to close the opening created by the rings in the aftermost portion of the net, provided the liner extends no more than 10 meshes forward of the aftermost portion of the net. The inside webbing of the codend shall be the same circumference or less than the outside webbing (strengtheners). In addition, the inside webbing shall not be more than 2 ft (61 cm) longer than the outside webbing.

(d) *Net obstruction or constriction*. The owner or operator of a fishing vessel shall not use any device, gear, or material, including, but not limited to, nets, net strengtheners, ropes, lines, or chafing gear, on the top of the regulated portion of a trawl net that results in an effective mesh opening of less than 1 $\frac{1}{8}$ inches (48 mm) diamond mesh, inside stretch measure. Net strengtheners (covers), splitting straps and/or bull ropes or wire may be used, provided they do not constrict the top of the regulated portion of the net to less than an effective mesh opening of 1 $\frac{1}{8}$ inches (48 mm), diamond mesh, inside stretch measure. Net strengtheners (covers) may not have an effective mesh opening of less than 4.5 inches (11.43 cm), diamond mesh, inside stretch measure. "Top of the regulated

50 CFR Ch. VI (10–1–05 Edition)

portion of the net" means the 50 percent of the entire regulated portion of the net that (in a hypothetical situation) would not be in contact with the ocean bottom during a tow if the regulated portion of the net were laid flat on the ocean floor. For the purpose of this paragraph (d), head ropes are not to be considered part of the top of the regulated portion of a trawl net.

[61 FR 34968, July 3, 1996, as amended at 62 FR 14648, Mar. 27, 1997; 63 FR 1774, Jan. 12, 1998; 64 FR 24073, May 5, 1999; 65 FR 16345, Mar. 28, 2000; 65 FR 37911, June 19, 2000; 68 FR 9586, Feb. 28, 2003; 69 FR 22951, Apr. 27, 2004]

EFFECTIVE DATE NOTE: At 70 FR 13409, Mar. 21, 2005, §648.23 was amended by revising paragraph (a), effective Apr. 20, 2005 through Dec. 31, 2005.

§ 648.24 Framework adjustments to management measures.

(a) *Within season management action*. The Council, at any time, may initiate action to add or adjust management measures within the Atlantic Mackerel, Squid, and Butterfish FMP if it finds that action is necessary to meet or be consistent with the goals and objectives of the plan.

(1) *Adjustment process*. The Council shall develop and analyze appropriate management actions over the span of at least two Council meetings. The Council must provide the public with advance notice of the availability of the recommendation(s), appropriate justification(s) and economic and biological analyses, and the opportunity to comment on the proposed adjustment(s) at the first meeting and prior to and at the second Council meeting. The Council's recommendations on adjustments or additions to management measures must come from one or more of the following categories: Minimum fish size, maximum fish size, gear restrictions, gear requirements or prohibitions, permitting restrictions, recreational possession limit, recreational seasons, closed areas, commercial seasons, commercial trip limits, commercial quota system including commercial quota allocation procedure and possible quota set asides to mitigate bycatch, recreational harvest limit, annual specification quota setting process, FMP Monitoring Committee composition and process, description and

identification of essential fish habitat (and fishing gear management measures that impact EFH), description and identification of habitat areas of particular concern, overfishing definition and related thresholds and targets, regional gear restrictions, regional season restrictions (including option to split seasons), restrictions on vessel size (LOA and GRT) or shaft horsepower, any other management measures currently included in the FMP, set aside quota for scientific research, regional management, and process for inseason adjustment to the annual specification.

(2) *Council recommendation.* After developing management actions and receiving public testimony, the Council shall make a recommendation to the Regional Administrator. The Council's recommendation must include supporting rationale, if management measures are recommended, an analysis of impacts, and a recommendation to the Regional Administrator on whether to issue the management measures as a final rule. If the Council recommends that the management measures should be issued as a final rule, the Council must consider at least the following factors, and provide support and analysis for each factor considered:

(i) Whether the availability of data on which the recommended management measures are based allows for adequate time to publish a proposed rule, and whether the regulations would have to be in place for an entire harvest/fishing season.

(ii) Whether there has been adequate notice and opportunity for participation by the public and members of the affected industry in the development of the recommended management measures.

(iii) Whether there is an immediate need to protect the resource.

(iv) Whether there will be a continuing evaluation of management measures following their implementation as a final rule.

(3) *NMFS action.* If the Council's recommendation includes adjustments or additions to management measures and, after reviewing the Council's recommendation and supporting information:

(i) If NMFS concurs with the Council's recommended management measures and determines that the recommended management measures should be issued as a final rule based on the factors specified in paragraph (a)(2) of this section, the measures will be issued as a final rule in the FEDERAL REGISTER.

(ii) If NMFS concurs with the Council's recommended management measures and determines that the recommended management measures should be published first as a proposed rule, the measures will be published as a proposed rule in the FEDERAL REGISTER. After additional public comment, if NMFS concurs with the Council recommendation, the measures will be issued as a final rule in the FEDERAL REGISTER.

(iii) If NMFS does not concur, the Council will be notified in writing of the reasons for the non-concurrence.

(4) *Emergency actions.* Nothing in this section is meant to derogate from the authority of the Secretary to take emergency action under section 305(e) of the Magnuson-Stevens Act.

(b) [Reserved]

[64 FR 57593, Oct. 26, 1999]

Subpart C—Management Measures for Atlantic Salmon

§ 648.40 Prohibition on possession.

(a) *Incidental catch.* All Atlantic salmon caught incidental to a directed fishery for other species in the EEZ must be released in such a manner as to insure maximum probability of survival.

(b) *Presumption.* The possession of Atlantic salmon is prima facie evidence that such Atlantic salmon were taken in violation of this regulation. Evidence that such fish were harvested in state waters, or from foreign waters, or from aquaculture enterprises, will be sufficient to rebut the presumption. This presumption does not apply to fish being sorted on deck.

§ 648.41 Framework specifications.

(a) *Within season management action.* The New England Fishery Management Council (NEFMC) may, at any time, initiate action to implement, add to or

adjust Atlantic salmon management measures to allow for Atlantic salmon aquaculture projects in the EEZ, provided such an action is consistent with the goals and objectives of the Atlantic Salmon FMP.

(b) *Framework process.* After initiation of an action to implement, add to or adjust an Atlantic salmon management measure to allow for an Atlantic salmon aquaculture project in the EEZ, the NEFMC shall develop and analyze Atlantic salmon management measures to allow for Atlantic salmon aquaculture projects in the EEZ over the span of at least two NEFMC meetings. The NEFMC shall provide the public with advance notice of the availability of both the proposals and the analysis and opportunity to comment on them prior to and at the second NEFMC meeting. The NEFMC's recommendation on aquaculture management measures must come from one or more of the following categories: minimum fish sizes, gear restrictions, minimum mesh sizes, possession limits, tagging requirements, monitoring requirements, reporting requirements, permit restrictions, area closures, establishment of special management areas or zones and any other management measures currently included in the FMP.

(c) *NEFMC recommendation.* After developing Atlantic salmon management measures and receiving public testimony, the NEFMC shall make a recommendation to NMFS. The NEFMC's recommendation must include supporting rationale and, if management measures are recommended, an analysis of impacts and a recommendation to NMFS on whether to issue the management measures as a final rule. If NMFS concurs with the NEFMC's recommendation to issue the management measures as a final rule, the NEFMC must consider at least the following factors and provide support and analysis for each factor considered:

(1) Whether the availability of data on which the recommended management measures are based allows for adequate time to publish a proposed rule, and whether regulations have to be in place for an entire harvest/fishing season.

(2) Whether there has been adequate notice and opportunity for participation by the public and members of the affected industry in the development of the NEFMC's recommended management measures.

(3) Whether there is an immediate need to protect the resource.

(4) Whether there will be a continuing evaluation of measures adopted following their implementation as a final rule.

(d) *NMFS action.* If the NEFMC's recommendation includes implementation of management measures and, after reviewing the NEFMC's recommendation and supporting information:

(1) NMFS concurs with the NEFMC's recommended management measures and determines that the recommended measures should be issued as a final rule based on the factors specified in paragraph (c)(1) through (4) of this section, the measures will be issued as a final rule in the FEDERAL REGISTER.

(2) NMFS concurs with the NEFMC's recommendation and determines that the recommended management measures should be published first as a proposed rule, the measures will be published as a proposed rule in the FEDERAL REGISTER. After additional public comment, if NMFS concurs with the NEFMC recommendation, the measures will be issued as a final rule in the FEDERAL REGISTER.

(3) NMFS does not concur, the NEFMC will be notified in writing of the reasons for the non-concurrence.

(e) *Emergency action.* Nothing in this section is meant to derogate from the authority of the Secretary to take emergency action under section 305(e) of the Magnuson-Stevens Act.

[64 FR 40520, July 27, 1999]

Subpart D—Management Measures for the Atlantic Sea Scallop Fishery

SOURCE: 69 FR 35215, June 23, 2004, unless otherwise noted.

§ 648.50 Shell-height standard.

(a) *Minimum shell height.* The minimum shell height for in-shell scallops that may be landed, or possessed at or after landing, is 3.5 inches (8.9 cm).

Shell height is a straight line measurement from the hinge to the part of the shell that is farthest away from the hinge.

(b) *Compliance and sampling.* Any time at landing or after, including when the scallops are received or possessed by a dealer or person acting in the capacity of a dealer, compliance with the minimum shell-height standard shall be determined as follows: Samples of 40 scallops each shall be taken at random from the total amount of scallops in possession. The person in possession of the scallops may request that as many as 10 sample groups (400 scallops) be examined. A sample group fails to comply with the standard if more than 10 percent of all scallops sampled are shorter than the shell height specified. The total amount of scallops in possession shall be deemed in violation of this subpart and subject to forfeiture, if the sample group fails to comply with the minimum standard.

§ 648.51 Gear and crew restrictions.

(a) *Trawl vessel gear restrictions.* Trawl vessels issued a limited access scallop permit under § 648.4(a)(2) while fishing under or subject to the DAS allocation program for scallops and authorized to fish with or possess on board trawl nets pursuant to § 648.51(f), any trawl vessels in possession of more than 40 lb (18.14 kg) of shucked, or 5 bu (176.2 L) of in-shell scallops in or from the EEZ, and any trawl vessels fishing for scallops in the EEZ, must comply with the following:

(1) *Maximum sweep.* The trawl sweep of nets shall not exceed 144 ft (43.9 m), as measured by the total length of the footrope that is directly attached to the webbing, unless the net is stowed and not available for immediate use, as specified in § 648.23.

(2) *Net requirements*—(i) *Minimum mesh size.* The mesh size for any scallop trawl net in all areas shall not be smaller than 5.5 inches (13.97 cm).

(ii) *Measurement of mesh size.* Mesh size is measured by using a wedge-shaped gauge having a taper of 2 cm (0.79 inches) in 8 cm (3.15 inches) and a thickness of 2.3 mm (0.09 inches), inserted into the meshes under a pressure or pull of 5 kg (11.02 lb). The mesh size

is the average of the measurements of any series of 20 consecutive meshes for nets having 75 or more meshes, and 10 consecutive meshes for nets having fewer than 75 meshes. The mesh in the regulated portion of the net shall be measured at least five meshes away from the lacings running parallel to the long axis of the net.

(3) *Chafing gear and other gear obstructions*—(i) *Net obstruction or constriction.* A fishing vessel may not use any device or material, including, but not limited to, nets, net strengtheners, ropes, lines, or chafing gear, on the top of a trawl net, except that one splitting strap and one bull rope (if present), consisting of line and rope no more than 3 inches (7.62 cm) in diameter, may be used if such splitting strap and/or bull rope does not constrict in any manner the top of the trawl net. “The top of the trawl net” means the 50 percent of the net that (in a hypothetical situation) would not be in contact with the ocean bottom during a tow if the net were laid flat on the ocean floor. For the purpose of this paragraph (a)(3), head ropes shall not be considered part of the top of the trawl net.

(ii) *Mesh obstruction or constriction.* A fishing vessel may not use any mesh configuration, mesh construction, or other means on or in the top of the net, as defined in paragraph (a)(3)(i) of this section, if it obstructs the meshes of the net in any manner.

(iii) A fishing vessel may not use or possess a net capable of catching scallops in which the bars entering or exiting the knots twist around each other.

(b) *Dredge vessel gear restrictions.* All vessels issued limited access and General Category scallop permits and fishing with scallop dredges, with the exception of hydraulic clam dredges and mahogany quahog dredges in possession of 400 lb (181.44 kg), or less, of scallops, must comply with the following restrictions, unless otherwise specified:

(1) *Maximum dredge width.* The combined dredge width in use by or in possession on board such vessels shall not exceed 31 ft (9.4 m) measured at the widest point in the bail of the dredge, except as provided under paragraph (e) of this section. However, component parts may be on board the vessel such

that they do not conform with the definition of “dredge or dredge gear” in § 648.2, *i.e.*, the metal ring bag and the mouth frame, or bail, of the dredge are not attached, and such that no more than one complete spare dredge could be made from these component’s parts.

(2) *Minimum mesh size.* The mesh size of a net, net material, or any other material on the top of a scallop dredge (twine top) possessed or used by vessels fishing with scallop dredge gear shall not be smaller than 10-inch (25.4-cm) square or diamond mesh.

(3) *Minimum ring size.* (i) Prior to December 23, 2004, the ring size used in a scallop dredge possessed or used by scallop vessels shall not be smaller than 3.5 inches (8.9 cm), unless otherwise required under the Sea Scallop Area Access Program specified in § 648.60(a)(6).

(ii) Beginning December 23, 2004, unless otherwise required under the Sea Scallop Area Access Program specified in § 648.60(a)(6), the ring size used in a scallop dredge possessed or used by scallop vessels shall not be smaller than 4 inches (10.2 cm).

(iii) Ring size is determined by measuring the shortest straight line passing through the center of the ring from one inside edge to the opposite inside edge of the ring. The measurement shall not include normal welds from ring manufacturing or links. The rings to be measured will be at least five rings away from the mouth, and at least two rings away from other rigid portions of the dredge.

(4) *Chafing gear and other gear obstructions—*(i) *Chafing gear restrictions.* No chafing gear or cookies shall be used on the top of a scallop dredge.

(ii) *Link restrictions.* No more than double links between rings shall be used in or on all parts of the dredge bag, except the dredge bottom. No more than triple linking shall be used in or on the dredge bottom portion and the diamonds. Damaged links that are connected to only one ring, *i.e.*, “hangers,” are allowed, unless they occur between two links that both couple the same two rings. Dredge rings may not be attached via links to more than four adjacent rings. Thus, dredge rings must be rigged in a configuration such that, when a series of adjacent rings are held

horizontally, the neighboring rings form a pattern of horizontal rows and vertical columns. A copy of a diagram showing a schematic of a legal dredge ring pattern is available from the Regional Administrator upon request.

(iii) *Dredge or net obstructions.* No material, device, net, dredge, ring, or link configuration or design shall be used if it results in obstructing the release of scallops that would have passed through a legal sized and configured net and dredge, as described in this part, that did not have in use any such material, device, net, dredge, ring link configuration or design.

(iv) *Twine top restrictions.* In addition to the minimum twine top mesh size specified in paragraph (b)(2) of this section, vessels issued limited access scallop permits that are fishing for scallops under the DAS Program are also subject to the following restrictions:

(A) If a vessel is rigged with more than one dredge, or if a vessel is rigged with only one dredge and such dredge is greater than 8 ft (2.4 m) in width, there must be at least seven rows of non-overlapping steel rings unobstructed by netting or any other material between the terminus of the dredge (club stick) and the net material on the top of the dredge (twine top).

(B) If a vessel is rigged with only one dredge, and such dredge is less than 8 ft (2.4 m) in width, there must be at least four rows of non-overlapping steel rings unobstructed by netting or any other material between the club stick and the twine top of the dredge. (A copy of a diagram showing a schematic of a legal dredge with twine top is available from the Regional Administrator upon request).

(c) *Crew restrictions.* Limited access vessels participating in or subject to the scallop DAS allocation program may have no more than seven people aboard, including the operator, when not docked or moored in port, unless participating in the small dredge program as specified in paragraph (e) of this section, or otherwise authorized by the Regional Administrator.

(d) *Sorting and shucking machines.* (1) Shucking machines are prohibited on all limited access vessels fishing under the scallop DAS program, or any vessel in possession of more than 400 lb (181.44

kg) of scallops, unless the vessel has not been issued a limited access scallop permit and fishes exclusively in state waters.

(2) Sorting machines are prohibited on limited access vessels fishing under the scallop DAS program.

(e) *Small dredge program restrictions.* Any vessel owner whose vessel is assigned to either the part-time or Occasional category may request, in the application for the vessel's annual permit, to be placed in one category higher. Vessel owners making such request may be placed in the appropriate higher category for the entire year, if they agree to comply with the following restrictions, in addition to and notwithstanding other restrictions of this part, when fishing under the DAS program described in §648.53, or in possession of more than 400 lb (181.44 kg) of shucked, or 50 bu (17.62 hl) of in-shell scallops:

(1) The vessel must fish exclusively with one dredge no more than 10.5 ft (3.2 m) in width.

(2) The vessel may not use or have more than one dredge on board.

(3) The vessel may have no more than five people, including the operator, on board.

(f) *Restrictions on use of trawl nets.* (1) A vessel issued a limited access scallop permit fishing for scallops under the scallop DAS allocation program may not fish with, possess on board, or land scallops while in possession of, trawl nets, unless such vessel has on board a valid letter of authorization or permit that endorses the vessel to fish for scallops with trawl nets. A limited access scallop vessel issued a valid letter of authorization or permit that endorses the vessel to fish for scallops with trawl nets, and general category scallop vessels enrolled in the Area Access Program as specified in §648.60(g), may not fish with trawl nets in the Access Areas specified in §648.59(b) through (d).

(2) *Replacement vessels.* A vessel that is replacing a vessel authorized to use trawl nets to fish for scallops under scallop DAS may also be authorized to use trawl nets to fish for scallops under scallop DAS if it meets the following criteria:

(i) Has not fished for scallops with a scallop dredge after December 31, 1987; or

(ii) Has fished for scallops with a scallop dredge on no more than 10 trips from January 1, 1988, through December 31, 1994, has an engine horsepower no greater than 450.

[69 FR 35215, June 23, 2004, as amended at 69 FR 63473, Nov. 2, 2004]

§ 648.52 Possession and landing limits.

(a) Owners or operators of vessels with a limited access scallop permit that have declared out of the DAS program as specified in §648.10, or that have used up their DAS allocations, and vessels possessing a general scallop permit, unless exempted under the state waters exemption program described under §648.54, are prohibited from fishing for or landing per trip, or possessing at any time, in excess of 400 lb (181.4 kg) shucked, or 50 U.S. bu (17.6 hl) in-shell, scallops, with no more than one scallop trip of 400 lb (181.4 kg) of shucked, or 50 bu (17.6 hl) of in-shell scallops, allowable in any calendar day.

(b) Owners or operators of vessels without a scallop permit, except vessels fishing for scallops exclusively in state waters, are prohibited from fishing for or landing per trip, or possessing at any time, more than 40 lb (18.1 kg) of shucked, or 5 bu (17.6 L) of in-shell scallops. Owners or operators of vessels without a scallop permit are prohibited from selling, bartering, or trading scallops harvested from Federal waters.

(c) Owners or operators of vessels with a limited access scallop permit that have declared into the Sea Scallop Area Access Program as described in §648.60 are prohibited from fishing for or landing per trip, or possessing at any time, more than the sea scallop possession and landing limit specified in §648.60(a)(5).

(d) Owners or operators of vessels issued limited access or general category scallop permits fishing in or transiting the area south of 42°20' N. Latitude at any time during a trip are prohibited from fishing for, possessing, or landing per trip more than 50 bu (17.62 hl) of in-shell scallops shoreward of the VMS Demarcation Line, unless

§ 648.53

when fishing under the state waters exemption specified under § 648.54.

[69 FR 35215, June 23, 2004, as amended at 69 FR 63473, Nov. 2, 2004]

EFFECTIVE DATE NOTE: At 70 FR 48867, Aug. 22, 2005, § 648.52 was amended by revising paragraph (c), effective Oct. 21, 2005. For the convenience of the user, the revised text follows:

§ 648.52 Possession and landing limits.

* * * * *

(c) Owners or operators of vessels with a limited access scallop permit that have declared into the Sea Scallop Area Access Program as described in § 648.60 are prohibited from fishing for or landing per trip, or possessing at any time, more than any sea scallop possession and landing limit specified in or specified by the Regional Administrator in accordance with § 648.60(a)(5).

* * * * *

§ 648.53 DAS allocations.

(a) *Assignment to DAS categories.* Subject to the vessel permit application requirements specified in § 648.4, for each fishing year, each vessel issued a limited access scallop permit shall be assigned to the DAS category (full-time, part-time, or Occasional) it was assigned to in the preceding year, except as provided under the small dredge program specified in § 648.51(e).

(b) *Open area DAS allocations.* (1) For fishing years after 2006, total DAS to be used in all areas other than those specified in § 648.59, will be specified through the framework process as specified in § 648.55.

(2) Each vessel qualifying for one of the three DAS categories specified in the table in this paragraph (b)(2) (Full-time, Part-time, or Occasional) shall be allocated the maximum number of DAS for each fishing year it may participate in the open area limited access scallop fishery, according to its category, after deducting research and observer DAS set-asides from the total open area DAS allocation. A vessel whose owner/operator has declared out of the scallop fishery, pursuant to the provisions of § 648.10, or that has used up its maximum allocated DAS, may leave port without being assessed a DAS, as long as it does not fish for or

50 CFR Ch. VI (10–1–05 Edition)

land per trip, or possess at any time, more than 400 lb (181.4 kg) of shucked or 50 bu (17.6 hL) of in-shell scallops and complies with all other requirements of this part. The annual open area DAS allocations for each category of vessel for the fishing years indicated, after deducting DAS for observer and research DAS set-asides, are as follows:

DAS category	2004 ¹	2005	2006
Full-time	42	40	67
Part-time	17	16	27
Occasional	4	3	6

¹ Not including additional DAS allocated as specified in paragraph (b)(4) of this section.

(3) Prior to setting the DAS allocations specified in paragraph (b)(2) of this section, one percent of total available DAS will be set aside to help defray the cost of observers, as specified in paragraph (h)(i) of this section. Two percent of total available DAS will be set aside to pay for scallop related research, as outlined in paragraph (h)(ii) of this section.

(4) *Additional 2004 DAS.* (i) Effective September 15, 2004, DAS for the 2004 fishing year increased by the following amounts:

DAS category	2004 DAS increase
Full-time	20
Part-time	8
Occasional	1

(ii) If a limited access scallop vessel uses the Open Area DAS specified in paragraph (b)(4)(i) of this section, such vessel is not eligible to fish under the Area Access Program described in § 648.60 until March 1, 2005.

(iii) If a TAC for yellowtail flounder is harvested for an Access Area specified in § 648.59(b) through (d), and such area is closed to scallop fishing, a scallop vessel with remaining trips in the affected Access Area may fish any remaining trips in the open areas, with the following maximum DAS use limits:

(A) A full-time vessel may fish up to 20 DAS in 2004, 24 DAS in 2005, and 24 DAS in 2006, not to exceed the maximum number of equivalent DAS charge per trip, as specified in § 648.60(a)(3)(i), associated with the total number of unused Access Area

trip(s). A full-time vessel that has acquired additional trips through a one-for-one trip exchange with another vessel may fish up to 60 DAS in 2005, subject to the maximum number of equivalent DAS associated with the total number of unused Access Area trip(s).

(B) A part-time vessel may fish up to 8 DAS in 2004, 12 DAS in 2005, and 9.6 DAS in 2006, not to exceed the maximum number of equivalent DAS charge per trip, as specified in § 648.60(a)(3)(i), associated with the total number of unused Access Area trip(s). A part-time vessel that has acquired an additional trip through a one-for-one trip exchange with another vessel may fish up to 24 DAS in 2005, subject to the maximum number of equivalent DAS associated with the total number of unused Access Area trip(s).

(C) An occasional vessel may fish up to 1 DAS in 2004, 5 DAS in 2005, and 2 DAS in 2006, not to exceed the maximum number of equivalent DAS charge per trip, as specified in § 648.60(a)(3)(i), associated with the total number of unused Access Area trip(s).

(5) DAS allocations and other management measures are specified for each scallop fishing year, which begins on March 1 and ends on February 28 (or February 29), unless otherwise noted. For example, the 2005 fishing year refers to the period March 1, 2005, through February 28, 2006.

(c) *Sea Scallop Access Area DAS allocations.* Limited access scallop vessels fishing in a Sea Scallop Access Area specified in § 648.59, under the Sea Scallop Area Access Program specified in § 648.60, are allocated a specific number of trips to fish only within the Sea Scallop Access Areas, with the number of DAS charged for each trip designated for each area regardless of actual trip length. The number of trips and DAS to be charged for each scallop permit category and fishing year through 2006 for each Sea Scallop Access Area are provided in paragraphs (c)(1) through (3) of this section. Limited access scallop vessels may fish a maximum number of trips and associated DAS in each Sea Scallop Access Area, as specified in § 648.60(a)(3). In addition, limited access scallop vessels

are allocated a maximum number of trips and DAS that can be used within any of the Scallop Access Areas. As an example, if the total number of trips that a scallop vessel may take is two trips, and there are two Sea Scallop Access Areas opened to controlled fishing, with Area A having a maximum of one trip and Area B having a maximum of two trips, the vessel may take one trip in Area A and one trip in Area B, or both of its total allocated trips in Area B.

(1) Full-time scallop vessels may take seven trips into Scallop Access Areas in 2004, five trips in 2005, and two trips in 2006. DAS charges are 12 DAS for each trip, regardless of trip length.

(2) Part-time scallop vessels may take three trips into Scallop Access Areas in 2004, two trips in 2005, and one trip in 2006. DAS charges are 12 DAS for the Hudson Canyon Access Area and 11.2 DAS for the Closed Area II and Nantucket Lightship Access Areas in 2004, 12 DAS in 2005, and 9.6 DAS in 2006.

(3) Occasional scallop vessels may take two trips into Scallop Access Areas in 2004, one trip in 2005, and one trip in 2006. DAS charges are 12 DAS in 2004 for the Hudson Canyon Access Area and 7 DAS for the Closed Area II or Nantucket Lightship Access Areas, 5 DAS in 2005, and 2 DAS in 2006.

(d) *Adjustments in annual DAS allocations.* Annual DAS allocations shall be established for 2 fishing years through biennial framework adjustments as specified in § 648.55. Except for DAS for the 2006 fishing year, if a biennial framework action is not undertaken by the Council and enacted by NMFS, the allocations from the most recent fishing year will continue. The Council must determine whether or not the 2006 DAS allocations specified in the table in paragraph (b)(2) of this section are sufficient to achieve OY. The 2006 DAS must be adjusted in the first biennial framework, initiated in 2005, if it is determined that the 2006 DAS allocations are unable to achieve OY in the 2006 fishing year. The Council may also adjust DAS allocations through a framework action at any time, if deemed necessary.

(e) *End-of-year carry-over for open area DAS.* With the exception of vessels that

held a Confirmation of Permit History as described in § 648.4(a)(1)(i)(J) for the entire fishing year preceding the carry-over year, limited access vessels that have unused Open Area DAS on the last day of February of any year may carry over a maximum of 10 DAS, not to exceed the total Open Area DAS allocation by permit category, into the next year. DAS carried over into the next fishing year may only be used in Open Areas. DAS sanctioned vessels will be credited with unused DAS based on their unused DAS allocation, minus total DAS sanctioned.

(f) *Accrual of DAS.* Unless the vessel is carrying an observer and is authorized to be charged fewer DAS in Open Areas based on the total available DAS set aside under paragraph (h)(1) of this section, and unless participating in the Area Access Program described in § 648.60, DAS shall accrue to the nearest minute.

(g) *Good Samaritan credit.* Limited access vessels fishing under the DAS program and that spend time at sea assisting in a USCG search and rescue operation or assisting the USCG in towing a disabled vessel, and that can document the occurrence through the USCG, will not accrue DAS for the time documented.

(h) *DAS set-asides—(1) DAS set-aside for observer coverage.* As specified in paragraph (b)(3) of this section, to help defray the cost of carrying an observer, 1 percent of the total DAS will be set aside from the total DAS available for allocation, to be used by vessels that are assigned to take an at-sea observer on a trip other than an Area Access Program trip. The DAS set-aside for observer coverage for the 2004, 2005, and 2006 fishing years are 117 DAS, 111 DAS, and 187 DAS, respectively. On September 15, 2004, the 2004 DAS set-aside will increase by 54 DAS if a final rule is not published that allows access to the GB NE multispecies closed areas. Vessels carrying an observer will be compensated with reduced DAS accrual rates for each trip on which the vessel carries an observer. For each DAS that a vessel fishes for scallops with an observer on board, the DAS will accrue at a reduced rate based on an adjustment factor determined by the Regional Administrator on an annual basis, de-

pendent on the cost of observers, catch rates, and amount of available DAS set-aside. The Regional Administrator shall notify vessel owners of the cost of observers and the DAS adjustment factor through a permit holder letter issued prior to the start of each fishing year. The number of DAS that are deducted from each trip based on the adjustment factor will be deducted from the observer DAS set-aside amount in the applicable fishing year. Utilization of the DAS set-aside will be on a first-come, first-served basis. When the DAS set-aside for observer coverage has been utilized, vessel owners will be notified that no additional DAS remain available to offset the cost of carrying observers. The obligation to carry an observer will not be waived due to the absence of additional DAS allocation. Vessel owners shall be responsible for paying the cost of the observer, regardless of whether the vessel lands or sells sea scallops on that trip, and regardless of the availability of DAS set-aside.

(2) *DAS set-aside for research.* As specified in paragraph (b)(3) of this section, to help support the activities of vessels participating in certain research, as specified in § 648.56; the DAS set-aside for research for the 2004, 2005, and 2006 fishing years are 233 DAS, 223 DAS, and 373 DAS, respectively. Vessels participating in approved research will be authorized to use additional DAS in the applicable fishing year. Notification of and additional DAS allocated will be provided through a letter of authorization, or Exempted Fishing Permit issued by NMFS, as appropriate.

[69 FR 35215, June 23, 2004, as amended at 69 FR 63473, Nov. 2, 2004]

§ 648.54 State waters exemption.

(a) *Limited access scallop vessel exemption.* (1) *DAS requirements.* Any vessel issued a limited access scallop permit is exempt from the DAS requirements specified in § 648.53(b) while fishing exclusively landward of the outer boundary of a state's waters, provided the vessel complies with paragraphs (d) through (g) of this section.

(2) *Gear and possession limit restrictions.* Any vessel issued a limited access scallop permit that is exempt from the DAS requirements of § 648.53(b)

Fishery Conservation and Management

§ 648.55

under paragraph (a) of this section is also exempt from the gear restrictions specified in §648.51(a), (b), (e)(1) and (e)(2), and the possession restrictions specified in §648.52(a), while fishing exclusively landward of the outer boundary of the waters of a state that has been deemed by the Regional Administrator under paragraph (c) of this section to have a scallop fishery and a scallop conservation program that does not jeopardize the biomass and fishing mortality/effort limit objectives of the Scallop FMP, provided the vessel complies with paragraphs (d) through (g) of this section.

(b) *General Category scallop vessel gear and possession limit restrictions.* Any vessel issued a general scallop permit is exempt from the gear restrictions specified in §648.51(a), (b), (e)(1) and (e)(2) while fishing exclusively landward of the outer boundary of the waters of a state that has been determined by the Regional Administrator under paragraph (b)(3) of this section to have a scallop fishery and a scallop conservation program that does not jeopardize the biomass and fishing mortality/effort limit objectives of the Scallop FMP, provided the vessel complies with paragraphs (d) through (g) of this section.

(c) *State eligibility for exemption.* (1) A state may be eligible for the state waters exemption if it has a scallop fishery and a scallop conservation program that does not jeopardize the biomass and fishing mortality/effort limit objectives of the Scallop FMP.

(2) The Regional Administrator shall determine which states have a scallop fishery and which of those states have a scallop conservation program that does not jeopardize the biomass and fishing mortality/effort limit objectives of the Scallop FMP.

(3) Maine, New Hampshire, and Massachusetts have been determined by the Regional Administrator to have scallop fisheries and scallop conservation programs that do not jeopardize the biomass and fishing mortality/effort limit objectives of the Scallop FMP. These states must immediately notify the Regional Administrator of any changes in their respective scallop conservation program. The Regional Administrator shall review these

changes and, if a determination is made that the state's conservation program jeopardizes the biomass and fishing mortality/effort limit objectives of the Scallop FMP, or that the state no longer has a scallop fishery, the Regional Administrator shall publish a rule in the FEDERAL REGISTER, in accordance with the Administrative Procedure Act, amending this paragraph (c)(3) to eliminate the exemption for that state. The Regional Administrator may determine that other states have scallop fisheries and scallop conservation programs that do not jeopardize the biomass and fishing mortality/effort limit objectives of the Scallop FMP. In such case, the Regional Administrator shall publish a rule in the FEDERAL REGISTER, in accordance with the Administrative Procedure Act, amending this paragraph (c)(3) to provide the exemption for such states.

(d) *Notification requirements.* Vessels fishing under the exemptions provided by paragraph(s) (a)(1) and/or (a)(2) of this section must notify the Regional Administrator in accordance with the provisions of §648.10(e).

(e) *Restriction on fishing in the EEZ.* A vessel fishing under a state waters exemption may not fish in the EEZ during the time in which it is fishing under the state waters exemption, as declared under the notification requirements of this section.

(f) *Duration of exemption.* An exemption expires upon a change in the vessel's name or ownership, or upon notification by the participating vessel's owner.

(g) *Applicability of other provisions of this part.* A vessel fishing under the exemptions provided by paragraphs (a) and/or (b) of this section remains subject to all other requirements of this part.

§ 648.55 Framework adjustments to management measures

(a) Biennially, or upon a request from the Council, the Regional Administrator shall provide the Council with information on the status of the scallop resource. Within 60 days of receipt of that information, the Council PDT shall assess the condition of the scallop resource to determine the adequacy of the management measures to achieve

the stock-rebuilding objectives. Based on this information, the PDT shall prepare a Stock Assessment and Fishery Evaluation (SAFE) Report that provides the information and analysis needed to evaluate potential management adjustments. Based on this information and analysis, the Council shall initiate a framework adjustment to establish or revise DAS allocations, rotational area management programs, TACs, scallop possession limits, or other measures to achieve FMP objectives and limit fishing mortality. The Council's development of an area rotation program shall take into account at least the following factors: General rotation policy; boundaries and distribution of rotational closures; number of closures; minimum closure size; maximum closure extent; enforceability of rotational closed and reopened areas; monitoring through resource surveys; and re-opening criteria. Rotational Closures should be considered where projected annual change in scallop biomass is greater than 30 percent. Areas should be considered for Sea Scallop Access Areas where the projected annual change in scallop biomass is less than 15 percent.

(b) The preparation of the SAFE Report shall begin on or about June 1, 2005, for fishing year 2006, and on or about June 1 of the year preceding the fishing year in which measures will be adjusted. With the exception of the 2006 fishing year, if the biennial framework action is not undertaken by the Council, or if a final rule resulting from a biennial framework is not published in the FEDERAL REGISTER with an effective date of March 1, in accordance with the Administrative Procedure Act, the measures from the most recent fishing year shall continue, beginning March 1 of each fishing year.

(c) In the SAFE Report, the Scallop PDT shall review and evaluate the existing management measures to determine if the measures are achieving the FMP objectives and OY from the scallop resource as a whole. In doing so, the PDT shall consider the effects of any closed areas, either temporary, indefinite, or permanent, on the ability of the FMP to achieve OY and prevent overfishing on a continuing basis, as required by National Standard 1 of the

Magnuson-Stevens Act. If the existing management measures are deemed insufficient to achieve FMP objectives and/or are not expected to achieve OY and prevent overfishing on a continuing basis, the PDT shall recommend to the Council appropriate measures and alternatives that will meet FMP objectives, achieve OY, and prevent overfishing on a continuing basis. When making the status determination in the SAFE Report, the PDT shall calculate the stock biomass and fishing mortality for the entire unit stock and consider all sources of scallop mortality to compare with the minimum biomass and maximum fishing mortality thresholds.

(d) In order to assure that OY is achieved and overfishing is prevented, on a continuing basis, the PDT shall recommend management measures necessary to achieve optimum yield-per-recruit from the exploitable components of the resource (*e.g.*, those components available for harvest in the upcoming fishing years), taking into account at least the following factors:

(1) Differential fishing mortality rates for the various spatial components of the resource;

(2) Overall yields from the portions of the scallop resource available to the fishery;

(3) Outlook for phasing in and out closed or controlled access areas under the Area Rotation Program; and

(4) Potential adverse impacts on EFH.

(e) After considering the PDT's findings and recommendations, or at any other time, if the Council determines that adjustments to, or additional management measures are necessary, it shall develop and analyze appropriate management actions over the span of at least two Council meetings. To address interactions between the scallop fishery and sea turtles and other protected species, such adjustments may include proactive measures including, but not limited to, the timing of Sea Scallop Access Area openings, seasonal closures, gear modifications, increased observer coverage, and additional research. The Council shall provide the public with advance notice

Fishery Conservation and Management

§ 648.55

of the availability of both the proposals and the analyses, and opportunity to comment on them prior to and at the second Council meeting. The Council's recommendation on adjustments or additions to management measures must include measures to prevent overfishing of the available biomass of scallops and ensure that OY is achieved on a continuing basis, and must come from one or more of the following categories:

- (1) DAS changes.
- (2) Shell height.
- (3) Offloading window reinstatement.
- (4) Effort monitoring.
- (5) Data reporting.
- (6) Trip limits.
- (7) Gear restrictions.
- (8) Permitting restrictions.
- (9) Crew limits.
- (10) Small mesh line.
- (11) Onboard observers.
- (12) Modifications to the overfishing definition.
- (13) VMS Demarcation Line for DAS monitoring.
- (14) DAS allocations by gear type.
- (15) Temporary leasing of scallop DAS requiring full public hearings.
- (16) Scallop size restrictions, except a minimum size or weight of individual scallop meats in the catch.
- (17) Aquaculture enhancement measures and closures.
- (18) Closed areas to increase the size of scallops caught.
- (19) Modifications to the opening dates of closed areas.
- (20) Size and configuration of rotation management areas.
- (21) Controlled access seasons to minimize bycatch and maximize yield.
- (22) Area-specific DAS or trip allocations.
- (23) TAC specifications and seasons following re-opening.
- (24) Limits on number of area closures.
- (25) TAC or DAS set-asides for funding research.
- (26) Priorities for scallop-related research that is funded by a TAC or DAS set-aside.
- (27) Finfish TACs for controlled access areas.
- (28) Finfish possession limits.
- (29) Sea sampling frequency.

(30) Area-specific gear limits and specifications.

(31) Any other management measures currently included in the FMP.

(f) The Council must select an alternative that will achieve OY and prevent overfishing on a continuing basis, and which is consistent with other applicable law. If the Council fails to act or does not recommend an approvable alternative, the Regional Administrator may select one of the alternatives developed and recommended by the PDT, which would achieve OY and prevent overfishing on a continuing basis and is consistent with applicable law, and shall implement such alternative pursuant to the Administrative Procedure Act.

(g) The Council may make recommendations to the Regional Administrator to implement measures in accordance with the procedures described in this subpart to address gear conflict as defined under § 600.10 of this chapter. In developing such recommendation, the Council shall define gear management areas, each not to exceed 2,700 mi² (6,993 km²), and seek industry comments by referring the matter to its standing industry advisory committee for gear conflict, or to any ad hoc industry advisory committee that may be formed. The standing industry advisory committee or ad hoc committee on gear conflict shall hold public meetings seeking comments from affected fishers and develop findings and recommendations on addressing the gear conflict. After receiving the industry advisory committee findings and recommendations, or at any other time, the Council shall determine whether it is necessary to adjust or add management measures to address gear conflicts and which FMPs must be modified to address such conflicts. If the Council determines that adjustments or additional measures are necessary, it shall develop and analyze appropriate management actions for the relevant FMPs over the span of at least two Council meetings. The Council shall provide the public with advance notice of the availability of the recommendation, the appropriate justification and economic and biological analyses, and opportunity to comment on them prior to and at the second or

final Council meeting before submission to the Regional Administrator. The Council's recommendation on adjustments or additions to management measures for gear conflicts must come from one or more of the following categories:

- (1) Monitoring of a radio channel by fishing vessels.
- (2) Fixed gear location reporting and plotting requirements.
- (3) Standards of operation when gear conflict occurs.
- (4) Fixed gear marking and setting practices.
- (5) Gear restrictions for specific areas (including time and area closures).
- (6) VMS.
- (7) Restrictions on the maximum number of fishing vessels or amount of gear.
- (8) Special permitting conditions.
- (h) The measures shall be evaluated and approved by the relevant committees with oversight authority for the affected FMPs. If there is disagreement between committees, the Council may return the proposed framework adjustment to the standing or ad hoc gear conflict committee for further review and discussion.
- (i) Unless otherwise specified, after developing a framework adjustment and receiving public testimony, the Council shall make a recommendation to the Regional Administrator. The Council's recommendation must include supporting rationale and, if management measures are recommended, an analysis of impacts and a recommendation to the Regional Administrator on whether to publish the framework adjustment as a final rule. If the Council recommends that the framework adjustment should be published as a final rule, the Council must consider at least the following factors and provide support and analysis for each factor considered:

- (1) Whether the availability of data on which the recommended management measures are based allows for adequate time to publish a proposed rule, and whether regulations have to be in place for an entire harvest/fishing season.
- (2) Whether there has been adequate notice and opportunity for participation by the public and members of the

affected industry, consistent with the Administrative Procedure Act, in the development of the Council's recommended management measures.

(3) Whether there is an immediate need to protect the resource or to impose management measures to resolve gear conflicts.

(4) Whether there will be a continuing evaluation of management measures adopted following their promulgation as a final rule.

(j) If the Council's recommendation includes adjustments or additions to management measures, and if, after reviewing the Council's recommendation and supporting information:

(1) The Regional Administrator approves the Council's recommended management measures, the Secretary may, for good cause found pursuant to the Administrative Procedure Act, waive the requirement for a proposed rule and opportunity for public comment in the FEDERAL REGISTER. The Secretary, in doing so, shall publish only the final rule. Submission of a recommendation by the Council for a final rule does not effect the Secretary's responsibility to comply with the Administrative Procedure Act; or

(2) The Regional Administrator approves the Council's recommendation and determines that the recommended management measures should be published first as a proposed rule, the action shall be published as a proposed rule in the FEDERAL REGISTER. After additional public comment, if the Regional Administrator concurs with the Council recommendation, the action shall be published as a final rule in the FEDERAL REGISTER; or

(3) The Regional Administrator does not concur, the Council shall be notified, in writing, of the reasons for the non-concurrence.

(k) Nothing in this section is meant to derogate from the authority of the Secretary to take emergency action under § 305(c) of the Magnuson-Stevens Act.

[69 FR 35215, June 23, 2004, as amended at 69 FR 63474, Nov. 2, 2004]

§ 648.56 Scallop research.

(a) Annually, the Council and NMFS shall prepare and issue a Request for

Fishery Conservation and Management

§ 648.59

Proposals (RFP) that identifies research priorities for projects to be conducted by vessels using research set-aside as specified in §§ 648.53(b)(3) and 648.60(e).

(b) Proposals submitted in response to the RFP must include the following information, as well as any other specific information required within the RFP: A project summary that includes the project goals and objectives; the relationship of the proposed research to scallop research priorities and/or management needs; project design; participants other than the applicant, funding needs, breakdown of costs, and the vessel(s) for which authorization is requested to conduct research activities.

(c) NMFS shall make the final determination as to what proposals are approved and which vessels are authorized to take scallops in excess of possession limits, utilize DAS set-aside for research, or take additional trips into Access Areas. NMFS shall provide authorization of such activities to specific vessels by letter of acknowledgment, letter of authorization, or Exempted Fishing Permit issued by the Regional Administrator, which must be kept on board the vessel.

(d) Upon completion of scallop research projects approved under this part, researchers must provide the Council and NMFS with a report of research findings, which must include: A detailed description of methods of data collection and analysis; a discussion of results and any relevant conclusions presented in a format that is understandable to a non-technical audience; and a detailed final accounting of all funds used to conduct the sea scallop research.

§ 648.57 Sea scallop area rotation program.

(a) An area rotation program is established for the scallop fishery, which may include areas closed to scallop fishing defined in § 648.58, and/or Sea Scallop Access Areas defined in § 648.59, subject to the Sea Scallop Area Access program requirements specified in § 648.60. Areas not defined as Rotational Closed Areas, Sea Scallop Access Areas, EFH Closed Areas, or areas closed to scallop fishing under other FMPs, are open to scallop fishing as

governed by the other management measures and restrictions in this part. The Council's development of area rotation programs is subject to the framework adjustment process specified in § 648.55, including the Area Rotation Program factors included in § 648.55(a).

§ 648.58 Rotational Closed Areas.

(a) *Mid-Atlantic (Elephant Trunk) Closed Area.* Through February 28, 2007, no vessel may fish for scallops in, or possess or land scallops from, the area known as the Elephant Trunk Closed Area. No vessel may possess scallops in the Elephant Trunk Closed Area, unless such vessel is only transiting the area as provided in paragraph (b) of this section. The Elephant Trunk Closed Area is defined by straight lines connecting the following points in the order stated (copies of a chart depicting this area are available from the Regional Administrator upon request):

Point	Latitude	Longitude
ET1	38°50' N.	74°20' W.
ET2	38°10' N.	74°20' W.
ET3	38°10' N.	73°30' W.
ET4	38°50' N.	73°30' W.
ET1	38°50' N.	74°20' W.

(b) *Transiting.* No vessel possessing scallops may enter or be in the area(s) specified in paragraph (a) of this section unless the vessel is transiting the area and the vessel's fishing gear is unavailable for immediate use as defined in § 648.23(b), or there is a compelling safety reason to be in such areas without all such gear being unavailable for immediate use.

§ 648.59 Sea Scallop Access Areas.

(a) *Hudson Canyon Sea Scallop Access Area.* (1) Through February 28, 2006, a vessel issued a limited access scallop permit may fish for, possess, and land scallops in or from, the area known as the Hudson Canyon Sea Scallop Access Area, described in paragraph (a)(2) of this section, only if the vessel is participating in, and complies with the requirements of, the area access program described in § 648.60.

(2) The Hudson Canyon Sea Scallop Access Area is defined by straight lines connecting the following points in the

§ 648.59

order stated (copies of a chart depicting this area are available from the Regional Administrator upon request):

Point	Latitude	Longitude
H1	39°30' N	73°10' W
H2	39°30' N	72°30' W
H3	38°30' N	73°30' W
H4/ET4	38°50' N	73°30' W
H5	38°50' N	73°42' W
H1	39°30' N	73°10' W

(3) *Number of trips.* Based on its permit category, a vessel issued a limited access scallop permit may fish no more than the maximum number of trips during 2004 and 2005 in the Hudson Canyon Access Area, as specified in the table at § 648.60(a)(3)(i), unless the vessel owner has made an exchange with another vessel owner whereby the vessel gains a Hudson Canyon Access Area trip and gives up a trip into another Sea Scallop Access Area, as specified in § 648.60(a)(3)(ii), or unless the vessel is taking a compensation trip for a prior Sea Scallop Access Area trip that was terminated early, as specified in § 648.60(c).

(b) *Closed Area I Access Area.* (1) Through February 28, 2005, and every third fishing year thereafter (*i.e.*, 2007, 2010, etc.) vessels issued scallop permits, except vessels issued a NE Multispecies permit and a general category scallop permit and fishing in an approved SAP under § 648.85 and under multispecies DAS, may not fish for, possess, or land scallops in or from, the area known as the Closed Area I Access Area, described in paragraph (b)(3) of this section.

(2) Beginning March 1, 2005, through February 28, 2007, and for every 2-year fishing year period after each year the area is closed pursuant to paragraph (b)(1) of this section (*i.e.*, the 2008 through 2009 fishing years, and 2011 through 2012 fishing years, etc.), and subject to the seasonal restrictions specified in paragraph (b)(4) of this section, a vessel issued a scallop permit may fish for, possess, and land scallops in or from, the area known as the Closed Area I Access Area, described in paragraph (c)(2) of this section, only if the vessel is participating in, and complies with the requirements of, the area access program described in § 648.60.

50 CFR Ch. VI (10–1–05 Edition)

(3) The Closed Area I Access Area is defined by straight lines connecting the following points in the order stated (copies of a chart depicting this area are available from the Regional Administrator upon request):

Point	Latitude	Longitude
CAIA1	41°26' N	68°30' W
CAIA2	40°58' N	68°30' W
CAIA3	40°55' N	68°53' W
CAIA4	41°04.5' N	69°01' W
CAIA1	41°26' N	68°30' W

(4) *Season.* A vessel issued a scallop permit may not fish for, possess, or land scallops in or from, the area known as the Closed Area I Sea Scallop Access Area, described in paragraph (b)(3) of this section, except during the period June 15 through January 31 of each year the Closed Area I Sea Scallop Access Area is open to scallop vessels.

(5) *Number of trips—(i) Limited access vessels.* Based on its permit category, a vessel issued a limited access scallop permit may fish no more than the maximum number of trips in the Closed Area I Access Area as specified in the table at § 648.60(a)(3)(i), unless the vessel owner has made an exchange with another vessel owner whereby the vessel gains a Closed Area I Access Area trip and gives up a trip into another Sea Scallop Access Area, as specified in § 648.60(a)(3)(ii), or unless the vessel is taking a compensation trip for a prior Sea Scallop Access Area trip that was terminated early, as specified in § 648.60(c).

(ii) *General category vessels.* (A) Except as provided in paragraph (b)(5)(ii)(B) of this section, subject to the possession limit specified in §§ 648.52(b) and 648.60(a)(5), and subject to the seasonal restrictions specified in paragraph (b)(4) of this section, a vessel issued a general category scallop permit may not enter in, or fish for, possess, or land sea scallops in or from the Closed Area I Access Area once the Regional Administrator has provided notification in the FEDERAL REGISTER, in accordance with § 648.60(a)(8), that 162 trips in the 2005 fishing year, and 141 trips in the 2006 fishing year, have been taken, in total, by all general category scallop vessels. The Regional Administrator shall notify all general category

Fishery Conservation and Management

§ 648.59

scallop vessels of the date when the maximum number of allowed trips have been, or are projected to be, taken for the 2005 and 2006 fishing years.

(B) A vessel issued a NE Multispecies permit and a general category scallop permit that is fishing in an approved SAP under §648.85 under multispecies DAS may fish in the Scallop Access Areas without being subject to the restrictions of paragraph (b)(5)(ii)(A) of this section provided that it has not enrolled in the Scallop Area Access program. Such vessel is prohibited from possessing scallops.

(c) *Closed Area II Access Area.* (1) From March 1, 2006, through February 28, 2007, and every third fishing year thereafter, (*i.e.*, 2009, 2012, etc.) vessels issued scallop permits, except vessels issued a NE Multispecies permit and a general category scallop permit and fishing in an approved SAP under §648.85 and under multispecies DAS, may not fish for, possess, or land scallops in or from, the area known as the Closed Area II Access Area, described in paragraph (c)(3) of this section.

(2) From November 2, 2004, through February 28, 2006, and for every 2-year fishing year period after each year the area is closed pursuant to paragraph (c)(1) of this section (*i.e.*, the 2007 through 2008 fishing years, and 2010 through 2011 fishing years, etc.) and subject to the seasonal restrictions specified in paragraph (c)(4) of this section, a vessel issued a scallop permit may fish for, possess, or land scallops in or from, the area known as the Closed Area II Sea Scallop Access Area, described in paragraph (c)(3) of this section, only if the vessel is participating in, and complies with the requirements of, the area access program described in §648.60.

(3) The Closed Area II Sea Scallop Access Area is defined by straight lines connecting the following points in the order stated (copies of a chart depicting this area are available from the Regional Administrator upon request):

Point	Latitude	Longitude
CAIIA1	41°00' N	67°20' W
CAIIA2	41°00' N	66°35.8' W
CAIIA3	41°18.6' N	66°24.8' W

Point	Latitude	Longitude
CAIIA4	41°30' N	66°34.8' W
CAIIA5	41°30' N	67°20' W
CAIIA1	41°00' N	67°20' W

(4) *Season.* A vessel issued a scallop permit may not fish for, possess, or land scallops in or from the area known as the Closed Area II Sea Scallop Access Area, described in paragraph (c)(3) of this section, except during the period June 15 through January 31 of each year the Closed Area II Access Area is open to scallop vessels.

(5) *Number of trips—(i) Limited access vessels.* Based on its permit category, a vessel issued a limited access scallop permit may fish no more than the maximum number of trips in 2004 and 2005 in the Closed Area II Access Area as specified in the table at §648.60(a)(3)(i), unless the vessel owner has made an exchange with another vessel owner whereby the vessel gains a Closed Area II Access Area trip and gives up a trip into another Sea Scallop Access Area, as specified in §648.60(a)(3)(ii), or unless the vessel is taking a compensation trip for a prior Sea Scallop Access Area trip that was terminated early, as specified in §648.60(c).

(ii) *General category vessels.* (A) Except as provided in paragraph (c)(5)(ii)(B) of this section, subject to the possession limits specified in §§648.52(b) and 648.60(a)(5), and subject to the seasonal restrictions specified in paragraph (c)(4) of this section, a vessel issued a general category scallop permit may not enter in, or fish for, possess, or land sea scallops in or from the Closed Area II Access Area once the Regional Administrator has provided notification in the FEDERAL REGISTER, in accordance with §648.60(a)(8), that 420 trips in the 2004 fishing year, and 385 trips in the 2006 fishing year, have been taken, in total, by all general category scallop vessels. The Regional Administrator shall notify all general category scallop vessels of the date when the maximum number of allowed trips have been, or are projected to be, taken for the 2004 and 2005 fishing years.

(B) A vessel issued a NE Multispecies permit and a general category scallop permit that is fishing in an approved

§ 648.59

50 CFR Ch. VI (10–1–05 Edition)

SAP under § 648.85 under multispecies DAS may fish in the Scallop Access Areas without being subject to the restrictions of paragraph (c)(5)(ii)(A) of this section provided that it has not enrolled in the Scallop Area Access program. Such vessel is prohibited from possessing scallops.

(d) *Nantucket Lightship Access Area.*

(1) From March 1, 2005, through February 28, 2006, and every third fishing year thereafter (*i.e.*, 2008, 2011, etc.) vessels issued scallop permits, except vessels issued a NE Multispecies permit and a general category scallop permit and fishing in an approved SAP under § 648.85 and under multispecies DAS, may not fish for, possess, or land scallops in or from the area known as the Nantucket Lightship Access Area, described in paragraph (d)(3) of this section.

(2) From November 2, 2004, through February 28, 2005, and from March 1, 2006, through February 28, 2008, and for every 2-year fishing year period after each year the area is closed pursuant to paragraph (d)(1) of this section (*i.e.*, the 2009 through 2010 fishing years, and 2012 through 2013 fishing years, etc.) and subject to the seasonal restrictions specified in paragraph (d)(4) of this section, a vessel issued a limited access scallop permit may fish for, possess, or land scallops in or from, the area known as the Nantucket Lightship Sea Scallop Access Area, described in paragraph (d)(3) of this section, only if the vessel is participating in, and complies with the requirements of, the area access program described in § 648.60.

(3) The Nantucket Lightship Sea Scallop Access Area is defined by straight lines connecting the following points in the order stated (copies of a chart depicting this area are available from the Regional Administrator upon request):

Point	Latitude	Longitude
NLAA1	40°50' N	69°30' W
NLAA2	40°50' N	69°00' W
NLAA3	40°20' N	69°00' W
NLSS4	40°20' N	69°30' W
NLAA1	40°50' N	69°30' W

(4) *Season.* A vessel issued a scallop permit may not fish for, possess, or land scallops in or from the area

known as the Nantucket Lightship Sea Scallop Access Area, described in paragraph (d)(3) of this section, except during the period June 15 through January 31 of each year the Nantucket Lightship Access Area is open to scallop fishing.

(5) *Number of trips*—(i) *Limited access vessels.* Based on its permit category, a vessel issued a limited access scallop permit may fish no more than the maximum number of trips in the Nantucket Lightship Access Area as specified in the table at § 648.60(a)(3)(i), unless the vessel owner has made an exchange with another vessel owner whereby the vessel gains a Nantucket Lightship Access Area trip and gives up a trip into another Sea Scallop Access Area, as specified in § 648.60(a)(3)(ii), or unless the vessel is taking a compensation trip for a prior Sea Scallop Access Area trip that was terminated early, as specified in § 648.60(c).

(ii) *General category vessels.* (A) Except as provided in paragraph (d)(5)(ii)(B) of this section, subject to the possession limits specified in §§ 648.52(b) and 648.60(a)(5), a vessel issued a general category scallop permit may not enter in, or fish for, possess, or land sea scallops in or from the Nantucket Lightship Access Area once the Regional Administrator has provided notification in the FEDERAL REGISTER, in accordance with § 648.60(a)(8), that 386 trips in the 2004 fishing year, and 340 trips in the 2006 fishing year, have been taken, in total, by all general category scallop vessels. The Regional Administrator shall notify all general category scallop vessels of the date when the maximum number of allowed trips have been, or are projected to be, taken for the 2004 and 2006 fishing years.

(B) A vessel issued a NE Multispecies permit and a general category scallop permit that is fishing in an approved SAP under § 648.85 under multispecies DAS may fish in the Scallop Access Areas without being subject to the restrictions of paragraph (d)(5)(ii)(A) of this section provided that it has not enrolled in the Scallop Area Access program. Such vessel is prohibited from possessing scallops.

(e) *Transiting.* A sea scallop vessel that has not declared a trip into the Sea Scallop Area Access Program may enter in the Sea Scallop Access Areas described in paragraphs (a) through (c) of this section, and possess scallops not caught in the Sea Scallop Access Areas, for transiting purposes only provided the vessel's fishing gear is stowed in accordance with § 648.23(b), or there is a compelling safety reason to be in such areas without such gear being stowed. A scallop vessel that has declared a trip into the Sea Scallop Area Access Program may transit a Scallop Access Area while steaming to or from another Scallop Access Area, provided the vessel's fishing gear is stowed in accordance with § 648.23(b), or there is a compelling safety reason to be in such areas without such gear being stowed. A vessel may only transit the Closed Area II Access Area, as described in paragraph (d) of this section, if there is a compelling safety reason for transiting the area and the vessel's fishing gear is stowed in accordance with § 648.23(b).

[69 FR 63474, Nov. 2, 2004, as amended at 70 FR 2823, Jan. 18, 2005]

§ 648.60 Sea scallop area access program requirements.

(a) A vessel issued a limited access scallop permit may only fish in the Sea Scallop Access Areas specified in § 648.59, subject to the seasonal restrictions specified in § 648.59, when fishing under a scallop DAS, provided the vessel complies with the requirements specified in paragraphs (a)(1) through (a)(9) and (b) through (f) of this section. A vessel issued a general category scallop permit may only fish in the Hudson Canyon Sea Scallop Access Area specified in § 648.59(a), subject to the possession limit specified in § 648.52(a), unless that vessel is fishing in an approved NE multispecies fishery SAP under NE multispecies DAS.

(1) *VMS.* Each vessel participating in the Sea Scallop Access Area Program must have installed on board an operational VMS unit that meets the min-

imum performance criteria specified in §§ 648.9 and 648.10, and paragraph (e) of this section.

(2) *Declaration.* (i) Prior to the 25th day of the month preceding the month in which fishing is to take place, the vessel must submit a monthly report through the VMS e-mail messaging system of its intention to fish in any Sea Scallop Access Area, along with the following information: Vessel name and permit number, owner and operator's name, owner and operator's phone numbers, and number of trips anticipated for each Sea Scallop Access Area in which it intends to fish. The Regional Administrator may waive a portion of this notification period for trips into the Sea Scallop Access Areas if it is determined that there is insufficient time to provide such notification prior to an access opening. Notification of this waiver of a portion of the notification period shall be provided to the vessel through a permit holder letter issued by the Regional Administrator.

(ii) In addition to the information required under paragraph (a)(2)(i) of this section, and for the purpose of selecting vessels for observer deployment, each participating vessel owner or operator shall provide notice to NMFS of the time, port of departure, and specific Sea Scallop Access Area to be fished, at least 72 hr, unless otherwise notified by the Regional Administrator, prior to the beginning of any trip into the Sea Scallop Access Area.

(iii) To fish in a Sea Scallop Access Area, each participating vessel owner or operator shall declare a Sea Scallop Access Area trip via VMS less than one hr prior to the vessel leaving port, in accordance with instructions to be provided by the Regional Administrator.

(3) *Number of Sea Scallop Access Area trips—(i) Table of Limited Access Vessel trips.* (A) Except as provided in paragraph (c) of this section, the table below summarizes the total number of trips and DAS charges for limited access scallop vessels to take into Sea Scallop Access Areas during applicable seasons specified in § 648.59:

Fishing year	Access area	Maximum trips per area and per vessel	Maximum number of trips; and equivalent DAS charge per trip		
			Full-time	Part-time	Occasional
2004	Closed Area II	2	7 trips; 12 DAS.	2 trips; 11.2 DAS.	1 trip; 7 DAS.
	Nantucket Lightship.	1			
	Hudson Canyon ...	4	1 trip; 12 DAS.	1 trip; 12 DAS.
2005	Closed Area I	1	5 trips; 12 DAS.	2 trips; 12 DAS.	1 trip; 5 DAS.
	Closed Area II	1			
	Hudson Canyon ...	3			
2006	Closed Area I	1	2 trips; 12 DAS.	1 trip; 9.6 DAS.	1 trip; 2 DAS.
	Nantucket Lightship.	1			

(B) A limited access scallop vessel fishing in Sea Scallop Access Areas may fish the maximum number of trips specified above according to the vessel's category in any Sea Scallop Access Area, provided the number of trips in any one Sea Scallop Access Area does not exceed the maximum number of trips allocated for such Sea Scallop Access Area as specified in § 648.59, unless the vessel owner has exchanged a trip with another vessel owner for an additional Sea Scallop Access Area trip, as specified in paragraph (a)(3)(ii) of this section. The DAS specified in the table in this paragraph (a)(3)(i) shall be automatically deducted for each Sea Scallop Access Area trip.

(ii) *One-for-one area access trip exchanges.* If the total number of trips allocated to a vessel into all Sea Scallop Access Areas combined is more than one, the owner of a vessel issued a limited access scallop permit may exchange, on a one-for-one basis, unutilized trips into one access area for another vessel's unutilized trips into another Sea Scallop Access Area. One-for-one exchanges may be made only between vessels with the same permit category. For example, a full-time vessel may not exchange trips with a part-time vessel and vice versa. Vessel owners must request the exchange of trips by submitting a completed Trip Exchange Form at least 15 days before the date on which the applicant desires the exchange to be effective, but no later than February 2, 2005, in 2004, and June

1 of each year thereafter. Each vessel involved in an exchange is required to submit a completed Trip Exchange Form. Trip Exchange Forms will be provided by the Regional Administrator upon request. The Regional Administrator shall review the records for each vessel to confirm that each vessel has unutilized trips remaining to transfer. The transfer is not effective until the vessel owner(s) receive a confirmation in writing from the Regional Administrator that the trip exchange has been made effective. A vessel owner may exchange trips between two or more vessels under his/her ownership. A vessel owner holding a Confirmation of Permit History is not eligible to exchange trips.

(iii) [Reserved]

(4) *Area fished.* While on a Sea Scallop Access Area trip, a vessel may not fish for, possess, or land scallops in or from outside the specific declared Sea Scallop Access Area during that trip, and may not enter or exit the specific declared Sea Scallop Access Area more than once per trip. A vessel on a Sea Scallop Access Area trip may not enter or be in another Sea Scallop Access Area on the same trip except such vessel may transit another Sea Scallop Access Area provided its gear is stowed in accordance with § 648.23(b).

(i) *Reallocation of trips into open areas.* If the yellowtail flounder TAC allocated for a Scallop Access Area specified in § 648.59(b) through (d) has been harvested and such area has been

Fishery Conservation and Management

§ 648.60

closed, a vessel with trips remaining to be taken in such Access Areas may fish the remaining DAS associated with the unused trip(s) in Open Areas, up to the maximum DAS specified in § 648.53(b)(4)(iii)(A) through (C).

(ii) [Reserved]

(5) *Possession and landing limits*—(i) *Scallop possession limits*. Unless authorized by the Regional Administrator as specified in paragraphs (c) and (d) of

this section, after declaring a trip into a Sea Scallop Access Area, a vessel owner or operator of a limited access scallop vessel may fish for, possess, and land, per trip, scallops, up to the maximum amounts specified in the table in this paragraph (a)(5). No vessel fishing in the Sea Scallop Access Area may possess shoreward of the VMS demarcation line or land, more than 50 bu (17.6 hl) of in-shell scallops.

Fishing year	Access area	Possession limit		
		Full-time	Part-time	Occasional
2004	Closed Area II	18,000 lb (8,165 kg).	16,800 lb (7,620 kg).	10,500 lb (4,763 kg).
	Nantucket Lightship Hudson Canyon		18,000 lb (8,165 kg).	18,000 lb (8,165 kg).
2005	Closed Area I	18,000 lb (8,165 kg).	18,000 lb (8,165 kg).	7,500 lb (3,402 kg).
	Closed Area II Hudson Canyon			
2006	Closed Area I	18,000 lb (8,165 kg).	14,400 lb (6,532 kg).	3,000 lb (1,361 kg).
	Nantucket Lightship			

(ii) *NE multispecies possession limits and yellowtail flounder TAC*. After declaring a trip into a Sea Scallop Access Area and fishing within the Access Areas described in § 648.59(b) through (d), and provided the vessel has been issued a Scallop NE Multispecies Possession Limit permit as specified in § 648.4(a)(1)(ii), a vessel owner or operator of a limited access scallop vessel may fish for, possess, and land, per trip, up to a maximum of 1,000 lb (453.6 kg) of all NE multispecies combined, subject to the minimum commercial fish size restrictions specified in § 648.83(a)(2), and the additional restrictions for Atlantic cod, haddock, and yellowtail flounder specified in paragraphs (a)(5)(ii)(A) through (C) of this section.

(A) *Atlantic Cod*. A vessel may bring onboard and possess only up to 100 lb (45.4 kg) of Atlantic cod per trip, provided such fish is intended for personal use only and cannot be not sold, traded, or bartered.

(B) *Haddock*. Subject to the seasonal restrictions established under the Sea Scallop Area Access Program and specified in § 648.59(b)(4), (c)(4), and (d)(4), a vessel is prohibited from possessing or

landing haddock from January 1 through June 30, but may possess and land haddock up to the overall possession limit of all NE multispecies combined, as specified in paragraph (a)(5)(ii) of this section for the rest of the Sea Scallop Area Access Program season.

(C) *Yellowtail flounder*—(1) *Yellowtail flounder TACs*. Limited access scallop vessels participating in the Area Access Program and fishing within the Access Areas specified in § 648.59(b) through (d), are authorized to catch yellowtail flounder up to the TACs specified in § 648.85(c) for the Closed Area I, Closed Area II, and Nantucket Lightship Access Scallop Areas. The Regional Administrator shall publish notification in the FEDERAL REGISTER in accordance with the Administrative Procedure Act, to notify scallop vessel owners that the scallop fishery portion of the TAC for a yellowtail flounder stock has been or is projected to be harvested by scallop vessels in any Access Area. Upon notification in the FEDERAL REGISTER that a TAC has been or is projected to be harvested, scallop vessels are prohibited from declaring and initiating a trip within the

Access Area(s), where the TAC applies, for the remainder of the fishing year. The yellowtail flounder TACs allocated to scallop vessels may be increased by the Regional Administrator after December 1 of each year pursuant to § 648.85(c)(2).

(2) *SNE/MA yellowtail flounder possession limit.* After declaring a trip into and fishing within the Nantucket Lightship Access Area described in § 648.59(d), the vessel owner or operator of a limited access scallop vessel may fish for, possess, and land up to 250 lb (113.6 kg) per trip of yellowtail flounder between June 15 and June 30, and from July 1 through January 31, up to 1,000 lb (453.6 kg) per trip subject to the amount of other NE multispecies on-board, provided the yellowtail flounder TAC as specified in § 648.85(c)(i) has not been harvested.

(3) *GB yellowtail flounder possession limit.* After declaring a trip into and fishing within the Closed Area I or Closed Area II Access Area described in § 648.59(b) and (c), the vessel owner or operator of a limited access scallop vessel may fish for, possess, and land up to 1,000 lb (453.6 kg) per trip of yellowtail flounder subject to the amount of other NE multispecies on-board, provided the yellowtail flounder TAC specified in § 648.85(c) has not been harvested. If the yellowtail flounder TAC established for the Eastern U.S./Canada Area pursuant to § 648.85(a)(2) has been or is projected to be harvested, as described in § 648.85(a)(3)(iv)(C)(3), scallop vessels are prohibited from harvesting, possessing, or landing yellowtail flounder in or from the Closed Area I and Closed Area II Access Areas.

(iii) [Reserved]

(6) *Gear restrictions.* (i) The minimum ring size for dredge gear used by a vessel fishing on a Sea Scallop Access Area trip is 4 inches (10.2 cm) in diameter. Dredge or trawl gear used by a vessel fishing on a Sea Scallop Access Area trip must be in accordance with the restrictions specified in § 648.51(a) and (b).

(ii) [Reserved]

(7) *Transiting.* While outside a Sea Scallop Access Area on a Sea Scallop Access Area trip, the vessel must have all fishing gear stowed in accordance

with § 648.23(b), unless there is a compelling safety reason to be in the area without gear stowed.

(8) *Off-loading restrictions.* The vessel may not off-load its catch from a Sea Scallop Access Area trip at more than one location per trip.

(9) *Reporting.* The owner or operator must submit reports through the VMS, in accordance with instructions to be provided by the Regional Administrator, for each day fished when declared in the Sea Scallop Area Access Program, including trips accompanied by a NMFS-approved observer. The reports must be submitted in 24-hour intervals, for each day beginning at 0000 hours and ending at 2400 hours. The reports must be submitted by 0900 hours of the following day and must include the following information:

(i) Total pounds/kilograms of scallop meats kept, total number of tows and the Fishing Vessel Trip Report log page number.

(ii) Total pounds/kilograms of yellowtail flounder kept and total pounds/kilograms of yellowtail flounder discarded.

(iii) For each trip that the vessel has a NMFS approved observer on board, the total pounds/kilograms of scallop meats kept and the total pounds/kilograms of yellowtail flounder caught on all tows that were observed by a NMFS approved observer.

(b) *Accrual of DAS.* For each Sea Scallop Access Area trip, except as provided in paragraph (c) of this section, a vessel on a Sea Scallop Access Area trip shall have DAS specified in paragraph (a)(3) of this section deducted from its Access Area DAS allocation, regardless of the actual number of DAS used during the trip.

(c) *Compensation for Sea Scallop Access Area trips terminated early.* If a Sea Scallop Access Area trip is terminated before catching the allowed possession limit, the vessel may be authorized to fish an additional trip in the same Sea Scallop Access Area based on the conditions and requirements of paragraphs (c)(1) through (5) of this section.

(1) The vessel owner/operator has determined that the Sea Scallop Access Area trip should be terminated early for reasons deemed appropriate by the operator of the vessel;

(2) The amount of scallops landed by the vessel for the trip must be less than the maximum possession limit specified in paragraph (a)(5) of this section.

(3) The vessel owner/operator must report the termination of the trip prior to leaving the Sea Scallop Access Area by VMS email messaging, with the following information: Vessel name, vessel owner, vessel operator, time of trip termination, reason for terminating the trip (for NMFS recordkeeping purposes), expected date and time of return to port, and amount of scallops on board in pounds.

(4) The vessel owners/operator must request that the Regional Administrator authorize an additional trip as compensation for the terminated trip by submitting a written request to the Regional Administrator within 30 days of the vessel's return to port from the terminated trip.

(5) The Regional Administrator shall authorize the vessel to take an additional trip and shall specify the amount of scallops that the vessel may land on such trip and the number of DAS charged for such trip, pursuant to the calculation specified in paragraph (c)(5)(i) of this section. Such authorization shall be made within 10 days of receipt of the formal written request for compensation.

(i) The amount of scallops that can be landed on an authorized additional Sea Scallop Access Area trip shall equal the possession limit specified in paragraph (a)(5) of this section minus the amount of scallops landed on the terminated trip. For example, in the 2005 fishing year, if a full-time scallop vessel lands 6,500 lb (2,948.4 kg) of scallops and requests compensation for the terminated trip, the possession limit for the additional trip is 11,500 lb (5,216.3 kg) or 18,000 lb (8,164.7 kg) minus 6,500 lb (2,948.4 kg).

(ii) If a vessel is authorized more than one additional trip for compensation into any Sea Scallop Access Area as the result of more than one terminated trip in the same Access Area, the possession limits for the authorized trips may be combined, provided the total possession limit on a combined compensation trip does not exceed the possession limit for a trip as specified

in paragraph (a)(5) of this section. For example, a vessel that has two broken trips with corresponding compensation trip authorizations of 10,000 lb (4,535.9 kg) and 8,000 lb (3,628.7 kg) may combine the authorizations to allow one compensation trip with a possession limit of 18,000 lb (8,164.6 kg).

(iii) A vessel that terminated a 2005 access area trip after March 1, 2005, but before August 22, 2005, shall be issued authorization to harvest the amount of pounds deducted from the possession limit for the additional trip. The Regional Administrator will issue this authorization automatically, without request from the vessel owner. A rebated possession limit may be combined with other additional trips as described in paragraph (c)(5)(ii) of this section.

(d) *Possession limit to defray costs of observers*—(1) *Observer set-aside limits by area*—(i) *Hudson Canyon Access Area*. For 2004 and 2005, the observer set-asides for the Hudson Canyon Access Area are 187,900 lb (85.2 mt) and 149,562 lb (67.8 mt), respectively.

(ii) *Closed Area I Access Area*. For the 2005 and 2006 fishing years, the observer set-asides for the Closed Area I Access Area are 32,430 lb (15 mt) and 28,241 lb (13 mt), respectively.

(iii) *Closed Area II Access Area*. For the 2004 and 2005 fishing years, the observer set-asides for the Closed Area II Access Area are 83,952 lb (38 mt) and 76,958 lb (35 mt), respectively.

(iv) *Nantucket Lightship Access Area*. For the 2004 and 2006 fishing years, the observer set-asides for the Nantucket Lightship Access Area are 77,184 lb (35 mt) and 67,968 lb (31 mt), respectively.

(2) *Increase in the possession limit to defray the costs of observers*. The Regional Administrator may increase the sea scallop possession limit specified in paragraph (a)(5) of this section to defray costs of at-sea observers deployed on area access trips subject to the limits specified in paragraph (d)(1) of this section. Owners of scallop vessels shall be notified of the increase in the possession limit through a permit holder letter issued by the Regional Administrator. If the observer set-aside is fully utilized prior to the end of the fishing year, the Regional Administrator shall notify owners of scallop vessels that,

effective on a specified date, the possession limit will be decreased to the level specified in paragraph (a)(5) of this section. Vessel owners shall be responsible for paying the cost of the observer, regardless of whether the vessel lands or sells sea scallops on that trip, and regardless of the availability of set-aside for an increased possession limit.

(e) *Possession limits and/or number of trips to defray the costs of sea scallop research*—(1) *Research set-aside limits and number of trips by area*—(i) *Hudson Canyon Access Area*. For the 2004 and 2005 fishing years, the research set-asides for the Hudson Canyon Access Area are 375,800 lb (170.5 mt) and 299,123 lb (135.7 mt), respectively.

(ii) *Closed Area I Access Area*. For the 2005 and 2006 fishing years, the research set-asides for the Closed Area I Access Area are 64,860 lb (29 mt) and 56,482 lb (26 mt), respectively.

(iii) *Closed Area II Access Area*. For the 2004 and 2005 fishing years, the research set-asides for the Closed Area II Access Area are 167,904 lb (76 mt) and 153,971 lb (70 mt), respectively.

(iv) *Nantucket Lightship Access Area*. For the 2004 and 2006 fishing years, the research set-asides for the Nantucket Lightship Access Area are 154,368 lb (70 mt) and 135,937 lb (62 mt), respectively.

(2) *Increase of possession limit to defray the costs of sea scallop research*. The Regional Administrator may increase the sea scallop possession limit specified in paragraph (a)(5) of this section or allow additional trips into a Sea Scallop Access Area to defray costs for approved sea scallop research up to the amount specified in paragraph (e)(1) of this section.

(3) *Yellowtail flounder research TAC set-aside*. Vessels conducting research approved under the process described in § 648.56, and in the Access Areas specified in § 648.59(b) through (d) may harvest yellowtail flounder up to the TACs specified in the table in this paragraph (e)(3), and subject to the possession limits specified in paragraph (a)(5)(ii)(C) of this section. If the TACs listed in the table in this paragraph (e)(3) are harvested, research may no longer be authorized in the applicable Access Area.

Yellowtail flounder stock	Access area	Fishing year	Yellowtail flounder research TAC
Southern New England	Nantucket Lightship	2004	3,086 lb (1.4 mt).
		2005	8,818 lb (4.0 mt).
		2006	14,771 lb (6.7 mt).
GB	Closed Area I and Closed Area II	2004	26,455 lb (12 mt).
		2005	(¹)
		2006	(¹)

To be established annually, according to the specification procedure described in § 648.85(a)(2).

(f) *VMS polling*. For the duration of the Sea Scallop Area Access Program, as described in this section, all sea scallop vessels equipped with a VMS unit shall be polled at a minimum of twice per hour, regardless of whether the vessel is enrolled in the Sea Scallop Area Access Program. Vessel owners shall be responsible for paying the costs of polling twice per hour.

(g) *General category scallop vessels*. (1) A vessel issued a general category scallop permit, except a vessel issued a NE Multispecies permit and a general category scallop permit that is fishing in an approved SAP under § 648.85 under multispecies DAS that has not enrolled in the general category Access Area fishery, may only fish in the Closed

Area I, Closed Area II, and Nantucket Lightship Sea Scallop Access Areas specified in § 648.59(b) through (d), subject to the seasonal restrictions specified in § 648.59(b)(4), (c)(4), and (d)(4), and subject to the possession limit specified in § 648.52(a), and provided the vessel complies with the requirements specified in paragraphs (a)(1), (a)(2), (a)(6) through (a)(9), (d), (e), (f), and (g) of this section, and § 648.85(c)(3)(ii). A vessel issued a NE Multispecies permit and a general category scallop permit that is fishing in an approved SAP under § 648.85 under multispecies DAS that has not enrolled in the Sea Scallop Area Access program as specified in paragraph (a)(2) of this section is not

Fishery Conservation and Management

§ 648.70

subject to the restrictions and requirements specified in § 648.59(b)(5)(ii), (c)(5)(ii), (d)(5)(ii), and this paragraph (g).

(2) *Gear restrictions.* The combined dredge width in use by, or in possession on board, general category scallop vessels fishing in the Access Areas described in § 648.59(b) through (d) may not exceed 10.5 ft (3.2 m), measured at the widest point in the bail of the dredge.

(3) *Scallop TAC.* General category vessels fishing in the Access Areas specified in § 648.59(b) through (d) are authorized to land scallops, subject to the possession limit specified in § 648.52(a), up to the amount allocated to the scallop TACs for each Access Area specified below. If the scallop TAC for a specified Access Area has been, or is projected to be harvested, the Regional Administrator shall publish notification in the FEDERAL REGISTER, in accordance with the Administrative Procedure Act, to notify general category vessels that they may no longer fish within the specified Access Area.

(i) *Closed Area I Access Area.* 64,840 lb (29 mt) in 2005, and 56,482 lb (25.6 mt) in 2006.

(ii) *Closed Area II Access Area.* 167,904 (76 mt) in 2004, and 153,971 lb (70 mt) in 2005.

(iii) *Nantucket Lightship Access Area.* 154,368 lb (70 mt) in 2004, and 135,937 lb (62 mt) in 2006.

(iv) *Possession Limits—(A) Scallops.* A vessel issued a NE Multispecies permit and a general category scallop permit that is fishing in an approved SAP under § 648.85 under multispecies DAS that has not enrolled in the general category Access Area fishery is prohibited from possessing scallops. General category scallop vessels fishing in the Access Areas specified in § 648.59(b) through (d) may possess scallops up to the possession limit specified in § 648.52(b), subject to a limit on the total number of trips that can be taken by all such vessels into the Access Areas, as specified in § 648.59(b)(5)(ii), (c)(5)(ii), and (d)(5)(ii). If the number of trips allowed have been or are projected to be taken, the Regional Administrator shall publish notification in the FEDERAL REGISTER, in accordance with the Administrative Procedure

Act, to notify general category vessels that they may no longer fish within the specified Access Area.

(B) *Other species.* Except for vessels issued a general category scallop permit and fishing under an approved NE multispecies SAP under NE multispecies DAS, general category vessels fishing in the Access Areas specified in § 648.59(b) through (d) are prohibited from possessing any other species of fish.

(4) *Number of trips.* General category scallop vessels may not fish for, possess, or land scallops in or from the Access Areas specified in § 648.59(b) through (d) after the effective date of the notification published in the FEDERAL REGISTER, stating that the total number of trips specified in § 648.59(b)(5)(ii), (c)(5)(ii), and (d)(5)(ii) have been, or are projected to be, taken by general category scallop vessels.

[69 FR 63476, Nov. 2, 2004, as amended at 70 FR 2823, Jan. 18, 2005; 70 FR 48867, Aug. 22, 2005]

§ 648.61 EFH closed areas.

(a) No scallop fishing vessel may enter, fish in, or be in the EFH Closure Areas described in § 648.80(h)(1)(i) through (iv). A chart depicting these areas is available from the Regional Administrator upon request.

(b) *Transiting.* A scallop vessel may transit the EFH Closure Areas, as defined in § 648.81(h)(1), provided that its gear is stowed in accordance with the provisions of § 648.23(b), and that it complies with the transiting restrictions for the Closed Area II Habitat Closure Area specified in § 648.81(b)(2)(iv).

[69 FR 63480, Nov. 2, 2004]

Subpart E—Management Measures for the Atlantic Surf Clam and Ocean Quahog Fisheries

§ 648.70 Annual individual allocations.

(a) *General.* (1) Each fishing year, the Regional Administrator shall determine the initial allocation of surfclams and ocean quahogs for the next fishing year for each allocation holder owning an allocation pursuant to paragraph (a)(2) of this section. For each species,

§ 648.71

the initial allocation for the next fishing year is calculated by multiplying the allocation percentage owned by each allocation owner as of the last day of the previous fishing year in which allocation owners are permitted to permanently transfer allocation percentage pursuant to paragraph (b) of this section (i.e., October 15 of every year), by the quota specified by the Regional Administrator pursuant to § 648.71. The total number of bushels of allocation shall be divided by 32 to determine the appropriate number of cage tags to be issued or acquired under § 648.75. Amounts of allocation 0.5 or smaller created by this division shall be rounded downward to the nearest whole number, and amounts of allocation greater than 0.5 created by this division shall be rounded upward to the nearest whole number, so that allocations are specified in whole cages. These allocations shall be made in the form of an allocation permit specifying the allocation percentage and the allocation in bushels and cage tags for each species. An allocation permit is only valid for the entity for which it is issued. Such permits shall be issued on or before December 15, to allow allocation owners to purchase cage tags from a vendor specified by the Regional Administrator pursuant to § 648.75(b).

(2) The Regional Administrator may, after publication of a fee notification in the FEDERAL REGISTER, charge a permit fee before issuance of the permit to recover administrative expenses. Failure to pay the fee will preclude issuance of the permit.

(b) *Transfers*— (1) *Allocation percentage*. Subject to the approval of the Regional Administrator, part or all of an allocation percentage may be transferred in the year in which the transfer is made, to any person or entity eligible to own a documented vessel under the terms of 46 U.S.C. 12102(a). Approval of a transfer by the Regional Administrator and for a new allocation permit reflecting that transfer may be requested by submitting a written application for approval of the transfer and for issuance of a new allocation permit to the Regional Administrator at least 10 days before the date on which the applicant desires the transfer to be effective, in the form of a

50 CFR Ch. VI (10–1–05 Edition)

completed transfer log supplied by the Regional Administrator. The transfer is not effective until the new holder receives a new or revised annual allocation permit from the Regional Administrator. An application for transfer may not be made between October 15 and December 31 of each year.

(2) *Cage tags*. Cage tags issued pursuant to § 648.75 may be transferred at any time, and in any amount subject to the restrictions and procedure specified in paragraph (b)(1) of this section; provided that application for such cage tag transfers may be made at any time before December 10 of each year. The transfer is effective upon the receipt by the transferee of written authorization from the Regional Administrator.

(3) *Review*. If the Regional Administrator determines that the applicant has been issued a Notice of Permit Sanction for a violation of the Magnuson Act that has not been resolved, he/she may decline to approve such transfer pending resolution of the matter.

[61 FR 34968, July 3, 1996, as amended at 68 FR 69973, Dec. 16, 2003; 70 FR 2026, Jan. 12, 2005]

§ 648.71 Catch quotas.

(a) *Establishing quotas*. Beginning in 2005, the amount of surfclams or ocean quahogs that may be caught annually by fishing vessels subject to these regulations will be specified for a 3-year period by the Regional Administrator. The initial 3-year specification will be based on the most recent available survey and stock assessments for Atlantic surfclams and ocean quahogs. Subsequent 3-year specifications of the annual quotas will be accomplished in the third year of the quota period, unless the quotas are modified in the interim pursuant to § 648.71(b). The amount of surfclams available for harvest annually must be specified within the range of 1.85 to 3.4 m bu (98.5 to 181 m L) per year. The amount of ocean quahogs available for harvest annually must be specified within the range of 4 to 6 m bu (213 to 319.4 m L).

(1) *Quota reports*. On an annual basis, MAFMC staff will produce an Atlantic surfclam and ocean quahog annual quota recommendation paper to the MAFMC based on the latest available stock assessment report prepared by

NMFS, data reported by harvesters and processors, and other relevant data, as well as the information contained in paragraphs (a)(1)(i) through (vi) of this section. Based on that report, and at least once prior to August 15 of the year in which a 3-year annual quota specification expires, the MAFMC, following an opportunity for public comment, will recommend to the Regional Administrator annual quotas and estimates of DAH and DAP within the ranges specified for a 3-year period. In selecting the annual quotas, the MAFMC shall consider the current stock assessments, catch reports, and other relevant information concerning:

- (i) Exploitable and spawning biomass relative to the OY.
- (ii) Fishing mortality rates relative to the OY.
- (iii) Magnitude of incoming recruitment.
- (iv) Projected effort and corresponding catches.
- (v) Geographical distribution of the catch relative to the geographical distribution of the resource.
- (vi) Status of areas previously closed to surfclam fishing that are to be opened during the year and areas likely to be closed to fishing during the year.

(2) *Public review.* Based on the recommendation of the MAFMC, the Regional Administrator shall publish proposed surfclam and ocean quahog quotas in the FEDERAL REGISTER. Comments on the proposed annual quotas may be submitted to the Regional Administrator within 30 days after publication. The Assistant Administrator shall consider all comments, determine the appropriate annual quotas, and publish the annual quotas in the FEDERAL REGISTER each year. The quota shall be set at that amount that is most consistent with the objectives of the Atlantic Surfclam and Ocean Quahog FMP. The Regional Administrator may set quotas at quantities different from the MAFMC's recommendations only if he/she can demonstrate that the MAFMC's recommendations violate the national standards of the Magnuson-Stevens Act and the objectives of the Atlantic Surfclam and Ocean Quahog FMP and other applicable law.

(b) *Interim quota modifications.* Based upon information presented in the

quota reports described in paragraph (a)(1) of this section, the MAFMC may recommend to the Regional Administrator a modification to the annual quotas that have been specified for a 3-year period and any estimate of DAH or DAP made in conjunction with such specifications within the ranges specified in paragraph (a)(1) of this section. Based upon the Council's recommendation, the Regional Administrator may propose surfclam and or ocean quahog quotas that differ from the annual quotas specified for the current 3-year period. Such modification shall be in effect for a period of 3 years from the year in which it is first implemented, unless further modified. Any interim modification shall follow the same procedures for establishing the annual quotas that are specified for a 3-year period.

(c) *Annual quotas.* The annual quotas for surfclams and ocean quahogs will remain effective unless revised pursuant to this section. NMFS will issue notification in the FEDERAL REGISTER if the previous year's specifications will not be changed.

[68 FR 69973, Dec. 16, 2003, as amended at 70 FR 2026, Jan. 12, 2005]

§ 648.72 Minimum surf clam size.

(a) *Minimum length.* The minimum length for surf clams is 4.75 inches (12.065 cm).

(b) *Determination of compliance.* No more than 50 surf clams in any cage may be less than 4.75 inches (12.065 cm) in length. If more than 50 surf clams in any inspected cage of surf clams are less than 4.75 inches (12.065 cm) in length, all cages landed by the same vessel from the same trip are deemed to be in violation of the minimum size restriction.

(c) *Suspension.* Upon the recommendation of the MAFMC, the Regional Administrator may suspend annually, by publication in the FEDERAL REGISTER, the minimum shell-height standard, unless discard, catch, and survey data indicate that 30 percent of the surf clams are smaller than 4.75 inches (12.065 cm) and the overall reduced shell height is not attributable to beds where the growth of individual surf clams has been reduced because of density dependent factors.

(d) *Measurement.* Length is measured at the longest dimension of the surf clam shell.

§ 648.73 Closed areas.

(a) *Areas closed because of environmental degradation.* Certain areas are closed to all surf clam and ocean quahog fishing because of adverse environmental conditions. These areas will remain closed until the Assistant Administrator determines that the adverse environmental conditions no longer exist. If additional areas are identified by the Assistant Administrator as being contaminated by the introduction or presence of hazardous materials or pollutants, they may be closed by the Assistant Administrator in accordance with paragraph (c) of this section. The areas closed are:

(1) *Boston Foul Ground.* The waste disposal site known as the “Boston Foul Ground” and located at 42°25’36” N. lat., 70°35’00” W. long., with a radius of 1 nautical mile in every direction from that point.

(2) *New York Bight.* The polluted area and waste disposal site known as the “New York Bight” and located at 40°25’04” N. lat., 73°42’38” W. long., and with a radius of 6 nm in every direction from that point, extending further northwestward, westward and southwestward between a line from a point on the arc at 40°31’00” N. lat., 73°43’38” W. long., directly northward toward Atlantic Beach Light in New York to the limit of the state territorial waters of New York; and a line from the point on the arc at 40°19’48” N. lat., 73°45’42” W. long., to a point at the limit of the state territorial waters of New Jersey at 40°14’00” N. lat., 73°55’42” W. long.

(3) *106 Dumpsite.* The toxic industrial site known as the “106 Dumpsite” and located between 38°40’00” and 39°00’00” N. lat., and between 72°00’00” and 72°30’00” W. long.

(4) *Georges Bank.* The paralytic shellfish poisoning (PSP) contaminated area, which is located in Georges Bank, and is located east of 69° W. longitude, and south of 42°20’ N. latitude.

(b) *Areas closed because of small surf clams.* Areas may be closed because they contain small surf clams.

(1) *Closure.* The Assistant Administrator may close an area to surf clams

and ocean quahog fishing if he/she determines, based on logbook entries, processors’ reports, survey cruises, or other information, that the area contains surf clams of which:

(i) Sixty percent or more are smaller than the minimum size (4.5 inches (11.43 cm)); and

(ii) Not more than 15 percent are larger than 5.5 inches (13.97 cm) in size.

(2) *Reopening.* The Assistant Administrator may reopen areas or parts of areas closed under paragraph (b)(1) of this section if he/she determines, based on survey cruises or other information, that:

(i) The average length of the dominant (in terms of weight) size class in the area to be reopened is equal to or greater than 4.75 inches (12.065 cm); or

(ii) The yield or rate of growth of the dominant shell-height class in the area to be reopened would be significantly enhanced through selective, controlled, or limited harvest of surf clams in the area.

(c) *Procedure.* (1) The Regional Administrator may hold a public hearing on the proposed closure or reopening of any area under paragraph (a) or (b) of this section. The Assistant Administrator shall publish notification in the FEDERAL REGISTER of any proposed area closure or reopening, including any restrictions on harvest in a reopened area. Comments on the proposed closure or reopening may be submitted to the Regional Administrator within 30 days after publication. The Assistant Administrator shall consider all comments and publish the final notification of closure or reopening, and any restrictions on harvest, in the FEDERAL REGISTER. Any adjustment to harvest restrictions in a reopened area shall be made by notification in the FEDERAL REGISTER. The Regional Administrator shall send notice of any action under this paragraph (c)(1) to each surf clam and ocean quahog processor and to each surf clam and ocean quahog permit holder.

(2) If the Regional Administrator determines, as the result of testing by state, Federal, or private entities, that a closure of an area under paragraph (a) of this section is necessary to prevent any adverse effects fishing may have on the public health, he/she may

Fishery Conservation and Management

§ 648.75

close the area for 60 days by publication of notification in the FEDERAL REGISTER, without prior comment or public hearing. If an extension of the 60-day closure period is necessary to protect the public health, the hearing and notice requirements of paragraph (c)(1) of this section shall be followed.

(d) *Areas closed due to the presence of paralytic shellfish poisoning toxin*—(1) *Maine mahogany quahog zone.* The Maine mahogany quahog zone is closed to fishing for ocean quahogs except in those areas of the zone that are tested by the State of Maine and deemed to be within the requirements of the National Shellfish Sanitation Program and adopted by the Interstate Shellfish Sanitation Conference as acceptable limits for the toxin responsible for paralytic shellfish poisoning. Harvesting is allowed in such areas during the periods specified by the Maine Department of Marine Resources during which quahogs are safe for human consumption. For information regarding these areas contact the State of Maine Division of Marine Resources at (207-624-6550).

(2) [Reserved]

[61 FR 34968, July 3, 1996, as amended at 62 FR 14649, Mar. 27, 1997; 62 FR 37156, July 11, 1997; 63 FR 27485, May 19, 1998; 64 FR 57594, Oct. 26, 1999; 70 FR 2026, Jan. 12, 2005]

§ 648.74 Shucking at sea.

(a) *Observers.* (1) The Regional Administrator may allow the shucking of surf clams or ocean quahogs at sea if he/she determines that an observer carried aboard the vessel can measure accurately the total amount of surf clams and ocean quahogs harvested in the shell prior to shucking.

(2) Any vessel owner may apply in writing to the Regional Administrator to shuck surf clams or ocean quahogs at sea. The application shall specify: Name and address of the applicant, permit number of the vessel, method of calculating the amount of surf clams or ocean quahogs harvested in the shell, vessel dimensions and accommodations, and length of fishing trip.

(3) The Regional Administrator shall provide an observer to any vessel owner whose application is approved. The owner shall pay all reasonable ex-

penses of carrying the observer on board the vessel.

(4) Any observer shall certify at the end of each trip the amount of surf clams or ocean quahogs harvested in the shell by the vessel. Such certification shall be made by the observer's signature on the daily fishing log required by § 648.7.

(b) *Conversion factor.* (1) Based on the recommendation of the MAFMC, the Regional Administrator may allow shucking at sea of surf clams or ocean quahogs, with or without an observer, if he/she determines a conversion factor for shucked meats to calculate accurately the amount of surf clams or ocean quahogs harvested in the shell.

(2) The Regional Administrator shall publish notification in the FEDERAL REGISTER specifying a conversion factor together with the data used in its calculation for a 30-day comment period. After consideration of the public comments and any other relevant data, the Regional Administrator may publish final notification in the FEDERAL REGISTER specifying the conversion factor.

(3) If the Regional Administrator makes the determination specified in paragraph (b)(1) of this section, he/she may authorize the vessel owner to shuck surf clams or ocean quahogs at sea. Such authorization shall be in writing and be carried aboard the vessel.

§ 648.75 Cage identification.

Except as provided in § 648.76, the following cage identification requirements apply to all vessels issued a Federal fishing permit for surf clams and ocean quahogs:

(a) *Tagging.* Before offloading, all cages that contain surf clams or ocean quahogs must be tagged with tags acquired annually under paragraph (b) of this section. A tag must be fixed on or as near as possible to the upper crossbar of the cage for every 60 ft³ (1,700 L), or portion thereof, of the cage. A tag or tags must not be removed until the cage is emptied by the processor, at which time the processor must promptly remove and retain the tag(s) for collection or disposal as specified by the Regional Administrator.

(b) *Issuance.* The Regional Administrator will issue a supply of tags to each individual allocation owner qualifying for an allocation under § 648.70 prior to the beginning of each fishing year, or he/she may specify, in the FEDERAL REGISTER, a vendor from whom the tags shall be purchased. The number of tags will be based on the owner's initial allocation as specified in § 648.70(a). Each tag represents 32 bu (1,700 L) of allocation.

(c) *Expiration.* Tags will expire at the end of the fishing year for which they are issued, or if rendered null and void in accordance with 15 CFR part 904.

(d) *Return.* Tags that have been rendered null and void must be returned to the Regional Administrator, if possible.

(e) *Loss.* Loss or theft of tags must be reported by the owner, numerically identifying the tags to the Regional Administrator by telephone as soon as the loss or theft is discovered and in writing within 24 hours. Thereafter, the reported tags shall no longer be valid for use under this part.

(f) *Replacement.* Lost or stolen tags may be replaced by the Regional Administrator if proper notice of the loss is provided by the person to whom the tags were issued. Replacement tags may be purchased from the Regional Administrator or a vendor with a written authorization from the Regional Administrator.

(g) *Transfer.* See § 648.70(b)(2).

(h) *Presumptions.* Surf clams and ocean quahogs found in cages without a valid state tag are deemed to have been harvested in the EEZ and to be part of an individual's allocation, unless the individual demonstrates that he/she has surrendered his/her Federal vessel permit issued under § 648.4(a)(4) and conducted fishing operations exclusively within waters under the jurisdiction of any state. Surf clams and ocean quahogs in cages with a Federal tag or tags, issued and still valid pursuant to this section, affixed thereto are deemed to have been harvested by the individual allocation holder to whom the tags were issued under § 648.75(b) or transferred under § 648.70(b).

[61 FR 34968, July 3, 1996, as amended at 63 FR 27485, May 19, 1998; 68 FR 69974, Dec. 16, 2003]

§ 648.76 Maine mahogany quahog zone.

(a) *Landing requirements.* (1) A vessel issued a valid Maine mahogany quahog permit pursuant to § 648.4(a)(4)(i), and fishing for or possessing ocean quahogs within the Maine mahogany quahog zone, must land its catch in the State of Maine.

(2) A vessel fishing under an individual allocation permit, regardless of whether it has a Maine mahogany quahog permit, fishing for or possessing ocean quahogs within the zone, may land its catch in the State of Maine, or, consistent with applicable state law in any other state that utilizes food safety-based procedures including sampling and analyzing for PSP toxin consistent with those food safety-based procedures used by the State of Maine for such purpose, and must comply with all requirements in §§ 648.70 and 648.75. Documentation required by the state and other laws and regulations applicable to food safety-based procedures must be made available by federally-permitted dealers for inspection by NMFS.

(b) *Quota monitoring and closures*—(1) *Catch quota.* (i) The annual quota for harvest of mahogany quahogs from within the Maine mahogany quahog zone is 100,000 Maine bushels (35,150 hL). The quota may be revised annually within the range of 17,000 and 100,000 Maine bushels (5,975 and 35,150 hL) following the procedures set forth in § 648.71.

(ii) All mahogany quahogs landed for sale in Maine by vessels issued a Maine mahogany quahog permit and not fishing for an individual allocation of ocean quahogs under § 648.70 shall be applied against the Maine mahogany quahog quota, regardless of where the mahogany quahogs are harvested.

(iii) All mahogany quahogs landed by vessels fishing in the Maine mahogany quahog zone for an individual allocation of quahogs under § 648.70 will be counted against the ocean quahog allocation for which the vessel is fishing.

(iv) The Regional Administrator will monitor the quota based on dealer reports and other available information and shall determine the date when the quota will be harvested. NMFS shall publish notification in the FEDERAL

Fishery Conservation and Management

§ 648.77

REGISTER advising the public that, effective upon a specific date, the Maine mahogany quahog quota has been harvested and notifying vessel and dealer permit holders that no Maine mahogany quahog quota is available for the remainder of the year.

(2) *Maine Mahogany Quahog Advisory Panel.* The Council shall establish a Maine Mahogany Quahog Advisory Panel consisting of representatives of harvesters, dealers, and the Maine Department of Marine Resources. The Advisory Panel shall make recommendations, through the Surf Clam and Ocean Quahog Committee of the Council, regarding revisions to the annual quota and other management measures.

[63 FR 27485, May 19, 1998]

§ 648.77 Framework adjustments to management measures.

(a) *Within season management action.* The Council, at any time, may initiate action to add or adjust management measures within the Atlantic Surf Clam and Ocean Quahog FMP if it finds that action is necessary to meet or be consistent with the goals and objectives of the plan.

(1) *Adjustment process.* The Council shall develop and analyze appropriate management actions over the span of at least two Council meetings. The Council must provide the public with advance notice of the availability of the recommendation(s), appropriate justification(s) and economic and biological analyses, and the opportunity to comment on the proposed adjustment(s) at the first meeting, and prior to and at the second Council meeting. The Council's recommendations on adjustments or additions to management measures must come from one or more of the following categories: The overfishing definition (both the threshold and target levels), description and identification of EFH (and fishing gear management measures that impact EFH), habitat areas of particular concern, set-aside quota for scientific research, VMS, OY range, and suspension or adjustment of the surfclam minimum size limit.

(2) *Council recommendation.* After developing management actions and receiving public testimony, the Council

shall make a recommendation to the Regional Administrator. The Council's recommendation must include supporting rationale, if management measures are recommended, an analysis of impacts, and a recommendation to the Regional Administrator on whether to issue the management measures as a final rule. If the Council recommends that the management measures should be issued as a final rule, it must consider at least the following factors, and provide support and analysis for each factor considered:

(i) Whether the availability of data on which the recommended management measures are based allows for adequate time to publish a proposed rule, and whether the regulations would have to be in place for an entire harvest/fishing season.

(ii) Whether there has been adequate notice and opportunity for participation by the public and members of the affected industry in the development of recommended management measures.

(iii) Whether there is an immediate need to protect the resource.

(iv) Whether there will be a continuing evaluation of management measures adopted following their implementation as a final rule.

(3) *NMFS action.* If the Council's recommendation includes adjustments or additions to management measures and, after reviewing the Council's recommendation and supporting information:

(i) If NMFS concurs with the Council's recommended management measures and determines that the recommended management measures should be issued as a final rule based on the factors specified in paragraph (a)(2) of this section, the measures will be issued as a final rule in the FEDERAL REGISTER.

(ii) If NMFS concurs with the Council's recommended management measures and determines that the recommended management measures should be published first as a proposed rule, the measures will be published as a proposed rule in the FEDERAL REGISTER. After additional public comment, if NMFS concurs with the Council recommendation, the measures will be issued as a final rule and published in the FEDERAL REGISTER.

§ 648.80

(iii) If NMFS does not concur, the Council will be notified in writing of the reasons for the non-concurrence.

(4) *Emergency actions.* Nothing in this section is meant to derogate from the authority of the Secretary to take emergency action under section 305(e) of the Magnuson-Stevens Act.

(b) [Reserved]

[64 FR 57594, Oct. 26, 1999, as amended at 68 FR 69974, Dec. 16, 2003]

Subpart F—Management Measures for the NE Multispecies and Monkfish Fisheries

§ 648.80 NE Multispecies regulated mesh areas and restrictions on gear and methods of fishing.

Except as provided in § 648.17, all vessels must comply with the following minimum mesh size, gear and methods of fishing requirements, unless otherwise exempted or prohibited.

(a) *Gulf of Maine (GOM) and GB Regulated Mesh Areas—(1) GOM Regulated Mesh Area.* The GOM Regulated Mesh Area (copies of a map depicting the area are available from the Regional Administrator upon request) is that area:

(i) Bounded on the east by the U.S.-Canada maritime boundary, defined by straight lines connecting the following points in the order stated:

Point	N. lat.	W. long.	Approximate loran C bearings
CI13	42°22'	67°20'	(1)
SNE1	40°24'	65°43'	(2)

¹ The U.S.-Canada Maritime Boundary.

² The U.S.-Canada Maritime Boundary as it intersects with the EEZ.

(iii) Bounded on the west by straight lines connecting the following points in the order stated:

Point	N. lat.	W. long.
G12	(1)	70°00'
G11	40°50'	70°00'
NL1	40°50'	69°40'
NL2	40°18.7'	69°40'
NL3	40°22.7'	69°00'
.....	(2)	69°00'

¹ South facing shoreline of Cape Cod.

² Southward to its intersection with the EEZ.

(3) *GOM Regulated Mesh Area minimum mesh size and gear restrictions—(i) Ves-*

50 CFR Ch. VI (10–1–05 Edition)

Point	N. lat.	W. long.
G1	(1)	(1)
G2	43°58'	67°22'
G3	42°53.1'	67°44.4'
G4	42°31'	67°28.1'
CI13	42°22'	67°20' ²

¹ The intersection of the shoreline and the U.S.-Canada Maritime Boundary.

² The U.S.-Canada Maritime Boundary.

(ii) Bounded on the south by straight lines connecting the following points in the order stated:

Point	N. lat.	W. long.
CI13	42°22'	67°20' ¹
G6	42°20'	67°20'
G7	42°20'	69°30'
G8	42°00'	69°30'
G9	42°00'	(2)

¹ The U.S.-Canada Maritime Boundary.

² The intersection of the Cape Cod, MA, coastline and 42°00' N. lat.

(2) *GB Regulated Mesh Area.* The GB Regulated Mesh Area (copies of a map depicting the area are available from the Regional Administrator upon request) is that area:

(i) Bounded on the north by the southern boundary of the GOM Regulated Mesh Area as defined in paragraph (a)(1)(ii) of this section; and

(ii) Bounded on the east by straight lines connecting the following points in the order stated:

sels using trawls. Except as provided in paragraphs (a)(3)(i) and (vi) of this section, and unless otherwise restricted under paragraph (a)(3)(iii) of this section, the minimum mesh size for any trawl net, except midwater trawl, on a vessel or used by a vessel fishing under a DAS in the NE multispecies DAS program in the GOM Regulated Mesh Area is 6-inch (15.2-cm) diamond mesh or 6.5-inch (16.5-cm) square mesh, applied throughout the body and extension of the net, or any combination thereof, and 6.5-inch (16.5-cm) diamond mesh or

square mesh applied to the codend of the net as defined in paragraphs (a)(3)(i)(A) and (B) of this section, provided the vessel complies with the requirements of paragraph (a)(3)(vii) of this section. This restriction does not apply to nets or pieces of nets smaller than 3 ft (0.9 m) \times 3 ft (0.9 m), (9 sq ft (0.81 sq m)), or to vessels that have not been issued a NE multispecies permit and that are fishing exclusively in state waters.

(A) For vessels greater than 45 ft (13.7 m) in length overall, a diamond mesh codend is defined as the first 50 meshes counting from the terminus of the net, and a square mesh codend is defined as the first 100 bars counting from the terminus of the net.

(B) For vessels 45 ft (13.7 m) or less in length overall, a diamond mesh codend is defined as the first 25 meshes counting from the terminus of the net, and a square mesh codend is defined as the first 50 bars counting from the terminus of the net.

(ii) *Vessels using Scottish seine, midwater trawl, and purse seine.* Except as provided in paragraphs (a)(3)(ii) and (vi) of this section, and unless otherwise restricted under paragraph (a)(3)(iii) of this section, the minimum mesh size for any Scottish seine, midwater trawl, or purse seine on a vessel or used by a vessel fishing under a DAS in the NE multispecies DAS program in the GOM Regulated Mesh Area is 6-inch (15.2-cm) diamond mesh or 6.5-inch (16.5-cm) square mesh applied throughout the net, or any combination thereof, provided the vessel complies with the requirements of paragraph (a)(3)(vii) of this section. This restriction does not apply to nets or pieces of nets smaller than 3 ft (0.9 m) \times 3 ft (0.9 m), (9 sq ft (0.81 sq m)), or to vessels that have not been issued a NE multispecies permit and that are fishing exclusively in state waters.

(iii) *Large-mesh vessels.* When fishing in the GOM Regulated Mesh Area, the minimum mesh size for any trawl net vessel, or sink gillnet, on a vessel or used by a vessel fishing under a DAS in the Large-mesh DAS program, specified in § 648.82(b)(4), is 8.5-inch (21.6-cm) diamond or square mesh throughout the entire net. This restriction does not apply to nets or pieces of nets

smaller than 3 ft (0.9 m) \times 3 ft (0.9 m), (9 sq ft (0.81 sq m)), or to vessels that have not been issued a NE multispecies permit and that are fishing exclusively in state waters.

(iv) *Gillnet vessels—(A) Trip gillnet vessels—(1) Mesh size.* Except as provided in paragraphs (a)(3)(iv) and (vi) of this section, and unless otherwise restricted under paragraph (a)(3)(iii) of this section, for vessels that obtain an annual designation as a Trip gillnet vessel, the minimum mesh size for any sink gillnet when fishing under a DAS in the NE multispecies DAS program in the GOM Regulated Mesh Area is 6.5 inches (16.5 cm) throughout the entire net. This restriction does not apply to nets or pieces of nets smaller than 3 ft (0.9 m) \times 3 ft (0.9 m), (9 sq ft (0.81 sq m)), or to vessels that have not been issued a NE multispecies permit and that are fishing exclusively in state waters.

(2) *Net size requirements.* Nets may not be longer than 300 ft (91.4 m), or 50 fathoms (91.4 m) in length.

(B) *Day gillnet vessels—(1) Mesh size.* Except as provided in paragraphs (a)(3)(iv) and (vi) of this section, and unless otherwise restricted under paragraph (a)(3)(iii) of this section, for vessels that obtain an annual designation as a Day gillnet vessel, the minimum mesh size for any sink gillnet when fishing under a DAS in the NE multispecies DAS program in the GOM Regulated Mesh Area is 6.5 inches (16.5 cm) throughout the entire net. This restriction does not apply to nets or pieces of nets smaller than 3 ft (0.9 m) \times 3 ft (0.9 m), (9 sq ft (0.81 sq m)), or to vessels that have not been issued a NE multispecies permit and that are fishing exclusively in state waters.

(2) *Number of nets.* A day gillnet vessel fishing under a NE multispecies DAS and fishing in the GOM Regulated Mesh Area may not fish with, haul, possess, or deploy more than 50 roundfish sink gillnets or 100 flatfish (tie-down) sink gillnets, each of which must be tagged pursuant to paragraph (a)(3)(iv)(C) of this section, except as provided in § 648.92(b)(8)(i). Vessels may fish any combination of roundfish and flatfish gillnets up to 100 nets, and may stow additional nets not to exceed 160 nets, counting deployed nets.

(3) *Net size requirements.* Nets may not be longer than 300 ft (91.4 m), or 50 fathoms (91.4 m) in length.

(4) *Tags.* Roundfish nets must be tagged with two tags per net, with one tag secured to each bridle of every net, within a string of nets, and flatfish nets must have one tag per net, with one tag secured to every other bridle of every net within a string of nets. Gillnet vessels must also abide by the tagging requirements in paragraph (a)(3)(iv)(C) of this section.

(C) *Obtaining and replacing tags.* Tags must be obtained as described in § 648.4(c)(2)(iii), and vessels must have on board written confirmation issued by the Regional Administrator, indicating that the vessel is a Day gillnet vessel or a Trip gillnet vessel. The vessel operator must produce all net tags upon request by an authorized officer. A vessel may have tags on board in excess of the number of tags corresponding to the allowable number of nets, provided such tags are onboard the vessel and can be made available for inspection.

(1) *Lost tags.* Vessel owners or operators are required to report lost, destroyed, and missing tag numbers as soon as feasible after tags have been discovered lost, destroyed or missing, by letter or fax to the Regional Administrator.

(2) *Replacement tags.* Vessel owners or operators seeking replacement of lost, destroyed, or missing tags must request replacement of tags by letter or fax to the Regional Administrator. A check for the cost of the replacement tags must be received by the Regional Administrator before tags will be re-issued.

(v) *Hook gear restrictions.* Unless otherwise specified in paragraph (a)(3)(v) of this section, vessels fishing with a valid NE multispecies limited access permit and fishing under a NE multispecies DAS, and vessels fishing with a valid NE multispecies limited access Small-Vessel permit, in the GOM Regulated Mesh Area, and persons on such vessels, are prohibited from fishing, setting, or hauling back, per day, or possessing on board the vessel, more than 2,000 rigged hooks. All longline gear hooks must be circle hooks, of a minimum size of 12/0. An unabated

hook and gangions that has not been secured to the ground line of the trawl on board a vessel is deemed to be a replacement hook and is not counted toward the 2,000-hook limit. A “snap-on” hook is deemed to be a replacement hook if it is not rigged or baited. The use of de-hookers (“crucifer”) with less than 6-inch (15.2-cm) spacing between the fairlead rollers is prohibited. Vessels fishing with a valid NE multispecies limited access Hook Gear permit and fishing under a multispecies DAS in the GOM Regulated Mesh Area, and persons on such vessels, are prohibited from possessing gear other than hook gear on board the vessel. Vessels fishing with a valid NE multispecies limited access Handgear A permit are prohibited from fishing, or possessing on board the vessel, gear other than handgear. Vessels fishing with tub-trawl gear are prohibited from fishing, setting, or hauling back, per day, or possessing on board the vessel more than 250 hooks.

(vi) *Other restrictions and exemptions.* Vessels are prohibited from fishing in the GOM or GB Exemption Area as defined in paragraph (a)(17) of this section, except if fishing with exempted gear (as defined under this part) or under the exemptions specified in paragraphs (a)(5) through (7), (a)(9) through (14), (d), (e), (h), and (i) of this section; or if fishing under a NE multispecies DAS; or if fishing under the Small Vessel or Handgear A exemptions specified in § 648.82(b)(5) and (6), respectively; or if fishing under the scallop state waters exemptions specified in § 648.54 and paragraph (a)(11) of this section; or if fishing under a scallop DAS in accordance with paragraph (h) of this section; or if fishing pursuant to a NE multispecies open access Charter/Party or Handgear permit, or if fishing as a charter/party or private recreational vessel in compliance with the regulations specified in § 648.89. Any gear on a vessel, or used by a vessel, in this area must be authorized under one of these exemptions or must be stowed as specified in § 648.23(b).

(vii) *Rockhopper and roller gear restrictions.* For all trawl vessels fishing in the GOM/GB Inshore Restricted Roller Gear Area, the diameter of any part of the trawl footrope, including discs,

Fishery Conservation and Management

§ 648.80

rollers, or rockhoppers, must not exceed 12 inches (30.5 cm). The GOM/GB Inshore Restricted Roller Gear Area is defined by straight lines connecting the following points in the order stated:

INSHORE RESTRICTED ROLLER GEAR AREA

Point	N. lat.	W. long.
GM1	42°00'	(¹)
GM2	42°00'	(²)
GM3	42°00'	(³)
GM23	42°00'	69°50'
GM24	43°00'	69°50'
GM11	43°00'	70°00'
GM17	43°30'	70°00'
GM18	43°30'	(⁴)

¹ Massachusetts shoreline.

² Cape Cod shoreline on Cape Cod Bay.

³ Cape Cod shoreline on the Atlantic Ocean.

⁴ Maine shoreline.

(4) *GB regulated mesh area minimum mesh size and gear restrictions*—(i) *Vessels using trawls*. Except as provided in paragraph (a)(3)(vi) of this section, and this paragraph (a)(4)(i), and unless otherwise restricted under paragraph (a)(4)(iii) of this section, the minimum mesh size for any trawl net, except midwater trawl, and the minimum mesh size for any trawl net when fishing in that portion of the GB Regulated Mesh Area that lies within the SNE Exemption Area, as described in paragraph (b)(10) of this section, that is not stowed and available for immediate use in accordance with § 648.23(b), on a vessel or used by a vessel fishing under a DAS in the NE multispecies DAS program in the GB Regulated Mesh Area is 6-inch (15.2-cm) diamond mesh or 6.5-inch (16.5-cm) square mesh applied throughout the body and extension of the net, or any combination thereof, and 6.5-inch (16.5-cm) diamond mesh or square mesh applied to the codend of the net as defined under paragraph (a)(3)(i) of this section, provided the vessel complies with the requirements of paragraph (a)(3)(vii) of this section. This restriction does not apply to nets or pieces of nets smaller than 3 ft (0.9 m) × 3 ft (0.9 m), (9 sq ft (0.81 sq m)), or to vessels that have not been issued a NE multispecies permit and that are fishing exclusively in state waters.

(ii) *Vessels using Scottish seine, midwater trawl, and purse seine*. Except as provided in paragraph (a)(3)(vi) of this section, and this paragraph

(a)(4)(ii), and unless otherwise restricted under paragraph (a)(4)(iii) of this section, the minimum mesh size for any Scottish seine, midwater trawl, or purse seine, and the minimum mesh size for any Scottish seine, midwater trawl, or purse seine, when fishing in that portion of the GB Regulated Mesh Area that lies within the SNE Exemption Area, as described in paragraph (b)(10) of this section, that is not stowed and available for immediate use in accordance with § 648.23(b), on a vessel or used by a vessel fishing under a DAS in the NE multispecies DAS program in the GB Regulated Mesh Area is 6-inch (15.2-cm) diamond mesh or 6.5-inch (16.5-cm) square mesh applied throughout the net, or any combination thereof, provided the vessel complies with the requirements of paragraph (a)(3)(vii) of this section. This restriction does not apply to nets or pieces of nets smaller than 3 ft (0.9 m) × 3 ft (0.9 m), (9 sq ft (0.81 sq m)), or to vessels that have not been issued a NE multispecies permit and that are fishing exclusively in state waters.

(iii) *Large-mesh vessels*. When fishing in the GB Regulated Mesh Area, the minimum mesh size for any trawl net, or sink gillnet, and the minimum mesh size for any trawl net, or sink gillnet, when fishing in that portion of the GB Regulated Mesh Area that lies within the SNE Exemption Area, as described in paragraph (b)(10) of this section, that is not stowed and available for immediate use in accordance with § 648.23(b), on a vessel or used by a vessel fishing under a DAS in the Large-mesh DAS program, specified in § 648.82(b)(5), is 8.5-inch (21.6-cm) diamond or square mesh throughout the entire net. This restriction does not apply to nets or pieces of nets smaller than 3 ft (0.9 m) × 3 ft (0.9 m), (9 sq ft (0.81 sq m)), or to vessels that have not been issued a NE multispecies permit and that are fishing exclusively in state waters.

(iv) *Gillnet vessels*. Except as provided in paragraph (a)(3)(vi) of this section and this paragraph (a)(4)(iv), for Day and Trip gillnet vessels, the minimum mesh size for any sink gillnet, and the minimum mesh size for any roundfish or flatfish gillnet when fishing in that portion of the GB Regulated Mesh Area

that lies within the SNE Exemption Area, as described in paragraph (b)(10) of this section, that is not stowed and available for immediate use in accordance with § 648.23(b), when fishing under a DAS in the NE multispecies DAS program in the GB Regulated Mesh Area is 6.5 inches (16.5 cm) throughout the entire net. This restriction does not apply to nets or pieces of nets smaller than 3 ft (0.9 m) × 3 ft (0.9 m), (9 sq ft (0.81 sq m)), or to vessels that have not been issued a NE multispecies permit and that are fishing exclusively in state waters.

(A) *Trip gillnet vessels.* A Trip gillnet vessel fishing under a NE multispecies DAS and fishing in the GB Regulated Mesh Area may not fish with nets longer than 300 ft (91.4 m), or 50 fathoms (91.4 m) in length.

(B) *Day gillnet vessels—(1) Number of nets.* A Day gillnet vessel fishing under a NE multispecies DAS and fishing in the GB Regulated Mesh Area may not fish with, haul, possess, or deploy more than 50 nets, except as provided in § 648.92(b)(8)(i).

(2) *Net size requirements.* Vessels may fish any combination of roundfish and flatfish gillnets, up to 50 nets. Such vessels, in accordance with § 648.23(b), may stow additional nets not to exceed 150, counting the deployed net. Nets may not be longer than 300 ft (91.4 m).

(3) *Tags.* Roundfish or flatfish nets must be tagged with two tags per net, with one tag secured to each bridle of every net within a string of nets.

(4) *Obtaining and replacing tags.* See paragraph (a)(3)(iv)(C) of this section.

(v) *Hook gear restrictions.* Unless otherwise specified in this paragraph (a)(4)(v), vessels fishing with a valid NE multispecies limited access permit and fishing under a NE multispecies DAS, and vessels fishing with a valid NE multispecies limited access Small-Vessel permit, in the GB Regulated Mesh Area, and persons on such vessels, are prohibited from possessing gear other than hook gear on board the vessel and prohibited from fishing, setting, or hauling back, per day, or possessing on board the vessel, more than 3,600 rigged hooks. All longline gear hooks must be circle hooks, of a minimum size of 12/0. An unabated hook and gangions that has not been secured to the ground line

of the trawl on board a vessel is deemed to be a replacement hook and is not counted toward the 3,600-hook limit. A “snap-on” hook is deemed to be a replacement hook if it is not rigged or baited. The use of de-hookers (“crucifer”) with less than 6-inch (15.2-cm) spacing between the fairlead rollers is prohibited. Vessels fishing with a valid NE multispecies limited access Hook gear permit and fishing under a multispecies DAS in the GB Regulated Mesh Area, and persons on such vessels, are prohibited from possessing gear other than hook gear on board the vessel. Vessels fishing with a valid NE multispecies limited access Handgear A permit are prohibited from fishing or possessing on board the vessel, gear other than hand gear. Vessels fishing with tub-trawl gear are prohibited from fishing, setting, or hauling back, per day, or possessing on board the vessel more than 250 hooks.

(5) *Small Mesh Northern Shrimp Fishery Exemption.* Vessels subject to the minimum mesh size restrictions specified in this paragraph (a) may fish for, harvest, possess, or land northern shrimp in the GOM, GB, SNE, and MA Regulated Mesh Areas, as described under paragraphs (a)(1), (a)(2), (b)(1), and (c)(1) of this section, respectively, with nets with a mesh size smaller than the minimum size specified, if the vessel complies with the requirements of paragraphs (a)(5)(i) through (iii) of this section.

(i) *Restrictions on fishing for, possessing, or landing fish other than shrimp.* An owner or operator of a vessel fishing in the northern shrimp fishery under the exemption described in this paragraph (a)(5) may not fish for, possess on board, or land any species of fish other than shrimp, except for the following, with the restrictions noted, as allowable incidental species: Longhorn sculpin; combined silver hake and offshore hake—up to an amount equal to the total weight of shrimp possessed on board or landed, not to exceed 3,500 lb (1,588 kg); and American lobster—up to 10 percent, by weight, of all other species on board or 200 lobsters, whichever is less, unless otherwise restricted by landing limits specified in § 697.17 of this chapter. Silver hake and offshore hake on board a vessel subject to this

Fishery Conservation and Management

§ 648.80

possession limit must be separated from other species of fish and stored so as to be readily available for inspection.

(ii) *Requirement to use a finfish excluder device (FED)*. A vessel must have a rigid or semi-rigid grate consisting of parallel bars of not more than 1-inch (2.54-cm) spacing that excludes all fish and other objects, except those that are small enough to pass between its bars into the codend of the trawl, secured in the trawl, forward of the codend, in such a manner that it precludes the passage of fish or other objects into the codend without the fish or objects having to first pass between the bars of the grate, in any net with mesh smaller than the minimum size specified in paragraphs (a)(3) and (4) of this section. The net must have an outlet or hole to allow fish or other objects that are too large to pass between the bars of the grate to exit the net. The aftermost edge of this outlet or hole must be at least as wide as the grate at the point of attachment. The outlet or hole must extend forward from the grate toward the mouth of the net. A funnel of net material is allowed in the lengthening piece of the net forward of the grate to direct catch towards the grate. (Copies of a schematic example of a properly configured and installed FED are available from the Regional Administrator upon request.)

(iii) *Time restrictions*. A vessel may only fish under this exemption during the northern shrimp season, as established by the Commission and announced in the Commission's letter to participants.

(6) *Cultivator Shoal Whiting Fishery Exemption Area*. Vessels subject to the minimum mesh size restrictions specified in paragraphs (a)(3) and (4) of this section may fish with, use, or possess nets in the Cultivator Shoal Whiting Fishery Exemption Area with a mesh size smaller than the minimum size specified, if the vessel complies with the requirements specified in paragraph (a)(6)(i) of this section. The Cultivator Shoal Whiting Fishery Exemption Area (copies of a map depicting the area are available from the Regional Administrator upon request) is defined by straight lines connecting

the following points in the order stated:

CULTIVATOR SHOAL WHITING FISHERY EXEMPTION AREA

Point	N. lat.	W. long.
C1	42°10'	68°10'
C2	41°30'	68°41'
C14	41°30'	68°30'
C3	41°12.8'	68°30'
C4	41°05'	68°20'
C5	41°55'	67°40'
C1	42°10'	68°10'

(i) *Requirements*. (A) A vessel fishing in the Cultivator Shoal Whiting Fishery Exemption Area under this exemption must have on board a valid letter of authorization issued by the Regional Administrator.

(B) An owner or operator of a vessel fishing in this area may not fish for, possess on board, or land any species of fish other than whiting and offshore hake combined—up to a maximum of 30,000 lb (13,608 kg), except for the following, with the restrictions noted, as allowable incidental species: Herring; longhorn sculpin; squid; butterfish; Atlantic mackerel; dogfish; red hake; monkfish and monkfish parts—up to 10 percent, by weight, of all other species on board or up to 50 lb (23 kg) tail-weight/166 lb (75 kg) whole-weight of monkfish per trip, as specified in §648.94(c)(4), whichever is less; and American lobster—up to 10 percent, by weight, of all other species on board or 200 lobsters, whichever is less, unless otherwise restricted by landing limits specified in §697.17 of this chapter.

(C) Counting from the terminus of the net, all nets must have a minimum mesh size of 3-inch (7.6-cm) square or diamond mesh applied to the first 100 meshes (200 bars in the case of square mesh) for vessels greater than 60 ft (18.3 m) in length and applied to the first 50 meshes (100 bars in the case of square mesh) for vessels less than or equal to 60 ft (18.3 m) in length.

(D) Fishing is confined to a season of June 15 through October 31, unless otherwise specified by notification in the FEDERAL REGISTER.

(E) When a vessel is transiting through the GOM or GB Regulated Mesh Areas specified under paragraphs (a)(1) and (2) of this section, any nets

with a mesh size smaller than the minimum mesh specified in paragraphs (a)(3) or (4) of this section must be stowed in accordance with one of the methods specified in § 648.23(b), unless the vessel is fishing for small-mesh multispecies under another exempted fishery specified in this paragraph (a).

(F) A vessel fishing in the Cultivator Shoal Whiting Fishery Exemption Area may fish for small-mesh multispecies in exempted fisheries outside of the Cultivator Shoal Whiting Fishery Exemption Area, provided that the vessel complies with the more restrictive gear, possession limit, and other requirements specified in the regulations of that exempted fishery for the entire participation period specified on the vessel's letter of authorization and consistent with paragraph (a)(15)(i)(G) of this section.

(ii) *Sea sampling.* The Regional Administrator shall conduct periodic sea sampling to determine if there is a need to change the area or season designation, and to evaluate the bycatch of regulated species, especially had-dock.

(iii) *Annual review.* The NEFMC shall conduct an annual review of data to determine if there are any changes in area or season designation necessary, and to make appropriate recommendations to the Regional Administrator following the procedures specified in § 648.90.

(7) *Transiting.* (i) Vessels fishing in the Small Mesh Area 1/Small Mesh Area 2 fishery, as specified in paragraph (a)(9) of this section, may transit through the Scallop Dredge Fishery Exemption Area as specified in paragraph (a)(11) of this section with nets of mesh size smaller than the minimum mesh size specified in paragraphs (a)(3) or (4) of this section, provided that the nets are stowed and not available for immediate use in accordance with one of the methods specified in § 648.23(b). Vessels fishing in the Small Mesh Northern Shrimp Fishery, as specified in paragraph (a)(3) of this section, may transit through the GOM, GB, SNE, and MA Regulated Mesh Areas, as described in paragraphs (a)(1), (a)(2), (b)(1), and (c)(1) of this section, respectively, with nets of mesh size smaller than the minimum mesh size specified

in paragraphs (a)(3), (a)(4), (b)(2), and (c)(2) of this section, provided the nets are stowed and not available for immediate use in accordance with one of the methods specified in § 648.23(b).

(ii) Vessels subject to the minimum mesh size restrictions specified in paragraphs (a)(3) or (4) of this section may transit through the Scallop Dredge Fishery Exemption Area defined in paragraph (a)(11) of this section with nets on board with a mesh size smaller than the minimum size specified, provided that the nets are stowed in accordance with one of the methods specified in § 648.23(b), and provided the vessel has no fish on board.

(iii) Vessels subject to the minimum mesh size restrictions specified in paragraphs (a)(3) or (4) of this section may transit through the GOM and GB Regulated Mesh Areas defined in paragraphs (a)(1) and (2) of this section with nets on board with a mesh size smaller than the minimum mesh size specified and with small mesh exempted species on board, provided that the following conditions are met:

(A) All nets with a mesh size smaller than the minimum mesh size specified in paragraphs (a)(3) or (4) of this section are stowed in accordance with one of the methods specified in § 648.23(b).

(B) A letter of authorization issued by the Regional Administrator is on board.

(C) Vessels do not fish for, possess on board, or land any fish, except when fishing in the areas specified in paragraphs (a)(6), (a)(10), (a)(15), (b), and (c) of this section. Vessels may retain exempted small-mesh species as provided in paragraphs (a)(6)(i), (a)(10)(i), (a)(15)(i), (b)(3), and (c)(3) of this section.

(8) *Addition or deletion of exemptions—*
(i) *Exemption allowing no incidental catch of regulated multispecies.* An exemption may be added in an existing fishery for which there are sufficient data or information to ascertain the amount of incidental catch of regulated species, if the Regional Administrator, after consultation with the NEFMC, determines that the percentage of regulated species caught as incidental catch is, or can be reduced to, less than 5 percent, by weight, of total catch, unless otherwise specified in

this paragraph (a)(8)(i), and that such exemption will not jeopardize fishing mortality objectives. The 5-percent regulated species incidental catch standard could be modified for a stock that is not in an overfished condition, or if overfishing is not occurring on that stock. When considering modifications of the standard, it must be shown that the change will not delay a rebuilding program, or result in overfishing or an overfished condition. In determining whether exempting a fishery may jeopardize meeting fishing mortality objectives, the Regional Administrator may take into consideration various factors including, but not limited to, juvenile mortality, sacrifices in yield that will result from that mortality, the ratio of target species to regulated species, status of stock rebuilding, and recent recruitment of regulated species. A fishery can be defined, restricted, or allowed by area, gear, season, or other means determined to be appropriate to reduce incidental catch of regulated species. Notification of additions, deletions, or modifications will be made through issuance of a rule in the FEDERAL REGISTER.

(ii) *Exemption allowing incidental catch of regulated species.* An exemption may be added in an existing fishery that would allow vessels to retain and land regulated multispecies, under the restrictions specified in paragraphs (a)(8)(ii)(A) through (C) of this section, if the Regional Administrator, after consultation with the NEFMC, considers the status of the regulated species stock or stocks caught in the fishery, the risk that this exemption would result in a targeted regulated species fishery, the extent of the fishery in terms of time and area, and the possibility of expansion in the fishery. Incidental catch in exempted fisheries under this paragraph (a)(8)(ii) are subject, at a minimum, to the following restrictions:

(A) A prohibition on the possession of regulated multispecies that are overfished or where overfishing is occurring;

(B) A prohibition on the possession of regulated species in NE multispecies closure areas; and

(C) A prohibition on allowing an exempted fishery to occur that would allow retention of a regulated multispecies stock under an ongoing rebuilding program, unless it can be determined that the catch of the stock in the exempted fishery is not likely to result in exceeding the rebuilding mortality rate.

(iii) For exemptions allowing no incidental catch of regulated species, as defined under paragraph (a)(8)(i) of this section, the NEFMC may recommend to the Regional Administrator, through the framework procedure specified in § 648.90(b), additions or deletions to exemptions for fisheries, either existing or proposed, for which there may be insufficient data or information for the Regional Administrator to determine, without public comment, percentage catch of regulated species. For exemptions allowing incidental catch of regulated species, as defined under paragraph (a)(8)(ii) of this section, the NEFMC may recommend to the Regional Administrator, through the framework procedure specified in § 648.90(b), additions or deletions to exemptions for fisheries, either existing or proposed, for which there may be insufficient data or information for the Regional Administrator to determine, without public comment, the risk that this exemption would result in a targeted regulated species fishery, the extent of the fishery in terms of time and area, and the possibility of expansion in the fishery.

(iv) Incidental catch in exempted fisheries authorized under this paragraph (a)(8) are subject, at a minimum, to the following restrictions:

(A) With the exception of fisheries authorized under paragraph (a)(8)(ii) of this section, a prohibition on the possession of regulated species;

(B) A limit on the possession of monkfish or monkfish parts of 10 percent, by weight, of all other species on board or as specified by § 648.94(c)(3), (4), (5) or (6), as applicable, whichever is less;

(C) A limit on the possession of lobsters of 10 percent, by weight, of all other species on board or 200 lobsters, whichever is less; and

(D) A limit on the possession of skate or skate parts in the SNE Exemption

§ 648.80

50 CFR Ch. VI (10–1–05 Edition)

Area described in paragraph (b)(10) of this section of 10 percent, by weight, of all other species on board.

(9) *Small Mesh Area 1/Small Mesh Area 2*—(i) *Description*. (A) Unless otherwise prohibited in § 648.81, a vessel subject to the minimum mesh size restrictions specified in paragraphs (a)(3) or (4) of this section may fish with or possess nets with a mesh size smaller than the minimum size, provided the vessel complies with the requirements of paragraphs (a)(5)(ii) or (a)(9)(ii) of this section, and § 648.86(d), from July 15 through November 15, when fishing in Small Mesh Area 1; and from January 1 through June 30, when fishing in Small Mesh Area 2. While lawfully fishing in these areas with mesh smaller than the minimum size, an owner or operator of any vessel may not fish for, possess on board, or land any species of fish other than: Silver hake and offshore hake—up to the amounts specified in § 648.86(d), butterfish, dogfish, herring, Atlantic mackerel, scup, squid, and red hake.

(B) Small-mesh Areas 1 and 2 are defined by straight lines connecting the following points in the order stated (copies of a chart depicting these areas are available from the Regional Administrator upon request):

SMALL MESH AREA I

Point	N. lat.	W. long.
SM1	43°03'	70°27'
SM2	42°57'	70°22'
SM3	42°47'	70°32'
SM4	42°45'	70°29'
SM5	42°43'	70°32'
SM6	42°44'	70°39'
SM7	42°49'	70°43'
SM8	42°50'	70°41'
SM9	42°53'	70°43'
SM10	42°55'	70°40'
SM11	42°59'	70°32'
SM1	43°03'	70°27'

SMALL MESH AREA II

Point	N. lat.	W. long.
SM13	43°05.6'	69°55'
SM14	43°10.1'	69°43.3'
SM15	42°49.5'	69°40'
SM16	42°41.5'	69°40'
SM17	42°36.6'	69°55'
SM13	43°05.6'	69°55'

(ii) *Raised footrope trawl*. Vessels fishing with trawl gear must configure it in such a way that, when towed, the

gear is not in contact with the ocean bottom. Vessels are presumed to be fishing in such a manner if their trawl gear is designed as specified in paragraphs (a)(9)(ii)(A) through (D) of this section and is towed so that it does not come into contact with the ocean bottom.

(A) Eight-inch (20.3-cm) diameter floats must be attached to the entire length of the headrope, with a maximum spacing of 4 ft (122.0 cm) between floats.

(B) The ground gear must all be bare wire not larger than ½-inch (1.2-cm) for the top leg, not larger than ⅝-inch (1.6-cm) for the bottom leg, and not larger than ¾-inch (1.9-cm) for the ground cables. The top and bottom legs must be equal in length, with no extensions. The total length of ground cables and legs must not be greater than 40 fathoms (73 m) from the doors to wingends.

(C) The footrope must be longer than the length of the headrope, but not more than 20 ft (6.1 m) longer than the length of the headrope. The footrope must be rigged so that it does not contact the ocean bottom while fishing.

(D) The raised footrope trawl may be used with or without a chain sweep. If used without a chain sweep, the drop chains must be a maximum of ⅜-inch (0.95-cm) diameter bare chain and must be hung from the center of the footrope and each corner (the quarter, or the junction of the bottom wing to the belly at the footrope). Drop chains must be hung at intervals of 8 ft (2.4 m) along the footrope from the corners to the wing ends. If used with a chain sweep, the sweep must be rigged so it is behind and below the footrope, and the footrope is off the bottom. This is accomplished by having the sweep longer than the footrope and having long drop chains attaching the sweep to the footrope at regular intervals. The forward end of the sweep and footrope must be connected to the bottom leg at the same point. This attachment, in conjunction with the headrope flotation, keeps the footrope off the bottom. The sweep and its rigging, including drop chains, must be made entirely of bare chain with a maximum diameter of ⅝ inches (0.8 cm). No wrapping or cookies are allowed on the drop chains or sweep. The total length of the sweep

Fishery Conservation and Management

§ 648.80

must be at least 7 ft (2.1 m) longer than the total length of the footrope, or 3.5 ft (1.1 m) longer on each side. Drop chains must connect the footrope to the sweep chain, and the length of each drop chain must be at least 42 inches (106.7 cm). One drop chain must be hung from the center of the footrope to the center of the sweep, and one drop chain must be hung from each corner. The attachment points of each drop chain on the sweep and the footrope must be the same distance from the center drop chain attachments. Drop chains must be hung at intervals of 8 ft (2.4 m) from the corners toward the wing ends. The distance of the drop chain that is nearest the wing end to the end of the footrope may differ from net to net. However, the sweep must be at least 3.5 ft (1.1 m) longer than the footrope between the drop chain closest to the wing ends and the end of the sweep that attaches to the wing end.

(10) *Nantucket Shoals Dogfish Fishery Exemption Area.* Vessels subject to the minimum mesh size restrictions specified in paragraph (a)(3) or paragraph (a)(4) of this section may fish with, use, or possess nets of mesh smaller than the minimum size specified in the Nantucket Shoals Dogfish Fishery Exemption Area, if the vessel complies with the requirements specified in paragraph (a)(10)(i) of this section. The Nantucket Shoals Dogfish Fishery Exemption Area (copies of a map depicting this area are available from the Regional Administrator upon request) is defined by straight lines connecting the following points in the order stated:

NANTUCKET SHOALS DOGFISH EXEMPTION AREA

Point	N. lat.	W. long.
NS1	41°45'	70°00'
NS2	41°45'	69°20'
NS3	41°30'	69°20'
CI1	41°30'	69°23'
NS5	41°26.5'	69°20'
NS6	40°50'	69°20'
NS7	40°50'	70°00'
NS1	41°45'	70°00'

(i) *Requirements.* (A) A vessel fishing in the Nantucket Shoals Dogfish Fishery Exemption Area, under the exemption, must have on board a letter of authorization issued by the Regional Administrator and may not fish for, pos-

sess on board, or land any species of fish other than dogfish, except as provided under paragraph (a)(10)(i)(D) of this section.

(B) Fishing is confined to June 1 through October 15.

(C) When transiting the GOM or GB Regulated Mesh Areas, specified under paragraphs (a)(1) and (2) of this section, any nets with a mesh size smaller than the minimum mesh size specified in paragraphs (a)(3) and (4) of this section must be stowed and unavailable for immediate use in accordance with § 648.23(b).

(D) *Incidental species provisions.* The following species may be possessed and landed, with the restrictions noted, as allowable incidental species in the Nantucket Shoals Dogfish Fishery Exemption Area: Longhorn sculpin; silver hake—up to 200 lb (90.7 kg); monkfish and monkfish parts—up to 10 percent, by weight, of all other species on board or up to 50 lb (23 kg) tail-weight/166 lb (75 kg) whole-weight of monkfish per trip, as specified in § 648.94(c)(4), whichever is less; American lobster—up to 10 percent, by weight, of all other species on board or 200 lobsters, whichever is less, unless otherwise restricted by landing limits specified in § 697.17 of this chapter; and skate or skate parts—up to 10 percent, by weight, of all other species on board.

(E) A vessel fishing in the Nantucket Shoals Dogfish Fishery Exemption Area, under the exemption, must comply with any additional gear restrictions specified in the letter of authorization issued by the Regional Administrator.

(ii) *Sea sampling.* The Regional Administrator may conduct periodic sea sampling to determine if there is a need to change the area or season designation, and to evaluate the bycatch of regulated species.

(11) *GOM Scallop Dredge Exemption Area.* Unless otherwise prohibited in § 648.81, vessels with a limited access scallop permit that have declared out of the DAS program as specified in § 648.10, or that have used up their DAS allocations, and vessels issued a General Category scallop permit, may fish in the GOM Scallop Dredge Fishery Exemption Area when not under a NE multispecies DAS, providing the vessel

§ 648.80

50 CFR Ch. VI (10–1–05 Edition)

complies with the requirements specified in paragraph (a)(11)(i) of this section. The GOM Scallop Dredge Fishery Exemption Area is defined by the straight lines connecting the following points in the order stated (copies of a map depicting the area are available from the Regional Administrator upon request):

GOM SCALLOP DREDGE EXEMPTION AREA

Point	N. lat.	W. long.
SM1	41°35'	70°00'

G2	43°58'	67°22'
G1	(¹)	(¹)

¹Northward along the irregular U.S.-Canada maritime boundary to the shoreline.

(i) *Requirements.* (A) A vessel fishing in the GOM Scallop Dredge Fishery Exemption Area specified in this paragraph (a)(11) may not fish for, possess on board, or land any species of fish other than Atlantic sea scallops.

(B) The combined dredge width in use by, or in possession on board, vessels fishing in the GOM Scallop Dredge Fishery Exemption Area may not exceed 10.5 ft (3.2 m), measured at the widest point in the bail of the dredge.

(C) The exemption does not apply to the Cashes Ledge Closure Area or the Western GOM Area Closure specified in § 648.81(d) and (e).

(ii) [Reserved]

(12) *Nantucket Shoals Mussel and Sea Urchin Dredge Exemption Area.* A vessel may fish with a dredge in the Nantucket Shoals Mussel and Sea Urchin Dredge Exemption Area, provided that any dredge on board the vessel does not exceed 8 ft (2.4 m), measured at the widest point in the bail of the dredge, and the vessel does not fish for, harvest, possess, or land any species of fish other than mussels and sea urchins. The area coordinates of the Nantucket Shoals Mussel and Sea Urchin Dredge Exemption Area are the same coordinates as those of the Nantucket Shoals Dogfish Fishery Exemption Area specified in paragraph (a)(10) of this section.

(13) *GOM/GB Dogfish and Monkfish Gillnet Fishery Exemption Area.* Unless otherwise prohibited in § 648.81, a vessel may fish with gillnets in the GOM/GB

Dogfish and Monkfish Gillnet Fishery Exemption Area when not under a NE multispecies DAS if the vessel complies with the requirements specified in paragraph (a)(13)(i) of this section. The GOM/GB Dogfish and Monkfish Gillnet Fishery Exemption Area is defined by straight lines connecting the following points in the order stated:

N. lat.	W. long.
41°35'	70°00'
42°49.5'	70°00'
42°49.5'	69°40'
43°12'	69°00'
(¹)	69°00'

¹ Due north to Maine shoreline.

(i) *Requirements.* (A) A vessel fishing under this exemption may not fish for, possess on board, or land any species of fish other than monkfish, or lobsters in an amount not to exceed 10 percent by weight of the total catch on board, or 200 lobsters, whichever is less.

(B) All gillnets must have a minimum mesh size of 10-inch (25.4-cm) diamond mesh throughout the net.

(C) Fishing is confined to July 1 through September 14.

(ii) [Reserved]

(14) *GOM/GB Dogfish Gillnet Exemption.* Unless otherwise prohibited in § 648.81, a vessel may fish with gillnets in the GOM/GB Dogfish and Monkfish Gillnet Fishery Exemption Area when not under a NE multispecies DAS if the vessel complies with the requirements specified in paragraph (a)(14)(i) of this section. The area coordinates of the GOM/GB Dogfish and Monkfish Gillnet Fishery Exemption Area are specified in paragraph (a)(13) of this section.

(i) *Requirements.* (A) A vessel fishing under this exemption may not fish for, possess on board, or land any species of fish other than dogfish, or lobsters in an amount not to exceed 10 percent by weight of the total catch on board, or 200 lobsters, whichever is less.

(B) All gillnets must have a minimum mesh size of 6.5-inch (16.5-cm) diamond mesh throughout the net.

(C) Fishing is confined to July 1 through August 31.

(ii) [Reserved]

(15) *Raised Footrope Trawl Exempted Whiting Fishery.* Vessels subject to the minimum mesh size restrictions specified in paragraphs (a)(3) or (4) of this

Fishery Conservation and Management

§ 648.80

section may fish with, use, or possess nets in the Raised Footrope Trawl Whiting Fishery area with a mesh size smaller than the minimum size specified, if the vessel complies with the requirements specified in paragraph (a)(15)(i) of this section. This exemption does not apply to the Cashes Ledge Closure Areas or the Western GOM Area Closure specified in § 648.81(d) and (e). The Raised Footrope Trawl Whiting Fishery Area (copies of a chart depicting the area are available from the Regional Administrator upon request) is defined by straight lines connecting the following points in the order stated:

RAISED FOOTROPE TRAWL WHITING FISHERY EXEMPTION AREA

[September 1 through November 20]

RAISED FOOTROPE TRAWL WHITING FISHERY EXEMPTION AREA

[November 21 through December 31]

Point	N. lat.	W. long.
RF 1	42°14.05'	70°08.8'
RF 2	42°09.2'	69°47.8'
RF 3	41°54.85'	69°35.2'
RF 4	41°41.5'	69°32.85'
RF 5	41°39'	69°44.3'
RF 6	41°45.6'	69°51.8'
RF 7	41°52.3'	69°52.55'
RF 8	41°55.5'	69°53.45'
RF 9	42°08.35'	70°04.05'
RF 1	42°14.05'	70°08.8'

(i) *Requirements.* (A) A vessel fishing in the Raised Footrope Trawl Whiting Fishery under this exemption must have on board a valid letter of authorization issued by the Regional Administrator. To obtain a letter of authorization, vessel owners must write to or call during normal business hours the Northeast Region Permit Office and provide the vessel name, owner name,

permit number, and the desired period of time that the vessel will be enrolled. Since letters of authorization are effective the day after they are requested, vessel owners should allow appropriate processing and mailing time. To withdraw from a category, vessel owners must write to or call the Northeast Region Permit Office. Withdrawals are effective the day after the date of request. Withdrawals may occur after a minimum of 7 days of enrollment.

(B) All nets must be no smaller than a minimum mesh size of 2.5-inch (6.35-cm) square or diamond mesh, subject to the restrictions as specified in paragraph (a)(15)(i)(D) of this section. An owner or operator of a vessel enrolled in the raised footrope whiting fishery may not fish for, possess on board, or land any species of fish other than whiting and offshore hake, subject to the applicable possession limits as specified in § 648.86, except for the following allowable incidental species: Red hake, butterfish, dogfish, herring, mackerel, scup, and squid.

(C) [Reserved]

(D) All nets must comply with the minimum mesh sizes specified in paragraphs (a)(15)(i)(B) of this section. Counting from the terminus of the net, the minimum mesh size is applied to the first 100 meshes (200 bars in the case of square mesh) from the terminus of the net for vessels greater than 60 ft (18.3 m) in length and is applied to the first 50 meshes (100 bars in the case of square mesh) from the terminus of the net for vessels less than or equal to 60 ft (18.3 m) in length.

(E) Raised footrope trawl gear is required and must be configured as specified in paragraphs (a)(9)(ii)(A) through (D) of this section.

(F) Fishing may only occur from September 1 through November 20 of each fishing year, except that it may occur in the eastern portion only of the Raised Footrope Trawl Whiting Fishery Exemption Area from November 21 through December 31 of each fishing year.

(G) A vessel enrolled in the Raised Footrope Trawl Whiting Fishery may fish for small-mesh multispecies in exempted fisheries outside of the Raised Footrope Trawl Whiting Fishery exemption area, provided that the vessel

complies with the more restrictive gear, possession limit and other requirements specified in the regulations of that exempted fishery for the entire participation period specified on the vessel's letter of authorization. For example, a vessel may fish in both the Raised Footrope Trawl Whiting Fishery and the Cultivator Shoal Whiting Fishery Exemption Area, and would be restricted to a minimum mesh size of 3 inches (7.6 cm), as required in the Cultivator Shoal Whiting Fishery Exemption Area; the use of the raised footrope trawl; and the catch and bycatch restrictions of the Raised Footrope Trawl Whiting Fishery, except for scup.

(ii) *Sea sampling.* The Regional Administrator shall conduct periodic sea sampling to evaluate the bycatch of regulated species.

(16) *GOM Grate Raised Footrope Trawl Exempted Whiting Fishery.* Vessels subject to the minimum mesh size restrictions specified in paragraphs (a)(3) or (4) of this section may fish with, use, and possess in the GOM Grate Raised Footrope Trawl Whiting Fishery area from July 1 through November 30 of each year, nets with a mesh size smaller than the minimum size specified, if the vessel complies with the requirements specified in paragraphs (a)(16)(i) and (ii) of this section. The GOM Grate Raised Footrope Trawl Whiting Fishery Area (copies of a chart depicting the area are available from the Regional Administrator upon request) is defined by straight lines connecting the following points in the order stated:

GOM GRATE RAISED FOOTROPE TRAWL
WHITING FISHERY EXEMPTION AREA
[July 1 through November 30]

Point	N. lat.	W. long.
GRF1	43°15'	70°35.4'
GRF2	43°15'	70°00'
GRF3	43°25.2'	70°00'
GRF4	43°41.8'	69°20'
GRF5	43°58.8'	69°20'

(i) *Mesh requirements and possession restrictions.* (A) All nets must comply with a minimum mesh size of 2.5-inch (6.35-cm) square or diamond mesh, subject to the restrictions specified in paragraph (a)(16)(i)(B) of this section.

An owner or operator of a vessel participating in the GOM Grate Raised Footrope Trawl Exempted Whiting Fishery may not fish for, possess on board, or land any species of fish, other than whiting and offshore hake, subject to the applicable possession limits as specified in paragraph (a)(16)(i)(C) of this section, except for the following allowable incidental species: Red hake, butterfish, herring, mackerel, squid, and alewife.

(B) All nets must comply with the minimum mesh size specified in paragraph (a)(16)(i)(A) of this section. Counting from the terminus of the net, the minimum mesh size is applied to the first 100 meshes (200 bars in the case of square mesh) from the terminus of the net for vessels greater than 60 ft (18.3 m) in length and is applied to the first 50 meshes (100 bars in the case of square mesh) from the terminus of the net for vessels less than or equal to 60 ft (18.3 m) in length.

(C) An owner or operator of a vessel participating in the GOM Grate Raised Footrope Trawl Exempted Whiting Fishery may fish for, possess, and land combined silver hake and offshore hake only up to 7,500 lb (3,402 kg). An owner or operator fishing with mesh larger than the minimum mesh size specified in paragraph (a)(16)(i)(A) of this section may not fish for, possess, or land silver hake or offshore hake in quantities larger than 7,500 lb (3,402 kg).

(ii) *Gear specifications.* In addition to the requirements specified in paragraph (a)(16)(i) of this section, an owner or operator of a vessel fishing in the GOM Grate Raised Footrope Trawl Exempted Whiting Fishery must configure the vessel's trawl gear as specified in paragraphs (a)(16)(ii)(A) through (C) of this section.

(A) An owner or operator of a vessel fishing in the GOM Grate Raised Footrope Trawl Exempted Whiting Fishery must configure the vessel's trawl gear with a raised footrope trawl as specified in paragraphs (a)(9)(ii)(A) through (C) of this section. In addition, the restrictions specified in paragraphs (a)(16)(ii)(B) and (C) of this section apply to vessels fishing in the GOM Grate Raised Footrope Trawl Exempted Whiting Fishery.

Fishery Conservation and Management

§ 648.80

(B) The raised footrope trawl must be used without a sweep of any kind (chain, roller frame, or rockhopper). The drop chains must be a maximum of $\frac{3}{8}$ -inch (0.95 cm) diameter bare chain and must be hung from the center of the footrope and each corner (the quarter, or the junction of the bottom wing to the belly at the footrope). Drop chains must be at least 42 inches (106.7 cm) in length and must be hung at intervals of 8 ft (2.4 m) along the footrope from the corners to the wing ends.

(C) The raised footrope trawl net must have a rigid or semi-rigid grate consisting of parallel bars of not more than 50 mm (1.97 inches) spacing that excludes all fish and other objects, except those that are small enough to pass between its bars into the codend of the trawl. The grate must be secured in the trawl, forward of the codend, in such a manner that it precludes the passage of fish or other objects into the codend without the fish or objects having to first pass between the bars of the grate. The net must have an outlet or hole to allow fish or other objects that are too large to pass between the bars of the grate to exit the net. The aftermost edge of this outlet or hole must be at least as wide as the grate at the point of attachment. The outlet or hole must extend forward from the grate toward the mouth of the net. A funnel of net material is allowed in the lengthening piece of the net forward of the grate to direct catch towards the grate.

(iii) *Annual review.* On an annual basis, the Groundfish PDT will review data from this fishery, including sea sampling data, to determine whether adjustments are necessary to ensure that regulated species bycatch remains at a minimum. If the Groundfish PDT recommends adjustments to ensure that regulated species bycatch remains at a minimum, the Council may take action prior to the next fishing year through the framework adjustment process specified in §648.90(b), and in accordance with the Administrative Procedure Act.

(17) *GOM/GB Exemption Area—Area definition.* The GOM/GB Exemption Area (copies of a map depicting this area are available from the Regional Administrator upon request) is that area:

(i) Bounded on the east by the U.S.-Canada maritime boundary, defined by straight lines connecting the following points in the order stated:

GULF OF MAINE GEORGES BANK EXEMPTION AREA

Point	N. lat.	W. long.

¹Northward to its intersection with the shoreline of mainland Massachusetts.

(b) *Southern New England (SNE) Regulated Mesh Area—(1) Area definition.* The SNE Regulated Mesh Area (copies of a map depicting this area are available from the Regional Administrator upon request) is that area:

(i) Bounded on the east by the western boundary of the GB Regulated Mesh Area described under paragraph (a)(2)(iii) of this section; and

(ii) Bounded on the west by a line beginning at the intersection of 74°00' W. long. and the south facing shoreline of

Long Island, NY, and then running southward along the 74°00' W. long. line.

(2) *Gear restrictions*—(i) *Vessels using trawls*. Except as provided in paragraphs (b)(2)(i) and (vi) of this section, and unless otherwise restricted under paragraph (b)(2)(iii) of this section, the minimum mesh size for any trawl net, not stowed and not available for immediate use in accordance with §648.23(b), except midwater trawl, on a vessel or used by a vessel fishing under a DAS in the NE multispecies DAS program in the SNE Regulated Mesh Area is 6-inch (15.2-cm) diamond mesh or 6.5-inch (16.5-cm) square mesh, applied throughout the body and extension of the net, or any combination thereof, and 6.5-inch (16.5-cm) square mesh or, 7-inch (17.8-cm) diamond mesh applied to the codend of the net, as defined under paragraph (a)(3)(i) of this section. This restriction does not apply to nets or pieces of nets smaller than 3 ft (0.9 m) × 3 ft (0.9 m), (9 sq ft (0.81 sq m)), or to vessels that have not been issued a NE multispecies permit and that are fishing exclusively in state waters.

(ii) *Vessels using Scottish seine, midwater trawl, and purse seine*. Except as provided in paragraphs (b)(2)(ii) and (vi) of this section, the minimum mesh size for any Scottish seine, midwater trawl, or purse seine, not stowed and not available for immediate use in accordance with §648.23(b), on a vessel or used by a vessel fishing under a DAS in the NE multispecies DAS program in the SNE Regulated Mesh Area is 6-inch (15.2-cm) diamond mesh or 6.5-inch (16.5-cm) square mesh applied throughout the net, or any combination thereof. This restriction does not apply to nets or pieces of nets smaller than 3 ft (0.9 m) × 3 ft (0.9 m), (9 sq ft (0.81 sq m)), or to vessels that have not been issued a NE multispecies permit and that are fishing exclusively in state waters.

(iii) *Large-mesh vessels*. When fishing in the SNE Regulated Mesh Area, the minimum mesh size for any trawl net vessel, or sink gillnet, not stowed and not available for immediate use in accordance with §648.23(b) on a vessel or used by a vessel fishing under a DAS in the Large-mesh DAS program, specified in §648.82(b)(4), is 8.5-inch (21.6-cm) diamond or square mesh throughout

the entire net. This restriction does not apply to nets or pieces of nets smaller than 3 ft (0.9 m) × 3 ft (0.9 m), (9 sq ft (0.81 sq m)), or to vessels that have not been issued a NE multispecies permit and that are fishing exclusively in state waters.

(iv) *Gillnet vessels*. For Day and Trip gillnet vessels, the minimum mesh size for any sink gillnet not stowed and not available for immediate use in accordance with §648.23(b), when fishing under a DAS in the NE multispecies DAS program in the SNE Regulated Mesh Area, is 6.5 inches (16.5 cm) throughout the entire net. This restriction does not apply to nets or pieces of nets smaller than 3 ft (0.9 m) × 3 ft (0.9 m), (9 sq ft (0.81 sq m)), or to vessels that have not been issued a NE multispecies permit and that are fishing exclusively in state waters. Day gillnet vessels must also abide by the tagging requirements in paragraph (a)(3)(iv)(C) of this section.

(A) *Trip gillnet vessels*. A Trip gillnet vessel fishing under a NE multispecies DAS and fishing in the SNE Regulated Mesh Area may not fish with nets longer than 300 ft (91.4 m), or 50 fathoms (91.4 m) in length.

(B) *Day gillnet vessels*—(1) *Number of nets*. A Day gillnet vessel fishing under a NE multispecies DAS and fishing in the SNE Regulated Mesh Area may not fish with, haul, possess, or deploy more than 75 nets, except as provided in §648.92(b)(8)(i). Such vessels, in accordance with §648.23(b), may stow additional nets not to exceed 160, counting deployed nets.

(2) *Net size requirements*. Nets may not be longer than 300 ft (91.4 m), or 50 fathoms (91.4 m), in length.

(3) *Tags*. Roundfish or flatfish gillnets must be tagged with two tags per net, with one tag secured to each bridle of every net within a string of nets.

(C) *Obtaining and replacing tags*. See paragraph (a)(3)(iv)(C) of this section.

(v) *Hook gear restrictions*. Unless otherwise specified in this paragraph (b)(2)(v), vessels fishing with a valid NE multispecies limited access permit and fishing under a NE multispecies DAS, and vessels fishing with a valid NE multispecies limited access Small-Vessel permit, in the SNE Regulated Mesh Area, and persons on such vessels, are

prohibited from fishing, setting, or hauling back, per day, or possessing on board the vessel, more than 2,000 rigged hooks. All longline gear hooks must be circle hooks, of a minimum size of 12/0. An unabated hook and gangions that has not been secured to the ground line of the trawl on board a vessel is deemed to be a replacement hook and is not counted toward the 2,000-hook limit. A “snap-on” hook is deemed to be a replacement hook if it is not rigged or baited. The use of de-hookers (“crucifer”) with less than 6-inch (15.2-cm) spacing between the fairlead rollers is prohibited. Vessels fishing with a valid NE multispecies limited access Hook Gear permit and fishing under a multispecies DAS in the SNE Regulated Mesh Area, and persons on such vessels, are prohibited from possessing gear other than hook gear on board the vessel. Vessels fishing with a valid NE multispecies limited access Handgear A permit are prohibited from fishing, or possessing on board the vessel, gears other than handgear. Vessels fishing with tub-trawl gear are prohibited from fishing, setting, or hauling back, per day, or possessing on board the vessel more than 250 hooks.

(vi) *Other restrictions and exemptions.* Vessels are prohibited from fishing in the SNE Exemption Area, as defined in paragraph (b)(10) of this section, except if fishing with exempted gear (as defined under this part) or under the exemptions specified in paragraphs (b)(3), (b)(5) through (9), (b)(11), (c), (e), (h) and (i) of this section, or if fishing under a NE multispecies DAS, if fishing under the Small Vessel or Handgear A exemptions specified in §648.82(b)(5) and (b)(6), respectively, or if fishing under a scallop state waters exemption specified in §648.54, or if fishing under a scallop DAS in accordance with paragraph (h) of this section, or if fishing under a General Category scallop permit in accordance with paragraphs (a)(11)(i)(A) and (B) of this section, or if fishing pursuant to a NE multispecies open access Charter/Party or Handgear permit, or if fishing as a charter/party or private recreational vessel in compliance with the regulations specified in §648.89. Any gear on a vessel, or used by a vessel, in this area must be authorized under one of these

exemptions or must be stowed as specified in §648.23(b).

(3) *Exemptions*—(i) *Species exemptions.* Owners and operators of vessels subject to the minimum mesh size restrictions specified in paragraphs (a)(4) and (b)(2) of this section, may fish for, harvest, possess, or land butterfish, dogfish (trawl only), herring, Atlantic mackerel, ocean pout, scup, shrimp, squid, summer flounder, silver hake and offshore hake, and weakfish with nets of a mesh size smaller than the minimum size specified in the GB and SNE Regulated Mesh Areas when fishing in the SNE Exemption Area defined in paragraph (b)(10) of this section, provided such vessels comply with requirements specified in paragraph (b)(3)(ii) of this section and with the mesh size and possession limit restrictions specified under §648.86(d).

(ii) *Possession and net stowage requirements.* Vessels may possess regulated species while in possession of nets with mesh smaller than the minimum size specified in paragraphs (a)(4) and (b)(2) of this section when fishing in the SNE Exemption Area defined in paragraph (b)(10) of this section, provided that such nets are stowed and are not available for immediate use in accordance with §648.23(b), and provided that regulated species were not harvested by nets of mesh size smaller than the minimum mesh size specified in paragraphs (a)(4) and (b)(2) of this section. Vessels fishing for the exempted species identified in paragraph (b)(3)(i) of this section may also possess and retain the following species, with the restrictions noted, as incidental take to these exempted fisheries: Conger eels; sea robins; black sea bass; red hake; tautog (blackfish); blowfish; cunner; John Dory; mullet; bluefish; tilefish; longhorn sculpin; fourspot flounder; alewife; hickory shad; American shad; blueback herring; sea raven; Atlantic croaker; spot; swordfish; monkfish and monkfish parts—up to 10 percent, by weight, of all other species on board or up to 50 lb (23 kg) tail-weight/166 lb (75 kg) whole weight of monkfish per trip, as specified in §648.94(c)(4), whichever is less; American lobster—up to 10 percent, by weight, of all other species on board or 200 lobsters, whichever is less; and skate and skate parts—up to 10

percent, by weight, of all other species on board.

(4) *Addition or deletion of exemptions.* Same as in paragraph (a)(8) of this section.

(5) *SNE Monkfish and Skate Trawl Exemption Area.* Unless otherwise required or prohibited by monkfish or skate regulations under this part, a vessel may fish with trawl gear in the SNE Monkfish and Skate Trawl Fishery Exemption Area when not operating under a NE multispecies DAS if the vessel complies with the requirements specified in paragraph (b)(5)(i) of this section, and the monkfish and skate regulations, as applicable, under this part. The SNE Monkfish and Skate Trawl Fishery Exemption Area is defined as the area bounded on the north by a line extending eastward along 40°10' N. lat., and bounded on the west by the western boundary of the SNE Exemption Area as defined in paragraph (b)(10)(ii) of this section.

(i) *Requirements.* (A) A vessel fishing under this exemption may only fish for, possess on board, or land monkfish and incidentally caught species up to the amounts specified in paragraph (b)(3) of this section.

(B) All trawl nets must comply with the minimum mesh size specified under § 648.91(c)(1)(i).

(C) A vessel not operating under a multispecies DAS may fish for, possess on board, or land skates, provided:

(1) The vessel is called into the monkfish DAS program (§ 648.92) and complies with the skate possession limit restrictions at § 648.322;

(2) The vessel has an LOA on board to fish for skates as bait only, and complies with the requirements specified at § 648.322(b); or

(3) The vessel possesses and/or lands skates or skate parts in an amount not to exceed 10 percent by weight of all other species on board as specified at paragraph (b)(3) of this section.

(ii) [Reserved]

(6) *SNE Monkfish and Skate Gillnet Exemption Area.* Unless otherwise required by monkfish regulations under this part, a vessel may fish with gillnet gear in the SNE Monkfish and Skate Gillnet Fishery Exemption Area when not operating under a NE multispecies DAS if the vessel complies with the re-

quirements specified in paragraph (b)(6)(i) of this section; the monkfish regulations, as applicable, under §§ 648.91 through 648.94; and the skate regulations, as applicable, under §§ 648.4 and 648.322. The SNE Monkfish and Skate Gillnet Fishery Exemption Area is defined by a line running from the Massachusetts shoreline at 41°35' N. lat. and 70°00' W. long., south to its intersection with the outer boundary of the EEZ, southwesterly along the outer boundary of the EEZ, and bounded on the west by the western boundary of the SNE Exemption Area, as defined in paragraph (b)(10)(ii) of this section.

(i) *Requirements.* (A) A vessel fishing under this exemption may only fish for, possess on board, or land monkfish and incidentally caught species up to the amounts specified in paragraph (b)(3) of this section.

(B) All gillnets must have a minimum mesh size of 10-inch (25.4-cm) diamond mesh throughout the net.

(C) All nets with a mesh size smaller than the minimum mesh size specified in paragraph (b)(6)(i)(B) of this section must be stowed as specified in § 648.23(b).

(D) A vessel not operating under a NE multispecies DAS may fish for, possess on board, or land skates, provided:

(1) The vessel is called into the monkfish DAS program (§ 648.92) and complies with the skate possession limit restrictions at § 648.322;

(2) The vessel has an Letter of Authorization on board to fish for skates as bait only, and complies with the requirements specified at § 648.322(b); or

(3) The vessel possesses and/or lands skates or skate parts in an amount not to exceed 10 percent, by weight, of all other species on board as specified at paragraph (b)(3) of this section.

(ii) [Reserved]

(7) *SNE Dogfish Gillnet Exemption Area.* Unless otherwise required by monkfish regulations under this part, a gillnet vessel may fish in the SNE Dogfish Gillnet Fishery Exemption Area when not operating under a NE multispecies DAS if the vessel complies with the requirements specified in paragraph (b)(7)(i) of this section and the applicable dogfish regulations under subpart L of this part. The SNE Dogfish Gillnet Fishery Exemption

Fishery Conservation and Management

§ 648.80

Area is defined by a line running from the Massachusetts shoreline at 41°35' N. lat. and 70°00' W. long., south to its intersection with the outer boundary of the EEZ, southwesterly along the outer boundary of the EEZ, and bounded on the west by the western boundary of the SNE Exemption Area as defined in paragraph (b)(10)(ii) of this section.

(i) *Requirements.* (A) A vessel fishing under this exemption may only fish for, possess on board, or land dogfish and the bycatch species and amounts specified in paragraph (b)(3) of this section.

(B) All gillnets must have a minimum mesh size of 6-inch (15.2-cm) diamond mesh throughout the net.

(C) Fishing is confined to May 1 through October 31.

(ii) [Reserved]

(8) *SNE Mussel and Sea Urchin Dredge Exemption.* A vessel may fish with a dredge in the SNE Exemption Area, as defined in paragraph (b)(10) of this section, provided that any dredge on board the vessel does not exceed 8 ft (2.4 m), measured at the widest point in the bail of the dredge, and the vessel does not fish for, harvest, possess, or land any species of fish other than mussels and sea urchins.

(9) *SNE Little Tunny Gillnet Exemption Area.* A vessel may fish with gillnet gear in the SNE Little Tunny Gillnet Exemption Area when not operating under a NE multispecies DAS with mesh size smaller than the minimum required in the SNE Regulated Mesh Area, if the vessel complies with the requirements specified in paragraph (b)(9)(i) of this section. The SNE Little Tunny Gillnet Exemption Area is defined by a line running from the Rhode Island shoreline at 41°18.2' N. lat. and 71°51.5' W. long. (Watch Hill, RI), southwesterly through Fishers Island, NY, to Race Point, Fishers Island, NY; and from Race Point, Fishers Island, NY, southeasterly to 41°06.5' N. lat. and 71°50.2' W. long.; east-northeasterly through Block Island, RI, to 41°15' N. lat. and 71°07' W. long.; then due north to the intersection of the RI-MA shoreline.

(i) *Requirements.* (A) A vessel fishing under this exemption may fish only for, possess on board, or land little tunny and the allowable incidental spe-

cies and amounts specified in paragraph (b)(3) of this section and, if applicable, paragraph (b)(9)(i)(B) of this section. Vessels fishing under this exemption may not possess regulated species.

(B) A vessel may possess bonito as an allowable incidental species.

(C) The vessel must have a letter of authorization issued by the Regional Administrator on board.

(D) All gillnets must have a minimum mesh size of 5.5-inch (14.0-cm) diamond mesh throughout the net.

(E) All nets with a mesh size smaller than the minimum mesh size specified in paragraph (b)(9)(i)(D) of this section must be stowed in accordance with one of the methods described under § 648.23(b) while fishing under this exemption.

(F) Fishing is confined to September 1 through October 31.

(ii) The Regional Administrator shall conduct periodic sea sampling to evaluate the likelihood of gear interactions with protected resources.

(10) *SNE Exemption Area—Area definition.* The SNE Exemption Area (copies of a map depicting this area are available from the Regional Administrator upon request) is that area:

(i) Bounded on the east by straight lines connecting the following points in the order stated:

SOUTHERN NEW ENGLAND EXEMPTION AREA

Point	N. lat.	W. long.
G5	41°18.6'	66°24.8'
G6	40°55.5'	66°38'
G7	40°45.5'	68°00'
G8	40°37'	68°00'
G9	40°30.5'	69°00'
NL3	40°22.7'	69°00'
NL2	40°18.7'	69°40'
NL1	40°50'	69°40'
G11	40°50'	70°00'
G12	70°00' ¹

¹ Northward to its intersection with the shoreline of mainland Massachusetts.

(ii) Bounded on the west by a line running from the Rhode Island shoreline at 41°18.2' N. lat. and 71°51.5' W. long. (Watch Hill, RI), southwesterly through Fishers Island, NY, to Race Point, Fishers Island, NY; and from Race Point, Fishers Island, NY, southeasterly to the intersection of the 3-nautical mile line east of Montauk Point; southwesterly along the 3-nautical mile line to the intersection of

§ 648.80

50 CFR Ch. VI (10–1–05 Edition)

72°30' W. long.; and south along that line to the intersection of the outer boundary of the EEZ.

(11) *SNE Scallop Dredge Exemption Area.* Unless otherwise prohibited in §648.81, or 50 CFR part 648, subpart D, vessels with a limited access scallop permit that have declared out of the DAS program as specified in §648.10, or that have used up their DAS allocation, and vessels issued a General Category scallop permit, may fish in the SNE Scallop Dredge Exemption Area when not under a NE multispecies DAS, provided the vessel complies with the requirements specified in paragraph (b)(11)(ii) of this section.

(i) The SNE Scallop Dredge Exemption Area is that area (copies of a chart depicting this area are available from the Regional Administrator upon request):

(A) Bounded on the west, south, and east by straight lines connecting the following points in the order stated:

Point	N. lat.	W. long.
Sc1	(¹)	73°00'
Sc2	40°00'	73°00'
Sc3	40°00'	71°40'
Sc4	39°50'	71°40'
Sc5	39°50'	70°00'
Sc6	(²)	70°00'
Sc7	(³)	70°00'
Sc8	(⁴)	70°00'

¹ South facing shoreline of Long Island, NY.

² South facing shoreline of Nantucket, MA.

³ North facing shoreline of Nantucket, MA.

⁴ South facing shoreline of Cape Cod, MA.

(B) Bounded on the northwest by straight lines connecting the following points in the order stated:

Point	N. lat.	W. long.
Sc9	41°00'	(¹)
Sc10	41°00'	71°40'
Sc11	(²)	71°40'

¹ East facing shoreline of the south fork of Long Island, NY.

² South facing shoreline of RI.

(ii) *Exemption program requirements.*

(A) A vessel fishing in the Scallop Dredge Exemption Area may not fish for, possess on board, or land any species of fish other than Atlantic sea scallops.

(B) The combined dredge width in use by or in possession on board vessels fishing in the SNE Scallop Dredge Exemption Area shall not exceed 10.5 ft (3.2 m), measured at the widest point in the bail of the dredge.

(C) The minimum mesh size used in the twine top of scallop dredges must be 10 in (25.4 cm).

(D) The exemption does not apply to the Nantucket Lightship Closed Area specified under §648.81(c).

(c) *Mid-Atlantic (MA) Regulated Mesh Area*—(1) *Area definition.* The MA Regulated Mesh Area is that area bounded on the east by the western boundary of the SNE Regulated Mesh Area, described under paragraph (b)(1)(ii) of this section.

(2) *Gear restrictions*—(i) *Vessels using trawls.* Except as provided in paragraph (c)(2)(iii) of this section, the minimum mesh size for any trawl net not stowed and not available for immediate use in accordance with §648.23(b), on a vessel or used by a vessel fishing under a DAS in the NE multispecies DAS program in the MA Regulated Mesh Area shall be that specified by §648.104(a), applied throughout the body and extension of the net, or any combination thereof, and 6.5-inch (16.5-cm) diamond or square mesh applied to the codend of the net, as defined in paragraph (a)(3)(i) of this section. This restriction does not apply to nets or pieces of nets smaller than 3 ft (0.9 m) × 3 ft (0.9 m), (9 sq ft (0.81 sq m)), or to vessels that have not been issued a NE multispecies permit and that are fishing exclusively in state waters.

(ii) *Vessels using Scottish seine, midwater trawl, and purse seine.* Except as provided in paragraph (c)(2)(iii) of this section, the minimum mesh size for any sink gillnet, Scottish seine, midwater trawl, or purse seine, not stowed and not available for immediate use in accordance with §648.23(b), on a vessel or used by a vessel fishing under a DAS in the NE multispecies DAS program in the MA Regulated Mesh Area, shall be that specified in §648.104(a). This restriction does not apply to nets or pieces of nets smaller than 3 ft (0.9 m) × 3 ft (0.9 m), (9 sq ft (0.81 sq m)), or to vessels that have not been issued a NE multispecies permit and that are fishing exclusively in state waters.

(iii) *Large-mesh vessels.* When fishing in the MA Regulated Mesh Area, the minimum mesh size for any trawl net vessel, or sink gillnet, not stowed and not available for immediate use in accordance with §648.23(b), on a vessel or

used by a vessel fishing under a DAS in the Large-mesh DAS program, specified in § 648.82(b)(4), is 7.5-inch (19.0-cm) diamond mesh or 8.0-inch (20.3-cm) square mesh, throughout the entire net. This restriction does not apply to nets or pieces of nets smaller than 3 ft (0.9 m) × 3 ft (0.9 m), (9 sq ft (0.81 sq m)), or to vessels that have not been issued a NE multispecies permit and that are fishing exclusively in state waters.

(iv) *Hook gear restrictions.* Unless otherwise specified in this paragraph (c)(2)(iv), vessels fishing with a valid NE multispecies limited access permit and fishing under a NE multispecies DAS, and vessels fishing with a valid NE multispecies limited access Small Vessel permit, in the MA Regulated Mesh Area, and persons on such vessels, are prohibited from using de-hookers (“crucifer”) with less than 6-inch (15.2-cm) spacing between the fairlead rollers. Vessels fishing with a valid NE multispecies limited access Hook gear permit and fishing under a NE multispecies DAS in the MA Regulated Mesh Area, and persons on such vessels, are prohibited from possessing gear other than hook gear on board the vessel and are prohibited from fishing, setting, or hauling back, per day, or possessing on board the vessel, more than 4,500 rigged hooks. An unabated hook and gangions that has not been secured to the ground line of the trawl on board a vessel is deemed to be a replacement hook and is not counted toward the 4,500-hook limit. A “snap-on” hook is deemed to be a replacement hook if it is not rigged or baited. Vessels fishing with a valid NE multispecies limited access Handgear permit are prohibited from fishing, or possessing on board the vessel gears other than handgear. Vessels fishing with tub-trawl gear are prohibited from fishing, setting, or hauling back, per day, or possessing on board the vessel, more than 250 hooks.

(v) *Gillnet vessels.* For Day and Trip gillnet vessels, the minimum mesh size for any sink gillnet, not stowed and not available for immediate use in accordance with § 648.23(b), when fishing under a DAS in the NE multispecies DAS program in the MA Regulated Mesh Area, is 6.5 inches (16.5 cm) throughout the entire net. This restriction

does not apply to nets or pieces of nets smaller than 3 ft (0.9 m) × 3 ft (0.9 m), (9 sq ft (0.81 sq m)), or to vessels that have not been issued a NE multispecies permit and that are fishing exclusively in state waters.

(A) *Trip gillnet vessels.* A Trip gillnet vessel fishing under a NE multispecies DAS and fishing in the MA Regulated Mesh Area may not fish with nets longer than 300 ft (91.4 m), or 50 fathoms (91.4 m) in length.

(B) *Day gillnet vessels*—(1) *Number of nets.* A Day gillnet vessel fishing under a NE multispecies DAS and fishing in the MA Regulated Mesh Area, may not fish with, haul, possess, or deploy more than 75 nets, except as provided in § 648.92(b)(8)(i). Such vessels, in accordance with § 648.23(b), may stow additional nets not to exceed 160, counting deployed nets.

(2) *Net size requirement.* Nets may not be longer than 300 ft (91.4 m), or 50 fathoms (91.4 m), in length.

(3) *Tags.* Roundfish or flatfish gillnets must be tagged with two tags per net, with one tag secured to each bridle of every net within a string of nets.

(C) *Obtaining and replacing tags.* See paragraph (a)(3)(iv)(C) of this section.

(3) *Net stowage exemption.* Vessels may possess regulated species while in possession of nets with mesh smaller than the minimum size specified in paragraph (c)(2)(i) of this section, provided that such nets are stowed and are not available for immediate use in accordance with § 648.23(b), and provided that regulated species were not harvested by nets of mesh size smaller than the minimum mesh size specified in paragraph (c)(2)(i) of this section.

(4) *Addition or deletion of exemptions.* See paragraph (a)(8)(ii) of this section.

(5) *MA Exemption Area.* The MA Exemption Area is that area that lies west of the SNE Exemption Area defined in paragraph (b)(10) of this section.

(d) *Midwater trawl gear exemption.* Fishing may take place throughout the fishing year with midwater trawl gear of mesh size less than the applicable minimum size specified in this section, provided that:

(1) Midwater trawl gear is used exclusively;

§ 648.80

50 CFR Ch. VI (10–1–05 Edition)

(2) When fishing under this exemption in the GOM/GB Exemption Area, as defined in paragraph (a)(17) of this section, and in the area described in § 648.81(c)(1), the vessel has on board a letter of authorization issued by the Regional Administrator, and complies with all restrictions and conditions thereof;

(3) The vessel only fishes for, possesses, or lands Atlantic herring, blueback herring, or mackerel in areas north of 42°20' N. lat. and in the areas described in § 648.81(a)(1), (b)(1), and (c)(1); and Atlantic herring, blueback herring, mackerel, or squid in all other areas south of 42°20' N. lat.;

(4) The vessel does not fish for, possess, or land NE multispecies;

(5) The vessel must carry a NMFS-approved sea sampler/observer, if requested by the Regional Administrator;

(6) To fish for herring under this exemption in the GOM/GB Exemption Area as defined in paragraph (a)(17) of this section, vessels issued a Category 1 herring permit pursuant to § 648.205(b) must provide notice to NMFS of the vessel name; contact name for coordination of observer deployment; telephone number for contact; and the date, time, and port of departure, at least 72 hours prior to beginning any trip into these areas for the purposes of observer deployment; and

(7) Any vessel issued an observer waiver pursuant to paragraph (d)(6) of this section must notify NMFS Office of Law Enforcement through VMS of the time and place of offloading at least 12 hours prior to crossing the VMS demarcation line on its return trip to port, or, for vessels that have not fished seaward of the VMS demarcation line, at least 12 hours prior to landing.

(8) The vessel does not fish for, possess or land NE multispecies, except that Category 1 herring vessels may possess and land haddock consistent with the incidental catch allowance and bycatch cap specified in § 648.86(a)(3). Such haddock may not be sold, purchased, received, traded, bartered, or transferred, or attempted to be sold, purchased, received, traded, bartered, or transferred for, or intended for, human consumption. Had-

dock that is separated out from the herring catch pursuant to 648.15(d) may not be sold, purchased, received, traded, bartered, or transferred, or attempted to be sold, purchased, received, traded, bartered, or transferred for any purpose.

(9) All Category 1 herring vessels must notify NMFS Office of Law Enforcement through VMS of the time and place of offloading at least 12 hours prior to crossing the VMS demarcation line on their return trip to port, or, for vessels that have not fished seaward of the VMS demarcation line, at least 12 hours prior to landing. If a fishing trip is less than 12 hours in length, Category 1 herring vessels must notify NMFS Office of Law Enforcement through VMS of the time and place of offloading at least 6 hours prior to crossing the VMS demarcation line on their return trip to port, or, for vessels that have not fished seaward of the VMS demarcation line, at least 6 hours prior to landing. The Regional Administrator may adjust the prior notification minimum time through publication of a notice in the FEDERAL REGISTER consistent with the Administrative Procedure Act.

(e) *Purse seine gear exemption.* Fishing may take place throughout the fishing year with purse seine gear of mesh size smaller than the applicable minimum size specified in this section, provided that:

(1) The vessel uses purse seine gear exclusively;

(2) When fishing under this exemption in the GOM/GB Exemption Area, as defined in paragraph (a)(17) of this section, the vessel has on board a letter of authorization issued by the Regional Administrator;

(3) The vessel only fishes for, possesses, or lands Atlantic herring, blueback herring, mackerel, or menhaden;

(4) The vessel does not fish for, possess, or land NE multispecies; and

(5) To fish for herring under this exemption in the GOM/GB Exemption Area as defined in paragraph (a)(17) of this section, vessels issued a Category 1 herring permit pursuant to § 648.205(b) must provide notice to NMFS of the

vessel name; contact name for coordination of observer deployment; telephone number for contact; and the date, time, and port of departure, at least 72 hours prior to beginning any trip into these areas for the purposes of observer deployment; and

(6) Any vessel issued an observer waiver pursuant to paragraph (e)(5) of this section must notify NMFS Office of Law Enforcement through VMS of the time and place of offloading at least 12 hours prior to crossing the VMS demarcation line on its return trip to port, or, for vessels that have not fished seaward of the VMS demarcation line, at least 12 hours prior to landing.

(7) The vessel does not fish for, possess or land NE multispecies, except that Category 1 herring vessels may possess and land haddock consistent with the incidental catch allowance and bycatch cap specified in § 648.86(a)(3).

(8) All Category 1 herring vessels must notify NMFS Office of Law Enforcement through VMS of the time and place of offloading at least 12 hours prior to crossing the VMS demarcation line on their return trip to port, or, for vessels that have not fished seaward of the VMS demarcation line, at least 12 hours prior to landing. If a fishing trip is less than 12 hours in length, Category 1 herring vessels must notify NMFS Office of Law Enforcement through VMS of the time and place of offloading at least 6 hours prior to crossing the VMS demarcation line on their return trip to port, or, for vessels that have not fished seaward of the VMS demarcation line, at least 6 hours prior to landing. The Regional Administrator may adjust the prior notification minimum time through publication of a notice in the FEDERAL REGISTER consistent with the Administrative Procedure Act.

(f) *Mesh measurements*—(1) *Gillnets*. Mesh size of gillnet gear shall be measured by lining up 5 consecutive knots perpendicular to the float line and, with a ruler or tape measure, measuring 10 consecutive measures on the diamond, inside knot to inside knot. The mesh shall be the average of the measurements of 10 consecutive measures.

(2) *All other nets*. With the exception of gillnets, mesh size shall be measured by a wedged-shaped gauge having a taper of 2 cm in 8 cm, and a thickness of 2.3 mm, inserted into the meshes under a pressure or pull of 5 kg.

(i) *Square-mesh measurement*. Square mesh in the regulated portion of the net is measured by placing the net gauge along the diagonal line that connects the largest opening between opposite corners of the square. The square-mesh size is the average of the measurements of 20 consecutive adjacent meshes from the terminus forward along the long axis of the net. The square mesh is measured at least five meshes away from the lacings of the net.

(ii) *Diamond-mesh measurement*. Diamond mesh in the regulated portion of the net is measured running parallel to the long axis of the net. The diamond-mesh size is the average of the measurements of any series of 20 consecutive meshes. The mesh is measured at least five meshes away from the lacings of the net.

(g) *Restrictions on gear and methods of fishing*—(1) *Net obstruction or constriction*. Except as provided in paragraph (g)(5) of this section, a fishing vessel subject to minimum mesh size restrictions shall not use any device or material, including, but not limited to, nets, net strengtheners, ropes, lines, or chafing gear, on the top of a trawl net, except that one splitting strap and one bull rope (if present), consisting of line and rope no more than 3 in (7.6 cm) in diameter, may be used if such splitting strap and/or bull rope does not constrict, in any manner, the top of the trawl net. “The top of the trawl net” means the 50 percent of the net that (in a hypothetical situation) would not be in contact with the ocean bottom during a tow if the net were laid flat on the ocean floor. For the purpose of this paragraph, head ropes are not considered part of the top of the trawl net.

(2) *Net obstruction or constriction*. (i) Except as provided in paragraph (g)(5) of this section, a fishing vessel may not use any mesh configuration, mesh construction, or other means on or in the top of the net subject to minimum mesh size restrictions, as defined in

paragraph (g)(1) of this section, if it obstructs the meshes of the net in any manner.

(ii) A fishing vessel may not use a net capable of catching NE multispecies if the bars entering or exiting the knots twist around each other.

(3) *Pair trawl prohibition.* No vessel may fish for NE multispecies while pair trawling, or possess or land NE multispecies that have been harvested by means of pair trawling.

(4) *Brush-sweep trawl prohibition.* No vessel may fish for, possess, or land NE multispecies while fishing with, or while in possession of, brush-sweep trawl gear.

(5) *Net strengthener restrictions when fishing for or possessing small-mesh multispecies—*(i) *Nets of mesh size less than 2.5 inches (6.4 cm).* A vessel lawfully fishing for small-mesh multispecies in the GOM/GB, SNE, or MA Regulated Mesh Areas, as defined in paragraphs (a), (b), and (c) of this section, with nets of mesh size smaller than 2.5 inches (6.4 cm), as measured by methods specified in paragraph (f) of this section, may use net strengtheners (covers, as described at § 648.23(d)), provided that the net strengthener for nets of mesh size smaller than 2.5 inches (6.4 cm) complies with the provisions specified under § 648.23(d).

(ii) *Nets of mesh size equal to or greater than 2.5 inches (6.4 cm) but less than 3 inches (7.6 cm).* A vessel lawfully fishing for small-mesh multispecies in the GOM/GB, SNE, or MA Regulated Mesh Areas, as defined in paragraphs (a), (b), and (c) of this section, with nets with mesh size equal to or greater than 2.5 inches (6.4 cm) but less than 3 inches (7.6 cm) (as measured by methods specified in paragraph (f) of this section, and as applied to the part of the net specified in paragraph (d)(1)(iv) of this section) may use a net strengthener (*i.e.*, outside net), provided the net strengthener does not have an effective mesh opening of less than 6 inches (15.2 cm), diamond or square mesh, as measured by methods specified in paragraph (f) of this section. The inside net (as applied to the part of the net specified in paragraph (d)(1)(iv) of this section) must not be more than 2 ft (61 cm) longer than the outside net, must be the same circumference or smaller than the

smallest circumference of the outside net, and must be the same mesh configuration (*i.e.*, both square or both diamond mesh) as the outside net.

(6) *Gillnet requirements to reduce or prevent marine mammal takes—*(i) *Requirements for gillnet gear capable of catching NE multispecies to reduce harbor porpoise takes.* In addition to the requirements for gillnet fishing identified in this section, all persons owning or operating vessels in the EEZ that fish with sink gillnet gear and other gillnet gear capable of catching NE multispecies, with the exception of single pelagic gillnets (as described in § 648.81(f)(2)(ii)), must comply with the applicable provisions of the Harbor Porpoise Take Reduction Plan found in § 229.33 of this title.

(ii) *Requirements for gillnet gear capable of catching NE multispecies to prevent large whale takes.* In addition to the requirements for gillnet fishing identified in this section, all persons owning or operating vessels in the EEZ that fish with sink gillnet gear and other gillnet gear capable of catching NE multispecies, with the exception of single pelagic gillnets (as described in § 648.81(f)(2)(ii)), must comply with the applicable provisions of the Atlantic Large Whale Take Reduction Plan found in § 229.32 of this title.

(h) *Scallop vessels.* (1) Except as provided in paragraph (h)(2) of this section, a scallop vessel that possesses a limited access scallop permit and either a NE multispecies Combination vessel permit or a scallop/multispecies possession limit permit, and that is fishing under a scallop DAS allocated under § 648.53, may possess and land up to 300 lb (136.1 kg) of regulated species per trip, provided that the amount of regulated species on board the vessel does not exceed the trip limits specified in § 648.86, and provided the vessel has at least one standard tote on board, unless otherwise restricted by § 648.86(a)(2).

(2) Combination vessels fishing under a NE multispecies DAS are subject to the gear restrictions specified in this section and may possess and land unlimited amounts of regulated species, unless otherwise restricted by § 648.86. Such vessels may simultaneously fish under a scallop DAS.

Fishery Conservation and Management

§ 648.81

(i) *State waters winter flounder exemption.* Any vessel issued a NE multispecies permit may fish for, possess, or land winter flounder while fishing with nets of mesh smaller than the minimum size specified in paragraphs (a)(2), (b)(2), and (c)(2) of this section, provided that:

(1) The vessel has on board a certificate approved by the Regional Administrator and issued by the state agency authorizing the vessel's participation in the state's winter flounder fishing program and is in compliance with the applicable state laws pertaining to minimum mesh size for winter flounder.

(2) Fishing is conducted exclusively in the waters of the state from which the certificate was obtained.

(3) The state's winter flounder plan has been approved by the Commission as being in compliance with the Commission's winter flounder fishery management plan.

(4) The state elects, by a letter to the Regional Administrator, to participate in the exemption program described by this section (for a particular fishing year).

(5) The vessel does not enter or transit the EEZ.

(6) The vessel does not enter or transit the waters of another state, unless such other state is participating in the exemption program described by this section and the vessel is enrolled in that state's program.

(7) The vessel, when not fishing under the DAS program, does not fish for, possess, or land more than 500 lb (226.8 kg) of winter flounder, and has at least one standard tote on board.

(8) The vessel does not fish for, possess, or land any species of fish other than winter flounder and the exempted small-mesh species specified under paragraphs (a)(5)(i), (a)(9)(i), (b)(3), and (c)(4) of this section when fishing in the areas specified under paragraphs (a)(5), (a)(9), (b)(10), and (c)(5) of this section, respectively. Vessels fishing under this exemption in New York and Connecticut state waters and permitted to fish for skates may also possess and land skates in amounts not to exceed 10 percent, by weight, of all other species on board.

[69 FR 22951, Apr. 27, 2004]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 648.80, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and on GPO Access.

EFFECTIVE DATE NOTE: At 70 FR 34059, June 13, 2005, § 648.80 was amended by suspending paragraphs (d)(4), (d)(7), (e)(4), and (e)(6), and adding paragraphs (d)(8), (d)(9), (e)(7), and (e)(8), effective June 13, 2005 through Dec. 10, 2005.

§ 648.81 NE multispecies closed areas and measures to protect EFH.

(a) *Closed Area I.* (1) No fishing vessel or person on a fishing vessel may enter, fish, or be in the area known as Closed Area I (copies of a chart depicting this area are available from the Regional Administrator upon request), as defined by straight lines connecting the following points in the order stated, except as specified in paragraphs (a)(2) and (i) of this section:

CLOSED AREA I

Point	N. lat.	W. long.
CI1	41°30'	69°23'
CI2	40°45'	68°45'
CI3	40°45'	68°30'
CI4	41°30'	68°30'
CI1	41°30'	69°23'

(2) Unless otherwise restricted under the EFH Closure(s) specified in paragraph (h) of this section, paragraph (a)(1) of this section does not apply to persons on fishing vessels or fishing vessels:

(i) Fishing with or using pot gear designed and used to take lobsters, or pot gear designed and used to take hagfish, provided that there is no retention of regulated species and no other gear on board capable of catching NE multispecies;

(ii) Fishing with or using pelagic longline gear or pelagic hook-and-line gear, or harpoon gear, provided that there is no retention of regulated species, and provided that there is no other gear on board capable of catching NE multispecies;

(iii) Fishing with pelagic midwater trawl gear, consistent with § 648.80(d), provided that the Regional Administrator shall review information pertaining to the bycatch of regulated NE multispecies and, if the Regional Administrator determines, on the basis of

§ 648.81

50 CFR Ch. VI (10–1–05 Edition)

sea sampling data or other credible information for this fishery, that the bycatch of regulated multispecies exceeds, or is likely to exceed, 1 percent of herring and mackerel harvested, by weight, in the fishery or by any individual fishing operation, the Regional Administrator may place restrictions and conditions in the letter of authorization for any or all individual fishing operations or, after consulting with the Council, suspend or prohibit any or all midwater trawl activities in the closed areas;

(iv) Fishing with tuna purse seine gear, provided that there is no retention of NE multispecies, and provided there is no other gear on board gear capable of catching NE multispecies. If the Regional Administrator determines through credible information, that tuna purse seine vessels are adversely affecting habitat or NE multispecies stocks, the Regional Administrator may, through notice action, consistent with the Administrative Procedure Act, prohibit individual purse seine vessels or all purse seine vessels from the area; or

(v) Fishing in a SAP, in accordance with the provisions of § 648.85(b).

(vi) Fishing for scallops within the Closed Area I Access Area defined in § 648.59(b)(3) during the season specified in § 648.59(b)(4), and pursuant to the provisions specified in § 648.60.

(b) *Closed Area II.* (1) No fishing vessel or person on a fishing vessel may enter, fish, or be in the area known as Closed Area II (copies of a chart depicting this area are available from the Regional Administrator upon request), as defined by straight lines connecting the following points in the order stated, except as specified in paragraph (b)(2) of this section:

CLOSED AREA II

Point	N. lat.	W. long.

C112	41°00'	66°35.8'
G5	41°18.6'	66°24.8' ¹
C113	42°22'	67°20' ¹
C111	41°00'	67°20' ¹

¹ The U.S.-Canada Maritime Boundary.

(2) Unless otherwise restricted under the EFH Closure(s) specified in paragraph (h) of this section, paragraph (b)(1) of this section does not apply to

persons on fishing vessels or fishing vessels—

(i) Fishing with gears as described in paragraphs (a)(2)(i) through (iii), and (a)(2)(v) of this section;

(ii) Fishing with tuna purse seine gear outside of the portion of CA II known as the Habitat Area of Particular Concern, as described in paragraph (h)(v) of this section;

(iii) Fishing in the CA II Yellowtail Flounder SAP or the Eastern U.S./Canada Haddock SAP Pilot Program as specified in § 648.85(b)(3) and (8), respectively; or

(iv) Transiting the area, provided the vessel's fishing gear is stowed in accordance with the provisions of § 648.23(b); and

(A) The operator has determined, and a preponderance of available evidence indicates, that there is a compelling safety reason; or

(B) The vessel has declared into the Eastern U.S./Canada Area as specified in § 648.85(a)(3)(ii) and is transiting CA II in accordance with the provisions of § 648.85(a)(3)(vii).

(v) Fishing for scallops within the Closed Area II Access Area defined in § 648.59(c)(3), during the season specified in § 648.59(c)(4), and pursuant to the provisions specified in § 648.60.

(c) *Nantucket Lightship Closed Area.*

(1) No fishing vessel or person on a fishing vessel may enter, fish, or be in the area known as the Nantucket Lightship Closed Area (copies of a chart depicting this area are available from the Regional Administrator upon request), as defined by straight lines connecting the following points in the order stated, except as specified in paragraphs (c)(2) and (i) of this section:

NANTUCKET LIGHTSHIP CLOSED AREA

Point	N. lat.	W. long.
G10	40°50'	69°00'
CN1	40°20'	69°00'
CN2	40°20'	70°20'
CN3	40°50'	70°20'
G10	40°50'	69°00'

(2) Unless otherwise restricted under the EFH Closure(s) specified in paragraph (h) of this section, paragraph (c)(1) of this section does not apply to persons on fishing vessels or fishing vessels:

Fishery Conservation and Management

§ 648.81

(i) Fishing with gears as described in paragraph (a)(2) of this section; or

(ii) Classified as charter, party or recreational vessel, provided that:

(A) If the vessel is a party or charter vessel, it has a letter of authorization issued by the Regional Administrator on board, which is valid from the date of issuance through a minimum duration of 7 days;

(B) With the exception of tuna, fish harvested or possessed by the vessel are not sold or intended for trade, barter or sale, regardless of where the regulated species are caught; and

(C) The vessel has no gear other than rod and reel or handline gear on board.

(D) The vessel does not fish outside the Nantucket Lightship Closed Area during the period specified by the letter of authorization; or

(iii) Fishing with or using dredge gear designed and used to take surfclams or ocean quahogs, provided that there is no retention of regulated species and no other gear on board capable of catching NE multispecies.

(iv) Fishing for scallops within the Nantucket Lightship Access Area defined in §648.59(d)(3), during the season specified in §648.59(d)(4), and pursuant to the provisions specified in §648.60.

(d) *Cashes Ledge Closure Area.* (1) No fishing vessel or person on a fishing vessel may enter, fish in, or be in, and no fishing gear capable of catching NE multispecies, unless otherwise allowed in this part, may be in, or on board a vessel in the area known as the Cashes Ledge Closure Area, as defined by straight lines connecting the following points in the order stated, except as specified in paragraphs (d)(2) and (i) of this section (a chart depicting this area is available from the Regional Administrator upon request):

CASHES LEDGE CLOSURE AREA

Point	N. lat.	W. long.
CL1	43°07'	69°02'
CL2	42°49.5'	68°46'

WGM1	42°15'	70°15'

¹ A chart depicting this area is available from the Regional Administrator upon request.

(2) Unless otherwise restricted under paragraph (h) of this section, paragraph (e)(1) of this section does not apply to persons on fishing vessels or fishing vessels that meet the criteria in paragraphs (f)(2)(ii) and (iii) of this section consistent with the requirements specified under §648.80(a)(5).

(f) *GOM Rolling Closure Areas.* (1) No fishing vessel or person on a fishing vessel may enter, fish in, or be in; and no fishing gear capable of catching NE multispecies, unless otherwise allowed in this part, may be in, or on board a vessel in GOM Rolling Closure Areas I through V, as described in paragraphs (f)(1)(i) through (v) of this section, for the times specified in paragraphs (f)(1)(i) through (v) of this section, except as specified in paragraphs (f)(2) and (i) of this section. A chart depicting these areas is available from the Regional Administrator upon request.

(i) *Rolling Closure Area I.* From March 1 through March 31, the restrictions specified in this paragraph (f)(1) apply to Rolling Closure Area I, which is the area bounded by straight lines connecting the following points in the order stated:

ROLLING CLOSURE AREA I
[March 1–March 31]

Point	N. lat.	W. long.

¹ Massachusetts shoreline.

² Cape Cod shoreline on Cape Cod Bay.

³ Cape Cod shoreline on the Atlantic Ocean.

(2) Paragraph (f)(1) of this section does not apply to persons aboard fishing vessels or fishing vessels:

(i) That have not been issued a multi-species permit and that are fishing exclusively in state waters;

(ii) That are fishing with or using exempted gear as defined under this part, subject to the restrictions on midwater trawl gear in paragraph (a)(2)(iii) of this section, and excluding pelagic gillnet gear capable of catching multi-species, except for vessels fishing with a single pelagic gillnet not longer than 300 ft (91.4 m) and not greater than 6 ft (1.83 m) deep, with a maximum mesh size of 3 inches (7.6 cm), provided:

(A) The net is attached to the boat and fished in the upper two-thirds of the water column;

(B) The net is marked with the owner's name and vessel identification number;

(C) There is no retention of regulated species; and

(D) There is no other gear on board capable of catching NE multispecies;

Fishery Conservation and Management

§ 648.81

(iii) That are fishing under charter/party or recreational regulations, provided that:

(A) For vessels fishing under charter/party regulations in a Rolling Closure Area described under paragraph (f)(1) of this section, it has on board a letter of authorization issued by the Regional Administrator, which is valid from the date of enrollment through the duration of the closure or 3 months duration, whichever is greater; for vessels fishing under charter/party regulations in the Cashes Ledge Closure Area or Western GOM Area Closure, as described under paragraph (d) and (e) of this section, respectively, it has on board a letter of authorization issued by the Regional Administrator, which is valid from the date of enrollment until the end of the fishing year;

(B) With the exception of tuna, fish harvested or possessed by the vessel are not sold or intended for trade, barter or sale, regardless of where the regulated species are caught;

(C) The vessel has no gear other than rod and reel or handline on board; and

(D) The vessel does not use any NE multispecies DAS during the entire period for which the letter of authorization is valid;

(iv) That are fishing with or using scallop dredge gear when fishing under a scallop DAS or when lawfully fishing in the Scallop Dredge Fishery Exemption Area as described in §648.80(a)(11), provided the vessel does not retain any regulated NE multispecies during a trip, or on any part of a trip; or

(v) That are fishing in the Raised Footrope Trawl Exempted Whiting Fishery, as specified in §648.80(a)(15), and in the GOM Rolling Closure Area V, as specified in paragraph (f)(1)(v) of this section.

(g) *GB Seasonal Closure Area.* (1) From May 1 through May 31, no fishing vessel or person on a fishing vessel may enter, fish in, or be in, and no fishing gear capable of catching NE multispecies, unless otherwise allowed in this part, may be in the area known as the GB Seasonal Closure Area, as defined by straight lines connecting the following points in the order stated, except as specified in paragraphs (g)(2) and (i) of this section:

GEORGES BANK SEASONAL CLOSURE AREA [May 1–May 31]

GB10	41°00'	70°00'
G12	(¹)	70° 00'

¹ Northward to its intersection with the shoreline of mainland MA.

(2) Paragraph (g)(1) of this section does not apply to persons on fishing vessels or to fishing vessels:

(i) That meet the criteria in paragraphs (f)(2)(i) or (ii) of this section;

(ii) That are fishing as charter/party or recreational vessels; or

(iii) That are fishing with or using scallop dredge gear when fishing under a scallop DAS or when lawfully fishing in the Scallop Dredge Fishery Exemption Area, as described in §648.80(a)(11), provided the minimum mesh size of the twine top used in the dredge by the vessel is 10 inches (25.4 cm), and provided that the vessel complies with the NE multispecies possession restrictions for scallop vessels specified at §648.80(h).

(h) *Essential Fish Habitat Closure Areas.* (1) In addition to the restrictions under paragraphs (a) through (e) of this section, no fishing vessel or person on a fishing vessel with bottom tending mobile gear on board the vessel may enter, fish in, or be in the EFH Closure Areas described in paragraphs (h)(1)(i) through (vi) of this section, unless otherwise specified. A chart depicting these areas is available from the Regional Administrator upon request.

(i) *Western GOM Habitat Closure Area.* The restrictions specified in paragraph (h)(1) of this section apply to the Western GOM Habitat Closure Area, which is the area bound by straight lines connecting the following points in the order stated:

WESTERN GOM HABITAT CLOSURE AREA

Point	N. lat.	W. long.
WGM4	43°15'	70°15'
WGM1	42°15'	70°15'
WGM5	42°15'	70°00'
WGM6	43°15'	70°00'
WGM4	43°15'	70°15'

(ii) *Cashes Ledge Habitat Closure Area.* The restrictions specified in paragraph (h)(1) of this section apply to the Cashes Ledge Habitat Closure Area, which is the area defined by straight lines connecting the following points in the order stated:

CASHES LEDGE HABITAT CLOSURE AREA

Point	N. lat.	W. long.
CLH1	43°01'	69°03'
CLH2	43°01'	68°52'
CLH3	42°45'	68°52'
CLH4	42°45'	69°03'
CLH1	43°01'	69°03'

(iii) *Jeffrey's Bank Habitat Closure Area.* The restrictions specified in paragraph (h)(1) of this section apply to the Jeffrey's Bank Habitat Closure Area, which is the area bound by straight lines connecting the following points in the order stated:

JEFFREY'S BANK HABITAT CLOSURE AREA

Point	N. lat.	W. long.
JB1	43°40'	68°50'
JB2	43°40'	68°40'
JB3	43°20'	68°40'
JB4	43°20'	68°50'
JB1	43°40'	68°50'

(iv) *Closed Area I Habitat Closure Areas.* The restrictions specified in paragraph (h)(1) of this section apply to the Closed Area I Habitat Closure Areas, Closed Area I-North and Closed Area I-South, which are the areas bound by straight lines connecting the following points in the order stated:

CLOSED AREA I—NORTH HABITAT CLOSURE AREA

Point	N. lat.	W. long.
CI1	41°30'	69°23'
CI4	41°30'	68°30'
CIH1	41°26'	68°30'
CIH2	41°04'	69°01'
CI1	41°30'	69°23'

CLOSED AREA I—SOUTH HABITAT CLOSURE AREA

Point	N. lat.	W. long.
CIH3	40°55'	68°53'
CIH4	40°58'	68°30'
CI3	40°45'	68°30'
CI2	40°45'	68°45'
CIH3	40°55'	68°53'

(v) *Closed Area II Habitat Closure Area.* The restrictions specified in paragraph (h)(1) of this section apply to the Closed Area II Habitat Closure Area (also referred to as the Habitat Area of Particular Concern), which is the area bound by straight lines connecting the following points in the order stated:

CLOSED AREA II HABITAT CLOSURE AREA

Point	N. lat.	W. long.
CIH1	42°00'	67°20'
CIH2	42°00'	67°00'
CIH3	41°40'	66°43'
CIH4	41°40'	67°20'
CIH1	42°00'	67°20'

(vi) *Nantucket Lightship Habitat Closure Area.* The restrictions specified in paragraph (h)(1) of this section apply to the Nantucket Lightship Habitat Closure Area, which is the area bound by straight lines connecting the following points in the order stated:

NANTUCKET LIGHTSHIP HABITAT CLOSED AREA

Point	N. lat.	W. long.
NLH1	41°10'	70°00'
NLH2	41°10'	69°50'
NLH3	40°50'	69°30'
NLH4	40°20'	69°30'
NLH5	40°20'	70°00'
NLH1	41°10'	70°00'

(2) [Reserved]

(i) *Transiting.* A vessel may transit CA I, the Nantucket Lightship Closed Area, the Cashes Ledge Closed Area, the Western GOM Closure Area, the GOM Rolling Closure Areas, the GB Seasonal Closure Area, and the EFH Closure Areas, as defined in paragraphs (a)(1), (c)(1), (d)(1), (e)(1), (f)(1), (g)(1), and (h)(1), respectively, of this section, unless otherwise restricted, provided that its gear is stowed in accordance with the provisions of § 648.23(b). A vessel may transit CA II, as defined in paragraph (b)(2) of this section, in accordance with paragraph (b)(2)(iv) of this section.

Fishery Conservation and Management

§ 648.81

(j) *Restricted Gear Area I.* (1) Restricted Gear Area I is defined by straight lines connecting the following points in the order stated:

(2) *Restricted Period—(i) Mobile gear.* From October 1 through June 15, no fishing vessel with mobile gear or person on a fishing vessel with mobile gear may fish or be in Restricted Gear Area I, unless transiting. Vessels may transit this area provided that mobile gear is on board the vessel while inside the area, provided that its gear is stowed in accordance with the provisions of §648.23(b).

(ii) *Lobster pot gear.* From June 16 through September 30, no fishing vessel with lobster pot gear aboard, or person on a fishing vessel with lobster pot gear aboard may fish in, and no lobster pot gear may be deployed or remain in, Restricted Gear Area I.

(k) *Restricted Gear Area II.* (1) Restricted Gear Area II is defined by

§ 648.81

(2) *Restricted period*—(i) *Mobile gear*. From June 16 through September 30, no fishing vessel with mobile gear aboard, or person on a fishing vessel with mobile gear aboard may fish or be in Restricted Gear Area IV, unless transiting. Vessels may transit this area, provided that all mobile gear is on board the vessel while inside the area, and is stowed in accordance with the provisions of § 648.23(b).

(ii) [Reserved]

[69 FR 22964, Apr. 27, 2004, as amended at 69 FR 35223, June 23, 2004; 69 FR 63480, Nov. 2, 2004; 69 FR 67798, Nov. 19, 2004]

§ 648.82 Effort-control program for NE multispecies limited access vessels.

(a) Except as provided in §§ 648.17 and 648.82(a)(2), a vessel issued a limited access NE multispecies permit may not fish for, possess, or land regulated species, except during a DAS, as allocated under, and in accordance with, the applicable DAS program described in this section, unless otherwise provided elsewhere in this part.

(1) *End-of-year carry-over*. With the exception of vessels that held a Confirmation of Permit History, as described in § 648.4(a)(1)(i)(J), for the entire fishing year preceding the carry-over year, limited access vessels that have unused DAS on the last day of April of any year may carry over a maximum of 10 DAS into the next year.

Unused leased DAS may not be carried over. Vessels that have been sanctioned through enforcement proceedings will be credited with unused DAS based on their DAS allocation minus any total DAS that have been sanctioned through enforcement proceedings. For the 2004 fishing year only, DAS carried over from the 2003 fishing year will be classified as Regular B DAS, as specified under paragraph (d)(2) of this section. Beginning with the 2005 fishing year, for vessels with a balance of both unused Category A DAS and unused Category B DAS at the end of the previous fishing year (*e.g.*, for the 2005 fishing year, carry-over DAS from the 2004 fishing year), Category A DAS will be carried over first, than Regular B DAS, than Reserve B DAS. Category C DAS cannot be carried over.

(2) Notwithstanding any other provision of this part, any vessel issued a NE multispecies limited access permit may not call into the DAS program or fish under a DAS, if such vessel carries passengers for hire for any portion of a fishing trip.

(b) *Permit categories.* All limited access NE multispecies permit holders shall be assigned to one of the following permit categories, according to the criteria specified. Permit holders may request a change in permit category, as specified in § 648.4(a)(1)(i)(I)(2). Each fishing year shall begin on May 1 and extend through April 30 of the following year. Beginning May 1, 2004, with the exception of the limited access Small Vessel and Handgear A vessel categories described in paragraphs (b)(5) and (6) of this section, respectively, NE multispecies DAS available for use will be calculated pursuant to paragraphs (c) and (d) of this section.

(1) *Individual DAS category.* This category is for vessels allocated individual DAS that are not fishing under the Hook Gear, Combination, or Large-mesh individual categories. Beginning May 1, 2004, for a vessel fishing under the Individual DAS category, the baseline for determining the number of NE multispecies DAS available for use shall be calculated based upon the fishing history associated with the vessel's permit, as specified in paragraph (c)(1) of this section. The number and cat-

egories of DAS that are allocated for use in a given fishing year are specified in paragraph (d) of this section.

(2) *Hook Gear category.* To be eligible for a Hook Gear category permit, the vessel must have been issued a limited access multispecies permit for the preceding year, be replacing a vessel that was issued a Hook Gear category permit for the preceding year, or be replacing a vessel that was issued a Hook Gear category permit that was issued a Confirmation of Permit History. Beginning May 1, 2004, for a vessel fishing under the Hook Gear category, the baseline for determining the number of NE multispecies DAS available for use shall be calculated based upon the fishing history associated with the vessel's permit, as specified in paragraph (c)(1) of this section. The number and categories of DAS that are allocated for use in a given fishing year are specified in paragraph (d) of this section. A vessel fishing under this category in the DAS program must meet or comply with the gear restrictions specified under § 648.80(a)(3)(v), (a)(4)(v), (b)(2)(v) and (c)(2)(iv) when fishing in the respective regulated mesh areas.

(3) *Combination vessel category.* To be eligible for a Combination vessel category permit, a vessel must have been issued a Combination vessel category permit for the preceding year, be replacing a vessel that was issued a Combination vessel category permit for the preceding year, or be replacing a vessel that was issued a Combination vessel category permit that was also issued a Confirmation of Permit History. Beginning May 1, 2004, for a vessel fishing under the Combination vessel category, the baseline for determining the number of NE multispecies DAS available for use shall be calculated based upon the fishing history associated with the vessel's permit, as specified in paragraph (c)(1) of this section. The number and categories of DAS that are allocated for use in a given fishing year are specified in paragraph (d) of this section.

(4) *Large Mesh Individual DAS category.* This category is for vessels allocated individual DAS that area not fishing under the Hook Gear, Combination, or Individual DAS categories. Beginning May 1, 2004, for a vessel fishing

under the Large Mesh Individual DAS category, the baseline for determining the number of NE multispecies DAS available for use shall be calculated based upon the fishing history associated with the vessel's permit, as specified in paragraph (c)(1) of this section. The number and categories of DAS that are allocated for use in a given fishing year are specified in paragraph (d) of this section. The number of Category A DAS shall be increased by 36 percent. To be eligible to fish under the Large Mesh Individual DAS category, a vessel, while fishing under this category, must fish under the specific regulated mesh area minimum mesh size restrictions, as specified in paragraphs (a)(3)(iii), (a)(4)(iii), (b)(2)(iii), and (c)(2)(ii) of this section.

(5) *Small Vessel category*—(i) *DAS allocation*. A vessel qualified and electing to fish under the Small Vessel category may retain up to 300 lb (136.1 kg) of cod, haddock, and yellowtail flounder, combined, and one Atlantic halibut per trip, without being subject to DAS restrictions, provided the vessel does not exceed the yellowtail flounder possession restrictions specified under § 648.86(g). Such vessel is not subject to a possession limit for other NE multispecies. Any vessel may elect to switch into this category, as provided in § 648.4(a)(1)(i)(I)(2), if the vessel meets or complies with the following:

(A) The vessel is 30 ft (9.1 m) or less in length overall, as determined by measuring along a horizontal line drawn from a perpendicular raised from the outside of the most forward portion of the stem of the vessel to a perpendicular raised from the after most portion of the stern.

(B) If construction of the vessel was begun after May 1, 1994, the vessel must be constructed such that the quotient of the length overall divided by the beam is not less than 2.5.

(C) Acceptable verification for vessels 20 ft (6.1 m) or less in length shall be USCG documentation or state registration papers. For vessels over 20 ft (6.1 m) in length overall, the measurement of length must be verified in writing by a qualified marine surveyor, or the builder, based on the vessel's construction plans, or by other means determined acceptable by the Regional

Administrator. A copy of the verification must accompany an application for a NE multispecies permit.

(D) Adjustments to the Small Vessel category requirements, including changes to the length requirement, if required to meet fishing mortality goals, may be made by the Regional Administrator following framework procedures of § 648.90.

(ii) [Reserved]

(6) *Handgear A category*. A vessel qualified and electing to fish under the Handgear A category, as described in § 648.4(a)(1)(i)(A), may retain, per trip, up to 300 lb (136.1 kg) of cod, one Atlantic halibut, and the daily possession limit for other regulated species as specified under § 648.86. The cod trip limit will be adjusted proportionally to the trip limit for GOM cod (rounded up to the nearest 50 lb (22.7 kg)), as specified in § 648.86(b)). For example if the GOM cod trip limit specified at § 648.86(b) doubled, then the cod trip limit for the Handgear A category would double. Qualified vessels electing to fish under the Handgear A category are subject to the following restrictions:

(i) The vessel must not use or possess on board gear other than handgear while in possession of, fishing for, or landing NE multispecies, and must have at least one standard tote on board.

(ii) A vessel may not fish for, possess, or land regulated species from March 1 through March 20 of each year.

(iii) Tub-trawls must be hand-hauled only, with a maximum of 250 hooks.

(c) *Used DAS baseline*—(1) *Calculation of used DAS baseline*. For all valid limited access NE multispecies DAS vessels, vessels issued a valid small vessel category permit, and NE multispecies Confirmation of Permit Histories, beginning with the 2004 fishing year, a vessel's used DAS baseline shall be based on the fishing history associated with its permit and shall be determined by the highest number of reported DAS fished during a single qualifying fishing year, as specified in paragraphs (c)(1)(i) through (iv) of this section, during the 6-year period from May 1, 1996, through April 30, 2002, not to exceed the vessel's annual allocation prior to August 1, 2002. A qualifying

year is one in which a vessel landed 5,000 lb (2,268 kg) or more of regulated multispecies, based upon landings reported through dealer reports (based on live weights of landings submitted to NMFS prior to April 30, 2003). If a vessel that was originally issued a limited access NE multispecies permit was lawfully replaced in accordance with the replacement restrictions specified in § 648.4(a), then the used DAS baseline shall be defined based upon the DAS used by the original vessel and by subsequent vessel(s) associated with the permit during the qualification period specified in this paragraph (c)(1). The used DAS baseline shall be used to calculate the number and category of DAS that are allocated for use in a given fishing year, as specified in paragraph (d) of this section.

(i) Except as provided in paragraphs (c)(1)(ii) through (iv) of this section, the vessel's used DAS baseline shall be determined by calculating DAS use reported under the DAS notification requirements in § 648.10.

(ii) For a vessel exempt from, or not subject to, the DAS notification system specified in § 648.10 during the period May 1996 through June 1996, the vessel's used DAS baseline for that period will be determined by calculating DAS use from vessel trip reports submitted to NMFS prior to April 9, 2003.

(iii) For a vessel enrolled in a Large Mesh DAS category, as specified in paragraph (b)(4) of this section, the calculation of the vessel's used DAS baseline may not include any DAS allocated or used by the vessel pursuant to the provisions of the Large Mesh DAS category.

(iv) For vessels fishing under the Day gillnet designation, as specified under paragraph (j)(1) of this section, used DAS, for trips of more than 3 hours, but less than or equal to 15 hours, will be counted as 15 hours. Trips less than or equal to 3 hours, or more than 15 hours, will be counted as actual time.

(2) *Correction of used DAS baseline.* (i) A vessel's used DAS baseline, as determined under paragraph (c)(1) of this section, may be corrected by submitting a written request to correct the DAS baseline. The request to correct must be received by the Regional Administrator no later than August 31,

2004. The request to correct must be in writing and provide credible evidence that the information used by the Regional Administrator in making the determination of the vessel's DAS baseline was based on incorrect data. The decision on whether to correct the DAS baseline shall be determined solely on the basis of written information submitted, unless the Regional Administrator specifies otherwise. The Regional Administrator's decision on whether to correct the DAS baseline is the final decision of the Department of Commerce.

(ii) *Status of vessel's pending request for a correction of used DAS baseline.* While a vessel's request for a correction is under consideration by the Regional Administrator, the vessel is limited to fishing the number of DAS allocated in accordance with paragraph (d) of this section.

(d) *DAS categories and allocations.* For all valid limited access NE multispecies DAS permits, and NE multispecies Confirmation of Permit Histories, beginning with the 2004 fishing year, DAS shall be allocated and available for use for a given fishing year according to the following DAS Categories (unless otherwise specified, "NE multispecies DAS" refers to any authorized category of DAS):

(1) *Category A DAS.* Unless determined otherwise, as specified under paragraph (d)(4) of this section, calculation of Category A DAS for each fishing year is specified in paragraphs (d)(1)(i) through (iii) of this section. An additional 36 percent of Category A DAS will be added and available for use for participants in the Large Mesh Individual DAS permit category, as described in paragraph (b)(4) of this section, provided the participants comply with the applicable gear restrictions. Category A DAS may be used in the NE multispecies fishery to harvest and land regulated multispecies stocks, in accordance with all of the conditions and restrictions of this part.

(i) For the 2004 and 2005 fishing years, Category A DAS are defined as 60 percent of the vessel's used DAS baseline specified under paragraph (c)(1) of this section.

(ii) For the 2006 through 2008 fishing years, Category A DAS are defined as

55 percent of the vessel's used DAS baseline specified under paragraph (c)(1) of this section.

(iii) Starting in fishing year 2009, Category A DAS are defined as 45 percent of the vessel's used DAS baseline specified under paragraph (c)(1) of this section.

(2) *Category B DAS.* Category B DAS are divided into Regular B DAS and Reserve B DAS. Calculation of Category B DAS for each fishing year, and restrictions on use of Category B DAS, are specified in paragraphs (d)(2)(i) and (ii) of this section.

(i) *Regular B DAS—(A) Restrictions on use.* Regular B DAS can only be used by NE multispecies vessels in an approved SAP or in the Regular B DAS Pilot Program as specified in § 648.85(a)(6). Unless otherwise restricted under the Regular B DAS Pilot Program as described in § 648.85(b)(6)(i), vessels may fish under both a Regular B DAS and a Reserve B DAS on the same trip (i.e., when fishing in an approved SAP as described in § 648.85(b) of this section). Vessels that are required by another fishery management plan (i.e., not the NE multispecies FMP) to utilize a NE multispecies DAS, e.g., as specified under § 648.92(b)(2), may elect to use a NE multispecies Category B DAS to satisfy that requirement.

(B) *Calculation.* Unless determined otherwise, as specified under paragraph (d)(4) of this section, Regular B DAS are calculated as follows:

(1) For the 2004 and 2005 fishing years, Regular B DAS are defined as 20 percent of the vessel's DAS baseline specified under paragraph (c)(1) of this section.

(2) For the 2006 through 2008 fishing years, Regular B DAS are defined as 22.5 percent of the vessel's DAS baseline specified under paragraph (c)(1) of this section.

(3) Starting in fishing year 2009, and thereafter, Regular B DAS are defined as 27.5 percent of the vessel's DAS baseline specified under paragraph (c)(1) of this section.

(ii) *Reserve B DAS—(A) Restrictions on use.* Reserve B DAS can only be used in an approved SAP, as specified in § 648.85.

(B) *Calculation.* Unless determined otherwise, as specified under paragraph

(d)(4) of this section, Reserve B DAS are calculated as follows:

(1) For the 2004 and 2005 fishing years, Reserve B DAS are defined as 20 percent of the vessel's DAS baseline specified under paragraph (c)(1) of this section.

(2) For the 2006 through 2008 fishing years, Reserve B DAS are defined as 22.5 percent of the vessel's DAS baseline specified under paragraph (c)(1) of this section.

(3) Starting in fishing year 2009, and thereafter, Reserve B DAS are defined as 27.5 percent of the vessel's DAS baseline specified under paragraph (c)(1) of this section.

(3) *Category C DAS—(i) Restriction on use.* Category C DAS are reserved and may not be fished.

(ii) *Calculation.* Category C DAS are defined as the difference between a vessel's used DAS baseline, as described in paragraph (c)(1) of this section, and the number of DAS allocated to the vessel as of May 1, 2001.

(4) *Criteria and procedure for not reducing DAS allocations and modifying DAS accrual.* The schedule of reductions in NE multispecies DAS, and the modification of DAS accrual specified under paragraph (e)(2) of this section, shall not occur if the Regional Administrator:

(i) Determines that one of the following criteria has been met:

(A) That the Amendment 13 projected target biomass levels for stocks targeted by the default measures, based on the 2005 and 2008 stock assessments, have been or are projected to be attained with at least a 50-percent probability in the 2006 and 2009 fishing years, respectively, and overfishing is not occurring on those stocks (i.e., current information indicates that the stocks are rebuilt and overfishing is not occurring); or

(B) That biomass projections, based on the 2005 and 2008 stock assessments, show that rebuilding will occur by the end of the rebuilding period with at least a 50-percent probability, and the best available estimate of the fishing mortality rate for the stocks targeted by the default measures indicates that

overfishing is not occurring (*i.e.*, current information indicates that rebuilding will occur by the end of the rebuilding period and the fishing mortality rate is at or below *F*_{msy}).

(ii) Determines that all other stocks meet the fishing mortality rates specified in Amendment 13; and

(iii) Publishes such determination in the FEDERAL REGISTER, consistent with Administrative Procedure Act requirements for proposed and final rule-making.

(e) *Accrual of DAS.* (1) DAS shall accrue to the nearest minute and, with the exceptions described under this paragraph (e) and paragraph (j)(1)(iii) of this section, will be counted as actual time called into the DAS program.

(2) Starting in fishing year 2006, unless otherwise determined in accordance with paragraph (d)(4) of this section, for NE multispecies vessels fishing under a DAS in the SNE or MA Regulated Mesh Areas, as described in § 648.80(b)(1) and (c)(1), respectively, the ratio of DAS used to time called into the DAS program will be 1.5 to 1.0.

(3) For vessels electing to fish in the Regular B DAS Pilot Program, as specified at § 648.85(a)(6), and that remain fishing under a Regular B DAS for the entire fishing trip (without a DAS flip), DAS used will accrue at the rate of 1 full DAS for each calendar day, or part of a calendar day, fished. For example, a vessel that fished on one calendar day from 6 a.m. to 10 p.m. would be charged 24 hours of Regular B DAS, not 16 hours; a vessel that left on a trip at 11 p.m. on the first calendar day and returned at 10 p.m. on the second calendar day would be charged 48 hours of Regular B DAS instead of 23 hours, because the fishing trip would have spanned 2 calendar days. For the purpose of calculating trip limits specified under § 648.86, the amount of DAS deducted from a vessel's DAS allocation will determine the amount of fish the vessel could legally land.

(f) *Good Samaritan credit.* See § 648.53(f).

(g) *Spawning season restrictions.* A vessel issued a valid Small Vessel or Handgear A category permit specified under paragraphs (b)(5) or (b)(6), respectively, of this section may not fish for, possess, or land regulated species

from March 1 through March 20 of each year. Any other vessel issued a limited access NE multispecies permit must declare out and be out of the NE multispecies DAS program for a 20-day period between March 1 and May 31 of each calendar year, using the notification requirements specified in § 648.10. A vessel fishing under a Day gillnet category designation is prohibited from fishing with gillnet gear capable of catching NE multispecies during its declared 20-day spawning block, unless the vessel is fishing in an exempted fishery, as described in § 648.80. If a vessel owner has not declared and been out of the fishery for a 20-day period between March 1 and May 31 of each calendar year on or before May 12 of each year, the vessel is prohibited from fishing for, possessing or landing any regulated species or non-exempt species during the period May 12 through May 31, inclusive.

(h) *Declaring DAS and blocks of time out.* A vessel's owner or authorized representative shall notify the Regional Administrator of a vessel's participation in the DAS program, declaration of its 120 days out of the non-exempt gillnet fishery, if designated as a Day gillnet category vessel, as specified in paragraph (j)(1)(iii) of this section, and declaration of its 20-day period out of the NE multispecies DAS program, using the notification requirements specified in § 648.10.

(i) [Reserved]

(j) *Gillnet restrictions.* Vessels issued a limited access NE multispecies permit may fish under a NE multispecies DAS with gillnet gear, provided the owner of the vessel obtains an annual designation as either a Day or Trip gillnet vessel, as described in § 648.4(c)(2)(iii), and provided the vessel complies with the gillnet vessel gear requirements and restrictions specified in § 648.80.

(1) *Day gillnet vessels.* A Day gillnet vessel fishing with gillnet gear under a NE multispecies DAS is not required to remove gear from the water upon returning to the dock and calling out of the DAS program, provided the vessel complies with the restrictions specified in paragraphs (j)(1)(i) through (iii) of this section. Vessels electing to fish under the Day gillnet designation must have on board written confirmation,

issued by the Regional Administrator, that the vessel is a Day gillnet vessel.

(i) *Removal of gear.* All gillnet gear must be brought to port prior to the vessel fishing in an exempted fishery.

(ii) *Declaration of time out of the gillnet fishery.* (A) During each fishing year, vessels must declare, and take, a total of 120 days out of the non-exempt gillnet fishery. Each period of time declared and taken must be a minimum of 7 consecutive days. At least 21 days of this time must be taken between June 1 and September 30 of each fishing year. The spawning season time out period required by paragraph (g) of this section will be credited toward the 120 days time out of the non-exempt gillnet fishery. If a vessel owner has not declared and taken any or all of the remaining periods of time required to be out of the fishery by the last possible date to meet these requirements, the vessel is prohibited from fishing for, possessing, or landing regulated multispecies or non-exempt species harvested with gillnet gear, and from having gillnet gear on board the vessel that is not stowed in accordance with § 648.23(b), while fishing under a NE multispecies DAS, from that date through the end of the period between June 1 and September 30, or through the end of the fishing year, as applicable.

(B) Vessels shall declare their periods of required time through the notification procedures specified in § 648.10(f)(2).

(C) During each period of time declared out, a vessel is prohibited from fishing with non-exempted gillnet gear and must remove such gear from the water. However, the vessel may fish in an exempted fishery, as described in § 648.80, or it may fish under a NE multispecies DAS, provided it fishes with gear other than non-exempted gillnet gear.

(iii) *Method of counting DAS.* Unless electing to fish in the Regular B DAS Pilot Program specified in § 648.85(a)(6), and therefore subject to the DAS accrual provisions of § 648.82(e)(3), Day gillnet vessels fishing with gillnet gear under a NE multispecies DAS will accrue 15 hours of DAS for each trip of more than 3 hours, but less than or equal to 15 hours. Such vessels will ac-

cruer actual DAS time at sea for trips less than or equal to 3 hours, or more than 15 hours.

(2) *Trip gillnet vessels.* When fishing under a NE multispecies DAS, a Trip gillnet vessel is required to remove all gillnet gear from the water before calling out of a NE multispecies DAS under § 648.10(c)(3). When not fishing under a NE multispecies DAS, Trip gillnet vessels may fish in an exempted fishery with gillnet gear, as authorized under the exemptions in § 648.80. Vessels electing to fish under the Trip gillnet designation must have on board written confirmation issued by the Regional Administrator that the vessel is a Trip gillnet vessel.

(k) *NE Multispecies DAS Leasing Program.* (1) *Program description.* For fishing years 2004 and 2005, eligible vessels, as specified in paragraph (k)(2) of this section, may lease Category A DAS to and from other eligible vessels, in accordance with the restrictions and conditions of this section. The Regional Administrator has final approval authority for all NE multispecies DAS leasing requests.

(2) *Eligible vessels.* (i) A vessel issued a valid limited access NE multispecies permit is eligible to lease Category A DAS to or from another such vessel, subject to the conditions and requirements of this part, unless the vessel was issued a valid Small Vessel or Handgear A permit specified under paragraphs (b)(5) and (6) of this section, respectively, or is a valid participant in an approved Sector, as described in § 648.87(a). Any NE multispecies vessel that does not require use of DAS to fish for regulated multispecies may not lease any NE multispecies DAS.

(ii) DAS associated with a Confirmation of Permit History may not be leased.

(3) *Application to lease NE multispecies DAS.* To lease Category A DAS, the eligible Lessor and Lessee vessel must submit a completed application form obtained from the Regional Administrator. The application must be signed by both Lessor and Lessee and be submitted to the Regional Office at least 45 days before the date on which the applicants desire to have the leased DAS effective. The Regional Administrator will notify the applicants of any

deficiency in the application pursuant to this section. Applications may be submitted at any time prior to the start of the fishing year or throughout the fishing year in question, up until March 1. Eligible vessel owners may submit any number of lease applications throughout the application period, but any DAS may only be leased once during a fishing year.

(i) *Application information requirements.* An application to lease Category A DAS must contain the following information: Lessor's owner name, vessel name, permit number and official number or state registration number; Lessee's owner name, vessel name, permit number and official number or state registration number; number of NE multispecies DAS to be leased; total priced paid for leased DAS; signatures of Lessor and Lessee; and date form was completed. Information obtained from the lease application will be held confidential, according to applicable Federal law. Aggregate data may be used in the analysis of the DAS Leasing Program.

(ii) *Approval of lease application.* Unless an application to lease Category A DAS is denied according to paragraph (k)(3)(iii) of this section, the Regional Administrator shall issue confirmation of application approval to both Lessor and Lessee within 45 days of receipt of an application.

(iii) *Denial of lease application.* The Regional Administrator may deny an application to lease Category A DAS for any of the following reasons, including, but not limited to: The application is incomplete or submitted past the March 1 deadline; the Lessor or Lessee has not been issued a valid limited access NE multispecies permit or is otherwise not eligible; the Lessor's or Lessee's DAS are under sanction pursuant to an enforcement proceeding; the Lessor's or Lessee's vessel is prohibited from fishing; the Lessor's or Lessee's limited access NE multispecies permit is sanctioned pursuant to an enforcement proceeding; the Lessor or Lessee vessel is determined not in compliance with the conditions and restrictions of this part; or the Lessor has an insufficient number of allocated or unused DAS available to lease. Upon denial of an application to lease NE

multispecies DAS, the Regional Administrator shall send a letter to the applicants describing the reason(s) for application rejection. The decision by the Regional Administrator is the final agency decision.

(4) *Conditions and restrictions on leased DAS—(i) Confirmation of Permit History.* DAS associated with a confirmation of permit history may not be leased.

(ii) *Sub-leasing.* In a fishing year, a Lessor or Lessee vessel may not sublease DAS that have already been leased to another vessel. Any portion of a vessel's DAS may not be leased more than one time during a fishing year.

(iii) *Carry-over of leased DAS.* Leased DAS that remain unused at the end of the fishing year may not be carried over to the subsequent fishing year by the Lessor or Lessee vessel.

(iv) *Maximum number of DAS that can be leased.* A Lessee may lease Category A DAS in an amount up to such vessel's 2001 fishing year allocation (excluding carry-over DAS from the previous year, or additional DAS associated with obtaining a Large Mesh permit). For example, if a vessel was allocated 88 DAS in the 2001 fishing year, that vessel may lease up to 88 Category A DAS. The total number of Category A DAS that the vessel could fish would be the sum of the 88 leased DAS and the vessel's 2004 allocation of Category A DAS.

(v) *History of leased DAS use and landings.* Unless otherwise specified in this paragraph (k)(4)(v), history of leased DAS use will be presumed to remain with the Lessor vessel. Landings resulting from a leased DAS will be presumed to remain with the Lessee vessel. For the purpose of accounting for leased DAS use, leased DAS will be accounted for (subtracted from available DAS) prior to allocated DAS. In the case of multiple leases to one vessel, history of leased DAS use will be presumed to remain with the Lessor in the order in which such leases were approved by NMFS.

(vi) *Monkfish Category C, D, F, G and H vessels.* A vessel that possesses a valid limited access NE multispecies DAS permit and a valid limited access monkfish Category C, D, F, G, or H permit and leases NE multispecies DAS to

or from another vessel is subject to the restrictions specified in § 648.92(b)(2).

(vii) *DAS Category restriction.* A vessel may lease only Category A DAS, as described under paragraph (d)(1) of this section.

(viii) *Duration of lease.* A vessel leasing DAS may only fish those leased DAS during the fishing year in which they were leased.

(ix) *Size restriction of Lessee vessel.* A Lessor vessel only may lease DAS to a Lessee vessel with a baseline main engine horsepower rating that is no more than 20 percent greater than the baseline engine horsepower of the Lessor vessel. A Lessor vessel may only lease DAS to a Lessee vessel with a baseline length overall that is no more than 10 percent greater than the baseline length overall of the Lessor vessel. For the purposes of this program, the baseline horsepower and length overall specifications of vessels are those associated with the permit as of January 29, 2004, unless otherwise modified according to paragraph (k)(4)(xi) of this section.

(x) *Leasing by vessels fishing under a Sector allocation.* A vessel fishing under the restrictions and conditions of an approved Sector allocation, as specified in § 648.87(b), may not lease DAS to or from vessels that are not participating in such Sector during the fishing year in which the vessel is a member of that Sector.

(xi) *One-time downgrade of DAS Leasing Program baseline.* For the purposes of determining eligibility for leasing DAS only, a vessel owner may elect to make a one-time downgrade to the vessel's DAS Leasing Program baseline length and horsepower as specified in paragraph (k)(4)(ix) of this section to match the length overall and horsepower specifications of the vessel that is currently issued the permit.

(A) *Application for a one-time DAS Leasing Program baseline downgrade.* To downgrade the DAS Leasing Program baseline, eligible NE multispecies vessels must submit a completed application form obtained from the Regional Administrator. An application to downgrade a vessel's DAS Leasing Program baseline must contain at least the following information: Vessel owner's name, vessel name, permit number,

official number or state registration number, current vessel length overall and horsepower specifications, an indication whether additional information is included to document the vessel's current specifications, and the signature of the vessel owner.

(B) *Duration and applicability of one-time DAS Leasing Program baseline downgrade.* The downgraded DAS Leasing Program baseline remains in effect until the DAS Leasing Program expires or the permit is transferred to another vessel via a vessel replacement. Once the permit is transferred to another vessel, the DAS Leasing Program baseline reverts to the baseline horsepower and length overall specifications associated with the permit prior to the one-time downgrade. Once the DAS Leasing Program baseline is downgraded for a particular permit, no further downgrades may be authorized for that permit. The downgraded DAS Leasing Program baseline may only be used to determine eligibility for the DAS Leasing Program and does not affect or change the baseline associated with the DAS Transfer Program specified in paragraph (l)(1)(ii) of this section, or the vessel replacement or upgrade restrictions specified at § 648.4(a)(1)(i)(E) and (F), or any other provision, respectively.

(1) *DAS Transfer Program.* Except for vessels fishing under a Sector allocation, as specified in § 648.87, a vessel issued a valid limited access NE multispecies permit may transfer all of its NE multispecies DAS for an indefinite time to another vessel with a valid NE multispecies permit, in accordance with the conditions and restrictions described under this section. The Regional Administrator has final approval authority for all NE multispecies DAS transfer requests.

(1) *DAS transfer conditions and restrictions.* (i) The transferor vessel must transfer all of its DAS.

(ii) NE multispecies DAS may be transferred only to a vessel with a baseline main engine horsepower rating that is no more than 20 percent greater than the baseline engine horsepower of the transferor vessel. NE multispecies DAS may be transferred only to a vessel with a baseline length overall that is no more than 10 percent

greater than the baseline length overall of the transferor vessel. For the purposes of this program, the baseline horsepower and length overall are those associated with the permit as of January 29, 2004.

(iii) The transferor vessel must forfeit all of its state and Federal fishing permits, and may not fish in any state or Federal commercial fishery.

(iv) NE multispecies Category A and Category B DAS, as defined under paragraphs (d)(1) and (d)(2) of this section, shall be reduced by 20 percent upon transfer.

(v) Category C DAS, as defined under paragraph (d)(3) of this section, will be reduced by 90 percent upon transfer.

(vi) NE multispecies DAS associated with a Confirmation of Permit History may not be transferred.

(vii) *Transfer by vessels fishing under a Sector allocation.* A vessel fishing under the restrictions and conditions of an approved Sector allocation as specified under § 648.87(b), may not transfer DAS to another vessel that is not participating in such Sector during the fishing year in which the vessel is a member of that Sector.

(2) *Application to transfer DAS.* Owners of the vessels applying to transfer and receive DAS must submit a completed application form obtained from the Regional Administrator. The application must be signed by both seller/transferor and buyer/transferee of the DAS, and submitted to the Regional Office at least 45 days before the date on which the applicant desires to have the DAS effective on the buying vessel. The Regional Administrator will notify the applicants of any deficiency in the application pursuant to this section. Applications may be submitted at any time during the fishing year, up until March 1.

(i) *Application information requirements.* An application to transfer NE multispecies DAS must contain the following information: Seller's/transferor's name, vessel name, permit number and official number or state registration number; buyer's/transferee's name, vessel name, permit number and official number or state registration number; total price paid for purchased DAS; signatures of seller and buyer; and date the form was completed. In-

formation obtained from the transfer application will be held confidential, and will be used only in summarized form for management of the fishery. The application must be accompanied by verification, in writing, that the seller/transferor has requested cancellation of all state and Federal fishing permits from the appropriate agency or agencies.

(ii) *Approval of transfer application.* Unless an application to transfer NE multispecies DAS is denied according to paragraph (1)(2)(iii) of this section, the Regional Administrator shall issue confirmation of application approval to both seller/transferor and buyer/transferee within 45 days of receipt of an application.

(iii) *Denial of transfer application.* The Regional Administrator may reject an application to transfer NE multispecies DAS for the following reasons: The application is incomplete or submitted past the March 1 deadline; the seller/transferor or buyer/transferee does not possess a valid limited access NE multispecies permit; the seller's/transferor's or buyer's/transferee's DAS is sanctioned, pursuant to an enforcement proceeding; the seller's/transferor's or buyer/transferee's vessel is prohibited from fishing; the seller's/transferor's or buyer's/transferee's limited access NE multispecies permit is sanctioned pursuant to enforcement proceedings; or the seller/transferor has a DAS baseline of zero. Upon denial of an application to transfer NE multispecies DAS, the Regional Administrator shall send a letter to the applicants describing the reason(s) for application rejection. The decision by the Regional Administrator is the final agency decision and there is no opportunity to appeal the Regional Administrator's decision.

(m) *DAS credit for standing by entangled whales.* Limited access vessels fishing under the DAS program that report and stand by an entangled whale may request a DAS credit for the time spent standing by the whale. The following conditions and requirements must be met to receive this credit:

(1) At the time the vessel begins standing by the entangled whale, the vessel operator must notify the USCG and the Center for Coastal Studies, or

Fishery Conservation and Management

§ 648.83

another organization authorized by the Regional Administrator, of the location of the entangled whale and that the vessel is going to stand by the entangled whale until the arrival of an authorized response team;

(2) Only one vessel at a time may receive credit for standing by an entangled whale. A vessel standing by an entangled whale may transfer its stand-by status to another vessel while waiting for an authorized response team to arrive, provided it notifies the USCG and the Center for Coastal Studies, or another organization authorized by the Regional Administrator, of the transfer. The vessel to which stand-by status is transferred must also notify the USCG and the Center for Coastal Studies or another organization authorized by the Regional Administrator of this transfer and comply with the conditions and restrictions of this part;

(3) The stand-by vessel must be available to answer questions on the condition of the animal, possible species identification, severity of entanglement, etc., and take photographs of the whale, if possible, regardless of the species of whale or whether the whale is alive or dead, during its stand-by status and after terminating its stand-by status. The stand-by vessel must remain on scene until the USCG or an authorized response team arrives, or the vessel is informed that an authorized response team will not arrive. If the vessel receives notice that a response team is not available, the vessel may discontinue standing-by the entangled whale and continue fishing operations; and

(4) To receive credit for standing by an entangled whale, a vessel must submit a written request to the Regional Administrator. This request must include at least the following information: Date and time when the vessel began its stand-by status, date of first communication with the USCG, and date and time when the vessel terminated its stand-by status. DAS credit shall not be granted for the time a vessel fishes when standing by an entangled whale. Upon a review of the request, NMFS shall consider granting the DAS credit based on information available at the time of the request, regardless of whether an authorized re-

sponse team arrives on scene or a rescue is attempted. NMFS shall notify the permit holder of any DAS adjustment that is made or explain the reasons why an adjustment will not be made.

[69 FR 22969, Apr. 27, 2004, as amended at 69 FR 67798, Nov. 19, 2004; 69 FR 70923, Dec. 8, 2004; 70 FR 21942, Apr. 28, 2005; 70 FR 31340, June 1, 2005]

§ 648.83 Multispecies minimum fish sizes.

(a) *Minimum fish sizes.* (1) Minimum fish sizes for recreational vessels and charter/party vessels that are not fishing under a NE multispecies DAS are specified in § 648.89. Except as provided in § 648.17, all other vessels are subject to the following minimum fish sizes, determined by total length (TL):

MINIMUM FISH SIZES (TL) FOR COMMERCIAL VESSELS

Species	Sizes (inches)
Cod	22 (55.9 cm)
Haddock	19 (48.3 cm)
Pollock	19 (48.3 cm)
Witch flounder (gray sole)	14 (35.6 cm)
Yellowtail flounder	13 (33.0 cm)
American plaice (dab)	14 (35.6 cm)
Atlantic halibut	36 (91.4 cm)
Winter flounder (blackback)	12 (30.5 cm)
Redfish	9 (22.9 cm)

(2) The minimum fish size applies to whole fish or to any part of a fish while possessed on board a vessel, except as provided in paragraph (b) of this section, and to whole, whole-gutted or gilled fish only, after landing. For purposes of determining compliance with the possession limits in § 648.86, the weight of fillets and parts of fish, other than whole-gutted or gilled fish, will be multiplied by 3. Fish fillets, or parts of fish, must have skin on while possessed on board a vessel and at the time of landing in order to meet minimum size requirements. "Skin on" means the entire portion of the skin normally attached to the portion of the fish or to fish parts possessed is still attached.

(b) *Exceptions.* (1) Each person aboard a vessel issued a NE multispecies limited access permit and fishing under the DAS program may possess up to 25 lb (11.3 kg) of fillets that measure less than the minimum size, if such fillets

are from legal-sized fish and are not offered or intended for sale, trade, or barter. For purposes of determining compliance with the possession limits specified in § 648.86, the weight of fillets and parts of fish, other than whole-gutted or gilled fish, will be multiplied by 3.

(2) Recreational, party, and charter vessels may possess fillets less than the minimum size specified, if the fillets are taken from legal-sized fish and are not offered or intended for sale, trade or barter.

(3) Vessels fishing exclusively with pot gear may possess NE multispecies frames used, or to be used, as bait, that measure less than the minimum fish size, if there is a receipt for purchase of those frames on board the vessel.

(4) Category 1 herring vessels may possess and land haddock that measure less than the minimum fish size, consistent with the haddock incidental catch allowance and bycatch cap specified in § 648.86(a)(3).

(c) *Adjustments.* (1) At any time when information is available, the NEFMC will review the best available mesh selectivity information to determine the appropriate minimum size for the species listed in paragraph (a) of this section, except winter flounder, according to the length at which 25 percent of the regulated species would be retained by the applicable minimum mesh size.

(2) Upon determination of the appropriate minimum sizes, the NEFMC shall propose the minimum fish sizes to be implemented following the procedures specified in § 648.90.

(3) Additional adjustments or changes to the minimum fish sizes specified in paragraph (a) of this section, and exemptions specified in paragraph (b) of this section, may be made at any time after implementation of the final rule as specified under § 648.90.

[69 FR 22974, Apr. 27, 2004]

EFFECTIVE DATE NOTE: At 70 FR 34060, June 13, 2005, § 648.83 was amended by adding paragraph (b)(4), effective June 13, 2005 through Dec. 10, 2005.

§ 648.84 Gear-marking requirements and gear restrictions.

(a) Bottom-tending fixed gear, including, but not limited to, gillnets and longlines designed for, capable of, or fishing for NE multispecies or

monkfish, must have the name of the owner or vessel or the official number of that vessel permanently affixed to any buoys, gillnets, longlines, or other appropriate gear so that the name of the owner or vessel or the official number of the vessel is visible on the surface of the water.

(b) Bottom-tending fixed gear, including, but not limited to gillnets or longline gear, must be marked so that the westernmost end (measuring the half compass circle from magnetic south through west to, and including, north) of the gear displays a standard 12-inch (30.5-cm) tetrahedral corner radar reflector and a pennant positioned on a staff at least 6 ft (1.8 m) above the buoy. The easternmost end (meaning the half compass circle from magnetic north through east to, and including, south) of the gear need display only the standard 12-inch (30.5-cm) tetrahedral radar reflector positioned in the same way.

(c) Continuous gillnets must not exceed 6,600 ft (2,011.7 m) between the end buoys.

(d) In the GOM and GB regulated mesh area specified in § 648.80(a), gillnet gear set in an irregular pattern or in any way that deviates more than 30° from the original course of the set must be marked at the extremity of the deviation with an additional marker, which must display two or more visible streamers and may either be attached to or independent of the gear.

[69 FR 22974, Apr. 27, 2004]

§ 648.85 Special management programs.

(a) *U.S./Canada Resource Sharing Understanding.* No NE multispecies fishing vessel, or person on such vessel, may enter, fish in, or be in the U.S./Canada Resource Sharing Understanding Management Areas (U.S./Canada Management Areas), as defined in paragraph (a)(1) of this section, unless the vessel is fishing in accordance with the restrictions and conditions of this section.

(1) *U.S./Canada Management Areas.* A NE multispecies DAS vessel that meets the requirements of paragraph (a)(3) of this section, may fish in the U.S./Canada Management Areas described in

Fishery Conservation and Management

§ 648.85

paragraphs (a)(1)(i) and (ii) of this section.

(i) *Western U.S./Canada Area.* The Western U.S./Canada Area is the area defined by straight lines connecting the following points in the order stated (a chart depicting this area is available from the Regional Administrator upon request):

WESTERN U.S./CANADA AREA

Point	N. lat.	W. long.
USCA 1	42°20'	68°50'
USCA 2	39°50'	68°50'
USCA 3	39°50'	66°40'
USCA 4	40°40'	66°40'
USCA 5	40°40'	66°50'
USCA 6	40°50'	66°50'
USCA 7	40°50'	67°00'
USCA 8	41°00'	67°00'
USCA 9	41°00'	67°20'
USCA 10	41°10'	67°20'
USCA 11	41°10'	67°40'
USCA 12	42°20'	67°40'
USCA 1	42°20'	68°50'

(ii) *Eastern U.S./Canada Area.* The Eastern U.S./Canada Area is the area defined by straight lines connecting the following points in the order stated (a chart depicting this area is available from the Regional Administrator upon request):

EASTERN U.S./CANADA AREA

Point	N. lat.	W. long.
USCA 12	42°20'	67°40'
USCA 11	41°10'	67°40'
USCA 10	41°10'	67°20'
USCA 9	41°00'	67°20'
USCA 8	41°00'	67°00'
USCA 7	41°50'	67°00'
USCA 6	41°50'	66°50'
USCA 5	41°40'	66°50'
USCA 4	41°40'	66°40'
USCA 15	40°30'	66°40'
USCA 14	40°30'	65°44.3'
USCA 13	42°20'	67°18.4'
USCA 12	42°20'	67°40'

(2) *TAC allocation.* (i) Except for the 2004 fishing year, the amount of GB cod and haddock TAC that may be harvested from the Eastern U.S./Canada Area described in paragraph (a)(1)(ii) of this section, and the amount of GB yellowtail flounder TAC that may be harvested from the Western U.S./Canada Area and the Eastern U.S./Canada Area, as described in paragraphs (a)(1)(i) and (ii) of this section, combined, shall be determined by the process specified in paragraphs (a)(2)(i)(A) through (E) of this section.

ess specified in paragraphs (a)(2)(i)(A) through (E) of this section.

(A) By June 30 of each year, the Terms of Reference for the U.S./Canada shared resources for GB cod, haddock and yellowtail flounder shall be established by the Steering Committee and the Transboundary Management Guidance Committee (TMGC).

(B) By July 31 of each year, a Transboundary Resource Assessment Committee (TRAC) joint assessment of the U.S./Canada shared resources for GB cod, haddock and yellowtail flounder shall occur.

(C) By August 31 of each year, the TMGC shall recommend TACs for the U.S./Canada shared resources for GB cod, haddock and yellowtail flounder. Prior to October 31 of each year, the Council may refer any or all recommended TACs back to the TMGC and request changes to any or all TACs. The TMGC shall consider such recommendations and respond to the Council prior to October 31.

(D) By October 31 of each year, the Council shall review the TMGC recommended TACs for the U.S. portion of the U.S./Canada Management Area resources for GB cod, haddock and yellowtail flounder. Based on the TMGC recommendations, the Council shall recommend to the Regional Administrator the U.S. TACs for the shared stocks for the subsequent fishing year. If the recommendation of the Council is not consistent with the recommendation of the TMGC, the Regional Administrator may select either the recommendation of the TMGC, or the Council. NMFS shall review the Council's recommendations and shall publish in the FEDERAL REGISTER the proposed TACs and provide a 30-day public comment period. NMFS shall make a final determination concerning the TACs and will publish notification of the approved TACs and responses to public comments in the FEDERAL REGISTER. The Council, at this time, may also consider modification of management measures in order to ensure compliance with the U.S./Canada Resource Sharing Understanding. Any changes to management measures will be modified pursuant to § 648.90.

(E) For fishing year 2004, the amount of GB cod, haddock and yellowtail

flounder TAC that may be harvested under this section will be published in the preamble of the proposed and final rules for Amendment 13.

(ii) *Adjustments to TACs.* Any overages of the GB cod, haddock, or yellowtail flounder TACs that occur in a given fishing year will be subtracted from the respective TAC in the following fishing year.

(3) *Requirements for vessels in U.S./Canada Management Areas.* Any NE multispecies vessel may fish in the U.S./Canada Management Areas, provided it complies with conditions and restrictions of this section. Vessels other than NE multispecies vessels may fish in the U.S./Canada Management Area, subject to the restrictions specified in paragraph (a)(3)(iv)(E) of this section and all other applicable regulations for such vessels.

(i) *VMS requirement.* A NE multispecies DAS vessel in the U.S./Canada Management Areas described in paragraph (a)(1) of this section must have installed on board an operational VMS unit that meets the minimum performance criteria specified in §§ 648.9 and 648.10. The VMS unit will be polled at least twice per hour in the U.S./Canada Management Areas, when the vessel has declared into the U.S./Canada Management Areas under a groundfish DAS, as specified in paragraph (a)(3)(ii) of this section.

(ii) *Declaration.* To fish in the U.S./Canada Management Area under a groundfish DAS, a NE multispecies DAS vessel, prior to leaving the dock, must declare through the VMS, in accordance with instructions to be provided by the Regional Administrator, which specific U.S./Canada Management Area described in paragraphs (a)(1)(i) or (ii) of this section, or which specific SAP, described in paragraph (b) of this section, within the U.S./Canada Management Area the vessel will fish in, and comply with the restrictions and conditions in paragraphs (a)(3)(ii)(A) through (C) of this section. Vessels other than NE multispecies DAS vessels are not required to declare into the U.S./Canada Areas.

(A) A vessel fishing under a NE multispecies DAS in the Eastern U.S./Canada Area may not fish, during the same trip, outside of the Eastern U.S./

Canada Area, and may not enter or exit the Eastern U.S./Canada Area more than once on any trip.

(B) A vessel fishing under a NE multispecies DAS in the Western U.S./Canada Area may fish inside and outside the Western U.S./Canada Area on the same trip, provided it complies with the more restrictive regulations applicable to the area fished for the entire trip (e.g., the possession restrictions specified in paragraph (a)(3)(iv)(C)(4) of this section), and the reporting requirements specified in § 648.85(a)(3)(v).

(C) For the purposes of selecting vessels for observer deployment, a vessel fishing in either of the U.S./Canada Management Areas specified in paragraph (a)(1) of this section must provide notice to NMFS of the vessel name; contact name for coordination of observer deployment; telephone number for contact; and the date, time, and port of departure, at least 72 hours prior to the beginning of any trip that it declares into the U.S./Canada Management Area as required under this paragraph (a)(3)(ii).

(iii) *Gear requirements.* NE multispecies vessels fishing with trawl gear in the Eastern U.S./Canada Area defined in paragraph (a)(1)(ii) of this section must fish with a haddock separator trawl or a flounder trawl net, as described in paragraphs (a)(3)(iii)(A) and (B) of this section (both nets may be onboard the fishing vessel simultaneously). No other type of fishing gear may be on the vessel during a trip to the Eastern U.S./Canada Area. The description of the haddock separator trawl and flounder trawl net in paragraph (a)(3)(iii) of this section may be further specified by the Regional Administrator through publication of such specifications in the FEDERAL REGISTER, consistent with the requirements of the Administrative Procedure Act.

(A) *Haddock Separator Trawl.* A haddock separator trawl is defined as a groundfish trawl modified to a vertically oriented trouser trawl configuration, with two extensions arranged one over the other, where a codend shall be attached only to the upper extension, and the bottom extension shall be left open and have no

codend attached. A horizontal large mesh separating panel constructed with a minimum of 6.0 inch (15.2 cm) diamond mesh must be installed between the selvages joining the upper and lower panels, as described in paragraph (a)(3)(iii)(A) and (B) of this section, extending forward from the front of the trouser junction to the aft edge of the first belly behind the fishing circle.

(1) *Two-seam bottom trawl nets*—For two seam nets, the separator panel will be constructed such that the width of the forward edge of the panel is 80–85 percent of the width of the after edge of the first belly of the net where the panel is attached. For example, if the belly is 200 meshes wide (from selvedge to selvedge), the separator panel must be no wider than 160–170 meshes wide.

(2) *Four-seam bottom trawl nets*—For four seam nets, the separator panel will be constructed such that the width of the forward edge of the panel is 90–95 percent of the width of the after edge of the first belly of the net where the panel is attached. For example, if the belly is 200 meshes wide (from selvedge to selvedge), the separator panel must be no wider than 180–190 meshes wide. The separator panel will be attached to both of the side panels of the net along the midpoint of the side panels. For example, if the side panel is 100 meshes tall, the separator panel must be attached at the 50th mesh.

(B) *Flounder Trawl Net*. A flounder trawl net is defined as bottom trawl gear meeting one of the following two net descriptions:

(1) A two seam low-rise net constructed with mesh size in compliance with § 648.80(a)(4) where the maximum footrope length is not greater than 105 ft (32.0 m) and the headrope is at least 30 percent longer than the footrope. The footrope and headrope lengths shall be measured from the forward wing end, so that the vertical dimension of the forward wing end measures 3.0 ft (0.9 m) or less in height. Floats are prohibited in the center 50 percent of the headrope.

(2) A two seam low-rise net constructed with mesh size in compliance with § 648.80(a)(4) with the exception that the mesh size in the square of the top panel of the net, identified as the

area located from the headrope to the beginning of the first belly, shall not be smaller than 12.0-in (30.5-cm) square mesh. The vertical dimension of the forward wing end may not measure more than 3.0 ft (0.9 m) in height.

(iv) *Harvest controls*. Vessels fishing in the U.S./Canada Management Areas are subject to the following restrictions, in addition to any other possession or landing limits applicable to vessels not fishing in the U.S./Canada Management Areas.

(A) *Cod landing limit restrictions*. Notwithstanding other applicable possession and landing restrictions under this part, a NE multispecies vessel fishing in the Eastern U.S./Canada Area described in paragraph (a)(1)(ii) of this section may not land more than 500 lb (226.8 kg) of cod per DAS, or any part of a DAS, up to 5,000 lb (2,268 kg) per trip, not to exceed 5 percent of the total catch on board, whichever is less, unless otherwise restricted under this part. A vessel fishing in both the Eastern U.S./Canada Area and either the CA II Yellowtail Flounder SAP or the Eastern U.S./Canada Haddock SAP Pilot Program on the same trip must comply with the cod possession restrictions for those programs for the entire trip, as specified in paragraphs (b)(3) and (8) of this section, respectively.

(B) *Haddock landing limit*—(1) *Initial haddock landing limit*. The initial haddock landing limit is specified in § 648.86(a), unless adjusted pursuant to paragraph (a)(3)(iv)(B)(2) and (3) of this section.

(2) *Implementation of haddock landing limit for Eastern U.S./Canada Area*. When the Regional Administrator projects that 70 percent of the TAC allocation for haddock specified under paragraph (a)(2) of this section will be harvested, NMFS shall implement, through rule-making consistent with the Administrative Procedure Act, a haddock trip limit for vessels fishing in the Eastern U.S./Canada Area of 1,500 lb (680.4 kg) per day, and 15,000 lb (6,804.1 kg) per trip.

(3) *Possession restriction when 100 percent of TAC is harvested*. When the Regional Administrator projects that 100 percent of the TAC allocation for haddock specified in paragraph (a)(2) of this section will be harvested, NMFS

shall, through rulemaking consistent with the Administrative Procedure Act, close the Eastern U.S./Canada Area to groundfish DAS vessels as specified in paragraph (a)(3)(iv)(E) of this section and prohibit all vessels from harvesting, possessing, or landing haddock in or from the Eastern U.S./Canada Area.

(C) *Yellowtail flounder landing limit—*

(1) *Initial yellowtail flounder landing limit.* The initial yellowtail flounder possession limit is specific to the CA II Yellowtail Flounder SAP as specified in paragraph (b)(3)(viii) if this section, unless adjusted pursuant to paragraph (a)(3)(iv)(C)(2) and (3) of this section.

(2) *Implementation of yellowtail flounder landing limit for Western and Eastern U.S./Canada Areas.* When the Regional Administrator projects that 70 percent of the TAC allocation for yellowtail flounder specified under paragraph (a)(2) of this section will be harvested, NMFS shall impose and/or adjust, through rulemaking consistent with the Administrative Procedure Act, the yellowtail flounder trip limit for vessels fishing in both the Western U.S./Canada Area and the Eastern U.S./Canada Area to 1,500 lb (680.4 kg) per day, and 15,000 lb (6,804.1 kg) per trip.

(3) *Possession restriction when 100 percent of TAC is harvested.* When the Regional Administrator projects that 100 percent of the TAC allocation for yellowtail flounder specified under paragraph (a)(2) of this section will be harvested, NMFS shall, through rulemaking consistent with the Administrative Procedure Act, close the Eastern U.S./Canada Area to groundfish DAS vessels as specified under paragraph (a)(3)(iv)(E) of this section and prohibit all vessels from harvesting, possessing, or landing yellowtail flounder from the U.S./Canada Management Area.

(4) *Yellowtail flounder landing limit for vessels fishing both inside and outside the Western U.S./Canada Area on the same trip.* A vessel fishing both inside and outside of the Western U.S./Canada Area on the same trip, as allowed under paragraph (a)(3)(ii)(B) of this section, is subject to the most restrictive landing limits that apply to any of the areas fished, for the entire trip.

(D) *Other restrictions or in-season adjustments.* In addition to the possession restrictions specified in paragraph (a)(3)(iv) of this section, when 30 percent and/or 60 percent of the TAC allocations specified under paragraph (a)(2) of this section are projected to be harvested, the Regional Administrator, through rulemaking consistent with the Administrative Procedure Act, may modify the gear requirements, modify or close access to the U.S./Canada Management Areas, increase or decrease the trip limits specified under paragraphs (a)(3)(iv)(A) through (C) of this section, or limit the total number of trips into the U.S./Canada Management Area, to prevent over-harvesting or under-harvesting the TAC allocations.

(E) *Closure of Eastern U.S./Canada Area.* When the Regional Administrator projects that the TAC allocations specified under paragraph (a)(2) of this section will be caught, NMFS shall close, through rulemaking consistent with the Administrative Procedure Act, the Eastern U.S./Canada Area to all groundfish DAS vessels, unless otherwise allowed under this paragraph (a)(3)(iv)(E). Should the Eastern U.S./Canada Area close as described in this paragraph (a)(3)(iv)(E), groundfish DAS vessels may continue to fish in a SAP within the Eastern U.S./Canada Area, provided that the TAC for the target stock identified for that particular SAP has not been fully harvested. For example, should the TAC allocation for GB cod specified under paragraph (a)(2) of this section be attained, and the Eastern U.S./Canada Area closure implemented, vessels could continue to fish for yellowtail flounder within the SAP identified as the Closed Area II Yellowtail Flounder SAP, described in paragraph (b)(3) of this section, in accordance with the requirements of that program. Upon closure of the Eastern U.S./Canada Area, vessels may transit through this area as described in paragraph (a)(1)(ii) of this section, provided that its gear is stowed in accordance with the provisions of § 648.23(b), unless otherwise restricted under this part.

(v) *Reporting.* The owner or operator of a NE multispecies DAS vessel must submit reports via the VMS, in accordance with instructions to be provided

by the Regional Administrator, for each day fished when declared into either of the U.S./Canada Management Areas. The reports must include at least the information specified in paragraphs (a)(3)(v)(A) and (B) of this section, depending on area fished. The reports must be submitted in 24-hr intervals for each day, beginning at 0000 hr and ending at 2400 hr, and must be submitted by 0900 hr of the following day.

(A) *Eastern U.S./Canada Area.* For a vessel declared into the Eastern U.S./Canada Area in accordance with paragraph (a)(3)(ii) of this section, the reports must include at least the following information: Total pounds of cod, haddock and yellowtail flounder kept; and total pounds of cod, haddock, and yellowtail flounder discarded.

(B) *Western U.S./Canada Area.* For a vessel declared into the Western U.S./Canada Area in accordance with paragraph (a)(3)(ii) of this section, the reports must include at least the following information: Total pounds of yellowtail flounder kept and total pounds of yellowtail flounder discarded. In addition to these reporting requirements, a vessel that has declared that it intends to fish both inside and outside of the Western U.S./Canada Area on the same trip, in accordance with paragraph (a)(3)(ii) of this section, must report via VMS the following information when crossing the boundary into or out of the Western U.S./Canada Area: Total pounds of yellowtail flounder kept, by statistical area, and total pounds of yellowtail flounder discarded, by statistical area, since the last daily catch report.

(vi) *Withdrawal from U.S./Canada Resource Sharing Understanding.* At any time, the Regional Administrator, in consultation with the Council, may withdraw from the provisions of the U.S./Canada Resource Sharing Understanding described in this section, if the Understanding is determined to be inconsistent with the goals and objectives of the FMP, the Magnuson-Stevens Act, or other applicable law. If the United States withdraws from the Understanding, the implementing measures, including TACs, remain in place until changed through the framework or FMP amendment process.

(vii) *Transiting.* A multispecies DAS vessel declared into the Eastern U.S./Canada Area as defined in paragraph (a)(1)(ii) of this section, and not fishing in the CA II Yellowtail Flounder SAP described in paragraph (b)(3) of this section, may transit the CA II Yellowtail Flounder SAP as described in paragraph (b)(3)(ii) of this section, provided all fishing gear is stowed in accordance with the regulations at § 648.23(b).

(b) *Special Access Programs.* A SAP is a narrowly defined fishery that results in increased access to a stock that, in the absence of such authorization, would not be allowed due to broadly applied regulations. A SAP authorizes specific fisheries targeting either NE multispecies stocks or non-multispecies stocks in order to allow an increased yield of the target stock(s) without undermining the achievement of the goals of the NE Multispecies FMP. A SAP should result in a harvest level that more closely approaches OY, without compromising efforts to rebuild overfished stocks, end overfishing, minimize bycatch, or minimize impact on EFH. Development of a SAP requires a relatively high level of fishery dependent and fishery independent information in order to be consistent with this rationale.

(1) *SAPs harvesting NE multispecies.* A SAP to harvest NE multispecies may be proposed by the Council and approved by NMFS through the framework process described under § 648.90.

(2) *SAPs harvesting stocks other than NE multispecies.* A SAP to harvest stocks of fish other than NE multispecies (non-multispecies SAP) may be proposed by the Council and approved by NMFS through the framework process described under § 648.90.

(3) *Closed Area II Yellowtail Flounder SAP—(i) Eligibility.* Vessels issued a valid limited access NE multispecies DAS permit are eligible to participate in the Closed Area II Yellowtail Flounder SAP, and may fish in the Closed Area II Yellowtail Flounder Access Area, as described in paragraph (b)(3)(ii) of this section, for the period specified in paragraph (b)(3)(iii) of this section, when fishing under a NE multispecies DAS, provided such vessels comply with the requirements of

this section, and provided the Eastern U.S./Canada Area described in paragraph (a)(1)(ii) is not closed according to the provisions specified under paragraph (a)(1)(iv) of this section. Vessels are required to comply with the no discarding and DAS flip requirements specified in paragraph (b)(3)(xi) of this section, and the DAS balance requirements specified in paragraph (b)(3)(xii) of this section.

(ii) *Closed Area II Yellowtail Flounder Access Area.* The Closed Area II Yellowtail Flounder Access Area is the area defined by straight lines connecting the following points in the order stated:

CLOSED AREA II YELLOWTAIL FLOUNDER
ACCESS AREA

Point	N. lat.	W. long.
Ytail 1	41°30'	67°20'
Ytail 2	41°30'	66°34.8'
G5	41°18.6'	66°24.8' ¹
CII 2	41°00'	66°35.8'
CII 1	41°00'	67°20'
Ytail 1	41°30'	67°20'

¹ The U.S.-Canada Maritime Boundary.

(iii) *Season.* Eligible vessels may fish in the Closed Area II Yellowtail Flounder SAP during the period July 1 through December 31.

(iv) *VMS requirement.* All NE multispecies DAS vessels in the U.S./Canada Management Areas described in paragraph (a)(1) of this section must have installed on board an operational VMS unit that meets the minimum performance criteria specified in §§ 648.9 and 648.10.

(v) *Declaration.* For the purposes of selecting vessels for observer deployment, a vessel must provide notice to NMFS of the vessel name, contact name for coordination of observer deployment, telephone number for contact, date, time and port of departure, and special access program to be fished, at least 5 working days prior to the beginning of any trip which it declares into the Special Access Program as required under this paragraph (b)(3)(v). Prior to departure from port, a vessel intending to participate in the Closed Area II Yellowtail Flounder SAP must declare into this area through the VMS, in accordance with instructions provided by the Regional Administrator. In addition to fishing in

the Closed Area II Yellowtail Flounder SAP, a vessel, on the same trip, may also declare its intent to fish in the area outside of the Closed Area II that resides within the Eastern U.S./Canada Area, as defined in paragraph (a)(1)(ii) of this section, provided the vessel fishes in this area under the most restrictive provisions of either the Closed Area II Yellowtail Flounder SAP, or the Eastern U.S./Canada Area.

(vi) *Number of trips per vessel.* Unless otherwise authorized by the Regional Administrator as specified in paragraph (a)(3)(iv)(D) of this section, eligible vessels are restricted to one trip per month, during the season described in paragraph (b)(3)(iii) of this section.

(vii) *Maximum number of trips per fishing year.* Unless otherwise authorized by the Regional Administrator as specified in paragraph (a)(3)(iv)(D) of this section, the total number of allowed trips by all vessels combined that may be declared into the Closed Area II Yellowtail Flounder SAP shall be as announced by the Regional Administrator, after consultation with the Council, for each fishing year, prior to June 1, through rulemaking consistent with the Administrative Procedure Act. The total number of trips by all vessels combined that may be declared into this SAP shall not exceed 320 trips per year. When determining the total number of trips, the Regional Administrator shall consider the available yellowtail flounder TAC under the U.S./Canada Resource Sharing Understanding, the potential catch of GB yellowtail flounder by all vessels fishing outside of the SAP, recent discard estimates in all fisheries that catch yellowtail flounder, and the expected number of SAP participants. If the Regional Administrator determines that the available catch, as determined by subtracting the potential catch of GB yellowtail flounder by all vessels outside of the SAP from the GB yellowtail flounder TAC allocation specified in paragraph (a)(2) of this section, is insufficient to allow for at least 150 trips with a possession limit of 15,000 lb (6,804 kg) of yellowtail flounder per trip, the Regional Administrator may choose not to authorize any trips into the SAP during a fishing year.

(viii) *Trip limits*—(A) *Yellowtail flounder trip limit*. Unless otherwise authorized by the Regional Administrator as specified in paragraph (a)(3)(iv)(D) of this section, a vessel fishing in the CA II Yellowtail Flounder SAP may fish for, possess, and land up to 10,000 lb (4,536 kg) of yellowtail flounder per trip. The Regional Administrator may adjust this limit to a maximum of 30,000 lb (13,608 kg) per trip after considering the factors listed in paragraph (b)(3)(vii) of this section for the maximum number of trips.

(B) *Cod and haddock trip limit*. Unless otherwise restricted, a NE multispecies vessel fishing any portion of a trip in the Closed Area II Yellowtail Flounder SAP may not fish for, possess, or land more than 1,000 lb (453.6 kg) of cod per trip, regardless of trip length. A NE multispecies vessel fishing in the Closed Area II Yellowtail Flounder SAP is subject to the haddock requirements described under § 648.86(a), unless further restricted under paragraph (a)(3)(iv) of this section.

(ix) *Area fished*. Eligible vessels that have declared a trip into the Closed Area II Yellowtail Flounder SAP, and other areas as specified under paragraph (b)(3)(v) of this section, may not fish, during the same trip, outside of the declared area, and may not enter or exit the area more than once per trip.

(x) *Gear requirements*. Vessels fishing with trawl gear under an NE multispecies DAS in the U.S./Canada Management Areas defined in paragraph (a)(1) of this section, may not fish with, or possess on board, any fishing gear other than a haddock separator trawl or flounder trawl net (both nets may be onboard the fishing vessel simultaneously).

(xi) *No-discard provision and DAS flips*. A vessel fishing in the Closed Area II Yellowtail Flounder SAP, under a B DAS (Regular or Reserve) may not discard legal-sized cod. If such a vessel harvests and brings on board more legal sized cod than the applicable maximum landing limit per trip specified under paragraph (b)(3)(viii) of this section, the vessel operator must notify NMFS prior to crossing the demarcation line via VMS on its return trip to port to initiate a DAS flip. Once this notification has been received by

NMFS, the vessel will automatically be switched by NMFS to fishing under a Category A DAS. For a vessel that notified NMFS of a DAS flip, the Category B DAS that have accrued between the time the vessel started accruing Category B DAS at the beginning of the trip (i.e., at the time the vessel crossed into the Eastern U.S./Canada Area) and the time the vessel declared its DAS flip will be accrued as Category A DAS, and not Category B DAS. Once such vessel has initiated the DAS flip and is fishing under a Category A DAS, the prohibition on discarding legal-sized cod no longer applies.

(xii) *Minimum Category A DAS*. For vessels fishing under a Category B DAS, the number of Category B DAS that can be used on a trip cannot exceed the number of available Category A DAS the vessel has at the start of the trip.

(4) *SNE/MA Winter Flounder SAP*. A limited access NE multispecies vessel fishing for summer flounder west of 72° 30' W. lat., using mesh required under § 648.104(a), may retain and land up to 200 lb (90.7 kg) of winter flounder while not under an NE multispecies DAS, provided the vessel complies with the following restrictions:

(i) The vessel must possess a valid summer flounder permit as required under § 648.4(a)(3), and be in compliance with the restrictions of subpart G of this part;

(ii) The total amount of winter flounder on board must not exceed the amount of summer flounder on board;

(iii) The vessel must not be fishing under an NE multispecies DAS; and

(iv) Fishing for, retention, and possession of regulated species other than winter flounder is prohibited.

(5) *Incidental TACs*. Unless otherwise specified in this paragraph (b)(5), incidental TACs will be specified through the periodic adjustment process described in § 648.90, and allocated as described in paragraph (b)(5) of this section, for each of the following stocks: GOM cod, GB cod, CC/GOM yellowtail flounder, American plaice, white hake, SNE/MA yellowtail flounder, SNE/MA winter flounder, and witch flounder.

NMFS will send letters to limited access NE multispecies permit holders notifying them of such TACs.

(i) *Stocks other than GB cod.* With the exception of GB cod, the incidental TACs specified under this paragraph (b)(5) shall be allocated to the Regular B DAS Pilot Program described in paragraph (b)(6) of this section.

(ii) *GB cod.* The incidental TAC for GB cod specified in this paragraph (b)(5), shall be subdivided as follows: 66 percent to the Regular B DAS Pilot Program, described in paragraph (b)(6) of this section; and 34 percent to the Eastern U.S./Canada Haddock SAP Pilot Program, described in paragraph (b)(8) of this section.

(6) *Regular B DAS Pilot Program*—(i) *Eligibility.* Vessels issued a valid limited access NE multispecies DAS permit and allocated Regular B DAS are eligible to participate in the Regular B DAS Pilot Program for the period specified in paragraph (b)(6)(ii) of this section, and may elect to fish under a Regular B DAS, provided they comply with the requirements and restrictions of this paragraph (b)(6), and provided the use of Regular B DAS is not restricted according to paragraphs (b)(6)(iv)(G) or (H), or paragraph (b)(6)(vi) of this section. Vessels are required to comply with the no discarding and DAS flip requirements specified in paragraph (b)(6)(iv)(E) of this section, and the DAS balance and accrual requirements specified in paragraph (b)(6)(iv)(F) of this section. Vessels may fish under the B Regular DAS Pilot Program and in the U.S./Canada Management Area on the same trip, but may not fish under the Regular B DAS Pilot Program and in a SAP on the same trip.

(ii) *Duration of program.* Fishing under this program may only occur from November 19, 2004 through October 31, 2005.

(iii) *Quarterly incidental catch TACs.* The incidental catch TACs specified in accordance with paragraph (b)(5) of this section shall be divided into quarterly catch TACs. NMFS will send letters to limited access multispecies permit holders notifying them of such TACs.

(iv) *Program requirements*—(A) *VMS requirement.* A NE multispecies DAS ves-

sel fishing in the Regular B DAS Pilot Program described in paragraph (b)(6)(i) of this section must have installed on board an operational VMS unit that meets the minimum performance criteria specified in §§ 648.9 and 648.10.

(B) *Observer notification.* For the purposes of selecting vessels for observer deployment, a vessel must provide notice to NMFS of the vessel name; contact name for coordination of observer deployment; telephone number for contact; the date, time, and port of departure; and the planned fishing area or areas (GOM, GB, or SNE/MA) at least 72 hr prior to the beginning of any trip that it declares into the Regular B DAS Pilot Program as required under paragraph (b)(6)(iv)(C) of this section, and in accordance with instructions provided by the Regional Administrator. Providing notice of the area that the vessel intends to fish does not restrict the vessel's activity to only that area on that trip (i.e., the vessel operator may change his/her plans regarding planned fishing area).

(C) *VMS declaration.* To participate in the Regular B DAS Pilot Program under a Regular B DAS, a vessel must declare into the Program via the VMS, prior to departure from port, in accordance with instructions provided by the Regional Administrator. A vessel declared into the Regular B DAS Pilot Program cannot fish in an approved SAP described under this section on the same trip.

(D) *Landing limits.* A NE multispecies vessel fishing in the Regular B DAS Pilot Program described in this paragraph (b)(6), and fishing under a Regular B DAS, may not land more than 100 lb (45.5 kg) per DAS, or any part of a DAS, up to a maximum of 1,000 lb (454 kg) per trip, of any of the following species: Cod, American plaice, white hake, witch flounder, ocean pout, winter flounder and windowpane flounder. Such vessels may not land more than 25 lb (11.3 kg) per DAS, or any part of a DAS, up to a maximum of 250 lb (113 kg) per trip of yellowtail flounder, unless fishing the entire trip in the U.S./Canada Management Area as specified under paragraph (a)(1) of this section.

(E) *No-discard provision and DAS flips.* A vessel fishing in the Regular B DAS

Pilot Program under a Regular B DAS may not discard legal-sized regulated groundfish. This prohibition on discarding does not apply in areas or times where the possession or landing of such groundfish is prohibited. If such a vessel harvests and brings on board more legal sized regulated groundfish than the applicable maximum landing limit per trip specified under paragraph (b)(6)(iv)(D) of this section, the vessel operator must notify NMFS prior to crossing the demarcation line via VMS on its return trip to port to initiate a DAS flip. Once this notification has been received by NMFS, the vessel will automatically be switched by NMFS to fishing under a Category A DAS. For a vessel that notifies NMFS of a DAS flip, the Category B DAS that have accrued between the time the vessel started accruing Regular B DAS at the beginning of the trip (i.e., at the time the vessel crossed the demarcation line at the beginning of the trip) and the time the vessel declared its DAS flip will be accrued as Category A DAS, and not Regular B DAS. Once such vessel has initiated the DAS flip and is fishing under a Category A DAS, the prohibition on discarding legal-sized regulated groundfish no longer applies. A vessel that has declared a DAS flip will be subject to the landing restrictions specified under § 648.86.

(F) *Minimum Category A DAS and B DAS accrual.* For a vessel fishing under the Regular B DAS Pilot Program, the number of Regular B DAS that can be used on a trip cannot exceed the number of Category A DAS the vessel has available at the start of the trip. The vessel will accrue DAS in accordance with § 648.82(e)(3).

(G) *Restrictions when 100 percent of the incidental catch TAC is harvested.* With the exception of white hake, when the Regional Administrator provides notification through rulemaking consistent with the Administrative Procedure Act, that 100 percent of one or more of quarterly incidental TACs specified under paragraph (b)(6)(iii) of this section has projected to have been harvested, the use of Regular B DAS shall be prohibited in the pertinent stock area(s) as defined under paragraph (b)(6)(v) of this section for the duration of the calendar quarter. The closure of

a stock area to all Regular B DAS use will occur even if the quarterly incidental catch TACs for other stocks in that stock area have not been completely harvested. When the Regional Administrator projects that 100 percent of the quarterly white hake incidental catch TAC specified under paragraph (b)(6)(iii) of this section has been harvested, vessels fishing under a Regular B DAS, or that complete a trip under a Regular B DAS, will be prohibited from retaining white hake.

(H) *Closure of Regular B DAS program and quarterly DAS limit.* Unless otherwise closed as a result of the harvest of all incidental TACs as described in paragraph (b)(6)(iv)(G) of this section, or as result of an action by the Regional Administrator under paragraph (b)(6)(vi) of this section, the use of Regular B DAS shall, through rulemaking consistent with the Administrative Procedure Act, be prohibited when 1,000 Regular B DAS have been used during the calendar quarter, in accordance with § 648.82(e)(3).

(I) *Reporting requirements.* The owner or operator of a NE multispecies DAS vessel must submit catch reports via VMS in accordance with instructions provided by the Regional Administrator, for each day fished when declared into the Regular B DAS Pilot Program. The reports must be submitted in 24-hr intervals for each day, beginning at 0000 hr and ending at 2400 hr. The reports must be submitted by 0900 hr of the following day. For vessels that have declared into the Regular B DAS Pilot Program in accordance with paragraph (b)(6)(iv)(C) of this section, the reports must include at least the following information: Statistical area fished, total weight (lb/kg) of cod, yellowtail flounder, American plaice, white hake, winter flounder, and witch flounder kept; and total weight (lb/kg) of cod, yellowtail flounder, American plaice, white hake, winter flounder, and witch flounder discarded. All NE multispecies permit holders will be sent a letter informing them of the statistical areas.

(v) *Definition of incidental TAC stock areas.* For the purposes of the Regular B DAS Pilot Program, the species stock areas associated with the incidental TACs are defined below. Copies

§ 648.85

of a chart depicting these areas are available from the Regional Administrator upon request.

(A) *GOM cod stock area*. The GOM cod stock area is the area defined by straight lines connecting the following points in the order stated:

GULF OF MAINE COD STOCK AREA

Point	N. Lat.	W. Long.
GOM1	(1)	70° 00'
GOM2	42° 20'	70° 00'
GOM3	42° 20'	67° 40'
GOM4	43° 50'	67° 40'
GOM5	43° 50'	66° 50'
GOM6	44° 20'	66° 50'
GOM7	44° 20'	67° 00'
GOM8	(2)	67° 00'

(1) Intersection of the north-facing coastline of Cape Cod, MA, and 70° 00' W. Long.

(2) Intersection of the south-facing Maine coastline and 67° 00' W. Long.

(B) *GB cod stock area*. The GB cod stock area is the area defined by straight lines connecting the following points in the order stated:

GEORGES BANK COD STOCK AREA

Point	N. Lat.	W. Long.
GB1	(1)	70° 00'
GB2	42° 20'	70° 00'
GB3	42° 20'	66° 00'
GB4	42° 10'	66° 00'
GB5	42° 10'	65° 50'
GB6	42° 00'	65° 50'
GB7	42° 00'	65° 40'
GB8	40° 30'	65° 40'
GB9	39° 00'	65° 40'
GB10	39° 00'	70° 00'
GB11	35° 00'	70° 0'
GB12	35° 00'	(2)

(1) Intersection of the north-facing coastline of Cape Cod, MA, and 70° 00' W. Long.

(2) Intersection of east-facing coastline of Outer Banks, NC, and 35° 00' N. Lat.

(C) *CC/GOM yellowtail flounder stock area*. The CC/GOM yellowtail flounder stock area is the area defined by straight lines connecting the following points in the order stated:

CAPE COD/GULF OF MAINE YELLOWTAIL FLOUNDER STOCK AREA

Point	N. Lat.	W. Long.
CCGOM1	(1)	70° 00'
CCGOM2	41° 20'	(2)
CCGOM3	41° 20'	69° 50'
CCGOM4	41° 10'	69° 50'
CCGOM5	41° 10'	69° 30'
CCGOM6	41° 00'	69° 30'
CCGOM7	41° 00'	68° 50'
CCGOM8	42° 20'	68° 50'
CCGOM9	42° 20'	67° 40'

50 CFR Ch. VI (10–1–05 Edition)

CAPE COD/GULF OF MAINE YELLOWTAIL FLOUNDER STOCK AREA—Continued

Point	N. Lat.	W. Long.
CCGOM10	43° 50'	67° 40'
CCGOM11	43° 50'	66° 50'
CCGOM12	44° 20'	66° 50'
CCGOM13	44° 20'	67° 00'
CCGOM14	(3)	67° 00'

(1) Intersection of south-facing coastline of Cape Cod, MA, and 70° 00' W. Long.

(2) Intersection of east-facing coastline of Nantucket, MA, and 41° 20' N. Lat.

(3) Intersection of south-facing Maine coastline and 67° 00' W. Long.

(D) *American plaice stock area*. The American plaice stock area is the area defined by straight lines connecting the following points in the order stated:

AMERICAN PLAICE STOCK AREA

Point	N. Lat.	W. Long.
AMP1	(1)	67° 00'
AMP2	44° 20'	67° 00'
AMP3	44° 20'	66° 50'
AMP4	43° 50'	66° 50'
AMP5	43° 50'	67° 40'
AMP6	42° 30'	67° 40'
AMP7	42° 30'	66° 00'
AMP8	42° 10'	66° 00'
AMP9	42° 10'	65° 50'
AMP10	42° 00'	65° 50'
AMP11	42° 00'	65° 40'

WF16	(2)	70° 00'
WF17	(3)	70° 00'
WF18	(4)	70° 00'

(1) Intersection of south-facing Maine coastline and 67° 00' W. Long.

(2) Intersection of south-facing coastline of Nantucket, MA, and 70° 00' W. Long.

(3) Intersection of north-facing coastline of Nantucket, MA, and 70° 00' W. Long.

(4) Intersection of south-facing coastline of Cape Cod, MA, and 70° 00' W. Long.

(vi) *Closure of the Regular B DAS Pilot Program.* The Regional Administrator, based upon information required under §§ 648.7, 648.9, 648.10, or 648.85, and any other relevant information, may, through rulemaking consistent with the Administrative Procedure Act, prohibit the use of Regular B DAS for the duration of a quarter or fishing year, if it is projected that continuation of the Regular B DAS Pilot Program would undermine the achievement of the objectives of the FMP or Regular B DAS Pilot Program.

(7) *CA I Hook Gear Haddock SAP—(i) Eligibility.* Vessels that have been issued a valid limited access NE multi-species DAS permit and that are members of the GB Cod Hook Sector (Sector) are eligible to participate in the CA I Hook Gear Haddock SAP, and may fish in the CA I Hook Gear Haddock Access Area, as described in paragraph (b)(7)(ii) of this section, for the season specified in paragraph (b)(7)(iii) of this section, provided such vessels comply with the requirements of this section, and provided the SAP is not closed according to the provisions specified under paragraphs (b)(7)(iv)(K) or (b)(7)(v) of this section. Copies of a chart depicting this area are available from the Regional Administrator upon request.

(ii) *CA I Hook Gear Haddock Access Area.* The CA I Hook Gear Haddock Access Area is the area defined by straight lines connecting the following points in the order stated:

CLOSED AREA I HOOK GEAR HADDOCK ACCESS AREA

Point	N. Lat.	W. Long.
Hook 1	41° 25.6'	69° 20.2'
Hook 2	41° 29.2'	69° 08.1'
Hook 3	41° 08.5'	68° 50.2'
Hook 4	41° 06.4'	69° 03.3'

(iii) *Season.* Eligible vessels may fish in the CA I Hook Gear Haddock SAP from October 1 through December 31.

(iv) *Program restrictions—(A) DAS use restrictions.* Vessels fishing in the CA I Hook Gear Haddock SAP may use Category A, Regular B or Reserve B DAS, in accordance with § 648.82(d)(2), unless

otherwise restricted in paragraph (b)(7)(iv) of this section. A vessel fishing in the CA I Hook Gear Haddock SAP may not initiate a DAS flip. A vessel fishing both inside and outside of the SAP on the same trip may only use a Category A DAS on such a trip, and is subject to the gear and reporting requirements specified in paragraphs (b)(7)(iv)(F) and (H), respectively.

(B) *VMS requirement.* An eligible NE multispecies DAS vessel fishing in the CA I Hook Gear Haddock SAP specified in this paragraph (b)(7) must have installed on board an operational VMS unit that meets the minimum performance criteria specified in §§648.9 and 648.10.

(C) *Observer notifications.* With the exception of the 2004 fishing year, to be eligible to participate in the CA I Hook Gear Haddock SAP, a vessel must notify the NMFS Observer Program by September 1 of its intent to participate. This notification need not include specific information about the date of the trip. For the 2004 fishing year, a vessel must notify NMFS by a date set by the Regional Administrator. All eligible NE multispecies permit holders will be sent a letter informing them of the date of this requirement. For the purposes of selecting vessels for observer deployment, a vessel must provide notice to NMFS of the vessel name; contact name for coordination of observer deployment; telephone number for contact; and date, time, and port of departure at least 72 hr prior to the beginning of any trip that it declares into the CA I Hook Gear Haddock SAP, as required in paragraph (b)(7)(iv)(B) of this section, and in accordance with instructions provided by the Regional Administrator.

(D) *Observer program funding.* A Sector vessel shall pay for an observer required by NMFS to be taken to participate in the CA I Hook Gear Haddock SAP, if the Regional Administrator determines that the funding of observers by NMFS is inadequate to provide sufficient observer coverage for the total number of vessels participating in the SAP.

(E) *VMS declaration.* To participate in the CA I Hook Gear Haddock SAP, a vessel must declare into the SAP via VMS, prior to departure from port and

provide information on the type of DAS (Category A, Regular B, or Reserve B) that it intends to fish, and whether it intends to fish outside of the SAP on the same trip, in accordance with instructions provided by the Regional Administrator. A vessel declared into the CA I Hook Gear Haddock SAP cannot fish in another SAP specified under this section on the same trip.

(F) *Gear restrictions.* A vessel fishing in the CA I Hook Gear Haddock SAP may fish with and possess on board demersal longline gear or tub trawl gear only, and is subject to the gear requirements of the Sector Operations Plan as approved under §648.87(d).

(G) *Landing limits.* A vessel fishing in the CA I Hook Gear Haddock Access Area described in paragraph (b)(7)(ii) of this section is subject to the cod landing limit in effect under the Sector's Operations Plan as approved under §648.87(d), and the haddock limits described under 648.86(a).

(H) *Reporting requirements.* The owner or operator of a vessel participating in the Sector, as described under §648.87(d)(1), and declared into the CA I Hook Gear Haddock Area, must submit daily reports to the Sector Manager, with instructions to be provided by the Sector Manager, for each day fished, when declared into the CA I Hook Gear Haddock Area. For all vessels that have declared into the CA I Hook Gear Haddock Access Area in accordance with paragraph (b)(7)(iv)(B) of this section, the reports must include at least the following information: Total weight (lb/kg) of cod and haddock kept, and total weight (lb/kg) of cod and haddock discarded. The Sector Manager will provide daily reports to NMFS containing the including at least the following information: Total weight (lb/kg) of cod and haddock kept, and total weight (lb/kg) of cod and haddock discarded.

(I) *Incidental cod TAC.* There is no incidental cod TAC specified for Sector vessels fishing in the CA I Hook Gear Haddock SAP. All cod caught by Sector vessels fishing in the SAP count toward the Sector's annual GB cod TAC, specified in §648.87(d)(1)(iii).

Fishery Conservation and Management

§ 648.85

(J) *Haddock TAC.* The maximum amount of haddock (landings and discards) that may be harvested in a fishing year from the CA I Hook Gear Haddock Access Area by eligible vessels is 1,000 mt. Haddock harvested under either a Category A or a Category B DAS count toward this TAC.

(K) *Mandatory closure of CA I Hook Gear Haddock Access Area.* When the Regional Administrator projects that the haddock TAC specified in paragraph (b)(7)(iv)(J) of this section has been caught by vessels fishing in this SAP, NMFS shall close, through rulemaking consistent with the Administrative Procedure Act, the CA I Hook Gear Haddock Access Area to all eligible NE multispecies vessels.

(v) *General Closure of the CA I Hook Gear Haddock Access Area.* The Regional Administrator, based upon information required under §§ 648.7, 648.9, 648.10, or 648.85, and any other relevant information, may, through rule-making consistent with the Administrative Procedure Act, close the CA I Hook Gear Haddock Access Area for the duration of the season, if it is projected that continuation of the SAP would undermine the achievement of the objectives of the FMP or the CA I Hook Gear Haddock SAP.

(8) *Eastern U.S./Canada Haddock SAP Pilot Program—(i) Eligibility.* Vessels issued a valid limited access NE multispecies DAS permit, and fishing with trawl gear as specified in paragraph (b)(8)(v)(E) of this section, are eligible to participate in the Eastern U.S./Canada Haddock SAP Pilot Program, and may fish in the Eastern U.S./Canada Haddock SAP Area, as described in paragraph (b)(8)(ii) of this section, during the program duration and season specified in paragraphs (b)(8)(iii) and (iv) of this section, provided such vessels comply with the requirements of this section, and provided the SAP is not closed according to the provisions specified in paragraphs (b)(8)(v)(K) or (L) of this section. Copies of a chart depicting this area are available from the Regional Administrator upon request.

(ii) *Eastern U.S./Canada Haddock SAP Area.* The Eastern U.S./Canada Haddock SAP Area is the area defined by straight lines connecting the following points in the order stated:

EASTERN U.S./CANADA HADDOCK SAP AREA

Point	N. Lat.	W. Long.
CAII3	42° 22'	67° 20' ⁽¹⁾
SAP1	42° 20'	67° 20'
SAP2	42° 20'	67° 40'
SAP3	41° 10'	67° 40'
SAP4	41° 10'	67° 20'
SAP5	42° 10'	67° 20'
SAP6	42° 10'	67° 10'
CAII3	42° 22'	67° 20' ⁽¹⁾

⁽¹⁾ U.S./Canada maritime boundary.

(iii) *Duration of program.* The Eastern U.S./Canada Haddock SAP Pilot Program is in effect from November 19, 2004 through November 20, 2006.

(iv) *Season.* Eligible vessels may fish in the Eastern U.S./Canada Haddock SAP Pilot Program from May 1 through December 31.

(v) *Program restrictions—(A) DAS use restrictions.* A vessel fishing in the Eastern U.S./Canada Haddock SAP Pilot Program may elect to fish under a Category A, or Category B DAS, in accordance with § 648.82(d)(2)(i)(A) and the restrictions of this paragraph (b)(8)(v)(A).

(1) If fishing under a Category B DAS, a vessel is required to comply with the no discarding and DAS flip requirements specified in paragraph (b)(8)(v)(I) of this section, and the minimum Category A DAS requirements of paragraph (b)(8)(v)(J) of this section.

(2) A vessel that is declared into the Eastern U.S./Canada Haddock SAP Pilot Area, described in paragraph (b)(8)(ii) of this section, may fish, on the same trip, in the Eastern U.S./Canada Haddock SAP Area and in the CA II Yellowtail Flounder Access Area, described in paragraph (b)(3)(ii) of this section, under either a Category A DAS or a Category B DAS.

(3) A vessel may choose, on the same trip, to fish in either/both the Eastern U.S./Canada Haddock SAP Area and the CA II Yellowtail Flounder Access Area, and in that portion of the Eastern U.S./Canada Area described in paragraph (a)(1)(ii) of this section that lies outside of these two SAPs, provided the vessel fishes under a Category A DAS and abides by the VMS restrictions of paragraph (b)(8)(v)(D) of this section. The use of a Category A DAS is required because the use of Category B DAS is not allowed in that portion of the Eastern U.S./Canada Area that lies outside of SAPs.

(4) Vessels that elect to fish in multiple areas, as described in this paragraph (b)(8)(v)(A), must fish under the most restrictive trip provisions of any of the areas fished for the entire trip.

(B) *VMS requirement.* A NE multispecies DAS vessel fishing in the Eastern U.S./Canada Haddock SAP Area specified under paragraph (b)(8)(ii) of this section, must have installed on board an operational VMS unit that meets the minimum performance criteria specified in §§ 648.9 and 648.10.

(C) *Observer notifications.* For the purposes of selecting vessels for observer deployment, a vessel must provide notice to NMFS of the vessel name; contact name for coordination of observer deployment; telephone number for contact; areas to be fished; and date, time, and port of departure at least 72 hr prior to the beginning of any trip which it declares into the Eastern U.S./Canada Haddock SAP Area specified in paragraph (b)(8)(ii) of this section, as required under paragraph (b)(8)(v)(D) of this section, and in accordance with instructions provided by the Regional Administrator.

(D) *VMS declaration.* Prior to departure from port, a vessel intending to participate in the Eastern U.S./Canada Haddock SAP must declare into the SAP via VMS and provide information on the type of DAS (Category A, Regular B, or Reserve B) that it intends to fish, and on the areas within the Eastern U.S./Canada Area that it intends to fish, in accordance with paragraph (b)(8)(v)(A) of this section and instructions provided by the Regional Administrator.

(E) *Gear restrictions.* A NE multispecies vessel fishing in the Eastern U.S./Canada Haddock SAP Pilot Program must use one of the haddock separator trawl nets authorized for the Eastern U.S./Canada Area, as specified in paragraph (a)(3)(iii)(A) of this section. No other type of fishing gear may be on the vessel during a trip to the Eastern U.S./Canada Haddock SAP Area, with the exception of a flounder net as described in paragraph (a)(3)(iii) of this section, provided the flounder net is stowed in accordance with § 648.23(b).

(F) *Landing limits.* Unless otherwise restricted, NE multispecies vessel fishing any portion of a trip in the Eastern

U.S./Canada Haddock SAP Pilot Program may not fish for, possess, or land more than 1,000 lb (453.6 kg) of cod per trip, regardless of trip length. A NE multispecies vessel fishing in the Eastern U.S./Canada Haddock SAP Pilot Program is subject to the haddock requirements described under § 648.86(a), unless further restricted under paragraph (a)(3)(iv) of this section.

(G) *Reporting requirements.* The owner or operator of a vessel declared into the Eastern U.S./Canada Haddock SAP, as described in paragraph (b)(8) of this section, must submit reports in accordance with the reporting requirements described in paragraph (a)(3)(v) of this section.

(H) *Incidental cod TAC.* The maximum amount of GB cod (landings and discards) that may be caught from the Eastern U.S./Canada Haddock SAP Area in a fishing year, by vessels fishing under a Category B DAS, as authorized in paragraph (b)(8)(v)(A) of this section, is the amount specified in paragraph (b)(5)(i)(B) of this section.

(I) *No discard provision and DAS flips.* A vessel fishing in the Eastern U.S./Canada Haddock SAP Pilot Program under a Category B DAS may not discard legal-sized cod. If a vessel fishing under a Category B DAS harvests and brings on board more legal-sized cod than the landing limit specified under paragraph (b)(8)(v)(F) of this section, the vessel operator must notify NMFS prior to crossing the demarcation line via VMS on its return trip to port to initiate a DAS flip to Category A DAS. Once this notification has been received by NMFS, the vessel will automatically be switched to fishing under a Category A DAS. For a vessel that notifies NMFS of a DAS flip, the Category B DAS that have accrued between the time the vessel started accruing Category B DAS at the beginning of the trip (i.e., at the time the vessel crossed into the Eastern U.S./Canada Area at the beginning of the trip) and the time the vessel declared its DAS flip will be accrued as Category A DAS, and not Category B DAS. Once such vessel has initiated the DAS flip and is fishing under a Category A DAS, the prohibition on discarding legal-sized cod no longer applies.

Fishery Conservation and Management

§ 648.85

(J) *Minimum Category A DAS.* To fish under a Category B DAS, the number of Category B DAS that can be used on a trip cannot exceed the number of available Category A DAS the vessel has at the start of the trip.

(K) *Mandatory closure of Eastern U.S./Canada Haddock SAP Pilot Program.* When the Regional Administrator projects that the TAC allocation specified in paragraph (b)(8)(v)(H) of this section has been caught by vessels fishing under Category B DAS, NMFS shall prohibit the use of Category B DAS in the Eastern U.S./Canada Haddock SAP Pilot Program, through notice in the FEDERAL REGISTER, consistent with the Administrative Procedure Act. In addition, the closure regulations described in paragraph (a)(3)(iv)(E) of this section shall apply to the Eastern U.S./Canada Haddock SAP Pilot Program.

(L) *General closure of the Eastern U.S./Canada Haddock SAP Area.* The Regional Administrator, based upon information required under §§ 648.7, 648.9, 648.10, or 648.85, and any other relevant information may, through rulemaking consistent with the Administrative Procedure Act, close the Eastern U.S./Canada Haddock SAP Area for the duration of the season, if it is projected that continuation of the Eastern U.S./Canada Haddock SAP Pilot Program would undermine the achievement of the objectives of the FMP or the Eastern U.S./Canada Haddock SAP Pilot Program.

(c) *Scallop fishery closed area access program.* Limited access scallop vessels operating under the Sea Scallop Area Access Program, as defined in § 648.59, and fishing in accordance with the regulations at § 648.60 may possess and land up to 1,000 lb (453.6 kg) of all NE multispecies combined, as provided in § 648.60(a)(5)(ii), unless otherwise restricted in this section.

(1) *Yellowtail flounder bycatch TAC allocation.* An amount of yellowtail flounder equal to 10 percent of the total yellowtail flounder TAC for each of the stock areas specified in paragraphs (c)(1)(i) and (c)(1)(ii) of this section may be harvested by scallop vessels subject to the restrictions of this paragraph. Limited access scallop vessels enrolled in the Sea Scallop Area Access Program and fishing within the

Area Access areas defined at § 648.59(b) through (d) may harvest yellowtail flounder up to 9.8 percent of the applicable yellowtail flounder TAC. Scallop vessels participating in approved research under the process described in § 648.56, and fishing in the Access Areas specified in § 648.59(b) through (d), may harvest 0.2 percent of the applicable yellowtail flounder TAC. The amount of yellowtail flounder that may be harvested in the 2004 through the 2006 fishing years under this section shall be specified in a small entity compliance guide. The yellowtail flounder TAC set-asides for research are specified in § 648.60(e)(3).

(i) *SNE/MA yellowtail flounder.* Limited access scallop vessels may harvest an amount of yellowtail flounder equal to 9.8 percent of the SNE/MA yellowtail flounder TAC from the Nantucket Lightship Closed Area Sea Scallop Access Area for each fishing year, unless otherwise prohibited under paragraph (c)(3) of this section. An amount of yellowtail flounder equal to 0.2 percent of the SNE/MA yellowtail flounder bycatch TAC, as specified in paragraph (c)(1) of this section, is set aside to allow for the harvest of yellowtail flounder during research approved under the scallop research program specified in § 648.56 and conducted in the Access Areas specified in § 648.59(b) through (d).

(ii) *GB yellowtail flounder.* Limited access scallop vessels may harvest an amount of yellowtail flounder up to 9.8 percent of the GB yellowtail flounder TAC from the Closed Area I and Closed Area II Sea Scallop Access Areas, combined, for each fishing year, unless otherwise prohibited under paragraph (c)(3) of this section. An amount of yellowtail flounder equal to 0.2 percent of the GB yellowtail flounder TAC, as specified in paragraph (c)(1) of this section, is set aside to allow for the harvest of yellowtail flounder during research approved under the scallop research program specified in § 648.56.

(2) *Adjustments to the yellowtail flounder TAC allocation.* If, on or after December 1 of each year, information is available to make an accurate projection of yellowtail catch through the end of the fishing year, and if the Regional Administrator projects that the

§ 648.85

50 CFR Ch. VI (10–1–05 Edition)

total GB yellowtail flounder TAC for the NE multispecies fishery specified at § 648.85(a)(2) will not be harvested by the end of the fishing year, and if the catch of yellowtail flounder in the Sea Scallop Area Access Program is below 10 percent of the GB yellowtail flounder bycatch TAC specified in paragraph (c)(1) of this section, the Regional Administrator may, through rulemaking consistent with the Administrative Procedure Act, increase the yellowtail flounder bycatch TAC allocated to vessels participating in the Sea Scallop Area Access Program above 10 percent, provided that such increase will not result in exceeding the total GB yellowtail flounder TAC specified in § 648.85(a)(2).

(3) *Possession restriction and closure when yellowtail flounder TAC has been harvested.* (i) If the Regional Administrator determines that the GB yellowtail flounder TAC specified for the U.S./Canada Management Area under paragraph (a)(2) of this section has been harvested or is projected to be harvested, and notification has been published in the FEDERAL REGISTER, pursuant to paragraph (a)(3)(iv)(C)(3) of this section, but the yellowtail flounder bycatch TAC allocation for the GB stock specified under paragraph (c)(1)(ii) of this section has not been harvested, scallop vessels may continue to fish in the Sea Scallop Area Access Program, but may not retain or land yellowtail flounder, until the yellowtail flounder bycatch TAC is caught, as specified in paragraph (c)(3)(ii) of this section. All catch of yellowtail flounder must continue to be reported by scallop vessels fishing in Access Areas as required under § 648.60.

(ii) If the Regional Administrator determines that the yellowtail flounder bycatch TAC allocation for the GB stock specified under paragraph (c)(1)(ii), of this section has been or is projected to be harvested, scallop vessels may not fish within the Closed Area I and II Access Areas for the remainder of the fishing year. The Regional Administrator shall publish notification in the FEDERAL REGISTER, in accordance with the Administrative Procedure Act, to notify vessels that they may no longer fish within the

Closed Area I and II Access Areas for the remainder of the fishing year.

[69 FR 22975, Apr. 27, 2004, as amended at 69 FR 32900, June 14, 2004; 69 FR 41026, July 7, 2004; 69 FR 63480, Nov. 2, 2004; 69 FR 67798, Nov. 19, 2004; 70 FR 31341, June 1, 2005]

EFFECTIVE DATE NOTE: At 70 FR 54307, Sept. 14, 2005, § 648.85 was amended by revising paragraphs (a) introductory text and paragraphs (b)(5)(ii), (b)(7)(i), (b)(7)(iii), (b)(7)(iv), (b)(7)(v), (b)(8)(v)(A)(2), (b)(8)(v)(A)(3), (b)(8)(v)(B), (b)(8)(v)(C), (b)(8)(v)(E), (b)(8)(v)(H), and (b)(8)(v)(L), and adding paragraph (b)(7)(vi), effective Oct. 14, 2005. For the convenience of the user, the revised and added text follows:

§ 648.85 Special management programs.

(a) *U.S./Canada Resource Sharing Understanding.* No NE multispecies fishing vessel, or person on such vessel, may enter, fish in, or be in the U.S./Canada Resource Sharing Understanding Management Areas (U.S./Canada Management Areas), as defined in paragraph (a)(1) of this section, unless the vessel is fishing in accordance with the restrictions and conditions of this section. These restrictions do not preclude fishing under an approved Special Access Program specified under paragraph (b) of this section.

* * * * *

(b) * * *

(5) * * *

(ii) *GB cod.* The incidental TAC for GB cod specified in this paragraph (b)(5), shall be subdivided as follows: 50 percent to the Regular B DAS Pilot Program, described in paragraph (b)(6) of this section; 16 percent to the CA I Hook Gear Haddock SAP, described in paragraph (b)(7) of this section; and 34 percent to the Eastern U.S./Canada Haddock SAP Pilot Program, described in paragraph (b)(8) of this section.

* * * * *

(7) * * *

(i) *Eligibility.* Vessels issued a valid limited access NE multispecies DAS permit are eligible to participate in the CA I Hook Gear Haddock SAP, and may fish in the CA I Hook Gear Haddock Access Area, as described in paragraph (b)(7)(ii) of this section, for the season specified in paragraph (b)(7)(iii) of this section, provided such vessels comply with the requirements of this section, and provided the SAP is not closed according to the provisions specified under paragraph (b)(7)(iv)(I) or (b)(7)(vi)(F) of this section. Copies of a chart depicting this area are

Fishery Conservation and Management

§ 648.85

available from the Regional Administrator upon request.

* * * * *

(iii) *Season.* The overall season for the CA I Hook Gear Haddock SAP is October 1 through December 31, which is divided into two participation periods, one for Sector and one for non-Sector vessels. For the 2005 fishing year, the only participation period in which eligible Sector vessels may fish in the CA I Hook Gear Haddock SAP is from October 1 through November 15. For the 2005 fishing year, the only participation period in which eligible non-Sector vessels may fish in the SAP is from November 16 through December 31. For the 2006 fishing year and beyond, these participation periods shall alternate between Sector and non-Sector vessels such that, in fishing year 2006, the participation period for non-Sector vessels is October 1 through November 15, and the participation period for Sector vessels is November 16 through December 31. The Regional Administrator may adjust the start date of the second participation period prior to November 16 if the haddock TAC for the first participation period specified in paragraph (b)(7)(iv)(G) of this section is harvested prior to November 15.

(iv) *General program restrictions.* General program restrictions specified in this paragraph (b)(7)(iv) apply to all eligible vessels as specified in paragraph (b)(7)(i) of this section. Further program restrictions specific to Sector and non-Sector vessels are specified in paragraphs (b)(7)(iii), (v), and (vi) of this section.

(A) *DAS use restrictions.* A vessel fishing in the CA I Hook Gear Haddock SAP may not initiate a DAS flip. A vessel is prohibited from fishing in the CA I Hook Gear Haddock SAP while making a trip under the Regular B DAS Pilot Program described under paragraph (b)(6) of this section.

(B) *VMS requirement.* An eligible NE multispecies DAS vessel fishing in the CA I Hook Gear Haddock SAP specified in this paragraph (b)(7) must have installed on board an operational VMS unit that meets the minimum performance criteria specified in §§ 648.9 and 648.10.

(C) *Observer notifications.* Starting in the 2006 fishing year, to be eligible to participate in the CA I Hook Gear Haddock SAP, a vessel must notify the NMFS Observer Program by September 1 of its intent to participate in that year. For the 2005 fishing year, for non-Sector vessels to be eligible to participate, non-Sector vessels must notify the NMFS Observer Program by October 24. This notification need not include specific information about the date of the trip. For the purpose of selecting vessels for observer deployment, a vessel must provide notice to NMFS of the vessel name; contact name for coordination

of observer deployment; telephone number for contact; and date, time, and port of departure at least 72 hours prior to the beginning of any trip that it declares into the CA I Hook Gear Haddock SAP, as required in paragraph (b)(7)(iv)(D) of this section, and in accordance with instructions provided by the Regional Administrator.

(D) *VMS declaration.* Prior to departure from port, a vessel intending to participate in the CA I Hook Gear Haddock SAP must declare into the SAP via VMS, and indicate the type of DAS that it intends to fish. A vessel declared into the CA I Hook Gear Haddock SAP may fish only on a declared trip in the CA I Hook Gear Haddock Special Access Area described under paragraph (b)(7)(ii) of this section.

(E) *Gear restrictions.* A vessel declared into and fishing in the CA I Hook Gear Haddock SAP may fish with and possess on board demersal longline gear or tub trawl gear only, unless further restricted as specified under paragraph (b)(7)(v)(B) of this section.

(F) *Haddock TAC.* The maximum total amount of haddock that may be caught (landings and discards) in the CA I Hook Gear Haddock SAP Area in any fishing year is 1,000 mt. The maximum amount of haddock that may be caught is divided between the two participation periods as follows: 500 mt for the October 1 - November 15 participation period, and 500 mt for the November 16 - December 31 participation period, as specified in paragraph (b)(7)(iii) of this section. The Regional Administrator may adjust the 500-mt quota for the second participation period to account for under- or over-harvest of the 500-mt haddock quota (landings and discards) that occurred in the first participation period, not to exceed the overall haddock TAC specified in this paragraph (b)(7)(iv)(F).

(G) *Trip restrictions.* A vessel is prohibited from deploying fishing gear outside of the CA I Hook Gear Haddock SAP Area on the same fishing trip on which it is declared into the CA I Hook Gear Haddock SAP.

(H) *Landing limits.* For all eligible vessels declared into the CA I Hook Gear Haddock SAP described in paragraph (b)(7)(i) of this section, landing limits for NE multispecies other than cod, which are specified at paragraphs (b)(7)(v)(C) and (b)(7)(vi)(C) of this section, are as specified at § 648.86.

(I) *Mandatory closure of CA I Hook Gear Haddock Access Area.* When the Regional Administrator determines that the haddock TAC specified in paragraph (b)(7)(iv)(F) of this section has been caught, NMFS shall close, through rulemaking consistent with the Administrative Procedure Act, the CA I Hook Gear Haddock SAP Area as specified in paragraph (b)(7)(ii) of this section, to all eligible vessels.

(v) *Sector vessel program restrictions.* In addition to the general program restrictions

§ 648.85

50 CFR Ch. VI (10–1–05 Edition)

specified at paragraph (b)(7)(iv) of this section, the restrictions specified in this paragraph (b)(7)(v) apply only to Sector vessels declared into the CA I Hook Gear Haddock SAP.

(A) *DAS use restrictions.* Sector vessels fishing in the CA I Hook Gear Haddock SAP may use Category A, Regular B, or Reserve B DAS, in accordance with § 648.82(d).

(B) *Gear restrictions.* A vessel enrolled in the Sector is subject to the gear requirements of the Sector Operations Plan as approved under § 648.87(d).

(C) *Landing limits.* A Sector vessel declared into the CA I Hook Gear Haddock SAP described in paragraph (b)(7)(i) of this section is subject to the cod landing limit in effect under the Sector's Operations Plan as approved under § 648.87(d).

(D) *Reporting requirements.* The owner or operator of a Sector vessel declared into the CA I Hook Gear Haddock SAP must submit reports to the Sector Manager, with instructions to be provided by the Sector Manager, for each day fished in the CA I Hook Gear Haddock SAP Area. The Sector Manager will provide daily reports to NMFS, including at least the following information: Total weight (lb/kg) of cod and haddock kept, and total weight (lb/kg) of cod and haddock discarded.

(E) *GB cod incidental catch TAC.* There is no GB cod incidental catch TAC specified for Sector vessels declared into the CA I Hook Gear Haddock SAP. All cod caught by Sector vessels fishing in the SAP count toward the Sector's annual GB cod TAC, specified in § 648.87(d)(1)(iii).

(vi) *Non-Sector vessel program restrictions.* In addition to the general program restrictions specified in paragraph (b)(7)(iv) of this section, the restrictions specified in this paragraph (b)(7)(vi) apply only to non-Sector vessels declared into the CA I Hook Gear Haddock SAP.

(A) *DAS use restrictions.* Non-Sector vessels fishing in the CA I Hook Gear Haddock SAP may use Regular B or Reserve B DAS, in accordance with § 648.82(d)(2)(i)(A) and (d)(2)(ii)(A). A non-Sector vessel is prohibited from using A DAS when declared into the SAP.

(B) *Gear restrictions.* A non-Sector vessel declared into the CA I Hook Gear Haddock SAP is exempt from the maximum number of hooks restriction specified in § 648.80(a)(4)(v).

(C) *Landing limits.* A non-Sector vessel declared into the CA I Hook Gear Haddock SAP described in paragraph (b)(7)(i) of this section may not land, fish for, or possess on board more than 1,000 lb (453.6 kg) of cod per trip. A non-Sector vessel is not permitted to discard legal-sized cod prior to reaching the landing limit, and is required to end its trip if the cod trip limit is achieved or exceeded.

(D) *Reporting requirements.* The owner or operator of a non-Sector vessel declared into the CA I Hook Gear Haddock SAP must submit reports via VMS, in accordance with instructions to be provided by the Regional Administrator, for each day fished in the CA I Hook Gear Haddock SAP Area. The reports must be submitted in 24-hr intervals for each day fished, beginning at 0000 hr and ending at 2400 hr. The reports must be submitted by 0900 hr of the day following fishing. The reports must include at least the following information: Total weight (lb/kg) of cod and haddock kept, and total weight (lb/kg) of cod and haddock discarded.

(E) *GB cod incidental catch TAC.* The maximum amount of GB cod (landings and discards) that may be cumulatively caught by non-Sector vessels from the CA I Hook Gear Haddock Access Area in a fishing year is the amount specified under paragraph (b)(5)(ii) of this section.

(F) *Mandatory closure of CA I Hook Gear Haddock Access Area due to catch of GB cod incidental catch TAC.* When the Regional Administrator determines that the GB cod incidental catch TAC specified in paragraph (b)(7)(vi)(E) of this section has been caught, NMFS shall close, through rulemaking consistent with the Administrative Procedure Act, the CA I Hook Gear Haddock Access Area to all non-Sector fishing vessels.

(v) ***

(A) ***

(2) A vessel that is declared into the Eastern U.S./Canada Haddock SAP Pilot Program, described in paragraph (b)(8)(i) of this section, may fish, on the same trip, in the Eastern U.S./Canada Haddock SAP Area and in the CA II Yellowtail Flounder Access Area, described in paragraph (b)(3)(ii) of this section, under either a Category A DAS or a Category B DAS.

(3) A vessel may choose, on the same trip, to fish in either/both the Eastern U.S./Canada Haddock SAP Program and the CA II Yellowtail Flounder Access Area, and in that portion of the Eastern U.S./Canada Area described in paragraph (a)(1)(ii) of this section that lies outside of these two SAPs, provided the vessel fishes under a Category A DAS and abides by the VMS restrictions of paragraph (b)(8)(v)(D) of this section.

* * * * *

(B) *VMS requirement.* A NE multispecies DAS vessel fishing in the Eastern U.S./Canada Haddock SAP Program specified under paragraph (b)(8)(i) of this section, must have installed on board an operational VMS unit that meets the minimum performance criteria specified in §§ 648.9 and 648.10.

(C) *Observer notifications.* For the purpose of selecting vessels for observer deployment, a vessel must provide notice to NMFS of the

Fishery Conservation and Management

§ 648.86

vessel name; contact name for coordination of observer deployment; telephone number for contact; areas to be fished; and date, time, and port of departure at least 72 hours prior to the beginning of any trip that it declares into the Eastern U.S./Canada Haddock SAP Program specified in paragraph (b)(8)(i) of this section, as required under paragraph (b)(8)(v)(D) of this section, and in accordance with instructions provided by the Regional Administrator.

* * * * *

(E) *Gear restrictions.* A NE multispecies vessel fishing in the Eastern U.S./Canada Haddock SAP Pilot Program must use one of the haddock separator trawl nets authorized for the Eastern U.S./Canada Area, as specified in paragraph (a)(3)(iii)(A) of this section. No other type of fishing gear may be on the vessel when participating on a trip in the Eastern U.S./Canada Haddock SAP Program, with the exception of a flounder net as described in paragraph (a)(3)(iii) of this section, provided the flounder net is stowed in accordance with § 648.23(b).

* * * * *

(H) *Incidental cod TAC.* The maximum amount of GB cod (landings and discards) that may be caught when fishing in the Eastern U.S./Canada Haddock SAP Program in a fishing year, by vessels fishing under a Category B DAS, as authorized in paragraph (b)(8)(v)(A) of this section, is the amount specified in paragraph (b)(5)(ii) of this section.

* * * * *

(L) *General closure of the Eastern U.S./Canada Haddock SAP Area.* The Regional Administrator, based upon information required under § 648.7, 648.9, 648.10, or 648.85, and any other relevant information may, through rulemaking consistent with the Administrative Procedure Act, close the Eastern U.S./Canada Haddock SAP Pilot Program for the duration of the season, if it is determined that continuation of the Eastern U.S./Canada Haddock SAP Pilot Program would undermine the achievement of the objectives of the FMP or the Eastern U.S./Canada Haddock SAP Pilot Program.

* * * * *

§ 648.86 Multispecies possession restrictions.

Except as provided in § 648.17, the following possession restrictions apply:

(a) *Haddock*—(1) *NE multispecies DAS vessels.* (i) From May 1 through Sep-

tember 30, except as provided in paragraph (a)(1)(iii) of this section, or unless otherwise restricted under § 648.85, a vessel that fishes under an NE multispecies DAS may land up to 3,000 lb (1,360.8 kg) of haddock per DAS fished, or any part of a DAS fished, up to 30,000 lb (13,608 kg) per trip, provided it has at least one standard tote on board. Haddock on board a vessel subject to this landing limit must be separated from other species of fish and stored so as to be readily available for inspection.

(ii) From October 1 through April 30, except as provided in paragraph (a)(1)(iii) of this section, or unless otherwise restricted under § 648.85, a vessel that fishes under an NE multispecies DAS may land up to 5,000 lb (2,268 kg) of haddock per DAS fished, or any part of a DAS fished, up to 50,000 lb (22,680 kg) per trip, provided it has at least one standard tote on board. Haddock on board a vessel subject to this landing limit must be separated from other species of fish and stored so as to be readily available for inspection.

(iii) *Adjustments*—(A) *Adjustment to the haddock trip limit to prevent exceeding the target TAC.* At any time during the fishing year, if the Regional Administrator projects that the target TAC for haddock will be exceeded, NMFS may adjust, through publication of a notification in the FEDERAL REGISTER, the trip limit per DAS and/or the maximum trip limit to an amount that the Regional Administrator determines will prevent exceeding the target TAC.

(B) *Adjustment of the haddock trip limit to allow harvesting of up to 75 percent of the target TAC.* At any time during the fishing year, if the Regional Administrator projects that less than 75 percent of the target TAC for haddock will be harvested by the end of the fishing year, NMFS may adjust or eliminate, through publication of a notification in the FEDERAL REGISTER, the trip limit per DAS and/or the maximum trip limit to an amount, including elimination of the per day and/or per trip limit, that is determined to be sufficient to allow harvesting of at least 75 percent of the target TAC, but not to exceed the target TAC.

(2) *Scallop dredge vessels.* (i) No person owning or operating a scallop dredge

vessel issued a NE multispecies permit may land haddock from, or possess haddock on board, a scallop dredge vessel from January 1 through June 30.

(ii) No person owning or operating a scallop dredge vessel without an NE multispecies permit may possess haddock in, or harvested from, the EEZ from January 1 through June 30.

(iii) Unless otherwise authorized by the Regional Administrator as specified in paragraph (f) of this section, scallop dredge vessels or persons owning or operating a scallop dredge vessel that is fishing under a scallop DAS allocated under § 648.53 may land or possess on board up to 300 lb (136.1 kg) of haddock, except as specified in § 648.88(c), provided that the vessel has at least one standard tote on board. This restriction does not apply to vessels issued NE multispecies Combination Vessel permits that are fishing under a multispecies DAS. Haddock on board a vessel subject to this possession limit must be separated from other species of fish and stored so as to be readily available for inspection.

(3)(i) *Incidental catch allowance for herring Category 1 vessels.* Category 1 herring vessels defined in § 648.2 may possess and land up to 1,000 lb (454 kg) of haddock per trip, subject to the requirements specified in § 648.80(d) and (e).

(ii) *Bycatch cap.* (A) When the Regional Administrator has determined that 270,000 lb (122,470 kg) of observed and reported haddock have been landed, NMFS shall prohibit Category 1 herring vessels from entering or fishing in the GB haddock stock area defined by the coordinates specified in paragraph (b)(6)(v)(B) of this section for GB cod through a notice in the FEDERAL REGISTER consistent with rulemaking requirements of the Administrative Procedure Act. In making this determination, the Regional Administrator shall use only haddock landings observed by NMFS approved observers and law enforcement officials, and reports of haddock bycatch submitted by vessels and dealers pursuant to the reporting requirements of this part.

(B) Upon the effective date of prohibiting Category 1 herring vessels from entering or fishing in the GB haddock stock area as described in paragraph

(a)(3)(ii)(A) of this section, the haddock possession limit is reduced to 0 lb (0 kg) for all Category 1 herring vessels.

(b) *Cod*—(1) *GOM cod landing limit.* (i) Except as provided in paragraphs (b)(1)(ii) and (b)(4) of this section, or unless otherwise restricted under § 648.85, a vessel fishing under a NE multispecies DAS may land only up to 800 lb (362.9 kg) of cod during the first 24-hr period after the vessel has started a trip on which cod were landed (*e.g.*, a vessel that starts a trip at 6 a.m. may call out of the DAS program at 11 a.m. and land up to 800 lb (362.9 kg), but the vessel cannot land any more cod on a subsequent trip until at least 6 a.m. on the following day). For each trip longer than 24 hr, a vessel may land up to an additional 800 lb (362.9 kg) for each additional 24-hr block of DAS fished, or part of an additional 24-hr block of DAS fished, up to a maximum of 4,000 lb (1,818.2 kg) per trip (*e.g.*, a vessel that has been called into the DAS program for more than 24 hr, but less than 48 hr, may land up to, but no more than, 1,600 lb (725.7 kg) of cod). A vessel that has been called into only part of an additional 24-hr block of a DAS (*e.g.*, a vessel that has been called into the DAS program for more than 24 hr, but less than 48 hr) may land up to an additional 800 lb (362.9 kg) of cod for that trip, provided the vessel complies with the provisions of paragraph (b)(1)(ii) of this section. Cod on board a vessel subject to this landing limit must be separated from other species of fish and stored so as to be readily available for inspection.

(ii) A vessel that has been called into only part of an additional 24-hr block may come into port with and offload cod up to an additional 800 lb (362.9 kg), provided that the vessel operator does not call out of the DAS program as described under § 648.10(c)(3) and does not depart from a dock or mooring in port, unless transiting, as allowed in paragraph (b)(3) of this section, until the rest of the additional 24-hr block of the DAS has elapsed, regardless of whether all of the cod on board is offloaded (*e.g.*, a vessel that has been called into the DAS program for 25 hr, at the time of landing, may land only up to 1,600 lb (725.6 kg) of cod, provided the vessel does not call out of the DAS program

or leave port until 48 hr have elapsed from the beginning of the trip).

(2) *GB cod landing and maximum possession limits.* (i) Unless as provided under § 648.85, or under the provisions of paragraph (b)(2)(iii) of this section for vessels fishing with hook gear, for each fishing year, a vessel that is exempt from the landing limit described in paragraph (b)(1) of this section, and fishing under a NE multispecies DAS may land up to 1,000 lb (453.6 kg) of cod during the first 24-hr period after the vessel has started a trip on which cod were landed (*e.g.*, a vessel that starts a trip at 6 a.m. may call out of the DAS program at 11 a.m. and land up to 1,000 lb (453.6 kg)), but the vessel cannot land any more cod on a subsequent trip until at least 6 a.m. on the following day). For each trip longer than 24 hr, a vessel may land up to an additional 1,000 lb (453.6 kg) for each additional 24-hr block of DAS fished, or part of an additional 24-hr block of DAS fished, up to a maximum of 10,000 lb (4536 kg) per trip (*e.g.*, a vessel that has been called into the DAS program for 48 hr or less, but more than 24 hr, may land up to, but no more than 2,000 lb (907.2 kg) of cod). A vessel that has called into only part of an additional 24-hr block of a DAS (*e.g.*, a vessel that has called into the DAS program for more than 24 hr, but less than 48 hr) may land up to an additional 1,000 lb (453.6 kg) of cod for that trip of cod for that trip provided the vessel complies with paragraph (b)(2)(ii) of this section. Cod on board a vessel subject to this landing limit must be separated from other species of fish and stored so as to be readily available for inspection.

(ii) A vessel that has been called into only part of an additional 24 hr block, may come into port with and offload cod up to an additional 1,000 lb (453.6 kg), provided that the vessel operator does not call-out of the DAS program as described under § 648.10(c)(3) and does not depart from a dock or mooring in port, unless transiting as allowed in paragraph (b)(3) of this section, until the rest of the additional 24-hr block of the DAS has elapsed regardless of whether all of the cod on board is offloaded (*e.g.*, a vessel that has been called into the DAS program for 25 hr, at the time of landing, may land only

up to 2,000 lb (907.2 kg) of cod, provided the vessel does not call out of the DAS program or leave port until 48 hr have elapsed from the beginning of the trip).

(iii) [Reserved]

(3) *Transiting.* A vessel that has exceeded the cod landing limit as specified in paragraphs (b)(1) and (2) of this section, and that is, therefore, subject to the requirement to remain in port for the period of time described in paragraphs (b)(1)(ii)(A) and (b)(2)(ii)(A) of this section, may transit to another port during this time, provided that the vessel operator notifies the Regional Administrator, either at the time the vessel reports its hailed weight of cod, or at a later time prior to transiting, and provides the following information: Vessel name and permit number, destination port, time of departure, and estimated time of arrival. A vessel transiting under this provision must stow its gear in accordance with one of the methods specified in § 648.23(b) and may not have any fish on board the vessel.

(4) *Exemption.* A vessel fishing under a NE multispecies DAS is exempt from the landing limit described in paragraph (b)(1) of this section when fishing south of a line beginning at the Cape Cod, MA, coastline at 42°00' N. lat. and running eastward along 42°00' N. lat. until it intersects with 69°30' W. long., then northward along 69°30' W. long. until it intersects with 42°20' N. lat., then eastward along 42°20' N. lat. until it intersects with 67°20' W. long., then northward along 67°20' W. long. until it intersects with the U.S.-Canada maritime boundary, provided that it does not fish north of this exemption area for a minimum of 7 consecutive days (when fishing under the multispecies DAS program), and has on board an authorization letter issued by the Regional Administrator. Vessels exempt from the landing limit requirement may transit the GOM/GB Regulated Mesh Area north of this exemption area, provided that their gear is stowed in accordance with one of the provisions of § 648.23(b).

(c) *Atlantic halibut.* A vessel issued a NE multispecies permit under § 648.4(a)(1) may land or possess on

board no more than one Atlantic halibut per trip, provided the vessel complies with other applicable provisions of this part.

(d) *Small-mesh multispecies.* (1) Vessels issued a valid Federal NE multispecies permit specified in § 648.4(a)(1) are subject to the following possession limits for small-mesh multispecies, which are based on the mesh size used by, or on board, vessels fishing for, in possession of, or landing small-mesh multispecies.

(i) *Vessels using mesh size smaller than 2.5 inches (6.35 cm) and vessels without a letter of authorization.* Owners or operators of vessels fishing for, in possession of, or landing small-mesh multispecies with, or having on board except as provided in this section, nets of mesh size smaller than 2.5 inches (6.35 cm) (as applied to the part of the net specified in paragraph (d)(1)(iv) of this section), and vessels that have not been issued a letter of authorization pursuant to paragraphs (d)(1)(ii) or (iii) of this section, may possess on board and land up to 3,500 lb (1,588 kg) of combined silver hake and offshore hake. This possession limit on small-mesh multispecies does not apply if all nets with mesh size smaller than 2.5 inches (6.35 cm) have not been used to catch fish for the entire fishing trip and the nets have been properly stowed pursuant to § 648.23(b), and the vessel is fishing with a mesh size and a letter of authorization as specified in paragraphs (d)(1)(ii), (d)(1)(iii), and (d)(2) of this section. Silver hake and offshore hake on board a vessel subject to this possession limit must be separated from other species of fish and stored so as to be readily available for inspection. The vessel is subject to applicable restrictions on gear, area, and time of fishing specified in § 648.80 and any other applicable provision of this part.

(ii) *Vessels authorized to use nets of mesh size 2.5 inches (6.35 cm) or greater.* Except as provided in paragraph (d)(3) of this section, owners and operators of vessels issued a valid letter of authorization pursuant to paragraph (d)(2) of this section authorizing the use of nets of mesh size 2.5 inches (6.35 cm) or greater, may fish for, possess, and land small-mesh multispecies up to 7,500 lb (3,402 kg) of combined silver hake and offshore hake when fishing with nets of

a minimum mesh size of 2.5 inches (6.35 cm) (as applied to the part of the net specified in paragraph (d)(1)(iv) of this section), provided that any nets of mesh size smaller than 2.5 inches (6.35 cm) have not been used to catch such fish and are properly stowed pursuant to § 648.23(b) for the entire trip. Silver hake and offshore hake on board a vessel subject to this possession limit must be separated from other species of fish and stored so as to be readily available for inspection. The vessel is subject to applicable restrictions on gear, area, and time of fishing specified in § 648.80 and any other applicable provision of this part.

(iii) *Vessels authorized to use nets of mesh size 3 inches (7.62 cm) or greater.* Except as provided in paragraph (d)(3) of this section, owners and operators of vessels issued a valid letter of authorization pursuant to paragraph (d)(2) of this section authorizing the use of nets of mesh size 3 inches (7.62 cm) or greater, may fish for, possess, and land small-mesh multispecies up to only 30,000 lb (13,608 kg) combined silver hake and offshore hake when fishing with nets of a minimum mesh size of 3 inches (7.62 cm) (as applied to the part of the net specified in paragraph (d)(1)(iv) of this section), provided that any nets of mesh size smaller than 3 inches (7.62 cm) have not been used to catch such fish and are properly stowed pursuant to § 648.23(b) for the entire trip. Silver hake and offshore hake on board a vessel subject to this possession limit must be separated from other species of fish and stored so as to be readily available for inspection. The vessel is subject to applicable restrictions on gear, area, and time of fishing specified in § 648.80 and any other applicable provision of this part.

(iv) *Application of mesh size.* Counting from the terminus of the net, the mesh size restrictions specified in paragraphs (d)(1)(i), (ii), and (iii) of this section are only applicable to the first 100 meshes (200 bars in the case of square mesh) for vessels greater than 60 ft (18.3 m) in length, and to the first 50 meshes (100 bars in the case of square mesh) for vessels 60 ft (18.3 m) or less in length. Notwithstanding any other provision of this section, the restrictions and conditions pertaining to mesh size do not

Fishery Conservation and Management

§ 648.86

apply to nets or pieces of net smaller than 3 ft (0.9 m) × 3 ft (0.9 m), (9 sq ft (0.81 sq m)).

(2) *Possession limit for vessels participating in the northern shrimp fishery.* Owners and operators of vessels participating in the Small-Mesh Northern Shrimp Fishery Exemption, as described in § 648.80(a)(5), with a vessel issued a valid Federal NE multispecies permit specified under § 648.4(a)(1), may possess and land silver hake and offshore hake, combined, up to an amount equal to the weight of shrimp on board, not to exceed 3,500 lb (1,588 kg). Silver hake and offshore hake on board a vessel subject to this possession limit must be separated from other species of fish and stored so as to be readily available for inspection.

(3) *Possession restriction for vessels electing to transfer small-mesh NE multispecies at sea.* Owners and operators of vessels issued a valid Federal NE multispecies permit and issued a letter of authorization to transfer small-mesh NE multispecies at sea according to the provisions specified in § 648.13(b) are subject to a combined silver hake and offshore hake possession limit that is 500 lb (226.8 kg) less than the possession limit the vessel otherwise receives. This deduction shall be noted on the transferring vessel's letter of authorization from the Regional Administrator.

(e) [Reserved]

(f) *Calculation of weight of fillets or parts of fish.* The possession limits described under this part are based on the weight of whole, whole-gutted, or gilled fish. For purposes of determining compliance with the possession limits specified in paragraphs (a), (b), or (c) of this section, the weight of fillets and parts of fish, other than whole-gutted or gilled fish, as allowed under § 648.83(a) and (b), will be multiplied by 3.

(g) *Yellowtail flounder—(1) Cape Cod/GOM yellowtail flounder possession limit restrictions.* Except when fishing under the recreational and charter/party restrictions specified under § 648.89, unless otherwise restricted as specified in §§ 648.82(b)(5), and 648.88(c), a qualified vessel issued a NE multispecies permit and fishing with a limited access Handgear A permit, under a NE multispecies DAS, or under a monkfish DAS

when fishing under the limited access monkfish Category C or D permit provisions, may fish for, possess and land yellowtail flounder in or from the Cape Cod/GOM Yellowtail Flounder Area described in paragraph (g)(1)(i) of this section, subject to the requirements and trip limits specified in paragraph (g)(1)(ii) of this section.

(i) *Cape Cod/GOM Yellowtail Flounder Area.* The Cape Cod/GOM Yellowtail Flounder Area (copies of a chart depicting the area is available from the Regional Administrator upon request), is the area defined by straight lines connecting the following points in the order stated:

CAPE COD/GOM YELLOWTAIL FLOUNDER AREA

Point	N. lat.	W. long.
SYT13	(¹)	70°00'
SYT12	41°20'	70°00'
SYT11	41°20'	69°50'
SYT10	41°10'	69°50'
SYT9	41°10'	69°30'
SYT8	41°00'	69°30'
SYT7	41°00'	68°50'
USCA1	42°20'	68°50'
USCA12	42°20'	67°40'
NYT1	43°50'	67°40'
NYT2	43°50'	66°50'
NYT3	44°20'	66°50'
NYT4	44°20'	67°00'
NYT5	(²)	67°00'

¹ South facing shoreline of Cape Cod, MA.

² East facing shoreline of Maine.

(ii) *Requirements.* Vessels fishing in the Cape Cod/GOM Yellowtail Flounder Area are bound by the following requirements:

(A) The vessel must possess on board a yellowtail flounder possession/landing authorization letter issued by the Regional Administrator. To obtain this exemption letter the vessel owner must make a request in writing to the Regional Administrator.

(B) The vessel may not fish inside the SNE/MA Yellowtail Flounder Area, for a minimum of 7 consecutive days (when fishing with a limited access Handgear A permit, under the NE multispecies DAS program, or under the monkfish DAS program if the vessels is fishing under the limited access monkfish Category C or D permit provisions), unless otherwise specified in paragraph (g)(3) of this section. Vessels subject to these restrictions may fish any portion of a trip in the portion of the GB, SNE, and MA Regulated Mesh Areas outside of

§ 648.86

the SNE/MA Yellowtail Flounder Area, provided the vessel complies with the possession restrictions specified under this paragraph (g). Vessels subject to these restrictions may transit the SNE/MA Yellowtail Flounder Area, provided the gear is stowed in accordance with § 648.23(b).

(C) During the periods April through May, and October through November, the vessel may land or possess on board only up to 250 lb (113.6 kg) of yellowtail flounder per trip.

(D) During the periods June through September, and December through March, the vessel may land or possess on board only up to 750 lb (340.2 kg) of yellowtail flounder per DAS, or any part of a DAS, up to a maximum possession limit of 3,000 lb (1,364.0 kg) per trip.

(2) *SNE/MA yellowtail flounder possession limit restrictions.* Except when fishing under the recreational and charter/party restrictions specified in § 648.89, unless otherwise restricted as specified in § 648.82(b)(3) and (b)(5), and § 648.88(c), a vessel issued a NE multispecies permit and fishing with a limited access Handgear A permit, under a NE multispecies DAS, or under a monkfish DAS when fishing under the limited access monkfish Category C or D permit provisions, in the SNE/MA Yellowtail Flounder Area, described in paragraph (g)(2)(i) of this section, is subject to the requirements and trip limits specified in paragraph (g)(2)(ii) of this section, in order to fish for, possess, or land yellowtail flounder.

(i) *SNE/MA Yellowtail Flounder Area.* The SNE/MA Yellowtail Flounder Area (copies of a chart depicting the area is available from the Regional Administrator upon request), is the area defined by straight lines connecting the following points in the order stated:

SNE/MID-ATLANTIC YELLOWTAIL FLOUNDER
AREA

Point	N. lat.	W. long.
SYT1	38°00'	(1)
SY2	38°00'	72°00'
SY3	39°00'	72°00'
SY4	39°00'	71°40'
SY5	39°50'	71°40'
USCA2	39°50'	68°50'
SYT7	41°00'	68°50'
SYT8	41°00'	69°30'
SYT9	41°10'	69°30'

50 CFR Ch. VI (10–1–05 Edition)

SNE/MID-ATLANTIC YELLOWTAIL FLOUNDER
AREA—Continued

Point	N. lat.	W. long.
SYT10	41°10'	69°50'
SYT11	41°20'	69°50'
SYT12	41°20'	70°00'
SYT13	(2)	70°00'

¹ East facing shoreline of Virginia.

² South facing shoreline of Cape Cod, MA.

(ii) *Requirements.* Vessels fishing in the SNE/MA Yellowtail Flounder Area are bound by the following requirements:

(A) The vessel must possess on board a yellowtail flounder possession/landing authorization letter issued by the Regional Administrator. To obtain this exemption letter the vessel owner must make a request in writing to the Regional Administrator.

(B) The vessel may not fish in the Cape Cod/GOM Yellowtail Flounder Area for a minimum of 7 consecutive days (when fishing with a limited access Handgear A permit, under the NE multispecies DAS program, or under the monkfish DAS program if the vessels is fishing under the limited access monkfish Category C or D permit provisions), unless otherwise specified in paragraph (g)(3) of this section. Vessels subject to these restrictions may fish any portion of the GB, SNE, and MA Regulated Mesh Areas outside of the Cape Cod/GOM Yellowtail Flounder Area, provided the vessel complies with the possession restrictions specified under this paragraph (g). Vessels subject to these restrictions may transit the Cape Cod/GOM Yellowtail Flounder Area, provided gear is stowed in accordance with § 648.23(b).

(C) During the period March through June, vessels may land or possess on board only up to 250 lb (113.6 kg) of yellowtail flounder per trip.

(D) During the period July through February, vessels may land or possess on board only up to 750 lb (340.2 kg) of yellowtail flounder per DAS, or any part of a DAS, up to a maximum possession limit of 3,000 lb (1,364.0 kg) per trip.

(3) During the months of January, February, April, May, July through September, and December, when the yellowtail flounder trip limit requirements for the Cape Cod/GOM and SNE/MA Yellowtail Flounder Areas are the

same, vessels that obtain a yellowtail flounder possession/landing letter of authorization as specified under paragraphs (g)(1)(ii)(A) and (g)(2)(ii)(A) of this section are not subject to the requirements specified under paragraphs (g)(1)(ii)(B) and (g)(2)(ii)(B) of this section.

(h) *Other possession restrictions.* Vessels are subject to any other applicable possession limit restrictions of this part.

[69 FR 22978, Apr. 27, 2004]

EFFECTIVE DATE NOTE: At 70 FR 34060, June 13, 2005, §648.86 was amended by adding paragraph (a)(3), effective June 13, 2005 through Dec. 10, 2005.

§ 648.87 Sector allocation.

(a) *Procedure for implementing Sector allocation proposal.* (1) Any person may submit a Sector allocation proposal for a group of limited access NE multispecies vessels to the Council, at least 1 year in advance of the start of a sector, and request that the Sector be implemented through a framework procedure specified at §648.90(a)(2), in accordance with the conditions and restrictions of this section.

(2) Upon receipt of a Sector allocation proposal, the Council must decide whether to initiate such framework. Should a framework adjustment to authorize a Sector allocation proposal be initiated, the Council should follow the framework adjustment provisions of §648.90(a)(2). Any framework adjustment developed to implement a Sector allocation proposal must be in compliance with the general requirements specified in paragraphs (b) and (c) of this section. Vessels that do not join a Sector would remain subject to the NE multispecies regulations for non-Sector vessels specified under this part.

(b) *General requirements applicable to all Sector allocations.* (1) All Sectors approved under the provisions of paragraph (a) of this section must submit the documents specified under paragraphs (a)(1) and (b)(2) of this section, and comply with the conditions and restrictions of this paragraph (b)(1).

(i) The sector allocation must be based on either a TAC limit (hard TAC), or a maximum DAS usage limit for all vessels with a target TAC.

(ii) A Sector shall be allocated no more than 20 percent of a stock's TAC, unless otherwise authorized by the Council.

(iii) Allocation of catch or effort shall be based upon documented accumulated catch histories of the harvested stock(s) for each vessel electing to fish in a Sector, for the 5-year period prior to submission of a Sector allocation proposal to the Council. Documented catch shall be based on dealer landings reported to NMFS.

(iv) Landings histories for Sectors formed to harvest GB cod during the period 2004 through 2007 shall be based on fishing years 1996 through 2001.

(v) The Sector allocation proposal must contain an appropriate analysis that assesses the impact of the proposed Sector, in compliance with the National Environmental Policy Act.

(vi) Once a hard TAC allocated to a Sector is projected to be exceeded, Sector operations will be terminated for the remainder of the fishing year.
